TO MY FORMER PUPILS

IN BALLIOL COLLEGE

AND IN THE UNIVERSITY OF OXFORD,

WHO DURING THIRTY YEARS

HAVE BEEN THE BEST OF FRIENDS TO ME,

THESE VOLUMES ARE INSCRIBED,

IN GRATEFUL RECOGNITION

OF THEIR NEVER FAILING ATTACHMENT.

PREFACE.

THE Text which has been mostly followed in this Translation of Plato is the latest 8vo edition of Stallbaum; the principal deviations are noted at the bottom of the page.

I have to acknowledge many obligations to old friends and pupils. These are, Mr. John Purves, Fellow of Balliol College, with whom I have revised about half of the entire Translation; the Rev. Professor Campbell, of St. Andrew's, who has helped me in the revision of several parts of the work, especially of the Theaetetus, Sophist, and Politicus; Mr. Robinson Ellis, Fellow of Trinity College, and Mr. Alfred Robinson, Fellow of New College, who read with me the Cratylus and the Gorgias; Mr. Paravicini, Student of Christ Church, who assisted me in the Symposium; Mr. Raper, Fellow of Queen's College, Mr. Monro, Fellow of Oriel College, and Mr. Shadwell, Student of Christ Church, who gave me similar assistance in the Laws. Dr. Greenhill, of Hastings, has also kindly sent me remarks on the physiological part of the Timaeus, which I have inserted as corrections under the head of *errata* at the end of the Introduction. The degree of accuracy which I have been enabled to attain is in great measure due to these gentlemen, and I heartily thank them for the pains and time which they have bestowed on my work.

I have further to explain how far I have received help from other laborers in the same field. The books which I

have found most of use are Steinhart and Müller's German Translation of Plato with Introductions; Zeller's "Philosophie der Griechen," and "Platonische Studien;" Susemihl's "Genetische Entwickelung der Platonischen Philosophie;" Hermann's "Geschichte der Platonischen Philosophie;" Bonitz, "Platonische Studien;" Stallbaum's Notes and Introductions; Professor Campbell's editions of the "Theaetetus," the "Sophist," and the "Politicus;" Professor Thompson's "Phaedrus;" Th. Martin's "Études sur le Timée;" Mr. Poste's edition and translation of the "Philebus;" the Translation of the "Republic" by Messrs. Davies and Vaughan, and the Translation of the "Gorgias," by Mr. Cope.

I have also derived much assistance from the great work of Mr. Grote, which contains excellent analyses of the Dialogues, and is rich in original thoughts and observations. I agree with him in rejecting as futile the attempt of Schleiermacher and others to arrange the Dialogues of Plato into a harmonious whole. Any such arrangement appears to me not only to be unsupported by evidence, but to involve an anachronism in the history of philosophy. There is a common spirit in the writings of Plato, but not a unity of design in the whole, nor perhaps a perfect unity in any single Dialogue. The hypothesis of a general plan which is worked out in the successive Dialogues is an after-thought of the critics, who have attributed a system to writings belonging to an age when system had not as yet taken possession of philosophy.

If Mr. Grote should do me the honor to read any portion of this work he will probably remark that I have endeavored to approach Plato from a point of view which is opposed to his own. The aim of the Introductions in these volumes has been to represent Plato as the father of idealism, who is not to be measured by the standard of utilitarianism or any other modern philosophical system. He is the poet or maker of ideas, satisfying the wants of

his own age, providing the instruments of thought for future generations. He is no dreamer, but a great philosophical genius struggling with the unequal conditions of light and knowledge under which he is living. He may be illustrated by the writings of moderns, but he must be interpreted by his own, and by his place in the history of philosophy. We are not concerned to determine what is the residuum of truth which remains for ourselves. His truth may not be our truth, and nevertheless may have an extraordinary value and interest for us.

I cannot agree with Mr. Grote in admitting as genuine all the writings commonly attributed to Plato in antiquity, any more than with Schaarschmidt and some other German critics who reject nearly half of them. The German critics to whom I refer proceed chiefly on grounds of internal evidence; they appear to me to lay too much stress on the variety of doctrine and style, which must be equally acknowledged as a fact, even in the Dialogues regarded by Schaarschmidt as genuine, *e. g.* in the Phaedrus, or Symposium, when compared with the Laws. He who admits works so different in style and matter to have been the composition of the same author, need have no difficulty (see vol. iv. Appendix) in admitting the Sophist or the Politicus. On the other hand, Mr. Grote trusts mainly to the Alexandrian Canon. But I hardly think that we are justified in attributing much weight to the authority of the Alexandrian librarians in an age when there was no regular publication of books, and every temptation to forge them; and in which the writings of a school were naturally attributed to the founder of the school. And even without intentional fraud, there was an inclination to believe rather than to inquire. Would Mr. Grote accept as genuine all the writings which he finds in the lists of learned ancients attributed to Hippocrates, to Xenophon, to Aristotle? The Alexandrian Canon of the Platonic writings is deprived of credit by the admission of the Epistles, which

are not only unworthy of Plato, and in several passages plagiarized from him, but flagrantly at variance with historical fact. It will be seen also that I do not agree with Mr. Grote's views about the Sophists; nor with the low estimate which he has formed of Plato's Laws; nor with his opinion respecting Plato's doctrine of the rotation of the earth. But I "am not going to lay hands on my father Parmenides" [Soph. 241 D], who will, I hope, forgive me for differing from him on these points. I cannot close this Preface without expressing my deep respect for his noble and gentle character, and the great services which he has rendered to Greek Literature.

CHARMIDES.

INTRODUCTION.

THE subject of the Charmides is Temperance or *σωφροσύνη*, a peculiarly Greek notion, which may also be rendered Moderation,[1] Modesty, Discretion, Wisdom, without completely exhausting by all these terms the various associations of the word. It may be described as "mens sana in corpore sano," the harmony or due proportion of the higher and lower elements of human nature which "makes a man his own master," according to the definition of the Republic. In the accompanying translation the word has been rendered in different places either Temperance or Wisdom, as the connection seemed to require: for in the philosophy of Plato *σωφροσύνη* still retains an intellectual element (as Socrates also is said to have identified *σωφροσύνη* with *σοφία*: Xen. Mem. iii. 9, 4), and is not yet relegated to the sphere of moral virtue, as in the Nicomachean Ethics of Aristotle (iii. 10).

The beautiful youth, Charmides, who is also the most temperate of human beings, is asked by Socrates, "What is Temperance?" He answers characteristically, (1) "Quietness." "But temperance is a fine and noble thing; and quietness in many or most cases is not so fine a thing as quickness." He tries again, and says (2) that temperance is modesty. But this again is set aside by a sophistical application of Homer: for temperance is good as well as noble, and Homer has declared that "modesty is not good for a needy man." (3) Once more Charmides makes the attempt. This time he gives a definition which he has heard, and of which he insinuates that Critias is the author: "Temperance is doing one's own business." But the artisan who makes another man's shoes may be temperate, and yet he is not doing his own business. How is this riddle to be explained?

Critias, who takes the place of Charmides, distinguishes in his answer between "making" and "doing," and with the help of a misapplied quotation from Hesiod assigns to the words "doing" and "work" an exclusively good sense: temperance is doing one's own business; (4) is doing good.

1 Cp. Cic. *Tusc.* iii. 8, 16 — "*σωφροσύνη*, quam soleo equidem tum temperantium tum moderationem appellare nonnunquam etiam modestiam:" foll.

Still an element of knowledge is wanting which Critias is readily induced to admit at the suggestion of Socrates; and, in the spirit of Socrates and of Greek life generally, proposes as a fifth definition, (5) Temperance is self-knowledge. But all sciences have a subject: number is the subject of arithmetic, health of medicine; what is the subject of temperance or wisdom? The answer is that (6) Temperance is the knowledge of what a man knows and of what he does not know. But this is contrary to analogy; there is no vision of vision, but only of visible things; no love of loves, but only of beautiful things; how then can there be a knowledge of knowledge? That which is older, heavier, lighter, is older, heavier, and lighter than something else, not than itself, and this seems to be true of all relative notions — the object of relation is outside of them; at any rate they can only have relation to themselves in the form of that object. Whether there are any such cases of reflex relation or not, and whether that sort of knowledge which we term Temperance is of this reflex nature, has yet to be determined by the great metaphysician. But even if knowledge can know itself, how does the knowledge of what we know imply the knowledge of what we do not know? Besides this knowledge is an abstraction only, and will not inform us of any particular subject, such as medicine, building, and the like. It may tell us that we or other men know something, but can never tell what we know.

But admitting further that there is such a knowledge of what we know and do not know, which would supply a rule and measure of all things, still there would be no good in this. For temperance is a good, and the knowledge which temperance gives must be of a kind which will do us good. But this universal knowledge does not tend to our happiness or good: the only kind of knowledge which brings happiness is the knowledge of good and evil. To this Critias replies that the science or knowledge of good and evil, and all the other sciences, are regulated by the higher science or knowledge of knowledge. Socrates replies by again dividing the abstract from the concrete, and asks how this knowledge conduces to happiness in the same definite way that medicine conduces to health.

And now, after making all these concessions, which are really inadmissible, we are still as far as ever from ascertaining the nature of temperance, which Charmides has already discovered, and had therefore better rest in the knowledge that the more temperate he is the happier he will be, and not trouble himself with the speculations of Socrates.

In this Dialogue may be noted (1) the Greek ideal of beauty and goodness, the vision of the fair soul in the fair body, realized in the beautiful Charmides; (2) The true conception of medicine as a science of the whole as well as the parts, and of the mind as well as

the body, which is playfully intimated in the story of the Thracian; (3) The tendency of the age to verbal distinctions, which here, as in the Protagoras and Cratylus, are ascribed to the ingenuity of Prodicus; also the interpretations or rather parodies of Homer and Hesiod which are eminently characteristic of Plato and of his age; (4) The germ of an ethical principle contained in the notion that temperance is "doing one's own business," which in the Republic (such is the shifting character of the Platonic philosophy) is given as the definition, not of temperance, but of justice; (5) The beginnings of logic and metaphysics implied in the two questions, whether there can be a science of science? and whether the knowledge of what you know is the same as the knowledge of what you do not know? also in the distinction between "what you know," and "that you know," ἃ οἶδεν and ὅτι οἶδεν; here arises the first conception of an absolute, self-determined science (the claims of which, however, are set aside by Socrates); as well as the first suggestion of the difficulty of the abstract and concrete, and one of the earliest anticipations of the relation of subject and object, and of the subjective element in knowledge; (6) The conception of a science of good and evil also first occurs here, and may be regarded as an anticipation of the Philebus and Republic, as well as of moral philosophy in later ages.

The dramatic interest of the Dialogue chiefly centres in the youth Charmides, with whom Socrates talks in the kindly spirit of an elder. Some contrast appears to be intended between his youthful simplicity and ingenuousness and the dialectical and rhetorical arts of Critias, who is the grown-up man of the world, not without a tincture of philosophy. But neither in this nor in any other of the dialogues of Plato is that most hated of Athenians displayed in his true character. He is simply a cultivated person who, like his kinsman Plato, is ennobled by the connection of his family with Solon (cp. Tim. 20, 21), and had been the follower, if not the disciple, both of Socrates and of the Sophists. In the argument he is not unfair, if allowance is made for a slight rhetorical tendency, and for some desire to save his reputation with the company: in some respects he is nearer the truth than Socrates. Nothing in his language or behavior is unbecoming the guardian of the beautiful Charmides. His love of reputation, which is characteristically Greek, contrasts with the utter absence of this quality and profession of ignorance on the part of Socrates.

The definitions of temperance proceed in regular order from the popular to the philosophical. The first two are simple enough and partially true, like the first thoughts of an intelligent youth; the third, which is a real contribution to ethical philosophy, is perverted by the ingenuity of Socrates, and hardly rescued by an equal perversion on the part of Critias. The remaining definitions have a higher aim, which is to introduce the element of knowledge, and at

last to unite good and truth in a single science. But the time has not yet arrived for the realization of this vision of metaphysical philosophy; and such a science, when brought nearer to us in the Philebus and the Republic, will not be called by the name of σωφροσύνη. Hence we see with surprise that Plato, who in his other writings identifies good and knowledge, here opposes them, and asks, almost in the spirit of Aristotle, how can there be a knowledge of knowledge, and even if attainable, how can such a knowledge be of any use?

The relations of knowledge and virtue are again brought forward in the companion Dialogues of the Lysis and Laches; and also in the Protagoras and Euthydemus. The opposition of abstract and particular knowledge in this Dialogue may be compared with a similar opposition of ideas and phenomena which occurs in the Introduction to the Parmenides, but seems rather to belong to a later stage of the philosophy of Plato.

CHARMIDES, OR TEMPERANCE.

PERSONS OF THE DIALOGUE.

SOCRATES, *who is the narrator.* CHARMIDES.
CHAEREPHON. CRITIAS.

SCENE: — The Palaestra of Taureas, which is near the Porch of the King Archon.

YESTERDAY evening I returned from the army at Potidaea, and having been a good while away, Steph. 153 I thought that I would go and look at my old haunts. So I went into the palaestra of Taureas, which is over against the temple adjoining the porch of the King Archon, and there I found a number of persons, most of whom I knew, but not all. My visit was unexpected, and no sooner did they see me entering than they saluted me from afar on all sides; and Chaerephon, who is a kind of madman, started up and ran to me, seizing my hand, and saying, How did you escape, Socrates? — (I should explain that an engagement had taken place at Potidaea not long before we came away, the news of which had only just reached Athens.)

You see, I replied, that here I am.

There was a report, he said, that the engagement was very severe, and that many of our acquaintance had fallen.

That, I replied, was not far from the truth.

I suppose, he said, that you were present.

I was.

Then sit down and tell us the whole story, which as yet we have only heard imperfectly.

I took the place which he assigned to me, by the side of Critias the son of Callaeschrus, and when I had saluted him

and the rest of the company, I told them the news from the army, and answered their several inquiries.

Then, when there had been enough of this, I, in my turn, began to make inquiries about matters at home — about the present state of philosophy, and about the youth. I asked whether any of them were remarkable for beauty or sense, or
154 both. Critias, glancing at the door, invited my attention to some youths who were coming in, and talking noisily to one another, followed by a crowd. Of the beauties, Socrates, he said, I fancy that you will soon be able to form a judgment. For those who are just entering are the advanced guard of the great beauty of the day, and he is likely to be not far off himself.

Who is he, I said; and who is his father?

Charmides, he replied, is his name; he is my cousin, and the son of my uncle Glaucon: I rather think that you know him, although he was not grown up at the time of your departure.

Certainly, I know him, I said, for he was remarkable even then when he was still a child, and now I should imagine that he must be almost a young man.

You will see, he said, in a moment what progress he has made and what he is like. He had scarcely said the word, when Charmides entered.

Now you know, my friend, that I cannot measure anything, and of the beautiful, I am simply such a measure as a white line is of chalk; for almost all young persons are alike beautiful in my eyes. But at that moment, when I saw him coming in, I must admit that I was quite astonished at his beauty and stature; all the world seemed to be enamored of him; amazement and confusion reigned when he entered; and a troop of lovers followed him. That grown-up men like ourselves should have been affected in this way was not surprising, but I observed that there was the same feeling among the boys; all of them, down to the very least child, turned and looked at him as if he had been a statue.

Chaerephon called me and said: What do you think of him, Socrates? Has he not a beautiful face?

That he has, indeed, I said.

But you would think nothing of his face, he replied, if you could see his naked form: he is absolutely perfect.

And to this they all agreed.

By Heracles, I said, there never was such a paragon, if he has only one other slight addition.

What is that? said Critias.

If he has a noble soul; and being of your house, Critias, he may be expected to have this.

He is as fair and good within, as he is without, replied Critias.

Shall we ask him then, I said, to show us, not his body, but his soul, naked and undisguised? he is just of an age at which he will like to talk.

That he will, said Critias, and I can tell you that he is a philosopher already, and also a considerable poet, not in his own opinion only, but in that of others. 155

That, my dear Critias, I replied, is a distinction which has long been in your family, and is inherited by you from Solon. But why don't you call him, and show him to us? for even if he were younger than he is, there could be no impropriety in his talking to us in the presence of you, who are his guardian and cousin.

Very well, he said; then I will call him; and turning to the attendant, he said, Call Charmides, and tell him that I want him to come and see a physician about the illness of which he spoke to me the day before yesterday. Then again addressing me, he added: He has been complaining lately of having a headache when he rises in the morning: now why should you not make believe to him that you know a cure for the headache?

There will be no difficulty about that, I said, if he comes.

He will be sure to come, he replied.

He came as he was bidden, and sat down between Critias and me. Great amusement was occasioned by every one pushing with might and main at his neighbor in order to make a place for him next to them, until at the two ends of the row one had to get up and the other was rolled over sideways. Now I, my friend, was beginning to feel awkward; my former bold belief in my powers of conversing with him had vanished. And when Critias told him that I was the person who had the cure, he looked at me in such an indescribable manner, and was about to ask a question; and then all the people in the palaestra crowded about us, and, O rare! I caught a sight of the inwards of his garment, and took the flame. Then I could no longer contain myself. I thought how well Cydias understood the nature of love, when, in speaking of a fair youth, he warns some one "not to bring the fawn in sight of the lion lest he devour him," for I felt that I had been overcome by a sort of

wild beast appetite. But I controlled myself, and when he asked me if I knew the cure of the headache, I answered, but with an effort, that I did know.

And what is it? he said.

I replied that it was a kind of leaf, which required to be accompanied by a charm, and if a person would repeat the charm at the same time that he used the cure, he would be made whole; but that without the charm the leaf would be of no avail.

156 Then I will write out the charm from your dictation, he said.

With my good-will? I said, or without my good-will?

With your good-will, Socrates, he said, laughing.

Very good, I said; and are you quite sure that you know my name?

I ought to know you, he replied, for there is a great deal said about you among my companions; and I remember when I was a child seeing you in company with my cousin Critias.

That is very good of you, I said; and will make me more at home with you in explaining the nature of the charm; I was thinking that I might have a difficulty about this. For the charm will do more, Charmides, than only cure the headache. I dare say that you may have heard eminent physicians say to a patient who comes to them with bad eyes, that they cannot cure his eyes by themselves, but that if his eyes are to be cured, his head must be treated; and then again they say that to think of curing the head alone, and not the rest of the body also, is the height of folly. And arguing in this way they apply their methods to the whole body, and try to treat and heal the whole and the part together. Did you ever observe that this is what they say?

Yes, he said.

And they are right, and you would agree with them?

Yes, he said, certainly I should.

His approving answers reassured me, and I began by degrees to regain confidence, and the vital heat returned. Such, Charmides, I said, is the nature of the charm. Now I learnt it when serving with the army, of one of the physicians of the Thracian king, Zamolxis. He was one of those who are said to give immortality. This Thracian told me that the Greek physicians are quite right in these notions of theirs, which I was mentioning, as far as they go; but Zamolxis, he added,

our king, who is also a god, says further, "that as you ought not to attempt to cure the eyes without the head, or the head without the eyes, so neither ought you to attempt to cure the body without the soul; and this," he said, "is the reason why the cure of many diseases is unknown to the physicians of Hellas, because they are ignorant of the whole, which ought to be studied also; for the part can never be well unless the whole is well." For all good and evil, whether in the body or in human nature, originates, as he declared, in the soul, and overflows from thence, as from the head into the eyes. And therefore if the head and the body are to be well, you must begin by curing the soul; that is the first thing. And the cure, my dear youth, has to be effected by the use of certain charms, and these charms are fair words; and by them temperance is implanted in the soul, and where temperance is, there health is speedily imparted, not only to the head, but to the whole body. And he who taught me the cure and the charm added a special direction: "Let no one," he said, "persuade you to cure the head, until he has first given you his soul to be cured by the charm. For this," he said, "is the great error of our day in the treatment of the human body, that physicians separate the soul from the body." And he added with emphasis, at the same time making me swear to his words, "Let no one, however rich, or noble, or fair, persuade you to give him the cure, without the charm." Now I have sworn, and I must keep my oath, and therefore if you will allow me to apply the Thracian charm first to your soul, as the stranger directed, I will afterwards proceed to apply the cure to your head. But if not, I do not know what I am to do with you, my dear Charmides. 157

Critias, when he heard this, said: The headache will be an unexpected benefit to my young relation, if the pain in his head compels him to improve his mind: and I can tell you, Socrates, that Charmides is not only preëminent in beauty among his equals, but also in that quality which is given by the charm; and this, as you say, is temperance, is it not?

Yes, I said.

Then let me tell you that he is the most temperate of human beings, and for his age inferior to none in any quality.

Yes, I said, Charmides; and indeed I think that you ought to excel others in all good qualities; for if I am not mistaken there is no one present who could easily point out two Athe-

nian houses, the alliance of which was likely to produce a better or nobler son than the two from which you are sprung. There is your father's house, which is descended from Critias the son of Dropidas, whose family has been commemorated in the panegyrical verses of Anacreon, Solon, and many other poets, as famous for beauty and virtue and all other high fortune: and
158 your mother's house is equally distinguished; for your maternal uncle, Pyrilampes, never met with his equal in Persia at the court of the great king, or on the whole continent in all the places to which he went as ambassador, for stature and beauty; that whole family is not a whit inferior to the other. Having such ancestors you ought to be first in all things, and as far as I can see, sweet son of Glaucon, your outward form is no dishonor to them. And if you have temperance as well as beauty, as Critias declares, then blessed art thou, dear Charmides, in being the son of thy mother. And this is the question: if this gift of temperance is already yours, as Critias declares, and you are temperate enough, in that case you have no need of any charms, whether of Zamolxis, or of Abaris the Hyperborean, and I may as well give you the cure of the head at once; but if you are wanting in these qualities, I must use the charm before I give you the medicine. Please, therefore, to inform me whether you admit the truth of what Critias has been saying about your gift of temperance, or are you wanting in this particular?

Charmides blushed, and the blush heightened his beauty, for modesty is becoming in youth; he then said very ingenuously, that he really could not say at once, either yes, or no, in answer to the question which I had asked: For, said he, if I affirm that I am not temperate, that would be a strange thing to say of myself, and also I should have to give the lie to Critias, and many others, who think that I am temperate, as he tells you: but, on the other hand, if I say that I am, I shall have to praise myself, which would be ill manners; and therefore I have no answer to make to you.

I said to him: That is a natural reply, Charmides, and I think that you and I may as well inquire together whether you have this quality about which I am asking or not; and then you will not be compelled to say what you do not like; neither shall I be a rash practitioner of medicine: therefore, if you please, I will join with you in the inquiry, but I will not press you if you would rather not.

There is nothing which I should like better, he said; and as far as I am concerned you may proceed in the way which you think best.

I think, I said, that I had better begin by asking you, What is Temperance? for you must have an opinion about this: if Temperance abides in you, she must give some intimation of her nature and qualities, which may enable you to form some notion of her. Is not that true? 159

Yes, he said, that I think is true.

And as you speak Greek, I said, you can surely describe what this appears to be, which you have within you.

Certainly, he said.

In order, then, that I may form a conjecture whether you have temperance abiding in you or not, tell me, I said, what, in your opinion, is Temperance?

At first he hesitated, and was very unwilling to answer: then he said that he thought temperance was doing things orderly and quietly, such things for example as walking in the streets, and talking, or anything else of that nature. In a word, he said, I should answer that, in my opinion, temperance is quietness.

Are you right, Charmides? I said. No doubt the opinion is held that the quiet are the temperate; but let us see whether they are right who say this; and first tell me whether you would not acknowledge temperance to be of the class of the honorable and good?

Yes.

But which is best when you are at the writing-master's, to write the same letters quickly or quietly?

Quickly.

And to read quickly or slowly?

Quickly again.

And in playing the lyre, or wrestling, quickness or cleverness are far better than quietness and slowness?

Yes.

And the same holds in boxing and the pancratium?

Certainly.

And in leaping and running, and bodily exercises generally, quickness and agility are good; slowness, and inactivity, and quietness, are bad?

That is evident.

Then, I said, in all bodily actions, not quietness, but the greatest agility and quickness, is noblest and best?

Yes, certainly.

And is temperance a good?

Yes.

Then, in reference to the body, not quietness, but quickness, will be the higher degree of temperance, if temperance is a good?

True, he said.

And which, I said, is better — facility in learning, or difficulty in learning?

Facility.

Yes, I said; and facility in learning is learning quickly, and difficulty in learning is learning quietly and slowly?

True.

And is it not better to teach one another quickly and energetically, rather than quietly and slowly?

Yes.

And to call to mind, and to remember, quickly and readily — that is also better than to remember quietly and slowly?

Yes.

160 And is not shrewdness a quickness or cleverness of the soul, and not a quietness?

True.

And is it not best to understand what is said, whether at the writing-master's or the music-master's, or anywhere else, not as quietly as possible, but as quickly as possible?

Yes.

And when the soul inquires, and in deliberations, not the quietest, as I imagine, and he who with difficulty deliberates and discovers, is thought worthy of praise, but he who does this most easily and quickly?

That is true, he said.

And in all that concerns either body or soul, swiftness and activity are clearly better than slowness and quietness?

That, he said, is the inference.

Then temperance is not quietness, nor is the temperate life quiet, upon this view; for the life which is temperate is supposed to be the good. And of two things, one is true, — either never, or very seldom, do the quiet actions in life appear to be better than the quick and energetic ones; or, granting ever so much that of the nobler sort of actions, there are as many quiet, as quick and vehement ones: still, even if we admit this, temperance will not be acting quietly any more than acting quickly

and vehemently, either in walking, talking, or anything else; nor will the quiet life be more temperate than the unquiet, seeing that temperance is reckoned by us in the class of good and honorable, and the quick have been shown to be as good as the quiet.

I think, he said, Socrates, that you are right in saying that.

Then once more, Charmides, I said, fix your attention, and look within; consider the effect which temperance has upon yourself, and the nature of that which has the effect. Think over that, and, like a brave youth, tell me — What is temperance.

After a moment's pause, in which he made a real manly effort to think, he said: My opinion is, Socrates, that temperance makes a man ashamed or modest, and that temperance is the same as modesty.

Very good, I said; and did you not admit, just now, that temperance is honorable?

Yes, certainly, he said.

And the temperate are also good?

Yes.

And can that be good which does not make men good?

Certainly not.

And you would infer that temperance is not only honorable, but also good?

That is my opinion.

Well, I said; and surely you would agree with Homer 161
when he says,

"Modesty is not good for a needy man?"

Yes, he said; I agree to that.

Then I suppose that modesty is and is not good?

That is plain.

But temperance, whose presence makes men only good, and not bad, is always good?

That appears to me to be as you say.

Then the inference is, that temperance cannot be modesty — if temperance is a good, and if modesty is as much an evil as a good?

All that, Socrates, appears to me to be true; but I should like to know what you think about another definition of temperance, which I just now remember to have heard from some one, who said, "That temperance is doing our own business." Was he right who affirmed that?

You young monster! I said; this is what Critias, or some philosopher has told you.

Some one else, then, said Critias; for certainly I have not.

But what matter, said Charmides, from whom I heard this?

No matter at all, I replied; for the point is not who said the words, but whether they are true or not.

There you are in the right, Socrates, he replied.

To be sure, I said; yet I doubt whether we shall ever be able to discover their truth or falsehood; for they are a riddle.

What makes you think that? he said.

Because, I said, he who uttered them seems to me to have meant one thing, and said another. Is the scribe, for example, to be regarded as doing nothing when he reads or writes?

I should rather think that he was doing something.

And does the scribe write or read, or teach you boys to write or read, your own names only, or did you write your enemies' names as well as your own and your friends'?

As much one as the other.

And was there anything meddling or intemperate in this?

Certainly not.

And yet, if reading and writing are the same as doing, you were doing what was not your own business?

But they are the same as doing.

And the healing art, my friend, and building, and weaving, and doing anything whatever which is done by art, all come under the head of doing?

Certainly.

And do you think that a state would be well ordered by a law which compelled every man to weave and wash his own coat, and make his own shoes, and his own flask and strigil,
162 and other implements, on this principle of every one doing and performing his own, and abstaining from what is not his own?

I think not, he said.

But, I said, a temperate state will be a well-ordered state.

Of course, he replied.

Then temperance, I said, will not be doing one's own business; at least not in this way, or not doing these sort of things?

Clearly not.

Then, as I was just now saying, he who declared that temperance is a man doing his own business had another and a

hidden meaning; for I don't think that he could have been such a fool as to mean this. Was he a fool who told you, Charmides?

Nay, he replied, I certainly thought him a very wise man.

Then I am quite certain that he put forth this as a riddle: he meant to say that there was a difficulty in a man knowing what is his own business.

I dare say, he replied.

And what, then, is the meaning of a man doing his own business? Can you tell me?

Indeed, I cannot, he said; and I shouldn't wonder if he who said this had no notion of his own meaning. And in saying this he laughed slyly, and looked at Critias.

Critias had long been showing uneasiness, for he felt that he had a reputation to maintain with Charmides and the rest of the company. He had, however, hitherto managed to restrain himself; but now he could no longer forbear, and his eagerness satisfied me of the truth of my suspicion, that Charmides had heard this answer about temperance from Critias. And Charmides, who did not want to answer himself, but to make Critias answer, tried to stir him up. He went on pointing out that he had been refuted, and at this Critias got angry, and, as I thought, was rather inclined to quarrel with him; just as a poet might quarrel with an actor who spoiled his poems in repeating them; so he looked hard at him and said, —

Do you imagine, Charmides, that the author of the definition of temperance did not understand the meaning of his own words, because you don't understand them?

Why, at his age, I said, most excellent Critias, he can hardly be expected to understand; but you, who are older, and have studied, may well be assumed to know the meaning of them; and therefore, if you agree with him, and accept his definition of temperance, I would much rather argue with you than with him about the truth or falsehood of the definition.

I entirely agree, said Critias, and accept the definition.

Very good, I said; and now let me repeat my question — Do you admit, as I was just now saying, that all craftsmen make ~~or do~~ something? 163 a

I do.

And do they make or do their own business only, or that of others also? 163

They make that of others also.

And are they temperate, seeing that they make not for themselves or their own business only?

Why not? he said.

No objection on my part, I said, but there may be a difficulty on his who proposes as a definition of temperance, "doing one's own business," and then says that there is no reason why those who do the business of others should not be temperate.

Nay,[1] said he; did I ever acknowledge that those who do the business of others are temperate? I said, those who make, not those who do.

What! I asked; do you mean to say that doing and making are not the same?

No more, he replied, than making or working are the same: that I have learned from Hesiod, who says that "work is no disgrace." Now do you imagine that if he had meant by working such things as you were describing, he would have said that there was no disgrace in them? in making shoes, for example, or in selling pickles, or sitting for hire in a house of ill fame. That, Socrates, is not to be supposed: but, as I imagine, he distinguished making from action and work; and, while admitting that the making anything might sometimes become a disgrace, when the employment was not honorable, thought that work was never any disgrace at all. For things nobly and usefully made he called works; and such makings he called workings, and doings; and he must be supposed to have called such things only man's proper business, and what is hurtful, not his business: and in that sense Hesiod, and any other wise man, may be reasonably supposed to call him wise who does his own work.

O Critias, I said, no sooner had you opened your mouth, than I pretty well knew that you would call that which is proper to a man, and that which is his own, good; and that the making (ποιήσεις) of the good you would call doings (πράξεις), for I have heard Prodicus drawing endless distinctions about names. Now I have no objection to your giving names any sense that you please, if you will only tell me what you mean by them. Please then to begin again, and be a little plainer. Do you not mean that this doing or making, or whatever is the word which you would use, of good actions, is temperance?

I do, he said.

[1] The English reader has to observe that the word "make" ποιεῖν), in Greek, has also the sense of "do" (πράττειν).

Then not he who does evil, but he who does good, is temperate?

Yes, he said; and you would agree to that.

Never mind whether I agree or not; as yet we are only concerned with your meaning.

Well, he answered; I mean to say, that he who does evil, and not good, is not temperate; and that he is temperate who does good, and not evil; for temperance I define in plain words to be the doing of good actions.

And you may be very likely right in that, I said; but I am curious to know whether you imagine that temperate men are ignorant of their own temperance? 164

I do not imagine that, he said.

And yet were you not saying, not so very long ago, that craftsmen might be temperate in doing another's work, as well as their own?

Yes, I was, he replied; but why do you refer to that?

I have no particular reason, but I wish you would tell me whether a physician who cures a patient may do good to himself and good to another also?

I think that he may.

And he who does this does his duty. And does not he who does his duty act temperately or wisely?

Yes, he acts wisely.

But must the physician necessarily know when his treatment is likely to prove beneficial, and when not? or must the craftsman necessarily know when he is likely to be benefited, and when not to be benefited, by the work which he is doing?

I suppose not.

Then, I said, he may sometimes do good or harm, and not know what he is himself doing, and yet, in doing good, as you say, he has done temperately or wisely. Was not that your statement?

Yes.

Then, as would seem, in doing good, he may act wisely or temperately, and be wise or temperate, but not know his own wisdom or temperance?

But that, Socrates, he said, is impossible; and therefore if that is, as you imply, the necessary consequence of any of my previous admissions, I would rather withdraw them, and not be ashamed to confess that I was mistaken, than admit that a man can be temperate or wise, who does not know himself. For

self-knowledge would certainly be maintained by me to be the very essence of knowledge, and in this I agree with him who dedicated the inscription, "Know thyself!" at Delphi. That word, if I am not mistaken, is put there as a sort of salutation which the god addresses to those who enter the temple; as much as to say that the ordinary salutation of "Hail!" is not right, and that the exhortation "Be temperate!" would be a far better way of saluting one another. The notion of him who dedicated the inscription was, as I believe, that the god speaks to those who enter his temple not as men speak; but, when a worshipper enters, the first word which he hears is "Be temperate!" This, however, like a prophet he expresses in a sort of riddle, for "Know thyself!" and "Be temperate!" are the same, as I maintain, and as the writing implies [*σωφρόνει, γνῶθι σεαυτόν*], and yet they may be easily misunderstood; and succeeding sages who added "Never too much," or, "Give a
165 pledge, and evil is nigh at hand," would appear to have misunderstood them; for they imagined that "Know thyself!" was a piece of advice which the god gave, and not his salutation of the worshippers at their first coming in; and they wrote their inscription under the idea that they would give equally useful pieces of advice. Shall I tell you, Socrates, why I say all this? My object is to leave the previous discussion (in which I know not whether you or I are more right, but, at any rate, no clear result was attained), and to raise a new one in which I will attempt to prove, if you deny, that temperance is self-knowledge.

Yes, I said, Critias; but you come to me as though I professed to know about the questions which I ask, and as though I could, if only I would, agree with you.[1] Whereas the fact is that I am, as you are, an inquirer into the truth of your proposition; and when I have inquired, I will say whether I agree with you or not. Please then to allow me time to reflect.

Reflect, he said.

I am reflecting, I replied, and discover that temperance, or wisdom, if implying a knowledge of anything, must be a science, and a science of something.

Yes, he said; the science of itself.

And is not medicine, I said, the science of health?

True.

[1] Reading, according to Heusde's conjecture, *ὁμολογήσοντός σοι.*

And suppose, I said, that I were asked by you what is the use or effect of medicine, which is this science of health, I should answer that medicine is of very great use in producing health which, as you will admit, is an excellent effect.

Granted.

And if you were to ask me, what is the result or effect of architecture, which is the science of building, I should say houses, and so of other arts, which all have their different results. Now I want you, Critias, to answer a similar question about temperance, or wisdom, to which you ought to know the answer, if, as you say, wisdom or temperance is the science of itself. Admitting this, I ask, what good work, worthy of the name, does wisdom effect? Answer me that.

That is not the true way of pursuing the inquiry, Socrates he said; for wisdom is not like the other sciences, any more than they are like one another: but you proceed as if they were alike. For tell me, he said, what result is there of computation or geometry, in the same sense as a house is the result of building, or a garment of weaving, or any other work of any other art? Can you show me any such result of them? 166
You cannot.

That is true, I said; but still each of these sciences has a subject which is different from the science. I can show you that the art of computation has to do with odd and even numbers in their numerical relations to themselves and to each other. Is not that true?

Yes, he said.

And the odd and even numbers are not the same with the art of computation?

They are not.

The art of weighing, again, has to do with lighter and heavier: but the art of weighing is one thing, and the heavy and the light another. Do you admit that?

Yes.

Now, I want to know, what is that which is not wisdom, and of which wisdom is the science?

That is precisely the old error, Socrates, he said. You come asking in what wisdom differs from the other sciences; and then you carry on the inquiry, as if they were alike: but that is not the case, for all the other sciences are of something else, and not of themselves; but that alone is a science of other sciences, and of itself. And of this, as I believe, you are very well

aware; and that you are only doing what you denied that you were doing just now, leaving the argument and trying to refute me.

And what if I am refuting you? How can you think that I have any other motive in this but what I should have in examining into myself? which motive would be just a fear of my unconsciously fancying that I knew something of which I was ignorant. And at this moment I pursue the inquiry chiefly for my own sake, and perhaps in some degree also for the sake of my other friends. For is not the discovery of things as they truly are a common good to all mankind?

Yes, certainly, Socrates, he said.

Then, I said, be of good cheer, sweet sir, and give your opinion in answer to the question which I asked, without minding whether Critias or Socrates is the person refuted; attend only to the argument, and see what will come of the refutation.

I think that you are right, he replied; and I will do as you say.

Tell me, then, I said, what you mean to affirm about wisdom.

I mean, he said, that wisdom is the only science which is the science of itself and of the other sciences as well.

But the science of science, I said, will also be the science of the absence of science.

Very true, he said.

167 Then the wise or temperate man, and he only, will know himself, and be able to examine what he knows or does not know, and see what others know, and think that they know and do really know; and what they do not know, and fancy that they know, when they do not. No other person will be able to do this. And this is the state and virtue of wisdom, or temperance, and self-knowledge, which is just knowing what a man knows, and what he does not know. That is your view?

Yes, he said.

Now then, I said, making an offering of the third or last argument to Zeus the Saviour, let us once more begin, and ask, in the first place, whether this knowledge that you know and do not know what you know and do not know is possible; and in the second place, whether, even if quite possible, such knowledge is of any use.

That is what we must consider, he said.

And here, Critias, I said, I hope that you will find a way out

of a difficulty into which I have got myself. Shall I tell you the difficulty?

By all means, he replied.

Does not what you have been saying, if true, amount to this; that there must be a science which is wholly a science of itself, and also of other sciences, and that the same is also the science of the absence of science?

True.

But consider how monstrous this is, my friend: in any parallel case, the impossibility will be transparent to you.

How is that? and in what cases do you mean?

In such cases as this: Suppose that there is a kind of vision which is not like ordinary vision, but a vision of itself and of other sorts of vision, and of the defect of them, which in seeing sees no color, but only itself and other sorts of vision. Do you think that there is such a kind of vision?

Certainly not.

Or is there a kind of hearing which hears no sound at all, but only itself and other sorts of hearing, or the defects of them?

There is not.

Or take all the senses: can you imagine that there is any sense of itself and of other senses, but which is incapable of perceiving the objects of the senses?

I think not.

Could there be any desire which is not the desire of any pleasure, but of itself, and of all other desires?

Certainly not.

Or can you imagine a wish which wishes for no good, but only for itself and all other wishes?

I should answer, No.

Or would you say that there is a love which is not the love of beauty, but of itself and of other loves?

I should not.

Or did you ever know of a fear which fears itself or other fears, but has no object of fear? 168

I never did, he said.

Or of an opinion which is an opinion of itself and of other opinions, and which has no opinion on the subjects of opinion in general?

Certainly not.

But surely we are assuming a science of this kind, which,

having no subject-matter, is a science of itself and of the other sciences; for that is what is affirmed. Now this is strange, if true: however, we must not as yet absolutely deny the possibility of such a science; let us rather consider the matter.

You are quite right.

Well then, this science of which we are speaking is a science of something, and is of a nature to be a science of something?

Yes.

Just as that which is greater is of a nature to be greater than something?[1]

Yes.

Which is less, if the other is to be conceived as greater?

To be sure.

And if we could find something which is at once greater than self, and greater than other great things, but not greater than those things in comparison of which the others are greater, then that thing would have the property of being greater and also less than itself?

That, Socrates, he said, is the inevitable inference.

Or if there be a double which is double of other doubles and of itself, they will be halves; for the half is relative to the double?

That is true.

And that which is greater than itself will also be less, and that which is heavier will also be lighter, and that which is older will also be younger: and the same of other things; that which has a nature relative to self will retain also the nature of its object. I mean to say, for example, that hearing is, as we say, of sound or voice. Is that true?

Yes.

Then if hearing hears itself, it must hear a voice; for there is no other way of hearing.

Certainly.

And sight also, my excellent friend, if it sees itself must see a color, for sight cannot see that which has no color.

No.

Then do you see, Critias, that in several of the examples

[1] Socrates is intending to show that science differs from the object of science, as any other relative differs from the object of relation. A relation to self as well as to other things involves in the case of comparison of magnitudes an absolute contradiction; and in other cases, as in the case of the senses, is hardly conceivable. The use of the genitive after the comparative in Greek, *μεῖζόν τινος*, creates an unavoidable obscurity in the translation.

which have been recited the notion of a relation to self is altogether inadmissible, and in other cases hardly credible, — inadmissible, for example, in the case of magnitudes, numbers, and the like.

Very true.

But in the case of hearing, and the power of self-motion, and the power of heat to burn, this relation to self will be regarded as incredible by some, but perhaps not by others. And some great man, my friend, is wanted, who will satisfactorily determine for us, whether there is nothing which has an inherent property of relation to self, or some things only and not others; and whether in this latter class, if there be such a class, that science which is called wisdom or temperance is included. I altogether distrust my own power of determining this: I am not certain whether there is such a science of science at all; and even if there be, I should not acknowledge this to be wisdom or temperance, until I can also see whether such a knowledge would or would not do us any good; for I have an impression that temperance is a benefit and a good. And therefore, O son of Callaeschrus, as you maintain that temperance or wisdom is a science of science, and also of the absence of science, I will request you to show, in the first place, as I was saying before, the possibility, and in the second place, the advantage, of such a science; and then perhaps you may satisfy me that you are right in your view of temperance. 169

Critias heard me say this, and saw that I was in a difficulty; and as one person when another yawns in his presence catches the infection of yawning from him, so did he seem to be driven into a difficulty by my difficulty. But as he had a reputation to maintain, he was ashamed to admit before the company that he could not answer my challenge or decide the question at issue; and he made an unintelligible attempt to hide his perplexity. In order that the argument might proceed, I said to him, Well then, Critias, if you like, let us assume that there may be this science of science; whether the assumption is right or wrong may be hereafter investigated. But fully admitting this, will you tell me how such a science enables us to distinguish what we know or do not know, which, as we were saying, is self-knowledge or wisdom. That is what we were saying?

Yes, Socrates, he said; and that I think is certainly true for he who has that science or knowledge which knows itself

will become like that knowledge which he has, in the same way that he who has swiftness will be swift, and he who has beauty will be beautiful, and he who has knowledge will know. In the same way he who has that knowledge which is the knowledge of itself, will know himself.

I do not doubt, I said, that a man will know himself, when he possesses that which has self-knowledge: but what necessity is there that, having this, he should know what he knows and what he does not know?

170 Because, Socrates, they are the same.

Very likely, I said; but I remain as stupid as ever; for still I fail to comprehend how this knowing what you know and do not know is the same as the knowledge of self.

What do you mean? he said.

This is what I mean, I replied: I will admit that there is a science of science, but can this do more than determine that of two things one is and the other is not science or knowledge?

No, just that.

Then is knowledge or want of knowledge of health the same as knowledge or want of knowledge of justice?

Certainly not.

The one is medicine, and the other is politics; but that of which we are speaking is knowledge pure and simple.

Very true.

And if a man knows only, and has only knowledge of knowledge, and has no further knowledge of health and justice, the probability is that he will only know that he knows something, and has a certain knowledge, whether concerning himself or other men.

True.

But how will this knowledge or science teach him to know what he knows? Say that he knows health, — not wisdom or temperance, but the art of medicine has taught him that, — and he has learned harmony from the art of music, and building from the art of building, — neither, from wisdom or temperance and the same of other things.

That is evident.

But how will wisdom, regarded only as a knowledge of knowledge or science of science, ever teach him that he knows health, or that he knows building?

That is impossible.

Then he who is ignorant of this will only know that he knows, but not what he knows?

True.

Then wisdom or being wise appears to be not the knowledge of the things which we do or do not know, but only the knowledge that we know and do not know?

That is the inference.

Then he who has this knowledge will not be able to examine whether a pretender knows or does not know that which he says that he knows: he will only know that he has a knowledge of some kind; but wisdom will not show him of what the knowledge is?

Plainly not.

Neither will he be able to distinguish the pretender in medicine from the true physician, nor between any other true and false professor of knowledge. Let us consider the matter in this way: If the wise man or any other man wants to distinguish the true physician from the false, what is he to do? He will not talk to him about medicine; and that, as we were saying, is the only thing which the physician understands.

True.

And he certainly knows nothing of science, for this has been assumed to be the province of wisdom.

True.

But then again, if medicine is a science, neither will the physician know anything of medicine. 171

Exactly.

The wise man will indeed know that the physician has some kind of science or knowledge; but when he wants to discover the nature of this he will ask, What is the subject-matter? For each science is distinguished, not as science, but by the nature of the subject. Is not that true?

Yes; that is quite true.

And medicine is distinguished from other sciences as having the subject-matter of health and disease?

Yes.

And he who would inquire into the nature of medicine must pursue the inquiry into health and disease, and not into what is extraneous?

True.

And he who judges rightly will judge of the physician as a physician in what relates to these?

He will.

He will consider whether what he says is true, and whether what he does is right in relation to these?

He will.

But can any one appreciate either without having a knowledge of medicine?

He cannot.

Nor any one but the physician, not even the wise man, as appears; for that would require him to be a physician as well as a wise man?

Very true.

Then, assuredly, wisdom or temperance, if only a science of science, and of the absence of science or knowledge, will not be able to distinguish the physician who knows from one who does not know but pretends or thinks that he knows, or any other professor of anything at all; like any other artist, he will only know his fellow in art or wisdom, and no one else.

That is evident, he said.

But then what profit, Critias, I said, is there any longer in wisdom or temperance which yet remains, if this is wisdom? If, indeed, as we were supposing at first, the wise man had been able to distinguish what he knew and did not know, and that he knew the one and did not know the other, and to recognize a similar faculty of discernment in others, there would certainly have been a great advantage in being wise; for then we should never have made a mistake, but have passed through life the unerring guides of ourselves and of those who were under us; and we should not have attempted to do what we did not know, but we should have found out those who knew, and confided in them; nor should we have allowed those who were under us to do anything which they were not likely to do well; and they would be likely to do well just that of which they had knowledge; and the house or state which was ordered or administered under the guidance of wisdom would have been well ordered, and everything else of which wisdom was the
172 lord; for truth guiding, and error having been expelled, in all their doings, men would have done well, and would have been happy. Was not this, Critias, what we spoke of as the great advantage of wisdom — to know what is known and what is unknown to us?

Very true, he said.

And now you perceive, I said, that no such science is to be found anywhere.

I perceive, he said.

May we assume then, I said, that wisdom, viewed in this

new light merely as a knowledge of knowledge and ignorance, has this advantage — that he who possesses such knowledge will more easily learn anything that he learns; and that everything will be clearer to him, because, in addition to the knowledge of individuals, he sees the science, and this also will better enable him to test the knowledge which others have of what he knows himself; whereas the inquirer who is without this knowledge may be supposed to have a feebler and weaker insight? Are not these, my friend, the real advantages which are to be gained from Wisdom? And are not we looking and seeking after something more than is to be found in her?

That is very likely, he said.

That is very likely, I said; and very likely, too, we have been inquiring to no purpose. I am led to infer this, because I observe that if this is wisdom, some strange consequences would follow. Let us, if you please, assume the possibility of this science of sciences, and further admit and allow, as was originally suggested, that wisdom is the knowledge of what we know and do not know. Assuming all this, still, upon further consideration, I am doubtful, Critias, whether wisdom, if such as this, would do us any good. For I think we were wrong in supposing, as we were saying just now, that such wisdom ordering the government of house or state would be a great benefit.

How is that? he said.

Why, I said we were far too ready to admit the great benefits which mankind would obtain from their severally doing the things which they knew, and committing to others who knew the things of which they are ignorant.

Were we not right, he said, in making that admission?

I think not, I said.

That is certainly strange, Socrates.

By the dog of Egypt, I said, I am of your opinion about that: and that was in my mind when I said that strange consequences would follow, and that I was afraid we were on the wrong track; for however ready we may be to admit that this is wisdom, I certainly cannot make out what good this 173
sort of thing does to us.

What do you mean? he said; I wish that you could make me understand what you mean.

I dare say that what I am saying is nonsense, I replied; and yet if a man has any feeling of what is due to himself, he

cannot let the thought which comes into his mind pass away unheeded and unexamined.

I like that, he said.

Hear, then, I said, my own dream; whether coming through the horn or the ivory gate, I cannot tell. The dream is this: Let us suppose that wisdom is such as we are now defining, and that she has absolute sway over us; then each action will be done according to the arts or sciences, and no one professing to be a pilot when he is not, or any physician or general, or any one else pretending to know matters of which he is ignorant, will deceive or elude us; our health will be improved; our safety at sea, and also in battle, will be assured; our coats and shoes, and all other instruments and implements will be well made, because the workmen will be good and true. Aye, and if you please, you may suppose that prophecy, which is the knowledge of the future, will be under the control of Wisdom, and that she will deter deceivers and set up the true prophet in their place as the revealer of the future. Now I quite agree that mankind, thus provided, would live and act according to knowledge, for wisdom would watch and prevent ignorance from intruding on us. But we have not as yet discovered why, because we act according to knowledge, we act well and are happy, my dear Critias.

Yet I think, he replied, that you will hardly find any other end of right action, if you reject knowledge.

And of what is this knowledge? I said. Just answer me that small question. Do you mean a knowledge of shoemaking?

God forbid.

Or of working in brass?

Certainly not.

Or in wool, or wood, or anything of that sort?

No, I do not.

Then, I said, we are giving up the doctrine that he who lives according to knowledge is happy, for these live according to knowledge, and yet they are not allowed by you to be happy; but I think that you mean to confine happiness to particular individuals who live according to knowledge, such
174 for example as the prophet, who, as I was saying, knows the future.

Yes, I mean him, but there are others as well.

Yes, I said some one who knows the past and present as

well as the future, and is ignorant of nothing. Let us suppose that there is such a person, and if there is, you will allow that he is the most knowing of all living men.

Certainly he is.

Yet I should like to know one thing more: which of the different kinds of knowledge makes him happy? or do all equally make him happy?

Not all equally, he replied.

But which most tends to make him happy? the knowledge of what past, present, or future thing? May I infer this to be the knowledge of the game of draughts?

Nonsense about the game of draughts.

Or of computation?

No.

Or of health?

That is nearer the truth, he said.

And that knowledge which is nearest of all, I said, is the knowledge of what?

The knowledge with which he discerns good and evil.

Monster! I said; you have been carrying me round in a circle, and all this time hiding from me the fact that the life according to knowledge is not that which makes men act rightly and be happy, not even if all the sciences be included, but that this has to do with one science only, that of good and evil. For, let me ask you, Critias, whether, if you take away this science from all the rest, medicine will not equally give health, and shoemaking equally produce shoes, and the art of the weaver clothes? — whether the art of the pilot will not equally save our lives at sea, and the art of the general in war?

Quite so.

And yet, my dear Critias, none of these things will be well or beneficially done, if the science of the good be wanting.

That is true.

But that science is not wisdom or temperance, but a science of human advantage; not a science of other sciences, or of ignorance, but of good and evil: and if this be of use, then wisdom or temperance will not be of use.

And why, he replied, will not wisdom be of use? For if we really assume that wisdom is a science of sciences, and has a sway over other sciences, surely she will have this particular science of the good under her control, and in this way will benefit us.

And will wisdom give health? I said; is not this rather the effect of medicine? Or does wisdom do the work of any of the other arts, and do not they do, each of them, their own work? Have we not long ago asseverated that knowedge is only the knowledge of kuowledge and of ignorance, and of nothing else?

That is clear.

Another art is concerned with health.

Another.

The art of health is different.

Yes, different.

175 Nor does wisdom give advantage, my good friend; for that again we have just now been attributing to another art.

Very true.

How then can wisdom be advantageous, giving no advantage?

That, Socrates, is certainly inconceivable.

You see then, Critias, that I was not far wrong in fearing that I could have no sound notion about wisdom; I was quite right in depreciating myself; for that which is admitted to be the best of all things would never have seemed to us useless, if I had been good for anything at an inquiry. But now I have been utterly defeated, and have failed to discover what that is to which the imposer of names gave this name of temperance or wisdom. And yet many more admissions were made by us than could be really granted; for we admitted that there was a science of science, although the argument said No, and protested against this; and we admitted further, that this science knew the works of the other sciences (although this too was denied by the argument), because we wanted to show that the wise man had knowledge of what he knew and did not know; also we nobly disregarded, and never even considered, the impossibility of a man knowing in a sort of way that which he does not know at all; for our assumption was, that he knows that which he does not know; than which nothing, as I think, can be more irrational. And yet, after finding us so easy and good-natured, the inquiry is still unable to discover the truth; but mocks us to a degree, and has gone out of its way to prove the inutility of that which we admitted only by a sort of supposition and fiction to be the true definition of temperance or wisdom: which result, as far as I am concerned, is not so much to be lamented, I said. But for your sake, Charmides, I am very sorry, — that you, having such beauty and such wisdom

and temperance of soul, should have no profit or good in life from your wisdom and temperance. And still more am I grieved about the charm which I learned with so much pain, and to so little profit, from the Thracian, for the sake of a thing which is nothing worth. I think indeed that there is a mistake, and that I must be a bad inquirer, for I am persuaded that wisdom or temperance is really a great good; and happy are you if possess that good. And therefore examine yourself, and see whether you have this gift and can do without the charm; for if you can, I would rather advise you to regard me simply as a fool who is never able to reason out anything; and to rest assured that the more wise and temperate you are, the happier you will be. 176

Charmides said: I am sure that I do not know, Socrates, whether I have or have not this gift of wisdom and temperance; for how can I know whether I have that, the very nature of which even you and Critias, as you say, are unable to discover? — (not that I believe you.) And further, I am sure, Socrates, that I do need the charm, and as far as I am concerned, I shall be willing to be charmed by you daily, until you say that I have had enough.

Very good, Charmides, said Critias; if you do this I shall have a proof of your temperance, that is, if you allow yourself to be charmed by Socrates, and never desert him at all.

You may depend on my following and not deserting him, said Charmides: if you who are my guardian command me, I should be very wrong not to obey you.

And I do commaud you, he said.

Then I will do as you say, and begin this very day.

You sirs, I said, what are you conspiring about?

We are not conspiring, said Charmides, we have conspired already.

And are you about to use violence, without even going through the forms of justice?

Yes, I shall use violence, he replied, since he orders me; and therefore you had better consider well.

But the time for consideration has passed, I said, when violence is employed; and you, when you are determined on anything, and in the mood of violence, are irresistible.

Do not you resist me then, he said.

I will not resist you, I replied.

LYSIS.

INTRODUCTION.

No answer is given in the Lysis to the question, "What is Friendship?" any more than in the Charmides to the question, "What is Temperance?" There are several resemblances in the two Dialogues; the same youthfulness and sense of beauty pervades both of them; they are alike rich in the description of Greek life. The question is again raised of the relation of knowledge to virtue and good, which also recurs in the Laches; and Socrates appears again as the elder friend of the two boys Lysis and Menexenus. In the Charmides, as also in the Laches, he is described as middle-aged; in the Lysis he is advanced in years.

The Dialogue consists of two scenes or conversations which seem to have no relation to each other. The first is a conversation between Socrates and Lysis, who, like Charmides, is an Athenian youth of noble descent, and of great beauty, goodness, and intelligence: this is carried on in the absence of Menexenus, who is called away to take part in a sacrifice. Socrates asks Lysis whether his father and mother do not love him very much? "Yes, that they do." "Then of course they allow him to do exactly as he likes." "Of course not: the very slaves have more liberty than he has." "But how is this?" "The reason is that he is not old enough." "No; the real reason is that he is not wise enough." "For are there not some things which he is allowed to do, although he is not allowed to do others?" "Yes, because he knows them, and does not know the others." This leads to the conclusion that all men everywhere will trust him in what he knows, but not in what he does not know; for in such matters he will be unprofitable to them, and do them no good. And no one will love him, if he does them no good; and he can only do them good by knowledge; and as he is still without knowledge, he has no conceit of knowledge. In this manner Socrates reads a lesson to Hippothales, the foolish lover of Lysis, respecting the style of conversation which he should address to his beloved.

After the return of Menexenus, Socrates, at the request of Lysis, asks him a new question: "What is friendship? You, Menexenus, who have a friend already, can tell me, who am always longing to find one, what is the secret of this great blessing."

When one man loves another, which is the friend — he who loves, or he who is loved? or are both friends? From the first of these suppositions they are driven to the second; and from the second to the third; and neither the two boys nor Socrates are satisfied with any of them. Socrates turns to the poets, who affirm that God brings like to like (Homer), and to philosophers (Empedocles), who assert also that like is the friend of like. But the bad are not friends, for they are not even like themselves, and still less are they like one another. And the good have no need of one another, and therefore do not care about one another. Moreover there are others who say that likeness is a cause of aversion, and unlikeness of love and friendship; and they too adduce the authority of poets and philosophers in support of their doctrines; for Hesiod says that "potter is jealous of potter, bard of bard;" and subtle doctors tell us that "moist is the friend of dry, hot of cold," and the like. But neither can their doctrine be maintained; for then the just would be the friend of the unjust, good of evil.

Thus we arrive at the conclusion that like is not the friend of like, nor unlike of unlike; and therefore good is not the friend of good, nor evil of evil, nor good of evil, nor evil of good. What remains but that the indifferent, which is neither good nor evil, should be the friend (not of the indifferent, for that would be "like the friend of like," but) of the good?

But why should the indifferent have this attachment to the good? There are circumstances under which such an attachment would be natural. Suppose the indifferent, say the human body, to be desirous of getting rid of some evil, such as disease, which is not essential but only accidental to it (for if the evil were essential the body would cease to be indifferent, and would become evil) — in such a case the indifferent becomes a friend of the good for the sake of getting rid of the evil. In this intermediate "indifferent" position the philosopher or lover of wisdom stands: he is not wise, and yet not unwise, but he has ignorance accidentally clinging to him, and he yearns for wisdom as the cure of the evil. (Cp. Symp. 204.)

After this explanation has been received with triumphant accord, a fresh dissatisfaction begins to steal over the mind of Socrates: Must not friendship be for the sake of some ulterior end? and what can that final cause or end of friendship be, other than the good? But the good is desired by us only as the cure of evil; and therefore if there were no evil there would be no friendship. Some other explanation then has to be devised. May not desire be the source of friendship? And desire is of what a man wants and of what is congenial to him. But then again, the congenial cannot be the same as the like; for like cannot be the friend of like. Nor can the congenial be explained as the good; for good is not the friend of good, as has been also shown. The problem is unsolved, and the three

friends, Socrates, Lysis, and Menexenus, are still unable to find out what a friend is.

Thus, as in the Charmides and Laches, and several of the other Dialogues of Plato (compare especially the Protagoras and Theaetetus), no conclusion is arrived at. The dialogue is what would be called in the language of Thrasyllus tentative or inquisitive. The subject is continued in the Phaedrus and Symposium, and treated, with a manifest reference to the Lysis, in the eighth and ninth books of the Nicomachean Ethics of Aristotle. As in other writings of Plato (for example, the Republic), there is a progress from unconscious morality, illustrated by the unconscious friendship of the two youths, and also by the sayings of the poets ("who are our fathers in wisdom," and yet only tell us half the truth, and in this particular instance are not much improved upon by the philosophers), to a more comprehensive notion of friendship. This, however, is far from being cleared of its perplexity. Two notions appear to be struggling or balancing in the mind of Socrates: First, the sense that friendship arises out of human needs and wants; Secondly, that the higher form or ideal of friendship exists only for the sake of the good. That friends are not necessarily either like or unlike, is also a truth confirmed by experience. But the use of the terms "like" or "good" is too strictly limited; Socrates has allowed himself to be carried away by a sort of eristic or illogical logic against which the truest definition of friendship would be unable to stand. The sense of the interdependence of good and evil, and the allusion to the possibility of the non-existence of evil, are very curious.

The dialectical interest is fully sustained by the dramatic accompaniments. Observe, first, the scene, which is a Greek Palaestra, at a time when a sacrifice is going on, and the Hermaea are in course of celebration; secondly, the "accustomed irony" of Socrates, who declares, as in the Symposium (177 D), that he is ignorant of all other things, but claims to have a knowledge of the mysteries of love. There are also several contrasts of character; first of the dry, caustic Ctesippus, of whom Socrates professes a humorous sort of fear, and Hippothales the flighty lover, who murders sleep by bawling out the name of his beloved; also there is a contrast between the false, exaggerated, sentimental love of Hippothales towards Lysis, and the simple and innocent friendship of the boys with one another. Some difference appears to be intended between the characters of the more talkative Menexenus and the reserved and simple Lysis. Socrates draws out the latter by a new sort of irony, which is sometimes adopted in talking to children, and consists in asking a leading question which can only be answered in a sense contrary to the intention of the question: "Your father and mother of course allow you to drive the chariot?" "No they don't." When Menexenus returns, the serious dialectic begins.

LYSIS, OR FRIENDSHIP.

PERSONS OF THE DIALOGUE.

SOCRATES, *who is the narrator.* MENEXENUS.
HIPPOTHALES. LYSIS.
CTESIPPUS.

SCENE: — A newly-erected Palaestra outside the walls of Athens.

I WAS going from the Academy straight to the Lyceum, Steph. 203
intending to take the outer road, which is close under the wall. When I came to the postern gate of the city, which is by the fountain of Panops, I fell in with Hippothales, the son of Hieronymus, and Ctesippus the Paeanian, and a company of young men who were standing with them. Hippothales, seeing me approach, asked whence I came and whither I was going.

I am going, I replied, from the Academy straight to the Lyceum.

Then come straight to us, he said, and put in here; you may as well.

Who are you, I said; and where am I to come?

He showed me an inclosed space and an open door over against the wall. And there, he said, is the building at which we all meet: and a goodly company we are.

And what is this building, I asked; and what sort of entertainment have you?

The building, he replied, is a newly-erected Palaestra; 204
and the entertainment is generally conversation, to which you are welcome.

Thank you, I said; and is there any teacher there?

Yes, he said, your old friend and admirer, Miccus,

Indeed, I replied; he is a very eminent professor.

Are you disposed, he said, to go with me and see them?

Yes, I said; but I should like to know first, what is expected of me, and who is the favorite among you.

Some persons have one favorite, Socrates, and some another, he said.

And who is yours? I asked: tell me that, Hippothales.

At this he blushed; and I said to him, O Hippothales, thou son of Hieronymus! do not say that you are, or that you are not in love; the confession is too late; for I see not only that you are in love, but that you are already far gone in your love. Simple and foolish as I am, the gods have given me the power of understanding these sort of affections.

At this he blushed more and more.

Ctesippus said: I like to see you blushing, Hippothales, and hesitating to tell Socrates the name; when, if he were with you but for a very short time, he would be plagued to death by hearing of nothing else. Indeed, Socrates, he has literally deafened us, and stopped our ears with the praises of Lysis; and if he is a little intoxicated, there is every likelihood that we may have our sleep murdered with a cry of Lysis. His performances in prose are bad enough, but nothing at all in comparison with his verse; and when he drenches us with his poems and other compositions, that is really too bad; and what is even worse, is his manner of singing them to his love; this he does in a voice which is truly appalling, and we cannot help hearing him; and now he has a question put to him by you, and lo! he is blushing.

Who is Lysis? I said: I suppose that he must be young, for the name does not recall any one to me.

Why, he said, his father being a very well-known man, he retains his patronymic, and is not as yet commonly called by his own name; but, although you do not know his name, I am sure that you must know his face, for that is quite enough to distinguish him.

But tell me whose son he is, I said.

He is the eldest son of Democrates, of the deme of Aexonè.

Ah, Hippothales, I said; what a noble and really perfect love you have found! I wish that you would favor me with the exhibition which you have been making to the rest of the company, and then I shall be able to judge whether you know what a lover ought to say about his love, either to the youth himself, or to others.

Nay, Socrates, he said; you surely do not attach any weight to what he is saying.

Do you mean, I said, that you disown the love of the person whom he says that you love?

No; but I deny that I make verses or address compositions to him.

He is not in his right mind, said Ctesippus; he is talking nonsense, and is stark mad.

O Hippothales, I said, if you have ever made any verses or songs in honor of your favorite, I do not want to hear them; but I want to know the purport of them, that I may be able to judge of your mode of approaching your fair one.

Ctesippus will be able to tell you, he said; for if, as he avers, I talk to him of nothing else, he must have a very accurate knowledge and recollection of that.

Yes, indeed, said Ctesippus; I know only too well; and very ridiculous the tale is: for although he is a lover, and very devotedly in love, he has nothing particular to talk about to his beloved which a child might not say. Now is not that ridiculous? He can only speak of the wealth of Democrates, which the whole city celebrates, and grandfather Lysis, and the other ancestors of the youth, and their stud of horses, and their victory at the Pythian games, and at the Isthmus, and at Nemea with four horses and single horses; and these he sings and says, and greater twaddle still. For the day before yesterday he made a poem in which he described how Heracles, who was a connection of the family, was entertained by an ancestor of Lysis as his relation; this ancestor was himself the son of Zeus and the daughter of the founder of the deme. And these are the sort of old wives' tales which he sings and recites to us, and we are obliged to listen to him.

When I heard this, I said: O ridiculous Hippothales! how can you be making and singing hymns in honor of yourself before you have won?

But my songs and verses, he said, are not in honor of myself, Socrates.

You think not, I said.

But what are they, then? he replied.

Most assuredly, I said, those songs are all in your own honor; for if you win your beautiful love, your discourses and songs will be a glory to you, and may be truly regarded as hymns of praise composed in honor of you who have conquered and won such a love; but if he slips away from you, the more you have praised him, the more ridiculous you will look at

having lost this fairest and best of blessings; and this is the
206 reason why the wise lover does not praise his beloved until he has won him, because he is afraid of accidents. There is also another danger; the fair, when any one praises or magnifies them, are filled with the spirit of pride and vainglory. Is not that true?

Yes, he said.

And the more vainglorious they are, the more difficult is the capture of them?

I believe that.

What should you say of a hunter who frightened away his prey, and made the capture of the animals which he is hunting more difficult?

He would be a bad hunter, that is clear.

Yes; and if, instead of soothing them, he were to infuriate them with words and songs, that would show a great want of wit: don't you agree with me?

Yes.

And now reflect, Hippothales, and see whether you are not guilty of all these errors in writing poetry. For I can hardly suppose that you will affirm a man to be a good poet who injures himself by his poetry.

Assuredly not, he said: I should be a fool if I said that; and this makes me desirous, Socrates, of taking you into my counsels, and I shall be glad of any further advice which you may have to offer. Will you tell me by what words or actions I may become endeared to my love?

That is not easy to determine, I said; but if you will bring your love to me, and will let me talk with him, I may perhaps be able to show you how to converse with him, instead of singing and reciting in the fashion of which you are accused.

There will be no difficulty in bringing him, he replied; if you will only go into the house with Ctesippus, and sit down and talk, he will come of himself; for he is fond of listening, Socrates. And as this is the festival of the Hermaea, there is no separation of young men and boys, but they are all mixed up together. He will be sure to come: but if he does not come, Ctesippus, with whom he is familiar, and whose relation Menexenus is his great friend, shall call him.

That will be the way, I said. Thereupon I and Ctesippus went towards the Palaestra, and the rest followed.

Upon entering we found the boys had just been sacrificing;

and this part of the festival was nearly come to an end. They were all in white array, and games and dice were going on among them. Most of them were in the outer court amusing themselves; but some were in a corner of the Apodyterium playing at odd and even with a number of dice, which they took out of little wicker baskets. There was also a circle of lookers-on, one of whom was Lysis. He was standing among the other boys and youths, having a crown upon his head, like a fair vision, and not less worthy of praise for his goodness than for his beauty. We left them, and went over to the opposite side of the room, where we found a quiet place, and sat down; and then we began to talk. This attracted Lysis, who was constantly turning round to look at us — he was evidently wanting to come to us. For a time he hesitated and had not the courage to come alone; but first of all, his friend Menexenus came in out of the court in the interval of his play, and when he saw Ctesippus and myself, came and sat by us; and then Lysis, seeing him, followed, and sat down with him; and the other boys joined. I should observe that Hippothales, when he saw the crowd, got behind them, where he thought that he would be out of sight of Lysis, lest he should anger him; and there he stood and listened. 207

I turned to Menexenus, and said: Son of Demophon, which of you two youths is the elder?

That is a matter of dispute between us, he said

And which is the nobler? Is that a matter of dispute too?

Yes, certainly.

And another disputed point is, which is the fairer?

The two boys laughed.

I shan't ask which is the richer, I said; for you two are friends, are you not?

Certainly, they replied.

And friends have all things in common, so that one of you can be no richer than the other, if you say truly that you are friends.

They assented. I was about to ask which was the juster of the two, and which was the wiser of the two; but at this moment Menexenus was called away by some one who came and said that the gymnastic-master wanted him. As I imagine, he had to offer sacrifice. So he went away, and I asked Lysis some more questions. I dare say, Lysis, I said, that your father and mother love you very much.

That they do, he said.

And they would wish you to be perfectly happy.

Yes.

But do you think that any one is happy who is in the condition of a slave, and who cannot do what he likes?

I should think not indeed, he said.

And if your father and mother love you, and desire that you should be happy, no one can doubt that they are very ready to promote your happiness.

Certainly, he replied.

And do they then permit you to do what you like, and never rebuke you or hinder you from doing what you desire?

Yes, indeed, Socrates; there are a great many things which they hinder me from doing.

What do you mean? I said. Do they want you to be happy,
208 and yet hinder you from doing what you like? — for example, if you want to mount one of your father's chariots, and take the reins at a race, they will not allow you to do that; they will prevent you?

Certainly, he said, they will not allow me to do that.

Whom then will they allow?

There is a charioteer, whom my father pays for driving.

And do they trust a hireling more than you? and may he do what he likes with the horses? and do they pay him for this?

They do.

But I dare say that you may take the whip and guide the mule-cart if you like; — they will permit that?

Permit me! no they won't.

Then, I said, may no one use the whip to the mules?

Yes, he said, the muleteer.

And is he a slave or a free man?

A slave, he said.

And do they esteem a slave of more value than you who are their son? And do they intrust their property to him rather than to you? and allow him to do what he likes, when you may not? Answer me now: Are you your own master, or do they not even allow that?

Nay, he said; of course they do not allow that.

Then you have a master?

Yes, my tutor; there he is.

And is he a slave?

To be sure, he is our slave, he replied.

Surely, I said, this is a strange thing, that a free man should be governed by a slave. And what does he do with you?

He takes me to my teachers.

You don't mean to say that your teachers also rule over you?

Of course they do.

Then I must say that your father is pleased to inflict many lords and masters on you. But at any rate when you go home to your mother, she will let you have your own way, and will not interfere with your happiness; her wool, or the piece of cloth she is weaving, are at your disposal: I am sure that there is nothing to hinder you from touching her wooden spathe, or her comb, or any other of her spinning implements.

Nay, Socrates, he replied, laughing; not only does she hinder me, but I should be beaten, if I were to touch one of them.

Well, I said, that is amazing. And did you ever behave ill to your father or your mother?

No, indeed, he replied.

But why then are they so terribly anxious to prevent you from being happy, and doing as you like? — keeping you all day long in subjection to another, and, in a word, doing nothing which you desire; so that you have no good, as would appear, out of their great possessions, which are under the control of anybody rather than of you, and have no use of your own fair person, which is committed to the care of a shepherd; while you, Lysis, are master of nobody, and can do nothing? 209

Why, he said, Socrates, the reason is that I am not of age.

I doubt whether that is the real reason, I said: for as far as that goes, I should imagine that your father Democrates, and your mother, do permit you to do many things already, and do not wait until you are of age: for example, if they want anything read or written, you, I presume, would be the first person in the house who is summoned by them.

Very true.

And you would be allowed to write or read the letters in any order which you please, or take up the lyre and tune the notes, and play with the fingers, or strike with the plectrum, exactly as you please, and neither father nor mother would interfere with you.

That is true, he said.

Then what can be the reason, Lysis, I said, why they allow you to do the one and not the other?

I suppose, he said, that the reason is that I understand the one, and not the other.

Yes, my dear youth, I said, the reason is not any deficiency of years, but a deficiency of knowledge; and whenever your father thinks that you are wiser than he is, he will instantly commit himself and his possessions to you.

That I believe.

Aye, I said; and about your neighbor, too, does not the same rule hold as about your father? If he is satisfied that you know more of housekeeping than he does, will he continue to administer his affairs himself, or will he commit them to you?

I think that he will commit them to me.

And will not the Athenian people, too, intrust their affairs to you when they see that you have wisdom enough for this?

Yes.

Now, I said, let me put a case. Suppose the great king to have an eldest son, who is the Prince of Asia; and you and I go to him and establish to his satisfaction that we are better cooks than his son, will he not intrust to us the prerogative of making soup, and putting in anything that we like while the boiling is going on, rather than to the Prince of Asia, who is his son?

To us, clearly.

And we shall be allowed to throw in salt by handfuls, whereas the son will not be allowed to put in as much as he can take up between his fingers?

Of course.

Or suppose again that the son has bad eyes, will he allow him, or will he not allow him, to touch his own eyes if he thinks that he has no knowledge of medicine?

210 He will not allow him.

Whereas, if we are supposed to have a knowledge of medicine, he will allow us to open the eyes wide and sprinkle ashes upon them, because he supposes that we know what is best?

That is true.

And everything in which we appear to him to be wiser than himself or his son he will commit to us?

That is very true, Socrates, he replied.

Then now, my dear youth, I said, you perceive that in things which we know every one will trust us, — Hellenes and barbarians, men and women, — and we may do as we please, and no one will like to interfere with us; and we are free, and masters of others; and these things will be really ours, for we

shall turn them to our good. But in things of which we have no understanding, no one will trust us to do as seems good to us — they will hinder us as far as they can; and not only strangers, but father and mother, and the friend, if there be one, who is dearer still, will also hinder us; and we shall be subject to others; and these things will not be ours, for we shall turn them to no good. Do you admit that?

He assented.

And shall we ever be friends to others? and will any others love us, in as far as we are useless to them?

Certainly not.

Neither can your father or mother love you, nor can anybody love anybody else, in as far as they are useless to them?

No.

And therefore, my boy, if you are wise, all men will be your friends and kindred, for you will be useful and good; but if you are not wise, neither father, nor mother, nor kindred, nor any one else, will be your friends. And not having yet attained to wisdom, can you have high thoughts about that of which you have no thoughts?

How can I? he said.

And you have no wisdom, for you require a teacher?

True.

And you are not conceited, having nothing of which to be conceited?

Indeed, Socrates, I think not.

When I heard him say this, I turned to Hippothales, and was very nearly making a blunder, for I had a mind to say to him: That is the way, Hippothales, in which you should talk to your beloved, humbling and lowering him, and not as you do, puffing him up and spoiling him. But I saw that he was in great excitement and confusion at what had been said; and I remembered that, although he was in the neighborhood, he did not want to be seen by Lysis, so I thought better and re- 211
frained.

In the mean time Menexenus came back and sat down in his place by Lysis; and Lysis, in a childish and affectionate manner, whispered privately in my ear, so that Menexenus should not hear: Do, Socrates, tell Menexenus what you have been telling me.

Suppose that you tell him yourself, Lysis, I replied; for I am sure that you were attending.

That I was, he replied.

Try, then, to remember the words, and be as exact as you can in repeating them to him, and if you have forgotten anything, ask me again the next time that you see me.

I will be sure to do that, Socrates; but go on telling him something new, and let me hear, as long as I am allowed to stay.

I certainly cannot refuse, I said, as you ask me; but then, as you know, Menexenus is very pugnacious, and therefore you must come to the rescue if he attempts to upset me.

Yes, indeed, he said; he is very pugnacious, and that is the reason why I want you to argue with him.

That I may make a fool of myself?

No, indeed, he said; but that you may put him down.

That is no easy matter, I replied; for he is a terrible fellow — a pupil of Ctesippus. And there is Ctesippus: do you see him?

Never mind, Socrates, you shall argue with him.

Well, I suppose I must, I replied.

Hereupon Ctesippus complained that we were talking in secret, and keeping the feast to ourselves.

I shall be happy, I said, to let you have a share. Here is Lysis, who does not understand something that I was saying, and wants me to ask Menexenus, who, as he thinks, will be able to answer.

And why don't you ask him? he said.

Very well, I said, I will ask him; and do you, Menexenus, answer. But first I must tell you that I am one who from my childhood upward have set my heart upon a certain thing. All people have their fancies; some desire horses, and others dogs; and some are fond of gold, and others of honor. Now, I have no violent desire of any of these things; but I have a passion for friends; and I would rather have a good friend than the best cock or quail in the world: I would even go further, and say than a horse or dog. Yea, by the dog of Egypt, I should
212 greatly prefer a real friend to all the gold of Darius, or even to Darius himself: I am such a lover of friends as that. And when I see you and Lysis, at your early age, so easily possessed of this treasure, and so soon, he of you, and you of him, I am amazed and delighted, seeing that I myself, although I am now advanced in years, am so far from having made a similar acquisition, that I do not even know in what

way a friend is acquired. But this is the question which I want to ask you, as you have experience: tell me then, when one loves another, is the lover or the beloved the friend; or may either be the friend?

Either, he said, may be the friend.

Do you mean, I said, that if only one of them loves the other, they are mutual friends?

Yes, he said; that is my meaning.

But what if the lover is not loved in return? That is a possible case.

Yes.

Or is, perhaps, even hated? for that is a fancy which lovers sometimes have. Nothing can exceed their love; and yet they imagine either that they are not loved in return, or that they are hated. Is not that true?

Yes, he said, quite true.

In that case, the one loves, and the other is loved?

Yes.

Then which is the friend of which? Is the lover the friend of the beloved, whether he be loved in return, or hated; or is the beloved the friend; or is there no friendship at all on either side, unless they both love one another?

There would seem to be none at all.

Then that is at variance with our former notion. Just now, both were friends, if one only loved; and now, unless they both love, neither is a friend.

That appears to be true.

Then no one is a friend to his friend who does not love in return?

I think not.

Then they are not lovers of horses, whom the horses do not love in return; nor lovers of quails, nor of dogs, nor of wine, nor of gymnastic exercises, who have no return of love; no, nor of wisdom, unless wisdom loves them in return. Or perhaps they do love them, but they are not beloved by them; and the poet was wrong who sings, —

"Happy the man to whom his children are dear, and steeds having single hoofs, and dogs of chase, and the stranger of another land."

I do not think that he was wrong.

Then you think that he is right?

Yes.

Then, Menexenus, the conclusion is, that what is beloved may be dear, whether loving or hating: for example, very
231 young children, too young to love, or even hating their father or mother when they are punished by them, are never dearer to them than at the time when they are hating them.

I think that is true, he said.

Then on this view, not the lover, but the beloved, is the friend or dear one; and the hated one, and not the hater, is the enemy?

That is plain.

Then many men are loved by their enemies, and hated by their friends, and are the friends of their enemies, and the enemies of their friends — that follows if the beloved is dear, and not the lover: but this, my dear friend, is an absurdity, or, I should rather say, an impossibility.

That, Socrates, I believe to be true.

But then, if not the enemy, the lover will be the friend of that which is loved?

True.

And the hater will be the enemy of that which is hated?

Certainly.

Yet there is no avoiding the admission in this, as in the preceding instance, that a man may love one who is not his friend, or who may be his enemy. There are cases in which a lover loves, and is not loved, or is perhaps hated; and a man may be the enemy of one who is not his enemy, and is even his friend: for example, when he loves that which does not hate him, or even hates that which loves him.

That appears to be true.

But if the lover is not a friend, nor the beloved a friend, nor both together, what are we to say? Whom are we to call friends to one another? Do any remain?

Indeed, Socrates, I cannot find any.

But, O Menexenus! I said, may we not have been altogether wrong in our conclusions?

I am sure that we have been wrong, Socrates, said Lysis. And he blushed at his own words, as if he had not intended to speak, but the words escaped him involuntarily in his eagerness; there was no mistaking his attentive look while he was listening.

I was pleased at the interest which was shown by Lysis, and

I wanted to give Menexenus a rest, so I turned to him, and said, I think, Lysis, that what you say is true, and that we, if we had been right, should never have gone so far wrong; let us proceed no further in this direction (for the road seems to be getting troublesome), but take the other in which the poets will be our guide; for they are to us in a manner the fathers and authors of wisdom, and they speak of friends 214
in no light or trivial manner, but God himself, as they say, makes them and draws them to one another; and this they express, if I am not mistaken, in the following words: —

"God is ever drawing like towards like, and making them acquainted."

I dare say that you have heard those words.

Yes, he said; I have.

And have you not also met with the treatises of philosophers who say that like must love like? they are the people who go talking and writing about nature and the universe.

That is true, he said.

And are they right in saying that?

They may be.

Perhaps, I said, about half right, or probably altogether right, if their meaning were rightly apprehended by us. For the more a bad man has to do with a bad man, and the more nearly he is brought into contact with him, the more he will be likely to hate him, for he injures him, and injurer and injured cannot be friends. Is not that true?

Yes, he said.

Then one half of the saying is untrue, if the wicked are like one another?

That is true.

But people really mean, as I suppose, that the good are like one another, and friends to one another; and that the bad, as is often said of them, are never at unity with one another or with themselves, but are passionate and restless: and that which is at variance and enmity with itself is not likely to be in union or harmony with any other thing. Don't you agree to that?

Yes, I do.

Then, my friend, those who say that the like is friendly to the like mean to intimate, if I do not misapprehend, that the good only is the friend of the good, and of him only; but that the evil never attains to any real friendship, either with good or evil. Do you agree?

He nodded assent.

Then now we know how to answer the question, "Who are friends?" for the argument supplies the answer, "That the good are friends."

Yes, he said, that is true.

Yes, I replied; and yet I am not quite satisfied with this. Shall I tell you what I suspect? I will. Assuming that like, inasmuch as he is like, is the friend of like, and useful to him — or rather let me try another way of putting the matter: Can like do any good or harm to like which he could not do to himself, or suffer anything from his like which he would not
215 suffer from himself? And if neither can be of any use to the other, how can they be loved by one another? Can they now?

They cannot.

And can he who is not loved be a friend?

Certainly not.

But say that the like is not the friend of the like in as far as he is like; still the good may be the friend of the good in as far as he is good.

True.

But then again, will not the good, in as far as he is good, be sufficient for himself? And he who is sufficient wants nothing — that is implied in the word sufficient?

Of course not.

And he who wants nothing will desire nothing?

He will not.

Neither can he love that which he does not desire?

He cannot.

And he who loves not is not a lover or friend?

Clearly not.

What place then is there for friendship, if, when absent, good men have no desire of one another (for when alone they are sufficient for themselves), and when present have no use of one another? How can such persons ever be induced to value one another?

They cannot.

And friends they cannot be, unless they value one another?

Very true.

But see now, Lysis, how we are being deceived in all this; are we not entirely wrong?

How is that? he said.

Have I not heard some one say, as I just now recollect, that the like is the greatest enemy of the like, the good of the good? — and in fact he quoted the authority of Hesiod, who says, "That potter quarrels with potter, bard with bard, beggar with beggar;" and of all other things he also says, "That of necessity the most like are most full of envy, strife, and hatred of one another, and the most unlike of friendship. For the poor man is compelled to be the friend of the rich, and the weak requires the aid of the strong, and the sick man of the physician; every one who knows not has to love and court him who knows." And indeed he went on to say in grandiloquent language, that the idea of friendship existing between similars is not the truth, but the very reverse of the truth, and that the most opposed are the most friendly; for that everything desires not like but unlike: for example, the dry desires the moist, the cold the hot, the bitter the sweet, the sharp the blunt, the void the full, the full the void, and so of all other things; for the opposite is the food of the opposite, whereas like receives nothing from like. And I thought that he was a charming man who said this, and that he spoke well. What do the rest of you say? 216

I should say, at first hearing, that he is right, said Menexenus.

Then are we to say that the greatest friendship is of opposites?

Exactly.

Yes, Menexenus; but will not that be a monstrous answer? and will not the all-wise eristics be down upon us in triumph, and ask, fairly enough, whether love is not the very opposite of hate? and what answer shall we make to them? must we not admit that they speak truly?

That we must.

They will ask whether the enemy is the friend of the friend, or the friend the friend of the enemy?

Neither, he replied.

Well, but is a just man the friend of the unjust, or the temperate of the intemperate, or the good of the bad?

I do not see how that is possible.

And yet, I said, if friendship goes by contraries, the contraries must be friends.

They must.

Then neither like and like nor unlike and unlike are friends.

I suppose not.

And yet there is a further consideration: may not all these notions of friendship be erroneous? but still may there not be cases in which that which is neither good nor bad is the friend of the good?

How do you mean? he said.

Why really, I said, the truth is that I don't know; but my head is dizzy with thinking of the argument, and therefore I hazard the conjecture, that the beautiful is the friend, as the old proverb says. Beauty is certainly a soft, smooth, slippery thing, and therefore of a nature which easily slips in and permeates our souls. And I further add that the good is the beautiful. You will agree to that?

Yes.

This I say from a sort of notion that what is neither good nor evil is the friend of the beautiful and the good, and I will tell you why I am inclined to think this: I assume that there are three principles — the good, the bad, and that which is neither good nor bad. What do you say to that?

I agree.

And neither is the good the friend of the good, nor the evil of the evil, nor the good of the evil, — that the preceding argument will not allow; and therefore the only alternative is — if there be such a thing as friendship or love at all — that what is neither good nor evil must be the friend, either of the good, or of that which is neither good nor evil, for nothing can be the friend of the bad.

True.

Nor can like be the friend of like, as we were just now saying.

True.

Then that which is neither good nor evil can have no friend which is neither good nor evil.

That is evident.

Then the good alone is the friend of that only which is neither good nor evil.

217 That may be assumed to be certain.

And does not this seem to put us in the right way? Just remark, that the body which is in health requires neither medical nor any other aid, but is well enough; and the healthy man has no love of the physician, because he is in health.

He has none.

But the sick loves him, because he is sick?

Certainly.

And sickness is an evil, and the art of medicine a good and useful thing?

Yes.

But the human body, viewed as a body, is neither good nor evil?

True.

And the body is compelled by reason of disease to court and make friends of the art of medicine?

Yes.

Then that which is neither good nor evil becomes the friend of good, by reason of the presence of evil?

That is the inference.

And clearly this must have happened before that which was neither good nor evil had become altogether corrupted with the element of evil, for then it would not still desire and love the good; for, as we were saying, the evil cannot be the friend of the good.

That is impossible.

Further, I must observe that some substances are assimilated when others are present with them; and there are some which are not assimilated; take, for example, the case of an ointment or color which is put on another substance.

Very good.

In such a case, is the substance which is anointed the same as the color or ointment?

What do you mean? he said.

This is what I mean, I said: Suppose that I were to cover your auburn locks with white lead, would they be really white, or would they only appear to be white?

They would only appear to be white, he replied.

And yet whiteness would be present in them. But that would not make them at all the more white, notwithstanding the presence of white in them — they would be neither white nor black.

True.

But when old age superinduces in them the same color, then they become assimilated, and are white by the presence of white.

Certainly.

Now I want to know whether in all cases a substance is as-

similated by the presence of another substance; or must the presence be after a peculiar sort?

The latter, he said.

Then that which is neither good nor evil may be in the presence of evil, and not be wholly evil, and that has happened before now?

True.

Then when anything is in the presence of evil, but is not as yet evil, the presence of good arouses the desire of good in that
218 thing; but the presence of evil, which makes a thing evil, takes away the desire and friendship of the good; for that which was once both good and evil has now become evil only, and the good had no friendship with the evil?

None.

And therefore we say that those who are already wise, whether gods or men, are no longer lovers of wisdom; nor can they be lovers of wisdom, who are ignorant to the extent of being evil, for no evil or ignorant person is a lover of wisdom. There remain those who have the misfortune to be ignorant, but are not yet hardened in their ignorance, or void of understanding, and do not as yet fancy that they know what they do not know: and therefore those who are the lovers of wisdom are as yet neither good nor bad. But the bad do not love wisdom any more than the good; for, as we have already seen, neither unlike is the friend of unlike, nor like of like. You remember that?

Yes, they both said.

And so, Lysis and Menexenus, we have discovered the nature of friendship: there can be no doubt of that. Friendship is the love which the neither good nor evil has of the good, when the evil is present, either in the soul, or in the body, or anywhere.

They both agreed and entirely assented, and for a moment I rejoiced and was satisfied like a huntsman whose prey is within his grasp. But then a suspicion came across me, and I fancied unaccountably that the conclusion was untrue, and I felt pained, and said, Alas! Lysis and Menexenus, I am afraid that we have been grasping at a shadow.

Why do you say that? said Menexenus.

I am afraid, I said, that the argument about friendship is false: arguments, like men, are often pretenders.

How is that? he asked.

Well, I said; look at the matter in this way: a friend is the friend of some one.

Certainly he is.

And has he a motive and object in being a friend, or has he no motive and object?

He has a motive and object.

And is the object which makes him a friend dear to him, or neither dear nor hateful to him?

I don't quite follow you, he said.

I do not wonder at that, I said. But perhaps, if I put the matter in another way, you will be able to follow me, and my own meaning will be clearer to myself. The sick man, as I was just now saying, is the friend of the physician, — is he not?

Yes.

And he is the friend of the physician because of disease, and for the sake of health?

Yes.

And disease is an evil?

Certainly.

And what of health? I said. Is that good or evil, or neither?

Good, he replied. 219

And we were saying, I believe, that the body, being neither good nor evil, because of disease, that is to say because of evil is the friend of medicine, and medicine is a good: and medicine has entered into this friendship for the sake of health, and health is a good.

True.

And is health a friend, or not a friend?

A friend.

And disease is an enemy?

Yes.

Then that which is neither good nor evil is the friend of the good because of the evil and hateful, and for the sake of the good and the friend?

That is clear.

Then the friend is a friend for the sake of the friend, and because of the enemy?

That is to be inferred.

Then at this point, my boys, let us take heed, and be on our guard against deceptions. I will no more say that the friend is

the friend of the friend, and the like of the like, which has been declared by us to be an impossibility; but, in order that this new statement may not delude us, let us attentively examine another point, which is this: medicine, as we were saying, is a friend, or dear to us for the sake of health?

Yes.

And health is also dear?

Certainly.

And if dear, then dear for the sake of something?

Yes.

And surely this object must also be dear, as is implied in our previous admissions?

Yes.

And that something dear involves something else dear?

Yes.

But then, proceeding in this way, we shall at last come to an end, and arrive at some first principle of friendship or dearness which is not capable of being referred to any other, for the sake of which, as we maintain, all other things are dear.

Certainly.

My fear is that all those other things, which, as we say, are dear for the sake of that other, are illusions and deceptions only, of which that other is the reality or true principle of friendship. Let me put the matter thus: Suppose the case of a great treasure (this may be a son, who is more precious to his father than all his other treasures); would not the father, who values his son above all things, value other things also for the sake of his son? I mean, for instance, if he knew that his son had drunk hemlock, and the father thought that wine would save him, he would value the wine?

Certainly.

And also the vessel which contains the wine?

Certainly.

But he does not therefore value the three measures of wine, or the earthen vessel which contains them equally with his son? Is not this rather the true state of the case? All this anxiety of his has regard not to the means which are provided for the sake of an object, but to the object for the sake of which they are provided. And although we may often say that gold and silver are highly valued by us, that is not the truth; for the truth is that there is a further object, whatever that may be,

which we value most of all, and for the sake of which gold and all our other possessions are acquired by us. Am I not right?

Yes, certainly.

And may not the same be said of the friend? That which is only dear to us for the sake of something else is improperly said to be dear, but the truly dear is that in which all these so-called dear friendships terminate.

That, he said, appears to be true.

And the truly dear or ultimate principle of friendship is not for the sake of any other or further dear.

True.

Then the notion is at an end that friendship has not any further object. But are we therefore to infer that the good is the friend?

That is my view.

Then is the good loved for the sake of the evil? Let me put the case in this way: Suppose that of the three principles, good, evil, and that which is neither good nor evil, there remained only the good and the neutral, and that evil went far away, and in no way affected soul or body, nor ever at all that class of things which, as we say, are neither good nor evil in themselves; would the good be of any use, or other than useless to us? For if there were nothing to hurt us any longer, we should have no need of anything that would do us good. Then would be clearly seen that we did but love and desire the good because of the evil, and as the remedy of the evil, which was the disease; but if there had been no disease, there would have been no need of a remedy. Is not this the nature of the good — to be loved because of the evil, by us who are between the two? but there is no use in the good for its own sake.

I suppose that is true.

Then the final principle of friendship, in which all other friendships which are relative only were supposed by us to terminate, is of another and a different nature from them. For they are called dear because of another dear or friend. But with the true friend or dear, the case is quite the reverse; for that is proved to be dear because of the hated, and if the hated were away, the loved would no longer stay.

That is true, he replied: at least, that is implied in the argument.

But, O! will you tell me, I said, whether, if evil were to perish, we should hunger any more, or thirst any more, or have

any similar affection? Or may we suppose that hunger will re-
221 main while men and animals remain, but not so as to be hurtful? And the same of thirst and the other affections, — that they will remain, but will not be evil because evil has perished? Or shall I say rather, that to ask what either would be or would not be has no meaning, for who can tell? This only we know, that in our present condition hunger may injure us, and may also benefit us. Is not that true?

Yes.

And in like manner thirst or any similar desire may sometimes be a good and sometimes an evil to us, and sometimes neither one nor the other?

To be sure.

But is there any reason why, because evil perishes, that which is not evil should also perish?

None.

Then, even if evil perishes, the desires which are neither good nor evil will remain?

That is evident.

And must not a man love that which he desires and affects?

He must.

Then, even if evil perishes, there may still remain some elements of love or friendship?

Yes.

But not, if evil is the cause of friendship: for in that case nothing will be the friend of any other thing after the destruction of evil; for the effect cannot remain when the cause is destroyed.

True.

And have we not been saying that the friend loves something for a reason? and the reason was because of the evil which leads the neither good nor evil to love the good?

Very true.

But now our view is changed, and there must be some other cause of friendship?

I suppose that there must.

May not the truth be that, as we were saying, desire is the cause of friendship; for that which desires is dear to that which is desired at the time of desire? and may not the other theory have been just a long story about nothing?

That is possibly true.

But surely, I said, he who desires, desires that of which he is in want?

Yes.

And that of which he is in want is dear to him?

True.

And he is in want of that of which he is deprived?

Certainly.

Then love, and desire, and friendship would appear to be of the natural or congenial. That, Lysis and Menexenus, is the inference.

They assented.

Then if you are friends, you must have natures which are congenial to one another?

Certainly, they both said.

And I say, my boys, that no one who loves or desires another would ever have loved or desired or affected him, if he had not been in some way congenial to him, either in his soul, or in his character, or in his manners, or in his form. 222

Yes, yes, said Menexenus. But Lysis was silent.

Then, I said, the conclusion is, that what is of a congenial nature must be loved.

That follows, he said.

Then the true lover, and not the counterfeit, must be loved by his love.

Lysis and Menexenus gave a faint assent to this; and Hippothales changed into all manner of colors with delight.

Here, intending to revise the argument, I said: Can we point out any difference between the congenial and the like? For if that is possible, then I think, Lysis and Menexenus, there may be some sense in our argument about friendship. But if the congenial is only the like, how will you get rid of the other argument, of the uselessness of like to like in as far as they are like; for to say that what is useless is dear, would be absurd? Suppose, then, that we agree to distinguish between the congenial and the like — in the intoxication of argument, that may perhaps be allowed.

Very true.

And shall we further say that the good is congenial, and the evil uncongenial to every one? Or again, that the evil is congenial to the evil, and the good to the good; or that which is neither good nor evil to that which is neither good nor evil.

They agreed to the latter alternative.

Then, my boys, we have again fallen into the old discarded

error; for the unjust will be the friend of the unjust, and the bad of the bad, as well as the good of the good.

That appears to be true.

But again, if we say that the congenial is the same as the good, in that case the good will only be the friend of the good.

True.

But that too was a position of ours which, as you will remember, has been already refuted by ourselves.

We remember.

Then what is to be done? Or rather is there anything to be done? I can only, like the wise men who argue in courts, sum up the arguments. If neither the beloved, nor the lover, nor the like, nor the unlike, nor the good, nor the congenial, nor any other of whom we spoke — for there were such a number of them that I can't remember them — if, I say, none of these are friends, I know not what remains to be said.

223 Here I was going to invite the opinion of some older person, when suddenly we were interrupted by the tutors of Lysis and Menexenus, who came upon us like an evil apparition with their brothers, and bade them go home, as it was getting late. At first, we and the bystanders drove them off; but afterwards, as they would not mind, and only went on shouting in their barbarous dialect, and got angry, and kept calling the boys, — they appeared to us to have been drinking rather too much at the Hermaea, which made them difficult to manage, — we fairly gave way and broke up the company.

I said, however, a few words to the boys at parting: O Menexenus and Lysis, will not the bystanders go away, and say, "Here is a jest; you two boys, and I, an old boy, who would fain be one of you, imagine ourselves to be friends, and we have not as yet been able to discover what is a friend!"

LACHES.

INTRODUCTION.

LYSIMACHUS, the son of Aristides the Just, and Melesias, the son of the elder Thucydides, two aged men, who live together, are desirous of educating their sons in the best manner. Their own education, as often happens with the sons of great men, has been neglected; and they are resolved that their children shall have more care taken of them, than they received themselves at the hands of their fathers.

At their request, Nicias and Laches have accompanied them to see a man named Stesilaus fighting in heavy armor. The two fathers ask the two generals what they think of this exhibition, and whether they would advise that their sons should acquire the accomplishment. Nicias and Laches are quite willing to give their opinion; but they suggest that Socrates should be invited to take part in the consultation. He is a stranger to Lysimachus, but is afterwards recognized as the son of his old friend Sophroniscus, with whom "he never had a difference to the hour of his death." Socrates is also known to Nicias, to whom he had introduced the excellent Damon, musician and Sophist, as a tutor for his son, and to Laches, who had witnessed his heroic behavior at the battle of Delium. (Cp. Symp. 221.)

Socrates, as he is younger than either Nicias or Laches, prefers to wait until they have delivered their opinions, which they give in a characteristic manner. Nicias, the tactician, is very much in favor of the new art, which he describes as the gymnastics of war — useful when the ranks are formed, and still more useful when they are broken; creating a general interest in military studies, and greatly adding to the appearance of the soldier in the field. Laches, the blunt warrior, is of opinion that such an art is not knowledge, and cannot be of any value, because the Lacedaemonians, those great masters of arms, neglect it. His own experience in actual service has taught him that these pretenders are useless and ridiculous. This man Stesilaus has been seen by him on board ship making a very sorry exhibition of himself. The possession of the art will make the coward rash, and subject the courageous, if he chance to

make a slip, to invidious remarks. And now let Socrates be taken into counsel. As they differ he must decide.

Socrates would rather not decide the question by a plurality of votes: in such a serious matter as the education of a friend's children, he would rather consult the one skilled person who has had masters, and has works to show as evidences of his skill. This is not himself; for he has never been able to pay the Sophists for instructing him, and has never had the wit to do or discover anything. But Nicias and Laches are older and richer than he is: they have had teachers, and perhaps have made discoveries; and he would have trusted them entirely, if they had not been diametrically opposed.

Lysimachus here proposes to resign the argument into the hands of the younger part of the company, as he is old, and has a bad memory. He earnestly requests Socrates to remain, — in this showing, as Nicias says, how little he knows the man, who will certainly not go away until he has cross-examined the company about their past lives. Nicias has often submitted to this process; and Laches is quite willing to learn from Socrates, because his actions, in the true Dorian mode, correspond to his words.

Socrates proceeds: We might ask who are our teachers? But a better and more thorough way of examining the question will be to ask, "What is Virtue?" — or rather, to restrict the inquiry to that part of virtue which is concerned with the use of weapons, — "What is Courage?" Laches thinks that he knows this: (1) "He is courageous who remains at his post." But some nations fight flying, after the manner of Aeneas in Homer; or as the heavy-armed Spartans also did at the battle of Plataea. (2) Socrates wants a more general definition, not only of military courage, but of courage of all sorts, both amid pleasures and pains. Laches replies that this universal courage is endurance. But courage is a good thing, and mere endurance may be hurtful and injurious. Therefore (3) the element of intelligence must be added. But then again unintelligent endurance may often be more courageous than the intelligent — the bad than the good. How is this contradiction to be solved? Socrates and Laches are not set "to the Dorian mode" of words and actions; for their words are all confusion, although their actions are courageous. Still they must "endure" in an argument about endurance. Laches is very willing, and is quite sure that he knows what courage is if he could only tell.

Nicias is now appealed to; and in reply he offers a definition which he has heard from Socrates himself, to the effect that (1) "Courage is intelligence." Laches derides this; and Socrates inquires, "What sort of intelligence?" to which Nicias replies, "Intelligence of things terrible." "But every man knows the things to be dreaded in his own art." "No they do not. They may predict results, but

cannot tell whether they are really terrible; only the courageous man can do that." Laches draws the inference that the courageous man is either a soothsayer or a god.

Again, in Nicias' way of speaking, the term "courageous" must be denied to animals or children, because they do not know the danger. Against this inversion of the ordinary use of language Laches reclaims, but is in some degree mollified by a compliment to his own courage. Still, he does not like to see an Athenian statesman and general descending to sophistries of this sort. Socrates resumes the argument. Courage has been defined to be intelligence or knowledge of the terrible; and courage is not all virtue, but only one of the virtues. The terrible is in the future, and therefore the knowledge of the terrible is a knowledge of the future. But there can be no knowledge of future good or evil separated from a knowledge of the good and evil of the past or present; that is to say, of all good and evil. Courage, therefore, is the knowledge of good and evil generally. But he who has the knowledge of good and evil generally, must not only have courage, but also temperance, justice, and every other virtue. Thus, a single virtue would be the same as all virtues. (Cp. Protagoras, 350 foll.) And after all, the two generals, and Socrates, the hero of Delium, are still in ignorance of the nature of courage. They must go to school again, boys, old men, and all.

Some points of resemblance, and some points of difference, appear in the Laches when compared with the Charmides and Lysis. There is less of poetical and simple beauty, and more of dramatic interest and power. They are richer in the externals of the scene; the Laches has more play and development of character. In the Lysis and Charmides the youths are the central figures, and frequent allusions are made to the place of meeting, which is a palaestra. Here the place of meeting, which is also a palaestra, is quite forgotten, and the boys play a subordinate part. The *séance* is of old and elder men, of whom Socrates is the youngest.

First is the aged Lysimachus, who may be compared with Cephalus in the Republic, and, like him, withdraws from the argument. Melesias, who is only his shadow, also subsides into silence. Both of them have been ill-educated, as is shown in a striking manner by the circumstance that Lysimachus, the friend of Sophroniscus, has never heard of the fame of Socrates, his son; they belong to different circles. The characters of the two generals, Nicias and Laches, are first indicated by their opinions on the exhibition of the man fighting in heavy armor. The more thoughtful Nicias is quite ready to accept the new art, which Laches treats in the spirit of ridicule, and seems to think that this, or any other military question, may be settled by asking, "What do the Lacedaemonians say to this?" The one clearly inclines to tactics and arts of fence; the other is an enemy to innovation, and relies on native courage. It is to be

noted that one of them is supposed to be a hearer of Socrates; the other is only acquainted with his actions. Laches is the admirer of the Dorian mode; and into his mouth the remark is put that there are some persons who, never having been taught, are better than those who have.

In the discussion of the main thesis of the Dialogue, — "What is Courage?" the antagonism of the two characters is still more clearly brought out; and in this, as in the preliminary question, the truth is parted between them. Gradually, and not without difficulty, Laches is made to pass on from the more popular to the more philosophical; it has never occurred to him that there was any other courage than that of the soldier; and only by an effort of the mind can he frame a general notion at all. No sooner has this general notion been formed than it evanesces before the dialectic of Socrates; and Nicias appears from the other side with the Socratic doctrine, that courage is knowledge. But to this Socrates himself replies, that knowledge is of past, present, and future, and such a definition of virtue would make courage equivalent to all virtue. In this part of the Dialogue the contrast between the mode of cross-examination which is practiced by Laches and by Socrates, and the manner in which the definition of Laches is made to approximate to that of Nicias, are well worthy of attention.

Thus, with some intimation of the connection and unity of virtue and knowledge, we arrive at no distinct result. The two aspects of courage are never harmonized. The knowledge which in the Protagoras is explained as the faculty of estimating pleasures and pains is here lost in an unmeaning and transcendental conception. Yet several true intimations of the nature of courage are allowed to appear: (1) That courage is moral as well as physical; (2) That true courage is inseparable from knowledge, and yet (3) is based on a sort of natural instinct. Laches exhibits one aspect of courage; Nicias the other. The perfect image and harmony of both is only realized in Socrates himself.

LACHES, OR COURAGE.

PERSONS OF THE DIALOGUE.

LYSIMACHUS, *son of Aristides.*	NICIAS.
MELESIAS, *son of Thucydides.*	LACHES.
THEIR SONS.	SOCRATES.

Lys. YOU have seen the exhibition of the man fighting in armor, Nicias and Laches, but we did not tell you at the time the reason why my friend Melesias and I asked you to go with us and see him. I think that we may as well confess this, for we certainly ought not to have any reserve with you. The reason was, that we were intending to ask your advice. Some laugh at the very notion of advising others, and when they are asked will not say what they think. They guess at the wishes of the person who asks them, and answer according to his, and not according to their own opinion. But as we know that you are good judges, and will say exactly what you think, we have taken you into our counsels. And the matter about which I am making all this preface is just this: Melesias and I have two sons; that is his son, and he is named Thucydides, after his grandfather; and this is mine, who is also called, after his grandfather, Aristides. Now, we are resolved to take the greatest care of the youths, and not to let them run about as they like, which is too often the way with the young, when they are no longer children, but to begin at once and do the utmost that we can for them. And knowing that you have sons of your own, we thought that you were most likely to have attended to their training and improvement, and, if you have not, we may remind you that you ought to have attended to them, and would invite you to assist us in the fulfillment of a common duty. I

Steph. 178

179

will tell you, Nicias and Laches, even at the risk of being tedious, how we came to think of this. Melesias and I live together, and our two sons live with us; and now, as I was saying at first, we are going to confess to you. Both of us often talk to the lads about the many noble deeds which our fathers did in war and peace — in the management of the allies, and also of the affairs of the city; but neither of us has any deeds of his own which he can show. Now we are somewhat ashamed of this contrast being seen by them, and we blame our fathers for letting us be spoiled in the days of our youth, while they were occupied with the concerns of others; and this we point out to the lads, and tell them that they will not grow up to honor if they are rebellious and take no pains about themselves; but that if they take pains they may, perhaps, become worthy of the names which they bear. They, on their part, promise to comply with our wishes; and our care is to discover what studies or pursuits are likely to be most improving to them. Some one told us of this art of using weapons, which, he said, was an excellent accomplishment for a young man to learn; and he praised the man whose exhibition you have seen, and told us to go and see him. And we determined to go, and to get you to accompany us, and if you did not object, we thought that we would take counsel with you about the education of our sons. That is the matter about which we wanted to talk with you; and we hope that you will give us your opinion about this, and about any other studies or pursuits which may or may not be desirable for a young man to learn. Please to say whether you object to our proposal.

Nic. As far as I am concerned, Lysimachus and Melesias, I applaud your purpose, and will gladly assist you; and I believe that you, Laches, will be equally glad.

La. Certainly, Nicias; and I quite approve of the remark which Lysimachus made about his own father, and the father of Melesias, and which is applicable, not only to them, but to us, and to every one who is occupied with public affairs. As he says, they are too apt to be negligent and careless of their own children and their private concerns. There is much truth in that remark of yours, Lysimachus. But why do you not consult our friend Socrates, instead of consulting us, about the education of the youths? he is of the same deme with you, and is always passing his time in places in which the youth have any noble study or pursuit, such as you are inquiring after.

Lys. Why, Laches, has Socrates ever attended to matters of this sort?

La. Certainly, Lysimachus.

Nic. That I have the means of knowing as well as Laches for quite lately he supplied me with a teacher of music for my sons, — Damon, the disciple of Agathocles, who is a most accomplished man in every way, as well as a musician, and a companion of inestimable value for young men at their age.

Lys. Those who have reached my age, Socrates and Nicias and Laches, fall out of acquaintance with the young, because they are generally detained at home by old age; but I hope that you, O son of Sophroniscus, will let your fellow demesmen have the benefit of any advice which you are able to give them. And I have a claim upon you as an old friend of your father; for I and he were always companions and friends, and to the hour of his death there never was a difference between us; and now it comes back to me, at the mention of your name, that I have heard these lads talking to one another at home, and often speaking of Socrates in terms of the highest praise; but I have never thought to ask them whether the son of So- 181
phroniscus was the person whom they meant. Tell me, my boy, whether this is the Socrates of whom you have often spoken?

Son. Certainly, father, this is he.

Lys. I am delighted to hear, Socrates, that you maintain the name of your father, who was a most excellent man; and I further rejoice at the prospect of our family ties being renewed.

La. Indeed, Lysimachus, you ought not to give him up; for I can assure you that I have seen him maintaining not only his father's, but also his country's name. He was my companion in the retreat from Delium, and I can tell you that if others had only been like him, the honor of our country would have been maintained, and the great defeat would never have occurred.

Lys. That is very high praise, which is given you, Socrates, by faithful witnesses and for deserts like these. And let me tell you the pleasure which I feel in hearing of your fame; and I hope that you will regard me as one of your best friends; indeed you ought to have visited us long ago, and reckoned us among your friends; but now, from this day forward, as we have at last found one another out, do as I say — come and make acquaintance with me, and with these young men, that I

may continue your friend, as I was your father's. I shall expect you to do this, and shall venture to remind you. But what say you of the matter of which I was speaking — the art of fighting in armor? Is that a practice in which the lads may be advantageously instructed?

Soc. I will endeavor to advise you, Lysimachus, as far as I can in this matter, and also in every way will comply with your wishes; but as I am younger and not so experienced, I think that I ought to hear what my elders have to say first, and to learn of them, and if I have anything to add, then I may venture to give my opinion to them as well as to you. Suppose, Nicias, that one of you speaks first.

Nic. I have no objection, Socrates; and my opinion is that the acquirement of this art is in many ways useful to young men. There is an advantage in their being employed during their leisure hours in a way which tends to improve their
182 bodily constitution, and not in the way in which young men are too apt to be employed. No sort of gymnastics could be harder exercise; and this, and the art of riding, are of all arts most befitting to a freeman; for they only who are thus trained in the use of implements of war are trained in the conflict which is set before us, or in that on which the conflict turns. Moreover, in actual battle this sort of acquirement will be of some use, when you have to fight in a line with a number of others; and will be of the greatest use when the ranks are broken and you have to fight singly; either in pursuit, when you are attacking some one who is defending himself, or in flight, when you have to defend yourself against an assailant. Certainly he who possessed the art could not meet with any harm at the hands of a single person, or perhaps of several; and in any case he would have a great advantage. Further, this sort of skill inclines a man to other noble lessons; for every man who has learned how to fight in arms will desire to learn the proper arrangement of an army, which is the sequel of the lesson: and when he has learned this, and his ambition is once fired, he will go on to learn the complete art of the general. There is no difficulty in seeing that the knowledge and practice of other military arts will be useful and valuable to a man; and this lesson may be the beginning of them. Let me add a further advantage, which is by no means a slight one, — that this science will make any man a great deal more valiant and self-possessed in the field. And I will not disdain

to mention, what to some may appear to be a small matter, that he will make a better appearance at the right time; that is to say, at the time when his appearance will strike terror into his enemies. My opinion then, Lysimachus, is, as I say, that the youths should be instructed in this art, and for the reasons which I have given. But I shall be very glad to hear Laches, if he has another view.

La. I should not like to say, Nicias, that any kind of knowledge is not to be learned; for all knowledge appears to be a good: and if, as Nicias and as the teachers of it affirm, this art of fence is really a species of knowledge, then it ought to be learned; but if not, and if those who profess it are deceivers only; or if it be knowledge, but not of a valuable sort; then what is the use of learning it? I say this, because I think that if it had been really valuable, the Lacedaemo- 183
nians, whose whole life is passed in finding out and practicing the arts which give them an advantage over other nations in war, would have discovered this one. And even if they had not, still these professors of the art would certainly not have failed to discover that of all the Hellenes the Lacedaemonians have the greatest interest in such matters, and that a master of the art who was honored among them would have been sure to have made his fortune among other nations, just as a tragic poet would who is honored among ourselves; which is the reason why he who fancies that he can write a tragedy does not go on a peregrination into the neighboring states, but rushes hither straight, and exhibits at Athens; and this is natural. Whereas I perceive that these fighters in armor regard Lacedaemon as a sacred inviolable territory, which they do not touch with the point of their foot; but they make a circuit of the neighboring states, and would rather exhibit to any others than to the Spartans; and particularly to those who would themselves acknowledge that they are by no means first-rate in the arts of war. Further, Lysimachus, I have encountered a good many of these gentlemen in actual service, and have taken their measure, which I can give you at once; for none of these masters of fence has ever been distinguished in war, — there has been a sort of fatality about this: whereas, in all other arts, the men of note have been always those who have practiced the art; but these appear to be a most unfortunate exception. For example, this very Stesilaus, whom you and I have just witnessed exhibiting in all that crowd and making such great professions of

his powers, I have seen at another time making, in sober truth, an involuntary exhibition of himself, which was a far better spectacle. He was a marine on board a ship, which struck a transport vessel, and was armed with a weapon, half spear, half scythe, the singularity of which was worthy of the singularity of the man. To make a long story short, I will only tell you what happened to this notable invention of the scythe-spear. He was fighting, and the scythe end caught in the rigging of the other ship, and stuck fast; and he tugged, but was unable to get his weapon free. The two ships were passing one another. He first ran along his own ship holding on to the spear; but as the other ship passed by and drew him after as he was holding on, he let the spear slip through his hand until he re-
184 tained only the end of the handle. The people in the transport clapped their hands, and laughed at his ridiculous figure; and when some one threw a stone, which fell on the deck at his feet, and he quitted his hold of the scythe-spear, the crew of his own trireme also burst out laughing; they could not refrain when they beheld the weapon waving in the air, suspended from the transport. Now I do not deny that there may be something in such an art, as Nicias asserts: but I tell you my experience, and, as I said at first, my opinion is, that whether this be an art which is of some slight advantage, or not an art at all, but only an imposition; in either case there is no use in such an acquirement. For my opinion is, that if the professor of this art be a coward, he will be likely to become rash, and his character will be only more notorious; or if he be brave, and fail ever so little, other men will be on the watch, and he will be greatly traduced: for there is a jealousy of such pretenders; and unless a man be preëminent in valor, he cannot help being ridiculous, if he says that he has this skill in weapons. Such is my judgment, Lysimachus, of the desirableness of this art; but, as I said at first, ask Socrates, and do not let him go until he has given you his opinion of the matter.

Lys. I am going to ask this favor of you, Socrates; as is the more necessary because the two doctors disagree, and some one is needed to decide between them. Had they agreed, this might not have been required. But as Laches has voted one way and Nicias another, I should like to hear with which of our two friends you agree.

Soc. What, Lysimachus, are you for going by the opinion of the majority?

Lys. Why, yes, Socrates; what other way is there?

Soc. And would you agree in that, Melesias? If you were deliberating about the gymnastic training of your son, would you follow the advice of the majority of us, or the opinion of the one who had been trained and exercised under a skillful master?

Mel. I should take the advice of the latter, Socrates; as would be reasonable.

Soc. His one vote would be worth more than the vote of all us four?

Mel. Certainly.

Soc. And for this reason, as I imagine, — because a good decision is based on knowledge and not on numbers?

Mel. To be sure.

Soc. Must we not then first of all ask, whether there is any one of us who has knowledge in that about which we are deliberating? If there is, let us take his advice, though he be one only, and not mind the others; if there is not, let us seek further counsel. Is this a slight matter about which you and Lysimachus are deliberating? Are you not risking the greatest of your possessions? For children are your riches; and upon their turning out well or ill will depend the whole order of their father's house. 185

Mel. That is true.

Soc. Great care, then, is required in the matter?

Mel. Certainly.

Soc. Suppose, as I was just now saying, that we were considering, or wanting to consider, who was the best trainer. Should we not decide in his favor who knew and had practiced the art, and had the best teachers?

Mel. I think that we should.

Soc. But would there not arise a prior question about the nature of the art of which we want to find the masters?

Mel. I do not understand.

Soc. Let me try to make my meaning plainer then. I do not think that we have as yet decided what that is about which we are consulting, when we ask which of us is skilled in that, and which of us has or has not had a teacher of the art.

Nic. Why, Socrates, is not the question whether young men ought or ought not to learn the art of fighting in armor?

Soc. Yes, Nicias; but there is also a prior question, which I may illustrate in this way: When a person considers about

applying a medicine to the eyes, would you say that he is consulting about the medicine or about the eyes?

Nic. About the eyes.

Soc. And when he considers if he shall set a bridle on a horse, he thinks of the horse and not of the bridle?

Nic. True.

Soc. And in a word, when he considers anything for the sake of another thing, he thinks of the end and not of the means?

Nic. Certainly.

Soc. And when you call in an adviser, you should see whether he is skillful in the accomplishment of the end which you have in view, as well as of the means?

Nic. Most true.

Soc. And at present we have in view some kind of knowledge, the end of which is the soul of youth?

Nic. Yes.

Soc. The question is, Which of us is skillful or successful in the treatment of the soul, and which of us has had good teachers?

La. Well but Socrates; did you never observe that some persons, who have had no teachers, are more skillful than those who have, in some things?

Soc. Yes, Laches, I have observed that; but you would not be very willing to trust them if they only professed to be mas-
186 ters of their art, unless they could show some proof of their skill or excellence in one or more works.

La. That is true.

Soc. And therefore, Laches and Nicias, as Lysimachus and Melesias, in their anxiety to improve the minds of their sons, have asked our advice about them, we too should inform them who our teachers were, if we say that we have any, and prove them to be men of merit and experienced trainers of the minds of youth and really our teachers. Or if any of us says that he has no teacher, but that he has works to show of his own; then he should point out to them, what Athenians or strangers, bond or free, he is generally acknowledged to have improved. But if he can show neither teachers nor works, then they should ask him to look out for others; and not to run the risk of spoiling the childreu of friends, which is the most formidable accusation that can be brought against any one by his near and dear relations. As for myself, Lysimachus and Melesias, I am the first to confess that I have never had a teacher; although I have

always from my earliest youth desired to have one. But I am too poor to give money to the Sophists, who are the only professors of moral improvement; and to this day I have never been able to discover the art myself, though I should not be surprised if Nicias or Laches may have learned or discovered it; for they are far wealthier than I am, and may therefore have learnt of others. And they are older too; so that they have had more time to make the discovery. And I really believe that they are able to educate a man; for unless they had been confident in their own knowledge, they would never have spoken thus decidedly of the pursuits which are advantageous or hurtful to a young man. I repose confidence in both of them; but I do not understand why they differ from one another. And therefore, Lysimachus, as Laches suggests that you should detain me, and not let me go until I have answered, I in turn earnestly beseech and advise you to detain Laches and Nicias, and question them. I would have you say to them: Socrates says that he has no knowledge of the matter, and that he is unable to decide which of you speaks truly; neither discoverer or student is he of anything of the kind. But you, Laches and Nicias, should either of you tell us who is the most skillful educator whom you have ever known; and whether you invented the art yourselves, or learned of another; and if 187
you learned, who were your respective teachers, and who were their brothers in the art; and then, if you are too much occupied in politics to teach us yourselves, let us go to them, and present them with gifts, or make interest with them, or both, in the hope that they may be induced to take charge of all our families, in order that they may not grow up inferior, and disgrace their ancestors. But if you are yourselves original discoverers in that field, give us some proof of your skill. Who are they who, having been inferior persons, have become under your care good and noble? For if this is your first attempt at education, there is a danger that you may be trying the experiment, not on the "vile corpus" of a Carian slave, but on your own sons, or the sons of your friend; and as the proverb says, "Break the large vessel in learning to make pots." Tell us then, what qualities you claim or do not claim. Make them tell you this, Lysimachus, and do not let them off.

Lys. I very much approve of the words of Socrates, my friends; but you, Nicias and Laches, must determine whether you will be questioned, and give an explanation about matters of

this sort. Assuredly, I and Melesias would be greatly pleased to hear you answer the questions which Socrates asks, if you will: for I began by saying that we took you into our counsels because we thought you would be likely to have attended to the subject, especially as you have children who, like our own, are nearly of an age to be educated. Suppose, then, if you have no objection, that you take Socrates into partnership; and do you and he ask and answer one another's questions: for, as he has well said, we are deliberating about the most important of our concerns. I hope that you will see fit to comply with our request.

Nic. I see very clearly, Lysimachus, that you have only known Socrates' father, and have no acquaintance with Socrates himself: at least, you can only have known him when he was a child, and may have met him among his fellow-tribesmen, in company with his father, at a sacrifice, or at some other gathering. You clearly show that you have never known him since he arrived at manhood.

Lys. Why do you say that, Nicias?

Nic. You don't seem to be aware that any one to whom Socrates has an intellectual affinity is liable to be drawn into an argument with him; and whatever subject may be started by him, he will be continually carried round and round by him,
188 until at last he finds that he has to give an account both of his present and past life; and when he is once entangled, Socrates will not let him go until he has completely and thoroughly sifted him. Now I am used to his ways; and I know that he will certainly do this: and I also know that I myself will be the sufferer; for I am fond of his company, Lysimachus. Neither do I think that there is any harm in being reminded of the evil which we are, or have been doing: he who does not fly from reproof will be sure to take more heed of his after life; he will wish and desire to learn as long as he lives, as Solon says, and will not think that old age of itself brings wisdom. To me to be cross-examined by Socrates is neither unusual nor unpleasant; indeed, I knew all along that where Socrates was, the argument would soon pass from our sons to ourselves; and therefore, as I say, as far as I am concerned, I am quite willing to discourse with Socrates in his own manner; but you had better ask our friend Laches what his feeling may be.

La. I have but one feeling, Nicias, or (shall I say?) two feelings, about discussions. And to some I may seem to be a lover, and to others a hater of discourse; for when I hear a man dis-

coursing of virtue, or of any sort of wisdom, who is a true man and worthy of his theme, I am delighted beyond measure: and I compare the man and his words, and note the harmony and correspondence of them. And such a one I deem to be the true musician, having in himself a fairer harmony than that of the lyre, or any pleasant instrument of music; for truly he has in his own life a harmony of words and deeds arranged, not in the Ionian, or in the Phrygian mode, nor yet in the Lydian, but in the true Hellenic mode, which is the Dorian, and no other. Such a one makes me merry with the sound of his voice; and when I hear him I am thought to be a lover of discourse; so eager am I in drinking in his words. But when I hear a man of opposite character, I am annoyed; and the better he speaks the more I hate him, and then I seem to be a hater of discourse. As to Socrates, I have no knowledge of his words: but of old, as would seem, I have had experience of his deeds; and his deeds show that free and noble sentiments may be expected from him. And if his words accord, then I am of one 189
mind with him and shall be delighted to be interrogated by a man such as he is, and shall not be annoyed at having to learn of him: for I agree with Solon, "That I would fain grow old, learning many things." But I must be allowed to add of the good only. Socrates must be willing to allow that he is a good teacher, or I shall be a dull and uncongenial pupil: but that the teacher is younger, or not as yet in repute — anything of that sort is of no account with me. And therefore, Socrates, I give you notice that you may teach and confute me as much as ever you like, and also learn of me anything which I know. Such is the opinion which I have had of you ever since that day on which you were my companion in danger, and gave an unmistakable proof of your valor. Therefore, say whatever you like, and do not mind about the difference of our ages.

Soc. I cannot say that either of you show any reluctance to take counsel and advise with me.

Lys. But that is our business, in which I regard you as having a common interest; for I reckon you as one of us. Please then to take my place, and find out from Nicias and Laches what we want to know, for the sake of the youths, and talk and advise with them: for I am old and my memory is bad; and I do not remember the questions which I am going to ask, or the answers to them; and if there is any interruption I am quite lost. I will therefore beg of you to carry on the proposed dis-

cussions by yourselves; and I will listen, and Melesias and I will act upon your conclusions.

Soc. Let us, Nicias and Laches, comply with the request of Lysimachus and Melesias. There would be no harm in asking ourselves the question which was first proposed to us: Who have been our own instructors in this sort of training, and whom we have made better? But the other mode of carrying on the inquiry will bring us to the same point, and will be more like proceeding from first principles. For if we knew that the addition of something would improve some other thing, and were able to make the addition, then, clearly, we must know how that about which we are advising may be best and most easily attained. Perhaps you do not understand what I mean. Then let me make my meaning plainer in this way. Suppose we
190 know that the addition of sight makes better the eyes which possess this gift, and also were able to impart sight to the eyes, then, clearly, we should know the nature of sight, when asked how this gift of sight may be best and most easily attained; for if we knew neither what sight is, nor what hearing is, we should not be very good medical advisers about the eyes, or the ears, or about the best mode of giving sight and hearing to them.

La. That is true, Socrates.

Soc. And are not our two friends, Laches, at this very moment inviting us to consider in what way the gift of virtue may be imparted to their sons for the improvement of their minds?

La. Very true.

Soc. Then must we not first know the nature of virtue? For how, if we are wholly ignorant of this, can we advise any one about the best mode of attaining it?

La. I do not think that we can, Socrates.

Soc. Then, Laches, we may presume that we know the nature of virtue?

La. Yes.

Soc. And that which we know we must surely be able to tell?

La. Certainly.

Soc. I would not have us begin, my friend, with inquiring about the whole of virtue; for that may be too much for us: let us first consider whether we have a sufficient knowledge of a part; that will probably be an easier mode of proceeding.

La. Let us do as you say, Socrates.

Soc. Then which of the parts of virtue shall we select? Must we not select that to which the use of arms is supposed to conduce? And is not that generally supposed to be courage?

La. Yes, certainly.

Soc. Then, Laches, suppose that we first set about determining the nature of courage, and in the second place proceed to inquire how the young men may attain this quality of courage, as far as this is to be effected by the help of studies and pursuits. Try, and see whether you can tell me what is courage.

La. Indeed, Socrates, that is soon answered: he is a man of courage who remains at his post, and does not run away, but fights against the enemy; of that you may be very certain.

Soc. That is good, Laches; and yet I fear that I did not express myself clearly; and therefore you have answered not the question which I intended to ask, but another.

La. What do you mean, Socrates?

191

Soc. I will endeavor to explain; you would call a man courageous, who remains at his post, and fights with the enemy?

La. Certainly I should.

Soc. And so should I; but what would you say of another man, who fights flying, instead of remaining?

La. How flying?

Soc. Why, as the Scythians are said to fight, flying as well as pursuing; and as Homer says in praise of the horses of Aeneas, that they knew how to pursue, and fly quickly hither and thither; and he passes an encomium on Aeneas himself, as having a knowledge of fear or flight, and calls him an author of fear or flight.

La. Yes, Socrates, and there Homer is right; for he was speaking of chariots, as you were speaking of the Scythian cavalry, who have that way of fighting; but the heavy-armed Greek fights, as I say, remaining in his rank.

Soc. And yet, Laches, you must except the Lacedaemonians at Plataea, who, when they came upon the light shields of the Persians, are said not to have been willing to stand and fight, and to have fled; but when the ranks of the Persians were broken, they turned upon them like cavalry, and won the battle.

La. That is true.

Soc. That was my meaning when I said that I was to blame in having put my question badly, and that this was the reason

of your answering badly. For I meant to ask you not only about the courage of heavy-armed soldiers, but about the courage of cavalry, and every other style of soldier; and not only who are courageous in war, but who are courageous in perils by sea, and who in disease, or poverty, or again in politics, are courageous; and not only who are courageous against pain or fear, but mighty to contend against desires and pleasures, either fixed in their rank or turning upon their enemy. There is this sort of courage, is there not?

La. Certainly, Socrates.

Soc. And all these are courageous, but some have courage in pleasures, and some in pains; some in desires, and some in fears; and some are cowards under the same conditions, as I should imagine.

La. Very true.

Soc. Now I was asking about courage and cowardice in general. And I will begin with courage, and once more ask, What is that common quality, which is the same in all these cases, and which is called courage? Do you understand now what I mean?

La. Not over well.

192 *Soc.* I mean this: As I might ask what is that quality which is called quickness, and which is found in running, playing the lyre, speaking, learning, and in many other similar actions, or rather which we possess in nearly every action that can be mentioned of arms or legs, mouth, voice, mind; would you not apply the term quickness to all of them?

La. Quite true.

Soc. And suppose I were to be asked by some one: What is that common quality, Socrates, which, in all these uses of the word, you call quickness? I should say that which accomplishes much in a little time — that I call quickness in running, speaking, and every other sort of action.

La. You would be quite correct.

Soc. And now, Laches, do you try and tell me, What is that common quality which is called courage, and which includes all the various uses of the term when applied both to pleasure and pain, and in all the cases which I was just now mentioning?

La. I should say that courage is a sort of endurance of the soul, if I am to speak of the universal nature which pervades them all.

Soc. But that is what we must do if we are to answer the

question. And yet I cannot say that every kind of endurance is, in my opinion, to be deemed courage. Hear my reason: I am sure, Laches, that you would consider courage to be a very noble quality.

La. Most noble, certainly.

Soc. And you would say that a wise endurance is also good and noble?

La. Very noble.

Soc. But what would you say of a foolish endurance? Is not that, on the other hand, to be regarded as evil and hurtful?

La. True.

Soc. And is anything noble which is evil and hurtful?

La. I ought not to say that, Socrates.

Soc. Then you would not admit that sort of endurance to be courage — for that is not noble, but courage is noble?

La. You are right.

Soc. Then, according to you, only the wise endurance is courage?

La. True.

Soc. But as to the epithet "wise," — wise in what? In all things small as well as great? For example, if a man endures in spending his money wisely, knowing that by spending he will acquire more in the end, do you call him courageous?

La. Assuredly not.

Soc. Or, for example, if a man is a physician, and his son, or some patient of his, has inflammation of the lungs, and begs that he may be allowed to eat or drink something, and the other refuses; is that courage?

La. No; that is not courage at all, any more than the last. 193

Soc. Again, take the case of one who endures in war, and is willing to fight, and wisely calculates and knows that others will help him, and that there will be fewer and inferior men against him than there are with him; and suppose that he has also advantages of position; would you say of such a one who endures with all this wisdom and preparation, that he, or some man in the opposing army who is in the opposite circumstances to these and yet endures and remains at his post, is the braver?

La. I should say that the latter, Socrates, was the braver.

Soc. But, surely, this is a foolish endurance in comparison with the other?

La. That is true.

Soc. And you would say that he who in an engagement of cavalry endures, having the knowledge of horsemanship, is not so courageous as he who endures, having no knowledge of horsemanship?

La. That is my view.

Soc. And he who endures, having a knowledge of the use of the sling, or the bow, or any other art, is not so courageous as he who endures, not having such a knowledge?

La. True.

Soc. And he who descends into a well, and dives, and holds out in this or any similar action, having no knowledge of diving, or the like, is, as you would say, more courageous than those who have this knowledge?

La. Why, Socrates, what else can a man say?

Soc. Nothing, if that is what he thinks.

La. But that is what I do think.

Soc. And yet men who thus run risks and endure are but foolish, Laches, in comparison of those who do the same things, having the skill to do them.

La. That is true.

Soc. But foolish boldness and endurance appeared before to be base and hurtful to us.

La. Quite true.

Soc. Whereas courage was acknowledged to be a noble quality.

La. True.

Soc. And now on the contrary we are saying that the foolish endurance, which was before held in dishonor, is courage.

La. Very true.

Soc. And are we right in saying that?

La. Indeed, Socrates, I am sure that we are not right.

Soc. Then according to your statement, you and I, Laches, are not attuned to the Dorian mode, which is a harmony of words and deeds; for our deeds are not in accordance with our words. Any one would say that we had courage who saw us in action, but not, I imagine, he who heard us talking about courage just now.

La. That is most true.

Soc. And is this condition of ours satisfactory?

La. Quite the reverse.

Soc. Suppose, however, that we admit our principle to a certain extent.

La. What principle? And what are we to admit?

Soc. The principle of endurance. Let us too endure 194
and persevere in the inquiry, and then courage will not laugh at our faint-heartedness in searching for courage; which after all may, very likely, be endurance.

La. I am ready to go on, Socrates; and yet I am unused to investigations of this sort. But the spirit of controversy has been aroused in me by what has been said; and I am really grieved at being thus unable to express my meaning. For I fancy that I do know the nature of Courage; but, somehow or other, she has slipped away from me, and I cannot get hold of her and tell her nature.

Soc. But, my dear friend, should not the good sportsman follow the track, and not be lazy?

La. Certainly, he should.

Soc. And shall we invite Nicias to join us? he may be better at the sport than we are. What do you say?

La. I should like that.

Soc. Come then, Nicias, and do what you can to help your friends, who are tossing on the waves of argument, and at the last gasp: you see our extremity, and may save us, and also settle your own opinion, if you will tell us what you think about courage.

Nic. I have been thinking, Socrates, that you and Laches are not defining courage in the right way; for you have forgotten an excellent saying which I have heard from your own lips.

Soc. What is that, Nicias?

Nic. I have often heard you say that "Every man is good in that in which he is wise, and bad in that in which he is unwise."

Soc. That is certainly true, Nicias.

Nic. And therefore if the brave man is good, he is also wise.

Soc. Do you hear him, Laches?

La. Yes, I hear him, but I don't quite understand him.

Soc. I think that I understand him; and he appears to me to mean that courage is a sort of wisdom.

La. What sort of wisdom, Socrates?

Soc. That is a question which you must ask of Nicias.

La. Yes.

Soc. Tell him then, Nicias, what you mean by this wisdom;

for you surely do not mean the wisdom which plays on the flute?

Nic. Certainly not.

Soc. Nor the wisdom which plays the lyre?

Nic. No.

Soc. But what is this knowledge then, and of what?

La. I think that you put the question to him very well, Socrates; and I would like him to say what is the nature of this knowledge or wisdom.

195 *Nic.* I mean to say, Laches, that courage is the knowledge of that which inspires fear or confidence in war, or in anything.

La. How strangely he is talking, Socrates.

Soc. What makes you say that, Laches?

La. What makes me say that? Why surely courage is one thing, and wisdom another.

Soc. That is just what Nicias denies.

La. Yes, that is what he denies in his foolishness.

Soc. Shall we enlighten him instead of abusing him?

Nic. Laches does not want to enlighten me, Socrates; but having been proved to be talking nonsense himself, he wants to prove that I have been doing the same.

La. Very true, Nicias; and you are talking nonsense, as I shall endeavor to show. Let me ask you a question: Do not physicians know the dangers of disease? or do the courageous know them? or are the physicians the same as the courageous?

Nic. Not at all.

La. No more than the husbandmen who know the dangers of husbandry, or other masters of crafts, who have a knowledge of that which inspires them with fear or confidence in their own crafts, and yet they are not courageous a whit the more for that.

Soc. What is Laches saying, Nicias; he appears to be saying something.

Nic. Yes, he is saying something, but something which is not true.

Soc. How is that?

Nic. Why, because he does not see that the physician's knowledge only extends to the nature of health and disease: he can tell the sick man that, and nothing more. Do you imagine, Laches, that the physician knows whether health or disease is the more terrible to a man? Had not many a man

better never get up from a sick bed? I should like to know whether you think that life is always better than death. May not death often be the better of the two?

La. Yes, I certainly think that.

Nic. And do you think that the same things are terrible to those to whom to die is better, and to those to whom to live is better?

La. Certainly not.

Nic. And do you suppose that the physician or any other artist knows this, or any one indeed, except he who is skilled in the grounds of fear and hope? And him I call the courageous.

Soc. Do you understand his meaning, Laches?

La. Yes; I suppose that, in his way of speaking, the soothsayers are courageous. For who but one of them can know to whom to die or to live is better? And yet, Nicias, would you allow that you are yourself a soothsayer, or are you neither soothsayer nor courageous?

Nic. What! do you mean to say that the soothsayer ought to know the grounds of hope or fear?

La. Indeed I do: who but he?

Nic. Much rather I should say he of whom I speak; for the soothsayer ought to know only the signs of things that are about to come to pass, whether death or disease, or loss of property, or victory, or defeat in war, or in any sort of 196 contest; but to whom the suffering or not suffering of these things will be for the best, can no more be decided by the soothsayer than by one who is no soothsayer.

La. I cannot understand what Nicias would be at, Socrates; for he represents the courageous man as neither a soothsayer, nor a physician, nor in any other character, unless he means to say that he is a god. My opinion is that he does not like honestly to confess that he is talking nonsense, but that he shuffles up and down in order to conceal the difficulty into which he has got himself. You and I, Socrates, might have practiced a similar shuffle just now, if we had only wanted to avoid the appearance of contradiction. And if we had been arguing in a court of law there might have been reason in this; but why should a man deck himself out with vain words at a meeting of friends such as this?

Soc. I quite agree with you, Laches, that he should not. But perhaps Nicias is serious, and not merely talking for the

sake of talking. Let us ask him to explain what he means, and if he has reason on his side we will agree with him; if not, we will instruct him.

La. Do you, Socrates, if you like, ask him: I think that I have asked enough.

Soc. I don't see why I should not; and my question will do for both of us.

La. Very good.

Soc. Then tell me, Nicias, or rather tell us, for Laches and I are partners in the argument: Do you mean to affirm that courage is the knowledge of the grounds of hope and fear?

Nic. I do.

Soc. And that is a very special knowledge which is not possessed by the physician or prophet, who will not be courageous unless they superadd this particular knowledge. That is what you were saying?

Nic. I was.

Soc. Then courage is not a thing which every pig would have, any more than he would have knowledge, as the proverb says?

Nic. I think not.

Soc. Clearly not, Nicias; not even such a big pig as the Crommyonian sow would be called by you courageous. And this I say not as a joke, but because I think that he who assents to your doctrine, that courage is the knowledge of the grounds of fear and hope, cannot allow that any wild beast is courageous, unless he admits that a lion, or a leopard, or perhaps a boar, or any other animal, has a degree of wisdom which but a few human beings, and these only with difficulty, attain. He who takes your view of courage must affirm that a lion, and a stag, and a bull, and a monkey, have equally little pretensions to courage.

197 *La.* Capital, Socrates; by the gods, that is truly good. And I hope, Nicias, that you will tell us whether these animals, which we all admit to be courageous, are really wiser than mankind; or whether you will have the boldness, in the face of universal opinion, to deny their courage.

Nic. Why, Laches, I don't call animals or any other things courageous, which have no fear of dangers, because they are ignorant of them, but fearless and senseless only. Do you think that I should call little children courageous, which fear no dangers because they know none? There is a difference, as I

should imagine, between fearlessness and courage. Now I am of opinion that thoughtful courage is a quality possessed by very few, but that rashness, and boldness, and fearlessness, which has no forethought, are very common qualities possessed by many men, many women, many children, many animals. And you, and men in general, call by the term "courageous" actions which I call rash, and my courageous actions are wise actions.

La. Behold, Socrates, how admirably, as he thinks, he dresses himself out in words, while seeking to deprive of the honor of courage those whom all the world acknowledges to be courageous.

Nic. Be of good cheer, Laches; for I am quite willing to say of you and also of Lamachus, and of many other Athenians, that you are courageous and therefore wise.

La. I could answer that; but I would not have you cast in my teeth that I am a haughty Aexonian.

Soc. I would not have you answer him, for I fancy, Laches, that you have not discovered whence his wisdom comes; he has got all this from my friend Damon, and Damon is always with Prodicus, who, of all the Sophists, is considered to be the best taker to pieces of words of this sort.

La. Yes, Socrates; and the examination of such niceties is a much more suitable employment for a Sophist than for a great statesman whom the city chooses to preside over her.

Soc. But still, my sweet friend, a great statesman is just the man to have a great mind. And I think that the view which is implied in Nicias' definition of courage is worthy of examination.

La. Then examine for yourself, Socrates.

Soc. That is what I am going to do, my dear friend. Don't, however, suppose that I shall let you out of the partnership; for I shall expect you to apply your mind, and join with me in the consideration of the question.

La. I do not object if you think that I ought.

Soc. Yes, I do; and I must beg of you, Nicias, to begin again. You remember that we originally considered courage to be a part of virtue. 198

Nic. Very true.

Soc. And you yourself said that this was a part, and that there were many other parts, all of which together are called virtue.

Nic. Certainly.

Soc. Do you agree with me about the parts? For I say that justice, temperance, and the like, are all of them parts of virtue as well as courage. Would you not say the same?

Nic. Certainly.

Soc. Well then, about that we are agreed. And now let us proceed a step, and see whether we are equally agreed about the fearful and the hopeful. Let me tell you my own opinion, and if I am wrong you shall set me right; my opinion is that the terrible and the hopeful are the things which do or do not create fear, and that fear is not of the present, nor of the past, but is of future and expected evil. Do you not agree to that, Laches?

La. Yes, Socrates, entirely.

Soc. That is my view, Nicias; the terrible things, as I should say, are the evils which are future; and the hopeful are the good or not evil things which are future. Do you or do you not agree in this?

Nic. I agree.

Soc. And the knowledge of these things you call courage?

Nic. Precisely.

Soc. And now let me see whether you agree with Laches and myself in a third point.

Nic. What is that?

Soc. I will tell you. He and I have a notion that there is not one knowledge or science of the past, another of the present, a third of what will be and will be best in the future; but that of all three there is one science only: for example, there is one science of medicine which is concerned with the inspection of health equally in all times, present, past, and future; and of husbandry in like manner, which is concerned with the productions of the earth. And as to the general's art, you yourselves will be my witnesses, that the general has to think of the future as well as the present; and he considers that he is not to be the servant of the soothsayer, but his master, be-
199 cause he knows better what is happening or is likely to happen in war: and accordingly the law places the soothsayer under the general, and not the general under the soothsayer. Am I not correct, Laches?

La. Quite correct.

Soc. And do you, Nicias, also acknowledge that the same science has understanding of the same things, whether future, present, or past?

Nic. Yes, indeed, Socrates; that is my opinion.

Soc. And courage, my friend, is, as you say, a knowledge of the fearful and of the hopeful?

Nic. Yes.

Soc. And the fearful, and the hopeful, are admitted to be future goods and future evils?

Nic. True.

Soc. And the same science has to do with the same things in the future or at any time?

Nic. That is true.

Soc. Then courage is not the science which is concerned with the fearful and hopeful, for they are future only; and courage, like the other sciences, is concerned not only with good and evil of the future, but of the present, and past, and of any time?

Nic. That, as I suppose, is true.

Soc. Then the answer which you have given, Nicias, includes only a third part of courage; but our question extended to the whole nature of courage: and according to your view, that is, according to your present view, courage is not only the knowledge of the hopeful and the fearful, but seems to include nearly every good and evil without reference to time. What do you say to that alteration in your statement?

Nic. I agree to that, Socrates.

Soc. But then, my dear friend, if a man knew all good and evil, and how they are, and have been, and will be produced, would he not be perfect, and wanting in no virtue, whether justice, or temperance, or holiness? He would possess them all, and he would know which were dangers and which were not, and guard against them whether they were supernatural or natural; and he would provide the good, as he would know how to deal with gods or men.

Nic. I think, Socrates, that there is a great deal of truth in what you say.

Soc. But then, Nicias, courage, according to this new definition of yours, instead of being a part of virtue only, will be all virtue?

Nic. I suppose that is true.

Soc. But we were saying that courage is one of the parts of virtue?

Nic. Yes, that was what we were saying.

Soc. And that is in contradiction with our present view?

Nic. That appears to be the case.

Soc. Then, Nicias, we have not discovered what courage is

Nic. We have not.

200 *La.* And yet, friend Nicias, I imagined that you would have made the discovery, as you were so contemptuous of the answers which I made to Socrates. I had very great hopes that you would have been enlightened by the wisdom of Damon.

Nic. I perceive, Laches, that you think nothing of having displayed your ignorance of the nature of courage, but you look only to see whether I have not made a similar display; and if we are both equally ignorant of the things which a man who is good for anything should know, that, I suppose, will be of no consequence. You certainly appear to me very like the rest of the world, looking at your neighbor and not at yourself. I am of opinion that enough has been said on the subject of discussion; and if anything has been imperfectly said, that may be hereafter corrected by the help of Damon, whom you think to deride, although you have never seen him, and with the help of others. And when I am satisfied myself, I will freely impart my satisfaction to you, for I think that you are very much in want of knowledge.

La. You are a philosopher, Nicias; of that I am aware: nevertheless I would recommend Lysimachus and Melesias not to take you and me as advisers about the education of their children; but, as I said at first, they should ask Socrates; and if my sons were old enough, I would have asked him myself.

Nic. To that I quite agree, if Socrates is willing to take them under his charge. I should not wish for any one else to be the tutor of Niceratus. But I observe that when I mention the matter to him he recommends to me some other tutor and refuses himself. Perhaps he may be more ready to listen to you, Lysimachus.

Lys. He ought, Nicias: for certainly I would do things for him which I would not do for many others. What do you say, Socrates — will you comply? And are you ready to give assistance in the improvement of the youths?

Soc. Indeed, Lysimachus, I should be very wrong in refusing to aid in the improvement of anybody. And if I had shown in this conversation that I had a knowledge which Nicias and Laches have not, then I admit that you would be right in inviting me to perform this duty; but as we are all in the same

perplexity, why should one of us be preferred to another? I certainly think that no one should; and under these circumstances, let me offer you a piece of advice (and this need not go further than ourselves). I maintain, my friends, that every one of us should seek out the best teacher whom he can find, first for ourselves, and then for the youth, regardless of expense or anything. But I cannot advise that we remain as we are. And if any one laughs at us for going to school at our age, I would quote to them the authority of Homer, who says, that — 201

"Modesty is not good for a needy man."

Let us then, regardless of the remarks which are made upon us, make the education of the youths our own education.

Lys. I like your proposal, Socrates; and as I am the oldest, I am also the most eager to go to school with the boys. Let me beg a favor of you: come to my house to-morrow at dawn, and we will advise about these matters. For the present, let us make an end of the conversation.

Soc. I will come to you to-morrow, Lysimachus, as you propose, God willing.

PROTAGORAS.

INTRODUCTION.

THE Protagoras, like several of the Dialogues of Plato, is put into the mouth of Socrates, who describes a conversation which had taken place between himself and the great Sophist at the house of Callias — "the man who had spent more upon the Sophists than all the rest of the world," and in which the learned Hippias and the grammarian Prodicus had also shared, as well as Alcibiades and Critias, both of whom said a few words — in the presence of a distinguished company consisting of disciples of Protagoras and of leading Athenians belonging to the Socratic circle. The Dialogue commences with a request on the part of Hippocrates that Socrates would introduce him to the celebrated teacher. He has come before the dawn had risen to testify his zeal. Socrates moderates his excitement and advises him to find out "what Protagoras will make of him," before he becomes his pupil.

They go together to the house of Callias; and Socrates, after explaining the purpose of their visit to Protagoras, asks the question "What he will make of Hippocrates?" Protagoras answers, "That he will make him a better and a wiser man." "But in what will he be better?" — Socrates desires to have a more precise answer. Protagoras replies, "That he will teach him prudence in affairs private and public; in short, the science or knowledge of human life."

This, as Socrates admits, is a noble profession: but he is doubtful — or rather would have been, if Protagoras had not assured him of it — whether such knowledge can be taught. And this for two reasons: (1) Because the Athenian people, who recognize in their assemblies the distinction between the skilled and the unskilled, do not recognize any distinction between the trained politician and the untrained; (2) Because the wisest and best Athenian citizens do not teach their sons political virtue. Will Protagoras explain this anomaly to him?

Protagoras explains his views in the form of an apologue, in which, after Prometheus had given men the arts, Zeus is represented as sending Hermes to them, bearing with him Justice and Reverence. These are not, like the arts, to be imparted to a few only, but all men

are to be partakers of them. Therefore the Athenian people are right in distinguishing between the skilled and unskilled in the arts, and not between skilled and unskilled politicians. (1) For all men have the political virtues to a certain degree, and whether they have them or not are obliged to say that they have them. A man would be thought a madman who professed an art which he did not know; and he would be equally thought a madman if he did not profess a virtue which he had not. (2) And that the political virtues can be taught and acquired, in the opinion of the Athenians, is proved by the fact that they punish evil-doers, with a view to prevention, of course — mere retribution is for beasts, and not for men. (3) Another proof of this is the education of youth, which begins almost as soon as they can speak, and is continued by the state, when they pass out of the control of their parents. (4) Nor is there any inconsistency in wise and good fathers having foolish and worthless sons; for (*a*) in the first place the young do not learn of their fathers only, but of all the citizens; and (*b*) this is partly a matter of chance and of natural gifts: the sons of a great statesman are not necessarily great statesmen any more than the sons of a good artist are necessarily good artists. (5) The error of Socrates lies in supposing that there are no teachers, when all men are teachers. Only a few, like Protagoras himself, are somewhat better than others.

Socrates is highly delighted, and quite satisfied with this explanation of Protagoras. But he has still a doubt lingering in his mind. Protagoras has spoken of the virtues: are they many, or one? are they parts of a whole, or different names of the same thing? Protagoras replies that they are parts, like the parts of a face, which have their several functions, and no one part is like any other part. This admission, which has been somewhat hastily made, is now taken up and cross-examined by Socrates:

"Is justice just, and is holiness holy? And are justice and holiness opposed to one another?" — "Then justice is unholy." Protagoras would rather say that justice is different from holiness, and yet in a certain point of view nearly the same. He does not, however, escape in this way from the cunning of Socrates, who entangles him into an admission that everything has but one opposite. Folly, for example, is opposed to wisdom; and folly is also opposed to temperance; and therefore temperance and wisdom are the same. And holiness has been already admitted to be nearly the same as justice. Temperance, therefore, has now to be compared with justice.

Protagoras, whose temper begins to get a little ruffled at the process to which he has been subjected, is aware that he will soon be compelled by the dialectics of Socrates to admit that the temperate is the just. He therefore defends himself with his favorite weapon; that is to say, he makes a long speech not much to the point, which elicits the applause of the audience.

Here occurs a sort of interlude, which commences with a declaration on the part of Socrates that he cannot follow a long speech, and therefore he must beg Protagoras to speak shorter. As Protagoras declines to accommodate him, he rises to depart, but is detained by Callias, who thinks him unreasonable in not allowing Protagoras the liberty which he takes himself of speaking as he likes. But Alcibiades answers that the two cases are not parallel. For Socrates admits his inability to speak long; will Protagoras in like manner aknowledge his inability to speak short?

Counsels of moderation are urged first in a few words by Critias, and then by Prodicus in balanced and sententious language: and Hippias proposes an umpire. But who is to be the umpire? rejoins Socrates; he would rather suggest as a compromise that Protagoras shall ask, and he will answer. To this Protagoras yields a reluctant assent.

Protagoras selects as the thesis of his questions a poem of Simonides of Ceos, in which he professes to find a contradiction. First the poet says, —

"Hard is it to become good,"

and then reproaches Pittacus for having said, "Hard is it to be good." How is this to be reconciled? Socrates, who is familiar with the poem, is embarrassed at first, and invokes the aid of Prodicus the Cean, who must come to the help of his countryman, but apparently only with the intention of flattering him into absurdities. First a distinction is drawn between (ἔἶναι) to be, and (γενέσθαι) to become: to become good is difficult; to be good is easy. Then the word difficult or hard is explained to mean "evil" in the Cean dialect. To all this Prodicus assents; but when Protagoras reclaims, Socrates slyly withdraws Prodicus from the fray, under the pretense that his assent was only intended to test the wits of his adversary. He then proceeds to give another and more elaborate explanation of the whole passage. The explanation is as follows:

The Lacedaemonians are great philosophers (although this is a fact which is not generally known); and the soul of their philosophy is brevity, which was also the style of primitive antiquity and of the seven sages. Now Pittacus had a saying, "Hard is it to be good:" Simonides was jealous of the fame of this saying, and wrote a poem which was designed to controvert it. No, says he, Pittacus; not "hard to be good," but "hard to become good." Socrates proceeds to argue in a highly impressive manner that the whole composition is intended as an attack upon Pittacus. This, though manifestly absurd, is accepted by the company, and meets with the special approval of Hippias, who has however a favorite interpretation of his own, which he is requested by Alcibiades to defer.

The argument is now resumed, not without some disdainful re-

marks of Socrates on the practice of introducing the poets, who ought not to be allowed, any more than flute-girls, to come into good society. Men's own thoughts should supply them with the materials for discussion. A few soothing flatteries are addressed to Protagoras by Callias and Socrates, and then the old question is repeated, "Whether the virtues are one or many?" To which Protagoras is now disposed to reply, that four out of the five virtues are in some degree similar; but he still contends that the fifth, courage, is wholly dissimilar. Socrates proceeds to undermine the last stronghold of the adversary, first obtaining from him the admission that all virtue is in the highest degree good:

The courageous are the confident; and the confident are those who know their business or profession: those who have no such knowledge and are still confident are madmen. This is admitted. Then, says Socrates, courage is knowledge — an inference which Protagoras evades by drawing a futile distinction between the courageous and the confident in a fluent speech.

Socrates renews the attack from another side: he would like to know whether pleasure is not the only good, and pain the only evil? Protagoras seems to doubt the morality or propriety of assenting to this; he would rather say that "some pleasures are good, some pains are evil," which is also the opinion of the generality of mankind. What does he think of knowledge? does he agree with the common opinion about this also, that knowledege is overpowered by passion? or does he hold that knowledge is power? Protagoras agrees that knowledge is certainly a governing power.

This, however, is not the doctrine of men in general, who maintain that many who know what is best, act contrary to their knowledge under the influence of pleasure. But this opposition of good and evil is really the opposition of a greater or lesser amount of pleasure. Pleasures are evils because they end in pain, and pains are good because they end in pleasures. Thus pleasure is seen to be the only good; and the only evil is the preference of the lesser pleasure to the greater. But then comes in the illusion of distance. Some art of mensuration is required in order to show us pleasures and pains in their true proportion. This art of mensuration is a kind of knowledge, and knowledge is thus proved once more to be the governing principle of human life, and ignorance the origin of all evil: for no one prefers the less pleasure to the greater, or the greater pain to the less, except from ignorance. The argument is drawn out in an imaginary "dialogue within a dialogue," conducted by Socrates and Protagoras on the one part, and the rest of the world on the other. Hippias and Prodicus, as well as Protagoras, admit the soundness of the conclusion.

Socrates then applies this new conclusion to the case of courage — the only virtue which still holds out against the assaults of the

Socratic dialectic. No one chooses the evil or refuses the good except through ignorance. This explains why cowards refuse to go to war: because they form a wrong estimate of good, and honor, and pleasure. And why are the courageous willing to go to war? — because they form a right estimate of pleasures and pains, of things terrible and not terrible. Courage then is knowledge, and cowardice is ignorance. And the five virtues, which were originally maintained to have five different natures, after having been easily reduced to two only, are at last resolved in one. The assent of Protagoras to this last position is extracted with great difficulty.

Socrates concludes by professing his disinterested love of the truth, and remarks on the singular manner in which he and his adversary had changed sides. Protagoras began by asserting, and Socrates by denying, the teachableness of virtue, and now the latter ends by affirming that virtue is knowledge, which is the most teachable of all things, while Protagoras has been striving to show that virtue is not knowledge, and this is almost equivalent to saying that virtue cannot be taught. He is not satisfied with the result, and would like to renew the inquiry with the help of Protagoras in a different order, asking (1) What virtue is, and (2) Whether virtue can be taught. Protagoras declines this offer, but commends Socrates' carnestness and mode of discussion.

The Protagoras is often supposed to be full of difficulties. These are partly imaginary and partly real. The imaginary ones are: (1) Chronological, — which were pointed out in ancient times by Athenaeus, and are noticed by Schleiermacher and others, and relate to the impossibility of all the persons in the Dialogue meeting at any one time, whether in the year 425 B. C., or in any other. But Plato, like other writers of fiction, aims only at the probable, and has shown in other Dialogues (*e. g.* the Symposium and Republic) an extreme disregard of the historical accuracy which is sometimes demanded of him. (2) The exact place of the Protagoras among the Dialogues, and the date of composition, have also been much disputed. But there are no criteria which afford any real grounds for determining the date of composition; and the affinities of the Dialogues, when they are not indicated by Plato himself, must always to some extent remain uncertain. (3) There is another class of difficulties, which may be ascribed to preconceived notions of commentators, who imagine that Protagoras the Sophist ought always to be in the wrong, and his adversary Socrates in the right; or that in this or that passage — *e. g.* in the explanation of good as pleasure — Plato is inconsistent with himself: or that the Dialogue fails in unity, and has not a proper "beginning, middle, and ending." They seem to forget that Plato is a dramatic writer who throws his thoughts into both sides of the argument, and certainly does not aim at any unity which is inconsistent with freedom, and with a nat-

ural or even wild manner of treating his subject; also that his mode of revealing the truth is by lights and shadows, and far off and opposing points of view, and not by dogmatic statements, or definite results.

The real difficulties arise out of the extreme subtlety of the work, which, as Socrates says of the poem of Simonides, is a most perfect piece of art. There are dramatic contrasts and interests, threads of philosophy broken and resumed, satirical reflections on mankind, veils thrown over truths which are lightly suggested, and all woven together in a single design, and moving towards one end.

In the introductory scene Plato raises the expectation that a "great personage" is about to appear on the stage (perhaps with a further view of showing that he is destined to be overthrown by a greater still, who makes no pretensions). Before introducing Hippocrates to him, Socrates thinks proper to warn the youth of the dangers of "influence," of the invidious nature of which Protagoras is also sensible. Hippocrates readily adopts the suggestion of Socrates that he shall learn the accomplishments which befit an Athenian gentleman of Protagoras, and let alone his "sophistry." There is nothing however in the introduction which leads to the inference that Plato intended to blacken the character of the Sophists; he only makes a little merry at their expense.

The "great personage" is somewhat ostentatious, but frank and honest. He is introduced on a stage which is worthy of him — at the house of the rich Callias, in which are congregated the noblest and wisest of the Athenians. He considers openness to be the best policy, and particularly mentions his own liberal mode of dealing with his pupils, as if in answer to the favorite accusation of the Sophists that they received pay. He is remarkable for the good temper which he exhibits throughout the discussion under the trying and often sophistical cross-examination of Socrates. Although once or twice ruffled, and reluctant to continue the discussion, he parts company on perfectly good terms, and appears to be, as he says of himself, the "least jealous of mankind."

Nor is there anything in the sentiments of Protagoras which impairs this pleasing impression of the grave and weighty old man. His real defect is that he is inferior to Socrates in dialectics. The opposition between him and Socrates is not the opposition of good and bad, true and false, but of the old art of rhetoric and the new science of interrogation and argument; also of the irony of Socrates and the self-assertion of the Sophists. There is quite as much truth on the side of Protagoras as of Socrates; but the truth of Protagoras is based on common sense and common maxims of morality, while that of Socrates is paradoxical or transcendental, and though full of meaning and insight, hardly intelligible to the rest of mankind.

For example: (1) one of the noblest statements to be found in

antiquity about the preventive nature of punishment is put into the mouth of Protagoras; (2) he is clearly right also in maintaining that virtue can be taught (which Socrates himself, at the end of the Dialogue, is disposed to concede); and also (3) in his explanation of the phenomenon that good fathers have bad sons; (4) he is right also in observing that the virtues are not like the arts, gifts, or attainments of special individuals, but the common property of all. this, which in all ages has been the strength and weakness of ethics and politics, is deeply seated in human nature; (5) there is a sort of half truth in the notion that all civilized men are teachers of virtue; and (6) the religious allegory should be noticed, in which the arts are said to be given by Prometheus (who stole them), whereas justice and reverence and the political virtues could only be imparted by Zeus. It is observable also (7) in the latter part of the Dialogue, when Socrates is arguing that "pleasure is the only good," Protagoras deems it more in accordance with his character to maintain that "some pleasures only are good."

There is no reason to suppose that in all this Plato is depicting an imaginary Protagoras; at any rate, he is showing us the teaching of the Sophists under the milder aspect under which he once regarded them. Nor is there any reason to doubt that Socrates is equally an historical character, paradoxical, ironical, tiresome, but seeking for the unity of virtue and knowledge as for a precious treasure; willing to rest this even on a calculation of pleasure, and irresistible here, as everywhere in Plato, in his intellectual superiority.

The aim of Socrates, and of the Dialogue, is to show the unity of virtue. In the determination of this question the identity of virtue and knowledge is found to be involved. But if virtue and knowledge are one, then virtue can be taught; the end of the Dialogue returns to the beginning. Had Protagoras been allowed by Plato to make the Aristotelian distinction, and say that virtue is not knowledge, but is accompanied with knowledge; or to point out with Aristotle that the same quality may have more than one opposite; or with Plato himself in the Phaedo to deny that good is a mere exchange of a greater pleasure for a less — the unity of virtue and the identity of virtue and knowledge would have required to be proved by other arguments.

The victory of Socrates over Protagoras is in every way complete when their minds are fairly brought together. Protagoras falls before him after two or three blows. Socrates partially gains his object in the first part, and completely in the second. Nor does he appear at any disadvantage when subjected to "the question" by Protagoras. He succeeds in making his two "friends," Prodicus and Hippias, ludicrous by the way; he also makes a long speech in defense of the poem of Simonides, after the manner of the Sophists, showing, as Alcibiades says, that he is only pretending to have a bad memory.

Not having the whole of this poem before us, it is impossible for us to answer certainly the question of Protagoras, how the two passages of Simonides are to be reconciled. We can only follow the indications given by Plato himself. But it seems likely that the reconcilement offered by Socrates is only a caricature of the methods of interpretation which were practiced by the Sophists — for the following reasons: (1) The transparent irony of the previous interpretations given by Socrates. (2) The ludicrous opening of the speech in which the Lacedaemonians are described as the true philosophers, and Laconic brevity as the true form of philosophy, evidently with an allusion to Protagoras' long speeches. (3) The manifest futility and absurdity of the explanation of ἐμῶν ἐπαίνημι ἀλαθέως, which is hardly consistent with the rational interpretation of the rest of the poem. The opposition of εἶναι and γενέσθαι seems also intended to express the rival doctrines of Socrates and Protagoras, and is a sort of facetious commentary on their differences. (4) The general treatment in Plato both of the Poets and the Sophists, who are their interpreters, and whom he delights to identify with them. (5) The depreciating spirit in which Socrates speaks of the introduction of the Poets as a substitute for original conversation, which is intended to contrast with Protagoras' exaltation of the study of them — this again is hardly consistent with the serious defense of Simonides. (6) The marked approval of Hippias, who is supposed at once to catch the familiar sound, just as in the previous conversation Prodicus is represented as ready to accept any distinctions of language however absurd. At the same time Hippias is desirous of substituting a new interpretation of his own; as if the words might really be made to mean anything, and were only to be regarded as affording a field for the ingenuity of the interpreter.

This curious passage is, therefore, to be regarded as Plato's satire on the tedious and hypercritical arts of interpretation which prevailed in his own day, and may be compared with his condemnation of the same arts when applied to mythology in the Phaedrus, and with his other parodies, *e. g.* with the second speech in the Phaedrus and with the Menexenus. Several lesser touches of satire appear in it, *e. g.* the claim of philosophy advanced for the Lacedaemonians, which is a parody of the claims advanced for the Poets by Protagoras; the mistake of the Laconizing set in supposing that the Lacedaemonians are a great nation because they bruise their ears; the far-fetched notion, which is "really too bad," that Simonides uses the Lesbian (?) word, ἐπαίνημι, because he is addressing a Lesbian. The whole may also be considered as a satire on those who spin pompous theories out of nothing.

All the interests and contrasts of character in a great dramatic work like the Protagoras are not easily exhausted. The impressiveness of the scene should not be lost upon us, or the gradual substi-

tution of Socrates in the second part for Protagoras in the first. There is Alcibiades, who is compelled by the necessity of his nature to be a partisan, lending effectual aid to Socrates; there is Critias assuming the tone of impartiality; Callias there as always inclining to the Sophist, but eager for any intellectual repast; Prodicus, who finds an opportunity for displaying his distinctions of language; Hippias, for exhibiting his vanity and superficial knowledge of natural philosophy. Both of these have been previously a good deal damaged by the mock sublime description of them in the introduction. It may be remarked that Protagoras is consistently presented to us throughout as the teacher of moral and political virtue; there is no allusion to the theories of sensation which are attributed to him in the Theaetetus and elsewhere, or to his denial of the existence of the gods; he is the religious rather than the irreligious teacher in this Dialogue. Also it may be observed that Socrates shows him as much respect as is consistent with his own ironical character.

It remains to be considered in what relation the Protagoras stands to the other Dialogues of Plato. That it is one of the earlier or purely Socratic works — perhaps the last, as it is certainly the greatest of them — is indicated by the absence of all allusion to the doctrine of reminiscence; and also probably by the different attitude assumed towards the teaching and persons of the Sophists in some of the later Dialogues. The Charmides, Laches, Lysis, all touch on the question of the relation of knowledge to virtue, and may be regarded, if not as preliminary studies or sketches of the more important work, at any rate as closely connected with it. The Io and Hippias contain discussions of the Poets, which offer a parallel to the ironical criticism of the verses of Simonides, and are conceived in a similar spirit. The affinity of the Protagoras to the Meno is more doubtful. For there, although the same question is discussed, "Whether virtue can be taught," and the relation of Meno to the Sophists is much the same as that of Hippocrates, the answer to the question is supplied out of the doctrine of ideas; the real Socrates is already passing into the Platonic one. At a later stage of the Platonic philosophy we shall find that both the paradox and the solution of it appear to have been retracted. The Phaedo, the Gorgias, and the Philebus offer further corrections of the teachings of the Protagoras; in all of them the doctrine that virtue is pleasure, or that pleasure is the chief or only good, is distinctly renounced.

Thus after many preparations and oppositions, both of the characters of men and aspects of the truth, especially of the popular and philosophical aspect; and after many interruptions and detentions by the way, which, as Theodorus says in the Theaetetus, are quite as agreeable as the argument, we arrive at the great Socratic thesis that virtue is knowledge. This is an aspect of the truth which was

lost almost as soon as it was found; and yet has to be recovered by every one for himself who would pass the limits of proverbial and popular philosophy. It is not to be regarded only as a passing stage in the history of the human mind, but as an anticipation of the reconcilement of the moral and intellectual elements of human nature.

PROTAGORAS.

PERSONS OF THE DIALOGUE.

SOCRATES, *who is the narrator of the Dialogue to his* COMPANION.
HIPPOCRATES.
ALCIBIADES.
PROTAGORAS, HIPPIAS, PRODICUS, *Sophists.*
CALLIAS, *a wealthy Athenian.*
CRITIAS.

SCENE:—The House of Callias.

Com. WHERE do you come from, Socrates? And yet I need hardly ask the question, as I know that you have been in chase of the fair Alcibiades. I saw him the day before yesterday; and he had got a beard like a man,—and he is a man, as I may tell you in your ear. But I thought that he was still very charming. Steph. 309

Soc. What of his beard? Are you not of Homer's opinion, who says that [1]—

"Youth is most charming when the beard first appears?"

And that is now the charm of Alcibiades.

Com. Well, and how do matters proceed? Have you been visiting him, and was he gracious to you?

Soc. Yes, I thought that he was very gracious; and especially to-day, for I have just come from him, and he has been helping me in an argument. But shall I tell you a strange thing? Although he was present, I never attended to him, and several times he quite passed out of my mind.

Com. What is the meaning of this? Has anything happened between you and him? For surely you cannot have discovered a fairer love than he is; certainly not in this city of Athens.

[1] Il. xxiv. 348.

Soc. Yes, much fairer.

Com. What do you mean — a citizen or a foreigner?

Soc. A foreigner.

Com. Of what country.

Soc. Of Abdera.

Com. And is this stranger really in your opinion fairer than the son of Cleinias?

Soc. And is not the wiser always the fairer, sweet friend?

Com. But have you really met, Socrates, with some wise one?

Soc. Yes; I would say rather, with the wisest of all living men, if you are willing to accord that title to Protagoras.

Com. What! Do you mean to say that Protagoras is in Athens?

Soc. Yes; he has been here two days.

Com. And do you just come from an interview with him?

310 *Soc.* Yes; and I have heard and said many things.

Com. Then, if you have no engagement, suppose that you sit down and tell me what passed, and my attendant shall give up his place to you.

Soc. To be sure; and I shall be grateful to you for listening.

Com. Thank you, too, for telling us.

Soc. That is thank you twice over. Listen then: —

Last night, or rather very early this morning, Hippocrates, the son of Apollodorus and the brother of Phason, gave a tremendous thump with his staff at my door; some one opened to him, and he came rushing in and bawled out: Socrates, are you awake or asleep?

I knew his voice, and said: Hippocrates, is that you? and do you bring any news?

Good news, he said; nothing but good.

Very good, I said; but what news? and why have you come here at this unearthly hour?

He drew nearer to me and said: Protagoras is come.

Yes, I said; he came two days ago: have you only just heard of his arrival?

Yes, indeed, he said; I heard yesterday evening.

At the same time he felt for the truckle-bed, and sat down at my feet, and then he said: I heard yesterday quite late in the evening, on my return from Oenoe whither I had gone in

pursuit of my runaway slave Satyrus — as I was going to have told you if some other matter had not come in the way; on my return, when we had done supper and were about to retire to rest, my brother said to me: Protagoras is come. And I was going to you at once, if I had not considered that the night was far spent. But when sleep relaxed her hold on me after my toil, I got up and came hither direct.

I, who knew the very courageous madness of the man, said: What is the matter? has Protagoras robbed you of anything?

He replied, laughing: Yes, indeed he has, Socrates, of the wisdom which he keeps to himself.

But, surely, I said, if you give him money, and make friends with him, he will make you as wise as he is himself.

Would to heaven, he replied, that he would! He might take all that I have, and all that my friends have, if he would. And that is why I have come to you now, in order that you may speak to him on my behalf; for I am young, and also I have never seen nor heard him (when he visited Athens before I was but a child); and all men praise him, Socrates, as being the most accomplished of speakers. There is 311
no reason why we should not go to him at once, and then we shall find him at home. He lodges, as I hear, with Callias, the son of Hipponicus. Let us start.

I replied: Not yet, my good friend; the hour is too early. But let us rise and take a turn in the court and wait there until daybreak, and when the day breaks, then we will go; for Protagoras is generally at home, and we shall be sure to find him; never fear.

Upon this we got up and walked about in the court, and I thought that I would make trial of the strength of his resolution. So I examined him and put questions to him. Tell me, Hippocrates, I said, as you are going to Protagoras, and will be paying your money to him, what is he to whom you are going? and what will he make of you? If you were going to Hippocrates, the Coan, the Asclepiad, and were about to give him your money, and some one said to you: As being what, do you give money to your namesake Hippocrates, O Hippocrates? what would you answer?

I should say, he replied, that I give money to him as a physician.

And what will he make of you?

A physician, he said.

And if you went to Polycleitus the Argive, or Pheidias the Athenian, and intended to give them money, and some one were to ask you: As being what, do you give this money to Polycleitus and Pheidias? what would you answer?

I should answer, as being statuaries.

And what will they make of you?

A statuary, of course.

Well now, I said, you and I are going to Protagoras, and we are ready to pay him money for you. If our own means are sufficient, and we can gain him with these, we shall be too glad; but if not, then we are to spend your friends' money as well. Now suppose, that while we are in this intense state of excitement, some one were to say to us: Tell me, Socrates, and you Hippocrates, as being what, are you going to pay money to Protagoras? how should we answer him? I know that Pheidias is a sculptor, and Homer is a poet; but what appellation is given to Protagoras? how is he designated?

They call him a Sophist, Socrates, he replied.

Then we are going to pay our money to him in the character of a Sophist?

Certainly.

But suppose a person were to ask this further question:
312 And how about yourself? what will Protagoras make you, if you go to see him?

He answered, with a blush upon his face (for the day was just beginning to dawn, so that I could see him): Unless this differs in some way from the former instances, I suppose that he will make a Sophist of me.

And are you not in sober earnest ashamed, I said, at having to appear before the Hellenes in the character of a Sophist?

Indeed, Socrates, if I am to confess the truth, I am.

But why do you assume, Hippocrates, that the instruction of Protagoras is of this nature? and why may you not learn of him in the same way that you learned the arts of the grammarian, or musician, or trainer, not with the view of making any of them a profession, but only as a part of education, and because a private gentleman and freeman ought to know them?

Just so, he said; and that, in my opinion, is a far truer account of the teaching of Protagoras.

I said: I wonder whether you know what you are doing?

And what am I doing?

You are going to commit your soul to the care of a man

whom you call a Sophist. And yet I hardly think that you know what a Sophist is; and if not, then you do not even know whether you are committing your soul to good or evil.

I certainly think that I do know, he replied.

Then tell me, what do you imagine that he is?

I take him to be one who is wise and knowing, he replied, as his name implies.

And might you not, I said, affirm this of the painter and the carpenter also; are not they, too, wise and knowing? But suppose a person were to ask us: In what are the painters wise? We should answer: In what relates to the making of likenesses, and similarly of other things. And if he were further to ask: What is the wisdom of the Sophist, and what is the manufacture over which he presides? how should we answer him?

How should we answer him, Socrates? What other answer could there be but that he presides over the art which makes men eloquent?

Yes, I replied, that is very likely a true, but not a sufficient answer; for a further question is involved: About what does the Sophist make a man eloquent? The player on the lyre may be supposed to make a man eloquent about that which he makes him understand, that is about playing the lyre. Is not that true?

Yes.

Then about what does the Sophist make him eloquent? must not he make him eloquent in that which he understands?

Yes, that may be assumed.

And what is that which the Sophist knows and makes his disciple know?

Indeed, he said, that I cannot tell.

Then I proceeded to say: Well, but are you aware of the danger which you are incurring? If you were going to 313
commit the body to some one, and there was a risk of your getting good or harm from him, would you not carefully consider and ask the opinion of your friends and kindred, and deliberate many days as to whether you should give him the care of your body? But when the soul is in question, which you hold to be of far more value than the body, and upon the well or ill-being of which depends your all, — about this you never consulted either with your father or with your brother or with any one of us who are your companions. But no sooner does this foreigner

appear, than you instantly commit your soul to his keeping. In the evening, as you say, you hear of him, and in the morning you go to him, never deliberating, or taking the opinion of any one as to whether you ought to intrust yourself to him or not; you have quite made up your mind that you will be a pupil of Protagoras, and are prepared to expend all the property of yourself and of your friends in carrying out at any price this determination, although, as you admit, you do not know him, and have never spoken with him: and you call him a Sophist, but are manifestly ignorant of what a Sophist is; and yet you are going to commit yourself to his keeping.

When he heard me say this he replied: That I suppose, Socrates, is the conclusion which I must draw from your words.

I proceeded: Is not a Sophist, Hippocrates, one who deals wholesale or retail in the food of the soul? To me that appears to be the sort of man.

And what, Socrates, is the food of the soul?

Surely, I said, knowledge is the food of the soul; and we must take care, my friend, that the Sophist does not deceive us when he praises what he sells, like the dealers wholesale or retail who sell the food of the body; for they praise indiscriminately all their goods, without knowing what are really beneficial or hurtful: neither do their customers know, with the exception of any trainer or physician who may happen to buy of them. In like manner those who carry about the wares of knowledge, and make the round of the cities, and sell or retail them to any customer who is in want of them, praise them all alike; and I should not wonder, O my friend, if many of them were really ignorant of their effect upon the soul; and their customers equally ignorant, unless he who buys of them happens to be a physician of the soul. If therefore you have understanding of what is good and evil, you may safely buy knowledge of Protagoras or of any one; but if not, then, O my
314 friend, pause, and do not hazard your dearest interests at a game of chance. For there is far greater peril in buying knowledge than in buying meat and drink: the one you purchase of the wholesale or retail dealer, and carry them away in other vessels, and before you receive them into the body as food, you may deposit them at home and call in any experienced friend who knows what is good to be eaten or drunken, and what not, and how much and when; and hence the danger of purchasing them is not so great. But when you buy the wares

of knowledge you cannot carry them away in another vessel; they have been sold to you, and you must take them into the soul and go your way, either greatly harmed or greatly benefited by the lesson: and therefore we should think about this and take counsel with our elders; for we are still young — too young to determine such a matter. And now let us go, as we were intending, and hear Protagoras; and when we have heard what he has to say, we may take counsel of others; for not only is Protagoras at the house of Callias, but there is Hippias of Elis; and, if I am not mistaken, Prodicus of Ceos, and several other wise men.

To this we agreed, and proceeded on our way until we reached the vestibule of the house; and there we stopped in order to finish a dispute which had arisen as we were going along; and we stood talking in the vestibule until we had finished and come to an understanding. And I think that the door-keeper, who was a eunuch, and who was probably annoyed at the great inroad of the Sophists, must have heard us talking. At any rate, when we knocked at the door, and he opened and saw us, he grumbled: They are Sophists — he is not at home; and instantly gave the door a hearty bang with both his hands. Again we knocked, and he answered without opening: Did you not hear me say that he is not at home, fellows? But, my friend, I said, we are not Sophists, and we are not come to see Callias; fear not, for we want to see Protagoras; and I must request you to announce us. At last, after a good deal of difficulty, the man was persuaded to open the door.

When we entered, we found Protagoras taking a walk in the portico; and next to him, on one side, were walking Callias the son of Hipponicus, and Paralus the son of Pericles, who, by the mother's side, is his half-brother, and Charmides the son of Glaucon. On the other side of him were Xanthippus 315
the other son of Pericles, Philippides the son of Philomelus; also Antimoerus of Mende, who of all the disciples of Protagoras is the most famous, and intends to make sophistry his profession. A train of listeners followed him, of whom the greater part appeared to be foreigners, who accompanied Protagoras out of the various cities through which he journeyed. Now he, like Orpheus, attracted them by his voice, and they followed the attraction. I should mention also that there were some Athenians in the company. Nothing delighted me more than the precision of their movements: they never got into his way at all;

but when he and those who were with him turned back, then the band of listeners divided into two parts on either side; he was always in front, and they wheeled round and took their places behind him in perfect order.

After him, as Homer says,[1] "I lifted up my eyes and saw" Hippias the Elean sitting in the opposite portico on a chair of state, and around him were seated on benches Eryximachus the son of Acumenus, and Phaedrus the Myrrhinusian, and Andron the son of Androtion, and there were strangers whom he had brought with him from his native city of Elis, and some others: they appeared to be asking Hippias certain physical and astronomical questions, and he, *ex cathedrâ*, was determining their several questions to them and discoursing of them.

Also, "my eyes beheld Tantalus;"[2] for Prodicus the Cean was at Athens: he had been put into a room which, in the days of Hipponicus, was a store-house; but as the house was full, Callias had cleared this out and made the room into a guest-chamber. Now Prodicus was still in bed, wrapped up in sheepskins and bedclothes, of which there seemed to be a great heap; and there were sitting by him on the couches near, Pausanias of the deme of Cerameis, and with Pausanias was a youth quite young, who is certainly remarkable for his good looks, and, if I am not mistaken, is also of a fair and gentle nature. I think that I heard him called Agathon, and my suspicion is that he is the beloved of Pausanias. There was this youth and also there were the two Adeimantuses, one the son of Cepis, and the other of Leucolophides, and some others. I was very anxious to hear what Prodicus was saying, for he seemed to me to be an extraordinarily wise and divine man; but I was not
316 able to get into the inner circle, and his fine deep voice made an echo in the room which rendered his words inaudible.

No sooner had we entered than there followed us Alcibiades the beautiful, as you say, and I believe you; and also Critias the son of Callaeschrus.

On entering we stopped a little, in order to look about us, and then walked up to Protagoras, and I said: Protagoras, my friend Hippocrates and I have come to see you.

Do you wish, he said, to speak with me alone, or in the presence of others?

That is as you please, I said: you shall determine when you have heard the object of our visit.

[1] Od. xi. 601 foll. [2] Od. xi. 582.

And what is that? he said.

I must explain, I said, that my friend Hippocrates is a native Athenian; he is the son of Apollodorus, and of a great and prosperous house, and he is himself in natural ability quite a match for those of his own age. I believe that he aspires to political eminence; and this he thinks that conversation with you is most likely to procure for him: now it is for you to decide whether you would wish to speak to him of these matters alone or in company.

Thank you, Socrates, for your consideration of me. For certainly a stranger finding his way into great cities, and persuading the flower of the youth in them to leave the company of their other kinsmen or acquaintance, and live with him, under the idea that they will be improved by his conversation, ought to be very cautious; great jealousies are occasioned by his proceedings, and he is the subject of many enmities and conspiracies. I maintain the art of the Sophist to be of ancient date; but that in ancient times the professors of the art, fearing this odium, veiled and disguised themselves under various names: some under that of poets, as Homer, Hesiod, and Simonides; some as hierophants and prophets, as Orpheus and Musaeus; and some, as I observe, even under the name of gymnastic-masters, like Iccus of Tarentum, or the more recently celebrated Herodicus, now of Selymbria and formerly of Megara, who is a first-rate Sophist. Your own Agathocles pretended to be a musician, but was really an eminent Sophist; also Pythocleides the Cean; and there were many others; and all of them, as I was saying, adopted these arts as veils or disguises because they were afraid of the envy of the multitude. But that is not my way, for I do not believe that they effected 317
their purpose, which was to deceive the government, who were not blinded by them; and as to the people, they have no understanding, and only repeat what their rulers are pleased to tell them. Now to run away, and to be caught in running away, is the very height of folly, and also greatly increases the exasperation of mankind; for they regard him who runs away as a rogue, in addition to any other objections which they have to him; and therefore I take an entirely opposite course, and acknowledge myself to be a Sophist and instructor of mankind; such an open acknowledgment appears to me to be a better sort of caution than concealment. Nor do I neglect other precautions, and therefore I hope, as I may say, by the favor of

Heaven that no harm will come of the acknowledgment that I am a Sophist. And I have been now many years in the profession — for all my years when added up are many — and there is no one here present of whom I might not be the father. Wherefore I should much prefer conversing with you, if you do not object, in the presence of the company.

As I suspected that he would like to have a little display and glory in the presence of Prodicus and Hippias, and would gladly show us to them in the light of his admirers, I said: But why should we not summon Prodicus and Hippias and their friends to hear us?

Very good, he said.

Suppose, said Callias, that we hold a council in which you may sit and discuss. This was determined, and great delight was felt at the prospect of hearing wise men talk; we ourselves all took the chairs and benches, and arranged them by Hippias, where the other benches had been already placed. Meanwhile Callias and Alcibiades got up Prodicus and brought in him and his companions.

When we were all seated, Protagoras said: Now that the company are assembled, Socrates, tell me about the young man
318 of whom you were just now speaking.

I replied: I will begin again at the same point, Protagoras, and tell you once more the purport of my visit: this is my friend Hippocrates, who is desirous of making your acquaintance; he wants to know what will happen to him if he associates with you. That is all I have to say.

Protagoras answered: Young man, if you associate with me, on the very first day you will return home a better man than you came, and better on the second day than on the first, and better every day than you were on the day before.

When I heard this, I said: Protagoras, I do not at all wonder at hearing you say this; even at your age, and with all your wisdom, if any one were to teach you what you did not know before, you would become better no doubt: but please to answer in a different way; I will explain how by an example. Let me suppose that Hippocrates, instead of desiring your acquaintance, wished to become acquainted with the young man Zeuxippus of Heraclea, who has newly come to Athens, and he were to go to him as he has gone to you, and were to hear him say, as he has heard you say, that every day he would grow and become better if he associated with him: and then

suppose that he were to ask him, "In what would he be better, and in what would he grow?" Zeuxippus would answer, "In painting." And suppose that he went to Orthagoras the Theban, and heard him say the same, and asked him, "In what would he become better day by day?" he would reply, "In flute-playing." Now I want you to make the same sort of answer to this young man and to me, who am asking questions on his account. When you say that on the first day on which he associates with you he will return home a better man, and on every day will grow in like manner — in what, Protagoras, will he be better? and about what?

When Protagoras heard me say this, he replied: You ask questions fairly, and I like to answer a question which is fairly put. If Hippocrates comes to me he will not experience the sort of drudgery with which other Sophists are in the habit of insulting their pupils; who, when they have just escaped from the arts, are taken and driven back into them by these teachers, and made to learn calculation, and astronomy, and geometry, and music (he gave a look at Hippias as he said this); but if he comes to me, he will learn that which he comes to learn. And this is prudence in affairs private as well as public; he will learn to order his own house in the best manner, and he will be best able to speak and act in the affairs of the state.

Do I understand you, I said; and is your meaning that 319
you teach the art of politics, and that you promise to make men good citizens?

That, Socrates, is exactly the profession which I make.

Then, I said, you do indeed possess a noble art, if there is no mistake about this; for I will freely confess to you, Protagoras, that I have a doubt whether this art is capable of being taught, and yet I know not how to disbelieve your assertion. And I ought to tell you why I am of opinion that this art cannot be taught or communicated by man to man. I say that the Athenians are an understanding people, as indeed they are esteemed by the other Hellenes. Now I observe that when we are met together in the assembly, and the matter in hand relates to building, the builders are summoned as advisers; when the question is one of ship-building, then the ship-builders; and the like of other arts which they think capable of being taught and learned. And if some person offers to give them advice who is not supposed by them to have any skill in the art, even though he be good-looking, and rich, and noble, they don't

listen to him, but laugh at him, and hoot him, until either he is clamored down and retires of himself; or if he persist, he is dragged away or put out by the constables at the command of the prytanes. This is their way of behaving about the arts which have professors. When, however, the question is an affair of state, then everybody is free to have a say — carpenter, tinker, cobbler, sailor, passenger; rich and poor, high and low — any one who likes gets up, and no one reproaches him, as in the former case, with not having learned, and having no teacher, and yet giving advice; evidently because they are under the impression that this sort of knowledge cannot be taught. And not only is this true of the state, but of individuals; the best and wisest of our citizens are unable to impart their political wisdom to others: as, for example, Pericles, the
320 father of these young men, who gave them excellent instruction in all that could be learned from masters, in his own department of politics taught them nothing; nor did he give them teachers, but they were allowed to wander at their own free-will, in a sort of hope that they would light upon virtue of their own accord. Or take another example: There was Cleinias the younger brother of our friend Alcibiades, of whom this very same Pericles was the guardian; and he being in fact under the apprehension that Cleinias would be corrupted by Alcibiades, took him away, and placed him in the house of Ariphron to be educated; but before six months had elapsed, Ariphron sent him back, not knowing what to do with him. And I could mention numberless other instances of persons who were good themselves, and never yet made any one else good, whether friend or stranger. Now I, Protagoras, when I reflect on all this, am inclined to think that virtue cannot be taught. But then again, when I listen to your words, I am disposed to waver; and I believe that there must be something in what you say, because I know that you have great experience, and learning, and invention. And I wish that you would, if possible, show me a little more clearly that virtue can be taught. Will you be so good?

That I will, Socrates, and gladly. But what would you like? Shall I, as an elder, speak to you as younger men in an apologue or myth, or shall I argue the question?

To this several of the company answered that he should choose for himself.

Well, then, he said, I think that the myth will be more interesting.

Once upon a time there were gods only, and no mortal creatures. But when the time came that these also should be created, the gods fashioned them out of earth and fire and various mixtures of both elements in the inward parts of the earth; and when they were about to bring them into the light of day, they ordered Prometheus and Epimetheus to equip them, and to distribute to them severally their proper qualities. Epimetheus said to Prometheus: "Let me distribute, and do you inspect." This was agreed, and Epimetheus made the distribution. There were some to whom he gave strength without swiftness, or again swiftness without strength; some he armed, and others he left unarmed; and devised for the latter some other means of preservation, making some large, and having their size as a protection, and others small, whose nature was to fly in the air or burrow in the ground; this was to be their way of escape. Thus did he compensate them with the view of preventing any race from becoming extinct. 321 And when he had provided against their destruction by one another, he contrived also a means of protecting them against the seasons of heaven; clothing them with close hair and thick skins sufficient to defend them against the winter cold and summer heat, and for a natural bed of their own when they wanted to rest; also he furnished them with hoofs and hair and hard and callous skins under their feet. Then he gave them varieties of food, — to some herbs of the soil, to others fruits of trees, and to others roots, and to some again he gave other animals as food. And some he made to have few young ones, while those who were their prey were very prolific; and in this way the race was preserved. Thus did Epimetheus, who, not being very wise, forgot that he had distributed among the brute animals all the qualities that he had to give, — and when he came to man, who was still unprovided, he was terribly perplexed. Now while he was in this perplexity, Prometheus came to inspect the distribution, and he found that the other animals were suitably furnished, but that man alone was naked and shoeless, and had neither bed nor arms of defense. The appointed hour was approaching in which man was to go forth into the light of day; and Prometheus, not knowing how he could devise his salvation, stole the mechanical arts of Hephaestus and Athene, and fire with them (they could neither have been acquired nor used without fire), and gave them to man. Thus man had the wisdom necessary to the support of life, but political wisdom he

had not; for that was in the keeping of Zeus, and the power of Prometheus did not extend to entering into the castle of heaven, in which Zeus dwelt, who moreover had terrible sentinels; but he did enter by stealth into the common workshop of Athene and Hephaestus, in which they used to pursue their favorite arts, and took away Hephaestus' art of working by fire, and also the art of Athene, and gave them to man. And in this way man was supplied with the means of life. But Prometheus is said to have been afterwards prosecuted for theft, owing to the blunder of Epimetheus.

322 Now man, having a share of the divine attributes, was at first the only one of the animals who had any gods, because he alone was of their kindred; and he would raise altars and images of them. He was not long in inventing language and names; and he also constructed houses and clothes and shoes and beds, and drew sustenance from the earth. Thus provided, mankind at first lived dispersed, and there were no cities. But the consequence was that they were destroyed by the wild beasts, for they were utterly weak in comparison of them, and their art was only sufficient to provide them with the means of life, and would not enable them to carry on war against the animals: food they had, but not as yet any art of government, of which the art of war is a part. After a while the desire of self-preservation gathered them into cities; but when they were gathered together, having no art of government, they evil intreated one another, and were again in process of dispersion and destruction. Zeus feared that the race would be exterminated, and so he sent Hermes to them, bearing reverence and justice to be the ordering principles of cities and the bonds of friendship and conciliation. Hermes asked Zeus how he should impart justice and reverence among men: should he distribute them as the arts are distributed; that is to say to a favored few only, — for one skilled individual has enough of medicine, or of any other art, for many unskilled ones? Shall this be the manner in which I distribute justice and reverence among men, or shall I give them to all? To all, said Zeus; I should like them all to have a share; for cities cannot exist, if a few only share in the virtues, as in the arts. And further, make a law by my order, that he who has no part in reverence and justice shall be put to death as a plague of the state.

And this is the reason, Socrates, why the Athenians and

mankind in general, when the question relates to carpentering or any other mechanical art, allow but a few to share in their deliberations; and when any one else interferes, then, as you say, they object, if he be not of the favored few, and that, as I say, is very natural. But when they come to deliberate about political virtue, which proceeds only by way of justice and wisdom, they are patient enough of any man who speaks of them, as is also natural, because they think that every man ought to share in this sort of virtue, and that states could not exist if this were otherwise. I have explained to you, Socrates, the reason of this phenomenon. 323

And that you may not suppose yourself to be deceived in thinking that all men regard every man as having a share of justice and every other political virtue, let me give you a further proof, which is this. In other cases, as you are aware, if a man says that he is a good flute-player, or skillful in any other art in which he has no skill, people either laugh at him or are angry with him, and his relations think that he is mad and go and admonish him; but when honesty is in question, or some other political virtue, even if they know that he is dishonest, yet, if the man comes publicly forward and tells the truth about his dishonesty, in this case they deem that to be madness which in the other case was held by them to be good sense. They say that men ought to profess honesty whether they are honest or not, and that a man is mad who does not make such a profession. Their notion is, that a man must have some degree of honesty; and that if he has none at all he ought not to be in the world.

I have been showing that they are right in admitting every man as a counselor about this sort of virtue, as they are of opinion that every man is a partaker of it. And I will now endeavor further to show that they regard this virtue, not as given by nature, or growing spontaneously, but as capable of being learned and acquired by study. For injustice is punished, whereas no one would instruct, or rebuke, or be angry at those whose calamities they suppose to come to them either by nature or chance; they do not try to alter them, they do but pity them. Who would be so foolish as to chastise or instruct the ugly, or the diminutive, or the feeble? And for this reason; they know, I imagine, that this sort of good and evil comes to them by nature and chance; whereas if a man is wanting in those good qualities which come to men from study

and exercise and teaching, and has only the contrary evil qualities, men are angry with him, and punish him and reprove him. And one of those evil qualities is impiety and injustice, and
324 they may be described generally as the opposite of political virtue. When this is the case, any man will be angry with another, and reprimand him, — clearly under the impression that by study and learning the virtue in which he is deficient may be acquired. For if you will think, Socrates, of the effect which punishment has on evil-doers, you will see at once that in the opinion of mankind virtue may be acquired; for no one punishes the evil-doer under the notion, or for the reason, that he has done wrong, — only the unreasonable fury of a beast acts in that way. But he who desires to inflict rational punishment does not retaliate for a past wrong, for that which is done cannot be undone, but he has regard to the future, and is desirous that the man who is punished, and he who sees him punished, may be deterred from doing wrong again. And he implies that virtue is capable of being taught; as he undoubtedly punishes for the sake of prevention. This is the notion of all who retaliate upon others either privately or publicly. And the Athenians, too, like other men, retaliate on those whom they regard as evil-doers; and this argues them to be of the number of those who think that virtue may be acquired and taught. Thus far, Socrates, I have shown you clearly enough, if I am not mistaken, that your countrymen are right in admitting the tinker and the cobbler to advise about politics, and also that they deem virtue to be capable of being taught and acquired.

There yet remains one difficulty which has been raised by you about the sons of good men. What is the reason why good men teach their sons the knowledge which is gained from teachers, and make them wise in that, but do nothing towards improving them in the virtues which distinguish themselves? And here, Socrates, I will leave the apologue and take up the argument. Please to consider: Is there or is there not some one quality in which all the citizens must be partakers, if there is to be a city at all? In the answer to this question is contained the only solution of your difficulty; there is no other. For if there be any such quality, and this quality or unity is
325 not the art of the carpenter, or the smith, or the potter, but justice and temperance and holiness, and, in a word, manly virtue — if this is the quality of which all men must be

partakers, and which is the very condition of their learning or doing anything else, and if he who is wanting in this, whether he be a child only or a grown-up man or woman, must be taught and punished, until by punishment he becomes better, and he who rebels against instruction and punishment is either exiled or condemned to death under the idea that he is incurable — if, I say, this be true, and nevertheless good men have their sons taught other things and not this, do consider how extraordinary would be their conduct. For we have shown that they think virtue capable of being taught and inculcated both in private and public; and yet, notwithstanding this, they teach their sons lesser matters, ignorance of which does not involve the punishment of death: but those things, the ignorance of which may cause death and exile to those who have no knowledge or training — aye, and confiscation as well as death, and, in a word, may be the ruin of families — those things, I say, they are supposed not to teach them, — not to take the utmost care that they should learn. That is not likely, Socrates.

Education and admonition commence in the first years of childhood, and last to the very end of life. Mother and nurse and father and tutor are quarreling about the improvement of the child as soon as ever he is able to understand them: he cannot say or do anything without their setting forth to him that this is just and that is unjust; this is honorable, that is dishonorable; this is holy, that is unholy; do this and abstain from that. And if he obeys, well and good; if not, he is straightened by threats and blows, like a piece of warped wood. At a later stage they send him to teachers, and enjoin them to see to his manners even more than to his reading and music; and the teachers do as they are desired. And when the boy has learned his letters and is beginning to understand what is written, as before he understood only what was spoken, they put into his hands the works of great poets, which he reads at school; in these are contained many admonitions, and 326
many tales, and praises, and encomia of ancient famous men, which he is required to learn by heart, in order that he may imitate or emulate them and desire to become like them. Then, again, the teachers of the lyre take similar care that their young disciple is temperate and gets into no mischief; and when they have taught him the use of the lyre, they introduce him to the poems of other excellent poets, who are the

lyric poets; and these they set to music, and make their harmonies and rhythms quite familiar to the children, in order that they may learn to be more gentle, and harmonious, and rhythmical, and so more fitted for speech and action; for the life of man in every part has need of harmony and rhythm. Then they send them to the master of gymnastic, in order that their bodies may better minister to the virtuous mind, and that the weakness of their bodies may not force them to play the coward in war or on any other occasion. This is what is done by those who have the means, and those who have the means are the rich: their children begin education soonest and leave off latest. When they have done with masters, the state again compels them to learn the laws, and live after the pattern which they furnish, and not after their own fancies; and just as in learning to write, the writing-master first draws lines with a style for the use of the young beginner, and gives him the tablet and makes him follow the lines, so the city draws the laws, which were the invention of good lawgivers who were of old time; these are given to the young man, in order to guide him in his conduct whether as ruler or ruled; and he who transgresses them is to be corrected, or, in other words, called to account, which is a term used not only in your country, but also in many others. Now when there is all this care about virtue private and public, why, Socrates, do you still wonder and doubt whether virtue can be taught? Cease to wonder, for the opposite would be far more surprising.

But why then do the sons of good fathers often turn out ill? Let me explain that, — which is far from being wonderful, if, as I have been saying, the very existence of the state implies that
327 virtue is not any man's private possession. If this be true — and nothing can be truer — then I will ask you to imagine, as an illustration, some other pursuit or branch of knowledge which may be assumed equally to be the condition of the existence of a state. Suppose that there could be no state unless we were all flute-players, as far as each had the capacity, and everybody was freely teaching everybody the art, both in private and public, and reproving the bad player as freely and openly as every man now teaches justice and the laws, not concealing them as he would conceal the other arts, but imparting them — for all of us have a mutual interest in the justice and virtue of one another, and this is the reason why every one is ready to teach justice and the laws; suppose, I say, that

there were the same readiness and liberality among us in teaching one another flute-playing, do you imagine, Socrates, that the sons of good flute-players would be more likely to be good than the sons of bad ones? I think not Would not their sons grow up to be distinguished or undistinguished according to their own natural capacities as flute-players, and the son of a good player would often turn out to be a bad one, and the son of a bad player to be a good one, and all flute-players would be good enough in comparison of those who were ignorant and unacquainted with the art of flute-playing? In like manner I would have you consider that he who appears to you to be the worst of those who have been brought up in laws and humanities, would appear to be a just man and a master of justice if he were to be compared with men who had no education, or courts of justice, or laws, or any restraints upon them which compelled them to practice virtue — with the savages, for example, whom the poet Pherecrates exhibited on the stage at the last year's Lenaean festival. If you were living among men such as the man-haters in his Chorus, you would be only too glad to meet with Eurybates and Phrynondas, and you would sorrowfully desire the rascality of this part of the world. And you, Socrates, are discontented, and why? Because all men are teachers of virtue, each one according to his ability, and you say that there is no teacher. You might as well ask, Who teaches Greek? For of that too there will not be any teachers found. Or you might ask, Who is to teach the sons of our artisans this same art which they have learned of their fathers? He and his fellow-workmen have taught them to the best of their ability, — but who will carry them further in their arts? And you would certainly have a difficulty, Socrates, in finding a teacher of them; but there would be no difficulty in finding a teacher of those who are wholly ignorant. And this is true of virtue or of anything; and if a man is better able than we are to promote virtue ever so little, that is as much as we can expect. A teacher of this sort I believe myself to be, and above all other men to have the knowledge which makes a man noble and good; and I give my pupils their money's-worth, and even more, as they themselves confess. And therefore I have introduced the following mode of payment: When a man has been my pupil, if he likes he pays my price, but there is no compulsion; and if he does not like, he has only to go into a temple and take an oath of the value of the instructions, and he pays no more than he declares to be their value.

328

Such is my apologue, Socrates, and such is the argument by which I endeavor to show that virtue may be taught, and that this is the opinion of the Athenians. And I have also attempted to show that you are not to wonder at good fathers' having bad sons, or at good sons' having bad fathers, as may be seen in the sons of Polycleitus, who are of the same age as our friends Paralus and Xanthippus, and who are very inferior to their father; and this is true of many other artists. But I ought not to say the same as yet of Paralus and Xanthippus themselves, for they are young and there is still hope of them.

Protagoras ended, and in my ear —

> "So charming left his voice, that I the while
> Thought him still speaking; still stood fixed to hear."

At length, when I saw that he had really finished, I gradually recovered consciousness, and looking at Hippocrates, I said to him: O son of Apollodorus, how deeply grateful I am to you for having brought me hither; I would not have missed the speech of Protagoras for a great deal. For I used to imagine that no human care could make men good; but I know better now. Yet I have still one very small difficulty which I am sure that Protagoras will easily explain, as he has already explained so much. For if a man were to go and consult
329 Pericles or any of our great speakers about these matters, he might perhaps hear as fine a discourse; but then if any one has a question to ask of any of them, like books, they can neither answer nor ask; and if any one challenges the least particular of their speech, they go ringing on in a long harangue, like brazen pots, which when they are struck continue to sound unless some one puts his hand upon them; whereas our friend Protagoras can not only make a good speech, as he has already shown, but when he is asked a question he can answer briefly; and when he asks he will wait and hear the answer; and this is a very rare gift. Now I, Protagoras, have a little question that I want to ask of you, and if you will only answer me that, I shall be quite satisfied. You were saying that virtue can be taught; that I will take upon your authority, and there is no one to whom I am more ready to trust. But I marvel at one thing about which I should like to have my mind set at rest. You were speaking of Zeus' sending justice and reverence to men; and several times while you were speaking, justice and temperance and holiness, and all these qualities, were described

by you as if together they made up virtue. Now I want you to tell me truly whether virtue is one whole, of which justice and temperance and holiness are parts; or whether all these are only the names of one and the same thing: that is the doubt which still lingers in my mind.

There is no difficulty, Socrates, in answering that the qualities of which you are speaking are the parts of virtue, which is one.

And are they parts, I said, in the same sense in which mouth, nose, and eyes, and ears, are the parts of a face; or are they like the parts of gold, which differ from the whole and from one another only in being larger or smaller?

I should say that they differed, Socrates, in the first way; as the parts of a face are related to the whole face.

And do men have some one part and some another part of virtue? Or if a man has one part, must he also have all the others?

By no means, he said; for many a man is brave and not just, or just and not wise.

Why then, I said, courage and wisdom are also parts of virtue?

Most undoubtedly, he said; and wisdom is the noblest of the parts. 330

And they are all different from one another? I said.

Yes.

And each of them has a distinct function like the parts of the face; the eye, for example, is not like the ear, and has not the same functions; and the other parts are none of them like one another, either in their functions, or in any other way? Now I want to know whether the parts of virtue do not also differ in themselves and in their functions; as that is clearly what the simile would imply.

Yes, Socrates, you are right in that.

Then, I said, no part of virtue is like knowledge, or like justice, or like courage, or like temperance, or like holiness.

No, he answered.

Well then, I said, suppose that you and I inquire into their natures. And first, you would agree with me that justice is of the nature of a thing, would you not? That is my opinion, would not that be yours also?

Yes, he said; that is mine also.

And suppose that some one were to ask us, saying, O Protagoras, and you Socrates, what about this thing which you just

now called justice, is it just or unjust? And I were to answer, just: and you — would you vote for me or against me?

With you, he said.

Thereupon I should answer to him who asked me, that justice is of the nature of the just. would not you?

Yes, he said.

And suppose that he went on to say: Well now, is there such a thing as holiness? — we should answer, Yes, if I am not mistaken?

Yes, he said.

And that you acknowledge to be a thing — should we admit that?

He assented.

And is this a sort of thing which is of the nature of the holy, or of the nature of the unholy? I should be angry at his putting such a question, and should say, Peace, man; nothing can be holy if holiness is not holy. What do you say to that? Would you not answer in the same way?

Certainly, he said.

And then after this suppose that he came and asked us, What were you saying just now? Perhaps I may not have heard you rightly, but you seemed to me to be saying that the parts of virtue were not the same as one another. I should reply,
331 You certainly heard that said, but you did not, as you think, hear me say that; for Protagoras gave the answer, and I did but ask the question. And suppose that he turned to you and said, Is this true, Protagoras? and do you maintain that one part of virtue is unlike another, and is this your position? how would you answer him?

I could not help acknowledging the truth of what he said, Socrates.

Well then, Protagoras, assuming this, and supposing that he proceeded to say further, Then holiness is not of the nature of justice, nor justice of the nature of holiness, but of the nature of unholiness; and holiness is of the nature of the not just, and therefore of the unjust, and the unjust is unholy; how shall we answer him? I should certainly answer him on my own behalf that justice is holy, and that holiness is just; and I would say in like manner on your behalf also, if you would allow me, that justice is either the same with holiness, or very nearly the same; and I would most assuredly say that justice is like holiness and holiness is like justice; and I wish that you would

tell me whether I may be permitted to give this answer on your behalf, and whether you would agree with me.

He replied, I cannot simply agree, Socrates, to the proposition that justice is holy and that holiness is just, for there appears to me to be a difference between them. But what matter? if you please I please; and let us assume, if you will, that justice is holy, and that holiness is just.

Pardon me, I said; I do not want this "if you wish" or "if you will" sort of argument to be proven, but I want you and me to be proven; and I mean by this that the argument will be best proven if there be no "if."

Well, he said, I admit that justice bears a resemblance to holiness, for there is always some point of view in which everything is like every other thing; white is in a certain way like black, and hard is like soft, and the most extreme opposites have some qualities in common; even the parts of the face which, as we were saying before, are distinct and have different functions, are still in a certain point of view similar, and one of them is like another of them. And you may prove that they are like one another on the same principle that all things are like one another; and yet things which are alike in some particular ought not to be called alike, nor things which are unlike in some particular, however slight, unlike.

And do you think, I said in a tone of surprise, that justice and holiness have but a small degree of likeness?

Certainly not, he said; but I do not agree with what I understand to be your view.

Well, I said, as you appear to have a difficulty about this, let us take another of the examples which you have mentioned instead. Do you admit the existence of folly? 332

I do.

And is not wisdom the very opposite of folly?

That is true, he said.

And when men act rightly and advantageously they seem to you to be temperate or moderate?

Yes, he said.

And moderation makes them moderate?

Certainly.

And they who do not act rightly act foolishly, and in thus acting are not moderate?

I agree to that, he said.

Then to act foolishly is the opposite of acting moderately?

He assented.

And foolish actions are done by folly, and moderate or temperate actions by moderation?

He agreed.

And that is done strongly which is done by strength, and weakly which is done by weakness?

He assented.

And that which is done with swiftness is done swiftly, and that which is done with slowness, slowly?

He acknowledged that.

And if anything is done in the same way, that is done by the same; and if anything is done in an opposite way, by the opposite?

He agreed.

Once more, I said, is there anything beautiful?

Yes.

To which the only opposite is the ugly?

There is no other.

And is there anything good?

There is.

To which the only opposite is the evil?

There is no other.

And there is the acute in sound?

True.

To which the only opposite is the grave?

There is no other, he said, but that.

Then every opposite has one opposite only and no more?

He assented.

Then now, I said, let us recapitulate our admissions. First of all we admitted that everything has one opposite and not more than one?

To that we assented.

And we admitted also that what was done in opposite ways was done by opposites?

Yes.

And that which was done foolishly, as we also admitted, was done in the opposite way to that which was done moderately?

Yes.

And that which was done moderately was done by moderation or temperance, and that which was done foolishly by folly?

He agreed.

And that which is done in opposite ways is done by opposites?

Yes.

And one thing is done by moderation or temperance, and quite another thing by folly?

Yes.

And those are opposite ways?

Certainly.

And therefore done by opposites. Then folly is the opposite of moderation or temperance?

That is evident.

And do you remember that folly has already been acknowledged by us to be the opposite of wisdom?

He assented.

And we said that everything has only one opposite?

Yes.

Then, Protagoras, which of the two assertions shall we renounce? One says that everything has but one opposite; the other that wisdom is distinct from temperance or moderation, and that both of them are parts of virtue; and that they are not only distinct, but unlike, both in themselves and in their functions, like the parts of a face. Which of these two assertions shall we renounce? For both of them together are certainly not in harmony; they do not accord or agree: for how can they be said to agree if everything is assumed to have only one opposite and not more than one, and yet folly, which is one, has clearly the two opposites — wisdom and temperance? Is not that true, Protagoras? I said. What else would you say? 333

He assented, but with great reluctance.

Then temperance and wisdom are the same, as before justice and holiness appeared to us to be nearly the same. And now, Protagoras, I said, do not let us be faint-hearted, but let us complete what remains. Do you think that an unjust man can be temperate in his injustice?

I should be ashamed, Socrates, he said, to acknowledge this, which nevertheless many may be found to assert.

And shall I argue with them or with you? I replied.

I would rather, he said, that you should argue with the many first, if you will.

Whichever you please, if you will only answer me and say whether you are of their opinion or not. My object is to test the validity of the argument; and yet the result may be that I and you who ask and answer may also be put on our trial.

Protagoras at first made a show of refusing, as he said that the argument was not encouraging; at length, however, he consented to answer.

Now then, I said, begin at the beginning and answer me. You think that some men are moderate or temperate, and yet unjust?

Yes, he said; let that be admitted.

And moderation is good sense?

Yes.

And good sense is good counsel in doing injustice?

Granted.

If they succeed, I said, or if they don't succeed?

If they succeed.

And you would admit the existence of goods?

Yes.

And is the good that which is expedient for man?

Yes, indeed, he said; and there are some things which may be inexpedient, and yet I call them good.

I thought that Protagoras was getting ruffled and excited; he seemed to be setting himself in an attitude of war. Seeing this, I minded my business and gently said:

334 When you say, Protagoras, that things inexpedient are good, do you mean inexpedient for man only, or inexpedient altogether? and do you call the latter good?

Certainly not the last, he replied; for I know of many things, meats, drinks, medicines, and ten thousand other things, which are partly expedient for man, and partly inexpedient; and some which are expedient for horses, and not for men; and some for oxen only, and some for dogs; and some for no animals, but only for trees; and some for the roots of trees and not for their branches, as for example, manure, which is a good thing when laid about the roots, but utterly destructive if thrown upon the shoots and young branches; or I may instance olive oil, which is mischievous to all plants, and generally most injurious to the hair of every animal with the exception of man, but beneficial to human hair and to the human body generally; and even in this application (so various and changeable is the nature of the benefit) that which is the greatest good to the outward parts of a man, is a very great evil to his inward parts: and for this reason physicians always forbid their patients the use of oil in their food, except in very small quantities, just sufficient to take away the disagreeable sensation of smell in meats and sauces.

When he had given this answer, the company cheered him. And I said: Protagoras, I have a wretched memory, and when any one makes a long speech to me I never remember what he is talking about. As then, if I had been deaf, and you were going to converse with me, you would have had to raise your voice; so now, having such a bad memory, I will ask you to cut your answers shorter, if you would take me with you.

What do you mean? he said: how am I to shorten my answers? shall I make them too short?

Certainly not, I said.

But short enough? he said.

Yes, I said.

Shall I answer what appears to me to be short enough, or what appears to you to be short enough?

I have heard, I said, that you can speak and teach others to speak about the same things at such length that words never seemed to fail, or with such brevity that no one could use fewer of them. Please therefore, if you talk with me, to adopt the latter or more compendious method. 335

Socrates, he replied, many a battle of words have I fought, and if I had followed the method of disputation which my adversaries desired, as you want me to do, I should have been no better than another, and the name of Protagoras would have been nowhere.

I saw that he was not satisfied with his previous answers, and that he would not play the part of answerer any more if he could help; and I considered that there was no call upon me to continue the conversation; so I said: Protagoras, I don't wish to force the conversation upon you if you had rather not, but when you are willing to argue with me in such a way that I can follow you, then I will argue with you. Now you, as is said of you by others and as you say of yourself, are able to have discussions in shorter forms of speech as well as in longer, for you are a master of wisdom; but I cannot manage these long speeches: I only wish that I could. You, on the other hand, who are capable of either, ought to speak shorter as I beg you, and then we might converse. But I see that you are disinclined, and as I have an engagement which will prevent my staying to hear you at length (for I have to be in another place), I will depart; although I should have liked to have heard you.

Thus I spoke, and was rising from my seat, when Callias

seized me by the hand, and in his left hand caught hold of this old cloak of mine. He said: We cannot let you go, Socrates, for if you leave us there will be an end of our discussions: I must therefore beg you to remain, as there is nothing in the world that I should like better than to hear you and Protagoras discourse. Do not deny the company this pleasure.

Now I had got up, and was in the act of departure. Son of Hipponicus, I replied, I have always admired, and do now heartily applaud and love your philosophical spirit, and I would gladly comply with your request, if I could. But the truth is
336 that I cannot. And what you ask is as great an impossibility to me, as if you bade me run a race with Crison of Himera, when in his prime, or with some one of the long or day course runners. To that I should reply, that I humbly make the same request to my own legs; and they can't comply. And therefore if you want to see Crison and me in the same stadium, you must bid him slacken his speed to mine, for I cannot run quickly, and he can run slowly. And in like manner if you want to hear me and Protagoras discoursing, you must ask him to shorten his answers, and keep to the point, as he did at first; if not, how can there be any discussion? For discussion is one thing, and making an oration is quite another, according to my way of thinking.

But you see, Socrates, said Callias, that Protagoras may fairly claim to speak in his own way, just as you claim to speak in yours.

Here Alcibiades interposed, and said: That, Callias, is not a fair statement of the case. For our friend Socrates admits that he cannot make a speech — in this he yields the palm to Protagoras; but I should be greatly surprised if he yielded to any living man in the power of holding and apprehending an argument. Now if Protagoras will make a similar admission, and confess that he is inferior to Socrates in argumentative skill, that is enough for Socrates; but if he claims a superiority in argument as well, let him ask and answer — not, when a question is asked, having recourse to shifts and evasions, and instead of answering, making a speech at such length that most of his hearers forget the question at issue (not that Socrates is likely to forget — I will be bound for that, although he may pretend in fun that he has a bad memory). And Socrates appears to me to be more in the right than Protagoras; that is my opinion, and every man ought to say what he thinks.

When Alcibiades had done speaking, some one — Critias, I believe — went on to say: O Prodicus and Hippias, Callias appears to me to be a partisan of Protagoras. And this led Alcibiades, who loves opposition, to take the other side. But we should not be partisans either of Socrates or Protagoras; let us rather unite in entreating both of them not to break up the discussion.

Prodicus added: That, Critias, seems to me to be well said, for those who are present at such discussions ought 337
to be impartial hearers of both the speakers; remembering, however, that impartiality is not the same as equality, for both sides should be impartially heard, and yet an equal meed should not be assigned to both of them; but to the wiser a higher meed should be given, and a lower to the less wise. And I as well as Critias would beg you, Protagoras and Socrates, to grant our request, which is, that you will argue with one another and not wrangle; for friends argue with friends out of good-will, but only adversaries and enemies wrangle. And then our meeting will be delightful; for in this way you, who are the speakers, will be most likely to win esteem, and not praise only, among us who are your audience; for esteem is a sincere conviction of the hearers' souls, but praise is often an insincere expression of men uttering words contrary to their conviction. And thus we who are the hearers will be gratified and not pleased; for gratification is of the mind when receiving wisdom and knowledge, but pleasure is of the body when eating or experiencing some other bodily delight. Thus spoke Prodicus, and many of the company applauded his words.

Hippias the sage spoke next. He said: All of you who are here present I reckon to be kinsmen and friends and fellow-citizens, by nature and not by law; for by nature like is akin to like, whereas law is the tyrant of mankind, and often compels us to do many things which are against nature. How great would be the disgrace then, if we, who know the nature of things, and are the wisest of the Hellenes, and as such are met together in this city, which is the metropolis of wisdom, and in the greatest and most glorious house of this city, should have nothing to show worthy of this height of dignity, but should only quarrel with one another like the meanest of mankind. I do pray and advise you, Protagoras, and you, Socrates, to agree upon a compromise. Let us be your peacemakers. And do not you, Socrates, aim at this precise and extreme

338 brevity in discourse, if Protagoras objects, but loosen and let go the reins of speech, that your words may be grander and become you[1] better. Neither do you, Protagoras, go forth on the gale with every sail set out of sight of land into an ocean of words, but let there be a mean observed by both of you. Do as I say. And let me also suggest and suppose further, that you choose an arbiter or overseer or president; he will keep watch over your words and reduce them to their proper length.

This proposal was received by the company with universal approval; and Callias said that he would not let me off, and that I was to choose an arbiter. But I said that to choose an umpire of discourse would be unseemly; for if the person chosen was inferior, then the inferior or worse ought not to preside over the better; or if he was equal, neither would that be well; for he who is our equal will do as we do, and what will be the use of choosing him? And if you say "Let us have a better then," to that I answer that you cannot have any one who is wiser than Protagoras. And if you choose another who is not really better, and whom you only say is better, to put another over him as though he were an inferior person would be an unworthy reflection on him; not that, as far as I am concerned, any reflection is of much consequence to me. Let me tell you then what I will do in order that the conversation and discussion may go on as you desire. If Protagoras is not disposed to answer, let him ask and I will answer; and I will endeavor to show at the same time how, as I maintain, he ought to answer: and when I have answered as many questions as he likes to ask, let him in like manner answer; and if he seems to be not very ready at answering the exact questions, you and I will unite in entreating him, as you entreated me, not to spoil the discussion. And this will require no special arbiter: you shall all of you be arbiters.

This was generally approved, and Protagoras, though very much against his will, was obliged to agree that he would ask questions; and when he had put a sufficient number of them, that he would answer in his turn those which he was asked in short replies. He began to put his questions as follows: —

I am of opinion, Socrates, he said, that skill in poetry is the 339 principal part of education; and this I conceive to be the power of knowing what compositions of the poets are cor-

[1] Reading ὑμῖν.

rect, and what are not, and how they are to be distinguished, and of explaining them when asked. And I propose to transfer the question which you and I have been discussing to the domain of poetry, speaking as before of virtue, but in reference to a passage of a poet. Now Simonides says to Scopas the son of Creon the Thessalian: —

"Hardly on the one hand can a man become truly good; built four-square in hands and feet and mind, a work without a flaw."

Do you know the poem? or shall I repeat the whole?

There is no need, I said; for I am perfectly well acquainted with the ode, of which I have made a careful study.

Very good, he said. And do you think that the ode is a good composition, and true?

Yes, I said, both good and true.

But if there is a contradiction, can the composition be good or true?

No, not in that case, I replied.

And is there not a contradiction? he asked. Reflect.

Well, my friend, I have reflected.

And does not the poet proceed to say, "I do not agree with the word of Pittacus, albeit the utterance of a wise man; hardly," says he, "can a man be good." Now you will observe that this is said by the same poet.

I know that, I said.

And do you think, he said, that the two sayings are consistent?

Yes, I said, I think they are (at the same time I could not help fearing that there might be something in what he said). And you think otherwise? I said.

Why, he said, how can he be consistent in saying both? First of all, premising as his own thought, "Hardly can a man become truly good;" and then a little further on in the poem, forgetting, and blaming Pittacus and refusing to agree with him, when he says, "Hardly can a man be good," which is the very same thing. And yet when he blames him who says the same with himself, he blames himself; so that he must be wrong either in his first or his second assertion.

Many of the audience cheered and applauded this. And I felt at first giddy and faint, as if I had received a blow from the expert hand of a boxer, when I heard his words and the sound of the cheering; and to confess the truth, I wanted to get time to think what the meaning of the poet really was.

So I turned to Prodicus and called him. Prodicus, I said, Simonides is a countryman of yours, and you ought to come to his rescue. I think that I must summon you to my aid, like the river Scamander in Homer, who, when beleaguered by Achilles, asks Simois to aid him, saying: —

"Brother dear, let us both together stay the force of the hero." [1]

And I summon you, for I am afraid that Protagoras will make an end of Simonides. Now is the time to rehabilitate Simonides, by the application of your charming philosophy of synonyms, which distinguishes "will" and "wish," and many similar words which you mentioned in your admirable speech. And I should like to know whether you would agree with me; for I am of opinion that there is no contradiction in the words of Simonides. And first of all I wish that you would say whether, in your opinion, Prodicus, "being" is the same as "becoming."

Not the same, certainly, replied Prodicus.

Did not Simonides first set forth, as his own view, that "Hardly can a man become truly good?"

Quite right, said Prodicus.

And then he blames Pittacus, I said, not for saying the same as himself, as Protagoras imagines, but for saying something different; for Pittacus does not say as Simonides says, that hardly can a man become good, but hardly can a man be good: and our friend Prodicus says that being, Protagoras, is not the same as becoming; and if they are not the same, then Simonides is not inconsistent with himself. I dare say that Prodicus and many others would say, as Hesiod says, "Hardly can a man become good, for the gods have placed toil in front of virtue; but when you have reached the goal, then the acquisition of virtue, however difficult, is easy." [2]

Prodicus heard and approved; but Protagoras said: Your correction, Socrates, involves a greater error than is contained in the sentence which you are correcting.

Alas! I said, Protagoras; then I am a sorry physician, and do but aggravate a disorder which I am seeking to cure.

The fact, he said, is as I have stated.

How is that? I asked.

The poet, he replied, could never have made such a mistake as to say that virtue, which in the opinion of all men is the hardest of all things, can be easily acquired.

[1] Il. xxi. 308. [2] Works and Days, 264 foll.

Well, I said, and how fortunate this is that Prodicus should be of the company, for he has a wisdom, Protagoras, which, as I imagine, is more than human and of very ancient date, and may be as old as Simonides, or even older. Learned as you are in many things, you appear to know nothing of 341
this; but I know, for I am a disciple of his. And now, if I am not mistaken, you do not understand the word "hard" (χαλεπόν) in the sense which Simonides intended; and I must correct you, as Prodicus corrects me when I use the word "dreadful" (δεινός) as a term of praise. If I say that Protagoras is a dreadfully wise man, he asks me if I am not ashamed of calling that which is good dreadful; and then he explains to me that the term "dreadful" is always taken in a bad sense, and that no one speaks of being dreadfully healthy or wealthy or wise, but of dreadful war, dreadful poverty, dreadful disease, meaning by the term "dreadful," evil. And I think that Simonides and his countrymen the Ceans, when they spoke of "hard" meant "evil," or something which you do not understand. Let us ask Prodicus, for he ought to be able to answer questions about the dialect of Simonides. What did he mean, Prodicus, by the term "hard"?

Evil, said Prodicus.

And therefore, I said, Prodicus, he blames Pittacus for saying, "Hard is the good," just as if that were equivalent to saying, Evil is the good.

Yes, he said, that was certainly his meaning; and he is twitting Pittacus with ignorance of the use of terms, which in a Lesbian, who has been accustomed to speak a barbarous language, is natural.

Do you hear, Protagoras, I asked, what our friend Prodicus is saying? And have you an answer for him?

You are all wrong, Prodicus, said Protagoras; and I know very well that Simonides in using the word "hard" meant what all of us mean, not evil, but that which is not easy — that which takes a great deal of trouble. Of this I am positive.

I said: I also incline to think, Protagoras, that this was the meaning of Simonides, and that our friend Prodicus was quite aware of this, but he thought that he would make fun, and try if you could maintain your thesis; for that Simonides could never have meant the other is clearly proved by the context, in which he says that God only has this gift. Now he cannot

surely mean to say that to be good is evil, when he afterward proceeds to say that God only has this gift, and that this is the attribute of him and of no other. For if this be his meaning, Prodicus would impute to Simonides a character of reck-
342 lessness which is very unlike his countrymen. And I should like to tell you, I said, what I imagine to be the real meaning of Simonides in this poem, if you will test what, in your way of speaking, would be called my skill in poetry; or if you would rather, I will be the listener.

Protagoras hearing me offer this, replied: As you please; and Hippias, Prodicus, and the others, told me by all means to do as I proposed.

Then now, I said, I will endeavor to explain to you my opinion about this poem. There is a very ancient philosophy which is more cultivated in Crete and Lacedaemon than in any other part of Hellas, and there are more philosophers in those countries than anywhere else in the world. This, however, is a secret which the Lacedaemonians deny; and they pretend to be ignorant, just because they do not wish to have it thought that they rule the world by wisdom, like the Sophists of whom Protagoras was speaking, and not by valor of arms; considering that if the reason of their superiority were disclosed, all men would be practicing their wisdom. And this secret of theirs has never been discovered by the imitators of Lacedaemonian fashions in other cities, who go about with their ears bruised in imitation of them, and have the caestus bound on their arms, and are always in training, and wear short cloaks; for they imagine that these are the practices which have enabled the Lacedaemonians to conquer the other Hellenes. Now when the Lacedaemonians want to unbend and hold free conversation with their wise men, and are no longer satisfied with mere secret intercourse, they drive out all these laconizers, and any other foreigners who may happen to be in their country, and they hold a philosophical *séance* unknown to the strangers; and they themselves forbid their young men to go out into other cities (in this they are like the Cretans), in order that they may not unlearn the lessons which they have taught them. And in these cities not only men but also women have a pride in their high cultivation. And you may know that I am only speaking the truth in attributing this excellence in philosophy to the Lacedaemonians, by this token: If a man converses with the most ordinary Lacedaemonian, he will find him seldom

good for much in general conversation, but at any point in the discourse he will be darting out some notable saying, terse and full of meaning, with unerring aim; and the person with whom he is talking seems to be like a child in his hands. And many of our own age and of former ages have noted that the true Lacedaemonian type of character has the love of philosophy even stronger than the love of gymnastics; they are conscious that only a perfectly educated man is capable of uttering such expressions. Such were Thales of Miletus, and 343
Pittacus of Mytilene, and Bias of Priene, and our own Solon, and Cleobulus the Lindian, and Myson the Chenian; and seventh in the catalogue of wise men was the Lacedaemonian Chilo. All these were lovers and emulators and disciples of the culture of the Lacedaemonians, and any one may perceive that their wisdom was of this character, consisting of short memorable sentences, which individuals uttered. And they met together and dedicated in the temple of Apollo at Delphi, as the first-fruits of their wisdom, the far-famed inscriptions, which are in all men's mouths, "Know thyself," and "Nothing too much."

Why do I say all this? I am explaining that this Lacedaemonian brevity was the style of primitive philosophy. Now there was a saying of Pittacus which was privately circulated and received the approbation of the wise, "Hard to be good." And Simonides, who was ambitious of the fame of wisdom, was aware that if he could overthrow this saying, then, as if he had won a victory over some famous athlete, he would carry off the palm among his contemporaries. And if I am not mistaken, he composed the entire poem with the secret intention of damaging that saying.

Let us all unite in examining his words, and see whether I am speaking the truth. Simonides must have been a lunatic, if, in the very first words of the poem, wanting to say only that to be good is hard, he inserted μέν, "on the one hand" (on the one hand to become good is hard); there would be no possible reason for the introduction of μέν, unless you suppose him to speak with a hostile reference to the words of Pittacus. Pittacus is saying "Hard to be good," and he says, controverting this, "No, the truly hard thing, Pittacus, is to become good," not joining "truly" with "good," but with "hard." Not the hard thing is to be truly good, as though there were some truly good men, and there were others who were good

but not truly good (that would be a very simple observation, and quite unworthy of Simonides); but you must suppose him to make a trajection of the word (ἀλαθέως), construing the saying of Pittacus thus (and let us imagine Pittacus to be speaking and Simonides answering him): "O my friends," says Pittacus, "hard to be good," and Simonides answers, "In that, Pittacus,
344 you are mistaken, the difficulty is not to be good, but on the one hand, to become good, four-square in hands and feet and mind, without a flaw — that is hard truly." This way of reading the passage accounts for the insertion of (μέν) "on the one hand," and for the use of the word "truly," which is rightly placed at the end; and all that follows tends to prove that this is the meaning. A great deal might be said in praise of the details of the poem, which is a charming piece of workmanship, and very finished, but that would be tedious. I should like, however, to point out the general intention of the poem, which is certainly designed in every part to be a refutation of the saying of Pittacus. For he speaks in what follows a little further on as if he meant to argue that although there is a difficulty in becoming good, yet this is possible for a time, and only for a time. But having become good, to remain in a good state and be good, as you, Pittacus, affirm, that is not possible, and is not granted to man; God only has this blessing; "but man cannot help being bad when the force of circumstances overpowers him." Now whom does the force of circumstances overpower in the command of a vessel? — not the private individual, for he is always overpowered; and as one who is already prostrate cannot be overthrown, but only he who is standing upright and not he who is prostrate can be laid prostrate, so the force of circumstances can only be said to overpower him who has resources, and not him who is at all times helpless. The descent of a great storm may make the pilot helpless, or the severity of the season the husbandman or the physician; for the good may become bad, as another poet witnesses: —

"The good are sometimes good and sometimes bad."

But the bad does not become bad; he is always bad. So that when the force of circumstances overpowers the man of resources and skill and virtue, then he cannot help being bad. And you, Pittacus, are saying, "Hard to be good." Now there is a difficulty in becoming good; and yet this is possible:

but to be good is an impossibility; "for he who does well is the good man, and he who does ill is the bad." But what sort of doing is good in letters? and what sort of doing makes a man good in letters? Clearly the knowing of them. 345
And what sort of well-doing makes a man a good physician? Clearly the knowing of the art of healing the sick. "But he who does ill is the bad." Now who becomes a bad physician? Clearly he who is in the first place a physician, and in the second place a good physician; for he may become a bad one also: but none of us unskilled individuals can by any amount of doing ill become physicians, any more than we can become carpenters or anything of that sort; and he who by doing ill cannot become a physician at all, clearly cannot become a bad physician. In like manner the good may become deteriorated by time, or toil, or disease, or other accident (the only real ill-doing is the deprivation of knowledge), but the bad man will never become bad, for he is always bad; and if he were to become bad, he must previously have been good. Thus the words of the poem tend to show that on the one hand a man cannot be continuously good, but that he may become good and may also become bad; and again that "they are the best for the longest time whom the gods love."

All this relates to Pittacus, as is further proved by the sequel. For he adds: "Therefore I will not throw away my life in searching after the impossible, hoping in vain to find a perfectly faultless man among those who partake of the fruit of the broad-bosomed earth; and when I have found him to tell you of him" (this is the vehement way in which he pursues his attack upon Pittacus throughout the whole poem): "but him who does no evil voluntarily I praise and love; not even the gods war against necessity." All this has a similar drift, for Simonides was not so ignorant as to say that he praised those who did no evil voluntarily, as though there were some who did evil voluntarily. For no wise man, as I believe, will allow that any human being errs voluntarily, or voluntarily does evil and dishonorable actions; but they are very well aware that all who do evil and dishonorable things do them against their will. And Simonides never says that he praises him who does no evil voluntarily; the word "voluntarily" applies 346
to himself. For he was under the impression that a good man might often compel himself to love and praise another, and that there might be an involuntary love, such as a man

might feel to an ungainly father or mother, or to his country, or something of that sort. Now bad men, when their parents or country have any defects, rejoice at the sight of them, and expose them to others, and find fault with them and denounce them, under the idea that the rest of mankind will be less likely to take them to task and reproach them when they neglect them; and this makes them exaggerate their defects, in order that the odium which is necessarily incurred by them may be increased: but the good man dissembles his feelings, and constrains himself to praise them; and if they have wronged him and he is angry, he pacifies his anger and is reconciled, and compels himself to love and praise his own flesh and blood. And Simonides, as is probable, considered that he himself had often had to praise and magnify a tyrant or the like, much against his will, and he also wishes to imply to Pittacus that he is not censorious and does not censure him. "For I am satisfied," he says, "when a man is neither bad nor very stupid, and when he knows justice (which is the health of states), and is of sound mind, I will find no fault with him, for I am not given to finding fault, for there are innumerable fools" (implying that if he delighted in censure he might have abundant opportunity of finding fault). "All things are good with which evil is unmingled." In these latter words he does not mean to say that all things are good which have no evil in them, as you might say "All things are white which have no black in them," for that would be ridiculous; but he means to say that he accepts and finds no fault with the moderate or intermediate state. "I do not hope," he says, "to find a perfectly blameless man among those who partake of the fruits of the broad-bosomed earth, and when I have found him to tell you of him; in this sense I praise no man. But he who is moderately good, and does no evil, is good enough for me, who love and approve every one" (and here observe that he uses a Lesbian word, ἐπαίνημι, because he is addressing Pittacus, — "who love and approve every one voluntarily," says, "who does no evil:" and that the stop should be put after "voluntarily"); "but there
347 are some whom I involuntarily praise and love. And you, Pittacus, I would never have blamed, if you had spoken what was moderately good and true; but I do blame you because, wearing the appearance of truth, you are speaking falsely about the greatest matters." And this, I said, Prodicus and Protagoras, I take to be the true meaning of Simonides in this poem.

Hippias said: I think, Socrates, that you have given a very good explanation of this poem; but I have also an excellent interpretation of my own which I will expound to you, if you will allow me.

Nay, Hippias, said Alcibiades; not now, but another time. At present we must abide by the compact which was made between Socrates and Protagoras, to the effect that as long as Protagoras is willing to ask, Socrates should answer; or that if he would rather answer, then that Socrates should ask.

I said: I wish Protagoras either to ask or answer as he is inclined; but I would rather have done with poems and odes, if you do not object, and come back to the question about which I was asking you at first, Protagoras, and by your help make an end of that. The talk about the poets seems to me like a commonplace entertainment to which a vulgar company have recourse; who, because they are not able to converse or amuse one another, while they are drinking, with the sound of their own voices and conversation by reason of their stupidity, raise the price of flute-girls in the market, hiring for a great sum the voice of a flute instead of their own breath, to be the medium of intercourse among them: but where the company are real gentlemen and men of education, you will see no flute-girls, nor dancing-girls, nor harp-girls; and they have no nonsense or games, but are contented with one another's conversation, of which their own voices are the medium, and which they carry on by turns and in an orderly manner, even though they are very liberal in their potations. And a company like this of ours, and men such as we profess to be, do not require the help of another's voice, or of the poets whom you cannot interrogate about the meaning of what they are saying; people who cite them declaring, some that the poet has one meaning, and others that he has another; and there arises a dispute which can never be put to the proof. This sort of entertainment they decline, and prefer to talk with one another, and try one another's mettle in conversation. And these are the sort 348
of models which I desire that you and I should imitate. Leaving the poets, and keeping to ourselves, let us try the mettle of one another and of the truth in conversation. And if you have a mind to ask I am ready to answer; or if you would rather, do you answer, and give me the opportunity of taking up and completing our unfinished argument.

I made these and some similar observations; but Protagoras

would not distinctly say which he would do. Thereupon Alcibiades turned to Callias, and said: Do you think, Callias, that Protagoras is fair in refusing to say whether he will or will not answer? for I certainly think that he is unfair; he ought either to proceed with the argument, or distinctly to refuse to proceed, that we may know his intention; and then Socrates will be able to discourse with some one else, and the rest of the company will be free to talk with one another.

I think that Protagoras was really made ashamed by these words of Alcibiades, and when the prayers of Callias and the company were superadded, he was at last induced to argue, and said that I might ask and he would answer.

So I said: Do not imagine, Protagoras, that I have any other interest in asking questions of you but that of clearing up my own difficulties. For I think that Homer was very right in saying that "When two go together, one sees before the other,"[1] for all men who have a companion are readier in deed, word, or thought; but if a man "sees a thing when he is alone," he goes about straightway seeking until he finds some one to whom he may show his discoveries, and who may confirm him in them. And I would rather hold discourse with you than with any one, because I think that no man has a better understanding of most things which a good man may be expected to understand, and in particular of virtue. For who is there, but you? — who not only claim to be a good man and a gentleman, for many are this, and yet have not the power of making others good. Whereas you are not only good yourself, but also the cause of goodness in others. Moreover such confidence have you in yourself, that although other Sophists conceal their profession, you proclaim in the face of Hellas that you are a Sophist or teacher of virtue and education, and are the first who
349 demanded pay in return. How then can I do otherwise than invite you to the examination of these subjects, and ask questions and take advice of you? Indeed, I must. And I should like once more to have my memory refreshed by you about the questions which I was asking you at first, and also to have your help in considering them. If I am not mistaken the question was this: Are wisdom and temperance and courage and justice and holiness five names of the same thing? or has each of the names a separate underlying essence and corresponding thing having a proper function, no one of them being like

[1] Il. x. 224.

any other of them? And you said that the five names were not the names of the same thing, but that each of them had a separate object, and that all of them were parts of virtue, not in the same way that the parts of gold are like each other and the whole of which they are parts, but as the parts of the face are unlike the whole of which they are parts and one another, and have each of them a distinct function. I should like to know whether this is still your opinion; or if not, I will ask you to define your meaning, as I shall not take you to task if you now make a different statement. For I dare say that you may have said what you did only in order to make trial of me.

I answer, Socrates, he said, that all these qualities are parts of virtue, and that four out of the five are to some extent similar, and that the fifth of them, which is courage, is very different from the other four, as I prove in this way: You may observe that many men are utterly unrighteous, unholy, intemperate, ignorant, who are nevertheless remarkable for their courage.

Stop, I said; that requires consideration. When you speak of brave men, do you mean the confident, or another sort of nature?

Yes, he said; I mean the impetuous, ready to go at that which others are afraid to approach.

In the next place, you would affirm virtue to be a good thing, of which good thing you assert yourself to be a teacher.

Yes, he said; I should say the best of all things, as I am a sane man.

And is it partly good and partly bad, I said, or wholly good?

Wholly good, and that in the highest degree.

Tell me then; who are they who have confidence in 350
diving into a well?

I should say, the divers.

And the reason of this is that they have knowledge?

Yes, that is the reason.

And who have confidence in fighting on horseback — the skilled horsemen or the unskilled?

The skilled.

And who in fighting with light shields — the peltasts or the nonpeltasts?

The peltasts. And that is true of all other things, he said, if that is your point: those who have knowledge are more con-

fident than those who have no knowledge, and they are more confident after they have learned than before.

And have you not seen persons utterly ignorant, I said, of these things, and yet confident about them?

Yes, he said, I have seen persons very confident.

And are not these confident persons always courageous?

In that case, he replied, courage would be a base thing, for the men of whom we are speaking are surely madmen.

Then who are the courageous? Are they not the confident?

Yes, he said; and I still maintain that.

And those, I said, who are thus confident without knowledge are really not courageous, but mad; and in that case the wisest are also the most confident, and being the most confident are also the bravest, and upon that view again wisdom will be courage.

Nay, Socrates, he replied, you are mistaken in your remembrance of what was said by me. When you asked me, I certainly did say that the courageous are the confident; but I was not asked whether the confident are the courageous; for if you had asked me that, I should have answered "Not all of them:" and what I did answer you have not disproved, although you proceed to show that those who have knowledge are more courageous than they were before they had knowledge, and more courageous than others who have no knowedge; and this makes you think that courage is the same as wisdom. But in this way of arguing you might come to imagine that strength is wisdom. You might begin by asking whether the strong are able, and I should say "Yes:" and then whether those who know how to wrestle are not more able to wrestle than those who do not know how to wrestle, and more able after than before they had learned, and I should assent. And when I had admitted this, you might use my admissions in such a way as to prove that upon my view wisdom is strength; whereas in that case I should not have admitted, any more than in the other, that the able are strong, although I have admitted that
351 the strong are able. For there is a difference between ability and strength; the former is given by knowledge as well as by madness or rage, but strength comes from nature and a healthy state of the body. And in like manner I say of confidence and courage, that they are not the same; and I argue that the courageous are confident, but not all the confident courageous. For confidence may be given to men by art, and

)o, like ability, by anger and madness; but courage comes to
em from nature and the healthy state of the soul.
I said: You would admit, Protagoras, that some men live
ill and others ill?
He agreed to this.
And do you think that a man lives well who lives in pain
d grief?
He does not.
But if he lives pleasantly to the end of his life, don't you
nk that in that case he will have lived well?
I do.
Then to live pleasantly is a good, and to live unpleasantly
evil?
Yes, he said, if the pleasure be good and honorable.
And do you, Protagoras, like the rest of the world, call some
asant things evil and some painful things good? — for I am
her disposed to say that things are good in as far as they are
asant, if they have no consequences of another sort, and in
far as they are painful they are bad.
I do not know, Socrates, he said, whether I can venture to
ert in that unqualified manner that the pleasant is the good
l the painful the evil. Having regard not only to my pres-
answer, but also to the rest of my life, I shall be safer, if I
not mistaken, in saying that there are some pleasant things
ich are not good, and that there are some painful things
ich are good, and some which are not good, and that there
some which are neither good nor evil.
And you would call pleasant, I said, the things which parti-
ate in pleasure or create pleasure?
Certainly, he said.
Then my meaning is, that in as far as they are pleasant they
good; and my question would imply that pleasure is a
)d in itself.
According to your favorite mode of speech, Socrates, let us
uire about this, he said; and if the result of the inquiry is
show that pleasure and good are really the same, then we
l agree; but if not, then we will argue.
And would you wish to begin the inquiry? I said; or shall
egin?
You ought to take the lead, he said; for you are the author
the discussion.
May I use this as an illustration? I said. Suppose
ne one who is inquiring into the health or some other

bodily quality of another: he looks at his face and at the tips of his fingers, and then he says, Uncover your chest and back to me that I may have a better view: that is the sort of thing which I desire in this speculation. Having seen what your opinion is about good and pleasure, I am minded to say to you: Uncover your mind to me, Protagoras, and reveal your opinion about knowledge, that I may know whether you agree with the rest of the world. Now the rest of the world are of opinion that knowledge is a principle not of strength, or of rule, or of command: their notion is that a man may have knowledge, and yet that the knowledge which is in him may be overmastered by anger, or pleasure, or pain, or love, or perhaps fear, — just as if knowledge were a slave, and might be dragged about anyhow. Now is that your view? or do you think that knowledge is a noble and commanding thing, which cannot be overcome, and will not allow a man, if he only knows the difference of good and evil, to do anything which is contrary to knowledge, but that wisdom will have strength to help him?

I agree with you, Socrates, said Protagoras; and not only that, but I above all other men, am bound to say that wisdom and knowledge are the highest of human things.

Good, I said, and true. But are you aware that the majority of the world are of another mind; and that men are commonly supposed to know the things which are best, and not to do them when they might? And most persons of whom I have asked the reason of this have said that those who did thus were overcome by pain, or pleasure, or some of those affections which I was just now mentioning.

Yes, Socrates, he replied; and that is not the only point about which mankind are in error.

Suppose, then, that you and I endeavor to instruct and inform them what is the nature of this affection, which is called by
353 them being overcome by pleasure, and which, as they declare, is the reason why they know the better and choose the worse. When we say to them: Friends, you are mistaken, and are saying what is not true, they would reply: Socrates and Protagoras, if this affection of the soul is not to be described as being overcome by pleasure, what is it, and how do you call it? Tell us that.

But why, Socrates, should we trouble ourselves about the opinion of the many, who just say anything that happens to occur to them?

I think, I replied, that their opinion may help us to discover the nature and relation of courage to the other parts of virtue. If you are disposed to abide by our recent agreement, that I should lead in the way in which I think that we shall find the truth best, do you follow; but if you are disinclined, never mind.

You are quite right, he said; and I would have you proceed as you have begun.

Well then, I said, let me suppose that they repeat their question, What account do you give of that which, in our language, is termed being overcome by pleasure? I should answer them thus: Listen, and Protagoras and I will endeavor to show you. When men are overcome by eating and drinking and other sensual desires which are pleasant, and they, knowing them to be evil, nevertheless indulge in them, is not that what you would call being overcome by pleasure? That they will admit. And suppose that you and I were to go on and ask them again: In what way do you say that they are evil, — in that they are pleasant and give pleasure at the moment, or because they cause disease and poverty and other like evils in the future? Would they still be evil, if they had no attendant evil consequences, simply because they give the consciousness of pleasure of whatever nature? Would they not answer that they are not evil on account of the pleasure which is immediately given by them, but on account of the after consequences — diseases and the like?

I believe, said Protagoras, that the world in general would give that answer.

And in causing diseases do they not cause pain? and in causing poverty do they not cause pain; they would agree to that also, if I am not mistaken?

Protagoras assented.

Then I should say to them, in my name and yours: Do you think them evil for any other reason, except that they end in pain and rob us of other pleasures? — that again they would admit?

We both of us thought that they would.

354 And that I should take the question from the opposite point of view, and say: Friends, when you speak of goods being painful, do you mean remedial goods, such as gymnastic exercises and military services, and the physician's use of burning, cutting, drugging, and starving? Are these the things which are good but painful? — they would assent to that?

He agreed.

And do you call them good because they occasion the greatest immediate suffering and pain; or because, afterwards, they bring health and improvement of the bodily condition and the salvation of states and empires and wealth? — they would agree to that, if I am not mistaken?

He assented.

Are these things good for any other reason except that they end in pleasure, and get rid of and avert pain? Are you looking to any other standard but pleasure and pain when you call them good? — they would acknowledge that they were not?

I think that they would, said Protagoras.

And do you not pursue after pleasure as a good, and avoid pain as an evil?

He assented.

Then you think that pain is an evil and pleasure is a good: and even pleasure you deem an evil, when it robs you of greater pleasures than it gives, or causes greater pain than the pleasures which it has. If, however, you call pleasure an evil in relation to some other end or standard, you will be able to show us that standard. But you have none to show.

I do not think that they have, said Protagoras.

And have you not a similar way of speaking about pain? You call pain a good when it takes away greater pains than those which it has, or gives pleasures greater than the pains; for I say that if you have some standard other than pleasure and pain to which you refer when you call actual pain a good, you can show what that is. But you cannot.

That is true, said Protagoras.

Suppose again, I said, that the world says to me: Why do you spend many words and speak in many ways on this subject? Excuse me, friends, I should reply; but in the first place there is a difficulty in explaining the meaning of the expression "overcome by pleasure;" and the whole argument
355 turns upon this. And even now, if you see any possible way in which evil can be explained as other than pain, or good as other than pleasure, you may still retract. But I suppose that you are satisfied at having a life of pleasure which is without pain. And if you are satisfied, and if you are unable to show any good or evil which does not end in pleasure and pain, hear the consequences, — If this is true, then I say that the argument is absurd which affirms that a man often does

evil knowingly, when he might abstain, because he is seduced and amazed by pleasure; or again, when you say that a man knowingly refuses to do what is good because he is overcome at the moment by pleasure. Now that this is ridiculous will be evident if only we give up the use of various names, such as pleasant and painful, and good and evil. As there are two things, let us call them by two names, — first, good and evil, and then pleasant and painful. Assuming this, let us go on to say that a man does evil knowing that he does evil. But some one will ask, Why? Because he is overcome, is the first answer. And by what is he overcome? the inquirer will proceed to ask. And we shall not be able to reply "By pleasure," for the name of pleasure has been exchanged for that of good. In our answer, then, we shall only say that he is overcome. "By what?" he will reiterate. By the good, we shall have to reply; indeed we shall. Nay, but our questioner will rejoin with a laugh, if he be one of the swaggering sort, That is too ridiculous, that a man should do what he knows to be evil when he ought not, because he is overcome by good. Is that, he will ask, because the good was worthy or not worthy of conquering the evil? And in answer to that we shall clearly reply, Because it was not worthy; for if it had been worthy, then he who, as we say, was overcome by pleasure, would not have been wrong. But how, he will reply, can the good be unworthy of the evil, or the evil of the good? Is not the real explanation that they are out of proportion to one another, either as greater and smaller, or more and fewer? This we cannot deny. And when you speak of being overcome, — what do you mean, he will say, but that you choose the greater evil in exchange for the lesser good? This being the case, let us now substitute the names of pleasure and pain, and say, not as before, that a man does what is evil knowingly, but that he does what is painful knowingly, and because he is overcome by pleasure, which is unworthy to overcome. And what measure is there of the relations of pleasure to pain other than excess and defect, which means that they become greater and smaller, and more and fewer, and differ in degree? For if any one says, "Yes, Socrates, but immediate pleasure differs widely from future pleasure and pain," — to that I should reply: And do they differ in any other way except by reason of pleasure and pain? There can be no other measure of them. And do you, like a skillful weigher, put into the balance the pleasures

356

and the pains, near and distant, and weigh them, and then say which outweighs the other. If you weigh pleasures against pleasures, you of course take the more and greater; or if you weigh pains against pains, you take the fewer and the less; or if pleasures against pains, then you choose that course of action in which the painful is exceeded by the pleasant, whether the distant by the near or the near by the distant; and you avoid that course of action in which the pleasant is exceeded by the painful. Would you not admit, my friends, that this is true? I am confident that they cannot deny this.

He agreed with me.

Well then, I shall say, if you admit that, be so good as to answer me a question: Do not the same magnitudes appear larger to your sight when near, and smaller when at a distance? They will acknowledge that. And the same holds of thickness and number; also sounds, which are in themselves equal, are greater when near, and lesser when at a distance. They will grant that also. Now supposing that happiness consisted in making and taking large things, what would be the saving principle of human life? Would the art of measuring be the saving principle, or would the power of appearance? Is not the latter that deceiving art which makes us wander up and down and take the things at one time of which we repent at another, both in our actions and in our choice of things great and small? But the art of measurement is that which would do away with the effect of appearances, and, showing the truth, would fain teach the soul at last to find rest in the truth, and would thus save our life. Would not mankind generally acknowledge that the art which accomplishes this is the art of measurement?

Yes, he said, the art of measurement.

Suppose, again, the salvation of human life to depend on the choice of odd and even, and on the knowledge of when men ought to choose the greater or less, either in reference to themselves or to each other whether near or at a distance; what
357 would be the saving principle of our lives? Would not knowledge? — a knowledge of measuring, when the question is one of excess and defect, and a knowledge of number, when the question is of odd and even? The world will acknowledge that, will they not?

Protagoras admitted that they would.

Well then, I say to them, my friends; seeing that the salvation of human life has been found to consist in the right choice

of pleasures and pains, — in the choice of the more and the fewer and the greater and the less, and the nearer and remoter, must not this measuring be a consideration of excess and defect and equality in relation to each other?

That is undeniably true.

And this, as possessing measure, must undeniably also be an art and science?

They will agree to that.

The nature of that art or science will be a matter of future consideration; the demonstration of the existence of such a science is a sufficient answer to the question which you asked of me and Protagoras. At the time when you asked the question, if you remember, both of us were agreeing that there was nothing mightier than knowledge, and that knowledge, in whatever existing, must have the advantage over pleasure and all other things; and then you said that pleasure often got the advantage even over a man who has knowledge; and we refused to allow this, and you said: O Protagoras and Socrates, if this state is not to be called being overcome by pleasure, tell us what it is; what would you call it? If we had immediately and at the time answered "Ignorance," you would have laughed at us. But now, in laughing at us, you will be laughing at yourselves: for you also admitted that men err in their choice of pleasures and pains; that is, in their choice of good and evil, from defect of knowledge; and you admitted further that they err, not only from defect of knowledge in general, but of that particular knowledge which is called measuring. And you are also aware that the erring act which is done without knowledge is done in ignorance. This, therefore, is the meaning of being overcome by pleasure, — ignorance, and that the greatest. And our friends Protagoras and Prodicus and Hippias declare that they are the physicians of ignorance; but you, who are under the mistaken impression that ignorance is not the cause, neither go yourselves, nor send your children, to the Sophists, who are the teachers of these things — you take care of your money and give them none; and the result is, that you are the worse off both in public and private life: Let us suppose this to be our answer to the world in general. But I would like now to ask you, Hippias, 358
and you, Prodicus, as well as Protagoras (for the argument is to be yours as well as ours), whether you think that I am speaking the truth or not?

They all thought that what I said was entirely true.

Then you agree, I said, that the pleasant is the good, and the painful evil. And here I would beg my friend Prodicus not to introduce his distinction of names, whether he is disposed to say pleasurable, delightful, joyful. However and in whatever way he rejoices to name them, I will ask you, most excellent Prodicus, to answer this in my sense.

Prodicus laughed and assented, as did the others.

Then, my friends, I said, what do you say to this? Are not all actions, the tendency of which is to make life painless and pleasant, honorable and useful? The honorable work is also useful and good?

This was admitted.

Then, I said, if the pleasant is the good, nobody does anything under the idea or conviction that some other thing would be better and is also attainable, when he might do the better. And this inferiority of a man to himself is merely ignorance, as the superiority of a man to himself is wisdom.

They all assented.

And is not ignorance the having a false opinion and being deceived about important matters?

To that they also unanimously assented.

Then, I said, no man voluntarily pursues evil, or that which he thinks to be evil. To prefer evil to good is not in human nature; and when a man is compelled to choose one of two evils, no one will choose the greater when he might have the less.

All of us agreed to every word of this.

Well, I said, there is a certain thing called fear or terror; and here, Prodicus, I should particularly like to know whether you would agree with me in defining this fear or terror as expectation of evil.

Protagoras and Hippias agreed, but Prodicus said that this was fear and not terror.

Never mind about that, Prodicus, I said; but let me ask whether, if our former assertions are true, a man will pursue that which he fears when he need not? Would not this be in contradiction to the admission which has been already made, that he thinks the things which he fears to be evil; and no one will pursue or voluntarily accept that which he thinks to be evil.

359 That also was universally admitted.

Then, I said, these, Hippias and Prodicus, are our prem-

ises; and I would beg Protagoras to explain to us how he can be right in what he said at first. I do not mean in what he said quite at first, for his first statement, as you may remember, was that whereas there were five parts of virtue none of them was like any other of them; each of them had a separate function. To this, however, I am not referring, but to the assertion which he afterwards made that of the five virtues four were nearly akin to each other, but that the fifth, which was courage, differed greatly from the others. And of this he gave me the following proof. He said: You will find, Socrates, that some of the most impious, and unrighteous, and intemperate, and ignorant of men are among the most courageous; and that is a proof that courage is very different from the other parts of virtue. I was surprised at his saying this at the time, and I am still more surprised now that I have discussed the matter with you. So I asked him whether by the brave he meant the confident. Yes, he replied, and the impetuous or goers. (You may remember, Protagoras, that this was your answer.)

He acknowledged the truth of this.

Well then, I said, tell us against what are the courageous ready to go — against the same as the cowards?

No, he answered.

Then against something different?

Yes, he said.

Then do cowards go where there is safety, and the courageous where there is danger?

Yes, Socrates, that is what men say.

That is true, I said. But I want to know against what the courageous are ready to go — against dangers, believing them to be dangers, or not against dangers?

No, said he; that has been proved by you in the previous argument to be impossible.

That, again, I replied, is quite true. And if this has been rightly proven, then no one goes to meet what he thinks to be dangers, since the want of self-control, which makes men rush into dangers, has been shown to be ignorance. —

He assented.

And yet the courageous man and the coward alike go to meet that about which they are confident; so that, in this point of view, the cowardly and the courageous go to meet the same things.

And yet, Socrates, said Protagoras, that to which the coward

goes is the opposite of that to which the courageous goes; the one, for example, are ready to go to battle, and the others are not ready.

And is going to battle honorable or disgraceful? I said.

Honorable, he replied.

And if honorable, then already admitted by us to be good; for all honorable actions we have admitted to be good.

That is true; and to that opinion I shall always adhere.

360 True, I said. But which of the two are they who, as you say, are unwilling to go to war, which is a good and honorable thing?

The cowards, he replied.

And yet, I said, that which is good and honorable is also pleasant?

That, he said, was certainly admitted.

And do the cowards knowingly refuse to go to the nobler, and pleasanter, and better?

The admission of that, he replied, would belie our former admissions.

But does not the courageous man also go to meet the better, and pleasanter, and nobler?

That must be admitted.

And the courageous man has no base fear or base confidence?

True, he replied.

And if not base, then honorable?

He admitted this.

And if honorable, then good?

Yes.

But the fear and confidence of the coward or foolhardy or madman, on the contrary, are base?

He assented.

And these base fears and confidences originate in ignorance and uninstructedness?

True, he said.

Then as to the motive from which the cowards act, do you call that cowardice or courage?

I should say cowardice, he replied.

And have they not been shown to be cowards through their ignorance of dangers?

Assuredly, he said.

And because of that ignorance they are cowards?

He assented.

And the reason why they are cowards is admitted by you to be cowardice?

He assented.

Then the ignorance of what is and is not dangerous is cowardice?

He nodded assent.

But surely courage, I said, is opposed to cowardice?

Yes.

And the wisdom which knows what are and are not dangers is opposed to the ignorance of them?

To that again he nodded assent.

And the ignorance of them is cowardice?

To that he very reluctantly nodded assent.

And the knowledge of that which is and is not dangerous is courage, and is opposed to the ignorance of these things?

At this point he would no longer nod assent, but was silent.

And why, I said, do you neither assent nor dissent, Protagoras?

Finish the argument by yourself, he said.

I only want to ask one more question, I said. I want to know whether you still think that there are men who are most ignorant and yet most courageous?

You seem to have a great ambition to make me answer, Socrates, and therefore I will gratify you, and say, that this appears to me to be impossible consistently with the argument.

My only object, I said, in continuing the discussion, has been the desire to ascertain the relations of virtue and the essential nature of virtue; for if this were clear, I am very sure 361
that the other controversy which has been carried on at great length by both of us — you affirming and I denying that virtue can be taught — would also have become clear. The result of our discussion appears to me to be singular. For if the argument had a human voice, that voice would be heard laughing at us and saying: Protagoras and Socrates, you are strange beings; there are you who were saying that virtue cannot be taught, contradicting yourself now in the attempt to show that all things are knowledge, including justice, and temperance, and courage, — which tends to show that virtue can certainly be taught; for if virtue were other than knowledge, as Protagoras attempted to show, then clearly virtue cannot be taught; but if virtue is entirely knowledge, as you, Socrates, are seeking to show, then I cannot but suppose that virtue is capable of

being taught. Protagoras, on the other hand, who started by saying that it might be taught, is now eager to show that it is anything rather than knowledge; and if this is true, it must be quite incapable of being taught. Now I, Protagoras, perceiving this terrible confusion of ideas, have a great desire that they should be cleared up. And I should like to carry on the discussion until we ascertain what virtue is, and whether capable of being taught or not, lest haply Epimetheus should trip us up and deceive us in the argument, as he forgot to provide for us in the story; and I prefer your Prometheus to your Epimetheus: of him I make use whenever I am busy about these questions in Promethean care of my own life. And if you have no objection, as I said at first, I should like to have your help in the inquiry.

Protagoras replied: Socrates, I am not of a base nature, and I am the last man in the world to be envious. I cannot but applaud your enthusiasm in the conduct of an argument. As I have often said, I admire you above all men whom I know, certainly above all men of your age; and I believe that you will become very eminent in philosophy. Let us come back to the subject at some future time; at present we had better turn to something else.

By all means, I said, if that is your wish; for I too ought long since to have kept the engagement of which I spoke before, and only tarried because I could not refuse the request of the noble Callias. This finished the conversation, and we went our way.

EUTHYDEMUS.

INTRODUCTION.

THE Euthydemus is, of all the Dialogues of Plato, that in which he approaches most nearly to the comic poet. The mirth is broader, the irony more sustained, the contrast between Socrates and the two Sophists, although veiled, penetrates deeper than in any other of his writings. Even Thrasymachus, in the Republic, is at last pacified, and becomes a friendly and interested auditor of the great discourse. But in the Euthydemus the mask is never dropped; the accustomed irony of Socrates continues to the end.

Socrates narrates to Crito a remarkable scene in which he has himself taken part, and in which the two brothers, Dionysodorus and Euthydemus are the chief performers. They are natives of Chios, who have been exiled from Thurii, and in former days had appeared at Athens as teachers of rhetoric and of the art of fighting in armor. To this they have now added a new fighting accomplishment — the art of Eristic, or fighting with words, which they are likewise willing to teach "for a consideration." But they can also teach virtue in a very short time and in the very best manner. Socrates, who is always on the lookout for teachers of virtue, is interested in the youth Cleinias, the grandson of the great Alcibiades, and is desirous that he should have the benefit of their instructions. He is quite ready to fall down and worship them; although the greatness of their professions does arouse in his mind a temporary incredulity.

A circle gathers round them, in the midst of which are Socrates, the two brothers, the youth Cleinias, who is watched by the eager eyes of his lover Ctesippus, and others. The performance begins; and such a performance as might well seem to require an invocation of Memory and the Muses. It is agreed that the brothers shall question Cleinias. "Cleinias," says Euthydemus, "who learn, the wise or the unwise?" "The wise," is the reply; given with blushing and hesitation. "And yet when you learned you did not know and were not wise." Then Dionysodorus takes up the ball: "Who are they who learn dictation of the grammar-master; the wise boys or the foolish boys?" "The wise." "Then after all the wise learn."

"And do they learn," said Euthydemus, "what they know or what they do not know?" "The latter." "And dictation is a dictation of letters?" "Yes." "And you know letters?" "Yes." "Then you learn what you know." "But," retorts Dionysodorus, "is not learning acquiring knowledge?" "Yes." "And you acquire that which you have not got already." "Then you learn that which you do not know."

Socrates is afraid that the youth Cleinias may be discouraged at these repeated overthrows. He therefore explains to him the nature of the process to which he is being subjected. The two strangers are not serious; there are jests at the mysteries which precede the enthronement, and he is being initiated into the mysteries of the sophistical ritual. This is all a sort of horse-play, which is now ended. The exhortation to virtue will follow, and Socrates himself (if the wise men will not laugh at him) is desirous of carrying on such an exhortation, by way of example to them, according to his own poor notion. He proceeds to question Cleinias. The result of the investigation may be summed up as follows:—

All men desire good; and good means the possession of goods, such as wealth, health, beauty, birth, power, honor; not forgetting the virtues and wisdom. And yet in this enumeration the greatest good of all is omitted. What is that? Good fortune. But what need is there of good fortune when we have wisdom already: in every art and business are not the wise also the fortunate? This is admitted. And again, the possession of goods is not enough; there must be a right use of them as well, and this can only be given by knowledge: in themselves they are neither good nor evil, but knowledge and wisdom are the only good, and ignorance and folly the only evil. The conclusion is that we must get "wisdom." But can wisdom be taught? "Yes," says Cleinias. Socrates is delighted at the ingenuousness of the youth relieving him from the necessity of discussing one of his great puzzles. "As wisdom is the only good, he must become a philosopher, or lover of wisdom." "That I will," says Cleinias.

After Socrates has given this specimen of his own mode of instruction, the two brothers recommence their exhortation to virtue, which is of quite another sort.

"You want Cleinias to be wise?" "Yes." "And he is not wise yet?" "No." "Then you want him to be what he is not, and not to be what he is?—not to be—that is, to perish. Pretty lovers and friends you must all be!"

Here Ctesippus, the lover of Cleinias interposes in great excitement, thinking that he will teach the two Sophists a lesson of good manners. But he is quickly entangled in the meshes of their sophistry; and as a storm seems to be gathering Socrates pacifies him with a joke, and Ctesippus then says that he is not reviling the

two Sophists, he is only contradicting them. "But," says Dionysodorus, "there is no such thing as contradiction. When you and I describe the same thing, or you describe one thing and I describe another, how is there any contradiction in that?" Ctesippus is unable to reply.

Socrates has already heard of the denial of contradiction, and would like to be informed by the great master of the art, "What is the meaning of this?" Do they mean that there is no such thing as error, ignorance, falsehood? Then what are they professing to teach? The two Sophists complain that Socrates is ready to answer what they said a year ago, but is "nonplused" at what they are saying now. "What does the word 'nonplused' mean?" Socrates is informed in reply that words are lifeless things, and lifeless things have no sense or meaning. Ctesippus again breaks out, and again has to be pacified by Socrates, who renews the conversation with Cleinias. The two Sophists are like Proteus in the variety of their transformations, and he, like Menelaus, hopes to restore them to their natural form.

He had arrived at the conclusion that philosophy must be studied. And philosophy is the possession of knowledge; and knowledge must be of a kind which is profitable, and in which knowledge and use coincide. What knowledge is there which is of such a nature? Not the knowledge which is required in any particular art; nor again the art of the composer of speeches, who knows how to write them, but cannot speak them, although he too must be admitted to be a kind of enchanter of wild animals. Neither is the knowledge for which we are searching the knowledge of the general. For the general makes over his prey to the statesman, as the huntsman does to the cook, or the taker of quails to the keeper of quails: he has not the use of that which he acquires. The two inquirers, Cleinias and Socrates, are described as wandering about in a wilderness, vainly searching after the art of life and happiness. At last they fix upon the kingly art, as having the desired sort of knowledge. But the kingly art only gives men those goods which are neither good nor evil: and if we say further that it makes us wise, in what does it make us wise? Not in special arts, such as cobbling or carpentering, but only in itself: or say again that it makes us good, there is no answer to the question, "Good in what?" At length in despair Cleinias and Socrates turn to the "Dioscuri" and request their aid.

Euthydemus argues that Socrates knows something; and as he cannot know and not know, he cannot know some things and not know others, and therefore he knows all things: he and Dionysodorus and all other men know all things. "Do they know shoemaking, etc.?" "Yes." The skeptical Ctesippus would like to have some evidence of this extraordinary statement: he will believe if Euthydemus will tell him how many stumps of teeth Dionysodorus

has, and if Dionysodorus will give him a like piece of information about Euthydemus. Even Socrates is incredulous, and indulges in a little raillery at the expense of the brothers. But he restrains himself, remembering that if the men who are to be his teachers think him stupid they will take no pains with him. Another fallacy is produced which turns on the absoluteness of the verb "to know." And here Euthydemus is caught "napping," and is induced by Socrates to confess that "he does not know the good to be unjust." Socrates recommends him to call his brother Dionysodorus to his assistance, as Heracles called his nephew Iolaus. Dionysodorus rejoins that Iolaus was no more the nephew of Heracles than of Socrates. For a nephew is a nephew, and a brother is a brother, and a father is a father, not of one man only, but of all; nor of men only, but of dogs and sea-monsters. Ctesippus makes merry with the consequences which follow: "Much good has your father got out of the wisdom of his puppies."

But, says Euthydemus, unabashed, "Nobody wants much good." Medicine is a good, arms are a good, money is a good and yet there may be too much of them in wrong places. "No," says Ctesippus, "there cannot be too much gold." "And would you be happy if you had three talents of gold in your belly, a talent in your pate, and a stater in either eye?" Ctesippus, imitating the new wisdom, replies, "And do not the Scythians reckon those to be the happiest of men who have their skulls gilded and see the inside of them?" "Do you see," retorts Euthydemus, "what has the quality of vision or what has not the quality of vision?" "What has the quality of vision." "And you see our garments?" "Yes." "Then our garments have the quality of vision." A similar play of words follows, which is successfully retorted by Ctesippus, to the great delight of Cleinias, who is rebuked by Socrates for laughing at such solemn and beautiful things.

"But are there any beautiful things? And if there are such, are they the same or not the same as absolute beauty?" Socrates replies that they are not the same, but each of them has some beauty present with it. "And are you an ox because you have an ox present with you?" After a few more similar amphiboliae, in which Socrates, like Ctesippus, in self-defense borrows the weapons of the brothers, they both confess that the two heroes are invincible; and the scene concludes with a grand chorus of shouting and laughing, and a panegyrical oration from Socrates.

First, he praises the indifference of Dionysodorus and Euthydemus to public opinion; for most persons would rather be refuted by such arguments than use them in the refutation of others. Secondly, he remarks upon their impartiality; for they stop their own mouths, as well as those of other people. Thirdly, he notes their liberality, which makes them give away their secret to all the world: they should be more reserved, and let no one be present at this exhibition

who does not pay them money; or better still they might practice on one another only. He concludes with a respectful request that they will take him and Cleinias as their disciples.

Crito tells Socrates that he has heard one of the audience criticise severely this wisdom — not sparing Socrates himself for countenancing such an exhibition. Socrates asks what manner of man was this censorious critic. "Not an orator, but a great composer of speeches." Socrates understands that he is an amphibious sort of animal, half philosopher, half politician; one of a class who have the highest opinion of themselves and a spite against philosophers, whom they imagine to be their rivals. They are a class who are very likely to get mauled by Euthydemus and his friends, and have a great notion of their own wisdom; for they imagine themselves to have all the advantages and none of the drawbacks both of politics and of philosophy. They do not understand the principles of combination, and hence are ignorant that the union of two good things which have different ends produces a compound inferior to either of them taken separately.

Crito is anxious about the education of his children, one of whom is growing up. The description of Dionysodorus and Euthydemus suggests to him the reflection that the professors of education are strange beings. Socrates consoles him with the remark that the good in all professions are few, and recommends that "he and his house" should continue to serve philosophy, and not mind about its professors.

There is a stage in the history of philosophy in which the old is dying out, and the new has not yet come into full life. Great philosophies like the Eleatic or Heraclitean, which have enlarged the boundaries of the human mind, begin to pass away in words. They subsist only as forms which have rooted themselves in language — as troublesome elements of thought which cannot be either used or explained away. The same absoluteness which was once attributed to abstractions is now attached to the words which are the signs of them. The philosophy which in the first and second generation was a great and inspiring effort of reflection, in the third becomes sophistical, verbal, eristic.

It is this stage of philosophy which Plato satirizes in the Euthydemus. The fallacies which are noted by him appear trifling to us now, but they were not trifling in the age before logic, in the decline of the earlier Greek philosophies, at a time when language was first beginning to perplex human thought. Besides, he is caricaturing them; they probably received more subtle forms at the hands of those who seriously maintained them. They are patent to us in Plato, and we are inclined to wonder how any one could ever have

been deceived by them; but we must remember also that there was a time when the human mind was only with great difficulty disentangled from such fallacies.

To appreciate fully the drift of the Euthydemus, we should imagine a mental state in which not individuals only, but whole schools during more than one generation, were animated by the desire to exclude the conception of rest, and therefore the very word "thus" from language; in which the ideas of space, time, matter, motion, were proved to be contradictory and imaginary; in which the nature of qualitative change was a puzzle, and even differences of degree, when applied to abstract notions, were not understood; in which contradiction itself was denied; in which, on the one hand, it was affirmed that every predicate was true of every subject, and on the other hand, that no predicate was true of any subject; and that nothing was, or was known, or could be spoken. Let us imagine disputes carried on with religious earnestness and more than scholastic subtlety, in which the catchwords of philosophy are completely detached from their context. To such disputes the humor, whether of Plato in the ancient, or of Pope and Swift in the modern world, is the natural enemy. Nor must we forget that in modern times also there is no fallacy so gross, no trick of language so transparent, no abstraction so barren and unmeaning, no form of thought so contradictory to experience, which has not been found to satisfy the minds of philosophical inquirers at a certain stage, or when regarded from a certain point of view only. The peculiarity of the fallacies of our own age is that we live within them, and are therefore generally unconscious of them.

Aristotle has analyzed several of the same fallacies in his book "De Sophisticis Elenchis," which Plato, with equal command of their true nature, has preferred to bring to the test of ridicule. At first we are only struck with the broad humor of this "reductio ad absurdum:" gradually we perceive that some important questions begin to emerge. Here, as everywhere else, Plato is making war against the philosophers who put words in the place of things, who tear arguments to tatters, who deny predication, and thus make knowledge impossible. Two great truths seem to be indirectly taught through these fallacies: (1) The uncertainty of language, which allows the same words to be used in different meanings, or with different degrees of meaning; (2) The necessary limitation or relative nature of all phenomena. Plato is aware that his own doctrine of ideas (p. 301 A), as well as the Eleatic Being and Not-being, alike admit of being regarded as verbal fallacies (p. 284 A, B).

Contrasted with the exhibition of the Sophists are the two discourses of Socrates in several respects: (1) In their perfect relevancy to the subject of discussion, whereas the Sophistical discourses

are wholly irrelevant; (2) In their inquiring, sympathetic tone, which encourages the youth, instead of "knocking him down," after the manner of the two Sophists; (3) In the absence of any definite conclusion — for while Socrates and the youth are agreed that philosophy is to be studied, they are not able to arrive at any certain result about the art which is to teach it. This is a question which will hereafter be answered in the Republic and the Politicus.

The characters of the Dialogue are easily intelligible. There is Socrates once more in the character of an old man; and his equal in years, Crito, the father of Critobulus, like Lysimachus in the Laches, his fellow demesman (Apol. 33 D), to whom the scene is narrated, and who once or twice interrupts with a remark after the manner of the interlocutor in the Phaedo, and adds his commentary at the end; Socrates makes a playful allusion to his money-getting habits. There is the youth Cleinias, the grandson of Alcibiades, who may be compared with Lysis, Charmides, Menexenus, and other ingenuous youths out of whose mouths Socrates draws his own lessons, and to whom he always seems to stand in a kindly and sympathetic relation. Crito will not believe that Socrates has not improved or perhaps invented the answers of Cleinias (cp. Phaedrus, 275 B). The name of the grandson of Alcibiades, who is described as long dead, τοῦ παλαιοῦ, and who died at the age of forty-four, in the year 404 B. C., suggests not only that the intended scene of the Dialogue could not have been earlier than 404, but that as a fact this Dialogue, which is probably one of the earliest of the Platonic writings, could not have been composed before 390 at the soonest, and probably even later. (See Introd.) Ctesippus, who is the lover of Cleinias, has already been introduced to us in the Lysis, and seems there too to deserve the character which is here given him, of a somewhat uproarious young man. But the chief study of all is the picture of the two brothers, who are unapproached in their effrontery, equally careless of what they say to others and of what is said to them, and never at a loss. They are "Arcades ambo et cantare pares et respondere parati." Some superior degree of wit or subtlety is attributed, however, to Euthydemus, who continues the conversation when Dionysodorus has been put to silence.

The epilogue or conclusion of the Dialogue has been criticised as inconsistent with the general scheme. Such a criticism is like similar criticisms on Shakespeare, and proceeds upon a narrow notion of the variety which the dialogue, like the drama, seems to admit. Plato in the abundance of his dramatic power has chosen to write a play upon a play, just as he often gives us an argument within an argument. At the same time he takes the opportunity of assailing another class of persons who are as alien from the spirit of philosophy as Euthydemus and Dionysodorus. The Eclectic, the Syncretist, the Doctrinaire, have been apt to have a bad name both in

ancient and modern times. The persons whom Plato ridicules in the epilogue to the Euthydemus are of this class. They occupy a border-ground between philosophy and politics; they are free from the dangers of politics, and at the same time use philosophy as a means of serving their own interests. Plato quaintly describes them as making two good things, philosophy and politics, a little worse by perverting the objects of both.

Education is the common subject of all Plato's earlier Dialogues. The concluding remark of Crito, that he has a difficulty in educating his two sons, and the advice of Socrates to him that he should not give up philosophy because he has no faith in philosophers, seems to be a preparation for the more peremptory declaration of the Meno that "Virtue cannot be taught because there are no teachers.

EUTHYDEMUS.

PERSONS OF THE DIALOGUE.

SOCRATES, *who is the narrator of the Dialogue.*
CRITO.
EUTHYDEMUS.
DIONYSODORUS.
CTESIPPUS.
CLEINIAS.

SCENE: — The Lyceum.

Crito. WHO was the person, Socrates, with whom you were talking yesterday at the Lyceum? There was such a crowd around you that I could not get within hearing, but I caught sight of him over their heads, and I made out, as I thought, that he was a stranger with whom you were talking: who was he?

Socrates. There were two, Crito; which of them do you mean?

Cri. The one who was seated second from you on the right-hand side. In the middle was Cleinias the young son of Axiochus, who has wonderfully grown; he is only about the age of my own Critobulus, but he is much forwarder and very good-looking: the other is thin and looks younger than he is.

Soc. He whom you mean, Crito, is Euthydemus; and on my left hand there was his brother Dionysodorus, who also took part in the conversation.

Cri. [1] Neither of them are known to me, Socrates; they are a new importation of Sophists, as I should imagine. Of what country are they, and what is their line of wisdom?

[1] Or, according to the arrangement of Stallbaum: —
Cri. Neither of them are known to me.
Soc. They are a new importation of Sophists, as I imagine.
Cri. Of what country etc.

Soc. As to their origin, I believe that they are natives of this part of the world, and have migrated from Chios to Thurii; they were driven out of Thurii, and have been living for many years past in this region. As to their wisdom, about which you ask, Crito, they are wonderful — consummate! I never knew what the true pancratiast was before; they are simply made up of fighting, not like the two Acarnanian brothers who fight with their bodies only, but this pair are perfect in the use of their bodies and have a universal mode of fighting (for they
272 are capital at fighting in armor, and will teach the art to any one who pays them): and also they are masters of legal fence, and are ready to do battle in the courts; they will give lessons in speaking and pleading, and in writing speeches And this was only the beginning of their wisdom, but they have at last carried out the pancratiastic art to the very end, and have mastered the only mode of fighting which had been hitherto neglected by them; and now no one dares look at them; such is their skill in the war of words, that they can refute any proposition whether true or false. Now I am thinking, Crito, of putting myself in their hands; for they say that in a short time they can impart their skill to any one.

Cri. But, Socrates, are you not too old? there may be reason to fear that.

Soc. Certainly not, Crito; as I will prove to you, for I have the consolation of knowing that they began this art of disputation which I covet, quite, as I may say, in old age; last year, or the year before, they had none of their new wisdom. I am only apprehensive that I may bring the two strangers into disrepute, as I have done Connus the son of Metrobius, the harp-player, who is still my music-master; for when the boys who also go to him see me going, they laugh at me and call him grandpapa's master. Now I should not like the strangers to experience this sort of treatment, and perhaps they may be afraid and not like to receive me because of this; and therefore, Crito, I shall try and persuade some old men to go along with me to them, as I persuaded them to go to Connus, and I hope that you will make one: and perhaps we had better take your sons as a bait; they will want to have them, and will be willing to receive us as pupils for the sake of them.

Cri. I see no objection, Socrates, if you like; but first I wish that you would give me a description of their wisdom, that I may know beforehand what we are going to learn.

Soc. I will tell you at once; for I cannot say that I did not attend: the fact was that I paid great attention to them, and I remember and will endeavor to tell you the whole story. I was providentially sitting alone in the dressing-room of the Lyceum in which you saw me, and was about to depart, when as I was getting up I recognized the familiar divine sign: so I sat down again, and in a little while the two brothers Euthydemus and Dionysodorus came in, and several others with them, whom I believe to be their disciples, and they walked about in the covered space; they had not taken more than two or three turns when Cleinias entered, who, as you truly say, is very much improved: he was followed by a host of lovers, one of whom was Ctesippus the Paeanian, a well-bred youth, but also having the wildness of youth. Cleinias saw me from the entrance as I was sitting alone, and at once came and sat down on the right hand of me, as you describe; and Dionysodorus and Euthydemus, when they saw him, at first stopped and talked with one another, now and then glancing at us, for I particularly watched them; and then Euthydemus came and sat down by the youth, and the other by me on the left hand; the rest anywhere. I saluted the brothers, whom I had not seen for a long time; and then I said to Cleinias: These two men, Euthydemus and Dionysodorus, Cleinias, are not in a small but in a large way of wisdom, for they know all about war, — all that a good general ought to know about the array and command of an army, and the whole art of fighting in armor: and they know about law too, and can teach a man how to use the weapons of the courts when he is injured. 273

They heard me say this, and I was despised by them; they looked at one another, and both of them laughed; and then Euthydemus said: Those, Socrates, are matters which we no longer pursue seriously; they are secondary occupations to us.

Indeed, I said, if such occupations are regarded by you as secondary, what must the principal one be; tell me, I beseech you, what the noble study is?

The teaching of virtue, Socrates, he replied, is our principal occupation; and we believe that we can impart it better and quicker than any man.

My God! I said, and where did you learn that? I always thought, as I was saying just now, that your chief accomplishment was the art of fighting in armor; and this was what I used to say of you, for I remember that this was professed by

you when you were here before. But now if you really have the other knowledge, O forgive me: I address you as I would superior beings, and ask you to pardon the impiety of my former expressions. But are you quite sure about this, 274 Dionysodorus and Euthydemus? the promise is so vast, that a feeling of incredulity will creep in.

You may take our word, Socrates, for the fact.

Then I think you happier in having such a treasure than the great king is in the possession of his kingdom. And please to tell me whether you intend to exhibit this wisdom, or what you will do.

That is why we are come hither, Socrates; and our purpose is not only to exhibit, but also to teach any one who likes to learn.

But I can promise you, I said, that every unvirtuous person will want to learn. I shall be the first; and there is the youth Cleinias, and Ctesippus: and here are several others, I said, pointing to the lovers of Cleinias, who were beginning to gather round us. Now Ctesippus was sitting at some distance from Cleinias; and when Euthydemus leaned forward in talking with me, he was prevented from seeing Cleinias, who was between us; and so, partly because he wanted to look at his love, and also because he was interested, he jumped up and stood opposite to us: and all the other admirers of Cleinias, as well as the disciples of Euthydemus and Dionysodorus, followed his example. And these were the persons whom I showed to Euthydemus, telling him that they were all eager to learn: to which Ctesippus and all of them with one voice vehemently assented, and bid him exhibit the power of his wisdom. Then I said: O Euthydemus and Dionysodorus, I earnestly request you to do myself and the company the favor to exhibit. There may be some trouble in giving the whole exhibition; but tell me one thing, — can you make a good man only of him who is convinced that he ought to learn of you, or of him also who is not convinced? either because he imagines that virtue is not a thing which can be taught at all, or that you two are not the teachers of it. Say whether your art is able to persuade such a one nevertheless that virtue can be taught; and that you are the men from whom he will be most likely to learn.

This is the art, Socrates, said Dionysodorus, and no other.

And you, Dionysodorus, I said, are the men who among those who are now living are the most likely to stimulate him to philosophy and the study of virtue?

Yes, Socrates, I rather think that we are.

Then I wish that you would be so good as to defer the 275
other part of the exhibition, and only try to persuade the youth whom you see here that he ought to be a philosopher and study virtue. Exhibit that, and you will confer a great favor on me and on every one present; for the fact is that I and all of us are extremely anxious that he should be truly good. His name is Cleinias, and he is the son of Axiochus, and grandson of the old Alcibiades, cousin of the Alcibiades that now is. He is quite young, and we are naturally afraid that some one may get the start of us, and turn his mind in a wrong direction, and he may be ruined. Your visit, therefore, is most happily timed; and I hope that you will make a trial of the young man, and converse with him in our presence, if you have no objection.

These were pretty nearly the expressions which I used; and Euthydemus, in a lofty and at the same time cheerful tone, replied: There can be no objection, Socrates, if the young man is only willing to answer questions.

He is quite accustomed to that, I replied; for his friends often come and ask him questions and argue with him; so that he is at home in answering.

What followed, Crito, how can I rightly narrate? for not slight is the task of rehearsing infinite wisdom, and therefore, like the poets, I ought to commence my relation with an invocation to Memory and the Muses. Now Euthydemus, if I remember rightly, began nearly as follows: O Cleinias, are those who learn the wise or the ignorant?

The youth, overpowered by the question, blushed, and in his perplexity looked at me for help; and I, knowing that he was disconcerted, said: Don't be afraid, Cleinias, but answer like a man whichever you think; for my belief is that you will derive the greatest good from their questions.

Whichever he answers, said Dionysodorus, leaning forward in my ear and laughing, I prophesy that he will be refuted, Socrates.

While he was speaking to me, Cleinias gave his answer: the consequence was that I had no time to warn him of the predicament in which he was placed, and he answered that 276
those who learned were the wise.

Euthydemus proceeded: There are those whom you call teachers, are there not?

The boy assented

And they are the teachers of those who learn, — the grammar-master and the lyre-master used to teach you and other boys; and you were the learners?

Yes.

And when you were learners you did not as yet know the things which you were learning?

No, he said.

And were you wise then?

No, indeed, he said.

But if you were not wise you were unlearned?

Certainly.

You then, learning what you did not know, were unlearned when you were learning?

The youth nodded assent.

Then the unlearned learn,[1] and not the wise, Cleinias, as you imagine.

At these words the followers of Euthydemus, of whom I spoke, like a chorus at the bidding of their director, laughed and cheered. Then, before the youth had well time to recover, Dionysodorus took him in hand, and said: Yes, Cleinias; and when the grammar-master dictated to you, were they the wise boys or the unlearned who learned the dictation?

The wise, replied Cleinias.

Then after all the wise are the learners and not the unlearned; and your last answer to Euthydemus was wrong.

Then followed another peal of laughter and shouting, which came from the admirers of the two heroes, who were ravished with their wisdom, while the rest of us were silent and amazed. This Euthydemus perceiving, determined to persevere with the youth; and in order to heighten the effect went on asking another similar question, which might be compared to the double turn of an expert dancer. Do those, said he, who learn, learn what they know, or what they do not know?

Dionysodorus said to me in a whisper: That, Socrates, is just another of the same sort.

Good heavens, I said; and your last question was so good!

Like all our other questions, Socrates, he replied, — inevitable.

I see the reason, I said, why you are in such reputation among your disciples.

Meanwhile Cleinias had answered Euthydemus that those

[1] Omitting *σοφοί*.

who learned, learn what they do not know; and he put him through a series of questions as before.

Don't you know letters?

He assented

All letters?

Yes.

But when the teacher dictates to you, does he not dictate letters?

He admitted that.

Then if you know all letters, he dictates that which you know?

He admitted that also.

Then, said the other, you do not learn that which he dictates; but he only who does not know letters learns?

Nay, said Cleinias; but I do learn.

Then, said he, you learn what you know, if you know all the letters?

He admitted that.

Then, he said, you were wrong in your answer.

The word was hardly out of his mouth when Dionysodorus took up the argument, like a ball which he caught, and had another throw at the youth. Cleinias, he said, Euthydemus is deceiving you. For tell me now, is not learning acquiring knowledge of that which one learns?

Cleinias assented.

And knowing is having knowledge at the time?

He agreed.

And not knowing is not having knowledge at the time?

He admitted that.

And are those who acquire those who have or have not a thing?

Those who have not.

And have you not admitted that those who do not know are of the number of those who have not?

He nodded assent.

Then those who learn are of the class of those who acquire, and not of those who have?

He agreed.

Then, Cleinias, he said, those who do not know learn, and not those who know.

Euthydemus was proceeding to give the youth a third fall; but I knew that he was in deep water, and therefore, as I

wanted to give him a rest, and also in order that he might not get out of heart, I said to him consolingly: You must not be surprised, Cleinias, at the singularity of their mode of speech: this I say because you may not understand what they are doing with you; they are only initiating you after the manner of the Corybantes in the mysteries; and this answers to the enthronement, which, if you have ever been initiated, is, as you will know, accompanied by dancing and sport; and now they are just prancing and dancing about you, and will next proceed to initiate you; and at this stage you must imagine yourself to have gone through the first part of the sophistical ritual, which, as Prodicus says, begins with initiation into the correct use of terms. The two strange gentlemen wanted to explain to you, as you do not know, that the word "to learn" has two meanings, and is used, first, in the sense of acquiring knowledge of some matter of which you previously have no knowledge, and also, when you have the knowledge, in the sense of reviewing this same matter done or spoken by the light of this knowledge; this last is generally called "knowing" rather than "learning;" but the word "learning" is also used, and you did not see that the word is used of two opposite sorts of men, of those who know, and of those who do not know, as they explained. There was a similar trick in the second question, when they asked you whether men learn what they know or what they do not know. These parts of learning are not serious, and therefore I say that these gentlemen are not serious, but only in fun with you. And if a man had all that sort of knowledge that ever was, he would not be at all the wiser; he would only be able to play with men, tripping them up and oversetting them with distinctions of words. He would be like a person who pulls away a stool from some one when he is about to sit down, and then laughs and claps his hands at the sight of his friend sprawling on the ground. And you must regard all that has passed hitherto as merely play. But now I am certain that they will proceed to business, and keep their promise (I will show them how); for they promised to give me a sample of the hortatory philosophy, but I suppose that they wanted to have a game of play with you first. And now, Euthydemus and Dionysodorus, I said, I think that we have had enough of this. Will you let me see you exhibiting to the young man, and showing him how he is to apply himself to the study of virtue and wisdom? And I will first show you what

278

I conceive to be the nature of the task, and what I desire to hear; and if I do this in a very inartistic and ridiculous manner, do not laugh at me, for I only venture to improvise before you because I am eager to hear your wisdom: and I must therefore ask you to keep your countenances, and your disciples also. And now, O son of Axiochus, let me put a question to you: Do not all men desire happiness? And yet, perhaps, this is one of those ridiculous questions which I am afraid to ask, and which ought not to be asked by a sensible man: for what human being is there who does not desire happiness?

There is no one, said Cleinias, who does not.

279 Well, then, I said, since we all of us desire happiness, how can we be happy? — that is the next question. Shall we not be happy if we have many good things? And this, perhaps, is even a more simple question than the first, for there can be no doubt of the answer.

He assented.

And what things do we esteem good? No solemn sage is required to tell us this, which may be easily answered; for every one will say that wealth is a good.

Certainly, he said.

And are not health and beauty goods, and other personal gifts?

He agreed.

Now, can there be any doubt that good birth, and power, and honors in one's own land, are goods?

He assented.

And what other goods are there? I said. What do you say of justice, temperance, courage: do you not verily and indeed think, Cleinias, that we shall be more right in ranking them as goods than in not ranking them as goods? For a dispute might possibly arise about this. What then do you say?

They are goods, said Cleinias.

Very well, I said; and in what company shall we find a place for wisdom — among the goods or not?

Among the goods.

And now, I said, think whether we have left out any considerable goods.

I do not think that we have, said Cleinias.

Upon recollection, I said, indeed I am afraid that we have left out the greatest of them all.

What is that? he asked.

Fortune, Cleinias, I replied; which all, even the most foolish, admit to be the greatest of goods.

True, he said.

On second thoughts, I added, how narrowly, O son of Axiochus, have you and I escaped making a laughing-stock of ourselves to the strangers.

Why do you say that?

Why, because we have already spoken of fortune, and are but repeating ourselves.

What do you mean?

I mean that there is something ridiculous in putting fortune again forward, and saying the same thing twice over.

He asked what was the meaning of this, and I replied: Surely wisdom is good fortune; even a child may know that.

The simple-minded youth was amazed; and, observing this, I said to him: Do you not know, Cleinias, that flute-players are most fortunate and successful in performing on the flute?

He assented.

And are not the scribes most fortunate in writing and reading letters?

Certainly.

Amid the dangers of the sea, again, are any more fortunate on the whole than wise pilots?

None, certainly.

And if you were engaged in war, in whose company would you rather take the risk — in company with a wise general, or with a foolish one?

With a wise one.

And if you were ill, whom would you rather have as a companion in a dangerous illness — a wise physician, or an ignorant one?

A wise one.

You think, I said, that to act with a wise man is more fortunate than to act with an ignorant one?

He assented.

280 Then wisdom always makes men fortunate: for by wisdom no man would ever err, and therefore he must act rightly and succeed, or his wisdom would be wisdom no longer. At last we somehow contrived to agree in a general conclusion, that he who had wisdom had no longer need of fortune. I then recalled to his mind the previous state of the question. You remember, I said, our making the admission that we should be happy and fortunate if many good things were present with us?

He assented.

And should we be happy by reason of the presence of good things, if they profited us not, or if they profited us?

If they profited us, he said.

And would they profit us, if we only had them and did not use them? For example, if we had a great deal of food and did not eat, or a great deal of drink and did not drink, should we be profited?

Certainly not, he said.

Or would an artisan, who had all the implements necessary for his work, and did not use them, be any better for the possession of all that he ought to possess? For example, would a carpenter be any the better for having all his tools and plenty of wood, if he never worked?

Certainly not, he said.

And if a person had wealth, and all the goods of which we were just now speaking, and did not use them; would he be happy because he possessed them?

No indeed, Socrates.

Then, I said, a man who would be happy must not only have the good things, but he must also use them; there is no advantage in merely having them?

True.

Well, Cleinias, but if you have the use as well as the possession of good things, is that sufficient to confer happiness?

Yes, in my opinion.

And may a person use them either rightly or wrongly?

He must use them rightly.

That is quite true, I said. And the wrong use of a thing is far worse than the non-use; for the one is an evil, and the other is neither a good nor an evil. You admit that?

281

He assented.

Now in the working and use of wood, is not that which gives the right use simply the knowledge of the carpenter?

Nothing else, he said.

And surely, in the manufacture of vessels, knowledge is that which gives the right way of making them?

He agreed.

And in the use of the goods of which we spoke at first,— wealth and health and beauty,— is not knowledge that which directs us to the right use of them, and guides our practice about them?

Knowledge, he replied.

Then in every possession and every use of a thing, knowledge is that which gives a man not only good fortune but success?

He assented.

And tell me, I said, O tell me, what do possessions profit a man, if he have neither sense nor wisdom? Would a man be better off, having and doing many things without wisdom, or a few things with wisdom? Look at the matter thus: If he did fewer things would he not make fewer mistakes? if he made fewer mistakes would he not have fewer misfortunes? and if he had fewer misfortunes would he not be less miserable?

Certainly, he said.

And who would do least — a poor man or a rich man?

A poor man.

A weak man or a strong man?

A weak man.

A noble man or a mean man?

A mean man.

And a coward would do less than a courageous and temperate man?

Yes.

And an indolent man less than an active man?

He assented.

And a slow man less than a quick; and one who had dull perceptions of seeing and hearing less than one who had keen ones?

All this was mutually allowed by us.

Then, I said, Cleinias, the sum of the matter appears to be that the goods of which we spoke before are not to be regarded as goods in themselves, but the degree of good and evil in them depends on whether they are or are not under the guidance of knowledge: under the guidance of ignorance, they are greater evils than their opposites, inasmuch as they are more able to minister to the evil principle which rules them; and when under the guidance of wisdom and virtue, they are greater goods; but in themselves they are nothing?

That, he said, appears to be certain.

What then, I said, is the result of all this? Is not this the result — that other things are indifferent, and that wisdom is the only good, and ignorance the only evil?

He assented.

282 Let us consider this further point, I said: Seeing that all men desire happiness, and happiness, as has been

shown, is gained by a use, and a right use, of the things of life, and the right use of them, and good fortune in the use of them, is given by knowledge, the inference is that every man ought by all means to try and make himself as wise as he can?

Yes, he said.

And the desire to obtain this treasure, which is far more precious than money, from a father or a guardian or a friend or a suitor, whether citizen or stranger — the eager desire and prayer to them that they would impart wisdom to you, is not at all dishonorable, Cleinias; nor is any one to be blamed for doing any honorable service or ministration to any man, whether a lover or not, if his aim is wisdom. Do you agree to that, I said.

Yes, he said, I quite agree, and think that you are right.

Yes, I said, Cleinias, if only wisdom can be taught, and does not come to man spontaneously; for that is a point which has still to be considered, and is not yet agreed upon by you and me.

But I think, Socrates, that wisdom can be taught, he said.

Best of men, I said, I am delighted to hear you say that; and I am also grateful to you for having saved me from a long — and tiresome speculation as to whether wisdom can be taught or not. But now, as you think that wisdom can be taught, and that wisdom only can make a man happy and fortunate, will you not acknowledge that all of us ought to love Wisdom, and that you in particular should be of this mind and try to love her?

Certainly Socrates, he said; and I will do my best.

I was pleased at hearing this; and I turned to Dionysodorus and Euthydemus and said: That is an example, clumsy and tedious I admit, of the sort of exhortations which I desire you to offer; and I hope that one of you will set forth what I have been saying in a more artistic style: at any rate take up the inquiry where I left off, and next show the youth whether he should have all knowledge; or whether there is one sort of knowledge only which will make him good and happy, and what that is. For, as I was saying at first, the improvement of this young man in virtue and wisdom is a matter which we have very much at heart.

Thus I spoke, Crito, and was all attention to what was coming. I wanted to see how they would approach the question, and where they would start in their exhortation to the 283

young man that he should practice wisdom and virtue. Dionysodorus the elder spoke first. Everybody's eyes were directed toward him, perceiving that something wonderful might shortly be expected. And certainly they were not far wrong; for the man, Crito, began a remarkable discourse well worth hearing, and wonderfully persuasive as an exhortation to virtue.

Tell me, he said, Socrates and the rest of you who say that you want this young man to become wise, are you in jest or in real earnest?

(I was led by this to imagine that they fancied us to have been jesting when we asked them to converse with the youth, and that this made them jest and play, and being under this impression, I was the more decided in saying that we were in profound earnest.) Dionysodorus said:

Reflect, Socrates; you may have to deny your words.

I have reflected, I said; and I shall never deny my words.

Well, said he, and so you say that you wish Cleinias to become wise?

Undoubtedly.

And he is not wise as yet?

At least his modesty will not allow him to say that he is.

You wish him, he said, to become wise and not to be ignorant?

That we do.

You wish him to be what he is not, and no longer to be what he is.

I was thrown into consternation at this.

Taking advantage of my consternation he added: You wish him no longer to be what he is, which can only mean that you wish him to perish. Pretty lovers and friends they must be who want their favorite not to be, or to perish!

When Ctesippus heard this he got very angry (as a lover might) and said: Strangers of Thurii — if politeness would allow me I should say, You lie ——. What can make you tell such a lie about me and the others, which I hardly like to repeat, as that I wish Cleinias to perish?

Euthydemus replied: And do you think, Ctesippus, that it is possible to tell a lie?

Yes, said Ctesippus; I should be mad to deny that.

284 And in telling a lie, do you tell the thing of which you speak or not?

You tell the thing of which you speak.

And he who tells, tells that thing which he tells, and no ther?

Yes, said Ctesippus.

And that is a distinct thing apart from other things?

Certainly.

And he who says that thing says that which is?

Yes.

And he who says that which is, says the truth. And there- re Dionysodorus, if he says that which is, says the truth of ou and no lie.

Yes, Euthydemus, said Ctesippus; but in saying this, he says hat is not.

Euthydemus answered: And that which is not is not.

True.

And that which is not is nowhere?

Nowhere.

And can any one do anything about that which has no ex- tence, or do to Cleinias that which is not and is nowhere?

I think not, said Ctesippus.

Well, but do rhetoricians, when they speak in the assembly o nothing?

Nay, he said, they do something.

And doing is making?

Yes.

And speaking is doing and making?

He agreed.

Then no one says that which is not, for in saying that, he ould be doing nothing; and you have already acknowledged iat no one can do what is not. And therefore, upon your wn showing, no one says what is false; but if Dionysodorus ays anything, he says what is true and what is.

Yes, Euthydemus, said Ctesippus; but he speaks of things i a certain way and manner, and not as they really are.

Why, Ctesippus, said Dionysodorus, do you mean to say that ny one speaks of things as they are?

Yes, he said, — all gentlemen and truth-speaking persons.

And are not good things good, and evil things evil?

He assented.

And you say that gentlemen speak of things as they are?

Yes.

Then the good speak evil of evil things, if they speak of hem as they are?

Yes, indeed, he said; and they speak evil of evil men. And if I may give you a piece of advice, you had better take care that they don't speak evil of you, since I can tell you that the good speak evil of the evil.

And do they speak great things of the great, rejoined Euthydemus, and warm things of the warm?

Yes, indeed, said Ctesippus; and they speak coldly of the insipid and cold dialectician.

You are abusive, Ctesippus, you are abusive!

Indeed, I am not, Dionysodorus, he replied; for I love you and am giving you friendly advice, and, if I could, would per-
285 suade you not to make so uncivil a speech to me as that I desire my beloved, whom I value above all men, to perish.

I saw that they were getting exasperated with one another, so I made a joke with him and said: O Ctesippus, I think that we must allow the strangers to use language in their own way, and not quarrel with them about words, but be thankful for what they give us. If they know how to destroy men in such a way as to make good and sensible men out of bad and foolish ones — whether this is a discovery of their own, or whether they have learned from some one else, this new sort of death and destruction, which enables them to get rid of a bad man and put a good one in his place — if they know this (and they do know this — at any rate they said just now that this was the secret of their newly-discovered art) — let them, in their phraseology, destroy the youth and make him wise, and all of us with him. But if you young men do not like to trust yourselves with them, then *fiat experimentum in corpore senis;* I will be the Carian on whom they shall operate. And here I offer my old person to Dionysodorus; he may put me into the pot, like Medea the Colchian, kill me, pickle me, eat me, if he will make me good.

Ctesippus said: And I, Socrates, am ready to commit myself to the strangers; they may skin me alive, if they please (and I am pretty well skinned by them already), if only my skin is made at last, not like that of Marsyas, into a leathern bottle, but into a piece of virtue. And here is Dionysodorus fancying that I am angry with him, when I am really not angry at all; I do but contradict him when he seems to me to be in the wrong: and you must not confound abuse and contradiction, O illustrious Dionysodorus; for they are quite different things.

Contradiction! said Dionysodorus; why, there never was ch a thing.

Certainly there is, he replied; there can be no question of at. Do you, Dionysodorus, maintain that there is not?

You will never prove to me, he said, that you have heard y one contradicting any one else.

Indeed, he said: then now you may hear Ctesippus contra- cting Dionysodorus. Are you prepared to make that good?

Certainly, he said.

Well, then, are not words expressive of things?

Yes.

Of their existence or of their non-existence?

Of their existence. For, as you may remember, Ctesip- 286
s, we just now proved that no man could affirm a nega- ve; for no one could affirm that which is not.

And what does that signify, said Ctesippus; you and I may ntradict all the same for that.

But can we contradict one another, said Dionysodorus, when ch of us are describing the same thing? Then we must rely be speaking the same thing?

He admitted that.

Or when neither of us is speaking of the same thing? For en neither of us says a word about the thing at all?

He granted that also.

But when I describe something and you describe another ing, or I say something and you say nothing, is there any ntradiction? How can he who speaks contradict him who eaks not?

Here Ctesippus was silent; and I in my astonishment said: 'hat do you mean, Dionysodorus? I have often heard, and ve been amazed, to hear this thesis of yours, which is main- ined and employed by the disciples of Protagoras, and others fore them, and which to me appears to be quite wonderful and icidal, as well as destructive, and I think that I am most kely to hear the truth of this from you. The dictum is that ere is no such thing as falsehood; a man must either say hat is true or say nothing. Is not that your position?

He assented.

But if he cannot speak falsely, may he not think falsely?

No, he cannot, he said.

Then there is no such thing as false opinion?

No, he said.

Then there is no such thing as ignorance, or men who are ignorant; for is not ignorance, if there be such a thing, a mistake of facts?

Certainly, he said.

And that is impossible?

Impossible, he replied.

Are you saying this as a paradox, Dionysodorus; or do you seriously maintain that no man is ignorant?

Do you refute me? he said.

But how can I refute you, if, as you say, falsehood is impossible?

Very true, said Euthydemus.

Neither did I tell you just now to refute me, said Dionysodorus; for how can I tell you to do that which is not?

O Euthydemus, I said, I have but a dull conception of these subtleties and excellent devices of wisdom; I am afraid that I hardly understand them, and you must forgive me therefore if I
287 ask a very stupid question: if there be no falsehood or false opinion or ignorance, there can be no such thing as erroneous action, for a man cannot fail of acting as he is acting — that is what you mean?

Yes, he replied.

And now, I said, I will ask my stupid question: If there is no such thing as error in deed, word, or thought, then what, in the name of goodness, do you come hither to teach? And were you not just now saying that you could teach virtue best of all men, to any one who could learn?

And are you such an old fool, Socrates, rejoined Dionysodorus, that you bring up now what I said at first — and if I had said anything last year, I suppose that you would bring that up — but are nonplused at the words I have just uttered?

Why, I said, they are not easy to answer; for they are the words of wise men: and indeed I have a great difficulty in knowing what you mean in that last expression of yours, "That I am nonplused at them." What do you mean by that, Dionysodorus? You must mean that I have no refutation of them. Tell me if the words have any other sense.

No, he said; the sense or meaning of them is that there is a difficulty in answering them; and I wish that you would answer.

What, before you, Dionysodorus? I said.

Answer, said he.

And is that fair?

Yes, quite fair, he said.

Upon what principle? I said. I can only suppose that you re a very wise man, who comes to us in the character of a reat logician, and who know when to answer and when not to nswer — and now you won't open your mouth at all, because ou know that you ought not.

You prate, he said, instead of answering. But if, my good r, you admit that I am wise, answer as I tell you.

I suppose that I must obey, for you are master. Put the uestion.

Are the things which have sense alive or lifeless?

They are alive.

And do you know of any word which is alive?

I cannot say that I do.

Then why did you ask me what sense my words had?

Why, because I was stupid and made a mistake. And yet, erhaps, I was right after all in saying that words have a sense; hat do you say, wise man? If I was not in error, and you o not refute me, all your wisdom will be nonplused; but if did fall into error, then again you are wrong in saying that iere is no error, — and this remark was made by you ot quite a year ago. I am inclined to think, however, 288 ionysodorus and Euthydemus, that this argument is not very kely to advance: even your skill in the subtleties of logic, hich is really amazing, has not found out the way of throwing nother and not falling yourself.

Ctesippus said: Men of Chios, Thurii, or however and whatver you call yourselves, I wonder at you, for you seem to have o objection to talking nonsense.

Fearing that there would be high words, I endeavored to oothe Ctesippus, and said to him: To you, Ctesippus, I must epeat what I said before to Cleinias — that you don't underand the peculiarity of these philosophers. They are not erious, but, like the Egyptian wizard, Proteus, they take difrent forms and deceive us by their enchantments: and let us, ke Menelaus, refuse to let them go until they show us their eal form and character. When they are in earnest their full eauty will appear: let us then beg and entreat and beseech hem to shine forth. And I think that I had better show them nce more the form in which I pray to behold them. I will go

on where I left off before, as well as I can, in the hope that I may touch their hearts and move them to pity, and that when they see me deeply serious, they may also be serious. You, Cleinias, I said, shall remind me at what point we left off. Did we not agree that philosophy should be studied? and was not that our conclusion?

Yes, he replied.

And philosophy is the acquisition of knowledge?

Yes, he said.

And what knowledge ought we to acquire? Is not the simple answer to that, A knowledge that will do us good?

Certainly, he said.

And should we be any the better if we went about having a knowledge of the places where most gold was hidden in the earth?

Perhaps we should, he said.

But have we not already proved, I said, that we should be none the better off, even if without trouble and digging all the gold that there is in the earth were ours? And if we knew how
289 to convert stones into gold, the knowledge would be of no value to us, unless we also knew how to use the gold? Do you not remember? I said.

I quite remember, he said.

Nor would any other knowledge, whether of money-making, or of medicine, or of any other art which knows only how to make a thing, and not to use that which is made, be of any use to us. Is not that true?

He agreed.

And if there were a knowledge which was able to make men immortal, without giving them the knowledge of the way to use the immortality, neither would there be any use in that, if we may argue from the analogy of the previous instances?

To all this he agreed.

Then, my dear boy, I said, the knowledge which we want is one that uses as well as makes?

True, he said.

And our desire is not to be skillful lyre-makers, or artists of that sort; far otherwise: for with them the art which makes is one, and the art which uses is another. Having to do with the same, they are divided; for the art which makes and the art which plays on the lyre differ widely from one another. Am I not right?

He agreed.

And clearly we do not want the art of the flute-maker; for that is another of the same sort?

He assented.

But suppose, I said, that we were to learn the art of making speeches — would that be the art which would make us happy?

I think not, rejoined Cleinias.

And what proof have you of that? I asked.

I see, he replied, that there are some composers of speeches who do not know how to use the speeches which they make, just as the makers of lyres do not know how to use the lyres; and also some who are of themselves unable to compose speeches, but are able to use the speeches which the others make for them; and this proves that the art of making speeches is not the same as the art of using them.

Yes, I said; and that I think is a sufficient proof that the art of making speeches is not one which will make a man happy. And yet I did think that the art which we are seeking might be discovered in that direction; for the composers of speeches, whenever I meet them, always appear to me to be very extraordinary men, Cleinias, and their art is lofty and divine, and no wonder. For their art is a part of the great art of enchantment, and hardly, if at all, inferior to it: and whereas the art of the enchanter is a mode of charming snakes and spiders and scorpions, and other monsters and pests, this art acts upon dicasts and ecclesiasts and bodies of men, for the charming and consoling of them. Do you agree with me? 290

Yes, he said, I think that you are quite right.

Whither then shall we go, I said, and to what art shall we have recourse?

I do not see my way, he said.

But I think that I do, I replied.

And what is your notion? asked Cleinias.

I think that the art of the general is the one the possession of which is most likely to make a man happy.

I do not think that, he said.

Why not? I said.

The art of the general is surely an art of hunting mankind.

What of that? I said.

Why, he said, no art of hunting extends beyond hunting and capturing; and when the prey is taken they cannot use it; but

the huntsman or fisherman hands it over to the cook, and the geometricians and astronomers and calculators (who all belong to the hunting class, for they do not make their diagrams, but only find out that which was previously contained in them), — they, I say, not being able to use but only to catch their prey, hand over their inventions to the dialecticians to be applied by them, if they have any sense in them.

Good, I said, fairest and wisest Cleinias. And is this true?

Certainly, he said; just as a general when he takes a city or a camp, hands over his new acquisition to the statesman, for he does not know how to use them himself; or as the quail-taker transfers the quails to the keeper of them. If we are looking for that art which is to make us blessed, and which is able to use that which it makes or takes, the art of the general is not the one, and some other must be found.

Cri. And do you mean to say, Socrates, that the youngster said that?

Soc. Are you incredulous, Crito?

Cri. Indeed, I am; for if he said that, I am of opinion that he needs neither Euthydemus nor any one else to be his instructor.

Soc. Perhaps I may have forgotten, and Ctesippus was the real answerer.

291 *Cri.* Ctesippus! nonsense.

Soc. All I know is that I heard these words, and that they were not spoken either by Euthydemus or Dionysodorus. I dare say, my good Crito, that they may have been spoken by some superior person. That I heard them I am certain.

Cri. Yes, indeed, Socrates, by some one a good deal superior, as I should be disposed to think. But did you carry the search any further, and did you find the art which you were seeking?

Soc. Find! my dear sir, no indeed. And we cut a poor figure; we were like children after larks, always on the point of catching the art, which was always getting away from us. But why should I repeat the whole story? At last we came to the kingly art, and inquired whether that gave and caused happiness, and then we got into a labyrinth, and when we thought we were at the end, came out again at the beginning, having still to seek as much as ever.

Cri. How did that happen, Socrates?

Soc. I will tell you; the kingly art was identified by us with the political.

Cri. Well, and what came of that?

Soc. To this royal or political art all the arts, including that of the general, seemed to render up the supremacy, as to the only one which knew how to use that which they created. This seemed to be the very art which we were seeking — the art which is the source of good government, and which may he described, in the language of Aeschylus, as alone sitting at the helm of the vessel of state, piloting and governing all things, and utilizing them.

Cri. And were you not right, Socrates?

Soc. You shall judge, Crito, if you are willing to hear what followed; for we resumed the inquiry, and a question of this sort was asked: Does this kingly art, having this supreme authority, do anything for us? To be sure was the answer. And would not you, Crito, say the same?

Cri. Yes, I should.

Soc. And what would you say that the kingly art does? If medicine were supposed to have supreme authority over the subordinate arts, and I were to ask you a similar question about that, you would say that it produces health?

Cri. I should.

Soc. And what of your own art of husbandry, supposing that to have supreme authority over the subject arts — what does that do? Does it not supply us with the fruits of the earth? 292

Cri. Yes.

Soc. And what does the kingly art do when invested with supreme power? Perhaps you may not be ready with an answer?

Cri. Indeed I am not, Socrates.

Soc. No more were we, Crito. But at any rate you know that if this is the art which we were seeking, it ought to be useful?

Cri. Certainly.

Soc. And surely it ought to do us some good?

Cri. Certainly, Socrates.

Soc. And Cleinias and I had arrived at the conclusion that knowledge is the only good?

Cri. Yes, that was what you were saying.

Soc. All the other results of politics, and they are many, as for example, wealth, freedom, tranquillity, were neither good nor evil in themselves; but the political science ought to make us wise, and impart wisdom to us, if that is the science which is likely to do us good, and make us happy.

Cri. Yes; that was the conclusion at which you had arrived, according to your report of the conversation.

Soc. And does the kingly art make men wise and good?

Cri. Why not, Socrates?

Soc. What, all men, and in every respect? and teach them all the arts, — carpentering, and cobbling, and the rest of them?

Cri. I do not think that, Socrates.

Soc. But then what is this knowledge, and what are we to do with it? For it is not the source of any works which are neither good nor evil, nor of any knowledge, but the knowledge of itself; what then can it be, and what are we to do with it? Shall we say, Crito, that it is the knowledge by which we are to make other men good?

Cri. By all means.

Soc. And in what way will they be good and useful? Shall we repeat that they will make others good, and that these others will make others again, without ever determining in what they are to be good; for we put aside the results of politics, as they are called. Why, here is iteration; as I said, we are just as far, if not farther, than ever from the knowledge of the art or science of happiness.

Cri. Indeed, Socrates, you do appear to have got into a great perplexity.

Soc. Thereupon, Crito, seeing that I was on the point of
293 shipwreck, I lifted up my voice, and earnestly entreated and called upon the strangers to save me and the youth from the whirlpool of the argument; they were our Castor and Pollux, I said, and they should be serious, and show us in sober earnest what that knowledge was which would enable us to pass the rest of our lives in happiness.

Cri. And did Euthydemus show you this knowledge?

Soc. Yes, indeed; he proceeded in a lofty strain to the following effect: Would you rather, Socrates, said he, that I should show you this knowledge about which you are doubting, or shall I prove that you already have it?

What, I said, are you blessed with such a power as this?

Indeed I am.

Then I would much rather that you should prove me to have such a knowledge; at my time of life that will be more agreeable than having to learn.

Then tell me, he said, do you know anything?

Yes, I said, I know many things, but not anything of much importance.

That will do, he said. And would you admit that anything is what it is, and at the same time is not what it is?

Certainly not.

And did you not say that you knew something?

I did.

If you know, you are knowing.

Certainly, of the knowledge which I have.

That makes no difference; and must you not, if you are knowing, know all things?

Certainly not, I said, for there are many other things which I do not know.

And if you do not know, you are not knowing.

Yes, my friend, I said, I am not knowing of that which I do not know.

Still you are not knowing, and you said just now that you were knowing; and therefore you are and are not at the same time, and in reference to the same things.

That sounds well, Euthydemus; and yet I must ask you to explain how I have that knowledge which we were seeking; since a thing cannot be and not be, and if I know one thing I know all, for I cannot be knowing and not knowing at the same time, and if I know all things, I must have that knowledge as well. May I not assume that to be your ingenious notion?

Out of your own mouth, Socrates, you are convicted, he said.

Well, but, Euthydemus, I said, has that never happened to you; for if I am only in the same case as you and our beloved Dionysodorus, I cannot greatly mind that. Tell me then, you two, do you not know some things, and not know others?

Certainly not, Socrates, said Dionysodorus.

What do you mean, I said; do you know nothing?

Nay, he replied, we do know something.

Then, I said, you know all things, if you know anything? 294

Yes, all things, he said; and that is as true of you as of us.

O, indeed, I said, what a wonderful thing, and what a great blessing! And do all other men know all things or nothing?

Certainly, he replied; they cannot know some things, and not know others, and be at the same time knowing and not knowing.

Then what is the inference? I said.

They all know all things, he replied, if they know one thing.

O heavens, Dionysodorus, I said, I see now that you are in earnest; hardly have I got you to that point. And do you really know all things, including carpentering and leather-cutting?

Certainly, he said.

And do you know stitching?

Yes, indeed we do.

And cobbling, too?

Yes.

And do you know things such as the numbers of the stars and of the sand?

Certainly; did you think that we should say No to that?

By Zeus, said Ctesippus, interrupting, I only wish that you would give me some proof which would enable me to know whether you say truly.

What proof shall I give you? he said.

Will you tell me how many teeth Euthydemus has? and Euthydemus shall tell how many teeth you have.

Will you not take our word that we know all things?

Certainly not, said Ctesippus; you must further tell us this one thing, and then we shall know that you are speaking the truth; if you tell us the number, and we count them, and you are found to be right, we will believe the rest. They fancied that Ctesippus was making game of them, and they refused, and contented themselves with saying, in answer to each of his questions, that they knew all things. Ctesippus at last began to throw off all restraint; no question was too bad for him; he would ask them if they knew the foulest things, and they, like wild boars, came rushing on his blows, and fearlessly replied that they did. At last, Crito, I too was carried away by my incredulity, and asked Euthydemus whether Dionysodorus could dance.

Certainly, he replied.

And can he vault upon swords, and turn upon a wheel, at his age? has he got to such a height of skill as that?

He can do anything, he said.

And did you always know this?

Always, he said.

When you were children, and at your birth?

295 They both said that they did.

This we could not believe. And Euthydemus said: You are incredulous, Socrates.

Yes, I said, and I might well be incredulous, if I did not know that you are wise men.

But if you will answer, he said, I will make you confess to similar marvels.

Well, I said, there is nothing that I should like better than to be self-convicted of this, for if I am really a wise man, which I never knew before, and you will prove to me that I know and have always known all things, there is nothing in life that would be a greater gain to me than that.

Answer then, he said.

Ask, I said, and I will answer.

Do you know something, Socrates, or nothing?

Something, I said.

And do you know with what you know, or with something else?

With what I know; and I suppose that you mean with my soul?

Are you not ashamed, Socrates, of asking a question when you are asked?

Well, I said; but then what am I to do? for I will do what you bid; when I do not know what you are asking, you tell me to answer nevertheless, and not to ask again.

Why, you surely have some notion of my meaning, he said.

Yes, I replied.

Well then answer according to your notion of my meaning.

Yes, I said; but if the question which you ask in one sense is understood and answered by me in another, will that please you — if I answer what is not to the point?

That will please me very well; but will not please you equally well, as I imagine.

I certainly will not answer unless I understand you, I said.

You won't answer, he said, according to your view of the meaning, because you are an old fool and pedant.

Now I saw that he was getting angry with me for drawing distinctions, when he wanted to catch me in his springes of words. And I remembered that Connus was always angry with me when I opposed him, and then he neglected me, because he thought that I was stupid; and as I was intending to go to Euthydemus as a pupil, I thought that I had better let him have his way, as he might think me a blockhead, and refuse to take me. So I said: You are a far better dialectician than myself, Euthydemus, for I have never made a profession

of the art, and therefore do as you say; ask your questions once more, and I will answer.

Answer then, he said, once more, whether you know what you know with something, or with nothing.

Yes, I said; I know with my soul.

296 The man will go on adding to the question; for, said he, I did not ask you with what you know, but whether you know with something.

My ignorance, I said, led me to answer more than you asked, and I hope that you will forgive that. And now I will answer simply that I always know what I know with something.

And is that something, he rejoined, always the same, or sometimes one thing, and sometimes another thing?

Always, I replied, when I know, I know with this.

Will you not cease adding to your answers?

My fear is that this word "always" may get us into trouble.

You, perhaps, but certainly not us. And now answer: Do you always know with this?

Always; since I am required to withdraw the words "When I know."

You always know with this, or, always knowing, do you know some things with this, and some things with something else, or do you know all things with this?

All that I know, I replied, I know with this.

There again, Socrates, he said, the addition is superfluous.

Well, then, I said, I will take away the words, "That I know."

Nay, take nothing away; I desire no favors of you; but let me ask: Would you be able to know all things, if you did not know all things?

Quite impossible.

And now, he said, you may add on whatever you like, for you confess that you know all things.

I suppose that is true, I said, if my qualification implied in the words, "That I know," is not allowed to stand; and so I do know all things.

And have you not admitted that you always know all things with that which you know, whether you make the addition of when you know them or not? for you have acknowledged that you have always and at once known all things, that is to say, when you were a child, and at your birth, and when you were

growing up, and before you were born, and before the heaven and earth existed, you knew all things, if you always know them; and I swear that you shall always continue to know them, if I am of the mind to make you.

But I hope that you will be of that mind, reverend Euthydemus, I said, if you are really speaking the truth, and yet I a little doubt your power to accomplish this unless you have the help of your brother Dionysodorus; then you may do it. Tell me now, for although in the main I cannot doubt that I really do know all things, when I am told so by men of your prodigious wisdom — how can I say that I know such things as this, Euthydemus, that the good are unjust: come, do I know that or not?

Certainly, you know that.

What do I know?

That the good are not unjust.

Quite true, I said; and I have always known that; but the question is, where did I learn that the good are unjust? 297

Nowhere, said Dionysodorus.

Then, said I, I do not know this.

You are ruining the argument, said Euthydemus to Dionysodorus: he will be proved not to know, and then after all he will be knowing and not knowing at the same time.

Dionysodorus blushed.

I turned to the other, and said, What do you think, Euthydemus? Does not your omniscient brother appear to you to have made a mistake?

What, replied Dionysodorus in an instant; am I the brother of Euthydemus?

Thereupon I said, Please not to interrupt, my good friend, or prevent Euthydemus from proving to me that I know the unjust to be the good; such a lesson you might at least allow me to learn.

You are running away, Socrates, said Dionysodorus, and refusing to answer.

No wonder, I said, for I am not a match for one of you, and *à fortiori* I must run away from two. I am no Heracles; and even Heracles could not fight against the Hydra, who was a she-Sophist, and had the wit to shoot up many new heads when one of them was cut off; especially when he saw a second monster of a sea-crab, who was also a Sophist, and appeared to

have newly arrived from a sea voyage, bearing down upon him from the left, opening his mouth and biting. Then he called Iolaus, his nephew, to his help, and he ably succored him; but if my Iolaus, who is Patrocles the statuary, were to come, he would make a bad business worse.

And now that you have delivered yourself of this strain, said Dionysodorus, will you inform me whether Iolaus was the nephew of Heracles any more than he is yours?

I suppose that I had best answer you, Dionysodorus, I said, for you will insist on asking — that I pretty well know — out of envy, in order to prevent me from learning the wisdom of Euthydemus.

Then answer me, he said.

Well then, I said, I have only to say in answer, that Iolaus was not my nephew at all, but the nephew of Heracles; and his father was not my brother Patrocles, but Iphicles, who has a name rather like his, and was the brother of Heracles.

And is Patrocles, he said, your brother?

Yes, I said, he is my half-brother, the son of my mother, but not of my father.

Then he is and is not your brother.

Not by the same father, my good man, I said, for Chaeredemus was his father, and mine was Sophroniscus.

And was Sophroniscus and Chaeredemus a father?

Yes, I said; the former was mine, and the latter his father.

298 Then, he said, Chaeredemus is not a father.

He is not my father, I said.

But can a father be other than a father? or are you the same as a stone?

I certainly do not think that I am a stone, I said, though I am afraid that you may prove me one.

Are you not other than a stone?

I am.

And being other than a stone, you are not a stone; and being other than gold, you are not gold.

Very true.

And so Chaeredemus, he said, being other than a father, is not a father.

I suppose that he is not a father, I replied.

For if, said Euthydemus, taking up the argument, Chaeredemus is a father, then Sophroniscus, being other than a father, is not a father; and you, Socrates, are without a father.

Ctesippus retorted: And is not your father in the same case, : he is other than my father?

Assuredly not, said Euthydemus.

Then he is the same?

He is the same.

I cannot say that I like the connection; but is he only my ther, Euthydemus, or is he the father of all other men?

Of all other men, he replied. Do you suppose that he is a ther and not a father?

Certainly, I did imagine that, said Ctesippus.

And do you suppose that gold is not gold, or that a man is t a man?

They are not *in pari materia*, Euthydemus, said Ctesippus, d you had better take care, for it is monstrous to suppose at your father is the father of all.

But he is, he said.

What, of men only, said Ctesippus, or of horses and all other imals?

Of all, he said.

And your mother, too, is the mother of all?

Yes, our mother too.

Yes; and your mother has a progeny of sea-urchins then?

Yes; and yours, he said.

And gudgeons and puppies and pigs are your brothers.

And yours too.

And your papa is a dog.

And so is yours, he said.

If you will answer my questions, said Dionysodorus, I will on extract the same admissions from you, Ctesippus. You y that you have a dog.

Yes, a villain of a one, said Ctesippus.

And he has puppies?

Yes, and they are very like himself.

And the dog is the father of them?

Yes, he said, I certainly saw him and the mother of the pupes come together.

And is he not yours?

To be sure he is.

Then he is a father, and he is yours; ergo, he is your father, d the puppies are your brothers.

Let me ask you one little question more, said Dionysodorus, ickly interposing, in order that Ctesippus might not get in his ord: You beat this dog?

Ctesippus said, laughing, Indeed I do; and I only wish that I could beat you instead of him.

Then you beat your father, he said.

299 I should have had far more reason to beat yours, said Ctesippus; what could he have been thinking of when he begat such wise sons? much good has this father of you and other curs got out of your wisdom.

But neither he nor you, Ctesippus have any need of much good.

And have you no need, Euthydemus? he said.

Neither I nor any other man; for tell me now, Ctesippus, if you think it good or evil for a man who is sick to drink medicine when he wants it; or to go to war armed rather than unarmed.

Good, I say. And yet I know that I am going to be caught in one of your charming puzzles.

That, he replied, you will discover, if you answer; for seeing that you admitted medicine to be good for a man to drink, when wanted, must it not be good for him to drink as much as possible — a cart-load of hellebore will not be too much for him?

Ctesippus said: Certainly not, Euthydemus, if he who drinks be as big as the statue of Delphi.

And if, he said, in war it be good to have arms, he ought to have as many spears and shields as possible?

Very true, said Ctesippus; and do you think that he ought to have one shield only, Euthydemus, and one spear?

I do.

And would you arm Geryon and Briareus in that way?

Considering the skill which you and your companion have in fighting in armor, I thought that you would have known better. Here Euthydemus held his peace, and Dionysodorus returned to the previous answer.

Don't you think the possession of gold is good?

Yes, said Ctesippus, and the more the better.

And to have money everywhere and always is a good?

Certainly a great good, he said.

And you admit that gold is a good?

I have admitted that, he replied.

And ought not a man then to have gold everywhere and always, and as much as possible in himself, and may he not be deemed the happiest of men who has three talents of gold in his belly, and a talent in his head, and a stater of gold in either eye?

Yes, Euthydemus, said Ctesippus; and the Scythians count them the happiest and bravest of men who have gold in their own skulls (that is only another instance of your manner of speaking about the dog and father), and what is still more extraordinary, they drink out of their own skulls gilt, and see the inside of them, and hold their own head in their hands.

And do the Scythians and others see that which has the quality of vision, or that which has not? said Euthydemus. 300

That which has the quality of vision clearly.

And [1] you also see that which has the quality of vision? he said.

Yes, I do.

Then do you see our garments?

Yes.

Then our garments have the quality of vision.

They can see to any extent, said Ctesippus.

What can they see?

Nothing; but you, my sweet man, may perhaps imagine that they do not see; and certainly, Euthydemus, you do seem to me to have been caught napping when you were not asleep, and that if it be possible to say and say nothing — that is what you are doing.

And may not a person speak and be silent? said Dionysodorus.

Impossible, said Ctesippus.

Or be silent and speak.

That is still more impossible, he said.

But when you speak of stones, wood, iron bars, do you not speak (of them) silent?

Not when I pass a smithy; for then the iron bars make a tremendous noise and outcry if they are touched: so that here your wisdom is strangely mistaken; please, however, to tell me how you can be silent when speaking (I thought that Ctesippus was put upon his mettle because Cleinias was present).

When you are silent, said Euthydemus, are you not silent about all things?

Yes, he said.

Then the speaking are silent, if speaking things are included in all things.

What, said Ctesippus, are not all things silent?

[1] Note: the ambiguity of *δυνατὰ ὁρᾶν, σιγῶντα λέγειν* cannot be perfectly rendered in English.

Certainly not, said Euthydemus.

Then, my good friend, do they all speak?

Yes; those which speak.

Nay, said Ctesippus, but the question which I ask is whether all things are silent or speak?

Neither and both, said Dionysodorus, quickly interposing; I am sure that you will be "nonplused" at that answer.

Here Ctesippus, as his manner was, burst into a roar of laughter; he said, That brother of yours, Euthydemus, has got into a dilemma; all is over with him. This delighted Cleinias, whose laughter made Ctesippus ten times as uproarious; but I cannot help thinking that the rogue must have picked up this answer from them; for there has been no wisdom like theirs in our time. Why do you laugh, Cleinias, I said, at such solemn and beautiful things?

Why, Socrates, said Dionysodorus, did you ever see a beautiful thing?

301 Yes, Dionysodorus, I replied, I have seen many.

Were they other than the beautiful, or the same as the beautiful?

Now I was in a great quandary at having to answer this question, and I thought that I was rightly served for having opened my mouth at all: I said however, They are not the same as absolute beauty, but they have beauty present with each of them.

And are you an ox because an ox is present with you, or are you Dionysodorus because Dionysodorus is present with you?

I don't like to hear you say that, I replied.

But how, he said, by reason of one thing being present with another, will one thing be another?

Is that your difficulty? I said. For I was beginning to imitate their skill, on which my heart was set.

Yes, he answered, and I and all the world are in a difficulty about the non-existent.

What do you mean, Dionysodorus, I said. Is not the honorable honorable and the base base?

That, he said, is as I please.

And do you please?

Yes, he said.

Also you will admit that the same is the same, and the other other; for surely the other is not the same; I should imagine

that even a child will hardly have any difficulty about this. But, I think, Dionysodorus, that you must have intentionally missed the last question; for in general you seem to me to be a good workman, and to do the dialectician's business excellently well.

What, said he, is the business of a good workman? tell me, in the first place, whose business is hammering?

The smith's.

And whose the making of pots?

The potter's.

And who has to kill and skin and mince and boil and cook?

The cook, I said.

And if a man does his business he does rightly?

Certainly.

And the business of the cook is to cut up and skin; you have admitted that?

Yes, I have admitted that; but you must not be too severe upon me.

Then if some one were to kill, mince, boil, roast the cook, he would do his business, and if he were to hammer the smith, and pot the potter, he would do their business.

Poseidon, I said, this is the crown of wisdom; can I ever hope to have such wisdom of my own?

And would you be able, Socrates, to recognize this wisdom when it has become your own?

Certainly, I said, if you will allow me.

What, he said, do you think that you know what is your own?

Yes, I do, subject to your correction; for you are the bottom, and Euthydemus is the top, of all my wisdom.

Is not that which you would deem your own, he said, that which you have in your own power, and which you are 302
able to use as you would desire, for example, an ox or a sheep: would you not think that your own which you could sell and give and sacrifice to any god whom you pleased, and that which you could not give or sell or sacrifice you would think not to be in your own power?

Yes, I said (for I was certain that something good would come of the questions, which I was impatient to hear); yes, such things only are mine.

Yes, he said, and you would mean by animals living beings?

Yes, I said.

You admit then, that those animals only are yours with which you have the power to do all these things which I was just naming.

I admit that.

Then, after an ironical pause, in which he seemed to be thinking of something great, he said: Tell me, Socrates, have you an ancestral Zeus? Here anticipating the final move which was to inclose me in the net, in the attempt to get away, I gave a desperate twist and said: No, Dionysodorus, I have not.

What a miserable man you must be then, he said; you are not an Athenian if you have no ancestral gods or temples, or any other good.

Nay, Dionysodorus, I said, do not be rough; good words, if you please; in the way of religion I have altars and temples, domestic and ancestral, and all that other Athenians have.

And have not other Athenians, he said, an ancestral Zeus?

That name, I said, is not to be found among the Ionians, whether colonists or citizens of Athens; an ancestral Apollo there is, who is the father of Ion, and a family Zeus, and a Zeus guardian of the phratry, and an Athene guardian of the phratry. But the name of ancestral Zeus is unknown to us.

No matter, said Dionysodorus, for you admit that you have Apollo, Zeus, and Athene.

Certainly, I said.

And they are your gods, he said.

Yes, I said, my lords and ancestors.

At any rate they are yours, he said, did you not admit that?

I did, I said; what is going to happen to me?

And are not these gods animals? For you admit that all things which have life are animals; and have not these gods life?

They have life, I said.

And are they not animals?

They are animals, I said.

And you admitted that of animals those are yours which you could give away or sell or offer in sacrifice, as you pleased?

I did admit that, Euthydemus, and I have no way of escape.

Well, then, said he, if you admit that Zeus and the other
303 gods are yours, can you sell them or give them away, or do what you will with them, as you would with other animals?

At this I was quite struck dumb, Crito, and lay prostrate. Ctesippus came to the rescue.

Bravo, Heracles, brave words, said he.

Bravo Heracles, or is Heracles a bravo? said Dionysodorus.

Poseidon, said Ctesippus, what awful distinctions. I will have no more of them; the pair are invincible.

Then, my dear Crito, there was universal applause of the speakers and their words, and what with laughing and clapping of hands and rejoicings the two men were quite overpowered; for hitherto only their partisans had cheered at each successive hit, but now the whole company shouted with delight until the columns of the Lyceum returned the sound, seeming almost to sympathize in their joy. To such a pitch was I affected myself, that I made a speech, in which I acknowledged that I had never seen the like of their wisdom; I was their devoted servant, and fell to praising and admiring of them. What marvelous dexterity of wit, I said, enabled you to acquire this great perfection in such a short time? There is much, indeed, to admire in your words, Euthydemus and Dionysodorus, but there is nothing that I admire more than your magnanimous disregard of any opinion, — whether of the many, or of the grave and revcrend seigniors, — which is not the opinion of those who are like-minded with you. And I do verily believe that there are few who are like you, and would approve of your arguments; the majority of mankind are so ignorant of their value, that they would be more ashamed of employing them in the refutation of others than of being refuted by them. I must further express my approval of your kind and public-spirited denial of all differences, whether of good and evil, white or black, or any otner; the result of which is that, as you say, every mouth is stopped, not excepting your own, which graciously follows the example of others; and thus all ground of offense is taken away. But what appears to me to be more than all is, that this art and invention of yours is so admirably contrived, that in a very short time it can be imparted to any one. I observe that Ctesippus learned to imitate you in no time. Now 304
this quickness of attainment is an excellent thing; but at the same time I would advise you not to have any more public entertainments; there is a danger that men may undervalue an art which they have so easy an opportunity of learning; the exhibition would be best of all, if the discussion were confined to your two selves; but if there must be an audience, let him only be present who is willing to pay a handsome fee, — you should be careful of this, — and if you are wise, you will also

bid your disciples discourse with no man but you and themselves. For only what is rare is valuable; and water, which, as Pindar says, is the best of all things, is also the cheapest. And now I have only to request that you will receive Cleinias and me among your pupils.

Such was the discussion, Crito; and after a few more words had passed between us we went away. I hope that you will come to them with me, since they say that they are able to teach any one who will give them money, however old or stupid. And one thing which they said I must repeat for your especial benefit, — that not even the business of making money need hinder any man from taking in their wisdom with ease.

Cri. Truly, Socrates, though I am curious and ready to learn, yet I fear that I am not like-minded with Euthydemus, but one of the other sort, who, as you were saying, would rather be refuted by such arguments than use them in refutation of others. And though I may appear ridiculous in venturing to advise you, I think that you may as well hear what was said to me by a man of very considerable pretensions — he was a professor of legal oratory — who came away from you while I was walking up and down. "Crito," said he to me, "are you attending to these wise men?" "No, indeed," I said to him; "I could not get within hearing of them, there was such a crowd." "You would have heard something worth hearing if you had." "What was that?" I said. "You would have heard the greatest masters of the art of rhetoric discoursing." "And what did you think of them?" I said. "What did I think of them," he said; "what any one would think of them who heard them talking nonsense, and making much ado about nothing." That was the expression which he used. "Surely," I said, "philosophy is a charming thing." "Charming!" he said; "what simplicity! philosophy is nought; and I think that if you had been present you would have been ashamed of your friend — his conduct was so very strange in placing himself at the mercy of men who care not what they say, and fasten upon every word. And these, as I was telling you, are supposed to be the most eminent professors of their time. But the truth is, Crito, that the study and the men themselves are both equally mean and ridiculous." Now his censure of the pursuit, Socrates, whether coming from him or from others, appears to me to be undeserved; but as to the impropriety of holding a public discussion with such men, I confess that I thought he was in the right about that.

305

Soc. O Crito, they are marvelous men; but what was I going to say? What manner of man was he who came up to you and censured philosophy; was he an orator who himself practices in the courts, or an instructor of orators, who makes the speeches with which they do battle?

Cri. He was certainly not an orator, and I doubt whether he had ever been into court; but they say that he knows the business, and is a clever man, and composes wonderful speeches.

Soc. Now I understand, Crito; he is one of an amphibious class, whom I was on the point of mentioning — one of those whom Prodicus describes as on the border-ground between philosophers and statesmen — they think that they are the wisest of all men, and that they are generally esteemed the wisest; nothing but the rivalry of the philosophers stands in their way; and they are of the opinion that if they can prove the philosophers to be good for nothing, no one will dispute their title to the palm of wisdom, for that they are really the wisest, although they are apt to be mauled by Euthydemus and his friend, when they get hold of them in conversation. This opinion which they entertain of their own wisdom is very natural; for they have a certain amount of philosophy, and a certain amount of political wisdom; there is reason in what they say, for they argue that they have just enough of both, while they keep out of the way of all risks and conflicts and reap the fruits of their wisdom.

Cri. What do you say of them, Socrates? There is certainly something specious in that notion of theirs.

Soc. Yes, Crito, there is more speciousness than truth; 306
they cannot be made to understand the nature of intermediates. For all persons or things, which are intermediate between two other things, and participant of them — if one of these two things is good and the other evil, are better than the one and worse than the other; but if they are in a mean between two good things which do not tend to the same end, they fall short of either of their component elements in the attainment of their ends. Only in the case when the two component elements which do not tend to the same end are evil is the participant better than either. Now if philosophy and political action are both good, but tend to different ends, and they participate in both, and are in a mean between them, then they are talking nonsense, for they are worse than either; or, if the one be good and the other evil, they are better than the one and worse than the other; only on the supposition that they

are both evil could there be any truth in what they say. I do not think that they will admit that their two pursuits are either wholly or partly evil; but the truth is, that these philosopher-politicians who aim at both fall short of both in the attainment of their respective ends, and are really third, although they would like to stand first. There is no need, however, to be angry at this ambition of theirs — they may be forgiven that; for every man ought to be loved who says and manfully pursues and works out anything which is at all like wisdom: at the same time we shall do well to see them as they really are.

Cri. I have often told you, Socrates, that I am in a constant difficulty about my two sons. What am I to do with them? There is no hurry about the younger one, who is only a child; but the other, Critobulus, is getting on, and needs some one who will improve him. I cannot help thinking, when I hear you talk, that there is a sort of madness in many of our anxieties about our children: in the first place, about marrying a wife of good family to be the mother of them, and then about heaping up money for them — and yet taking no care about their education. But then again, when I contemplate any of
307 those who pretend to educate others, I am amazed. They all seem to me to be such outrageous beings, if I am to confess the truth: so that I do not know how I can advise the youth to study philosophy.

Soc. Dear Crito, do you not know that in every profession the inferior sort are numerous and good for nothing, and the good are few and beyond all price: for example, are not gymnastic and rhetoric and money-making and the art of the general, noble arts?

Cri. Certainly they are, in my judgment.

Soc. Well, and do you not see that in each of these arts the many are ridiculous performers?

Cri. Yes, indeed, that is very true.

Soc. And will you on this account shun all these pursuits yourself and refuse to allow them to your son?

Cri. That would not be reasonable, Socrates.

Soc. Do you then be reasonable, Crito, and do not mind whether the teachers of philosophy are good or bad, but think only of Philosophy herself. Try and examine her well and truly, and if she be evil seek to turn away all men from her, and not your sons only; but if she be what I believe that she is, then follow her and serve her, you and your house, as the saying is, and be of good cheer.

ION

INTRODUCTION.

THE Ion is the shortest, or nearly the shortest, of all the writings which bear the name of Plato, and is not authenticated by any early external testimony. The grace and beauty of this little work supply the only, and perhaps a sufficient proof of its genuineness. The plan is simple, and the dramatic interest consists entirely in the contrast between the irony of Socrates and the transparent vanity and childlike enthusiasm of the rhapsode Ion. The theme of the Dialogue may possibly have been suggested by the passage of Xenophon's Memorabilia (iv. 2, 10) in which the rhapsodists are described by Euthydemus as "very precise about the exact words of Homer, but very foolish themselves." (Cp Aristotle, Met. xiii. 6, 7.)

Ion the rhapsode has just come to Athens; he has been exhibiting in Epidaurus at the festival of Asclepius, and is intending to exhibit at the festival of the Panathenaea. Socrates admires and envies the rhapsode's art — for he is always well dressed and in good company — in the company of good poets and of Homer, who is the prince of them. In the course of conversation the admission is elicited from Ion that his skill is restricted to Homer, and that he knows nothing of inferior poets, such as Hesiod and Archilochus; he brightens up and is wideawake when Homer is being recited, but is apt to go to sleep at the recitations of any other poet. "And yet, surely, he who knows the superior ought to know the inferior also; he who can judge of the good speaker is able to judge of the bad. And poetry is a whole; and he who judges of poetry by rules of art ought to be able to judge of all poetry." This is confirmed by the analogy of sculpture, painting, flute-playing, and the other arts. The argument is at last brought home to the mind of Ion, who asks how this contradiction is to be solved. The solution given by Socrates is as follows:

The rhapsode is not guided by rules of art, but is an inspired person who derives a mysterious power from the poet; and the poet, in like manner, is inspired by the God. The poets and their interpreters may be compared to a chain of magnetic rings sus-

pended from one another, and from a magnet. The magnet is the Muse, and the large ring which comes next in order is the poet himself; then follow the rhapsodes and actors, who are rings of inferior power; and the last ring of all is the spectator. The poet is the inspired interpreter of the God, and the rhapsode is the inspired interpreter of the poet, and this is the reason why some poets, like Tynnichus, are the authors of single poems, and some rhapsodes the interpreters of single poets.

Ion is delighted at the notion of being inspired, and acknowledges that he is beside himself when he is performing; his eyes rain tears and his hair stands on end. Socrates is of opinion that a man must be mad who behaves in this way at a festival when there is nothing to trouble him. Ion is confident that Socrates would never think him mad if he could only hear his embellishments of Homer. Socrates asks whether he can speak well about everything in Homer. "Yes, indeed he can." "What about things of which he has no knowledge?" Ion answers that he can interpret anything in Homer. But, rejoins Socrates, when Homer speaks of the arts, as for example, of chariot-driving, or of medicine, or of prophecy, or of navigation — will he, or will the charioteer or physician or prophet or pilot be the better judge? Ion is compelled to admit that every man will judge of his own particular art better than the rhapsode. He still maintains, however, that he understands the art of the general as well as any one. "Then why in this city of Athens, in which men of merit are always being sought after, is he not at once appointed a general?" Ion replies that he is a foreigner, and the Athenians and Spartans will not appoint a foreigner to be their general. "No, that is not the real reason. But Ion has long been playing tricks with the argument; like Proteus, he transforms himself into a variety of shapes, and is at last about to escape in the disguise of a general. Would he rather be regarded as inspired or dishonest?" Ion eagerly embraces the alternative of inspiration.

The Ion, like the other earlier Platonic Dialogues, is a mixture of jest and earnest, in which no definite result is obtained, but some Socratic or Platonic truths are allowed dimly to appear.

The elements of a true theory of poetry are contained in the notion that the poet is inspired. Genius is often said to be unconscious, or spontaneous, or a gift of nature: that genius is akin to madness is a popular aphorism of modern times. The greatest strength is often observed to have an element of limitation. It is said, too, that the force of nature must have its way, and is incapable of correction or improvement. Reflections of this kind may have been passing before Plato's mind when he describes the poet as inspired, or when, as in the Apology (22 b, foll.), he speaks of poets as the worst critics of their own writings — anybody taken at

random from the crowd is a better interpreter of them than they are of themselves. They are sacred persons, "winged and holy things," who have a touch of madness in their composition (Phaedr. 245 a), and should be treated with every sort of respect (Rep. iii. 398 a), but not allowed to live in a well-ordered state.

In the Protagoras (316 d, foll.) the ancient poets are recognized by Protagoras himself as the original Sophists; and this family resemblance may be traced in the Ion. The rhapsode belongs to the realm of imitation and of opinion: he professes to have all knowledge, which is derived by him from Homer, just as the Sophist professes to have all wisdom, which is contained in his art of rhetoric. Even more than the Sophist he is incapable of appreciating the commonest logical distinctions; his great memory remarkably contrasts with his inability to follow the steps of the argument. And in his highest dramatic flights he has an eye to his own gains.

The old quarrel between philosophy and poetry, which in the Republic leads to their final separation, is already working in the mind of Plato, and is embodied by him in the contrast between Socrates and Ion. Yet, as in the Republic, Socrates shows a sort of sympathy with the poetic nature. Also, the manner in which Ion is affected by his own recitations affords a lively illustration of the power which, in the Republic (394 foll.), Socrates attributes to dramatic performances over the mind of the performer. His allusion to his embellishments of Homer, in which he declares himself to have surpassed Metrodorus of Lampsacus and Stesimbrotus of Thasos, seems to show that, like them, he belonged to the allegorical school of interpreters. The circumstance that nothing more is known of him may be adduced in confirmation of the argument that this truly Platonic little work is not a forgery of later times.

ION.

PERSONS OF THE DIALOGUE.

SOCRATES. ION.

Soc. WELCOME, Ion. Are you from your native city of Ephesus?

Ion. No, Socrates; but from Epidaurus, where I attended the festival of Asclepius.

Soc. And do the Epidaurians have contests of rhapsodes at the festival?

Ion. O yes, and of all sorts of musical performers.

Soc. And were you one of the competitors — and did you succeed?

Ion. I obtained the first prize of all, Socrates.

Soc. Well done; and I hope that you will do the same for us at the Panathenaea.

Ion. And I will, please Heaven.

Soc. I often envy the profession of a rhapsode, Ion; for you have always to wear fine clothes, and to look as beautiful as you can is a part of your art. Then, again, you are obliged to be continually in the company of many good poets; and especially of Homer, who is the best and most divine of them; and to understand him, and not merely learn his words by rote, is a thing greatly to be envied. And no man can be a rhapsode who does not understand the meaning of the poet. For the rhapsode ought to interpret the mind of the poet to his hearers, and he cannot do this well unless he knows what he means. All this is greatly to be envied.

Ion. That is true, Socrates; and that has certainly been the most troublesome part of my art; and I believe that I can speak about Homer better than any man; and that neither

Metrodorus of Lampsacus, nor Stesimbrotus of Thasos, nor Glaucon, nor any one else that ever was, had as good ideas about Homer as I have, or as many of them.

Soc. I am glad to hear that, Ion ; for I see that you will not refuse to acquaint me with them.

Ion. Certainly, Socrates ; you ought to hear my embellishments of Homer. I think that the Homeridae should give me a golden crown as a reward for them.

531 *Soc.* I shall take an opportunity of hearing them at some future time. But just now I should like to ask you a question : Does your art extend to Hesiod and Archilochus, or to Homer only ?

Ion. To Homer only; and that appears to me to be quite enough.

Soc. Are there any things about which Homer and Hesiod agree ?

Ion. Yes ; I am of opinion that there are a good many.

Soc. And can you interpret better what Homer says, or what Hesiod says, about these matters in which they agree ?

Ion. I can interpret them equally well, Socrates, where they agree.

Soc. But what about matters in which they do not agree ? — for example, about divination, of which both Homer and Hesiod have something to say.

Ion. Very true.

Soc. Well now, would you or a good prophet be a better interpreter of what these two poets say, whether they agree or disagree, about divination ?

Ion. A prophet.

Soc. But if you were a prophet, would you not be able to interpret them when they disagree as well as when they agree ?

Ion. Clearly.

Soc. Well then, how come you to have this skill about Homer, but not about Hesiod or the other poets ? Does not Homer speak of the same themes which all other poets handle ? Is not war his great argument ? and does he not speak of human society and of intercourse of men, good and bad, skilled and unskilled, and of the gods conversing with one another and with mankind, and about what happens in heaven and in the world below, and the generations of gods and heroes ? Are not these the themes of which Homer sings ?

Ion. Very true, Socrates.

Soc. And do not the other poets sing of the same?

Ion. Yes, Socrates; but not in the same way as Homer.

Soc. What! in a worse way?

Ion. Yes, in a far worse.

Soc. And Homer is better?

Ion. He is incomparably better.

Soc. And yet surely, my dear friend Ion, in a discussion about arithmetic, where many people are speaking, and some one person speaks better than the rest, any one can judge who is the good speaker?

Ion. Yes.

Soc. And he who judges of the good will be the same as he who judges of the bad speakers?

Ion. The same.

Soc. And he will be the arithmetician?

Ion. Yes.

Soc. Well, and in discussions about the wholesomeness of food, when many persons are speaking, and one speaks better than the rest, will he who recognizes the better speaker be a different person from him who recognizes the worse, or the same?

Ion. Clearly the same.

Soc. And who is he, and what is his name?

Ion. A physician.

Soc. And speaking generally, in all discussions in which the subject is the same and many men are speaking, will not he who knows the good know the bad speaker also? Or 532
if he does not know the bad, neither will he know the good.

Ion. True.

Soc. Is not the same person skillful in both?

Ion. Yes.

Soc. And you say that Homer and the other poets, such as Hesiod and Archilochus, speak of the same things, although not in the same way; but the one speaks well and the other not so well?

Ion. Yes; and I am right in saying that.

Soc. And if you know the good speaker, you would also know that the inferior speakers are inferior?

Ion. That is true.

Soc. Then, my dear friend, can I be mistaken in saying that Ion is equally skilled in Homer and in other poets, since he himself acknowledges that the same person will be a good judge

of all those who speak of the same things; and that almost all poets do speak of the same things?

Ion. What then, Socrates, is the reason why I lose attention and go to sleep and have absolutely no ideas, when any one speaks of any other poet; but when Homer is mentioned, I wake up at once and am all attention and have plenty to say?

Soc. That, my friend, is easily explained. No one can fail to see that you speak of Homer not by any art or knowledge. If you were able to speak of him by rules of art, you would have been able to speak of all other poets, for poetry is a whole.

Ion. Yes.

Soc. And when any one acquires any other art as a whole, the same may be said of them. Would you like me to explain my meaning, Ion?

Ion. Yes, indeed, Socrates; I wish that you would: for I love to hear you wise men talk.

Soc. I wish, Ion, that we could be truly called wise: but the truth is that you rhapsodes and actors, and the poets whose verses you sing, are wise; and I am a common man, who only speaks the truth. For do but consider what a very common and trivial thing this is, which I have said — a thing which any man might say; that when a man has acquired a knowledge of a whole art, the inquiry into good and bad is one and the same. Let us think about this; is not the art of painting a whole?

Ion. Yes.

Soc. And there are and have been many painters good and bad?

Ion. Yes.

Soc. And did you ever know any one who was skillful in pointing out the excellences and defects of Polygnotus the son
533 of Aglaophon, but incapable of criticising other painters; and when the work of any other painter was produced, went to sleep and was at a loss and had no ideas; but when he had to give his opinion about Polygnotus, or whoever the painter might be, woke up and was attentive and had plenty to say?

Ion. No indeed, I never did.

Soc. Or did you ever know of any one in sculpture, who was skillful in expounding the merits of Daedalus the son of Metion, or of Epeius the son of Panopeus, or of Theodorus the Samian, or of some other individual sculptor; but when the

works of other sculptors were produced, was at a loss and went to sleep and had nothing to say?

Ion. No indeed, I never did.

Soc. And if I am not mistaken, you never met with any one among flute-players or harp-players or singers to the harp or rhapsodes who was able to discourse of Olympus or Thamyras or Orpheus, or Phemius the rhapsode of Ithaca, but was at a loss when he came to speak of Ion of Ephesus, and had no notion of his merits or defects?

Ion. I cannot deny that, Socrates. Nevertheless I am conscious in my own self that I do speak better and have more to say about Homer than any other man, and this is the general opinion. But I do not speak equally well about others: tell me the reason of this?

Soc. I perceive, Ion; and I will proceed to explain to you what I imagine to be the reason of this. This gift which you have of speaking excellently about Homer is not an art, but, as I was just saying, an inspiration; there is a divinity moving you, like that in the stone which Euripides calls a magnet, but which is commonly known as the stone of Heraclea. For that stone not only attracts iron rings, but also imparts to them a similar power of attracting other rings; and sometimes you may see a number of pieces of iron and rings suspended from one another so as to form quite a long chain: and all of them derive their power of suspension from the original stone. Now this is like the Muse, who first gives to men inspiration herself: and from these inspired persons a chain of other persons is suspended, who take the inspiration from them. For all good poets, epic as well as lyric, compose their beautiful poems not as works of art, but because they are inspired and possessed. And as the Corybantian revelers when they dance are not in their right mind, so the lyric poets are not in their 534
right mind when they are composing their beautiful strains: but when falling under the power of music and metre they are inspired and possessed; like Bacchic maidens who draw milk and honey from the rivers, when they are under the influence of Dionysus, but not when they are in their right mind. And the soul of the lyric poet does the same, as they themselves tell us; for they tell us that they gather their strains from honeyed fountains out of the gardens and dells of the Muses; thither, like the bees, they wing their way. And this is true. For the poet is a light and winged and holy thing, and there is no in-

vention in him until he has been inspired and is out of his senses, and the mind is no longer in him: when he has not attained to this state, he is powerless and is unable to utter his oracles. Many are the noble words in which poets speak of actions like your own words about Homer; but they do not speak of them by any rules of art: only when they make that to which the muse impels them are their inventions inspired; and then one of them will make dithyrambs, another hymns of praise, another choral strains, another epic or iambic verses — and he who is good at one is not good at any other kind of verse: for not by art does the poet sing, but by power divine. Had he learned by rules of art, he would have known how to speak, not of one theme only, but of all; and therefore God takes away the minds of poets, and uses them as his ministers, as he also uses diviners and holy prophets, in order that we who hear them may know that they speak not of themselves who utter these priceless words in a state of unconsciousness, but that God is the speaker, and that through them he is conversing with us. And Tynnichus the Chalcidian affords a striking instance of what I am saying: he wrote nothing that any one would care to remember but the famous pæan which is in every one's mouth, and is one of the finest poems ever written, and is certainly an invention of the Muses, as he himself says. For in this way the God would seem to indicate to us and not allow us to doubt that these beautiful poems are not human or the work of man, but divine and the word of God; and that the poets are only the interpreters of the gods by whom they are severally possessed. Was not this the lesson which the God intended to teach when by the mouth of the worst of poets he sang the best of songs? Am I not right, Ion?

Ion. Yes, indeed, Socrates, I feel that you are; for your words touch my soul, and I am persuaded somehow that good poets are the inspired interpreters of the gods.

Soc. And you rhapsodists are the interpreters of the poets?

Ion. That again is true.

Soc. Then you are the interpreters of interpreters?

Ion. Precisely

Soc. I wish you would frankly tell me, Ion, what I am going to ask of you: When you produce the greatest effect upon the spectators in the recitation of some striking passage, such as the apparition of Odysseus leaping forth on the floor, recognized by the suitors and casting his arrows at his feet, or the description

of Achilles rushing at Hector, or the sorrows of Andromache, Hecuba, or Priam, are you in your right mind? Are you not carried out of yourself, and does not your soul in an ecstasy seem to be among the persons or places of which she is speaking, whether they are in Ithaca or in Troy or whatever may be the scene of the poem?

Ion. That proof strikes home to me, Socrates. For I must confess that at the tale of pity my eyes are filled with tears, and when I speak of horrors, my hair stands on end and my heart throbs.

Soc. Well, Ion, and what are we to say of a man who at a sacrifice or festival, when he is dressed in holiday attire, and has gold crowns upon his head, of which nobody has robbed him, appears weeping or panic-stricken in the presence of more than twenty thousand friendly faces, when there is no one spoiling or wronging him; is he in his right mind or is he not?

Ion. No indeed, Socrates, I must say that strictly speaking he is not in his right mind.

Soc. And are you aware that you produce similar effects on most of the spectators?

Ion. Yes indeed, I am; for I look down upon them from the stage, and behold the various emotions of pity, wonder, sternness, stamped upon their countenances when I am speaking: and I am obliged to attend to them; for unless I make them cry I myself shall not laugh, and if I make them laugh, I shall do anything but laugh myself when the hour of payment arrives.

Soc. Do you know that the spectator is the last of the rings which, as I am saying, derive their power from the original magnet; and the rhapsode like yourself and the actors are intermediate links, and the poet himself is the first link of all? And through all these the God sways the souls of 536
men in any direction which he pleases, and makes one man hang down from another. There is also a chain of dancers and masters and undermasters of bands, who are suspended at the side, and are the rings which hang from the Muse. And every poet has a muse from whom he is suspended, and by whom he is said to be possessed, which is nearly the same thing; for he is taken possession of. And from these first rings, which are the poets, depend others, some deriving their inspiration from Orpheus, others from Musaeus; but the greater number are

possessed and held by Homer. Of which latter you are one, Ion, — possessed by Homer; and when any one repeats the verses of another poet you go to sleep, and know not what to say; but when any one recites a strain of Homer you wake up in a moment, and your soul leaps within you, and you have plenty to say, for not by art or knowledge about Homer do you say what you say, but by divine inspiration and by possession; just as the revelers too have a quick perception of that strain only which is appropriated to the God by whom they are possessed, and have plenty of dances and words for that, but take no heed of any other. And you too, Ion, when the name of Homer is mentioned have plenty to say, and nothing to say of others. And the reason of this is, that you praise Homer not by art but by divine inspiration: and this is the answer to your question.

Ion. That is good, Socrates; and yet I doubt whether you will ever have eloquence enough to persuade me that I praise Homer only when I am mad and possessed; and if you could hear me speak of him I am sure that you would never think that.

Soc. I should like very much to hear you, but not until you have answered a question which I have to ask. On what part of Homer do you speak well? — not surely about every part?

Ion. There is no part, Socrates, about which I do not speak well: of that I can assure you.

Soc. Surely not about things in Homer of which you have no knowledge?

Ion. And what is there of which Homer speaks of which I have no knowledge?

537 *Soc.* Why! does not Homer speak in many passages about arts? For example, about driving; if I can only remember the lines I will repeat them.

Ion. I remember, and will repeat them.

Soc. Tell me, then, what Nestor says to Antilochus, his son, where he tells him to be careful of the bend at the horse-race in honor of Patroclus.

Ion. "Bend gently," he says, "in the polished chariot to the left of them, and give the horse on the right hand a touch of the whip, and shout — and at the same time slacken his rein. And when you are at the goal, let the left horse draw near, yet so that the nave of the well-wrought wheel may not even seem to touch the extremity; and keep from catching the stone." [1]

[1] Il. xxiii. 335.

Soc. Enough. Now, Ion, will the charioteer or the physician be the better judge of the propriety of these lines.

Ion. The charioteer, clearly.

Soc. And will the reason be that this is his art, or will there be any other reason?

Ion. No, that will be the reason.

Soc. And every art is appointed by God to have knowledge of a certain work; for that which we know by the art of the pilot we do not know by the art of medicine?

Ion. Certainly not.

Soc. Nor do we know by the art of the carpenter that which we know by the art of medicine?

Ion. Certainly not.

Soc. And this is true of all the arts; that which we know with one art we do not know with the other? But let me preface this question by another: You admit that there are differences of arts?

Ion. Yes.

Soc. You would argue, as I should, that when the subject of knowledge is different, the art is also different?

Ion. Yes.

Soc. Yes; for surely, if the subject of knowledge were the same, there would be no meaning in saying that the arts were different, — if they both gave the same knowledge. For example, I know that here are five fingers, and you know the same. And if I were to ask whether I and you became acquainted with this fact by the help of the same science of arithmetic, you would acknowledge that we did?

Ion. Yes.

Soc. Tell me, then, what I was going to ask you just now, — whether this holds universally? Must the same art 538. have the same subject of knowledge, and any others have other subjects of knowledge?

Ion. That is my opinion, Socrates.

Soc. Then he who has no knowledge of a particular art will have no right judgment of the sayings and doings of that art?

Ion. That is true.

Soc. Then which will be a better judge of the lines of Homer which you were reciting, you or the charioteer?

Ion. The charioteer.

Soc. Why, yes, because you are a rhapsode and not a charioteer.

Ion. Yes.

Soc. And the art of the rhapsode is different from that of the charioteer?

Ion. Yes.

Soc. And if of a different knowledge, then a knowledge of different matters?

Ion. Yes.

Soc. You know the passage in which Hecamede the concubine of Nestor is described as giving to the wounded Machaon a posset, as he says, —

"Made with Pramnian wine; and she grated cheese of goat's milk with a brazen knife, and at his side there was an onion which gives a relish to drink." [1]

Would you say now that the art of the rhapsode or the art of medicine was better able to judge of these lines?

Ion. the art of medicine.

Soc. And when Homer says, —

"And she descended into the deep like a leaden plummet, which, set in the horn of ox that ranges in the fields, rushes along carrying death among the ravenous fishes," [2] —

will the art of the fisherman or of the rhapsode be better able to judge of the propriety of these lines?

Ion. Clearly, Socrates, the art of the fisherman.

Soc. Come now, suppose that you were to say to me: Since you, Socrates, are able to assign different passages in Homer to their corresponding arts, I wish that you would tell me what are the passages the excellence of which ought to be judged of by the prophet and prophetic art, and you shall see how readily and truly I will answer you. For there are many such passages, particularly in the Odysee; as, for example, the passage in which Theoclymenus of the house of Melampus says to the suitors: —

539 "Wretched men! what is happening to you? Your heads and your faces and your limbs underneath are shrouded in night; and the voice of lamentation bursts forth, and your cheeks are wet with tears. And the vestibule is full, and the court is full, of ghosts descending into the darkness of Erebus, and the sun has perished out of heaven, and an evil mist is spread abroad." [3]

And there are many such passages in the Iliad also; as for example in the description of the battle near the rampart, where he says: —

"As they were eager to pass the ditch, there came to them an omen: a soaring eagle, holding back the people on the left, bore a huge bloody dragon in his talons, still living and panting; nor had he yet resigned the strife, for he bent back and

[1] Il. x. 630, 638.
[2] Il. xxiv. 80.
[3] Od. xx. 351.

smote the bird which carried him on the breast by the neck, and he in pain let him fall from him to the ground into the midst of the multitude. And the eagle, with a cry, was borne afar on the wings of the wind." [1]

These are the sort of things which I should say that the prophet ought to consider and determine.

Ion. And you are quite right, Socrates, in saying that.

Soc. Yes, Ion, and you are right also. And as I have selected from the Iliad and Odyssee for you passages which describe the office of the prophet and the physician and the fisherman, do you, who know Homer so much better than I do, Ion, select for me passages which relate to the rhapsode and the rhapsode's art, and which the rhapsode ought to examine and judge of better than other men.

Ion. All passages, I should say, Socrates.

Soc. Not all, Ion, surely. Have you already forgotten what you were saying? A rhapsode ought to have a better memory.

Ion. Why, what am I forgetting?

Soc. Do you not remember that you declared the art of the rhapsode to be different from the art of the charioteer? 540

Ion. Yes, I remember.

Soc. And you admitted that being different they would have different subjects of knowledge?

Ion. Yes.

Soc. Then upon your own showing the rhapsode, and the art of the rhapsode, will not know everything.

Ion. I dare say, Socrates, that there may be exceptions.

Soc. You mean to say that he will not know the subjects of the other arts. As he does not know all of them, which of them will he know?

Ion. He will know what a man ought to say and what a woman ought to say, and what a freeman and what a slave ought to say, and what a ruler and what a subject.

Soc. Do you mean that a rhapsode will know better than the pilot what the ruler of a sea-tossed vessel ought to say?

Ion. No; the pilot will know that best.

Soc. Or will the rhapsode know better than the physician what the ruler of a sick man ought to say?

Ion. He will not.

Soc. But he will know what a slave ought to say?

Ion. Yes.

Soc. Suppose the slave to be a cowherd; the rhapsode will

[1] Il. xii. 200.

know better than the cowherd what he ought to say in order to soothe the rage of infuriated cows?

Ion. No, he won't.

Soc. But he will know what a spinning-woman ought to say about the working of wool?

Ion. No.

Soc. But he will know what a general ought to say when exhorting his soldiers?

Ion. Yes, that is the sort of thing which the rhapsode will know.

Soc. Well, but is the art of the rhapsode the art of the general?

Ion. I am sure that I should know what a general ought to say.

Soc. Why, yes, Ion, because you may possibly have a knowledge of the general's art; and you may also have a knowledge of horsemanship as well as of the lyre: in that case you would know when horses were well or ill managed. But suppose I were to ask you: By the help of which art, Ion, do you know whether horses are well managed, by your skill as a horseman or as a performer on the lyre,— what would you answer?

Ion. I should reply, as a horseman.

Soc. And if you judged of performers on the lyre, you would admit that you judged of them as performers on the lyre, and not as horsemen?

Ion. Yes.

Soc. And in judging of the general's art, do you judge of that as a general or a rhapsode?

Ion. That appears to me to be all one.

Soc. What do you mean? Do you mean to say that
541 the art of the rhapsode and of the general is the same?

Ion. Yes, one and the same.

Soc. Then he who is a good rhapsode is also a good general?

Ion. Certainly, Socrates.

Soc. And he who is a good general is also a good rhapsode?

Ion. No; I don't say that.

Soc. But you did say that he who is a good rhapsode is also a good general?

Ion. Certainly.

Soc. And you are the best of Hellenic rhapsodes?

Ion. Far the best, Socrates.

Soc. And are you the best general, Ion?

Ion. To be sure, Socrates; and Homer was my master.

Soc. But then, Ion, what in the name of goodness can be the reason why you, who are the best of generals as well as the best of rhapsodes in all Hellas, go about as a rhapsode instead of being a general? Do you think that the Hellenes want a rhapsode with his golden crown, and do not want a general?

Ion. Why, Socrates, the reason is, that my countrymen, the Ephesians, are the servants and soldiers of Athens, and don't need a general; and you and Sparta are not likely to have me, for you think that you have enough generals of your own.

Soc. My good Ion, did you never hear of Apollodorus of Cyzicus?

Ion. Who may he be?

Soc. One who, though a foreigner, has often been chosen their general by the Athenians: and there is Phanosthenes of Andros, and Heraclides of Clazomenae, whom they have also appointed to the command of their armies, and to other offices, although aliens, after they had shown their merit. And will they not choose Ion the Ephesian as their general, and honor him, if he prove himself worthy? Were not the Ephesians originally Athenians; and Ephesus is no mean city? But, indeed, Ion, if you are correct in saying that by art and knowledge you are able to praise Homer, you don't deal fairly with me, and after all your professions of knowing many glorious things about Homer, and promises that you would exhibit them to me, do only deceive me, and will not even explain at my earnest entreaties what is the art of which you are a master. You have literally as many forms as Proteus; and now you go all manner of ways, twisting and turning, and, like Proteus, become all manner of people at once, and at last slip away from me in the disguise of a general, in order that you may escape exhibiting your Homeric lore. And if, as I was saying, you have art, then I should say that in falsifying your promise that you would exhibit Homer, you are not dealing fairly with me.

But if, as I believe, you have no art, but speak all these beautiful words about Homer unconsciously under his inspiring influence, then I acquit you of dishonesty, and shall only say that you are inspired. Which do you prefer to be thought, dishonest or inspired?

Ion. There is a great difference, Socrates, between them; and inspiration is the far nobler alternative.

Soc. Then, Ion, I shall assume the nobler alternative; and attribute to you in your praises of Homer inspiration, and not art.

MENO.

INTRODUCTION.

THIS Dialogue begins abruptly with a question of Meno, who asks "Whether virtue can be taught." Socrates replies that he does not as yet know what virtue is, and has never known any one who did. "Then he cannot have met Gorgias when he was at Athens." Yes, Socrates had met him, but he has a bad memory, and has forgotten what Gorgias said. Will Meno tell him his own notion, which is probably not very different from that of Gorgias? O yes — nothing easier; there is the virtue of a man, of a woman, of an old man, and of a child; there is a virtue of every age and state of life, all of which may be easily described."

Socrates reminds Meno that this is only an enumeration of the virtues and not a definition of the notion which is common to them all. Meno tries again; this time he defines virtue to be "the power of command." But to this, again, exceptions are taken. For there must be a virtue of those who obey, as well as of those who command; and the power of command must be justly or not unjustly exercised. Meno is very ready to admit that justice is virtue: "Would you say virtue or a virtue, for there are other virtues, such as courage, temperance, and the like; just as round is a figure, and black and white are colors, and yet there are other figures and other colors. Let Meno take the examples of figure and color, and try to define them." Meno confesses his inability, and after a process of interrogation, in which Socrates explains to him the nature of a "simile in multis," Socrates himself defines figure as "the accompaniment of color." But some one may object that he does not know the meaning of the word "color;" and if he is a candid friend, and not a mere disputant, Socrates is willing to furnish him with a simpler and more philosophical definition, in which no disputed word is allowed to intrude: "Figure is the limit of form." Meno imperiously insists that he must still have a definition of color. To which, after some playful raillery, Socrates is induced to reply, "That color is the effluence of form in due proportion to the sight." This definition is exactly suited to the taste of Meno, who welcomes the familiar language of Gorgias and Empedocles. Socrates is of

opinion that the more abstract or dialectical definition of figure is far better.

Now that Meno has been made to understand the nature of a general definition, he answers in the spirit of a Greek gentleman, and in the words of a poet, "that virtue is to delight in things honorable, and to have the power of getting them." This is a nearer approximation than he has yet made to a complete definition, and, regarded as a piece of proverbial or popular morality, is not far from the truth. But the objection is urged, "that the honorable is the good," and as every one desires the good, the point of the definition is contained in the last words, "the power of getting them." "And they must be got justly or with justice." The definition will then stand thus: "Virtue is the power of getting good with justice." But justice is a part of virtue, and therefore virtue is the getting of good with a part of virtue. The definition repeats the word defined.

Meno complains that the conversation of Socrates has the effect of a torpedo's shock upon him. When he talks with other persons he has plenty to say about virtue; in the presence of Socrates, his thoughts seem to desert him. Socrates replies that he is only the cause of perplexity in others, because he is himself perplexed. He proposes to continue the inquiry. But how, asks Meno, can he inquire either into what he knows or into what he does not know? This is a sophistical puzzle, which, as Socrates remarks, saves a great deal of trouble to him who accepts it. But the puzzle has a real difficulty latent under it, to which Socrates replies in a figure. The difficulty is the origin of knowledge.

He professes to have heard from priests and priestesses, and from the poet Pindar, of an immortal soul which is always learning and forgetting in successive periods of existence, wandering over all places of the upper and under world, having seen and known all things at one time or other, and by association out of one thing capable of recovering all. For nature is of one kindred; and every soul has a seed or germ which may be developed into all knowledge. The existence of this latent knowledge is further proved by the interrogation of one of Meno's slaves, who, in the skillful hands of Socrates, is made to acknowledge some elementary relations of geometrical figures. The theorem that the square of the diagonal is double the square of the side — that famous discovery of primitive mathematics, in honor of which the legendary Pythagoras is said to have sacrificed a hecatomb — is elicited from him. The first step in the process of teaching has made him conscious of his own ignorance. He has had the "the torpedo's shock" given him, and is the better for the operation. But whence had the uneducated man this knowledge? He had never learnt geometry in this world: nor was it born with him; he must therefore have had it in a previous existence. (Cp. Phaedo 73, B.)

After Socrates has given this specimen of the true nature of teaching, the original question of the teachableness of virtue is renewed. Again he professes a desire to know "what virtue is" first. But he is willing to argue the question, as mathematicians say, under an hypothesis. He will assume that if virtue is knowledge, then virtue can be taught. (This was the stage of the argument at which the Protagoras concluded.)

Socrates has no difficulty in showing that virtue is a good, and that goods, whether of body or mind, must be under the direction of knowledge. Upon the assumption just made, then, virtue is teachable. But where are the teachers? There are none found. This is extremely discouraging. Virtue is no sooner discovered to be teachable, than the discovery follows that it is not taught. Virtue, therefore, is and is not teachable.

In this dilemma an appeal is made to Anytus, who is a respectable and well-to-do citizen of the old school, and happens to be present. He is asked "Whether Meno shall go to the Sophists and be taught." The very suggestion of this throws him into a rage. "To whom, then, shall Meno go?" asks Socrates. To any Athenian gentleman — to the great Athenian statesmen of past times. Socrates replies here, as elsewhere (Laches 179 C, foll.; Prot. 319, foll.), that Themistocles, Pericles, and other great men, never taught their sons anything worth learning; and they would surely, if they could, have imparted to them their own political wisdom. Anytus is angry at the imputation which is supposed to be cast on his favorite statesmen, and breaks off with a significant threat.

Socrates returns to the consideration of the question "Whether virtue is teachable," which was denied on the ground that there are no teachers of it (for the Sophists are bad teachers, and the rest of the world do not profess to teach). But there is another point which we failed to observe, and in which Gorgias has never instructed Meno, nor Prodicus Socrates. This is the nature of right opinion. For virtue may be under the guidance of right opinion as well as knowledge; and right opinion is for practical purposes as good as knowledge, but is incapable of being taught, and is also liable to "walk off," because not bound by the tie of the cause. This is the sort of instinct which is possessed by statesmen, who are not wise or knowing persons, but only inspired or divine. The higher virtue, which is identical with knowledge, is an ideal only. If the statesman had this knowledge, and could teach what he knew, he would be like Tiresias in the world below, — "He alone would have wisdom, while the rest flit as shadows."

This Dialogue is an attempt to answer the question, Can virtue be taught? No one would either ask or answer such a question in modern times. But in the age of Socrates it was only by an effort

that the mind could rise to a general notion of virtue as distinct from the particular virtues of courage, liberality, and the like. And when a hazy conception of this was attained, it was only by a further effort that the question of the teachableness of virtue could be resolved.

The answer which is given by Plato is paradoxical enough, and seems rather intended to stimulate than to satisfy inquiry. Virtue is knowledge, and therefore virtue can be taught. But virtue is not taught, and therefore in this higher and ideal sense there is no virtue and no knowledge. The teaching of the Sophists is confessedly inadequate, and Meno, who is their pupil, is ignorant of the very nature of general terms. He can only produce out of their armory the sophism, "That you can neither inquire into what you know nor into what you do not know;" to which Socrates replies by his theory of reminiscence.

To the doctrine that virtue is knowledge, Plato has been constantly tending in the previous Dialogues. But here the new truth is no sooner found than it seems to vanish away. "If there is knowledge, there must be teachers; and where are the teachers?" There is no knowledge in the higher sense of systematic, connected, reasoned knowledge, such as may one day be attained, and such as Plato himself seems to see in some far-off vision of a single science. And there are no teachers in the higher sense of the word; that is to say, no real teachers who will arouse the spirit of inquiry in their pupils, and not merely instruct them in rhetoric or impart to them ready-made information for a fee of "one" or of "fifty drachms." Plato is desirous of deepening the notion of education, and therefore he asserts the seeming paradox that there are no educators. A suspicion of this has already been suggested at the end of the Euthydemus.

But there is still a possibility which must not be overlooked. Even if there is no knowledge, as has been proved by "the wretched state of education," there may be right opinion. This is a sort of guessing or divination which rests on no knowledge of causes, and is incommunicable to others. This is what our statesmen have, as is proved by the circumstance that they are unable to impart their knowledge to others. Those who are possessed of this gift cannot be said to be men of science or philosophers, but they are inspired and divine.

There is no trace of irony in this curious passage, which forms the concluding portion of the Dialogue. Nor again does Plato mean to intimate that the supernatural or divine is the true basis of human life. To him knowledge, if only attainable in this world, is of all things the most divine. But, like other philosophers, he is willing to admit that "probability is the guide of life;" and at the same time is desirous to contrast "the wisdom which governs the world" with

true wisdom. There are many instincts, judgments, and anticipations of the human mind which cannot be reduced to rule, and of which the grounds cannot always be given in words. A person may have some skill or latent experience which he is able to use himself and is yet unable to teach others, because he has no principles, and is not able to collect or arrange his ideas. He has practice, but not theory; art, but not science. This is a true fact of psychology, which is recognized by Plato in this passage.

Also here, as in the Ion and Phaedrus, Plato appears to acknowledge an unreasoning element in the higher nature of man. The philosopher only has knowledge, and yet the statesman and the poet are inspired. There may be a sort of irony in regarding in this way the gifts of genius. But there is no reason to suppose that he is deriding them any more than he is deriding the phenomena of love or of enthusiasm in the Symposium, or of oracles in the Apology, or of divine intimations when he is speaking of the daemonium of Socrates. He recognizes the lower form of right opinion, as well as the higher one of science, in the spirit of one who desires to include in his philosophy every aspect of human life; just as he recognizes the existence of popular opinion as a fact, and the Sophists as the expression of it.

This Dialogue contains the first intimation of the doctrine of reminiscence and of the immortality of the soul. It may be observed that the fanciful notion of preëxistence is combined with a true view of the unity of knowledge, and of the association of ideas. The germs of two valuable principles of education may also be gathered from the "doctrine of priests and priestesses:" (1) that true knowledge is a knowledge of causes (cp Aristotle's theory of *ἐπιστήμη*); and (2) that the process of learning consists not in what is brought to the learner, but in what is drawn out of him. The philosophy of ideas is here presented in a less developed form, than in the Phaedo and Phaedrus. Nothing is said of the preëxistence of ideas of justice, temperance, and the like. Nor is Socrates positive of anything but the duty of inquiry (86 B). The doctrine of reminiscence too is explained in a manner more in accordance with fact and experience out of the affinities of nature (*ἅτε τῆς φύσεως ὅλης συγγενοῦς οὔσης*). Modern philosophy says that all things in nature are dependent on one another; the ancient philosopher has the same truth latent in his mind when he says that out of one thing all the rest may be recovered.

Some lesser traits of the Dialogue may be noted also, such as the acute observation that Meno prefers the familiar definition, which is embellished with poetical language, to the better and truer one (p. 76 D); or (2) the shrewd reflection, which may admit of an application to modern as well as to ancient teachers, that the Sophists having made large fortunes, this must surely be a criterion of their

powers of teaching, for that no man could get a living by shoemaking who was not a good shoemaker (91 C); or (3) the remark conveyed, almost in a word, that the verbal skeptic is saved the labor of thought and inquiry (οὐδὲν δεῖ τῷ τοιούτῳ ζητήσεως, 80 E). Characteristic also of the temper of the Socratic inquiry is, (4) the proposal to discuss the teachableness of virtue under an hypothesis, after the manner of the mathematicians (87 A); and (5) the repetition of the favorite doctrine which occurs so frequently in the earlier and more Socratic Dialogues, and gives a color to all of them — that mankind only desire evil through ignorance (77, 78 foll.).

The character of Meno, like that of Critias, has no relation to the actual circumstances of his life. Plato is silent about his treachery to the ten thousand Greeks, which Xenophon has recorded, as he is also silent about the crimes of Critias. He is a Thessalian Alcibiades, rich and luxurious, — a spoilt child of fortune, — and is described as the hereditary friend of the great king. Like Alcibiades, he is inspired with an ardent desire of knowledge, and is equally willing to learn of Socrates and the Sophists. He may be regarded as standing in the same relation to Gorgias as Hippocrates in the Protagoras to the other great Sophist. He is the sophisticated youth on whom Socrates tries his cross-examining powers, with a view of exhibiting him and his teachers in their true light, just as in the Charmides, the Lysis, and the Euthydemus, he makes ingenuous boyhood the subject of a similar experiment. Socrates treats Meno in a half-playful manner, and tries to exhibit him to himself and to the reader as ignorant of the very elements of dialectics, in which the Sophists have failed to instruct their disciple.

Anytus is the type of the narrow-minded man of the world, who is indignant at innovation, and equally detests the popular teacher and the true philosopher. He seems, like Aristophanes, to regard the new opinions, whether of Socrates or the Sophists, as fatal to Athenian greatness. He is of the same class as Callicles in the Gorgias, but of a different variety; the immoral and sophistical doctrines of Callicles are not attributed to him. The moderation with which he is described is remarkable, if he be the accuser of Socrates: and this seems to be indicated by his parting words. Perhaps Plato may have been desirous of showing that the accusation of Socrates was not to be attributed to badness or malevolence, but rather to a tendency in men's minds. Or he may have been regardless of the historical truth of the characters of his Dialogue, as in the case of Meno and Critias. Like Chaerephon (Apol. 21) the real Anytus was a democrat, and had joined Thrasybulus in the conflict with the thirty.

The Protagoras arrived at a sort of hypothetical conclusion, that if "virtue is knowledge, it can be taught." In the Euthydemus,

Socrates himself offered an example of the manner in which ingenuous youth should be taught; this was in contrast to the quibbling follies of the Sophists. In the Meno the subject is carried further; and although no clear result is attained, the foundations of the inquiry are laid deeper, and the nature of knowledge is more distinctly explained. There is a sort of progression by antagonism of two opposite aspects of philosophy. When we have reached the ideal of knowledge, we seem to find that it is irreconcilable with actual fact. In human life there is the profession of knowledge, but right opinion is our actual guide. Knowledge, at the best, is only opinion, and is really incapable of being taught. There is also another sort of progress from the general notions of Socrates, who asked simply, "What is friendship? what is temperance? what is courage?" as in the Lysis, Charmides, Laches, to the transcendentalism of Plato, who, in the second stage of his philosophy, sought to find the nature of knowledge in a prior and future state of existence.

The difficulty in framing general notions which has appeared in all the previous Dialogues recurs in the Gorgias and Theaetetus as well as in the Republic. In the Gorgias the statesmen are again introduced, but in stronger opposition to the philosopher. They are no longer allowed to have a divine insight, but, though acknowledged to have been clever men and good speakers, are denounced as "blind leaders of the blind." In the Republic the relation of knowledge to virtue is described in a manner more consistent with modern distinctions. The existence of the virtues without the possession of knowledge in the higher or philosophical sense, is admitted to be possible. Right opinion is again introduced in the Theaetetus as an account of knowledge, but is rejected on the ground that it is irrational (as here, because it is not bound by the tie of the cause), and also, because the conception of false opinion is given up as hopeless. Such are the shifting points of view which Plato presents to us in his life-long effort to work out the great intellectual puzzle of his age — the nature of knowledge and of good, and their relation to one another, and to human life.

MENO.

PERSONS OF THE DIALOGUE.

MENO.	A SLAVE OF MENO.
SOCRATES.	ANYTUS.

Meno. CAN you tell me, Socrates, whether virtue is acquired by teaching or by practice; or if neither by teaching nor by practice, then whether it comes to man by nature, or in what other way?

Socrates. O Meno, there was a time when the Thessalians were famous among the other Hellenes only for their riches and their riding; but now, if I am not mistaken, they are equally famous for their wisdom, especially at Larisa, which is the native city of your friend Aristippus. And this is Gorgias' doing; for when he came there, the flower of the Aleuadae, of whom your lover Aristippus is one, and the other chiefs of the Thessalians, fell in love with his wisdom. And he has taught you the habit of answering questions in a grand and bold style, which becomes those who know, and is the style in which he himself answers all comers; and any Hellene who likes may ask him anything. How different is our lot! my dear Meno. Here at Athens there is a dearth of the commodity, and Steph. all wisdom seems to have emigrated from us to you. I 71 am certain that if you were to ask any Athenian whether virtue was natural or acquired, he would laugh in your face, and say: Stranger, you have far too good an opinion of me; if I were inspired I might answer your question. But now I literally do not know what virtue is, and much less whether it is acquired by teaching or not. And I myself, Meno, living as I do in this region of poverty, am as poor as the rest of the citizens; and I confess with shame that I know literally nothing

about virtue; and when I do not know the "quid" of anything how can I know the "quale?" How, if I knew nothing at all of Meno, could I tell if he was fair, or the opposite of fair; rich and noble, or the reverse of rich and noble? Do you think that I could?

Men. No, indeed. But are you in earnest, Socrates, in saying that you do not know what virtue is? And am I to carry back this report of you to Thessaly?

Soc. Not only that, my dear boy, but you may say further that I have never known of any one else who did, in my judgment.

Men. Then you have never met Gorgias when he was at Athens?

Soc. Yes, I have.

Men. And did you not think that he knew?

Soc. I have not a good memory, Meno, and therefore I cannot now tell what I thought of him at the time. And I dare say that he did know, and that you know what he said: please, therefore, to remind me of what he said; or, if you would rather, tell me your own view, for I dare say that you and he think much alike.

Men. True.

Soc. Then as he is not here, never mind him, and do you tell me. By the gods, Meno, be generous, and tell me what you say that virtue is; for I shall be truly delighted to find that I have been mistaken, and that you and Gorgias do really know what I have been saying that I have never found any body who knew.

Men. There will be no difficulty, Socrates, in answering that. Take first the virtue of a man: his virtue is to know how to administer the state, in the administration of which he will benefit his friends and damage his enemies, and will take care not to suffer damage himself. A woman's virtue may also be easily described: her virtue is to order her house, and keep what is indoors, and obey her husband. Every age, every con-
72 dition of life, young or old, male or female, bond or free, has a different virtue: there are virtues numberless, and no lack of definitions of them; for virtue is relative to the actions and ages of each of us in all that we do. And the same may be said of vice, Socrates.

Soc. How fortunate I am, Meno! When I ask you for one virtue, you present me with a swarm of them, which are in

your keeping. Suppose that I carry on the figure of the swarm, and ask of you, What is the nature of the bee? and you answer that there are many kinds of bees, and I reply: But do bees differ as bees, because there are many and different kinds of them; or are they not rather to be distinguished by some other quality, as, for example, beauty, size, or shape? How would you answer that?

Men. I should answer that bees do not differ from one another, as bees.

Soc. And suppose that I went on to say: That is what I want to know, Meno; tell me what is that quality in which they do not differ, but are all alike; you would be able to answer that?

Men. I should.

Soc. And so of the virtues, however many and different they may be, they have all a common nature which makes them virtues; and on this he who would answer the question, "What is virtue?" would do well to have his eye fixed. Do you understand?

Men. I am beginning to understand; but I do not as yet take hold of the question as I could wish.

Soc. When you say, Meno, that there is one virtue of a man, another of a woman, another of a child, and so on; does this apply only to virtue, or would you say the same of health, and size, and strength? Or is the nature of health always the same, whether in man or woman?

Men. I should say that health, regarded as health, is the same, whether of man or woman.

Soc. And is not this true of size and strength? If a woman is strong, she will be strong by reason of the same form and of the same strength subsisting in her which there is in the man. I mean to say that strength, as strength, whether of man or woman, is the same. Is there any difference? 73

Men. I think not.

Soc. And will not virtue, as virtue, be the same, whether in a child or in a grown-up person, in a woman or in a man?

Men. I cannot help feeling, Socrates, that this case is not like the others.

Soc. Why? Were you not saying that the virtue of a man was to order a state, and the virtue of a woman was to order a house?

Men. I did say that.

Soc. And can either house or state or anything be well ordered without temperance and without justice?

Men. Certainly not.

Soc. Then they who order a state or a house temperately or justly order them with temperance and justice?

Men. Certainly.

Soc. Then both men and women, if they are to be good men and women, must have the same virtues of temperance and justice?

Men. True.

Soc. And can either a young man or an old one be good, if they are intemperate and unjust?

Men. They cannot.

Soc. They must be temperate and just?

Men. Yes.

Soc. Then all men are good in the same way, and by participation in the same virtues?

Men. That is the inference.

Soc. And they surely would not have been good in the same way, unless their virtue had been the same?

Men. They would not.

Soc. Then now that the sameness of all virtue has been proven, try and remember what you and Gorgias say that virtue is.

Men. Will you have one definition of them all?

Soc. That is what I am seeking.

Men. What can I say but that virtue is the power of governing mankind?

Soc. And does this definition of virtue include all virtue? Is virtue the same in a child and in a slave, Meno? Ought the child to govern his father, or the slave his master; and would he who governed be any longer a slave?

Men. I think not, Socrates.

Soc. No, indeed; there would be small reason in that. Yet once more, fair friend; according to you, virtue is "the power of governing;" but do you not add "justly" and not unjustly?

Men. Yes, Socrates; I agree to that, for justice is virtue.

Soc. Would you say "virtue," Meno, or "a virtue?"

Men. What do you mean?

Soc. I mean as I might say about anything; that a round, for example, is "a figure" and not simply "figure," and I should say this because there are other figures.

Men. Quite right; and that is just what I am saying about virtue — that there are other virtues as well as justice.

Soc. What are they? tell me the names of them, as I would tell you the names of the other figures if you asked me. 74

Men. Courage and temperance and wisdom and magnificence are virtues; and there are many others.

Soc. Yes, Meno; and again we are in the same case: in searching after one virtue we have found many, though not in the same way as before; but we have been unable to find the common element which runs through them all.

Men. Why, Socrates, even now I am not able to follow you in the attempt to get at one common notion of virtue as of other things.

Soc. No wonder; but I will try to arrive a little nearer if I can, for you know that all things have a common notion. Suppose now that some one asked you the question which I asked before: Meno, he would say, what is figure? And if you answered "roundness," he would reply to you, in my way of speaking, by asking whether you would say that roundness is "figure" or "a figure;" and you would answer "a figure."

Men. Certainly.

Soc. And for this reason — that there are other figures?

Men. Yes.

Soc. And if he proceeded to ask, what other figures are there? you would have told him.

Men. I should.

Soc. And if he similarly asked what color is, and you answered whiteness, and the questioner rejoined, Would you say that whiteness is color or a color? you would reply, A color, because there are other colors as well.

Men. I should.

Soc. And if he had said, Tell me what they are, you would have told him of other colors which are colors just as much as whiteness.

Men. Yes.

Soc. And suppose that he were to pursue the matter in my way, he would say: Ever and anon we are landed in particulars, but this is not what I want; tell me then, since you call them by a common name, and say that they are all figures, even when opposed to one another, what is that common nature which you designate as figure — which comprehends straight as well as

round, and is no more one than the other; would you not say that?

Men. Yes.

Soc. And in saying that, you do not mean to say that the round is round any more than straight, or the straight any more straight than round?

Men. Certainly not.

Soc. You only assert that the round figure is not more a figure than the straight, or the straight than the round?

Men. That is true.

Soc. What then is this which is called figure? Try and answer. Suppose that when a person asked you this question either about figure or color, you were to reply, Man, I do not understand what you want, or know what you are saying; he would look rather astonished and say: Do you not understand that I am looking for the "simile in multis"? And then he might put the question in another form: Meno, he might say, what is that "simile in multis" which you call figure, and which includes not only round and straight figures, but all? Could you not answer that question, Meno? I wish that you would try; the attempt will be good practice with a view to the answer about virtue.

Men. I would rather that you should answer, Socrates.

Soc. Shall I indulge you?

Men. By all means.

Soc. And then you will tell me about virtue?

Men. I will.

Soc. Then I must do my best, for there is a prize to be won.

Men. Certainly.

Soc. Well, I will try and explain to you what figure is. What do you say to this answer? — Figure is the only thing that always follows color. I hope that you are satisfied with that, as I am sure I should be content if you would let me have a similar definition of virtue.

Men. But that, Socrates, is a simple answer.

Soc. Why simple?

Men. Because you say that figure is that which always follows color; but if a person says that he does not know what color is, any more than what figure is — what sort of answer would you have given him?

Soc. I should have told him the truth. And if he were a

philosopher of the eristic and antagonistic sort, I should say to him: You have my answer, and if I am wrong, your business is to take up the argument and refute me. But if I were talking as you and I now are, as between friends, I should reply in a milder strain and more in the dialectician's way; that is to say, I should not only speak the truth, but I should make use of premises which the person interrogated would be willing to admit. And this is the way in which I shall approach you. You will acknowledge, will you not, that there is such a thing as an end, or termination, or extremity? — all of which words I use in the same sense, although I am aware that Prodicus might quarrel with us about this: but still you, I am sure, would speak of a thing as ended or terminated — that is all which I am saying — not anything very difficult.

Men. Yes, I should; and I believe that I understand your meaning. 76

Soc. And you would speak of a surface and also of a solid, as for example in geometry.

Men. Yes.

Soc. Well, then, you are now in a condition to understand my definition of figure. I define figure to be that in which the solid ends; or, more concisely, as the limit of solid.

Men. And now, Socrates, what is color?

Soc. You are outrageous, Meno, in thus plaguing a poor old man to give you an answer, when you won't take the trouble of remembering what is Gorgias' definition of virtue.

Men. When you have told me what I ask, I will tell you, Socrates.

Soc. A man who was blindfolded has only to hear you talking, and he would know that you are a fair creature and have still many lovers.

Men. Why do you say that?

Soc. Why, because you always speak in imperatives: like all beauties when they are in their prime, you are tyrannical; and also, as I suspect, you have found out that I have a weakness for the fair, and therefore I must humor you and answer.

Men. Please do.

Soc. Would you like me to answer you after the manner of Gorgias, which is familiar to you?

Men. I should very much like that.

Soc. Do not he and Empedocles say that there are certain effluences of existence?

Men. Certainly.

Soc. And passages into which and through which the effluences pass?

Men. Exactly.

Soc. And some of the effluences fit into the passages, and some of them are too small or too large?

Men. True.

Soc. And there is such a thing as sight?

Men. Yes.

Soc. And now, as Pindar says, "Read my meaning:" color is an effluence of form, commensurate with sight, and sensible.

Men. That, Socrates, appears to me to be an admirable answer.

Soc. Why, yes, because it is just such a one as you have been in the habit of hearing: and your wit will have discovered that you may explain in the same way the nature of sound and smell, and of many other similar phenomena.

Men. Quite true.

Soc. The answer, Meno, was in the orthodox solemn vein, and therefore was more acceptable to you than the other answer about figure.

Men. Yes.

Soc. And yet, O son of Alexidemus, I cannot help thinking that the other was the better; and I am sure that you would be of the same opinion, if you would only stay and be initiated, and were not compelled, as you said yesterday, to go away before the mysteries.

77 *Men.* But I will gladly stay, Socrates, if you will give me many such answers.

Soc. Well then, for my own sake as well as for yours, I will do my very best; but I am afraid that I shall not be able to give you very many as good: and now, in your turn, you are to fulfill your promise, and tell me what virtue is in the universal; and do not make a singular into a plural, as the facetious say of those who break a thing, but deliver virtue to me whole and sound and not broken into a number of pieces. I have given you the pattern.

Men. Well then, Socrates, virtue, as I take it, is the love and attainment of the honorable; that is what the poet says, and I say too, —

"Virtue is the desire and power of attaining the honorable."

Soc. And does he who desires the honorable also desire the good?

Men. Certainly.

Soc. Then are there some who desire the evil and others who desire the good? Do not all men, my dear sir, desire good?

Men. No, I do not think that.

Soc. There are some who desire evil?

Men. Yes.

Soc. Do you mean that they think the evils which they desire to be good; or do they know that they are evil and yet desire them?

Men. Both, as I think.

Soc. And do you really imagine, Meno, that a man knows evils to be evils and desires them notwithstanding?

Men. Certainly I do.

Soc. And desire is of possession?

Men. Yes, of possession.

Soc. And does he think that the evils will do good to him who possesses them, or does he know that they will do him harm?

Men. There are some who think that the evils will do them good, and others who know that they will do them harm.

Soc. And, in your opinion, do those who think that they will do them good know that they are evils?

Men. No, I certainly do not think that.

Soc. Can anything be clearer than that those who are ignorant of the evils do not desire them, but they desire what they suppose to be good when they are really evils, and they who do not know them to be evils, and suppose them to be good, desire good?

Men. Yes, in that case.

Soc. Well, and do those who, as you say, desire evils, and think that evils are hurtful to the possessor of them, know that they will be hurt by them?

Men. They must know that.

Soc. And do they not suppose that they are miserable 78
in the degree that they are hurt?

Men. That again they must believe.

Soc. And are not the miserable ill-fated?

Men. Yes, indeed.

Soc. And does any one desire to be miserable and ill-fated?

Men. I should say not, Socrates.

Soc. But if there is no one who desires to be miserable, there is no one, Meno, who desires evil; for what is misery but the desire and possession of evil?

Men. That appears to be the truth, Socrates, and I admit that nobody desires evil.

Soc. And yet, were you not saying just now that virtue is the desire and power of attaining good?

Men. Yes, I did say that.

Soc. But granting that, then the desire of good is common to all, and one man is no better than another in that?

Men. True.

Soc. And if one man is not better than another in desiring good, he must be better in the power of attaining good?

Men. Exactly.

Soc. Then, according to your definition, virtue would appear to be the power of attaining good?

Men. I entirely approve, Socrates, of the manner in which you view this matter.

Soc. Then now let us see whether this is true from another point of view; for I dare say that you are right. What you say is, that virtue is the power of attaining good?

Men. Yes.

Soc. And you would say that goods are such as health and wealth and the possession of gold and silver, and having office and honor in the state — these are what you would call goods?

Men. Yes all these.

Soc. Then, according to Meno, who is the hereditary friend of the great king, virtue is the power of getting silver and gold; and would you add piously, justly, or do you deem this of no consequence? And is any mode of acquisition, even if unjust or dishonest, equally to be regarded as virtue?

Men. Not virtue, Socrates, but vice.

Soc. Then justice or temperance or holiness, or some other part of virtue, as would appear, must accompany the acquisition, and without them the mere acquisition of good will not be virtue.

Men. Why, how can there be virtue without these?

Soc. And the non-acquisition of gold and silver in a dishonest manner may be equally virtue?

Men. True.

Soc. Then the acquisition of such goods is no more virtue

than the non-acquisition of them; but whatever is accompanied by justice or honesty is virtue, and whatever is devoid of justice is vice? 79

Men. There can be no doubt about that, in my judgment.

Soc. And were we not saying just now that justice, temperance, and the like, were each of them a part of virtue?

Men. Yes.

Soc. And so, Meno, this is the way in which you mock me.

Men. Why do you say that, Socrates?

Soc. Why, because I asked you to deliver virtue into my hands whole and unbroken, and I gave you a pattern according to which you were to frame your answer; and you have already forgotten this, and tell me that virtue is the power of attaining good justly, or with justice, — thus acknowledging justice to be a part of virtue.

Men. Yes.

Soc. Then it follows from your own admissions, that virtue is doing what you do with a part of virtue; for justice and the like are each of them parts of virtue.

Men. What of that?

Soc. What of that! Why, did not I ask you to tell me the nature of virtue as a whole? And you are very far from telling me this; but declare every action to be virtue which is done with a part of virtue; as though you had already told me the whole of virtue, and as if I should know what the whole was when frittered away into little pieces. And, therefore, my dear Meno, I fear that I must begin again and repeat the same question: What is virtue? for otherwise, I can only say, that every action done with a part of virtue is virtue; what else is the meaning of saying that every action done with justice is virtue? Don't you think that the question requires to be repeated; for can any one who does not know virtue know a part of virtue?

Men. No: I do not say that he can.

Soc. Do you remember how, in the example of figure, we rejected any answer given in terms which were as yet unexplained or unadmitted?

Men. Yes, Socrates; and we were right in that.

Soc. Well, my friend, do as we did then: and do not suppose that we can explain to any one the nature of virtue as a whole through some unexplained portion of virtue, or anything at all in that fashion; for that only leads to a repetition of the old question, What is virtue? Now, am I not right?

Men. I believe that you are.

Soc. Then begin again, and answer me, What, according to you and your friend, is the definition of virtue?

80 *Men.* O Socrates; I used to be told, before I knew you, that you are always puzzling yourself and others; and now you are casting your spells over me, and I am simply getting bewitched and enchanted, and am at my wits' end. And if I may venture to make a jest upon you, you seem to me both in your appearance and in your power over others to be very like the flat torpedo fish, who torpifies those who come near him with the touch, as you have now torpified me, I think. For my soul and my tongue are really torpid, and I do not know how to answer you; and though I have been delivered of an infinite variety of speeches about virtue before now, and to many persons, — and very good ones they were, as I thought, — now I cannot even say what virtue is. And I think that you are very wise in not voyaging and going away from home, for if you did in other places as you do in Athens, you would be cast into prison as a magician.

Soc. You are a rogue, Meno, and had all but caught me.

Men. What do you mean, Socrates?

Soc. I can tell why you made a simile about me.

Men. Why, do you think?

Soc. In order that I might make another simile about you. For I know that all pretty young gentlemen like to have pretty similes made about them; and well they may: but I shall not return the compliment. As to my being a torpedo, if the torpedo is torpid as well as the cause of torpidity in others, then indeed I am a torpedo, but not otherwise; for I perplex others, not because I am clear, but because I am utterly perplexed myself. And now I know not what virtue is, and you seem to be in the same case, although you did once know before you touched me. However, I have no objection to join with you in the inquiry.

Men. And how will you inquire, Socrates, into that which you know not? What will you put forth as the subject of inquiry? And if you find what you want, how will you ever know that this is what you did not know?

Soc. I know, Meno, what you mean; but just see what a tiresome dispute you are introducing. You argue that a man cannot inquire either about that which he knows, or about that which he does not know; for he knows, and therefore has no

need to inquire about that — nor about that which he does not know; for he does not know that about which he is to inquire. 81

Men. Well, Socrates, and is not the argument sound?

Soc. I think not.

Men. Why not?

Soc. I will tell you why. I have heard from certain wise men and women who spoke of things divine that —

Men. What did they say?

Soc. They spoke of a glorious truth, as I conceive.

Men. What was that? and who were they?

Soc. Some of them were priests and priestesses, who had studied how they might be able to give a reason of their profession: there have been poets also, such as the poet Pindar and other inspired men. And what they say is — mark, now, and see whether their words are true — they say that the soul of man is immortal, and at one time has an end, which is termed dying, and at another time is born again, but is never destroyed. And the moral is, that a man ought to live always in perfect holiness. For in the ninth year Persephone sends the souls of those from whom she has received the penalty of ancient crime back again into the light of this world, and these are they who become noble kings and mighty men and great in wisdom, and are called saintly heroes in after ages. The soul, then, as being immortal, and having been born again many times, and having seen all things that there are, whether in this world or in the world below, has knowledge of them all; and it is no wonder that she should be able to call to remembrance all that she ever knew about virtue, and about everything; for as all nature is akin, and the soul has learned all things, there is no difficulty in her eliciting, or as men say learning, all out of a single recollection, if a man is strenuous and does not faint; for all inquiry and all learning is but recollection. And therefore we ought not to listen to this sophistical argument about the impossibility of inquiry: that is a saying which will make us idle, and is sweet only to the sluggard; but the other saying will make us active and enterprising. In that confiding, I will gladly inquire with you into the nature of virtue.

Men. Yes, Socrates; but what do you mean by saying that we do not learn, and that what we call learning is only a process of recollection? Can you teach me that?

Soc. I told you, Meno, that you were a rogue, and now you ask whether I can teach you, when I am saying that there is
82 no teaching, but only recollection; and thus you imagine that you will involve me in a contradiction.

Men. Indeed, Socrates, I protest that I had no such intention. I only asked the question from habit; but if you can prove to me that what you say is true, I wish that you would.

Soc. That is no easy matter, but I will try to please you to the utmost of my power. Suppose that you call one of your numerous attendants, that I may demonstrate on him.

Men. Certainly. Come hither, boy.

Soc. He is Greek, and speaks Greek, does he not?

Men. Yes; he was born in the house.

Soc. Attend now to the questions which I ask him, and observe whether he learns of me or only remembers.

Men. I will.

Soc. Tell me, boy, do you know that a figure like this is a square?

Boy. I do.

Soc. And you know that a square figure has these four lines equal?

Boy. Certainly.

Soc. And these lines which I have drawn through the middle of the square are also equal?

Boy. Yes.

Soc. A square may be of any size?

Boy. Certainly.

Soc. And if one side of the figure be of two feet, and the other side be of two feet, how much will the whole be? Let me explain: if in one direction the space was of two feet, and in the other direction of one foot, the whole would be of two feet taken once?

Boy. Yes.

Soc. But since this side is also of two feet, there are twice two feet?

Boy. There are.

Soc. Then the square is of twice two feet?

Boy. Yes.

Soc. And how many are twice two feet? count and tell me.

Boy. Four, Socrates.

Soc. And might there not be another square twice as large as this, and having like this the lines equal?

Boy. Yes.

Soc. And of how many feet will that be?

Boy. Of eight feet.

Soc. And now try and tell me the length of the line which forms the side of that double square: this is two feet — what will that be?

Boy. Clearly, Socrates, that will be double.

Soc. Do you observe, Meno, that I am not teaching the boy anything, but only asking him questions; and now he fancies that he knows how long a line is necessary in order to produce a figure of eight square feet; does he not?

Men. Yes.

Soc. And does he really know?

Men. Certainly not.

Soc. He only guesses that [because the square is double], the line is double.

Men. True.

Soc. Observe him while he recalls the steps in regular order. (*To the Boy.*) Tell me, boy, do you assert that a double space comes from a double line? Remember that I am not 83
speaking of an oblong, but of a square, and of a square twice the size of this one — that is to say of eight feet; and I want to know whether you still say that a double square comes from a double line?

Boy. Yes.

Soc. But does not this line become doubled if we add another such line here?

Boy. Certainly.

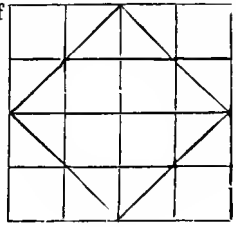
Soc. And four such lines will make a space containing eight feet?

Boy. Yes.

Soc. Let us describe such a figure: is not that what you would say is the figure of eight feet?

Boy. Yes.

Soc. And are there not these four divisions in the figure, each of which is equal to the figure of four feet?



Boy. True.

Soc. And is not that four times four?

Boy. Certainly.

Soc. And four times is not double?

Boy. No, indeed.

Soc. But how much?

Boy. Four times as much.

Soc. Therefore the double line, boy, has formed a space, not twice, but four times as much.

Boy. True.

Soc. And four times four are sixteen — are they not?

Boy. Yes.

Soc. What line would give you a space of eight feet, as this gives one of sixteen feet; do you see?

Boy. Yes.

Soc. And the space of four feet is made from this half line?

Boy. Yes.

Soc. Good; and is not a space of eight feet twice the size of this, and half the size of the other?

Boy. Certainly.

Soc. Such a space, then, will be made out of a line greater than this one, and less than that one.

Boy. Yes; that is what I think.

Soc. Very good; I like to hear you say what you think. And now tell me, is not this a line of two feet and that of four?

Boy. Yes.

Soc. Then the line which forms the side of eight feet ought to be more than this line of two feet, and less than the other of four feet?

Boy. It ought.

Soc. Try and see if you can tell me how much it will be.

Boy. Three feet.

Soc. Then if we add a half to this line of two, that will be the line of three. Here are two and there is one; and on the other side, here are two also and there is one: and that makes the figure of which you speak?

Boy. Yes.

Soc. But if there are three feet this way and three feet that way, the whole space will be three times three feet?

Boy. That is evident.

Soc. And how much are three times three feet?

Boy. Nine.

Soc. And how much is the double of four?

Boy. Eight.

Soc. Then the figure of eight is not made out of a line of three?

Boy. No.

84 *Soc.* But from what line? — tell me exactly; and if you would rather not reckon, try and show me the line.

Boy. Indeed, Socrates, I do not know.

Soc. Do you see, Meno, what advances he has made in his power of recollection? He did not know at first, and he does not know now, what is the side of a figure of eight feet: but then he thought that he knew, and answered confidently as if he knew, and had no difficulty; but now he has a difficulty, and neither knows nor fancies that he knows.

Men. True.

Soc. Is he not better off in knowing his ignorance?

Men. I think that he is.

Soc. If we have made him doubt, and given him the "torpedo's shock," have we done him any harm?

Men. I think not.

Soc. We have certainly done something that may assist him in finding out the truth of the matter; and now he will wish to remedy his ignorance, but then he would have been ready to tell all the world that the double space should have a double side.

Men. True.

Soc. But do you suppose that he would ever have inquired or learned what he fancied that he knew and did not know, until he had fallen into perplexity under the idea that he did not know, and had desired to know?

Men. I think not, Socrates.

Soc. Then he was the better for the torpedo's touch?

Men. I think that he was.

Soc. Mark now the farther development. I shall only ask him, and not teach him, and he shall share the inquiry with me: and do you watch and see if you find me telling or explaining anything to him, instead of eliciting his opinion. Tell me, boy, is not this a square of four feet which I have drawn?

Boy. Yes.

Soc. And now I add another square equal to the former one.

Boy. Yes.

Soc. And a third, which is equal to either of them?

Boy. Yes.

Soc. Suppose that we fill up the vacant corner.

Boy. Very good.

Soc. Here, then, there are four equal spaces?

Boy. Yes.

Soc. And how many times is this space larger than this?

Boy. Four times.

Soc. But it ought to have been twice only, as you will remember.

Boy. True.

Soc. And does not this line, reaching from corner to corner, bisect each of these spaces?

Boy. Yes.

Soc. And are there not here four equal lines which contain this space?

Boy. There are.

Soc. Look and see how much this space is.

Boy. I do not understand.

Soc. Has not each interior line cut off half of the four spaces?

Boy. Yes.

Soc. And how many such spaces are there in this division?

Boy. Four.

Soc. And how many in this?

Boy. Two.

Soc. And four is how many times two.

Boy. Twice.

Soc. And this space is how many feet?

Boy. Of eight feet.

Soc. And from what line do you get this figure?

Boy. From this.

Soc. That is, from the line which extends from corner to corner?

Boy. Yes.

Soc. And that is the line which the learned call the diagonal. And if this is the proper name, then you, Meno's slave, are prepared to affirm that the double space is the square of the diagonal?

Boy. Certainly, Socrates.

Soc. What do you say of him, Meno? Were not all these answers given out of his own head?

Men. Yes, they were all his own.

Soc. And yet, as we were just now saying, he did not know?

Men. True.

Soc. And yet he had those notions in him?

Men. Yes.

Soc. Then he who does not know still has true notions of that which he does not know?

Men. He has.

Soc. And at present these notions are just wakening up in him, as in a dream; but if he were frequently asked the same questions, in different forms, he would know as well as any one at last?

Men. I dare say.

Soc. Without any one teaching him he will recover his knowledge for himself, if he is only asked questions?

Men. Yes.

Soc. And this spontaneous recovery in him is recollection?

Men. True.

Soc. And this knowledge which he now has must he not either have acquired or always possessed?

Men. Yes.

Soc. But if he always possessed this knowledge he would always have known; or if he has acquired the knowledge he could not have acquired it in this life, unless he has been taught geometry; for he may be made to do the same with all geometry and every other branch of knowledge. Now, has any one ever taught him? You must know that, if, as you say, he was born and bred in your house.

Men. And I am certain that no one ever did teach him.

Soc. And yet has he not the knowledge?

Men. That, Socrates, is most certain.

Soc. But if he did not acquire this knowledge in this 86
life, then clearly he must have had and learned it at some other time?

Men. That is evident.

Soc. And that must have been the time when he was not a man?

Men. Yes.

Soc. And if there have been always true thoughts in him, both at the time when he was and was not a man, which only need to be awakened into knowledge by putting questions to him, his soul must have always possessed this knowledge, for he always either was or was not a man?

Men. That is clear.

Soc. And if the truth of all things always existed in the soul, then the soul is immortal. Wherefore be of good cheer, and try to recollect what you do not know, or rather do not remember.

Men. I feel, somehow, that I like what you are saying.

Soc. And I, Meno, like what I am saying. Some things I have said of which I am not altogether confident. But that we shall be better and braver and less helpless if we think that we ought to inquire, than we should have been if we indulged in the idle fancy that there was no knowing and no use in searching after what we know not; that is a theme upon which I am ready to fight, in word and deed, to the utmost of my power.

Men. That again, Socrates, appears to me to be well said.

Soc. Then, as we are agreed that a man should inquire about that which he does not know, shall you and I make an effort to inquire together into the nature of virtue?

Men. By all means, Socrates. And yet I would rather return to my original question, Whether virtue comes by instruction, or by nature, or is gained in some other way?

Soc. Had I the command of you as well as of myself, Meno, I would not have inquired whether virtue is given by instruction or not, until we had first ascertained "what virtue is." But as you never think of controlling yourself, but only of controlling him who is your slave, and this is your notion of freedom, I must yield to you, for I cannot help. And therefore I have now to inquire into the qualities of that of which I do not at present know the nature. At any rate, will you condescend a little, and allow the question, "Whether virtue is given by instruction, or in any other way," to be argued upon hypothesis?

87 As the geometrician, when he is asked whether a certain triangle is capable of being described in a certain circle, will reply: "I cannot tell you as yet; but I will offer a hypothesis which may assist us in forming a conclusion: If the space be such that when you have drawn along the line given by it another figure, the original figure is reduced by a space equal to that which is added,[1] then one consequence follows, and if this is impossible then some other; and therefore I wish to assume a hypothesis before I tell you whether this triangle is capable of being included in the circle:" that is a geometrical hypothesis. And we too, as we know not the nature and qualities of virtue, must ask, whether virtue is or is not taught, under a hypothesis: as thus, if virtue is of such a class of mental goods, will it be taught or not? Let the first hypothesis be that virtue is or is not knowledge, — in that case will it be taught or not? or, as we were just now saying, "remembered?"

[1] Or, in simpler phrase, "If so much be taken from the triangle."

For there is no use in disputing about the name. But is virtue taught or not? or rather, does not every one see that knowledge alone is taught?

Men. I agree.

Soc. Then if virtue is knowledge, virtue will be taught?

Men. Certainly.

Soc. Then now we have made a quick end of this question: if virtue is of such a nature, it will be taught; and if not, not?

Men. Certainly.

Soc. And the next question is, whether virtue is knowledge or of another species?

Men. Yes, that appears to be the question which comes next in order.

Soc. Do we not say that virtue is a good? This is a hypothesis which is not set aside.

Men. Certainly.

Soc. Now, if there be any sort of good which is parted from knowledge, virtue may be that good; but if knowledge embraces all good, then we shall be right in thinking that knowledge is some sort of good?

Men. True.

Soc. And virtue makes us good?

Men. Yes.

Soc. And if we are good, then we are profitable; for all good things are profitable?

Men. Yes.

Soc. Then virtue is profitable?

Men. That is the only inference.

Soc. Then now let us see what are the things that severally profit us. Health and strength, and beauty and wealth, — these, as we say, are the sort of things which profit us?

Men. True.

88

Soc. And yet these things may also sometimes do us harm: would you not admit that?

Men. Yes.

Soc. And what is the guiding principle which makes them profitable or the reverse? Are they not profitable when they are rightly used, and hurtful when they are not rightly used?

Men. Certainly.

Soc. Next, let us consider the goods of the soul: these are temperance, justice, courage, quickness of apprehension, memory, magnificence, and the like?

Men. Surely.

Soc. And such of these as are not knowledge, but of another sort, are sometimes profitable and sometimes hurtful; as, for example, courage, which has no prudence, but is only a sort of confidence? When a man has no sense he is harmed by courage, but when he has sense he is profited?

Men. True.

Soc. And the same may be said of temperance and quickness of apprehension; whatever things are learned or done with sense are profitable, but when done without sense they are hurtful?

Men. Very true.

Soc. And in general, all that the soul attempts or endures, when under the guidance of wisdom, ends in happiness; but when she is under the guidance of folly, in the opposite?

Men. That appears to be true.

Soc. If then virtue is a good of the soul, and is to be profitable, it must be wisdom or prudence, since some of the goods of the soul are either profitable or hurtful by the addition of wisdom or of folly; and therefore if virtue is profitable, virtue must be a sort of wisdom or prudence?

Men. That is my view.

Soc. And the other goods, such as wealth and the like, of which we were just now saying that they are sometimes good and sometimes evil, are they not also made profitable or hurtful, accordingly as the soul guides and uses them rightly or wrongly — as in the soul generally, wisdom is the useful and folly the hurtful guide?

Men. True.

Soc. And the wise soul guides them rightly, and the foolish soul wrongly?

Men. Yes.

89 *Soc.* And is not this universally true of human nature? All other things hang upon the soul, and the things of the soul hang upon wisdom, if they are to be good; and according to this view of the question that which profits is wisdom — and virtue, as we say, is profitable?

Men. Certainly.

Soc. And thus we arrive at the conclusion that virtue is either wholly or partly wisdom?

Men. I think that what you are saying, Socrates, is very true.

Soc. But if this is true, then the good are not by nature good?

Men. I think not.

Soc. If they had been, there would assuredly have been discerners of characters among us who would have known our future great men; and we should have taken them on their showing, and when we had got them, we should have kept them in the citadel out of the way of harm, and set a stamp upon them more than upon gold, in order that no one might tamper with them; and then when they grew up they would have been useful to the state?

Men. Yes, Socrates, that would have been the way.

Soc. But if the good are not by nature good, are they made good by instruction?

Men. There is no other alternative, Socrates. On the supposition that virtue is knowledge, there can be no doubt that virtue is taught.

Soc. Yes, indeed; but what if the supposition is erroneous?

Men. I certainly thought just now that we were right.

Soc. Yes, Meno; but a principle which has any soundness should stand firm not only now and then, but always and forever.

Men. Well; and why are you so slow of heart to believe that knowledge is virtue?

Soc. I will try and tell you why, Meno. I do not retract the assertion that if virtue is knowledge it may be taught; but I fear that I have some reason in doubting whether virtue is knowledge: for consider now and say whether virtue, or anything that is taught, must not have teachers and disciples?

Men. Surely.

Soc. And again, may not that art of which there are neither teachers nor disciples be assumed to be incapable of being taught?

Men. True; but do you think that there are no teachers of virtue?

Soc. I have certainly often inquired whether there were any, and taken great pains to find them, and have never succeeded; and many have assisted me in the search, and they were the persons whom I thought the most likely to know. Here is Anytus, who is sitting by us at the very moment when he is wanted; he is the person whom we should ask. In the first place, he is the son of a wealthy and wise father, An- 90

themion, who acquired his wealth, not by accident or gift, like Ismenias the Theban (who has recently made himself as rich as a Polycrates), but by his own skill and industry, and he is a well-conditioned, modest man, not insolent, or overbearing, or annoying; moreover, he has given his son a good education, as the Athenian people certainly appear to think, for they choose him to fill the highest offices. And these are the sort of men from whom you are likely to learn whether there are any teachers of virtue, and who they are. Please, Anytus, to help me and your friend Meno in answering our question, Who are the teachers? Consider the matter thus: If we wanted Meno to be a good physician, to whom should we send him? Should we not send him to the physicians?

Any. Certainly.

Soc. Or if we wanted him to be a good cobbler, should we not send him to the cobblers?

Any. Yes.

Soc. And so forth?

Any. Yes.

Soc. Let me trouble you with one more question. When we say that we should be right in sending him to the physicians if we wanted him to be a physician, do we mean that we should be right in sending him to those who profess the art, rather than to those who don't, and to those who demand payment for teaching the art, and profess to teach it to any one who will come and learn? If we were right in sending him, would that be the reason?

Any. Yes.

Soc. And might not the same be said of flute-playing, and of the other arts? No man who wanted to make a man a flute-player would refuse to send him to those who profess to teach the art for money, and trouble other persons to give him instruction who do not profess to teach, and never had a disciple in that branch of knowledge which we want him to acquire, — that would be the height of folly.

Any. Yes, by Zeus, and of ignorance too.

91 *Soc.* Very good. And now you are in a position to advise with me about my friend Meno. He has been saying to me, Anytus, that he desires to attain that wisdom and virtue, by which men order the state or the house, and honor their parents, and know when to receive and when to send away citizens and strangers, as a good man should. Now, to

whom ought we to send him in order that he may learn this virtue? Does not the previous argument imply clearly that he ought to go to those who profess and avouch that they are the common teachers of Hellas, and are ready to impart instruction to any one who likes, at a fixed price?

Any. Whom do you mean, Socrates?

Soc. You surely know, do you not, Anytus, that these are the people whom mankind describe as Sophists?

Any. By Heracles, Socrates, forbear! I only hope that no friend or kinsman or acquaintance of mine, whether citizen or stranger, will ever be so mad as to allow himself to be corrupted by them; for they are a manifest pest and corrupting influence of those who have to do with them.

Soc. What do you mean, Anytus? Of all the people who profess that they know how to do men good, are these the only ones who not only do them no good, but positively corrupt those who are intrusted to them? That is very singular. And moreover, in return they publicly demand money. Indeed, I cannot believe this; for I know of a single man, Protagoras, who made more out of his craft than the illustrious Pheidias, or any ten other statuaries. How could that be? A mender of old shoes, or patcher up of clothes, who made the shoes or clothes worse than he received them, could not have remained thirty days undetected, and would very soon have starved; whereas, during more than forty years, Protagoras was corrupting his disciples, and sending them from him worse than he received them, and yet all Hellas failed in detecting him. For, if I am not mistaken, he was about seventy years old at his death, forty of which were spent in the practice of his profession; and during all that time he had a good reputation, which to this day he retains: and not only Protagoras, but many others have a good reputation; some who lived before him, and others who are still living. Now, when you say that they deceived and corrupted the youth, are they to be supposed 92
to have corrupted them intentionally or unintentionally? Can those who were deemed by many to be the wisest men of Hellas have been out of their minds?

Any. Out of their minds! No, Socrates; the young men who gave their money to them were out of their minds, and their relations and guardians who intrusted them to their care were still more out of their minds, and most of all the cities who allowed them to come in and did not drive them out, citizen or stranger alike.

Soc. Has any of the Sophists wronged you, Anytus? What makes you so angry with them?

Any. No, indeed, neither I nor any of my belongings has ever had, nor would I suffer them to have, anything to do with them.

Soc. Then you are entirely unacquainted with them?

Any. And I have no wish to be acquainted.

Soc. Then, my dear friend, how can you know whether a thing is good or bad of which you are wholly ignorant?

Any. Quite well; I am quite sure that I know what manner of men these are, whether I know them or not.

Soc. You must be a diviner, Anytus, for I really cannot make out, judging from your own words, how, if you are not acquainted with them, you know about them. But I am not inquiring of you who are the teachers who will corrupt Meno (let them be, if you please, the Sophists); I only ask you to tell him who there is in this great city who will teach him how to become eminent in the virtues which I was just now describing. He is the friend of your family, and you will oblige him.

Any. Why don't you tell him?

Soc. I have told him whom I supposed to be the teachers of these things; but I learn from you that I am utterly at fault, and I dare say that you are right. And now I wish that you, on your part, would tell me to whom among the Athenians he should go. Whom would you name?

Any. Why single out individuals? Any Athenian gentleman, taken at random, if he will mind him, will do him far more good than the Sophists.

Soc. And did those gentlemen grow of themselves; and without having been taught by any one, were they nevertheless
93 able to teach others that which they never learned themselves?

Any. I imagine that they learned of the previous generation of gentlemen. Have there not been many good men in this city?

Soc. Yes, certainly, Anytus: and many good statesmen also there always have been, and there are still, in the city of Athens. But the question is whether they were also good teachers of their own virtue; not whether there are, or have been, good men, but whether virtue can be taught, is the question which we have been discussing. Now, do we mean to say that the good men of our own and of other times knew how to impart

to others that virtue which they had themselves; or is this virtue incapable of being communicated or imparted by one man to another? That is the question which I and Meno have been arguing. Look at the matter in your own way. Would you not admit that Themistocles was a good man?

Any. Certainly; no man better.

Soc. And must not he then have been a good teacher, if any man ever was a good teacher, of his own virtue?

Any. Yes, certainly, — if he wanted to be that.

Soc. But would he not have wanted? He would, at any rate, have desired to make his own son a good man and a gentleman; he could not have been jealous of him, or have intentionally abstained from imparting to him his own virtue. Did you never hear that he made Cleophantus, who was his son, a famous horseman? — he would stand upright on horseback and hurl a javelin; and many other marvelous things he could do which his father had him taught; and in anything which the skill of a master could teach him he was well trained. Have you not heard from our elders of this?

Any. I have.

Soc. Then no one could say that his son showed any want of capacity?

Any. Possibly not.

Soc. But did any one, old or young, ever say in your hearing that Cleophantus, the son of Themistocles, was a wise or good man, as his father was?

Any. I have certainly never heard that.

Soc. And if virtue could have been taught, would he have sought to train him in these sort of accomplishments, and allowed him who, as you must remember, was his own son, to be no better than his neighbors in those qualities in which he himself excelled?

Any. Indeed, indeed I think not.

Soc. Here then is a teacher of virtue whom you admit to be among the best men of the past. Let us take another, — 94
Aristides the son of Lysimachus: would you not acknowledge that he was a good man?

Any. To be sure, I should.

Soc. And did not he train his son Lysimachus better than any other Athenian in all that could be done for him by the help of masters? But what has been the result? Is he a bit better than any other mortal? He is an acquaintance of yours,

and you see what he is like. There is Pericles, again, magnificent in his wisdom; and he, as you know, had two sons, Paralus and Xanthippus.

Any. I know.

Soc. And you know, also, that he taught them to be unrivaled horsemen, and had them trained in music and gymnastics and all sorts of arts — in these respects they were on a level with the best — and had he no wish to make good men of them? Nay, he must have wished that. But I suspect that virtue could not be taught. And that you may not suppose that the incompetent teachers are the meaner sort of Athenians and few in number, remember again that Thucydides had two sons, Melesias and Stephanus, whom he trained chiefly in wrestling; and they too had an excellent education, and were the best wrestlers in Athens: one of them he committed to the care of Xanthias, and the other of Eudorus, who had the reputation of being the most celebrated wrestlers of that day. Do you remember them?

Any. I have heard of them.

Soc. Now, can there be a doubt that Thucydides, who had his children taught wrestling, at a considerable expense, would have taught them to be good men, which would have cost him nothing, if virtue could have been taught? Will you reply that he was a mean man, and had not many friends among the Athenians and allies? Nay, but he was of a great family, and a man of influence at Athens and in all Hellas, and, if virtue could have been taught, he would have found out some one either in or out of Hellas who would have made good men of his sons, if he could not himself spare the time from cares of state. Again I suspect, friend Anytus, that virtue is not a thing which can be taught?

Any. Socrates, I think that you are too ready to speak evil of men; and, if you will take my advice, I would recommend you to be careful. Perhaps there is no city in which it is not easier to do men harm than to do them good, and this is certainly the
95 case at Athens, as I believe that you know.

Soc. O Meno, I think that Anytus is in a rage. And he may well be in a rage, for he thinks, in the first place, that I am defaming these gentlemen; and then, in the second place, he thinks that he is one of them. But when he understands, which he does not at present, what is the meaning of defamation, he will forgive me. Meanwhile I will return to you, Meno; for I suppose that there are gentlemen in your region too?

Men. Certainly there are.

Soc. And are they willing to teach the young? and do they profess to be teachers? and do they agree that virtue is taught?

Men. No indeed, Socrates, they are anything but agreed: and you may hear them saying at one time that virtue can be taught, and then again the reverse.

Soc. Can we call them teachers who do not acknowledge the possibility of their own vocation?

Men. I think not, Socrates.

Soc. And what do you think of these Sophists, who are the only professors? Do they seem to you to be teachers of virtue?

Men. I often wonder, Socrates, that you never hear Gorgias promising to teach virtue: and when he hears others promising this he only laughs at them: but he thinks that you ought to teach men to speak.

Soc. Then do you not think that the Sophists are teachers?

Men. I cannot tell you, Socrates; like the rest of the world, I am in doubt, and sometimes I think that they are teachers and sometimes not.

Soc. And are you aware that not you only and other political men have doubts whether virtue can be taught or not, but that Theognis the poet says the very same thing — are you aware of that?

Men. Where does he imply that?

Soc. In the elegiac verses, in which he says: —

"Eat and drink and sit with the mighty, and make yourself agreeable to them; for from the good you will learn what is good, but if you mix with the bad you will lose the intelligence which you already have."

Do you observe that here he seems to imply that virtue can be taught?

Men. Clearly.

Soc. But in some other verses he shifts about and says: —

"If understanding could be created and put into a man, then they (who were able to accomplish this) would have obtained great rewards."

And again: —

"Never did a bad son spring from a good sire because he heard the voice of instruction; not by teaching will you ever make a bad man into a good one." 96

And this, as you may remark, is a contradiction of the other.

Men. That is palpable.

Soc. And is there anything else of which the teachers and professors are not only asserted not to be teachers of others, but to be ignorant themselves of that which they profess to teach and

bad at the knowledge of that which they preach; and about which the acknowledged "gentlemen" are themselves saying sometimes that "this thing can be taught," and sometimes not. Can you say that they are teachers of authority whose ideas are in this state of confusion?

Men. I should say, certainly not.

Soc. But if neither the Sophists nor the gentlemen are teachers, clearly there can be no other teachers?

Men. No.

Soc. And if there are no teachers, neither are there disciples?

Men. Agreed.

Soc. And we have admitted that a thing cannot be taught of which there neither teachers nor disciples?

Men. We have.

Soc. And there are no teachers of virtue to be found anywhere?

Men. There are not.

Soc. And if there are no teachers neither are there scholars?

Men. I think that is true.

Soc. Then virtue cannot be taught?

Men. Not if we are right in our view. But I cannot believe, Socrates, that there are no good men in the state. And if there are, how did they come into existence?

Soc. I am afraid, Meno, that you and I are not good for much, and that Gorgias has been as poor an educator of you as Prodicus has been of me. Certainly we shall have to look to ourselves, and try to find some one who will help to improve us. This I say, because I observe that in the previous discussion none of us remarked that right and good action is possible to man under other guidance than that of knowledge; and indeed if this be denied, there is no seeing how there can be any good men at all.

Men. How do you mean, Socrates?

Soc. I mean this: that good men must necessarily be use-
97 ful or profitable. Were we not right in admitting that?

Men. Yes.

Soc. And in supposing that they will be useful only if they are true guides of action; in that we were also right?

Men. Yes.

Soc. But we do not seem to have been right in saying that knowledge only was the right and good guide of action.

Men. What do you mean by the word "right?"

Soc. I will explain. If a man knew the way to Larisa, or

anywhere else, and went to the place and led others thither, would he not be a right and good guide?

Men. Certainly.

Soc. And a person who had a right opinion about the way, but had never been and did not know, might be a good guide also, might he not?

Men. Certainly.

Soc. And while he has true opinion about that which the other knows, he will be just as good a guide if he thinks the truth, as if he knows the truth?

Men. Exactly.

Soc. Then true opinion is as good a guide to correct action as wisdom; and that was the point which we omitted in our speculation about the nature of virtue, when we said that wisdom only is the guide of right action; whereas there is also right opinion.

Men. True.

Soc. Then right opinion is not less useful than knowledge?

Men. The difference, Socrates, is only that he who has knowledge will always be right; but he who has right opinion will sometimes be right, and sometimes not right.

Soc. What do you mean? Can he be wrong who has right opinion, as long as he has right opinion?

Men. I admit the cogency of that, and therefore, Socrates, allowing this, I wonder that knowledge should be preferred to right opinion — or why they should ever differ.

Soc. And shall I explain this wonder to you?

Men. Do tell me.

Soc. You would not wonder if you had ever observed the images of Daedalus; but perhaps you have not got them in your country?

Men. Why do you refer to them?

Soc. Because they require to be fastened in order to keep them, and if they are not fastened they will run away.

Men. Well, what of that?

Soc. I mean to say that it is not much use possessing one of them if they are at liberty, for they will walk off like runaway slaves; but when fastened, they are of great value, for they are really beautiful works of art. Now this is an illustration of the nature of true opinions: while they abide with us they are beautiful and fruitful, but they run away out of the human soul, and do not remain long, and therefore they 98

are not of much value until they are fastened by the tie of the cause; and this fastening of them, friend Meno, is recollection, as has been already agreed by us. But when they are bound, in the first place, they have the nature of knowledge; and, in the second place, they are abiding. And this is why knowledge is more honorable and excellent than true opinion, because fastened by a chain.

Men. Yes indeed, Socrates, that I should conjecture to be the truth.

Soc. I too speak not as one who knows; and yet that knowledge differs from true opinion is not a matter of conjecture with me. There are not many things which I should affirm that I knew, but that is most certainly one of them.

Men. You are right, Socrates.

Soc. And am I not right also in saying that true opinion is as good a guide in the performance of an action as knowledge?

Men. That also appears to me to be true.

Soc. Then right opinion is not a whit inferior to knowledge, or less useful in action; nor is the man who has right opinion inferior to him who has knowledge?

Men. That is true.

Soc. And surely the good man has been acknowledged by us to be useful?

Men. Yes.

Soc. Seeing then that men become good and useful to states, not only because they have knowledge, but because they have right opinion, and neither knowledge nor right opinion is given to man by nature or acquired by him, — (do you think that either of them is given by nature?

Men. Not I.)

Soc. Then if they are not given by nature, neither are the good by nature good?

Men. Certainly not.

Soc. And nature being excluded, the next question was whether virtue is acquired by teaching?

Men. Yes.

Soc. If virtue was wisdom, then, as we thought, it was taught?

Men. Yes.

Soc. And if it was taught it was wisdom?

Men. Certainly.

Soc. And if there were teachers, it might be taught; and if there were no teachers, not?

Men. True.

Soc. But surely we acknowledged that there were no teachers of virtue?

Men. Yes.

Soc. Then we acknowledged that it was not taught, and was not wisdom?

Men. Certainly.

Soc. And yet we admitted that it was a good?

Men. Yes.

Soc. And the right guide is useful and good?

Men. Certainly.

99 *Soc.* And the only right guides are knowledge and true opinion, — these are the guides of man; for things which happen by chance are not under the guidance of man: but the guides of man are true opinion and knowledge.

Men. I think so too.

Soc. But if virtue is not taught, neither is virtue knowledge.

Men. Clearly not.

Soc. Then of two good and useful things, one, which is knowledge, has been set aside, and cannot be supposed to be our guide in political life?

Men. I think not.

Soc. And therefore not by any wisdom, and not because they were wise, did Themistocles and those others of whom Anytus spoke govern states. And this was the reason why they were unable to make others like themselves, — because their virtue was not grounded on knowledge.

Men. That is probably true, Socrates.

Soc. But if not by knowledge, the only alternative which remains is that statesmen must have guided states by right opinion, which is in politics what divination is in religion; for diviners and also prophets say many things truly, but they know not what they say.

Men. Very true.

Soc. And may we not, Meno, truly call those men divine who, having no understanding, yet succeed in many a grand deed and word?

Men. Certainly.

Soc. Then we shall also be right in calling those divine whom we were just now speaking of as diviners and prophets, as well as all poets. Yes, and statesmen above all may be said to be divine and illumined, being inspired and possessed of God,

in which condition they say many grand things, not knowing what they say.

Men. Yes.

Soc. And the women too, Meno, call good men divine; and the Spartans, when they praise a good man, say "that he is a divine man."

Men. And I think, Socrates, that they are right; although very likely our friend Anytus may take offense at the name.

Soc. I do not care; as for Anytus, there will be another opportunity of talking with him. To sum up our inquiry, — the result seems to be, if we are at all right in our view, that virtue is neither natural nor acquired, but an instinct given by God to the virtuous. Nor is the instinct accompanied by reason, unless there may be supposed to be among statesmen any one who is also the educator of statesmen. And if there be such a one, he may be said to be among the living what Tiresias was among the dead, who "alone," according to Homer, "of those in the world below, has understanding; but the rest flit as shadows."

Men. That is excellent, Socrates.

Soc. Then, Meno, the conclusion is that virtue comes to the virtuous by the gift of God. But we shall never know the certain truth until, before asking how virtue is given, we inquire into the actual nature of virtue. I fear that I must go away, but do you, now that you are persuaded yourself, persuade our friend Anytus. And don't let him be so exasperated; for if you can persuade him you will have done some service to the Athenian people.

EUTHYPHRO.

INTRODUCTION.

In the Meno Anytus had parted from Socrates with the threatening words: "That in any city, and particularly in the city of Athens, it is easier to do men harm than to do them good" (94 E); and Socrates was anticipating another opportunity of talking with him (99 E). In the Euthyphro Socrates is already awaiting his trial for impiety in the porch of the King Archon. (Cp. Theaet. *sub fin.*) But before the trial proceeds, Plato would like to put the world on their trial, and convince them of ignorance in that very matter touching which Socrates is accused. An incident which may perhaps really have occurred in the family of Euthyphro, a learned Athenian diviner and soothsayer, furnishes the occasion of the discussion.

This Euthyphro and Socrates are represented as meeting in the porch of the Archon. Both have legal business in hand. Socrates is defendant in a suit for impiety which Meletus has brought against him (it is remarked by the way that he is not a likely man himself to have brought a suit against another); and Euthyphro too is plaintiff in an action for murder, which he has brought against his own father. The latter has originated in the following manner: A poor dependant of the family of Euthyphro had slain one of their domestic slaves in Naxos. The guilty person was bound and thrown into a ditch by the command of Euthyphro's father, who sent to the interpreters of religion at Athens to ask what should be done with him. Before the messenger came back the criminal had died from hunger and exposure.

This is the origin of the charge of murder which Euthyphro brings against his father. Socrates is confident that before he could have taken upon himself the responsibility of such a prosecution, he must have been perfectly informed of the nature of piety and impiety; and as he is going to be tried for impiety, he thinks he cannot do better than learn of Euthyphro (who will be admitted by all men, including the judges, to be an unimpeachable authority) what piety is, and what is impiety. What then is piety?

Euthyphro, who, in the abundance of his knowledge, is very will-

ing to undertake all the responsibility, replies: That piety is doing as I do, prosecuting your father (if he is guilty) on a charge of murder; doing as the gods do — as Zeus did to Cronos, and Cronos to Uranus.

Socrates has a dislike to these tales of mythology, and he fancies that this dislike of his may be the reason why he is charged with impiety. "Are they really true?" "Yes, they are;" and Euthyphro will gladly tell Socrates some more of them. But Socrates would like first of all to have a more satisfactory answer to the question, "What is piety?" "Doing as I do, charging a father with murder" may be a single instance of piety, but can hardly be regarded as a general definition.

Euthyphro replies, that "Piety is what is dear to the gods, and impiety is what is not dear to them." But may there not be differences of opinion, as among men, so also among the gods? Especially about good and evil, which have no fixed rule, and are precisely the sort of differences which give rise to quarrels. And therefore what may be dear to one god may not be dear to another, and the same action may be both pious and impious; *e. g.* your chastisement of your father, Euthyphro, may be dear or pleasing to Zeus, but not pleasing to Cronos or Uranus.

Euthyphro answers that there is no difference of opinion, either among gods or men, as to the propriety of punishing a murderer. Yes, rejoins Socrates, when they know him to be a murderer; but that assumes the point at issue. If all the circumstances of the case are considered, are you able to show that your father was guilty of murder, or that all the gods are agreed in approving of your prosecution of him? And must you not allow that what is hated by one god may be liked by another? Waiving this last, however, Socrates proposes to amend the definition, and say that "What all the gods love is pious, and what they all hate is impious." To this Euthyphro agrees.

Socrates proceeds to analyze the new form of the definition. He shows that in other cases the act precedes the state; *e. g.* the act of being carried, loved, etc., precedes the state of being carried, loved, etc., and therefore that which is dear to the gods is dear to the gods because it is first loved of them, not loved of them because it is dear to them. But the pious or holy is loved by the gods because it is pious or holy, which is equivalent to saying, that it is loved by them because it is dear to them. Here then appears to be a contradiction, — Euthyphro has been giving an attribute or accident of piety only, and not the essence. Euthyphro acknowledges himself that his explanations seem to walk away or go round in a circle, like the moving figures of Daedalus, the ancestor of Socrates, who has communicated his art to his descendants.

Socrates, who is desirous of stimulating the indolent intelligence

of Euthyphro, raises the question in another manner: "Is all the pious just?" "Yes." "Is all the just pious?" "No." "Then what part of justice is piety?" Euthyphro replies that piety is that part of justice which "attends" to the gods, as there is another part of justice which "attends" to men. But what is the meaning of "attending" to the gods? The word "attending," when applied to dogs, horses, and men, implies that in some way they are made better. But how do pious or holy acts make the gods any better? Euthyphro explains that he means by pious acts, acts of ministration. Yes; but the ministrations of the husbandman, the physician, and the builder have an end. To what end do we minister to the gods, and what do we help them to accomplish? Euthyphro replies, that there is not time for all these difficult questions to be resolved; and he would rather say simply that piety is knowing how to please the gods in word and deed, by prayers and sacrifices. In other words, says Socrates, piety is "a science of asking and giving"—asking what we want and giving what they want; in short, a mode of doing business between gods and men. But although they are the givers of all good, how can we give them any good in return? "Nay, but we give them honor." Then we give them not what is beneficial, but what is pleasing or dear to them; and this is what has been already disproved.

Socrates, although weary of the subterfuges and evasions of Euthyphro, remains unshaken in his conviction that he must know the nature of piety, or he would never have prosecuted his old father. He is still hoping that he will condescend to instruct him. But Euthyphro is in a hurry and cannot stay. And Socrates' last hope of knowing the nature of piety before he is prosecuted for impiety has disappeared.

The Euthyphro is manifestly designed to contrast the real nature of piety and impiety with the popular conceptions of them. But although the popular conceptions are overthrown, Plato does not offer any definition of his own: as in the Laches and Lysis, he exhibits the subject of the Dialogue in several different lights, but fails to answer explicitly his main question.

Euthyphro is a religionist, and is elsewhere spoken of as the author of a philosophy of names, by whose "prancing steeds" Socrates in the Cratylus is carried away (p. 396). He has the conceit and self-confidence of a Sophist; no doubt that he is right in prosecuting his father has ever entered into his mind. Like a Sophist too, and perhaps like most educated men of his age, he is incapable either of framing a general definition or of following the course of an argument. But he is not a bad man, and he is friendly to Socrates, whose familiar sign he recognizes with interest. Moreover he is the enemy of Meletus, who, as he thinks, is availing himself of the

popular dislike to innovations in religion in order to injure Socrates; at the same time he is amusingly confident that he has weapons in his own armory which would be more than a match for him. He is quite sincere in his prosecution of his father, who has accidentally been guilty of homicide, and is not wholly free from blame. To purge away the crime appears to him in the light of a duty, whoever may be the criminal.

Thus begins the contrast between the religion of the letter, or of the narrow and unenlightened conscience, and the higher notion of religion which Socrates vainly endeavors to elicit from him. "Piety is doing as I do" is the first idea of religion which is suggested to his mind, and may be regarded as the definition of popular religion in all ages. Greek mythology hardly admitted of the distinction between accidental homicide and murder: that the pollution of blood was the same in both cases is also the feeling of the Athenian diviner. He is ready to defend his conduct by the examples of the gods. These are the very tales which Socrates cannot abide; and his dislike of which, as he suspects, has branded him with the reputation of impiety. Here is one answer to the question, "Why Socrates was put to death," suggested by the way. Another is conveyed in the words, "The Athenians do not care about any man being thought wise until he begins to make other men wise; and then for some reason or other they are angry:" which may be said to be the rule of popular toleration in most other countries, and not at Athens only.

The next definition, "Piety is that which is loved of the gods," is shipwrecked on a refined distinction between the state and the act, corresponding respectively to the adjective (*φίλον*) and the participle (*φιλούμενον*), or rather perhaps to the participle and the verb (*φιλούμενον* and *φιλεῖται*). The words "loved of the gods" express an attribute only, and not the essence of piety. Then follows the third and last definition, "Piety is a part of justice." Thus far Socrates has proceeded in placing religion on a moral foundation. To which the soothsayer adds, "Attending upon the gods." When further interrogated by Socrates as to the nature of this "attention to the gods," he replies, that piety is an affair of business, a science of giving and asking, and the like. Socrates points out the latent anthropomorphism of these notions. (Cp. Politicus, 290 C, D; Rep. ii. 365 E; Sym. 202 E.) But when we expect him to go on and show that the true service of the gods is the service of the spirit, and the coöperation with them in all things true and good, he stops short; this was a lesson which the soothsayer could not have been made to understand, and which every one must learn for himself.

There seem to be altogether three aims or interests in this little Dialogue: (1) the dialectical development of the idea of piety;

(2) the antithesis of true and false religion, which is carried to a certain extent only; (3) the defense of Socrates.

The subtle connection of this Dialogue with the Apology and the Crito, the holding back of the conclusion, as in the Laches, Lysis, and other Dialogues; the insight into the religious world; the dramatic power and play of the two characters; the inimitable irony, are reasons for believing that it is a genuine Platonic writing. The spirit in which the popular representations of mythology are denounced recalls Republic II. The virtue of piety has been already mentioned as one of five in the Protagoras, but is not reckoned among the four cardinal virtues of Republic IV. The figure Daedalus has occurred in the Meno (97 D); that of Proteus (15 D), in the Euthydemus (288 E), and Io (541 E). But neither from these nor any other indications of similarity or difference, and still less from arguments respecting the suitableness of this little work to aid Socrates at the time of his trial, or the reverse, can any evidence of the date be obtained.

EUTHYPHRO.

PERSONS OF THE DIALOGUE.

SOCRATES. EUTHYPHRO.

SCENE: — The Porch of the King Archon.

Euth. WHY have you left the Lyceum, Socrates? and what are you doing in the porch of the King Archon? Surely you cannot be engaged in an action before the king, as I am. Steph. 2

Socrates. Not in an action, Euthyphro; impeachment is the word which the Athenians use.

Euth. What! I suppose that some one has been prosecuting you, for I cannot believe that you are the prosecutor of another.

Soc. Certainly not.

Euth. Then some one else has been prosecuting you.

Soc. Yes.

Euth. And who is he?

Soc. A young man who is little known, Euthyphro; and I hardly know him: his name is Meletus, and he is of the deme of Pitthis. Perhaps you may remember his appearance; he has a beak, and long straight hair, and a beard which is ill grown.

Euth. No, I do not remember him, Socrates. And what is the charge which he brings against you?

Soc. What is the charge? Well, a very serious charge, which shows a good deal of character in the young man, and for which he is certainly not to be despised. He says he knows how the youth are corrupted and who are their corrupters. I fancy that he must be a wise man, and seeing that I am anything but a wise man, he has found me out, and is going

to accuse me of corrupting his young friends. And of this our mother the state is to be the judge. Of all our political men he is the only one who seems to me to begin in the right way, with the cultivation of virtue in youth; he is a good husbandman, and takes care of the shoots first, and clears away us who
3 are the destroyers of them. That is the first step; he will afterwards attend to the elder branches; and if he goes on as he has begun, he will be a very great public benefactor.

Euth. I hope that he may; but I rather fear, Socrates, that the reverse will turn out to be the truth. My opinion is that in attacking you he is simply aiming a blow at the state in a sacred place. But in what way does he say that you corrupt the young?

Soc. He brings a wonderful accusation against me, which at first hearing excites surprise: he says that I am a poet or maker of gods, and that I make new gods and deny the existence of old ones; this is the ground of his indictment.

Euth. I understand, Socrates; he means to attack you about the familiar sign which occasionally, as you say, comes to you. He thinks that you are a neologian, and he is going to have you up before the court for this. He knows that such a charge is readily received, for the world is always jealous of novelties in religion. And I know that when I myself speak in the assembly about divine things, and foretell the future to them, they laugh at me as a madman; and yet every word that I say is true. But they are jealous of all of us. I suppose that we must be brave and not mind them.

Soc. Their laughter, friend Euthyphro, is not a matter of much consequence. For a man may be thought wise; but the Athenians, I suspect, do not care much about this, until he begins to make other men wise; and then for some reason or other, perhaps, as you say, from jealousy, they are angry.

Euth. I have no desire to try conclusions with them about this.

Soc. I dare say that you don't make yourself common, and are not apt to impart your wisdom. But I have a benevolent habit of pouring out myself to everybody, and would even pay for a listener, and I am afraid that the Athenians know this; and therefore, as I was saying, if the Athenians would only laugh at me as you say that they laugh at you, the time might pass gayly enough in the court; but perhaps they may be in earnest, and then what the end will be you soothsayers only can predict.

Euth. I dare say that the affair will end in nothing, Socrates, and that you will win your cause; and I think that I shall win mine.

Soc. And what is your suit? and are you the pursuer or defendant, Euthyphro?

Euth. I am pursuer.

Soc. Of whom?

Euth. You will think me mad when I tell you whom I am pursuing. 4

Soc. Why, has the fugitive wings?

Euth. Nay, he is not very volatile at his time of life.

Soc. Who is he?

Euth. My father.

Soc. Your father! good heavens, you don't mean that?

Euth. Yes.

Soc. And of what is he accused?

Euth. Murder, Socrates.

Soc. By the powers, Euthyphro! how little does the common herd know of the nature of right and truth. A man must be an extraordinary man and have made great strides in wisdom, before he could have seen his way to this.

Euth. Indeed, Socrates, he must have made great strides.

Soc. I suppose that the man whom your father murdered was one of your relatives; if he had been a stranger you would never have thought of prosecuting him.

Euth. I am amused, Socrates, at your making a distinction between one who is a relation and one who is not a relation; for surely the pollution is the same in either case, if you knowingly associate with the murderer when you ought to clear yourself by proceeding against him. The real question is whether the murdered man has been justly slain. If justly, then your duty is to let the matter alone; but if unjustly, then even if the murderer is under the same roof with you and eats at the same table, proceed against him. Now the man who is dead was a poor dependant of mine who worked for us as a field laborer at Naxos, and one day in a fit of drunken passion he got into a quarrel with one of our domestic servants and slew him. My father bound him hand and foot and threw him into a ditch, and then sent to Athens to ask of a diviner what he should do with him. Meantime he had no care or thought of him, being under the impression that he was a murderer; and that even if he did die there would be no great harm. An.

this was just what happened. For such was the effect of cold and hunger and chains upon him, that before the messenger returned from the diviner, he was dead. And my father and family are angry with me for taking the part of the murderer and prosecuting my father. They say that he did not kill him, and if he did, the dead man was but a murderer, and I ought not to take any notice, for that a son is impious who prosecutes a father. That shows, Socrates, how little they know of the opinions of the gods about piety and impiety.

Soc. Good heavens, Euthyphro! and have you such a precise knowledge of piety and impiety, and of divine things in general, that, supposing the circumstances to be as you state, you are not afraid that you too may be doing an impious thing in bringing an action against your father?

Euth. The best of Euthyphro, and that which distinguishes him, Socrates, from other men, is his exact knowledge of all these matters. What should I be good for without that?

Soc. Rare friend! I think that I cannot do better than be your disciple, before the trial with Meletus comes on. Then I shall challenge him, and say that I have always had a great interest in religious questions, and now, as he charges me with rash imaginations and innovations in religion, I have become your disciple. Now you, Meletus, as I shall say to him, acknowledge Euthyphro to be a great theologian, and sound in his opinions; and if you think that of him you ought to think the same of me, and not have me into court; you should begin by indicting him who is my teacher, and who is the real corrupter, not of the young, but of the old; that is to say, of myself whom he instructs, and of his old father whom he admonishes and chastises. And if Meletus refuses to listen to me, but will go on, and will not shift the indictment from me to you, I cannot do better than say in the court that I challenged him in this way.

Euth. Yes, Socrates; and if he attempts to indict me I am mistaken if I don't find a flaw in him; the court shall have a great deal more to say to him than to me.

Soc. I know that, dear friend; and that is the reason why I desire to be your disciple. For I observe that no one, not even Meletus, appears to notice you; but his sharp eyes have found me out at once, and he has indicted me for impiety. And therefore, I adjure you to tell me the nature of piety and

impiety, which you said that you knew so well, and of murder, and the rest of them. What are they? Is not piety in every action always the same? and impiety, again, is not that always the opposite of piety, and also the same with itself, having, as impiety, one notion which includes whatever is impious?

Euth. To be sure, Socrates.

Soc. And what is piety, and what is impiety?

Euth. Piety is doing as I am doing; that is to say, prosecuting any one who is guilty of murder, sacrilege, or of any other similar crime — whether he be your father or mother, or some other person, that makes no difference — and not prosecuting them is impiety. And please to consider, Socrates, what a notable proof I will give you of the truth of what I am saying, which I have already given to others, — of the truth, I mean, of the principle that the impious whoever he may be, ought not to go unpunished. For do not men regard Zeus as the best and most righteous of the gods? — and even they admit 6
that he bound his father (Cronos) because he wickedly devoured his sons, and that he too had punished his own father (Uranus) for a similar reason, in a nameless manner. And yet when I proceed against my father, they are angry with me. This is their inconsistent way of talking when the gods are concerned, and when I am concerned.

Soc. May not this be the reason, Euthyphro, why I am charged with impiety — that I cannot away with these stories about the gods? and therefore I suppose that people think me wrong. But, as you who are well informed about them approve of them, I cannot do better than assent to your superior wisdom. For what else can I say, confessing as I do, that I know nothing of them. I wish you would tell me whether you really believe that they are true?

Euth. Yes, Socrates; and things more wonderful still, of which the world is in ignorance.

Soc. And do you really believe that the gods fought with one another, and had dire quarrels, battles, and the like, as the poets say, and as you may see represented in the works of great artists? The temples are full of them; and notably the robe of Athene, which is carried up to the Acropolis at the great Panathenaea, is embroidered with them. Are all these tales of the gods true, Euthyphro?

Euth. Yes, Socrates; and, as I was saying, I can tell you, if

you would like to hear them, many other things about the gods which would quite amaze you.

Soc. I dare say; and you shall tell me them at some other time when I have leisure. But just at present I would rather hear from you a more precise answer, which you have not as yet given, my friend, to the question, What is "piety?" In reply, you only say that piety is, Doing as you do, charging your father with murder.

Euth. And that is true, Socrates.

Soc. I dare say, Euthyphro, but there are many other pious acts.

Euth. There are.

Soc. Remember that I did not ask you to give me two or three examples of piety, but to explain the general idea which makes all pious things to be pious. Do you not recollect that there was one idea which made the impious impious, and the pious pious?

Euth. I remember.

Soc. Tell me what this is, and then I shall have a standard to which I may look, and by which I may measure the nature of actions, whether yours or any one's else, and say that this action is pious, and that impious?

Euth. I will tell you, if you like.

Soc. I should very much like.

Euth. Piety, then, is that which is dear to the gods, and impiety is that which is not dear to them.

7 *Soc.* Very good, Euthyphro; you have now given me just the sort of answer which I wanted. But whether it is true or not I cannot as yet tell, although I make no doubt that you will prove the truth of your words.

Euth. Of course.

Soc. Come, then, and let us examine what we are saying. That thing or person which is dear to the gods is pious, and that thing or person which is hateful to the gods is impious. Was not that said?

Euth. Yes, that was said.

Soc. And that seems to have been very well said too?

Euth. Yes, Socrates, I think that; it was certainly said.

Soc. And further, Euthyphro, the gods were admitted to have enmities and hatreds and differences — that was also said?

Euth. Yes, that was said.

Soc. And what sort of difference creates enmity and anger?

Suppose for example that you and I, my good friend, differ about a number; do differences of this sort make us enemies and set us at variance with one another? Do we not go at once to calculation, and end them by a sum?

Euth. True.

Soc. Or suppose that we differ about magnitudes, do we not quickly put an end to that difference by measuring?

Euth. That is true.

Soc. And we end a controversy about heavy and light by resorting to a weighing-machine?

Euth. To be sure.

Soc. But what differences are those which, because they cannot be thus decided, make us angry and set us at enmity with one another? I dare say the answer does not occur to you at the moment, and therefore I will suggest that this happens when the matters of difference are the just and unjust, good and evil, honourable and dishonorable. Are not these the points about which, when differing, and unable satisfactorily to decide our differences, we quarrel, when we do quarrel, as you and I and all men experience?

Euth. Yes, Socrates, that is the nature of the differences about which we quarrel.

Soc. And the quarrels of the gods, noble Euthyphro, when they occur, are of a like nature?

Euth. They are.

Soc. They have differences of opinion, as you say, about good and evil, just and unjust, honorable and dishonorable: there would have been no quarrels among them, if there had been no such differences — would there now?

Euth. You are quite right.

Soc. Does not every man love that which he deems noble and just and good, and hate the opposite of them?

Euth. Very true.

Soc. But then, as you say, people regard the same things, some as just and others as unjust; and they dispute about this, and there arise wars and fightings among them.

Euth. Yes, that is true. 8

Soc. Then the same things, as appears, are hated by the gods and loved by the gods, are both hateful and dear to them?

Euth. True.

Soc. Then upon this view the same things, Euthyphro, will be pious and also impious?

Euth. That, I suppose, is true.

Soc. Then, my friend, I remark with surprise that you have not answered what I asked. For I certainly did not ask what was that which is at once pious and impious: and that which is loved by the gods appears also to be hated by them. And therefore, Euthyphro, in thus chastising your father you may very likely be doing what is agreeable to Zeus but disagreeable to Cronos or Uranus, and what is acceptable to Hephaestus but unacceptable to Here, and there may be other gods who have similar differences of opinion.

Euth. But I believe, Socrates, that all the gods would be agreed as to the propriety of punishing a murderer: there would be no difference of opinion about that.

Soc. Well, but speaking of men, Euthyphro, did you ever hear any one arguing that a murderer or any sort of evil-doer ought to be let off?

Euth. I should rather say that they are always arguing this, especially in courts of law; they commit all sorts of crimes, and there is nothing that they will not do or say in order to escape punishment.

Soc. But do they admit their guilt, Euthyphro, and yet say that they ought not to be punished?

Euth. No; they do not.

Soc. Then there are some things which they do not venture to say and do: for they do not venture to argue that the guilty are to be unpunished, but they deny their guilt, do they not?

Euth. Yes.

Soc. Then they do not argue that the evil-doer should not be punished, but they argue about the fact of who the evil-doer is, and what he did and when?

Euth. True.

Soc. And the gods are in the same case, if as you imply they quarrel about just and unjust, and some of them say that they wrong one another, and others of them deny this. For surely neither God nor man will ever venture to say that the doer of evil is not to be punished: you don't mean to tell me that?

Euth. That is true, Socrates, in the main.

Soc. But they join issue about particulars; and this applies not only to men but to the gods; if they dispute at all they dispute about some act which is called in question, and which some affirm to be just, others to be unjust. Is not that true?

Euth. Quite true.

Soc. Well then, my dear friend Euthyphro, do tell me, 9
for my better instruction and information, what proof have you that in the opinion of all the gods a servant who is guilty of murder, and is put in chains by the master of the dead man, and dies because he is put in chains before his corrector can learn from the interpreters what he ought to do with him, dies unjustly; and that on behalf of such a one a son ought to proceed against his father and accuse him of murder. How would you show that all the gods absolutely agree in approving of his act? Prove to me that, and I will applaud your wisdom as long as you live.

Euth. That would not be an easy task, although I could make the matter very clear indeed to you.

Soc. I understand; you mean to say that I am not so quick of apprehension as the judges: for to them you will be sure to prove that the act is unjust, and hateful to the gods.

Euth. Yes indeed, Socrates; at least if they will listen to me.

Soc. But they will be sure to listen if they find that you are a good speaker. There was a notion that came into my mind while you were speaking; I said to myself: "Well, and what if Euthyphro does prove to me that all the gods regarded the death of the serf as unjust, how do I know anything more of the nature of piety and impiety? for granting that this action may be hateful to the gods, still these distinctions have no bearing on the definition of piety and impiety, for that which is hateful to the gods has been shown to be also pleasing and dear to them." And therefore, Euthyphro, I don't ask you to prove this; I will suppose, if you like, that all the gods condemn and abominate such an action. But I will amend the definition so far as to say that what all the gods hate is impious, and what they love pious or holy; and what some of them love and others hate is both or neither. Shall this be our definition of piety and impiety?

Euth. Why not, Socrates?

Soc. Why not! certainly, as far as I am concerned, Euthyphro. But whether this admission will greatly assist you in the task of instructing me as you promised, is a matter for you to consider.

Euth. Yes, I should say that what all the gods love is pious and holy, and the opposite which they all hate, impious.

Soc. Ought we to inquire into the truth of this, Euthyphro, or simply to accept the mere statement on our own authority and that of others?

Euth. We should inquire; and I believe that the statement will stand the test of inquiry.

Soc. That, my good friend, we shall know better in a little while. The point which I should first wish to understand is whether the pious or holy is beloved by the gods because it is holy, or holy because it is beloved of the gods.

Euth. I don't understand your meaning, Socrates.

Soc. I will endeavor to explain: we speak of carrying and we speak of being carried, of leading and being led, seeing and being seen. And here is a difference the nature of which you understand.

Euth. I think that I understand.

Soc. And is not that which is beloved distinct from that which loves?

Euth. Certainly.

Soc. Well; and now tell me, is that which is carried in this state of carrying because it is carried, or for some other reason?

Euth. No; that is the reason.

Soc. And the same is true of that which is led and of that which is seen?

Euth. True.

Soc. And a thing is not seen because it is visible, but conversely, visible because it is seen; nor is a thing in the state of being led because it is led, or in the state of being carried because it is carried, but the converse of this. And now I think, Euthyphro, that my meaning will be intelligible; and my meaning is, that any state of action or passion implies previous action or passion. It does not become because it is becoming, but it is becoming because it comes; neither does it suffer because it is in a state of suffering, but it is in a state of suffering because it suffers. Do you admit that?

Euth. Yes.

Soc. Is not that which is loved in some state either of becoming or suffering?

Euth. Yes.

Soc. And the same holds as in the previous instances; the state of being loved follows the act of being loved, and not the act the state.

Euth. That is certain.

Soc. And what do you say of piety, Euthyphro: is not piety according to your definition, loved by all the gods?

Euth. Yes.

Soc. Because it is pious or holy, or for some other reason?

Euth. No, that is the reason.

Soc. It is loved because it is holy, not holy because it is loved?

Euth. Yes.

Soc. And that which is in a state to be loved of the gods, and is dear to them, is in a state to be loved of them because it is loved of them?

Euth. Certainly.

Soc. Then that which is loved of God, Euthyphro, is not holy, nor is that which is holy loved of God, as you affirm; but they are two different things.

Euth. How do you mean, Socrates?

Soc. I mean to say that the holy has been acknowledged by us to be loved of God because it is holy, not to be holy because it is loved.

Euth. Yes.

Soc. But that which is dear to the gods is dear to them because it is loved by them, not loved by them because it is dear to them.

Euth. True.

Soc. But, friend Euthyphro, if that which is holy is the same as that which is dear to God, and that which is holy is loved as being holy, then that which is dear to God would have been loved as being dear to God; but if that which is dear to God is dear to him because loved by him, then 11
that which is holy would have been holy because loved by him. But now you see that the reverse is the case, and that they are quite different from one another. For one (θεοφιλὲς) is of a kind to be loved because it is loved, and the other (ὅσιον) is loved because it is of a kind to be loved. Thus you appear to me, Euthyphro, when I ask you what is the essence of holiness, to offer an attribute only, and not the essence — the attribute of being loved by all the gods. But you still refuse to explain to me the nature of piety. And therefore, if you please, I will ask you not to hide your treasure, but to tell me once more what piety or holiness really is, whether dear to the gods or not (for that is a matter about which we will not quarrel). And what is impiety?

Euth. I really do not know, Socrates, how to say what I mean. For somehow or other our arguments, on whatever ground we rest them, seem to turn round and walk away.

Soc. Your words, Euthyphro, are like the handiwork of my ancestor Daedalus; and if I were the sayer or propounder of them, you might say that this comes of my being his relation and that this is the reason why my arguments walk away and won't remain fixed where they are placed. But now, as the notions are your own, you must find some other gibe, for they certainly, as you yourself allow, show an inclination to be on the move.

Euth. Nay, Socrates, I shall still say that you are the Daedalus who sets arguments in motion; not I, certainly, make them move or go round, for they would never have stirred, as far as I am concerned.

Soc. Then I must be a greater than Daedalus; for whereas he only made his own inventions to move, I move those of other people as well. And the beauty of it is, that I would rather not. For I would give the wisdom of Daedalus, and the wealth of Tantalus, to be able to detain them and keep them fixed. But enough of this. As I perceive that you are indolent, I will myself endeavor to show you how you might instruct me in the nature of piety; and I hope that you will not grudge your labor. Tell me, then, — Is not that which is pious necessarily just?

Euth. Yes.

12 *Soc.* And is, then, all which is just pious? or, is that which is pious all just, but that which is just only in part and not all pious?

Euth. I don't understand you, Socrates.

Soc. And yet I know that you are as much wiser than I am, as you are younger. But, as I was saying, revered friend, the abundance of your wisdom makes you indolent. Please to exert yourself, for there is no real difficulty in understanding me. What I mean I may explain by an illustration of what I do not mean. The poet (Stasinus) sings: —

> "Of Zeus, the author and creator of all these things,
> You will not tell: for where there is fear there is also reverence."

And I disagree with this poet. Shall I tell you in what I disagree?

Euth. By all means.

Soc. I should not say that where there is fear there is also reverence; for I am sure that many persons fear poverty and disease, and the like evils, but I do not perceive that they rev erence the objects of their fear.

Euth. Very true.

Soc. But where reverence is, there is fear; for he who has a feeling of reverence and shame about the commission of any action, fears and is afraid of an ill reputation.

Euth. No doubt.

Soc. Then we are wrong in saying that where there is fear there is also reverence; and we should say, where there is reverence there is also fear. But there is not always reverence where there is fear; for fear is a more extended notion, and reverence is a part of fear, just as the odd is a part of number, and number is a more extended notion than the odd. I suppose that you follow me now?

Euth. Quite well.

Soc. That was the sort of question which I meant to raise when asking whether the just is the pious, or the pious the just; and whether there may not be justice where there is not always piety; for justice is the more extended notion of which piety is only a part. Do you agree in that?

Euth. Yes; that, I think, is correct.

Soc. Then, now, if piety is a part of justice, I suppose that we inquire what part? If you had pursued the inquiry in the previous cases; for instance, if you had asked me what is an even number, and what part of number the even is, I should have had no difficulty in replying, a number which represents a figure having two equal sides. Do you agree?

Euth. Yes.

Soc. In like manner, I want you to tell me what part of justice is piety or holiness; that I may be able to tell Meletus not to do me injustice, or indict me for impiety; as I am now adequately instructed by you in the nature of piety or holiness, and their opposites.

Euth. Piety or holiness, Socrates, appears to me to be that part of justice which attends to the gods, as there is the other part of justice which attends to men.

Soc. That is good, Euthyphro; yet still there is a little point about which I should like to have further information, What is the meaning of "attention?" For attention can can hardly be used in the same sense when applied to the gods as when applied to other things. For instance, horses are said to require attention, and not every person is able to attend to them, but only a person skilled in horsemanship. Is not that true? 13

Euth. Quite true.

Soc. I should suppose that the art of horsemanship is the art of attending to horses?

Euth. Yes.

Soc. Nor is every one qualified to attend to dogs, but only the huntsman.

Euth. True.

Soc. And I should also conceive that the art of the huntsman is the art of attending to dogs?

Euth. Yes.

Soc. As the art of the oxherd is the art of attending to oxen?

Euth. Very true.

Soc. And as holiness or piety is the art of attending to the gods? — that would be your meaning, Euthyphro?

Euth. Yes.

Soc. And is not attention always designed for the good or benefit of that to which the attention is given? As in the case of horses, you may observe that when attended to by the horseman's art they are benefited and improved, are they not?

Euth. True.

Soc. As the dogs are benefited by the huntsman's art, and the oxen by the art of the oxherd, and all other things are tended or attended for their good and not for their hurt?

Euth. Certainly, not for their hurt.

Soc. But for their good?

Euth. Of course.

Soc. And does piety or holiness, which has been defined as the art of attending to the gods, benefit or improve them? Would you say that when you do a holy act you make any of the gods better?

Euth. No, no; that is certainly not my meaning.

Soc. Indeed, Euthyphro, I did not suppose that this was your meaning; far otherwise. And that was the reason why I asked you the nature of this attention, because I thought that this was not your meaning.

Euth. You do me justice, Socrates; for that is not my meaning.

Soc. Good: but I must still ask what is this attention to the gods which is called piety?

Euth. It is such, Socrates, as servants show to their masters.

Soc. I understand, — a sort of ministration to the gods.

Euth. Exactly.

Soc. Medicine is also a sort of ministration or service, tending to the attainment of some object, — would you say health?

Euth. Yes.

Soc. Again, there is an art which ministers to the ship-builder with a view to the attainment of some result?

Euth. Yes, Socrates, with a view to the building of a ship.

Soc. As there is an art which ministers to the house-builder with a view to the building of a house?

Euth. Yes.

Soc. And now tell me, my good friend, about this art which ministers to the gods: what work does that help to accomplish? For you must surely know if, as you say, you are of all men living the one who is best instructed in religion.

Euth. And that is true, Socrates.

Soc. Tell me then, O tell me, — what is that fair work which the gods do by the help of us as their ministers?

Euth. Many and fair, Socrates, are the works which they do.

Soc. Why, my friend, and so are those of a general. 14
But the chief of them is easily told. Would you not say that victory in war is the chief of them?

Euth. Certainly.

Soc. Many and fair, too, are the works of the husbandman, if I am not mistaken; but his chief work is the production of food from the earth?

Euth. Exactly.

Soc. And of the many and fair things which the gods do, which is the chief and principal one?

Euth. I have told you already, Socrates, that to learn all these things accurately will be very tiresome. Let me simply say that piety is learning how to please the gods in word and deed, by prayers and sacrifices. That is piety, which is the salvation of families and states, just as the impious, which is unpleasing to the gods, is their ruin and destruction.

Soc. I think that you could have answered in much fewer words the chief question which I asked, Euthyphro, if you had chosen. But I see plainly that you are not disposed to instruct me: else why, when we had reached the point, did you turn aside? Had you only answered me, I should have learned of you by this time the nature of piety. Now, as the asker of a question is necessarily dependent on the answerer, whither he leads I must follow; and can only ask again, what is the pious, and

what is piety? Do you mean that they are a sort of science of praying and sacrificing?

Euth. Yes, I do.

Soc. And sacrificing is giving to the gods, and prayer is asking of the gods?

Euth. Yes, Socrates.

Soc. Upon this view, then, piety is a science of asking and giving?

Euth. You understand me capitally, Socrates.

Soc. Yes, my friend; the reason is that I am a votary of your science, and give my mind to it, and therefore nothing which you say will be thrown away upon me. Please then to tell me, what is the nature of this service to the gods? Do you mean that we prefer requests and give gifts to them?

Euth. Yes, I do.

Soc. Is not the right way of asking to ask of them what we want?

Euth. Certainly.

Soc. And the right way of giving is to give them in return what they want of us. There would be no meaning in an art which gives to any one that which he does not want.

Euth. Very true, Socrates.

Soc. Then piety, Euthyphro, is an art which gods and men have of doing business with one another?

Euth. That is an expression which you may use, if you like.

Soc. But I have no particular liking for anything but the truth. I wish, however, that you would tell me what benefit accrues to the gods from our gifts. That they are the givers of
15 every good to us is clear; but how we can give any good thing to them in return is far from being equally clear. If they give everything and we give nothing, that must be an affair of business in which we have very greatly the advantage of them.

Euth. And do you imagine, Socrates, that any benefit accrues to the gods from what they receive of us?

Soc. But if not, Euthyphro, what sort of gifts do we confer upon the gods?

Euth. What should we confer upon them, but tributes of honor; and, as I was just now saying, what is pleasing to them?

Soc. Piety, then, is pleasing to the gods, but not beneficial or dear to them?

Euth. I should say that nothing could be dearer.

Soc. Then once more the assertion is repeated that piety is dear to the gods?

Euth. No doubt.

Soc. And when you say this, can you wonder at your words not standing firm, but walking away? Will you accuse me of being the Daedalus who makes them walk away, not perceiving that there is another and far greater artist than Daedalus who makes them go round in a circle; and that is yourself: for the argument, as you will perceive, comes round to the same point. I think that you must remember our saying that the holy or pious was not the same as that which is loved of the gods. Do you remember that?

Euth. I do.

Soc. And do you not see that what is loved of the gods is holy, and this is the same as what is dear to them?

Euth. True.

Soc. Then either we were wrong in that admission; or, if we were right then, we are wrong now.

Euth. I suppose that is the case.

Soc. Then we must begin again and ask, What is piety? That is an inquiry which I shall never be weary of pursuing as far as in me lies; and I entreat you not to scorn me, but to apply your mind to the utmost, and tell me the truth. For, if any man knows, you are he; and therefore I shall detain you, like Proteus, until you tell. For if you had not certainly known the nature of piety and impiety, I am confident that you would never, on behalf of a serf, have charged your aged father with murder. You would not have run such a risk of doing wrong in the sight of the gods, and you would have had too much respect for the opinions of men. I am sure, therefore, that you know the nature of piety and impiety. Speak out then, my dear Euthyphro, and do not hide your knowledge.

Euth. Another time, Socrates; for I am in a hurry, and must go now.

Soc. Alas! my companion, and will you leave me in despair? I was hoping that you would instruct me in the nature of piety and impiety, so that I might have cleared myself of Meletus and his indictment. Then I might have proved to him that I had been converted by Euthyphro, and had done with rash innovations and speculations, in which I had indulged through ignorance, and was about to lead a better life.

APOLOGY.

INTRODUCTION.

In what relation the Apology of Plato stands to the real defense of Socrates, there are no means of determining. It certainly agrees in tone and character with the description of Xenophon, who says in the Memorabilia (iv. 4, 4) that Socrates might have been acquitted "if in any moderate degree he would have conciliated the favor of the dicasts;" and who informs us in another passage (iv. 8, 4), on the testimony of Hermogenes, the friend of Socrates, that he had no wish to live; and that the divine sign refused to allow him to prepare a defense, and also that Socrates himself declared this to be unnecessary, on the ground that all his life long he had been preparing against that hour. For the speech breathes throughout a spirit of defiance, "ut non supplex aut reus sed magister aut dominus videretur esse judicum" (Cic. de Orat. i. 54); and the loose and desultory style is an imitation of the "accustomed manner" in which Socrates spoke in "the agora and among the tables of the money-changers." The allusion in the Crito (45 B) may, perhaps, be adduced as a further evidence of the literal accuracy of some parts (37 C, D). But in the main it must be regarded as the ideal of Socrates, according to Plato's conception of him, appearing in the greatest and most public scene of his life, and in the height of his triumph, when he is weakest, and yet his mastery over mankind is greatest, and the habitual irony of his life acquires a new meaning and a sort of tragic pathos in the face of death. The facts of his life are summed up, and the features of his character are brought out as if by accident in the course of the defense. The looseness of the style, the seeming want of arrangement of the topics, is found to result in a perfect work of art, which is the portrait of Socrates.

Yet some of the topics may have been actually used by Socrates; and the recollection of his very words may have rung in the ears of his disciple. The Apology of Plato may be compared generally with those speeches of Thucydides in which he has embodied his conception of the lofty character and policy of the great Pericles, and which at the same time furnish a commentary on the situation of affairs from the point of view of the historian. So in the Apology

there is an ideal rather than a literal truth; much is said that ought to have been said but was not said, and is only Plato's view of the situation. And we may perhaps even indulge in the fancy that the actual defense of Socrates was as much greater than the Platonic defense as the master was greater than the disciple. But in any case, some of the words actually used have probably been preserved. It is significant that Plato is said to have been present at the defense (38 B), as he is also said to have been absent at the last scene in the Phaedo (59 B). Is it fanciful to suppose that he meant to give the stamp of authenticity to the one and not to the other? — especially when we remember that these two passages are the only ones in which Plato makes mention of himself. Moreover, the Apology appears to combine the common characteristics both of the Xenophontean and Platonic Socrates, while the Phaedo passes into a region of thought which is very characteristic of Plato, but not of his master.

There is not much in the other Dialogues which can be compared with the Apology. The same recollection of his master may have been present to the mind of Plato when depicting the sufferings of the Just in the Republic (ii. 361 foll., vi. 500 A). The Crito may also be regarded as a sort of appendage to the Apology, in which Socrates, who has defied the judges, is nevertheless represented as scrupulously obedient to the laws. The idealization of the sufferer is carried still further in the Gorgias (476 foll.), in which the thesis is maintained, that "to suffer is better than to do evil;" and the art of rhetoric is described as only useful for the purpose of self-accusation. The parallelisms which occur in the so-called Apology of Xenophon are not worth noticing, because the writing in which they are contained is manifestly spurious. The statements of the Memorabilia (i. 2, iv. 8) respecting the trial and death of Socrates agree generally with Plato; but they have lost the flavor of Socratic irony in the narrative of Xenophon.

The Apology or Platonic defense of Socrates is divided into three parts: 1st. The defense properly so called; 2d. The shorter address in mitigation of the penalty; 3d. The last words of prophetic rebuke and exhortation.

The first part commences with an apology for his colloquial style: he is, as he has always been, the enemy of rhetoric, and knows of no rhetoric but truth; he will not falsify his character by making a speech. Then he proceeds to divide his accusers into two classes; first, there is the nameless accuser — public opinion. All the world from their earliest years had heard that he was a corrupter of youth, and had seen him caricatured in the Clouds of Aristophanes. Secondly, there are the professed accusers, who are but the mouthpiece of the others. The accusations of both might be summed up in a formula. The first say, "Socrates is an evil-doer and a curious person, searching into things under the earth and above the heaven;

and making the worse appear the better cause, and teaching all this to others." The second, "Socrates is an evil-doer and corrupter of the youth, who does not receive the gods whom the state receives, but introduces other new divinities." These last appear to have been the words of the actual indictment (cp. Xen. Mem. i. 1), of which the previous formula is a parody.

The answer begins by clearing up a confusion. In the representations of the comic poets, and in the opinion of the multitude, he had been confounded with the teachers of physical science and with the Sophists. But this was an error. For both of them he professes a respect in the open court, which contrasts with his manner of speaking about them in other places. (Cp. for Anaxagoras, Phaedo 98 B, foll., and for the Sophists, *passim*.) But at the same time he shows that he is not one of them. Of natural philosophy he knows nothing; not that he despises such pursuits, but the fact is that he is ignorant of them, and never says a word about them. Nor does he receive money for teaching; that is another mistaken notion, for he has nothing to teach. But he commends Evenus for teaching virtue at such a moderate rate. Something of the "accustomed irony," which may perhaps be expected to sleep in the ear of the multitude, is lurking here.

He then goes on to explain the reason why he is in such an evil name. That had arisen out of a peculiar mission which he had taken upon himself. The enthusiastic Chaerephon (probably in anticipation of the answer he received) had gone to Delphi and asked the oracle if there was any man wiser than Socrates; and the answer was, that there was no man wiser. What could be the meaning of this — that he who knew nothing, and knew that he knew nothing, should be declared by the oracle to be the wisest of men? Reflecting upon this, he determined to refute the oracle by finding "a wiser;" and first he went to the politicians, and then to the poets, and then to the craftsmen, but always with the same result — he found that they knew nothing, or hardly anything more than himself; and that the little advantage which in some cases they possessed was more than counterbalanced by their conceit of knowledge. He knew nothing, and knew that he knew nothing: they knew little or nothing, and imagined that they knew all things. Thus he had passed his life as a sort of missionary in detecting the pretended wisdom of mankind; and this occupation had quite absorbed him and taken him away both from public and private affairs. Young men of the richer sort had made a pastime of the same pursuit, "which was not unamusing." And hence bitter enmities had arisen; the professors of knowledge had revenged themselves by calling him a villainous corrupter of the youth, and by repeating the commonplaces about atheism and materialism and sophistry, which are the stock accusations against all philosophers when there is nothing else to be said of them.

The second accusation he meets by interrogating Meletus, who is present and can be interrogated. "If he is the corrupter, who is the improver of the citizens?" "All mankind." But how absurd, how contrary to analogy is this! How inconceivable too, that he should make the citizens worse when he has to live with them. This surely cannot be intentional; and if unintentional, he ought to have been instructed by Meletus, and not accused in the court.

But there is another part of the indictment which says that he teaches men not to receive the gods whom the city receives, and has other new gods. "Is that the way in which he is supposed to corrupt the youth?" "Yes, that is the way." "Has he only new gods, or none at all?" "None, at all." "What, not even the sun and moon?" "No; why, he says that the sun is a stone, and the moon earth." That, replies Socrates, is the old confusion about Anaxagoras; the Athenian people are not so ignorant as to attribute to the influence of Socrates notions which have found their way into the drama, and may be learned at the theatre. Socrates undertakes to show that Meletus (rather unjustifiably) has been compounding a riddle in this part of the indictment: "There are no gods, but Socrates believes in the existence of the sons of gods, which is absurd."

Leaving Meletus, who has had enough words spent upon him, he returns to his original accusers. The question may be asked, Why will he persist in following a professlon which leads him to death? Why — because he must remain at his post where the God has placed him, as he remained at Potidaea, and Amphipolis, and Delium, where the generals placed him. Besides, he is not so overwise as to imagine that he knows whether death is a good or an evil; and he is certain that desertion of his duty is an evil. Anytus is quite right in saying that they should never have indicted him if they meant to let him go. For he will certainly obey God rather than man; and will continue to preach to all men of all ages the necessity of virtue and improvement; and if they refuse to listen to him he will still persevere and reprove them. This is his way of corrupting the youth, which he will not cease to follow in obedience to the God, even if a thousand deaths await him.

He is desirous that they should not put him to death — not for his own sake, but for theirs; because he is their heaven-sent friend (and they will never have such another), or, as he may be ludicrously described, the gadfly who stirs the generous steed into motion. Why then has he never taken part in public affairs? Because the familiar divine voice has hindered him; if he had been a public man and fought for the right, as he would certainly have fought against the many, he would not have lived, and could therefore have done no good. Twice in public matters he has risked his life for the sake of justice — once at the trial of the generals; and again in resistance to the tyrannical commands of the Thirty.

But, though not a public man, he has passed his days in instructing the citizens without fee or reward; this was his mission. Whether his disciples have turned out well or ill, he cannot justly be charged with the result, for he never promised to teach them anything. They might come if they liked, and they might stay away if they liked: and they did come, because they found an amusement in hearing the pretenders to wisdom detected. If they have been corrupted, their elder relatives (if not themselves) might surely appear in court and witness against him, and there is an opportunity still for them to do this. But their fathers and brothers all appear in court (including "this" Plato), to witness on his behalf; and if their relatives are corrupted, at least they are uncorrupted; "and they are my witnesses. For they know that I am speaking the truth, and that Meletus is lying."

This is about all he has to say. He will not entreat the judges to spare his life; neither will he present a spectacle of weeping children, although he, too, is not made of "rock or oak." Some of the judges themselves may have complied with this practice on similar occasions, and he trusts that they will not be angry with him for not following their example. But he feels that such conduct brings discredit on the name of Athens; he feels, too, that the judge has sworn not to give away justice; and he cannot be guilty of the impiety of asking the judge to forswear himself, when he is himself being tried for impiety.

As he expected, and probably intended, he is convicted. And now the tone of the speech, instead of being more conciliatory, becomes more lofty and commanding. Anytus proposes death as the penalty; and what counter-proposition shall he make? He, the benefactor of the Athenian people, whose whole life has been spent in doing them good, should at least have the Olympic victor's reward of maintenance in the prytaneum. Or why should he propose any counter-penalty when he does not know whether death, which Anytus proposes, is a good or an evil? and he is certain that imprisonment is an evil, exile is an evil. Loss of money might be no evil, but then he has none to give; perhaps he can make up a mina. Let that then be the penalty, or, if his friends wish, thirty minae; for this they will be excellent securities.

[*He is condemned to death.*]

He is an old man already, and the Athenians will gain nothing but disgrace by depriving him of a few years of life. Perhaps he could have escaped, if he had chosen to throw down his arms and entreat for his life. But he does not at all repent of the manner of

his defense; he would rather die in his own fashion than live in theirs. For the penalty of unrighteousness is swifter than death, and that has already overtaken his accusers as death will soon overtake him.

And now, as one who is about to die, he will prophesy to them. They have put him to death in order to escape the necessity of giving an account of their lives. But his death "will be the seed" of many disciples who will convict them of their evil ways, and will come forth to reprove them in harsher terms, because they are younger and more inconsiderate.

He would like to say a few words, while there is time, to those who would have acquitted him. He wishes them to know that the divine sign never interrupted him in the course of his defense; the reason of which, as he conjectures, is that the death to which he is going is a good and not an evil. For either death is a long sleep, the best of sleeps, or a journey to another world in which the souls of the dead are gathered together, and in which there may be a hope of seeing the heroes of old — in which, too, there are just judges; and as all are immortal, there can be no fear of any one being put to death for his opinions.

Nothing evil can happen to the good man either in life or death, and his own death has been permitted by the gods, because it was better for him to depart; and therefore he forgives his judges because they have done him no harm, although they never meant to do him any good.

He has a last request to make to them — that they will trouble his sons as he has troubled them, if they appear to prefer riches to virtue, or to think themselves something when they are nothing.

"Few persons will be found to wish that Socrates should have defended himself otherwise," — if, as we must add, his defense was that with which Plato has provided him. But leaving this question, which does not admit of a precise solution, we may go on to ask what was the impression which Plato in the Apology intended to leave of the character and conduct of his master in the last great scene? Did he intend to represent him (1) as employing sophistries; (2) as designedly irritating the judges? Or are these sophistries to be regarded as belonging to the age in which he lived and to his personal character, and this apparent haughtiness as flowing from the natural elevation of his position?

For example, when he says that it is absurd to suppose that one man is the corrupter and all the rest of the world the improvers of the youth; or, when he argues that he never could have corrupted the men with whom he had to live; or, when he proves his belief

in the gods because he believes in the sons of gods, is he serious or jesting? It may be observed that these sophisms all occur in his cross-examination of Meletus, who is easily foiled and mastered in the hands of the great dialectician. Perhaps he regarded these answers as all of them good enough for his accuser (he makes very light of him throughout). Also it may be noted that there is a touch of irony in all of them, which takes them out of the category of sophistry.

That the manner in which he defends himself about the lives of his disciples is not satisfactory, can hardly be denied. Fresh in the memory of the Athenians, and detestable as they deserved to be to the newly restored democracy, were the names of Alcibiades, Critias, Charmides. It is obviously not a sufficient answer that Socrates had never professed to teach them anything, and is therefore not justly chargeable with their crimes. Yet the defense, when taken out of this ironical form, is doubtless sound: that his teaching had nothing to do with their evil lives. Here, then, the sophistry is rather in form than in substance, though we might desire that to such a serious charge Socrates had given a more serious answer.

Truly characteristic of Socrates is another point in his answer, which may also be regarded as sophistical. He says that "if he has corrupted the youth, he must have corrupted them involuntarily." In these words the Socratic doctrine of the involuntariness of evil is clearly intended to be conveyed. But if, as Socrates argues, all evil is involuntary, then all criminals ought to be admonished and not punished. Here again, as in the former instance, the defense of Socrates, which is untrue practically, may yet be true in some ideal or transcendental sense. The commonplace reply, that if he had been guilty of corrupting the youth, their relations would surely have witnessed against him, with which he concludes this part of his defense, is more satisfactory.

Again, when Socrates argues that he must believe in the gods because he believes in the sons of gods, we must remember that this is a refutation not of the original indictment, which is consistent enough,— "Socrates does not receive the gods whom the city receives, and has other new divinities," — but of the interpretation put upon the words by Meletus, who has affirmed that he is a downright atheist. To this Socrates fairly answers, in accordance with the ideas of the time, that a downright atheist cannot believe in the sons of gods or in divine things. The notion that demons or lesser divinities are the sons of gods is not to be regarded as ironical or skeptical. But the love of argument may certainly have led Plato to relapse into the mythological point of view, and prevented him from observing that the reasoning is only formally correct.

The second question, whether Plato meant to represent Socrates as needlessly braving or irritating his judges, must also be answered

in the negative. His irony, his superiority, his audacity, "regarding not the person of man," necessarily flow out of the loftiness of his situation. He is not acting a part upon a great occasion, but he is what he has been all his life long, "a king of men." He would rather not appear insolent, if he could avoid this (οὐχ ὡς αὐθαδιζόμενος τοῦτο λέγω). He is not desirous of hastening his own end, for life and death are simply indifferent to him. But neither will he say or do anything which might avert the penalty; he cannot have his tongue bound, even in the "throat of death:" his natural character must appear. He is quite willing to make his defense to posterity and to the world, for that is a true defense. But such a defense as would be acceptable to his judges and might procure an acquittal, it is not in his nature to make. With his actual accusers he will only fence and play. The singularity of the mission which he ascribes to himself is a great reason for believing that he is serious in his account of the motives which actuated him. The dedication of his life to the improvement of his fellow-citizens is not so remarkable as the ironical spirit in which he goes about doing good to all men only in vindication of the credit of the oracle, and in the vain hope of finding a wiser man than himself. Yet this singular and almost accidental character of his mission agrees with the divine sign which, according to our notions, is equally accidental and irrational, and is nevertheless accepted by him as the guiding principle in his life. Nor must we forget that Socrates is nowhere represented to us as a freethinker or skeptic. There is no reason whatever to doubt his sincerity when he implies his belief in the divinity of the sun and moon, or when he speculates on the possibility of seeing and knowing the heroes of the Trojan War in another world. On the other hand, his hope of immortality is uncertain; he also conceives of death as a long sleep (in this respect differing from the Phaedo), and at last falls back on resignation to the divine will, and the certainty that no evil can happen to the good man either in life or death. His absolute truthfulness seems to hinder him from asserting positively more than this. The irony of Socrates is not a mask which he puts on at will, but flows necessarily out of his character and out of his relation to mankind. This, which is true of him generally, is especially true of the last memorable act in which his life is summed up. Such irony is not impaired but greatly heightened by a sort of natural simplicity.

It has been remarked that the prophecy at the end of a new generation of teachers who would rebuke and exhort the Athenian people in harsher and more violent terms, as far as we know, was never fulfilled. No inference can be drawn from this circumstance as to the probability of their having been actually uttered. They express the aspiration of the first martyr of philosophy, that he would leave behind him many followers, accompanied by the not

unnatural feeling that they would be fiercer and more inconsiderate in their words when emancipated from his control.

The above remarks must be understood as applying with any degree of certainty to the Platonic Socrates only. For, however probable it may be that these or similar words may have been spoken by Socrates himself, we cannot exclude the possibility, that like so much else, *e. g.* the wisdom of Critias, the poem of Solon, the virtues of Charmides, they may have been due only to the imagination of Plato.

APOLOGY.

HOW you have felt, O men of Athens, at hearing the speeches of my accusers, I cannot tell; but I know that their persuasive words almost made me forget who I was, such was the effect of them; and yet they have hardly spoken a word of truth. But many as their falsehoods were, there was one of them which quite amazed me: I mean when they told you to be upon your guard, and not to let yourselves be deceived by the force of my eloquence. They ought to have been ashamed of saying this, because they were sure to be detected as soon as I opened my lips and displayed my deficiency; they certainly did appear to be most shameless in saying this, unless by the force of eloquence they mean the force of truth; for then I do indeed admit that I am eloquent. But in how different a way from theirs! Well, as I was saying, they have hardly uttered a word, or not more than a word, of truth; but you shall hear from me the whole truth: not, however, delivered after their manner, in a set oration duly ornamented with words and phrases. No, indeed! but I shall use the words and arguments which occur to me at the moment; for I am certain that this is right, and that at my time of life I ought not to be appearing before you, O men of Athens, in the character of a juvenile orator: let no one expect this of me. And I must beg of you to grant me one favor, which is this, — If you hear me using the same words in my defense which I have been in the habit of using, and which most of you may have heard in the agora, and at the tables of the money-changers, or anywhere else, I would ask you not to be surprised at this, and not to interrupt me. For I am more than seventy years of age, and this is the first time that I have ever appeared in a court of law, and I am quite a stranger to the ways of the

Steph. 17

18 place; and therefore I would have you regard me as if I were really a stranger, whom you would excuse if he spoke in his native tongue, and after the fashion of his country: that I think is not an unfair request. Never mind the manner, which may or may not be good; but think only of the justice of my cause, and give heed to that: let the judge decide justly and the speaker speak truly.

And first, I have to reply to the older charges and to my first accusers, and then I will go on to the later ones. For I have had many accusers, who accused me of old, and their false charges have continued during many years; and I am more afraid of them than of Anytus and his associates, who are dangerous, too, in their own way. But far more dangerous are these, who began when you were children, and took possession of your minds with their falsehoods, telling of one Socrates, a wise man, who speculated about the heaven above, and searched into the earth beneath, and made the worse appear the better cause. These are the accusers whom I dread; for they are the circulators of this rumor, and their hearers are too apt to fancy that speculators of this sort do not believe in the gods. And they are many, and their charges against me are of ancient date, and they made them in days when you were impressible, — in childhood, or perhaps in youth, — and the cause when heard went by default, for there was none to answer. And hardest of all, their names I do not know and cannot tell; unless in the chance case of a comic poet. But the main body of these slanderers who from envy and malice have wrought upon you, — and there are some of them who are convinced themselves, and impart their convictions to others, — all these, I say, are most difficult to deal with; for I cannot have them up here, and examine them, and therefore I must simply fight with shadows in my own defense, and examine when there is no one who answers. I will ask you then to assume with me, as I was saying, that my opponents are of two kinds, — one recent, the other ancient; and I hope that you will see the propriety of my answering the latter first, for these accusations you heard long before the others, and much oftener.

19 Well, then, I will make my defense, and I will endeavor in the short time which is allowed to do away with this evil opinion of me which you have held for such a long time; and I hope that I may succeed, if this be well for you and me, and that my words may find favor with you. But I know that

o accomplish this is not easy — I quite see the nature of the ask. Let the event be as God wills: in obedience to the law I make my defense.

I will begin at the beginning, and ask what the accusation is which has given rise to this slander of me, and which has encouraged Meletus to proceed against me. What do the slanderers say? They shall be my prosecutors, and I will sum up their words in an affidavit: "Socrates is an evil-doer, and a curious person, who searches into things under the earth and in heaven, and he makes the worse appear the better cause; and he teaches the aforesaid doctrines to others." That is the nature of the accusation, and that is what you have seen yourselves in the comedy of Aristophanes, who has introduced a man whom he calls Socrates, going about and saying that he can walk in the air, and talking a deal of nonsense concerning matters of which I do not pretend to know either much or little — not that I mean to say anything disparaging of any one who is a student of natural philosophy. I should be very sorry if Meletus could lay that to my charge. But the simple truth is, O Athenians, that I have nothing to do with these studies. Very many of those here present are witnesses to the truth of this, and to them I appeal. Speak then, you who have heard me, and tell your neighbors whether any of you have ever known me hold forth in few words or in many upon matters of this sort. . . . . You hear their answer. And from what they say of this you will be able to judge of the truth of the rest.

As little foundation is there for the report that I am a teacher, and take money; that is no more true than the other. Although, if a man is able to teach, I honor him for being paid. There is Gorgias of Leontium, and Prodicus of Ceos, and Hippias of Elis, who go the round of the cities, and are able to persuade the young men to leave their own citizens, by whom they might be taught for nothing, and come to them, whom they not only pay, but are thankful if they may be allowed to pay them. There is actually a Parian philosopher residing in Athens, of whom I have heard; and I came to hear of him in this way: I met a man who has spent a world of money on the Sophists, Callias the son of Hipponicus, and knowing that he had sons, I asked him: "Callias," I said, "if your two sons were foals or calves, there would be no difficulty in finding some one to put over them; we should hire a trainer

of horses, or a farmer probably, who would improve and perfect them in their own proper virtue and excellence; but, as they are human beings, whom are you thinking of placing over them? Is there any one who understands human and political virtue? You must have thought about this as you have sons; is there any one?" "There is," he said. "Who is he?" said I, "and of what country? and what does he charge?" "Evenus the Parian," he replied; "he is the man, and his charge is five minae." Happy is Evenus, I said to myself, if he really has this wisdom, and teaches at such a modest charge. Had I the same, I should have been very proud and conceited; but the truth is that I have no knowledge of the kind, O Athenians.

I dare say that some one will ask the question, "Why is this, Socrates, and what is the origin of these accusations of you: for there must have been something strange which you have been doing? All this great fame and talk about you would never have arisen if you had been like other men: tell us, then, why this is, as we should be sorry to judge hastily of you." Now I regard this as a fair challenge, and I will endeavor to explain to you the origin of this name of "wise," and of this evil fame. Please to attend, then. And although some of you may think that I am joking, I declare that I will tell you the entire truth. Men of Athens, this reputation of mine has come of a certain sort of wisdom which I possess. If you ask me what kind of wisdom, I reply, such wisdom as is attainable by man, for to that extent I am inclined to believe that I am wise; whereas the persons of whom I was speaking have a superhuman wisdom, which I may fail to describe, because I have it not myself; and he who says that I have, speaks falsely, and is taking away my character. And here, O men of Athens, I must beg you not to interrupt me, even if I seem to say something extravagant. For the word which I will speak is not mine. I will refer you to a witness who is worthy of credit, and will tell you about my wisdom — whether I have any, and of what sort — and that witness shall be the God of
21 Delphi. You must have known Chaerephon; he was early a friend of mine, and also a friend of yours, for he shared in the exile of the people, and returned with you. Well, Chaerephon, as you know, was very impetuous in all his doings, and he went to Delphi and boldly asked the oracle to tell him whether — as I was saying, I must beg you not to

interrupt — he asked the oracle to tell him whether there was any one wiser than I was, and the Pythian prophetess answered, that there was no man wiser. Chaerephon is dead himself; but his brother, who is in court, will confirm the truth of this story.

Why do I mention this? Because I am going to explain to you why I have such an evil name. When I heard the answer, I said to myself, What can the god mean? and what is the interpretation of this riddle? for I know that I have no wisdom, small or great. What can he mean when he says that I am the wisest of men? And yet he is a god and cannot lie; that would be against his nature. After a long consideration, I at last thought of a method of trying the question. I reflected that if I could only find a man wiser than myself, then I might go to the god with a refutation in my hand. I should say to him, "Here is a man who is wiser than I am; but you said that I was the wisest." Accordingly I went to one who had the reputation of wisdom, and observed to him — his name I need not mention; he was a politician whom I selected for examination — and the result was as follows: When I began to talk with him, I could not help thinking that he was not really wise, although he was thought wise by many, and wiser still by himself; and I went and tried to explain to him that he thought himself wise, but was not really wise; and the consequence was that he hated me, and his enmity was shared by several who were present and heard me. So I left him, saying to myself, as I went away: Well, although I do not suppose that either of us knows anything really beautiful and good, I am better off than he is, — for he knows nothing, and thinks that he knows. I neither know nor think that I know. In this latter particular, then, I seem to have slightly the advantage of him. Then I went to another who had still higher philosophical pretensions, and my conclusion was exactly the same. I made another enemy of him, and of many others beside him.

After this I went to one man after another, being not unconscious of the enmity which I provoked, and I lamented and feared this: but necessity was laid upon me, — the word of God, I thought, ought to be considered first. And I said to myself, Go I must to all who appear to know, and find out the meaning of the oracle. And I swear to you, Athenians, by the dog I swear! — for I must tell you the truth — the result of my mission was just this: I found that the men most in repute were

22 all but the most foolish; and that some inferior men were really wiser and better. I will tell you the tale of my wanderings and of the "Herculean" labors, as I may call them, which I endured only to find at last the oracle irrefutable. When I left the politicians, I went to the poets; tragic, dithyrambic, and all sorts. And there, I said to myself, you will be detected; now you will find out that you are more ignorant than they are. Accordingly, I took them some of the most elaborate passages in their own writings, and asked what was the meaning of them — thinking that they would teach me something. Will you believe me? I am almost ashamed to speak of this, but still I must say that there is hardly a person present who would not have talked better about their poetry than they did themselves. That showed me in an instant that not by wisdom do poets write poetry, but by a sort of genius and inspiration; they are like diviners or soothsayers who also say many fine things, but do not understand the meaning of them. And the poets appeared to me to be much in the same case; and I further observed that upon the strength of their poetry they believed themselves to be the wisest of men in other things in which they were not wise. So I departed, conceiving myself to be superior to them for the same reason that I was superior to the politicians.

At last I went to the artisans, for I was conscious that I knew nothing at all, as I may say, and I was sure that they knew many fine things; and in this I was not mistaken, for they did know many things of which I was ignorant, and in this they certainly were wiser than I was. But I observed that even the good artisans fell into the same error as the poets; because they were good workmen they thought that they also knew all sorts of high matters, and this defect in them overshadowed their wisdom — therefore I asked myself on behalf of the oracle, whether I would like to be as I was, neither having their knowledge nor their ignorance, or like them in both; and I made answer to myself and the oracle that I was better off as I was.

This investigation has led to my having many enemies of the
23 worst and most dangerous kind, and has given occasion also to many calumnies. And I am called wise, for my hearers always imagine that I myself possess the wisdom which I find wanting in others: but the truth is, O men of Athens, that God only is wise; and in this oracle he means to say that the wisdom of men is little or nothing; he is not speaking of Soc-

rates, he is only using my name as an illustration, as if he said, He, O men, is the wisest, who, like Socrates, knows that his wisdom is in truth worth nothing. And so I go my way, obedient to the god, and make inquisition into the wisdom of any one, whether citizen or stranger, who appears to be wise; and if he is not wise, then in vindication of the oracle I show him that he is not wise; and this occupation quite absorbs me, and I have no time to give either to any public matter of interest or to any concern of my own, but I am in utter poverty by reason of my devotion to the god.

There is another thing: — young men of the richer classes, who have not much to do, come about me of their own accord; they like to hear the pretenders examined, and they often imitate me, and examine others themselves; there are plenty of persons, as they soon enough discover, who think that they know something, but really know little or nothing: and then those who are examined by them instead of being angry with themselves are angry with me: This confounded Socrates, they say; this villainous misleader of youth! — and then if somebody asks them, Why, what evil does he practice or teach? they do not know, and cannot tell; but in order that they may not appear to be at a loss, they repeat the ready-made charges which are used against all philosophers about teaching things up in the clouds and under the earth, and having no gods, and making the worse appear the better cause; for they do not like to confess that their pretense of knowledge has been detected — which is the truth: and as they are numerous and ambitious and energetic, and are all in battle array and have persuasive tongues, they have filled your ears with their loud and inveterate calumnies. And this is the reason why my three accusers, Meletus and Anytus and Lycon, have set upon me: Meletus, who has a quarrel with me on behalf of the poets; Anytus, on behalf of the craftsmen; Lycon, on behalf of the rhetoricians: and as I said at the beginning, I cannot expect to get rid of this mass of calumny all in a moment. And this, O men of Athens, is the truth and the whole truth; I have concealed nothing, I have dissembled nothing. And yet, I know that this plainness of speech makes them hate me, and what is their hatred but a proof that I am speaking the truth? — this is the occasion and reason of their slander of me, as you will find out either in this or in any future inquiry. 24

I have said enough in my defense against the first class of

my accusers; I turn to the second class who are headed by Meletus, that good and patriotic man, as he calls himself. And now I will try to defend myself against them: these new accusers must also have their affidavit read. What do they say? Something of this sort: That Socrates is a doer of evil, and corrupter of the youth, and he does not believe in the gods of the state, and has other new divinities of his own. That is the sort of charge; and now let us examine the particular counts. He says that I am a doer of evil, who corrupt the youth; but I say, O men of Athens, that Meletus is a doer of evil, and the evil is that he makes a joke of a serious matter, and is too ready at bringing other men to trial from a pretended zeal and interest about matters in which he really never had the smallest interest. And the truth of this I will endeavor to prove.

Come hither, Meletus, and let me ask a question of you. You think a great deal about the improvement of youth?

Yes I do.

Tell the judges, then, who is their improver; for you must know, as you have taken the pains to discover their corrupter, and are citing and accusing me before them. Speak, then, and tell the judges who their improver is. Observe, Meletus, that you are silent, and have nothing to say. But is not this rather disgraceful, and a very considerable proof of what I was saying, that you have no interest in the matter? Speak up, friend, and tell us who their improver is.

The laws.

But that, my good sir, is not my meaning. I want to know who the person is, who, in the first place, knows the laws.

The judges, Socrates, who are present in court.

What, do you mean to say, Meletus, that they are able to instruct and improve youth?

25 Certainly they are.

What, all of them, or some only and not others?

All of them.

By the goddess Here, that is good news! There are plenty of improvers, then. And what do you say of the audience, — do they improve them?

Yes, they do.

And the senators?

Yes, the senators improve them.

But perhaps the ecclesiasts corrupt them? — or do they too improve them?

They improve them.

Then every Athenian improves and elevates them; all with he exception of myself; and I alone am their corrupter? Is hat what you affirm?

That is what I stoutly affirm.

I am very unfortunate if that is true. But suppose I ask ou a question: Would you say that this also holds true in the ase of horses? Does one man do them harm and all the world ood? Is not the exact opposite of this true? One man is ble to do them good, or at least not many; the trainer of orses, that is to say, does them good, and others who have to o with them rather injure them? Is not that true, Meletus, f horses, or any other animals? Yes, certainly. Whether ou and Anytus say yes or no, that is no matter. Happy in- eed would be the condition of youth if they had one corrupter nly, and all the rest of the world were their improvers. And ou, Meletus, have sufficiently shown that you never had a ought about the young: your carelessness is seen in your not aring about the matters spoken of in this very indictment.

And now, Meletus, I must ask you another question: Which better, to live among bad citizens, or among good ones? An- wer, friend, I say; for that is a question which may be easily nswered. Do not the good do their neighbors good, and the ad do them evil?

Certainly.

And is there any one who would rather be injured than enefited by those who live with him. Answer, my good iend; the law requires you to answer — does any one like to e injured?

Certainly not.

And when you accuse me of corrupting and deteriorating the outh, do you allege that I corrupt them intentionally or unin- ntionally?

Intentionally, I say.

But you have just admitted that the good do their neighbors ood, and the evil do them evil. Now, is that a truth which our superior wisdom has recognized thus early in life, and am at my age, in such darkness and ignorance as not to know hat if a man with whom I have to live is corrupted by me, am very likely to be harmed by him, and yet I corrupt him, nd intentionally, too; that is what you are saying, and of that ou will never persuade me or any other human being. But

26 either I do not corrupt them, or I corrupt them unintentionally, so that on either view of the case you lie. If my offense is unintentional, the law has no cognizance of unintentional offenses: you ought to have taken me privately, and warned and admonished me; for if I had been better advised, I should have left off doing what I only did unintentionally, — no doubt I should; whereas you hated to converse with me or teach me, but you indicted me in this court, which is a place, not of instruction, but of punishment.

I have shown, Athenians, as I was saying, that Meletus has no care at all, great or small, about the matter. But still I should like to know, Meletus, in what I am affirmed to corrupt the young. I suppose you mean, as I infer from your indictment, that I teach them not to acknowledge the gods which the state acknowledges, but some other new divinities or spiritual agencies in their stead. These are the lessons which corrupt the youth, as you say.

Yes, that I say emphatically.

Then, by the gods, Meletus, of whom we are speaking, tell me and the court, in somewhat plainer terms, what you mean! for I do not as yet understand whether you affirm that I teach others to acknowledge some gods, and therefore do believe in gods and am not an entire atheist — this you do not lay to my charge; but only that they are not the same gods which the city recognizes — the charge is that they are different gods. Or, do you mean to say that I am an atheist simply, and a teacher of atheism?

I mean the latter — that you are a complete atheist.

That is an extraordinary statement, Meletus. Why do you say that? Do you mean that I do not believe in the godhead of the sun or moon, which is the common creed of all men?

I assure you, judges, that he does not believe in them; for he says that the sun is stone, and the moon earth.

Friend Meletus, you think that you are accusing Anaxagoras: and you have but a bad opinion of the judges, if you fancy them ignorant to such a degree as not to know that these doctrines are found in the books of Anaxagoras the Clazomenian, who is full of them. And these are the doctrines which the youth are said to learn of Socrates, when there are not unfrequently exhibitions of them at the theatre [1] (price of admis-

[1] Probably in allusion to Aristophanes who caricatured, and to Euripides who borrowed the notions of Anaxagoras, as well as to other dramatic poets.

sion one drachma at the most); and they might cheaply purchase them, and laugh at Socrates if he pretends to father such eccentricities. And so, Meletus, you really think that I do not believe in any god?

I swear by Zeus that you believe absolutely in none at all.

You are a liar, Meletus, not believed even by yourself. For I cannot help thinking, O men of Athens, that Meletus is reckless and impudent, and that he has written this indictment in a spirit of mere wantonness and youthful bravado. Has he not compounded a riddle, thinking to try me? He said to himself: I shall see whether this wise Socrates will discover my ingenious contradiction, or whether I shall be able to deceive him and the rest of them. For he certainly does appear to me to contradict himself in the indictment as much as if he said that Socrates is guilty of not believing in the gods, and yet of believing in them — but this surely is a piece of fun. 27

I should like you, O men of Athens, to join me in examining what I conceive to be his inconsistency; and do you, Meletus, answer. And I must remind you that you are not to interrupt me if I speak in my accustomed manner.

Did ever man, Meletus, believe in the existence of human things, and not of human beings? . . . . I wish, men of Athens, that he would answer, and not be always trying to get up an interruption. Did ever any man believe in horsemanship, and not in horses? or in flute-playing, and not in flute-players? No, my friend; I will answer to you and to the court, as you refuse to answer for yourself. There is no man who ever did. But now please to answer the next question: Can a man believe in spiritual and divine agencies, and not in spirits or demigods?

He cannot.

I am glad that I have extracted that answer, by the assistance of the court; nevertheless you swear in the indictment that I teach and believe in divine or spiritual agencies (new or old, no matter for that); at any rate, I believe in spiritual agencies, as you say and swear in the affidavit; but if I believe in divine beings, I must believe in spirits or demigods; is not that true? Yes, that is true, for I may assume that your silence gives assent to that. Now what are spirits or demigods? are they not either gods or the sons of gods? Is that true?

Yes, that is true.

But this is just the ingenious riddle of which I was speak-

ing: the demigods or spirits are gods, and you say first that I don't believe in gods, and then again that I do believe in gods; that is, if I believe in demigods. For if the demigods are the illegitimate sons of gods, whether by the nymphs or by any other mothers, as is thought, that, as all men will allow, necessarily implies the existence of their parents. You might as well affirm the existence of mules, and deny that of horses and asses. Such nonsense, Meletus, could only have been intended by you as a trial of me. You have put this into the indictment because you had nothing real of which to accuse me. But no one who has a particle of understanding will ever be convinced by you that the same men can believe in divine and superhu-
28 man things, and yet not believe that there are gods and demigods and heroes.

I have said enough in answer to the charge of Meletus: any elaborate defense is unnecessary; but as I was saying before, I certainly have many enemies, and this is what will be my destruction if I am destroyed; of that I am certain; not Meletus, nor yet Anytus, but the envy and detraction of the world, which has been the death of many good men, and will probably be the death of many more; there is no danger of my being the last of them.

Some one will say: And are you not ashamed, Socrates, of a course of life which is likely to bring you to an untimely end? To him I may fairly answer: There you are mistaken: a man who is good for anything ought not to calculate the chance of living or dying; he ought only to consider whether in doing anything he is doing right or wrong — acting the part of a good man or of a bad. Whereas, according to your view, the heroes who fell at Troy were not good for much, and the son of Thetis above all, who altogether despised danger in comparison with disgrace; and when his goddess mother said to him, in his eagerness to slay Hector, that if he avenged his companion Patroclus, and slew Hector, he would die himself, — "Fate," as she said, "waits upon you next after Hector;" he, hearing this, utterly despised danger and death, and instead of fearing them, feared rather to live in dishonor, and not to avenge his friend. "Let me die next," he replies, "and be avenged of my enemy, rather than abide here by the beaked ships, a scorn and a burden of the earth." Had Achilles any thought of death and danger? For wherever a man's place is, whether the place which he has chosen or that in which he has been placed by a com-

mander, there he ought to remain in the hour of danger; he should not think of death or of anything, but of disgrace. And this, O men of Athens, is a true saying.

Strange, indeed, would be my conduct, O men of Athens, if I who, when I was ordered by the generals whom you chose to command me at Potidaea and Amphipolis and Delium, remained where they placed me, like any other man, facing death, — if, I say, now, when, as I conceive and imagine, God orders me to fulfill the philosopher's mission of searching into myself and other men, I were to desert my post through fear of death, or any other fear; that would indeed be strange, and I might justly be arraigned in court for denying the existence of the gods, if I disobeyed the oracle because I was afraid of death: then I should be fancying that I was wise when I was not wise. For this fear of death is indeed the pretense of wisdom, and not real wisdom, being the appearance of knowing the unknown; since no one knows whether death, which they in their fear apprehend to be the greatest evil, may not be the greatest good. Is there not here conceit of knowledge, which is a disgraceful sort of ignorance? And this is the point in which, as I think, I am superior to men in general, and in which I might perhaps fancy myself wiser than other men, — that whereas I know but little of the world below, I do not suppose that I know: but I do know that injustice and disobedience to a better, whether God or man, is evil and dishonorable, and I will never fear or avoid a possible good rather than a certain evil. And therefore if you let me go now, and reject the counsels of Anytus, who said that if I were not put to death I ought not to have been prosecuted, and that if I escape now, your sons will all be utterly ruined by listening to my words, — if you say to me, Socrates, this time we will not mind Anytus, and will let you off, but upon one condition, that you are not to inquire and speculate in this way any more, and that if you are caught doing this again you shall die, — if this was the condition on which you let me go, I should reply: Men of Athens, I honor and love you; but I shall obey God rather than you, and while I have life and strength I shall never cease from the practice and teaching of philosophy, exhorting any one whom I meet after my manner, and convincing him, saying: O my friend, why do you, who are a citizen of the great and mighty and wise city of Athens, care so much about laying up the greatest amount of money and honor and reputation, and so little about

29

wisdom and truth and the greatest improvement of the soul, which you never regard or heed at all? Are you not ashamed of this? And if the person with whom I am arguing, says: Yes, but I do care; I do not depart or let him go at once; I interrogate and examine and cross-examine him, and if I think that he has no virtue, but only says that he has, I reproach him with undervaluing the greater, and overvaluing the less. And this I should say to every one whom I meet, young and old, citizen and alien, but especially to the citizens, inasmuch as they are my brethren. For this is the command to God, as I would have you know; and I believe that to this day no greater good has ever happened in the state than my service to the God. For I do nothing but go about persuading you all, old and young alike, not to take thought for your persons or your properties, but first and chiefly to care about the greatest improvement of the soul. I tell you that virtue is not given by money, but that from virtue come money and every other good of man, public as well as private. This is my teaching, and if this is the doctrine which corrupts the youth, my influence is ruinous indeed. But if any one says that this is not my teaching, he is speaking an untruth. Wherefore, O men of Athens, I say to you, do as Anytus bids or not as Anytus bids, and either acquit me or not; but whatever you do, know that I shall never alter my ways, not even if I have to die many times.

Men of Athens, do not interrupt, but hear me; there was an agreement between us that you should hear me out. And I think that what I am going to say will do you good: for I have something more to say, at which you may be inclined to cry out; but I beg that you will not do this. I would have you know, that if you kill such a one as I am, you will injure yourselves more than you will injure me. Meletus and Anytus will not injure me: they cannot; for it is not in the nature of things that a bad man should injure a better than himself. I do not deny that he may, perhaps, kill him, or drive him into exile, or deprive him of civil rights; and he may imagine, and others may imagine, that he is doing him a great injury: but in that I do not agree with him; for the evil of doing as Anytus is doing — of unjustly taking away another man's life — is greater far. And now, Athenians, I am not going to argue for my own sake, as you may think, but for yours, that you may not sin against the God, or lightly reject

his boon by condemning me. For if you kill me you will not easily find another like me, who, if I may use such a ludicrous figure of speech, am a sort of gadfly, given to the state by the God; and the state is like a great and noble steed who is tardy in his motions owing to his very size, and requires to be stirred into life. I am that gadfly which God has given the state, and all day long and in all places am always fastening upon you, arousing and persuading and reproaching you. And 31
as you will not easily find another like me, I would advise you to spare me. I dare say that you may feel irritated at being suddenly awakened when you are caught napping; and you may think that if you were to strike me dead as Anytus advises, which you easily might, then you would sleep on for the remainder of your lives, unless God in his care of you gives you another gadfly. And that I am given to you by God is proved by this: that if I had been like other men, I should not have neglected all my own concerns, or patiently seen the neglect of them during all these years, and have been doing yours, coming to you individually, like a father or elder brother, exhorting you to regard virtue; this, I say, would not be like human nature. And had I gained anything, or if my exhortations had been paid, there would have been some sense in that: but now, as you will perceive, not even the impudence of my accusers dares to say that I have ever exacted or sought pay of any one; they have no witness of that. And I have a witness of the truth of what I say; my poverty is a sufficient witness.

Some one may wonder why I go about in private, giving advice and busying myself with the concerns of others, but do not venture to come forward in public and advise the state. I will tell you the reason of this. You have often heard me speak of an oracle or sign which comes to me, and is the divinity which Meletus ridicules in the indictment. This sign I have had ever since I was a child. The sign is a voice which comes to me and always forbids me to do something which I am going to do, but never commands me to do anything, and this is what stands in the way of my being a politician. And rightly, as I think. For I am certain, O men of Athens, that if I had engaged in politics, I should have perished long ago, and done no good either to you or to myself. And don't be offended at my telling you the truth: for the truth is, that no man who goes to war with you or any other multitude, honestly struggling against the commission of unrighteousness and wrong in the state, will

32 save his life; he who will really fight for the right, if he would live even for a little while, must have a private station and not a public one.

I can give you as proofs of this, not words only, but deeds, which you value more than words. Let me tell you a passage of my own life, which will prove to you that I should never have yielded to injustice from any fear of death, and that if I had not yielded I should have died at once. I will tell you a story — tasteless, perhaps, and commonplace, but nevertheless true. The only office of state which I ever held, O men of Athens, was that of senator; the tribe Antiochis, which is my tribe, had the presidency at the trial of the generals who had not taken up the bodies of the slain after the battle of Arginusae; and you proposed to try them all together, which was illegal, as you all thought afterwards; but at the time I was the only one of the prytanes who was opposed to the illegality, and I gave my vote against you; and when the orators threatened to impeach and arrest me, and have me taken away, and you called and shouted, I made up my mind that I would run the risk, having law and justice with me, rather than take part in your injustice because I feared imprisonment and death. This happened in the days of the democracy. But when the oligarchy of the Thirty was in power, they sent for me and four others into the rotunda, and bade us bring Leon the Salaminian from Salamis, as they wanted to execute him. This was a specimen of the sort of commands which they were always giving with the view of implicating as many as possible in their crimes; and then I showed, not in word only but in deed, that, if I may be allowed to use such an expression, I cared not a straw for death, and that my only fear was the fear of doing an unrighteous or unholy thing. For the strong arm of that oppressive power did not frighten me into doing wrong; and when we came out of the rotunda the other four went to Salamis and fetched Leon, but I went quietly home. For which I might have lost my life, had not the power of the Thirty shortly afterwards come to an end. And to this many will witness.

Now do you really imagine that I could have survived all these years, if I had led a public life, supposing that like a good man I had always supported the right and had made justice, as I ought, the first thing? No indeed, men of Athens, neither I
33 nor any other. But I have been always the same in all my actions, public as well as private, and never have I

yielded any base compliance to those who are slanderously termed my disciples, or to any other. For the truth is that I have no regular disciples: but if any one likes to come and hear me while I am pursuing my mission, whether he be young or old, he may freely come. Nor do I converse with those who pay only, and not with those who do not pay; but any one, whether he be rich or poor, may ask and answer me and listen to my words; and whether he turns out to be a bad man or a good one, that cannot be justly laid to my charge, as I never taught him anything. And if any one says that he has ever learned or heard anything from me in private which all the world has not heard, I should like you to know that he is speaking an untruth.

But I shall be asked, Why do people delight in continually conversing with you? I have told you already, Athenians, the whole truth about this: they like to hear the cross-examination of the pretenders to wisdom; there is amusement in this. And this is a duty which the God has imposed upon me, as I am assured by oracles, visions, and in every sort of way in which the will of divine power was ever signified to any one. This is true, O Athenians; or, if not true, would be soon refuted. For if I am really corrupting the youth, and have corrupted some of them already, those of them who have grown up and have become sensible that I gave them bad advice in the days of their youth should come forward as accusers and take their revenge; and if they do not like to come themselves, some of their relatives, fathers, brothers, or other kinsmen, should say what evil their families suffered at my hands. Now is their time. Many of them I see in the court. There is Crito, who is of the same age and of the same deme with myself; and there is Critobulus his son, whom I also see. Then again there is Lysanias of Sphettus, who is the father of Aeschines, — he is present; and also there is Antiphon of Cephisus, who is the father of Epigenes; and there are the brothers of several who have associated with me. There is Nicostratus the son of Theosdotides, and the brother of Theodotus (now Theodotus himself is dead, and therefore he, at any rate, will not seek to stop him); and there is Paralus the son of Demodocus, who had a brother Theages; and Adeimantus the son of Aris- 34
ton, whose brother Plato is present; and Aeantodorus, who is the brother of Apollodorus, whom I also see. I might mention a great many others, any of whom Meletus should have

produced as witnesses in the course of his speech ; and let him still produce them, if he has forgotten ; I will make way for him. And let him say, if he has any testimony of the sort which he can produce. Nay, Athenians, the very opposite is the truth. For all these are ready to witness on behalf of the corrupter, of the destroyer of their kindred, as Meletus and Anytus call me ; not the corrupted youth only, — there might have been a motive for that, — but their uncorrupted elder relatives. Why should they too support me with their testimony? Why, indeed, except for the sake of truth and justice, and because they know that I am speaking the truth, and that Meletus is lying.

Well, Athenians, this and the like of this is nearly all the defense which I have to offer. Yet a word more. Perhaps there may be some one who is offended at me, when he calls to mind how he himself on a similar, or even a less serious occasion, had recourse to prayers and supplications with many tears, and how he produced his children in court, which was a moving spectacle, together with a posse of his relations and friends; whereas I, who am probably in danger of my life, will do none of these things. Perhaps this may come into his mind, and he may be set against me, and vote in anger because he is displeased at this. Now if there be such a person among you, which I am far from affirming, I may fairly reply to him: My friend, I am a man, and like other men, a creature of flesh and blood, and not of wood or stone, as Homer says ; and I have a family, yes, and sons, O Athenians, three in number, one of whom is growing up, and the two others are still young ; and yet I will not bring any of them hither in order to petition you for an acquittal. And why not? Not from any self-will or disregard of you. Whether I am or am not afraid of death is another question, of which I will not now speak. But my reason simply is, that I feel such conduct to be discreditable to myself, and you, and the whole state. One who has reached my years, and who has a name for wisdom, whether deserved or not, ought not to demean himself. At any rate, the world has decided that Socrates is in some way superior to other men.

35 And if those among you who are said to be superior in wisdom and courage, and any other virtue, demean themselves in this way, how shameful is their conduct! I have seen men of reputation, when they have been condemned, behaving in the strangest manner: they seemed to fancy that they were

going to suffer something dreadful if they died, and that they could be immortal if you only allowed them to live; and I think that they were a dishonor to the state, and that any stranger coming in would say of them that the most eminent men of Athens, to whom the Athenians themselves give honor and command, are no better than women. And I say that these things ought not to be done by those of us who are of reputation; and if they are done, you ought not to permit them; you ought rather to show that you are more inclined to condemn, not the man who is quiet, but the man who gets up a doleful scene, and makes the city ridiculous.

But, setting aside the question of dishonor, there seems to be something wrong in petitioning a judge, and thus procuring an acquittal instead of informing and convincing him. For his duty is, not to make a present of justice, but to give judgment; and he has sworn that he will judge according to the laws, and not according to his own good pleasure; and neither he nor we should get into the habit of perjuring ourselves — there can be no piety in that. Do not then require me to do what I consider dishonorable and impious and wrong, especially now, when I am being tried for impiety on the indictment of Meletus. For if, O men of Athens, by force of persuasion and entreaty, I could overpower your oaths, then I should be teaching you to believe that there are no gods, and convict myself, in my own defense, of not believing in them. But that is not the case; for I do believe that there are gods, and in a far higher sense than that in which any of my accusers believe in them. And to you and to God I commit my cause, to be determined by you as is best for you and me.

There are many reasons why I am not grieved, O men of Athens, at the vote of condemnation. I expected this, 36
and am only surprised that the votes are so nearly equal; for I had thought that the majority against me would have been far larger; but now, had thirty votes gone over to the other side, I should have been acquitted. And I may say that I have escaped Meletus. And I may say more; for without the assistance of Anytus and Lycon, he would not have had a fifth part of the votes, as the law requires, in which case he would have incurred a fine of a thousand drachmae, as is evident.

And so he proposes death as the penalty. And what shall I propose on my part, O men of Athens? Clearly that which is my due. And what is that which I ought to pay or to receive? What shall be done to the man who has never had the wit to be idle during his whole life; but has been careless of what the many care about — wealth, and family interests, and military offices, and speaking in the assembly, and magistracies, and plots, and parties. Reflecting that I was really too honest a man to follow in this way and live, I did not go where I could do no good to you or to myself; but where I could do the greatest good privately to every one of you, thither I went, and sought to persuade every man among you, that he must look to himself, and seek virtue and wisdom before he looks to his private interests, and look to the state before he looks to the interests of the state; and that this should be the order which he observes in all his actions. What shall be done to such a one? Doubtless some good thing, O men of Athens, if he has his reward; and the good should be of a kind suitable to him. What would be a reward suitable to a poor man who is your benefactor, who desires leisure that he may instruct you? There can be no more fitting reward than maintenance in the prytaneum, O men of Athens, a reward which he deserves far more than the citizen who has won the prize at Olympia in the horse or chariot race, whether the chariots were drawn by two horses or by many. For I am in want, and he has enough; and he only gives you the appearance of happiness, and I give you the reality. And if I am to
37 estimate the penalty justly, I say that maintenance in the prytaneum is the just return.

Perhaps you may think that I am braving you in saying this, as in what I said before about the tears and prayers. But that is not the case. I speak rather because I am convinced that I never intentionally wronged any one, although I cannot convince you of that — for we have had a short conversation only; but if there were a law at Athens, such as there is in other cities, that a capital cause should not be decided in one day, then I believe that I should have convinced you; but now the time is too short. I cannot in a moment refute great slanders; and, as I am convinced that I never wronged another, I will assuredly not wrong myself. I will not say of myself that I deserve any evil, or propose any penalty. Why should I? Because I am afraid of the penalty of death which Meletus pro-

poses? When I do not know whether death is a good or an evil, why should I propose a penalty which would certainly be an evil? Shall I say imprisonment? And why should I live in prison, and be the slave of the magistrates of the year — of the eleven? Or shall the penalty be a fine, and imprisonment until the fine is paid? There is the same objection. I should have to lie in prison, for money I have none, and cannot pay And if I say exile (and this may possibly be the penalty which you will affix), I must indeed be blinded by the love of life, if I were to consider that when you, who are my own citizens, cannot endure my discourses and words, and have found them so grievous and odious that you would fain have done with them, others are likely to endure me. No indeed, men of Athens, that is not very likely. And what a life should I lead, at my age, wandering from city to city, living in ever-changing exile, and always being driven out! For I am quite sure that into whatever place I go, as here so also there, the young men will come to me; and if I drive them away, their elders will drive me out at their desire: and if I let them come, their fathers and friends will drive me out for their sakes.

Some one will say: Yes, Socrates, but cannot you hold your tongue, and then you may go into a foreign city, and no one will interfere with you? Now I have great difficulty in making you understand my answer to this. For if I tell you that this would be a disobedience to a divine command, and therefore that I cannot hold my tongue, you will not believe that I am serious; and if I say again that the greatest good of man 38
is daily to converse about virtue, and all that concerning which you hear me examining myself and others, and that the life which is unexamined is not worth living — that you are still less likely to believe. And yet what I say is true, although a thing of which it is hard for me to persuade you. Moreover, I am not accustomed to think that I deserve any punishment. Had I money I might have proposed to give you what I had, and have been none the worse. But you see that I have none, and can only ask you to proportion the fine to my means. However, I think that I could afford a mina, and therefore I propose that penalty: Plato, Crito, Critobulus, and Apollodorus, my friends here, bid me say thirty minae, and they will be the sureties. Well, then, say thirty minae, let that be the penalty; for that they will be ample security to you.

Not much time will be gained, O Athenians, in return for the evil name which you will get from the detractors of the city who will say that you killed Socrates, a wise man; for they will call me wise even although I am not wise when they want to reproach you. If you had waited a little while, your desire would have been fulfilled in the course of nature. For I am far advanced in years, as you may perceive, and not far from death. I am speaking now only to those of you who have condemned me to death. And I have another thing to say to them: You think that I was convicted through deficiency of words — I mean, that if I had thought fit to leave nothing undone, nothing unsaid, I might have gained an acquittal. Not so; the deficiency which led to my conviction was not of words — certainly not. But I had not the boldness or impudence or inclination to address you as you would have liked me to address you, weeping and wailing and lamenting, and saying and doing many things which you have been accustomed to hear from others, and which, as I say, are unworthy of me. But I thought that I ought not to do anything common or mean in the hour of danger: nor do I now repent of the manner 39 of my defense, and I would rather die having spoken after my manner, than speak in your manner and live. For neither in war nor yet at law ought any man to use every way of escaping death. For often in battle there is no doubt that if a man will throw away his arms, and fall on his knees before his pursuers, he may escape death; and in other dangers there are other ways of escaping death, if a man is willing to say and do anything. The difficulty, my friends, is not in avoiding death but in avoiding unrighteousness; for that runs faster than death. I am old and move slowly, and the slower runner has overtaken me, and my accusers are keen and quick, and the faster runner, who is unrighteousness, has overtaken them. And now I depart hence condemned by you to suffer the penalty of death, and they too go their ways condemned by the truth to suffer the penalty of villainy and wrong; and I must abide by my award — let them abide by theirs. I suppose that these things may be regarded as fated, — and I think that they are well.

And now, O men who have condemned me, I would fain prophesy to you; for I am about to die, and that is the hour in which men are gifted with prophetic power. And I prophesy to you who are my murderers, that immediately after my death

punishment far heavier than you have inflicted on me will surely await you. Me you have killed because you wanted to escape the accuser, and not to give an account of your lives. But that will not be as you suppose: far otherwise. For I say that there will be more accusers of you than there are now; accusers whom hitherto I have restrained: and as they are younger they will be more severe with you, and you will be more offended at them. For if you think that by killing men you can avoid the accuser censuring your lives, you are mistaken; that is not a way of escape which is either possible or honorable; the easiest and the noblest way is not to be crushing others, but to be improving yourselves. This is the prophecy which I utter before my departure to the judges who have condemned me.

Friends, who would have acquitted me, I would like also to talk with you about this thing which has happened, while the magistrates are busy, and before I go to the place at which I must die. Stay then a while, for we may as well talk with one another while there is time. You are my friends, and I should like to show you the meaning of this event which has happened to me. O my judges — for you I may truly call judges — I should like to tell you of a wonderful circumstance. Hitherto the familiar oracle within me has constantly been in the habit of opposing me even about trifles, if I was going to make a slip or error about anything; and now as you see there has come upon me that which may be thought, and is generally believed to be, the last and worst evil. But the oracle made no sign of opposition, either as I was leaving my house and going out in the morning, or when I was going up into this court, or while I was speaking, at anything which I was going to say; and yet I have often been stopped in the middle of a speech, but now in nothing I either said or did touching this matter has the oracle opposed me. What do I take to be the explanation of this? I will tell you. I regard this as a proof that what has happened to me is a good, and that those of us who think that death is an evil are in error. This is a great proof to me of what I am saying, for the customary sign would surely have opposed me had I been going to evil and not to good.

Let us reflect in another way, and we shall see that there is great reason to hope that death is a good, for one of two things: either death is a state of nothingness and utter unconsciousness, or, as men say, there is a change and migration of the soul from this world to another. Now if you suppose that there is no con-

sciousness, but a sleep like the sleep of him who is undisturbed even by the sight of dreams, death will be an unspeakable gain. For if a person were to select the night in which his sleep was undisturbed even by dreams, and were to compare with this the other days and nights of his life, and then were to tell us how many days and nights he had passed in the course of his life better and more pleasantly than this one, I think that any man, I will not say a private man, but even the great king will not find many such days or nights, when compared with the others. Now if death is like this, I say that to die is gain; for eternity is then only a single night. But if death is the journey to another place, and there, as men say, all the dead are, what good, O my friends and judges, can be greater than this? If indeed
41 when the pilgrim arrives in the world below, he is delivered from the professors of justice in this world, and finds the true judges who are said to give judgment there, Minos and Rhadamanthus and Aeacus and Triptolemus, and other sons of God who were righteous in their own life, that pilgrimage will be worth making. What would not a man give if he might converse with Orpheus and Musaeus and Hesiod and Homer? Nay, if this be true, let me die again and again. I, too, shall have a wonderful interest in a place where I can converse with Palamedes, and Ajax the son of Telamon, and other heroes of old, who have suffered death through an unjust judgment; and there will be no small pleasure, as I think, in comparing my own sufferings with theirs. Above all, I shall be able to continue my search into true and false knowledge; as in this world, so also in that; I shall find out who is wise, and who pretends to be wise, and is not. What would not a man give, O judges, to be able to examine the leader of the great Trojan expedition; or Odysseus or Sisyphus, or numberless others, men and women too! What infinite delight would there be in conversing with them and asking them questions! For in that world they do not put a man to death for this; certainly not. For besides being happier in that world than in this, they will be immortal, if what is said is true.

Wherefore, O judges, be of good cheer about death, and know this of a truth — that no evil can happen to a good man, either in life or after death. He and his are not neglected by the gods; nor has my own approaching end happened by mere chance. But I see clearly that to die and be released was better for me; and therefore the oracle gave no sign. For

which reason, also, I am not angry with my accusers or my condemners; they have done me no harm, although neither of them meant to do me any good; and for this I may gently blame them.

Still I have a favor to ask of them. When my sons are grown up, I would ask you, O my friends, to punish them; and I would have you trouble them, as I have troubled you, if they seem to care about riches, or anything, more than about virtue; or if they pretend to be something when they are really nothing, — then reprove them, as I have reproved you, for not caring about that for which they ought to care, and thinking that they are something when they are really nothing. And if you do this, I and my sons will have received justice at your hands. 42

The hour of departure has arrived, and we go our ways — I to die, and you to live. Which is better God only knows.

CRITO.

INTRODUCTION.

THE Crito seems intended to exhibit the character of Socrates in one light only, not as the philosopher, fulfilling a divine mission and trusting in the will of Heaven, but simply as the good citizen, who having been unjustly condemned is willing to give up his life in obedience to the laws of the state.

The days of Socrates are drawing to a close; the fatal ship has been seen off Sunium, as he is informed by his aged friend and contemporary Crito, who visits him before the dawn has broken; he himself has been warned in a dream that on the third day he must depart. Time is precious, and Crito has come early in order to gain his consent to a plan of escape. This can be easily accomplished by his friends, who will incur no danger in making the attempt to save him, but will be disgraced forever if they allow him to perish. He should think of his duty to his children, and not play into the hands of his enemies. Money is already provided by Crito as well as by Simmias and others, and he will have no difficulty in finding friends in Thessaly and other places.

Socrates is afraid that Crito is but pressing upon him the opinions of the many: whereas, all his life long he has followed the dictates of reason only and the opinion of the one wise or skilled man. There was a time when Crito himself had allowed the propriety of this. And although some one will say "The many can kill us," that makes no difference; but a good life, that is to say a just and honorable life, is alone to be valued. All considerations of loss of reputation or injury to his children should be dismissed: the only question is whether he would be right in attempting to escape. Crito, who is a disinterested person, not having the fear of death before his eyes, shall answer this for him. Before he was condemned they had often held discussions, in which they agreed that no man should either do evil, or return evil for evil, or betray the right. Are these principles to be altered because the circumstances of Socrates are altered? Crito admits that they remain the same. Then is his escape consistent with the maintenance of them? To this Crito is unable or unwilling to reply.

Socrates proceeds: Suppose the laws of Athens to come and remonstrate with him: they will ask "Why does he seek to overturn them?" and if he replies, "They have injured him," will not the laws answer, "Yes, but was that the agreement? Has he any objection to make to them which would justify him in overturning them? Was he not brought into the world and educated by their help, and are they not his parents? He might have left Athens and gone where he pleased, but he has lived there for seventy years more constantly than any other citizen." Thus he has clearly shown that he acknowledged the agreement which he cannot now break without dishonor to himself and danger to his friends. Even in the course of the trial he might have proposed exile as the penalty, but then he declared that he preferred death to exile. And whither will he direct his footsteps? In any well-ordered state the laws will consider him as an enemy. Possibly in a land of misrule like Thessaly he may be welcomed at first, and the unseemly narrative of his escape regarded by the inhabitants as an amusing tale. But if he offends them he will have to learn another sort of lesson. Will he continue to give lectures in virtue? That would hardly be decent. And how will his children be the gainers if he takes them into Thessaly, and deprives them of Athenian citizenship? Or if he leaves them behind, does he expect that they will be better taken care of by his friends because he is in Thessaly? Will not true friends care for them equally whether he is alive or dead?

Finally, they exhort him to think of justice first, and of life and children afterwards. He may now depart in peace and innocence, a sufferer and not a doer of evil. But if he breaks agreements, and returns evil for evil, they will be angry with him while he lives; and their brethren the laws of the world below will receive him as an enemy. Such is the mystic voice which is always murmuring in his ears.

That Socrates was not a good citizen was a charge made against him during his life-time, which has been often repeated in later ages. The crimes of Alcibiades, Critias, and Charmides, who had been his pupils, were still recent in the memory of the now restored democracy. The fact that he had been neutral in the death-struggle of Athens was not likely to conciliate popular good-will. Plato, writing probably in the next generation, undertakes the defense of his friend and master in this particular, not to the Athenians of his day, but to posterity and the world at large.

Whether such an incident ever really occurred as the visit of Crito and the proposal of escape is uncertain: Plato could easily have invented far more than that (Phaedr. 275 B); and in the selection of Crito, the aged friend, as the fittest person to make the proposal to Socrates, we seem to recognize the hand of the artist.

Whether any one who has been subjected by the laws of his country to an unjust judgment is right in attempting to escape, is a thesis about which casuists might disagree. Shelley ("Prose Works," p. 78) is of opinion that Socrates "did well to die," but not for the "sophistical" reasons which Plato has put into his mouth. And there would be no difficulty in arguing that Socrates should have lived and preferred to a glorious death the good which he might still be able to perform. "A skillful rhetorician would have had much to say about that" (50 C). It may be remarked however that Plato never intended to answer the question of casuistry, but only to exhibit the ideal of patient virtue which refuses to do the least evil in order to avoid the greatest, and to show Socrates, his master, maintaining in death the opinions which he had professed in his life. Not "the world," but the "one wise man," is still the philosopher's paradox in his last hours.

CRITO.

PERSONS OF THE DIALOGUE.

SOCRATES. CRITO.

SCENE: — The Prison of Socrates.

Soc. WHY have you come at this hour, Crito? it must be quite early? Steph. 43

Crito. Yes, certainly.

Soc. What is the exact time?

Cr. The dawn is breaking.

Soc. I wonder the keeper of the prison would let you in.

Cr. He knows me because I often come, Socrates; moreover, I have done him a kindness.

Soc. And are you only just come?

Cr. No, I came some time ago.

Soc. Then why did you sit and say nothing, instead of awakening me at once?

Cr. Why, indeed, Socrates, I myself would rather not have all this sleeplessness and sorrow. But I have been wondering at your peaceful slumbers, and that was the reason why I did not awaken you, because I wanted you to be out of pain. I have always thought you happy in the calmness of your temperament; but never did I see the like of the easy, cheerful way in which you bear this calamity.

Soc. Why, Crito, when a man has reached my age he ought not to be repining at the prospect of death.

Cr. And yet other old men find themselves in similar misfortunes, and age does not prevent them from repining.

Soc. That may be. But you have not told me why you come at this early hour.

Cr. I come to bring you a message which is sad and painful; not as I believe, to yourself, but to all of us who are your friends, and saddest of all to me.

Soc. What! I suppose that the ship has come from Delos, on the arrival of which I am to die?

Cr. No, the ship has not actually arrived, but she will probably be here to-day, as persons who have come from Sunium tell me that they left her there; and therefore to-morrow, Socrates, will be the last day of your life.

Soc. Very well, Crito; if such is the will of God, I am willing; but my belief is that there will be a delay of a day.

44

Cr. Why do you say this?

Soc. I will tell you. I am to die on the day after the arrival of the ship?

Cr. Yes; that is what the authorities say.

Soc. But I do not think that the ship will be here until to-morrow; this I gather from a vision which I had last night, or rather only just now, when you fortunately allowed me to sleep.

Cr. And what was the nature of the vision?

Soc. There came to me the likeness of a woman, fair and comely, clothed in white raiment, who called to me and said: O Socrates, —

"The third day hence, to Phthia shalt thou go."

Cr. What a singular dream, Socrates!

Soc. There can be no doubt about the meaning, Crito, I think.

Cr. Yes: the meaning is only too clear. But, O! my beloved Socrates, let me entreat you once more to take my advice and escape. For if you die I shall not only lose a friend who can never be replaced, but there is another evil: people who do not know you and me will believe that I might have saved you if I had been willing to give money, but that I did not care. Now, can there be a worse disgrace than this — that I should be thought to value money more than the life of a friend? For the many will not be persuaded that I wanted you to escape, and that you refused.

Soc. But why, my dear Crito, should we care about the opinion of the many? Good men, and they are the only persons who are worth considering, will think of these things truly as they happened.

Cr. But do you see, Socrates, that the opinion of the many must be regarded, as is evident in your own case, because they can do the very greatest evil to any one who has lost their good opinion.

Soc. I only wish, Crito, that they could; for then they could also do the greatest good, and that would be well. But the truth is, that they can do neither good nor evil: they cannot make a man wise or make him foolish; and whatever they do is the result of chance.

Cr. Well, I will not dispute about that; but please to tell me, Socrates, whether you are not acting out of regard to me and your other friends: are you not afraid that if you escape hence we may get into trouble with the informers for having stolen you away, and lose either the whole or a great part of our property; or that even a worse evil may happen to us? Now, if this is your fear, be at ease; for in order to save you, we ought surely to run this, or even a greater risk; be persuaded, then, and do as I say. 45

Soc. Yes, Crito, that is one fear which you mention, but by no means the only one.

Cr. Fear not. There are persons who at no great cost are willing to save you and bring you out of prison; and as for the informers, you may observe that they are far from being exorbitant in their demands; a little money will satisfy them. My means, which, as I am sure, are ample, are at your service, and if you have a scruple about spending all mine, here are strangers who will give you the use of theirs; and one of them, Simmias the Theban, has brought a sum of money for this very purpose; and Cebes and many others are willing to spend their money too. I say therefore, do not on that account hesitate about making your escape, and do not say, as you did in the court, that you will have a difficulty in knowing what to do with yourself if you escape. For men will love you in other places to which you may go, and not in Athens only; there are friends of mine in Thessaly, if you like to go to them, who will value and protect you, and no Thessalian will give you any trouble. Nor can I think that you are justified, Socrates, in betraying your own life when you might be saved; this is playing into the hands of your enemies and destroyers; and moreover I should say that you were betraying your children; for you might bring them up and educate them; instead of which you go away and leave them, and they will have to take their

chance; and if they do not meet with the usual fate of orphans, there will be small thanks to you. No man should bring children into the world who is unwilling to persevere to the end in their nurture and education. But you are choosing the easier part, as I think, not the better and manlier, which would rather have become one who professes virtue in all his actions, like yourself. And indeed, I am ashamed not only of you, but of us who are your friends, when I reflect that this entire business of yours will be attributed to our want of courage. The trial need never have come on, or might have been brought to another issue; and the end of all, which is the crowning absurdity, will seem to have been permitted by us, through cowardice and baseness, who might have saved you, as you might have saved yourself, if we had been good for anything (for there was no difficulty in escaping); and we did not see how disgraceful, Socrates, and also miserable all this will be to us as well as to you. Make your mind up then, or rather have your mind already made up, for the time of deliberation is over, and there is only one thing to be done, which must be done, if at all, this very night, and which any delay will render all but impossible; I beseech you therefore, Socrates, to be persuaded by me, and to do as I say.

46

Soc. Dear Crito, your zeal is invaluable, if a right one; but if wrong, the greater the zeal the greater the evil; and therefore we ought to consider whether these things shall be done or not. For I am and always have been one of those natures who must be guided by reason, whatever the reason may be which upon reflection appears to me to be the best; and now that this fortune has come upon me, I cannot put away the reasons which I have before given: the principles which I have hitherto honored and revered I still honor, and unless we can find other and better principles on the instant, I am certain not to agree with you; no, not even if the power of the multitude could inflict many more imprisonments, confiscations, deaths, frightening us like children with hobgoblin terrors. But what will be the fairest way of considering the question? Shall I return to your old argument about the opinions of men? some of which are to be regarded, and others, as we were saying, are not to be regarded. Now were we right in maintaining this before I was condemned? And has the argument which was once good now proved to be talk for the sake of talking; in fact an amusement only, and altogether vanity? That is what

want to consider with your help, Crito: whether, under my resent circumstances, the argument appears to be in any way ifferent or not; and is to be allowed by me or disallowed. 'hat argument, which, as I believe, is maintained by many who sume to be authorities, was to the effect, as I was saying, that ıe opinions of some men are to be regarded, and of other men ot to be regarded. Now you, Crito, are a disinterested person ho are not going to die to-morrow — at least, there is no 47
uman probability of this, and you are therefore not liable
be deceived by the circumstances in which you are placed. ell me then, whether I am right in saying that some opinions, ıd the opinions of some men only, are to be valued, and other ɔinions, and the opinions of other men, are not to be valued. ask you whether I was right in maintaining this?

Cr. Certainly.

Soc. The good are to be regarded, and not the bad?

Cr. Yes.

Soc. And the opinions of the wise are good, and the opinıs of the unwise are evil?

Cr. Certainly.

Soc. And what was said about another matter? Was the sciple in gymnastics supposed to attend to the praise and ame and opinion of every man, or of one man only — his phyɔian or trainer, whoever that was?

Cr. Of one man only.

Soc. And he ought to fear the censure and welcome the raise of that one only, and not of the many?

Cr. That is clear.

Soc. And he ought to live and train, and eat and drink in ıe way which seems good to his single master who has underanding, rather than according to the opinion of all other men ıt together?

Cr. True.

Soc. And if he disobeys and disregards the opinion and aproval of the one, and regards the opinion of the many who ıve no understanding, will he not suffer evil?

Cr. Certainly he will.

Soc. And what will the evil be, whither tending and what fecting, in the disobedient person?

Cr. Clearly, affecting the body; that is what is destroyed by ıe evil.

Soc. Very good; and is not this true, Crito, of other things

which we need not separately enumerate? In the matter of just and unjust, fair and foul, good and evil, which are the subjects of our present consultation, ought we to follow the opinion of the many and to fear them; or the opinion of the one man who has understanding, and whom we ought to fear and reverence more than all the rest of the world: and whom
48 deserting we shall destroy and injure that principle in us which may be assumed to be improved by justice and deteriorated by injustice; is there not such a principle?

Cr. Certainly there is, Socrates.

Soc. Take a parallel instance: if, acting under the advice of men who have no understanding, we destroy that which is improvable by health and deteriorated by disease — when that has been destroyed, I say, would life be worth having? And that is — the body?

Cr. Yes.

Soc. Could we live, having an evil and corrupted body?

Cr. Certainly not.

Soc. And will life be worth having, if that higher part of man be depraved, which is improved by justice and deteriorated by injustice? Do we suppose that principle, whatever it may be in man, which has to do with justice and injustice, to be inferior to the body?

Cr. Certainly not.

Soc. More honored, then?

Cr. Far more honored.

Soc. Then, my friend, we must not regard what the many say of us: but what he, the one man who has understanding of just and unjust, will say, and what the truth will say. And therefore you begin in error when you suggest that we should regard the opinion of the many about just and unjust, good and evil, honorable and dishonorable. Well, some one will say, "But the many can kill us."

Cr. Yes, Socrates; that will clearly be the answer.

Soc. That is true: but still I find with surprise that the old argument is, as I conceive, unshaken as ever. And I should like to know whether I may say the same of another proposition — that not life, but a good life, is to be chiefly valued?

Cr. Yes, that also remains.

Soc. And a good life is equivalent to a just and honorable one — that holds also?

Cr. Yes, that holds.

Soc. From these premises I proceed to argue the question whether I ought or ought not to try and escape without the consent of the Athenians: and if I am clearly right in escaping, then I will make the attempt; but if not, I will abstain. The other considerations which you mention, of money and loss of character and the duty of educating children, are, as I fear, only the doctrines of the multitude, who would be as ready to call people to life, if they were able, as they are to put them to death — and with as little reason. But now, since the argument has thus far prevailed, the only question which remains to be considered is, whether we shall do rightly either in escaping or in suffering others to aid in our escape and paying them in money and thanks, or whether we shall not do rightly; and if the latter, then death or any other calamity which may ensue on my remaining here must not be allowed to enter into the calculation.

Cr. I think that you are right, Socrates; how then shall we proceed?

Soc. Let us consider the matter together, and do you either refute me if you can, and I will be convinced; or else cease, my dear friend, from repeating to me that I ought to escape against the wishes of the Athenians: for I am extremely desirous to be persuaded by you, but not against my own better judgment. And now please to consider my first position, 49
and do your best to answer me.

Cr. I will do my best.

Soc. Are we to say that we are never intentionally to do wrong, or that in one way we ought and in another way we ought not to do wrong, or is doing wrong always evil and dishonorable, as I was just now saying, and as has been already acknowledged by us? Are all our former admissions which were made within a few days to be thrown away? And have we, at our age, been earnestly discoursing with one another all our life long only to discover that we are no better than children? Or are we to rest assured, in spite of the opinion of the many, and in spite of consequences whether better or worse, of the truth of what was then said, that injustice is always an evil and dishonor to him who acts unjustly? Shall we affirm that?

Cr. Yes.

Soc. Then we must do no wrong?

Cr. Certainly not.

Soc. Nor when injured injure in return, as the many imagine; for we must injure no one at all?

Cr. Clearly not.

Soc. Again, Crito, may we do evil?

Cr. Surely not, Socrates.

Soc. And what of doing evil in return for evil, which is the morality of the many — is that just or not?

Cr. Not just.

Soc. For doing evil to another is the same as injuring him?

Cr. Very true.

Soc. Then we ought not to retaliate or render evil for evil to any one, whatever evil we may have suffered from him. But I would have you consider, Crito, whether you really mean what you are saying. For this opinion has never been held, and never will be held, by any considerable number of persons; and those who are agreed and those who are not agreed upon this point have no common ground, and can only despise one another when they see how widely they differ. Tell me, then, whether you agree with and assent to my first principle, that neither injury nor retaliation nor warding off evil by evil is ever right. And shall that be the premise of our argument? Or do you decline and dissent from this? For this has been of old and is still my opinion; but, if you are of another opinion, let me hear what you have to say. If, however, you remain of the same mind as formerly, I will proceed to the next step.

Cr. You may proceed, for I have not changed my mind.

Soc. Then I will proceed to the next step, which may be put in the form of a question: Ought a man to do what he admits to be right, or ought he to betray the right?

Cr. He ought to do what he thinks right.

50 *Soc.* But if this is true, what is the application? In leaving the prison against the will of the Athenians, do I wrong any? or rather do I not wrong those whom I ought least to wrong? Do I not desert the principles which were acknowledged by us to be just? What do you say?

Cr. I cannot tell, Socrates; for I do not know.

Soc. Then consider the matter in this way: Imagine that I am about to play truant (you may call the proceeding by any name which you like), and the laws and the government come and interrogate me: "Tell us, Socrates," they say; "what are you about? are you going by an act of yours to overturn us —

the laws and the whole state, as far as in you lies? Do you imagine that a state can subsist and not be overthrown, in which the decisions of law have no power, but are set aside and overthrown by individuals?" What will be our answer, Crito, to these and the like words? Any one, and especially a clever rhetorician, will have a good deal to urge about the evil of setting aside the law which requires a sentence to be carried out; and we might reply, "Yes; but the state has injured us and given an unjust sentence." Suppose I say that?

Cr. Very good, Socrates.

Soc. "And was that our agreement with you?" the law would say; "or were you to abide by the sentence of the state?" And if I were to express astonishment at their saying this, the law would probably add: "Answer, Socrates, instead of opening your eyes: you are in the habit of asking and answering questions. Tell us what complaint you have to make against us which justifies you in attempting to destroy us and the state? In the first place did we not bring you into existence? Your father married your mother by our aid and begat you. Say whether you have any objection to urge against those of us who regulate marriage?" None, I should reply. "Or against those of us who regulate the system of nurture and education of children in which you were trained? Were not the laws, who have the charge of this, right in commanding your father to train you in music and gymnastic?" Right, I should reply. "Well then, since you were brought into the world and nurtured and educated by us, can you deny in the first place that you are our child and slave, as your fathers were before you? And if this is true you are not on equal terms with us; nor can you think that you have a right to do to us what we are doing to you. Would you have any right to strike or revile or do any other evil to a father or to your master, if you had one, when you have been struck or reviled by him, or received some other evil at his hands? — you would not say this? And because we think right to destroy you, do you think that you have any right 51
to destroy us in return, and your country as far as in you lies? And will you, O professor of true virtue, say that you are justified in this? Has a philosopher like you failed to discover that our country is more to be valued and higher and holier far than mother or father or any ancestor, and more to be regarded in the eyes of the gods and of men of understanding? also to be soothed, and gently and reverently entreated when angry, even more than

a father, and if not persuaded, obeyed? And when we are punished by her, whether with imprisonment or stripes, the punishment is to be endured in silence; and if she leads us to wounds or death in battle, thither we follow as is right; neither may any one yield or retreat or leave his rank, but whether in battle or in a court of law, or in any other place, he must do what his city and his country order him; or he must change their view of what is just: and if he may do no violence to his father or mother, much less may he do violence to his country." What answer shall we make to this, Crito? Do the laws speak truly, or do they not?

Cr. I think that they do.

Soc. Then the laws will say: "Consider, Socrates, if this is true, that in your present attempt you are going to do us wrong. For, after having brought you into the world, and nurtured and educated you, and given you and every other citizen a share in every good that we had to give, we further proclaim and give the right to every Athenian, that if he does not like us when he has come of age and has seen the ways of the city, and made our acquaintance, he may go where he pleases and take his goods with him; and none of us laws will forbid him or interfere with him. Any of you who does not like us and the city, and who wants to go to a colony or to any other city, may go where he likes, and take his goods with him. But he who has experience of the manner in which we order justice and administer the state, and still remains, has entered into an implied contract that he will do as we command him. And he who disobeys us is, as we maintain, thrice wrong: first, because in disobeying us he is disobeying his parents; secondly, because we are the authors of his education; thirdly, because he has made an agreement with us that he will duly obey our commands; and he neither obeys them nor convinces us that our commands are wrong; and we do not rudely impose them, but give him the alternative of obeying or convincing us; that is what we offer, and he does neither. These are the sort of accusations to which, as we were saying, you, Socrates, will be exposed if you accomplish your intentions; you, above all other Athenians." Suppose I ask, why is this? they will justly retort upon me that I above all other men have acknowledged the agreement. "There is clear proof," they will say, "Socrates, that we and the city were not displeasing to you. Of all Athenians you have been the most constant resident in the city, which, as you never leave, you

52

may be supposed to love. For you never went out of the city either to see the games, except once when you went to the Isthmus, or to any other place unless when you were on military service; nor did you travel as other men do. Nor had you any curiosity to know other states or their laws: your affections did not go beyond us and our state; we were your special favorites, and you acquiesced in our government of you; and this is the state in which you begat your children, which is a proof of your satisfaction. Moreover, you might, if you had liked, have fixed the penalty at banishment in the course of the trial — the state which refuses to let you go now would have let you go then. But you pretended that you prefefred death to exile, and that you were not grieved at death. And now you have forgotten these fine sentiments, and pay no respect to us the laws, of whom you are the destroyer; and are doing what only a miserable slave would do, running away and turning your back upon the compacts and agreements which you made as a citizen. And first of all answer this very question: Are we right in saying that you agreed to be governed according to us in deed, and not in word only? Is that true or not? How shall we answer that, Crito? Must we not agree?

Cr. There is no help, Socrates.

Soc. Then will they not say: "You, Socrates, are breaking the covenants and agreements which you made with us at your leisure, not in any haste or under any compulsion or deception, but having had seventy years to think of them, during which time you were at liberty to leave the city, if we were not to your mind, or if our covenants appeared to you to be unfair. You had your choice, and might have gone either to Lacedaemon or Crete, which you often praise for their good government, or to some other Hellenic or foreign state. 53
Whereas you above all other Athenians, seemed to be so fond of the state, or, in other words, of us her laws (for who would like a state that has no laws), that you never stirred out of her: the halt, the blind, the maimed were not more stationary in her than you were. And now you run away and forsake your agreements. Not so, Socrates, if you will take our advice; do not make yourself ridiculous by escaping out of the city.

"For just consider, if you transgress and err in this sort of way, what good will you do, either to yourself or to your friends? That your friends will be driven into exile and deprived of citizenship, or will lose their property, is tolerably certain; and

you yourself, if you fly to one of the neighboring cities, as, for example, Thebes or Megara, both of which are well-governed cities, will come to them as an enemy, Socrates, and their government will be against you, and all patriotic citizens will cast an evil eye upon you as a subverter of the laws, and you will confirm in the minds of the judges the justice of their own condemnation of you. For he who is a corrupter of the laws is more than likely to be corrupter of the young and foolish portion of mankind. Will you then flee from well-ordered cities and virtuous men? and is existence worth having on these terms? Or will you go to them without shame, and talk to them, Socrates? And what will you say to them? What you say here about virtue and justice and institutions and laws being the best things among men? Would that be decent of you? Surely not. But if you go away from well-governed states to Crito's friends in Thessaly, where there is great disorder and license, they will be charmed to have the tale of your escape from prison, set off with ludicrous particulars of the manner in which you were wrapped in a goatskin or some other disguise, and metamorphosed as the fashion of runaways is — that is very likely; but will there be no one to remind you that in your old age you violated the most sacred laws from a miserable desire of a little more life. Perhaps not, if you keep them in a good temper; but if they are out of temper you will hear many degrading things; you will live, but how? — as the flatterer of all men, and the servant of all men; and doing what? — eating and drinking in Thessaly, having gone abroad in order that you
54 may get a dinner. And where will be your fine sentiments about justice and virtue then? Say that you wish to live for the sake of your children, that you may bring them up and educate then — will you take them into Thessaly and deprive them of Athenian citizenship? Is that the benefit which you would confer upon them? Or are you under the impression that they will be better cared for and educated here if you are still alive, although absent from them; for that your friends will take care of them? Do you fancy that if you are an inhabitant of Thessaly they will take care of them, and if you are an inhabitant of the other world they will not take care of them? Nay; but if they who call themselves friends are truly friends, they surely will.

"Listen, then, Socrates, to us who have brought you up. Think not of life and children first, and of justice afterwards

t of justice first, that you may be justified before the princes the world below. For neither will you nor any that belong you be happier or holier or juster in this life, or happier in other, if you do as Crito bids. Now you depart in innocence, sufferer and not a doer of evil; a victim, not of the laws, but men. But if you go forth, returning evil for evil, and injury r injury, breaking the covenants and agreements which you ve made with us, and wronging those whom you ought least wrong, that is to say, yourself, your friends, your country, d us, we shall be angry with you while you live, and our ethren, the laws in the world below, will receive you as an en- ıy; for they will know that you have done your best to de- roy us. Listen, then, to us and not to Crito."

This is the voice which I seem to hear murmuring in my rs, like the sound of the flute in the ears of the mystic; that ice, I say, is humming in my ears, and prevents me from hear- g any other. And I know that anything more which you ay say will be vain. Yet speak, if you have anything to say.

Cr. I have nothing to say, Socrates.

Soc. Then let me follow the intimations of the will of God.

PHAEDO.

INTRODUCTION.

AFTER an interval of some months or years, at Phlius a town of Sicyon, the tale of the last hours of Socrates is narrated to Echecrates and other Phliasians by Phaedo the "beloved disciple." The Dialogue necessarily takes the form of a narrative, because Socrates has to be described acting as well as speaking. The minutest particulars of the event are interesting to distant friends, and the narrator has an equal interest in them.

During the voyage of the sacred ship to and from Delos, which has occupied thirty days, the execution of Socrates has been deferred. (Cp. Xen. Mem. iv. 8, 2.) The time has been passed by him in conversation with a select company of disciples. But now the holy season is over, and the disciples meet earlier than usual in order that they may converse with Socrates for the last time. Those who were present, and those who might have been expected to be present, are specially mentioned. There are Simmias and Cebes (Crito 45 B), two disciples of Philolaus whom Socrates "by his enchantments has attracted from Thebes" (Mem. iii. 11, 17), Crito the aged friend, the attendant of the prison, who is as good as a friend, — these take part in the conversation. There are present also, Hermogenes, from whom Xenophon derived his information about the trial of Socrates (Mem. iv. 8, 4); the "madman" Apollodorus (Symp. 173 D); Euclid and Terpsion from Megara (cp. Theaet. *sub init.*); Ctesippus, Antisthenes, Menexenus, and some other less-known members of the Socratic circle, all of whom are silent auditors. Aristippus and Plato are noted as absent. Soon the wife and children of Socrates are sent away, under the direction of Crito; he himself has just been released from chains, and is led by this circumstance to make the natural remark that "Pleasure follows pain." (Observe that Plato is preparing the way for his doctrine of the alternation of opposites.) "Aesop would have represented them in a fable as a two-headed creature of the gods." The mention of Aesop reminds Cebes of a question which had been asked by Evenus the poet (cp. Apol. 20 A): "Why Socrates, who

was not a poet, while in prison had been putting Aesop into verse?" "Because several times in his life he had been warned in dreams that he should make music; and as he was about to die and was not certain what was the meaning of this, he wished to fulfill the admonition in the letter as well as in the spirit, by writing verses as well as by cultivating philosophy. Tell Evenus this and bid him follow me in death." "He is not the sort of man to do that, Socrates." "Why, is he not a philosopher?" "Yes." "Then he will be willing to die, although he will not take his own life, for that is held not to be right."

Cebes asks why men say that suicide is not right, if death is to be accounted a good? Well, (1) according to one explanation, because man is a prisoner, and is not allowed to open the door of his prison and run away — this is the truth in a "mystery." Or rather, perhaps, (2) because man is not his own property, but a possession of the gods, and he has no right to make away with that which does not belong to him. But why, asks Cebes, if he is a possession of the gods, will he wish to die and leave them? for he is under their protection; and surely he cannot take better care of himself than they take of him. Simmias explains that Cebes is really referring to Socrates, whom they think too unmoved at the prospect of leaving the gods and his friends. Socrates answers that he is going to other gods who are wise and good, and perhaps to better friends; and he professes that he is ready to defend himself against the charge of Cebes. They shall be his judges, and he hopes that he will be more successful in convincing them than he had been in convincing the court.

The philosopher desires death — which the wicked world will insinuate that he also deserves: and perhaps he does, but not in any sense which they are capable of understanding. Enough of them: the real question is, What is the nature of that death which he desires? Death is the separation of soul and body — and the philosopher desires such a separation. He would like to be freed from the dominion of bodily pleasures and of the senses, which are always perturbing his mental vision. He wants to get rid of eyes and ears, and with the light of the mind only to behold the light of truth. All the evils and impurities and necessities of men come from the body. And death separates him from these evils, which in this life he cannot wholly cast aside. Why then should he repine when the hour of separation arrives? Why, if he is dead while he lives, should he fear that other death, through which alone he can behold wisdom in her purity?

Besides, the philosopher has notions of good and evil unlike those of other men. For they are courageous because they are afraid of greater dangers, and temperate because they desire greater pleasures. But he disdains this balancing of pleasures and pains; he knows

no virtue but that which is the companion of wisdom. All the virtues, including wisdom, are regarded by him only as purifications of the soul. And this was the meaning of the founders of the mysteries when they said, "Many are the wand-bearers, but few are the mystics." (Cp. Matt. xxii. 14: "Many are called, but few are chosen.") And in the hope that he is one of these mystics, Socrates is now departing. This is his answer to those who charge him with indifference at the prospect of leaving the gods and his friends.

Still, a fear is expressed that the soul, upon leaving the body, may vanish away like smoke or air. Socrates in answer appeals first of all to the old Orphic tradition that the souls of the dead are in the world below, and that the living come from them. This he attempts to found on a philosophical assumption that all opposites — *e. g.* less, greater; weaker, stronger; sleeping, waking; life, death — are generated out of each other. Nor can this process of generation be only a passage from living to dying, for then all would end in death. The perpetual sleeper (Endymion) would be no longer distinguished, for all the world would sink in rest. The circle of nature is not complete unless the living come from the dead as well as pass to them.

The favorite Platonic doctrine of reminiscence is then adduced as a confirmation of the preëxistence of the soul. Some proofs of this doctrine are demanded. One proof given is the same as that of the Meno (82 foll.), and is derived from the latent knowledge of mathematics, which may be elicited from an unlearned person when a diagram is presented to him. Again, there is a power of association, which from seeing Simmias may remember Cebes, or from seeing a picture of Simmias may remember Simmias. The lyre may recall the player of the lyre, and equal pieces of wood or stone may be associated with the higher notion of absolute equality. But here observe that material equalities fall short of the conception of absolute equality with which they are compared, and which is the measure of them. And the measure or standard must be prior to that which is measured, the idea of equality prior to the visible equals. And if prior to them, then prior also to the perceptions of the senses which recall them, and therefore either given before birth or at birth. But all men have not this knowledge, nor have any without a process of reminiscence; and this is a proof that it is not innate or given at birth (unless indeed it was given and taken away at the same instant, which is absurd). But if not given to men in birth, it must have been given before birth — this is the only alternative which remains. And if we had ideas in a former state, then our souls must have existed and must have had intelligence in a former state. The preëxistence of the soul stands or falls with the doctrine of ideas.

It is objected by Simmias and Cebes that these arguments only prove a former and not a future existence. Socrates answers this

objection by recalling the previous argument, in which he had shown that the living had come from the dead. But the fear that the soul at departing may vanish into air (especially if there is a wind blowing at the time) has not yet been charmed away. He proceeds: When we fear that the soul will vanish away, let us ask ourselves what is that we suppose to be liable to dissolution? Is it the simple or the compound, the unchanging or the changing, the invisible idea or the visible object of sense? Clearly the latter and not the former; and therefore not the soul, which in her own pure thought is unchangeable, and only when using the senses descends into the region of change. Again, the soul commands, the body serves: in this respect too the soul is akin to the divine, and the body to the mortal. And in every point of view the soul is the image of divinity and immortality, and the body of the human and mortal. And whereas the body is liable to speedy dissolution, the soul is almost if not quite indissoluble. (Cp. Tim. 41 A.) Yet even the body may be preserved for ages by the embalmer's art; how much more the soul returning into herself on her way to the good and wise God! She has been practicing death all her life long, and is now finally released from the errors and follies and passions of men, and forever dwells in the company of the gods.

But the soul which is polluted and engrossed by the corporeal, and has no eye except that of the senses, and is weighed down by the bodily appetites, cannot attain to this abstraction. In her fear of the world below she lingers about her sepulchre, a ghostly apparition, saturated with sense, and therefore visible. At length she enters into the body of some animal of a nature congenial to her former life of sensuality or violence, and becomes an ass or a wolf or a kite. And of these earthy souls the happiest are those who have practiced virtue without philosophy; they are allowed to pass into gentle and civil natures, such as bees and ants. (Cp. Rep. 619 C; Meno 100 A.) But only the philosopher who departs pure is permitted to enter the company of the gods. This is the reason why he abstains from fleshly lusts, and not from the fear of loss or disgrace, which are the motives of other men. He too has been a captive, and the willing agent of his own captivity. But Philosophy has spoken to him, and he has heard her voice; she has gently entreated him, and brought his soul out of the "miry clay," and purged away the mists of passion and the illusions of sense which envelop her, and taught her to resist the influence of pleasures and pains, which are like nails fastening her to the body. To that prison-house she will not return; and therefore she abstains from bodily pleasures — not from a desire of having more or greater ones, which is the exchange of commerce and not of virtue, but because she knows that only in the calm of pleasures and passions she will behold the light of truth.

Simmias and Cebes remain in doubt; but they are unwilling to raise objections at such a time. Socrates wonders at this. Let them regard him rather as the swan, who, having sung the praises of Apollo all his life long, sings at his death more lustily than ever. (Cp. 60 D.) Simmias acknowledges that there is cowardice in not probing truth to the bottom. "And if truth divine and inspired is not to be had, then let a man take the best of human notions, and upon this frail bark let him sail through life." He proceeds to state his difficulty: It has been argued that the soul is invisible and incorporeal, and therefore immortal, and prior to the body. But is not the soul acknowledged to be a harmony, and has she not the same relation to the body, as the harmony — which like her is invisible — has to the lyre? And yet the harmony does not survive the lyre. Cebes has also an objection, which like Simmias he expresses in a figure. He is willing to admit that the soul is more lasting than the body. But the more lasting nature of the soul does not prove her immortality; for after having worn out many bodies in a single life, and many more in successive births and deaths, she may at last perish, or, as Socrates afterwards restates the objection, the very act of birth may be the beginning of her death, and the last body may survive the last soul, just as the coat of an old weaver is left behind him after he is dead, although a man is more lasting than his coat. And he who would prove the immortality of the soul, must prove not only that the soul outlives one or many bodies, but that she outlives them all.

The audience, like the chorus in a play, for a moment interpret the feelings of the actors; there is a temporary depression, and then the inquiry is resumed. It is a melancholy reflection that arguments, like men, are apt to be deceivers; and those who have been often deceived become distrustful both of arguments and of friends. But this unfortunate experience should not make us either haters of men or haters of arguments. The hatred of arguments is equally mistaken, whether we are going to live or die. At the approach of death Socrates desires to be impartial, and yet he cannot help feeling that he has too great an interest in the truth of his own argument. And therefore he wishes his friends to examine and refute him, if they think that he is not speaking the truth.

Socrates requests Simmias and Cebes to state their objections again. They do not go to the length of denying the preëxistence of ideas. Simmias is of opinion that the soul is a harmony of the body. But the admission of the preëxistence of ideas, and therefore of the soul, is at variance with this. (Cp. a parallel difficulty in Theaet. 203, 204.) For a harmony is an effect, whereas the soul is not an effect, but a cause; a harmony follows, but the soul leads; a harmony admits of degrees, and the soul has no degrees. Again, upon the supposition that the soul is a harmony, why is one soul

better than another? Are they more or less harmonized, or is there one harmony within another? But the soul does not admit of degrees, and cannot therefore be more or less harmonized. Further, the soul is often engaged in resisting the affections of the body, as Homer describes Odysseus "rebuking his heart." Could he have written this under the idea that the soul is a harmony of the body? Nay, rather, are we not contradicting Homer and ourselves in affirming anything of the sort?

The goddess Harmonia, as Socrates playfully terms the argument of Simmias, has been happily disposed of; and now an answer has to be given to the Theban Cadmus. Socrates recapitulates the argument of Cebes, which, as he remarks, involves the whole question of natural growth or causation; about this he proposes to narrate his own mental experience. When he was young he had puzzled himself with physics: he had inquired into the growth and decay of animals, and the origin of thought, until at last he began to doubt the self-evident fact that growth is the result of eating and drinking, and thus he arrived at the conclusion that he was not meant for such inquiries. Nor was he less perplexed with notions of comparison and number. At first he had imagined himself to understand differences of greater and less, and to know that ten is two more than eight, and the like. But now those very notions appeared to him to contain a contradiction. For how can one be divided into two? or two be compounded into one? These are difficulties which Socrates cannot answer. Of generation and destruction he knows nothing. But he has a confused notion of another method in which matters of this sort are to be investigated. (Cp. Rep. iv. 435 D; vii. 533 A; Char. 170 foll.)

Then he heard some one reading out of a book of Anaxagoras, that mind is the cause of all things. And he said to himself: If mind is the cause of all things, mind must dispose them all for the best. The new teacher will show me this "order of the best" in man and nature. How great had been his hopes and how great his disappointment! For he found that his new friend was anything but consistent in his use of mind as a cause, and that he soon introduced winds, waters, and other eccentric notions. It was as if a person had said that Socrates is sitting here because he is made up of bones and muscles, instead of telling the true reason — that he is here because the Athenians have thought good to sentence him to death, and he has thought good to await his sentence. Had his bones and muscles been left by him to their own ideas of right, they would long ago have taken themselves off. But surely there is a great confusion of the cause and condition in all this. And this confusion also leads people into all sorts of erroneous theories about the position and motions of the earth. None of them know how much stronger than any Atlas is the power of the best. But this "best"

is still undiscovered; and in inquiring after the cause, we can only hope to attain the second best.

Now there is a danger in the contemplation of the nature of things, as there is a danger in looking at the sun during an eclipse, unless the precaution is taken of looking only at the image reflected in the water, or in a glass. (Cp. Laws, 897 D; Rep. 516 foll.) And I was afraid, says Socrates, that I might injure the eye of the soul. I thought that I had better return to the old and safe method of ideas. Though I do not mean to say that he who contemplates existence through the medium of ideas sees only through a glass darkly, any more than he who contemplates actual effects.

If the existence of ideas is granted to him, Socrates is of opinion that he will then have no difficulty in proving the immortality of the soul. He will only ask for a further admission: that beauty is the cause of the beautiful, greatness the cause of the great, smallness of the small, and so on of other things. Thus he avoids the contradictions of greater and less (greater by reason of that which is smaller!), of addition and subtraction, and the other difficulties of relation. These subtleties he is for leaving to wiser heads than his own; he prefers to test ideas by their consequences, and, if asked to give an account of them, goes back to some higher idea or hypothesis which appears to him to be the best, until at last he arrives at a resting-place. (Rep. vi. 510 foll.; Phil. 16 foll.)

The doctrine of ideas, which has long ago received the assent of the Socratic circle, is now affirmed by the Phliasian auditor to command the assent of any men of sense. The narrative is continued; Socrates is desirous of explaining how opposite ideas may appear to coexist but not really coexist in the same thing or person. For example, Simmias may be said to have greatness and also smallness, because he is greater than Socrates and less than Phaedo. And yet Simmias is not really great and also small, but only when compared to Phaedo and Socrates. I use the illustration, says Socrates, because I want to show you not only that ideal opposites exclude one another, but also the opposites in us. I, for example, having the attribute of smallness remain small, and cannot become great: the smallness in me drives out greatness.

One of the company here remarked that this was inconsistent with the old assertion that opposites generated opposites. But that, replies Socrates, was affirmed, not of opposite ideas either in us or in nature, but of opposite things — not of life and death, but of individuals living and dying. When this objection has been removed, Socrates proceeds: This doctrine of the mutual exclusion of opposites is not only true of the opposites themselves, but of things which are inseparable from them. For example, cold and heat are opposed; and fire, which is inseparable from heat, cannot coexist with cold, or snow, which is inseparable from cold, with heat. Again,

the number three excludes the number four, because three is an odd number and four is an even number, and the odd is opposed to the even. Thus we are able to proceed a step beyond "the safe and simple answer." We may say, not only that the odd excludes the even, but that the number three, which participates in oddness, excludes the even. And in like manner, not only does life exclude death, but the soul, of which life is the inseparable attribute, also excludes death. And that of which life is the inseparable attribute is by the force of the terms imperishable. If the odd principle were imperishable, then the number three would not perish, but remove on the approach of the even principle. But the immortal is imperishable; and therefore the soul on the approach of death does not perish but removes.

Thus all objections appear to be finally silenced. And now the application has to be made: If the soul is immortal, "what manner of persons ought we to be?" having regard not only to time but to eternity. For death is not the end of all, and the wicked is not released from his evil by death; but every one carries with him into the world below that which he is and that which he becomes, and that only.

For after death the soul is carried away to judgment, and when she has received her punishment returns to earth in the course of ages. The wise soul is conscious of her situation, and follows the attendant angel who guides her through the windings of the world below; but the impure soul wanders hither and thither without a guide, and is carried at last to her own place, as the pure soul is also carried away to hers. "In order that you may understand this, I must first describe to you the nature and conformation of the earth."

Now the whole earth is a globe placed in the centre of the heavens, and is maintained there by the perfection of balance. That which we call the earth is only a small hollow, of which there are many; but the true earth is above, and is a finer and subtler element, and is full of precious stones and bright colors, of which the stones and colors in our earth are but fragments and reflections, and the earth itself is corroded and crusted over just as the shore is by the sea. And if, like birds, we could fly to the surface of the air, in the same manner that fishes come to the top of the sea, then we should behold the true earth and the true heaven and the true stars. This heavenly earth is of divers colors, sparkling with jewels brighter than gold and whiter than any snow, having flowers and fruits innumerable. And the inhabitants dwell, some on the shore of the sea of air, others in "islets of the blest," and they hold converse with the gods, and behold the sun, moon, and stars as they truly are, and their other blessedness is of a piece with this.

But the interior of the earth has other and deeper hollows, and

one huge chasm or opening called Tartarus, into which vast streams of water and fire are ever flowing to and fro, of which small portions find their way to the surface and form seas and rivers and volcanoes. There is a perpetual inhalation and exhalation of the air rising and falling as the waters pass into the depths of the earth and return again, in their course forming lakes and rivers, but never descending below the centre of the earth, the opposite side of which is a precipice to the rivers on both sides. These rivers are many and mighty, and there are four principal ones, Oceanus, Acheron, Pyriphlegethon, and Cocytus. Oceanus is the river which encircles the earth; Acheron takes an opposite direction, and after flowing under the earth and in desert places at last reaches the Acherusian lake, and this is the river at which the dead await their return to earth. Pyriphlegethon is a stream of fire, which coils around the earth and flows into the depths of Tartarus. The fourth river (Cocytus) is that which is called by the poets the Stygian river, and falls into, and forms the lake Styx, receiving strange powers in the waters. This river, too, falls into Tartarus.

The dead are first of all judged according to their deeds, and those who are incurable are thrust into Tartarus, from which they never come out. Those who have only committed venial sins are first purified of them, and then rewarded for the good which they have done. Those who have committed crimes, great indeed, but not unpardonable, are thrust into Tartarus, but are cast forth at the end of the year on the shores of the rivers, where they stand crying to their victims to let them come out, and if they prevail, then they are let out and their sufferings cease; if not, they are borne in a ceaseless whirl along the rivers of Tartarus. The pure souls also receive their reward, and have their abode in the upper earth, and a select few in still fairer "mansions."

Socrates is not prepared to insist on the literal accuracy of this description, but he is confident that something of the kind is true. He who has sought after the pleasures of knowledge and rejected the pleasures of the body, has reason to be of good hope at the approach of death, whose voice is already heard calling to him, and will be heard calling by all men.

The hour has come at which he must drink the poison, and not much remains to be done. How shall they bury him? That is a question which he refuses to entertain, for they are not burying him, but his dead body. His friends had once been sureties that he would remain, and they shall now be sureties that he has run away. Yet he would not die without the customary ceremonies of washing and burial. Shall he make a libation of the poison? In the spirit he will, but not in the letter. One request he utters in the very act of death, which has been a puzzle to after ages. The puzzle has been occasioned by the simplicity of his words, for there

is no reason to suppose that they have any hidden meaning. With a sort of irony he remembers that a trifling religious duty is still unfulfilled, just as above (60 E) he is represented as desirous before he departs to make a few verses in order to satisfy a scruple about the meaning of a dream.

1. The doctrine of the immortality of the soul has such a great interest for all mankind that they are apt to rebel against any examination of the nature of their belief. They do not like to acknowledge that this, as well as the other "eternal ideas" of man, has a history in time, which may be traced in Greek poetry or philosophy, and also in the Hebrew Scriptures. They convert feeling into reasoning, and throw a net-work of dialectics over that which is really a deeply-rooted instinct. In the same temper which Socrates reproves in himself (91 B) they are disposed to think that even bad arguments will do no harm, for they will die with them, and while they live they will gain by the delusion. But there is a better and higher spirit to be gathered from the Phaedo, as well as from the other writings of Plato, which says that first principles should be most constantly reviewed (Phaed. 107 B), and that the highest subjects demand of us the greatest accuracy (Rep. vi. 504 E).

2. Modern philosophy is perplexed at this whole question, which is sometimes fairly given up and handed over to the realm of faith. The perplexity should not be forgotten by us when we attempt to submit the Phaedo of Plato to the requirements of logic. For what idea can we form of the soul when separated from the body? Or how can the soul be united with the body and still be independent? Is the soul related to the body as the ideal to the real, or as the whole to the parts, or as the subject to the object, or as the cause to the effect, or as the end to the means? Shall we say with Aristotle, that the soul is the entelechy or form of an organized living body? or with Plato, that she has a life of her own? Is the Pythagorean image of the harmony, or of the monad, the truer expression? Is the soul related to the body as sight to the eye, or as the boatman to his boat? (Arist. de Anim. ii. 1, 11, 12.) And in another state of being is the soul to be conceived of as vanishing into infinity, hardly possessing an existence which she can call her own, as in the pantheistic system of Spinoza and others? or as an individual spirit informed with another body and retaining the impress of her former character? (Cp. Gorgias, 524 B, C.) Or is the opposition of soul and body a mere illusion, and the true self neither soul nor body, but the union of the two in the "I" which is above them? And is death the assertion of this individuality in the higher nature, and the falling away into nothingness of the lower? Or are we vainly attempting to pass the boundaries of human thought? The body and the soul seem to be inseparable, not only in fact, but in our conceptions of them; and any philosophy which

too closely unites them, or too widely separates them, either in this life or in another, disturbs the balance of human nature. Neither Plato nor any other philosopher has perfectly adjusted them, or been perfectly consistent with himself in describing their relation to one another.

3. Again believing in the immortality of the soul, we must still ask the question of Socrates, "What is that which we suppose to be immortal?" Is it the personal and individual element in us, or the spiritual and universal? Is it the principle of knowledge or of goodness, or the union of the two? Is it the mere force of life which is determined to be, or the consciousness of self which cannot be got rid of, or the fire of genius which refuses to be extinguished? Or is there a hidden being which is allied to the Author of all existence, who is because he is perfect, and to whom our ideas of perfection give us a title to belong? Whatever answer is given by us to these questions, there still remains the necessity of allowing the permanence of evil, if not forever, at any rate for a time, in order that the wicked "may not have too good a bargain." For the annihilation of evil at death, or the eternal duration of it, seem to involve equal difficulties in the moral order of the universe. Sometimes we are led by our feelings, rather than by our reason, to think of the good and wise only as existing in another life. Why should the mean, the weak, the idiot, the infant, the herd of men who have never in any proper sense the use of reason, reappear with blinking eyes in the light of another world? But our second thought is that the hope of humanity is a common one, and that all or none have a right to immortality. Reason does not allow us to suppose that we have any greater claims than others, and experience sometimes reveals to us unexpected flashes of the higher nature in those whom we had despised. Such are some of the distracting thoughts which press upon us when we attempt to assign any form to our conceptions of a future state.

4. Again, ideas must be given through something; and we are always prone to argue about the soul from analogies of outward things which may serve to embody our thoughts, but are also partly delusive. For we cannot reason from the natural to the spiritual, or from the outward to the inward. The progress of physiological science, without bringing us nearer to the great secret, has perhaps tended to remove some erroneous notions respecting the relations of body and mind, and in this we have the advantage of the ancients. But no one imagines that any seed of immortality is to be discerned in our mortal frames. The result seems to be that those who have thought most deeply on the immortality of the soul, have been content to rest their belief on the agreement of the more enlightened part of mankind, and on the inseparable connection of such a doctrine with the existence of a God, and our ideas of divine justice —

also in a less degree on the impossibility of thinking otherwise of those whom we reverence in this world. And after all has been said, the figure, the analogy, the argument, are felt to be only approximations in different forms to the expression of the common sentiment of the human heart.

5. The Phaedo of Plato may also be regarded as a dialectical approximation to the truth of immortality. Beginning in mystery, Socrates, in the intermediate part of the Dialogue, attempts to bring the doctrine of a future life into connection with his theory of knowledge. In proportion as he succeeds in this, the individual seems to disappear in a more general notion of the soul; the contemplation of ideas "under the form of eternity" takes the place of past and future states of existence. His language may be compared to that of some modern philosophers, who speak of eternity, not in the sense of perpetual duration of time, but as an ever-present quality of the soul. Yet at the conclusion of the Dialogue, having "arrived at the end of the intellectual world" (Rep. vii. 532 B), he replaces the veil of mythology, and describes the soul and her attendant genius in the language of the mysteries or of a disciple of Zoroaster. Nor can we fairly demand of Plato a consistency which is wanting among ourselves, who acknowledge that another world is beyond the range of human thought, and yet are always seeking to represent the mansions of heaven or hell in the colors of the painter, or in the descriptions of the poet or rhetorician.

6. The doctrine of the immortality of the soul was not new to the Greeks in the age of Socrates, but, like the unity of God, had a foundation in the popular belief. The old Homeric notion of a gibbering ghost flitting away to Hades; or of a few illustrious heroes enjoying the isles of the blest; or of an existence divided between the two; or the Hesiodic, of righteous spirits, who become guardian angels, — had given place in the mysteries and the Orphic poets to representations, partly fanciful, of a future state of rewards and punishments. (Laws, ix. 870.) The reticence of the Greeks on public occasions and in some part of their literature respecting this "underground" religion, is not to be taken as a measure of the diffusion of such beliefs. If Pericles in the funeral oration is silent on the consolations of immortality, the poet Pindar and the tragedians on the other hand constantly assume the continued existence of the dead in an upper or under world. Darius and Laius are still alive; Antigone will be dear to her brethren after death; the way to the palace of Cronos is found by those who "have thrice departed from evil." The tragedy of the Greeks is not "rounded" by this life, but is deeply set in decrees of fate and mysterious workings of powers beneath the earth. In the caricature of Aristophanes there is also a witness to the common sentiment. The Ionian and Pythagorean philosophies arose, and some new elements were added to the

popular belief. The individual must find an expression as well as the world. Either the soul was supposed to exist in the form of a magnet or of a particle of fire, or light, or air, or water; or of a number or of a harmony of number; or to be or have, like the stars, a principle of motion (Arist. de Anim. i. 1, 2, 3). At length Anaxagoras, hardly distinguishing between life and mind, or between mind human and divine, attained the pure abstraction; and this, like the other abstractions of Greek philosophy, sank deep into the human intelligence. The opposition of the intelligible and the sensible, and of God to the world, supplied an analogy which assisted in the separation of soul and body. If ideas were separable from phenomena, mind was also separable from matter; if the ideas were eternal, the mind that conceived them was eternal too. As the unity of God was more distinctly acknowledged the conception of the human soul became more developed. The succession, or alternation of life and death, had occurred to Heracleitus. The Eleatic Parmenides had stumbled upon the modern thesis, that "thought and being are the same." The eastern belief in transmigration defined the sense of individuality; and some, like Empedocles, fancied that the blood which they had shed in another state of being was crying against them, and that for thirty thousand years they were to be "fugitives and vagabonds upon the earth." The desire of recognizing a lost love or friend in the world below (Phaedo 68) is a natural feeling which, in that age as well as in every other, has given distinctness to the hope of immortality. Nor were ethical considerations wanting, partly derived from the necessity of punishing the greater sort of criminals, whom no avenging power of this world could reach. The voice of conscience, too, was heard reminding the good man that he was not altogether innocent. (Rep. i. 330.) To these indistinct longings and fears an expression was given in the mysteries and Orphic poets: a "heap of books" (Rep. ii. 364 E), passing under the names of Musaeus and Orpheus in Plato's time, were filled with notions of an under world.

7. Yet probably the belief in the individuality of the soul after death had but a feeble hold on the Greek mind. Like the personality of God, the personality of man in a future state was not inseparably bound up with the reality of his existence. For the distinction between the personal and impersonal, and also between the divine and human, was far less marked to the Greek than to ourselves. And as Plato readily passes from the notion of the good to that of God, he also passes, almost imperceptibly to himself and his reader, from the future life of the individual soul to the eternal being of the absolute soul. There has been a clearer statement and a clearer denial of the belief in modern times than is found in early Greek philosophy, and hence the comparative silence on the whole subject which is often remarked in ancient writers, and particularly in

Aristotle. For Plato and Aristotle are not further removed in their teaching about the immortality of the soul than they are in their theory of knowledge.

8. That in an age when logic was beginning to mould human thought, Plato should have cast his belief in immortality into a logical form, is not surprising. And when we consider how much the doctrine of ideas was also one of words, we cannot wonder that he should have fallen into verbal fallacies: early logic is always mistaking the truth of the form for the truth of the matter. It is easy to see that the alternation of opposites is not the same as the generation of them out of each other; and that the generation out of each other, which is the first argument in the Phaedo, is at variance with their mutual exclusion of each other, whether in themselves or in us, which is the last. For even if we admit the distinction which he draws at p. 103, between the opposites and the things which have the opposites, still individuals fall under the latter class; and we have to pass out of the region of human hopes and fears to a conception of an abstract soul which is the impersonation of the ideas. Such a conception, which in Plato himself is but half expressed, is unmeaning to us, and relative only to a particular stage in the history of thought. The doctrine of reminiscence is also a fragment of a former world, which has no place in the philosophy of modern times. But Plato had the wonders of psychology just opening to him, and he had not the explanation of them which is supplied by the analysis of language and the history of the human mind. The question, "Whence come our abstract ideas?" he could only answer by an imaginary hypothesis. Nor is it difficult to see that his crowning argument is purely verbal, and is but the expression of an instinctive confidence put into a logical form: "The soul is immortal because it contains a principle of imperishableness." Nor does he himself seem at all to be aware that nothing is added to human knowledge by his "safe and simple answer," that beauty is the cause of the beautiful; and that he is merely reasserting the Eleatic being "divided by the Pythagorean numbers," against the Heracleitean doctrine of perpetual generation. The answer to the "very serious question" of generation and destruction is really the denial of them. For this he would substitute, as in the Republic, a system of ideas, tested not by experience, but by their consequences, and not explained by actual causes, but by a higher, that is, more general notion: consistency with themselves is all that is required of them. (Rep. vi. 510 foll., and Phaedo, 101 foll.)

9. To deal fairly with such arguments they should not only not be separated from the age to which they belong, but they should be translated as far as possible into their modern equivalents. "If the ideas of men are eternal, their souls are eternal, and if not the ideas, then not the souls." Such an argument stands nearly in the same

relation to Plato and his age, as the argument from the existence of God to immortality among ourselves. "If God exists, then the soul exists after death; and if there is no God, there is no existence of the soul after death." For the ideas are to his mind the reality, the truth, the principle of permanence, as well as of mind and order in the world. When Simmias and Cebes say that they are more strongly persuaded of the existence of ideas than they are of the immortality of the soul, they represent fairly enough the order of thought in Greek philosophy. And we might say in the same way that we are more certain of the existence of God than we are of the immortality of the soul, and are led by the belief in the one to a belief in the other. The parallel, as Socrates would say, is not perfect, but agrees in as far as the mind in either case is regarded, as dependent on something above and beyond herself. Nor need we shrink from pressing the analogy one step further: "We are more certain of our ideas of truth and right than we are of the existence of God, and are led on in the order of thought from one to the other."

10. The main argument of the Phaedo is derived from the existence of eternal ideas of which the soul is a partaker; the other argument of the alternation of opposites is replaced by this. And there have not been wanting philosophers of the idealist school who have imagined that the doctrine of the immortality of the soul is a theory of knowledge only, and that in all that precedes Plato is preparing for this. Such a view is far from lying on the surface of the Phaedo, and seems to be inconsistent with the Gorgias and the Republic. Those who maintain it are immediately compelled to renounce the shadow which they have grasped, as a play of words only. But the truth is, that Plato in his argument for the immortality of the soul has collected many elements of proof or persuasion, ethical and mythological as well as dialectical, which are not easily to be reconciled with one another; and he is as much in earnest about his doctrine of retribution, which is repeated in all his more ethical writings, as about his theory of knowledge. And while we may fairly translate the dialectical into the language of Hegel, and the religious and mythological into the language of Dante or Bunyan, the ethical speaks to us still in the same voice, reaching across the ages.

11. Two arguments of this sort occur in the Phaedo. The first may be described as the aspiration of the soul after another sort of being. Like the Oriental or Christian ascetic, the philosopher is seeking to withdraw from impurities of sense, to leave the world and the things of the world, and to find his higher self. Plato recognizes in these aspirations the foretaste of immortality; as Butler and Addison in modern times have argued, the one from the moral tendencies of mankind, the other from the progress of the soul towards perfection. In using this argument Plato has certainly confused the

soul which has left the body, with the soul of the good and wise. (Cp. Rep. x. 611 C.) Such a confusion was natural, and arose partly out of the antithesis of soul and body. The soul in her own essence, and the soul "clothed upon" with virtues and graces, were easily interchanged with one another, because on a subject which passes expression the distinctions of language can hardly be maintained.

12. The other ethical proof of the immortality of the soul is derived from the necessity of retribution. The wicked would be too well off if their evil deeds came to an end. It is not to be supposed than an Ardiaeus, an Archelaus, an Ismenias could ever have suffered the penalty of their crimes in this world. The manner in which this retribution is accomplished Plato represents under the figure of mythology. Doubtless he felt that it was easier to improve than to invent, and that in religion especially the traditional form was required in order to give verisimilitude to the myth. The myth too is far more probable to that age than to ours, and may fairly be regarded as "one guess among many" about the nature of the earth, which he cleverly supports by the indications of geology. Not that he insists on the absolute truth of his own particular notions: "no man of sense will be confident of that; but he will be confident that something of the kind is true" (114 D). As in other passages (Gorg. 527 A, Tim. 29 D; cp. Crito 107 B), he wins belief for his fictions by the moderation of his statements; he does not, like Dante or Swedenborg, allow himself to be deceived by his own creations.

The Dialogue must be read in the light of the situation. And first of all we are struck by the calmness of the scene. Like the spectators at the time, we cannot pity Socrates; his mien and his language are so noble and fearless. He is the same as he ever was, but milder and gentler, and he has in no degree lost his interest in dialectics; the argument is the greatest gain to him, and he will not forego the delight of it in compliance with the jailer's intimation that he should not heat himself with talking. Some other traits of his character may be noted; for example, the courteous manner in which he inclines his head to the last objector, or the ironical touch, "Me already, as the tragic poet would say, the voice of fate calls;" or the depreciation of the arguments with which "he comforted himself and them;" or the allusion to the possibility of finding another teacher among barbarous races (cp. Polit. 262 D); or the mysterious reference to another science (mathematics?) of generation and destruction for which he is vainly feeling. There is no change in him; only now he is invested with a sort of sacred character, as the prophet or priest of Apollo the God of the festival, in whose honor he first of all composes a hymn, and then like the swan pours forth his dying lay. Perhaps the extreme elevation of Socrates above his own situation, and the ordinary interests of life

(compare his *jeu d' esprit* about his burial) create in the mind of the reader an impression stronger than could be derived from arguments that such a one, in his own language, has in him "a principle which does not admit of death."

The other persons of the Dialogue may be considered under two heads: (1) private friends; (2) the respondents in the argument.

First there is Crito, who has been already introduced to us in the Euthydemus and the Crito; he is the equal in years of Socrates, and stands in quite a different relation to him from his younger disciples. He is a man of the world who is rich and prosperous (cp. the jest in the Euthydemus 304 C), the best friend of Socrates, who wants to know his last commands, in whose presence he talks to his family, and who performs the last duty of closing his eyes. It is observable too that, as in the Euthydemus, Crito shows no aptitude for philosophical discussions. Nor among the friends of Socrates must the jailer be forgotten, who seems to have been introduced by Plato in order to show the impression made by the extraordinary man on the common. The gentle nature of the man is indicated by his weeping at the announcement of his errand and then turning away, and also by the words of Socrates to his disciples: "How charming the man is! since I have been in prison he was always coming to me, and has been as good as could be to me." We are reminded too that he has retained this gentle nature amid scenes of death and violence by the contrasts which he draws between the behavior of Socrates and of others when about to die.

Another person who takes no part in the philosophical discussion is the excitable Apollodorus, the same who, in the Symposium, of which he is the narrator, is called "the madman," and who testifies his grief by the most violent emotions. Phædo is also present, the "beloved disciple" as he may be termed, who is described, if not "leaning on his bosom," as seated next to Socrates, who is playing with his hair. At a particular point the argument is described as falling before the attack of Simmias. A sort of despair is introduced in the minds of the company. The effect of this is heightened by the description of Phædo, who has been the eye-witness of the scene, and by the sympathy of his Phliasian auditors, who are beginning to think "that they too can never trust an argument again." Like Apollodorus, Phædo himself takes no part in the argument. But the calmness of his behavior, "veiling his face" when he can no longer contain his tears, contrasts with the passionate cries of the other.

The two principal interlocutors are Simmias and Cebes, the disciples of Philolaus the Pythagorean philosopher of Thebes. Simmias is described in the Phædrus (242 B) as fonder of an argument than any man living; and Cebes, although finally persuaded by Socrates, is said to be the most incredulous of human beings. It

is Cebes who at the commencement of the Dialogue raises the question why "suicide is unlawful," and who first supplies the doctrine of recollection as a confirmation of the argument of the preëxistence of the soul. It is Cebes who urges that the preëxistence does not necessarily involve the future existence of the soul, and who brings forward the argument of the weaver and his coat. To Simmias, on the other hand, is attributed the notion that the soul is a harmony, which is naturally put into the mouth of a Pythagorean disciple. It is Simmias, too, who first remarks on the uncertainty of human knowledge, and only at last concedes to the argument such a qualified approval as is consistent with the feebleness of the human faculties.

There is no proof that the conversation was ever actually held, and the place of the Dialogue in the series is doubtful. The doctrine of ideas is certainly carried beyond the Socratic point of view; in no other of the writings of Plato is the theory of them so completely developed. Whether the belief in immortality can be attributed to Socrates or not is uncertain; the silence of the Memorabilia, and of the earlier Dialogues of Plato, is an argument to the contrary. Yet in the Cyropaedia Xenophon (viii. 7, 19 foll.) has put language into the mouth of the dying Cyrus which recalls the Phaedo, and may perhaps have been derived from the teaching of Socrates.

The Phaedo, as has been already intimated, is not one of the Socratic Dialogues of Plato; nor, on the other hand, can it be assigned to that later period of the Platonic writings at which the ideas appear to be forgotten. Without pretending to determine the real time of composition, the Meno, Euthyphro, Apology, Phaedo, Symposium may be conveniently read by us in this order as illustrative of the life of Socrates. Another chain may be formed of the Meno, Phaedo, Phaedrus, in which the immortality of the soul is connected with the doctrine of ideas. In the Meno the theory of ideas is based on the ancient belief in transmigration, which reappears again in the Phaedrus, as well as in the Republic and Timaeus, and in all of them is connected with a doctrine of retribution. In the Phaedrus the immortality of the soul is supposed to rest on the conception of the soul as a principle of motion, whereas in the Republic the argument turns on the natural continuance of the soul, which, if not destroyed by her own proper evil, can hardly be destroyed by any other. The soul of man in the Timaeus (42 foll.) is derived from the Supreme Creator, and either returns after death to her kindred star, or descends into the lower life of an animal. The Apology expresses the same view as the Phaedo, but with less confidence; the probability of death being a long sleep is not excluded. The Theaetetus also describes, in a digression, the desire of the soul to fly away and be with God — "and to fly to him is to be like him"

(176 B). Lastly, the Symposium may be observed to resemble as well as to differ from the Phaedo. While the first notion of immortality is only in the way of natural procreation or of posthumous fame and glory, the higher vision of beauty, like the good in the Republic, is the vision of the eternal idea. So deeply rooted in Plato's mind is the belief in immortality; so various are the forms of expression which he employs.

Some elements of the drama may be noted in all the Dialogues of Plato. The Phaedo is the tragedy of which Socrates is the protagonist and Simmias and Cebes the secondary performers. No Dialogue has a greater unity of subject and feeling. Plato has certainly fulfilled the condition of Greek, or rather of all art, which requires that scenes of death and suffering should be clothed in beauty. The gathering of the friends at the commencement of the Dialogue, the dejection of the audience at the temporary overthrow of the argument, the picture of Socrates playing with the hair of Phaedo, the final scene in which Socrates alone retains his composure — are masterpieces of art. The chorus at the end might have interpreted the feeling of the play: "There can no evil happen to a good man in life or death."

PHAEDO.

PERSONS OF THE DIALOGUE.

PHAEDO, *who is the narrator of the Dialogue to*
ECHECRATES *of Phlius.*
SOCRATES.
ATTENDANT OF THE PRISON.
APOLLODORUS.
SIMMIAS.
CEBES.
CRITO.

SCENE: — The Prison of Socrates.
PLACE OF THE NARRATION: — Phlius.

Ech. WERE you yourself, Phaedo, in the prison with Socrates on the day when he drank the poison? Steph. 57

Phaedo. Yes, Echecrates, I was.

Ech. I wish that you would tell me about his death. What did he say in his last hours? We were informed that he died by taking poison, but no one knew anything more; for no Phliasian ever goes to Athens now, and a long time has elapsed since any Athenian found his way to Phlius, and therefore we had no clear account.

Phaed. Did you not hear of the proceedings at the trial? 58

Ech. Yes; some one told us about the trial, and we could not understand why, having been condemned, he was put to death, as appeared, not at the time, but long afterwards. What was the reason of this?

Phaed. An accident, Echecrates. The reason was that the stern of the ship which the Athenians send to Delos happened to have been crowned on the day before he was tried.

Ech. What is this ship?

Phaed. This is the ship in which, as the Athenians say, The-

seus went to Crete when he took with him the fourteen youths, and was the savior of them and of himself. And they were said to have vowed to Apollo at the time, that if they were saved they would make an annual pilgrimage to Delos. Now this custom still continues, and the whole period of the voyage to and from Delos, beginning when the priest of Apollo crowns the stern of the ship, is a holy season, during which the city is not allowed to be polluted by public executions; and often, when the vessel is detained by adverse winds, there may be a very considerable delay. As I was saying, the ship was crowned on the day before the trial, and this was the reason why Socrates lay in prison and was not put to death until long after he was condemned.

Ech. What was the manner of his death, Phaedo? What was said or done? And which of his friends had he with him? Or were they not allowed by the authorities to be present? And did he die alone?

Phaed. No; there were several of his friends with him.

Ech. If you have nothing to do, I wish that you would tell me what passed, as exactly as you can.

Phaed. I have nothing to do, and will try to gratify your wish. For to me too there is no greater pleasure than to have Socrates brought to my recollection; whether I speak myself or hear another speak of him.

Ech. You will have listeners who are of the same mind with you, and I hope that you will be as exact as you can.

Phaed. I remember the strange feeling which came over me at being with him. For I could hardly believe that I was present at the death of a friend, and therefore I did not pity him, Echecrates; his mien and his language were so noble and fearless in the hour of death that to me he appeared blessed. I thought that in going to the other world he could not be without a divine call, and that he would be happy, if any man
59 ever was, when he arrived there; and therefore I did not pity him as might seem natural at such a time. But neither could I feel the pleasure which I usually felt in philosophical discourse (for philosophy was the theme of which we spoke). I was pleased and I was also pained, because I knew that he was soon to die, and this strange mixture of feeling was shared by us all; we were laughing and weeping by turns, especially the excitable Apollodorus — you know the sort of man?

Ech. Yes.

Phaed. He was quite overcome; and I myself, and all of us were greatly moved.

Ech. Who were present?

Phaed. Of native Athenians there were, besides Apollodorus, Critobulus and his father Crito, Hermogenes, Epigenes, Aeschines, and Antisthenes; likewise Ctesippus of the deme of Paeania, Menexenus, and some others; but Plato, if I am not mistaken, was ill.

Ech. Were there any strangers?

Phaed. Yes, there were; Simmias the Theban, and Cebes, and Phaedondes; Euclid and Terpsion, who came from Megara.

Ech. And was Aristippus there, and Cleombrotus?

Phaed. No, they were said to be in Aegina.

Ech. Any one else?

Phaed. I think that these were about all.

Ech. And what was the discourse of which you spoke?

Phaed. I will begin at the beginning, and endeavor to repeat the entire conversation. You must understand that we had been previously in the habit of assembling early in the morning at the court in which the trial was held, and which is not far from the prison. There we remained talking with one another until the opening of the prison doors (for they were not opened very early), and then went in and generally passed the day with Socrates. On the last morning the meeting was earlier than usual; this was owing to our having heard on the previous evening that the sacred ship had arrived from Delos, and therefore we agreed to meet very early at the accustomed place. On our going to the prison, the jailer who answered the door, instead of admitting us, came out and bade us wait and he would call us. "For the eleven," he said, "are now with Socrates; they are taking off his chains, and giving orders that he is to die to-day." He soon returned and said that we might come in. On entering we found Socrates just released from chains, and Xanthippe, whom you know, sitting by him, 60
and holding his child in her arms. When she saw us she ut tered a cry and said, as women will: "O Socrates, this is the last time that either you will converse with your friends, or they with you." Socrates turned to Crito and said: "Crito, let some one take her home." Some of Crito's people accordingly led her away, crying out and beating herself. And when she was gone, Socrates, sitting up on the couch, began to bend and

rub his leg, saying, as he rubbed: How singular is the thing called pleasure, and how curiously related to pain, which might be thought to be the opposite of it; for they never come to a man together, and yet he who pursues either of them is generally compelled to take the other. They are two, and yet they grow together out of one head or stem; and I cannot help thinking that if Aesop had noticed them, he would have made a fable about God trying to reconcile their strife, and when he could not, he fastened their heads together; and this is the reason why when one comes the other follows, as I find in my own case pleasure comes following after the pain in my leg which was caused by the chain.

Upon this Cebes said: I am very glad indeed, Socrates, that you mentioned the name of Aesop. For that reminds me of a question which has been asked by others, and was asked of me only the day before yesterday by Evenus the poet, and as he will be sure to ask again, you may as well tell me what I should say to him, if you would like him to have an answer. He wanted to know why you who never before wrote a line of poetry, now that you are in prison are putting Aesop into verse, and also composing that hymn in honor of Apollo.

Tell him, Cebes, he replied, that I had no idea of rivaling him or his poems; which is the truth, for I knew that I could not do that. But I wanted to see whether I could purge away a scruple which I felt about certain dreams. In the course of my life I have often had intimations in dreams "that I should make music." The same dream came to me sometimes in one form, and sometimes in another, but always saying the same or nearly the same words: Make and cultivate music, said the dream. And hitherto I had imagined that this was only intended to exhort and encourage me in the study of philosophy,
61 which has always been the pursuit of my life, and is the noblest and best of music. The dream was bidding me do what I was already doing, in the same way that the competitor in a race is bidden by the spectators to run when he is already running. But I was not certain of this, as the dream might have meant music in the popular sense of the word, and being under sentence of death, and the festival giving me a respite, I thought that I should be safer if I satisfied the scruple, and, in obedience to the dream, composed a few verses before I departed. And first I made a hymn in honor of the god of the festival, and then considering that a poet, if he is really to be a

poet or maker, should not only put words together but make stories, and as I have no invention, I took some fables of Aesop, which I had ready at hand and knew, and turned them into verse. Tell Evenus this, and bid him be of good cheer; say that I would have him come after me if he be a wise man, and not tarry; and that to-day I am likely to be going, for the Athenians say that I must.

Simmias said: What a message for such a man! having been a frequent companion of his I should say that, as far as I know him, he will never take your advice unless he is obliged.

Why, said Socrates. Is not Evenus a philosopher?

I think that he is, said Simmias.

Then he, or any man who has the spirit of philosophy, will be willing to die, though he will not take his own life, for that is held not to be right.

Here he changed his position, and put his legs off the couch on to the ground, and during the rest of the conversation he remained sitting.

Why do you say, inquired Cebes, that a man ought not to take his own life, but that the philosopher will be ready to follow the dying?

Socrates replied: And have you, Cebes and Simmias, who are acquainted with Philolaus, never heard him speak of this?

I never understood him, Socrates.

My words, too, are only an echo; but I am very willing to say what I have heard: and indeed, as I am going to another place, I ought to be thinking and talking of the nature of the pilgrimage which I am about to make. What can I do better in the interval between this and the setting of the sun?

Then tell me, Socrates, why is suicide held not to be right? as I have certainly heard Philolaus affirm when he was staying with us at Thebes; and there are others who say the same, although none of them has ever made me understand him.

62 But do your best, replied Socrates, and the day may come when you will understand. I suppose that you wonder why, as most things which are evil may be accidentally good, this is to be the only exception (for may not death, too, be better than life in some cases?), and why, when a man is better dead, he is not permitted to be his own benefactor, but must wait for the hand of another.

By Jupiter! yes, indeed, said Cebes laughing, and speaking in his native Doric.

I admit the appearance of inconsistency, replied Socrates but there may not be any real inconsistency after all in this. There is a doctrine uttered in secret that man is a prisoner who has no right to open the door of his prison and run away; this is a great mystery which I do not quite understand. Yet I too believe that the gods are our guardians, and that we are a possession of theirs. Do you not agree?

Yes, I agree to that, said Cebes.

And if one of your own possessions, an ox or an ass, for example, took the liberty of putting himself out of the way when you had given no intimation of your wish that he should die, would you not be angry with him, and would you not punish him if you could?

Certainly, replied Cebes.

Then there may be reason in saying that a man should wait, and not take his own life until God summons him, as he is now summoning me.

Yes, Socrates, said Cebes, there is surely reason in that. And yet how can you reconcile this seemingly true belief that God is our guardian and we his possessions, with that willingness to die which we were attributing to the philosopher? That the wisest of men should be willing to leave this service in which they are ruled by the gods who are the best of rulers, is not reasonable, for surely no wise man thinks that when set at liberty he can take better care of himself than the gods take of him. A fool may perhaps think this — he may argue that he had better run away from his master, not considering that his duty is to remain to the end, and not to run away from the good, and that there is no sense in his running away. But the wise man will want to be ever with him who is better than himself. Now this, Socrates, is the reverse of what was just now said; for upon this view the wise man should sorrow and the fool rejoice at passing out of life.

63 The earnestness of Cebes seemed to please Socrates. Here, said he, turning to us, is a man who is always inquiring, and is not to be convinced all in a moment, nor by every argument.

And in this case, added Simmias, his objection does appear to me to have some force. For what can be the meaning of a truly wise man wanting to fly away and lightly leave a master who is better than himself. And I rather imagine that Cebes is referring to you; he thinks that you are too ready to leave

us, and too ready to leave the gods who, as you acknowledge, are our good rulers.

Yes, replied Socrates; there is reason in that. And this indictment you think that I ought to answer as if I were in court?

That is what we should like, said Simmias.

Then I must try to make a better impression upon you than I did when defending myself before the judges. For I am quite ready to acknowledge, Simmias and Cebes, that I ought to be grieved at death, if I were not persuaded that I am going to other gods who are wise and good (of this I am as certain as I can be of anything of the sort), and to men departed (though I am not so certain of this) who are better than those whom I leave behind; and therefore I do not grieve as I might have done, for I have good hope that there is yet something remaining for the dead, and as has been said of old, some far better thing for the good than for the evil.

But do you mean to take away your thoughts with you, Socrates, said Simmias? Will you not communicate them to us? — the benefit is one in which we too may hope to share. Moreover, if you succeed in convincing us, that will be an answer to the charge against yourself.

I will do my best, replied Socrates. But you must first let me hear what Crito wants; he was going to say something to me.

Only this, Socrates, replied Crito: the attendant who is to give you the poison has been telling me that you are not to talk much, and he wants me to let you know this; for that by talking, heat is increased, and this interferes with the action of the poison; those who excite themselves are sometimes obliged to drink the poison two or three times.

Then, said Socrates, let him mind his business and be prepared to give the poison two or three times, if necessary; that is all.

I was almost certain that you would say that, replied Crito; but I was obliged to satisfy him.

Never mind him, he said.

And now I will make answer to you, O my judges, and show that he who has lived as a true philosopher has reason to be of good cheer when he is about to die, and that after death he may hope to receive the greatest good in the other world. And how this may be, Simmias and Cebes, I will en- 64

deavor to explain. For I deem that the true disciple of philosophy is likely to be misunderstood by other men; they do not perceive that he is ever pursuing death and dying; and if this is true, why, having had the desire of death all his life long, should he repine at the arrival of that which he has been always pursuing and desiring?

Simmias laughed and said: Though not in a laughing humor, I swear that I cannot help laughing, when I think what the wicked world will say when they hear this. They will say that this is very true, and our people at home will agree with them in saying that the life which philosophers desire is truly death, and that they have found them out to be deserving of the death which they desire.

And they are right, Simmias, in saying this, with the exception of the words "They have found them out;" for they have not found out what is the nature of this death which the true philosopher desires, or how he deserves or desires death. But let us leave them and have a word with ourselves: Do we believe that there is such a thing as death?

To be sure, replied Simmias.

And is this anything but the separation of soul and body? And being dead is the attainment of this separation when the soul exists in herself, and is parted from the body and the body is parted from the soul — that is death?

Exactly: that and nothing else, he replied.

And what do you say of another question, my friend, about which I should like to have your opinion, and the answer to which will probably throw light on our present inquiry: Do you think that the philosopher ought to care about the pleasures — if they are to be called pleasures — of eating and drinking?

Certainly not, answered Simmias.

And what do you say of the pleasures of love — should he care about them?

By no means.

And will he think much of the other ways of indulging the body, for example, the acquisition of costly raiment, or sandals, or other adornments of the body? Instead of caring about them, does he not rather despise anything more than nature needs? What do you say?

I should say that the true philosopher would despise them.

Would you not say that he is entirely concerned with the

soul and not with the body? He would like, as far as he can, to be quit of the body and turn to the soul.

That is true.

In matters of this sort philosophers, above all other men, may be observed in every sort of way to dissever the soul from the body.

That is true.

65 Whereas, Simmias, the rest of the world are of opinion that a life which has no bodily pleasures and no part in them is not worth having; but that he who thinks nothing of bodily pleasures is almost as though he were dead.

That is quite true.

What again shall we say of the actual acquirement of knowledge? — is the body, if invited to share in the inquiry, a hinderer or a helper? I mean to say, have sight and hearing any truth in them? Are they not, as the poets are always telling us, inaccurate witnesses? and yet, if even they are inaccurate and indistinct, what is to be said of the other senses? — for you will allow that they are the best of them?

Certainly, he replied.

Then when does the soul attain truth? — for in attempting to consider anything in company with the body she is obviously deceived.

Yes, that is true.

Then must not existence be revealed to her in thought, if at all?

Yes.

And thought is best when the mind is gathered into herself and none of these things trouble her — neither sounds nor sights nor pain nor any pleasure, — when she has as little as possible to do with the body, and has no bodily sense or feeling, but is aspiring after being?

That is true.

And in this the philosopher dishonors the body; his soul runs away from the body and desires to be alone and by herself?

That is true.

Well, but there is another thing, Simmias: Is there or is there not an absolute justice?

Assuredly there is.

And an absolute beauty and absolute good?

Of course.

But did you ever behold any of them with your eyes?

Certainly not.

Or did you ever reach them with any other bodily sense? (and I speak not of these alone, but of absolute greatness, and health, and strength, and of the essence or true nature of everything). Has the reality of them ever been perceived by you through the bodily organs? or rather, is not the nearest approach to the knowledge of their several natures made by him who so orders his intellectual vision as to have the most exact conception of the essence of that which he considers?

Certainly.

And he attains to the knowledge of them in their highest purity who goes to each of them with the mind alone, not
66 allowing when in the act of thought the intrusion or introduction of sight or any other sense in the company of reason, but with the very light of the mind in her clearness penetrates into the very light of truth in each; he has got rid, as far as he can, of eyes and ears and of the whole body, which he conceives of only as a disturbing element, hindering the soul from the acquisition of knowledge when in company with her — is not this the sort of man who, if ever man did, is likely to attain the knowledge of existence?

There is admirable truth in that, Socrates, replied Simmias.

And when they consider all this, must not true philosophers make a reflection, of which they will speak to one another in such words as these: We have found, they will say, a path of speculation which seems to bring us and the argument to the conclusion, that while we are in the body, and while the soul is mingled with this mass of evil, our desire will not be satisfied, and our desire is of the truth. For the body is a source of endless trouble to us by reason of the mere requirement of food; and also is liable to diseases which overtake and impede us in the search after truth: and by filling us so full of loves, and lusts, and fears, and fancies, and idols, and every sort of folly, prevents our ever having, as people say, so much as a thought. For whence come wars, and fightings, and factions? whence but from the body and the lusts of the body? For wars are occasioned by the love of money, and money has to be acquired for the sake and in the service of the body; and in consequence of all these things the time which ought to be given to philosophy is lost. Moreover, if there is time and an inclination toward philosophy, yet the body introduces a turmoil and confusion

and fear into the course of speculation, and hinders us from seeing the truth; and all experience shows that if we would have pure knowledge of anything we must be quit of the body, and the soul in herself must behold all things in themselves: then I suppose that we shall attain that which we desire, and of which we say that we are lovers, and that is wisdom; not while we live, but after death, as the argument shows; for if while in company with the body, the soul cannot have pure knowledge, one of two things seems to follow — either knowledge is not to be attained at all, or, if at all, after death. 67
For then, and not till then, the soul will be in herself alone and without the body. In this present life, I reckon that we make the nearest approach to knowledge when we have the least possible concern or interest in the body, and are not saturated with the bodily nature, but remain pure until the hour when God himself is pleased to release us. And then the foolishness of the body will be cleared away and we shall be pure and hold converse with other pure souls, and know of ourselves the clear light everywhere; and this is surely the light of truth. For no impure thing is allowed to approach the pure. These are the sort of words, Simmias, which the true lovers of wisdom cannot help saying to one another, and thinking. You will agree with me in that?

Certainly, Socrates.

But if this is true, O my friend, then there is great hope that, going whither I go, I shall there be satisfied with that which has been the chief concern of you and me in our past lives. And now that the hour of departure is appointed to me, this is the hope with which I depart, and not I only, but every man who believes that he has his mind purified.

Certainly, replied Simmias.

And what is purification but the separation of the soul from the body, as I was saying before; the habit of the soul gathering and collecting herself into herself, out of all the courses of the body; the dwelling in her own place alone, as in another life, so also in this, as far as she can; the release of the soul from the chains of the body?

Very true, he said.

And what is that which is termed death, but this very separation and release of the soul from the body?

To be sure, he said.

And the true philosophers, and they only, study and are eager

to release the soul. Is not the separation and release of the soul from the body their especial study?

That is true.

And as I was saying at first, there would be a ridiculous contradiction in men studying to live as nearly as they can in a state of death, and yet repining when death comes.

Certainly.

Then Simmias, as the true philosophers are ever studying death, to them, of all men, death is the least terrible. Look at the matter in this way: how inconsistent of them to have been always enemies of the body, and wanting to have the soul alone, and when this is granted to them, to be trembling and repining; instead of rejoicing at their departing to that place where, when they arrive, they hope to gain that which in life they loved (and this was wisdom), and at the same time to be rid of the company of their enemy. Many a man has been willing to go to the world below in the hope of seeing there an earthly love, or wife, or son, and conversing with them. And will he who is a true lover of wisdom, and is persuaded in like manner that only in the world below he can worthily enjoy her, still repine at death? Will he not depart with joy? Surely, he will, my friend, if he be a true philosopher. For he will have a firm conviction that there only, and nowhere else, he can find wisdom in her purity. And if this be true, he would be very absurd, as I was saying, if he were to fear death.

68

He would indeed, replied Simmias.

And when you see a man who is repining at the approach of death, is not his reluctance a sufficient proof that he is not a lover of wisdom, but a lover of the body, and probably at the same time a lover of either money or power, or both?

That is very true, he replied.

There is a virtue, Simmias, which is named courage. Is not that a special attribute of the philosopher?

Certainly.

Again, there is temperance. Is not the calm, and control, and disdain of the passions which even the many call temperance, a quality belonging only to those who despise the body, and live in philosophy?

That is not to be denied.

For the courage and temperance of other men, if you will consider them, are really a contradiction.

How is that, Socrates?

Well, he said, you are aware that death is regarded by men in general as a great evil.

That is true, he said.

And do not courageous men endure death because they are afraid of yet greater evils?

That is true.

Then all but the philosophers are courageous only from fear, and because they are afraid; and yet that a man should be courageous from fear, and because he is a coward, is surely a strange thing.

Very true.

And are not the temperate exactly in the same case? They are temperate because they are intemperate, — which may seem to be a contradiction, but is nevertheless the sort of thing which happens with this foolish temperance. For there are pleasures which they must have, and are afraid of losing; and therefore they abstain from one class of pleasures because they are overcome by another: and whereas intemperance is defined as "being under the dominion of pleasure," they overcome only because they are overcome by pleasure. And that 69
is what I mean by saying that they are temperate through intemperance.

That appears to be true.

Yet the exchange of one fear or pleasure or pain for another fear or pleasure or pain, which are measured like coins, the greater with the less, is not the exchange of virtue. O my dear Simmias, is there not one true coin for which all things ought to exchange? — and that is wisdom; and only in exchange for this, and in company with this, is anything truly bought or sold, whether courage or temperance or justice. And is not all true virtue the companion of wisdom, no matter what fears or pleasures or other similar goods or evils may or may not attend her? But the virtue which is made up of these goods, when they are severed from wisdom and exchanged with one another, is a shadow of virtue only, nor is there any freedom or health or truth in her; but in the true exchange there is a purging away of all these things, and temperance, and justice, and courage, and wisdom herself, are a purgation of them. And I conceive that the founders of the mysteries had a real meaning and were not mere triflers when they intimated in a figure long ago that he who passed unsanctified and uninitiated into the world below will live in a slough, but that he who ar-

rives there after initiation and purification will dwell with the gods. For "many," as they say in the mysteries, "are the thyrsus-bearers, but few are the mystics," — meaning, as I interpret the words, the true philosophers. In the number of whom I have been seeking, according to my ability, to find a place during my whole life; whether I have sought in a right way or not, and whether I have succeeded or not. I shall truly know in a little while, if God will, when I myself arrive in the other world: that is my belief. And now Simmias and Cebes, I have answered those who charge me with not grieving or repining at parting from you and my masters in this world; and I am right in not repining, for I believe that I shall find other masters and friends who are as good in the world below. But all men cannot receive this, and I shall be glad if my words have any more success with you than with the judges of Athenians.

Cebes answered: I agree, Socrates, in the greater part of
70 what you say. But in what relates to the soul, men are apt to be incredulous; they fear that when she leaves the body her place may be nowhere, and that on the very day of death she may be destroyed and perish, — immediately on her release from the body, issuing forth like smoke or air and vanishing away into nothingness. For if she could only hold together and be herself after she was released from the evils of the body, there would be good reason to hope, Socrates, that what you say is true. But much persuasion and many arguments are required in order to prove that when the man is dead the soul yet exists, and has any force or intelligence.

True, Cebes, said Socrates; and shall I suggest that we talk a little of the probabilities of these things?

I am sure, said Cebes, that I should greatly like to know your opinion about them.

I reckon, said Socrates, that no one who heard me now, not even if he were one of my old enemies, the comic poets, could accuse me of idle talking about matters in which I have no concern. Let us then, if you please, proceed with the inquiry.

Whether the souls of men after death are or are not in the world below, is a question which may be argued in this manner. The ancient doctrine of which I have been speaking affirms that they go from heuce into the other world, and return hither, and are born from the dead. Now if this be true, and the living come from the dead, then our souls must be in the other

world, for if not, how could they be born again? And this would be conclusive, if there were any real evidence that the living are only born from the dead; but if there is no evidence of this, then other arguments will have to be adduced.

That is very true, replied Cebes.

Then let us consider this question, not in relation to man only, but in relation to animals generally, and to plants, and to everything of which there is generation, and the proof will be easier. Are not all things which have opposites generated out of their opposites? I mean such things as good and evil, just and unjust — and there are innumerable other opposites which are generated out of opposites. And I want to show that this holds universally of all opposites; I mean to say, for example, that anything which becomes greater must become greater after being less.

True.

And that which becomes less must have been once greater and then become less. 71

Yes.

And the weaker is generated from the stronger, and the swifter from the slower.

Very true.

And the worse is from the better, and the more just is from the more unjust?

Of course.

And is this true of all opposites? and are we convinced that all of them are generated out of opposites?

Yes.

And in this universal opposition of all things, are there not also two intermediate processes which are ever going on, from one to the other, and back again; where there is a greater and a less there is also an intermediate process of increase and diminution, and that which grows is said to wax, and that which decays to wane?

Yes, he said.

And there are many other processes, such as division and composition, cooling and heating, which equally involve a passage into and out of one another. And this holds of all opposites, even though not always expressed in words — they are generated out of one another, and there is a passing or process from one to the other of them?

Very true, he replied.

Well, and is there not an opposite of life, as sleep is the opposite of waking?

True, he said.

And what is that?

Death, he answered.

And these then are generated, if they are opposites, the one from the other, and have there their two intermediate processes also?

Of course.

Now, said Socrates, I will analyze one of the two pairs of opposites which I have mentioned to you, and also its intermediate processes, and you shall analyze the other to me. The state of sleep is opposed to the state of waking, and out of sleeping waking is generated, and out of waking, sleeping; and the process of generation is in the one case falling asleep, and in the other waking up. Are you agreed about that?

Quite agreed.

Then, suppose that you analyze life and death to me in the same manner. Is not death opposed to life?

Yes.

And they are generated one from the other?

Yes.

What is generated from life?

Death.

And what from death?

I can only say in answer — life.

Then the living, whether things or persons, Cebes, are generated from the dead?

That is clear, he replied.

Then the inference is that our souls are in the world below?

That is true.

And one of the two processes or generations is visible — for surely the act of dying is visible?

Surely, he said.

And may not the other be inferred as the complement of nature, who is not to be supposed to go on one leg only? And if not, a corresponding process of generation in death must also be assigned to her?

Certainly, he replied.

And what is that process?

Revival.

72 And revival, if there be such a thing, is the birth of the dead into the world of the living?

Quite true.

Then here is a new way in which we arrive at the inference that the living come from the dead, just as the dead come from the living; and if this is true, then the souls of the dead must be in some place out of which they come again. And this, as I think, has been satisfactorily proved.

Yes, Socrates, he said; all this seems to flow necessarily out of our previous admissions.

And that these admissions were not unfair, Cebes, he said, may be shown, as I think, in this way: If generation were in a straight line only, and there were no compensation or circle in nature, no turn or return into one another, then you know that all things would at last have the same form and pass into the same state, and there would be no more generation of them.

What do you mean? he said.

A simple thing enough, which I will illustrate by the case of sleep, he replied. You know that if there were no compensation of sleeping and waking, the story of the sleeping Endymion would in the end have no meaning, because all other things would be asleep too, and he would not be thought of. Or if there were composition only, and no division of substances, then the chaos of Anaxagoras would come again. And in like manner, my dear Cebes, if all things which partook of life were to die, and after they were dead remained in the form of death, and did not come to life again, all would at last die, and nothing would be alive — how could this be otherwise? For if the living spring from any others who are not the dead, and they die, must not all things at last be swallowed up in death?

There is no escape from that, Socrates, said Cebes; and I think that what you say is entirely true.

Yes, he said, Cebes, I entirely think so too; and we are not walking in a vain imagination: but I am confident in the belief that there truly is such a thing as living again, and that the living spring from the dead, and that the souls of the dead are in existence, and that the good souls have a better portion than the evil.

Cebes added: Your favorite doctrine, Socrates, that knowledge is simply recollection, if true, also necessarily implies a previous time in which we learned that which we now recollect. But this would be impossible unless our soul was in some place before existing in the human form; here then is another argument of the soul's immortality.

But tell me, Cebes, said Simmias interposing, what proofs are given of this doctrine of recollection? I am not very sure at this moment that I remember them.

One excellent proof, said Cebes, is afforded by questions. If you put a question to a person in a right way, he will give a true answer of himself, but how could he do this unless there were knowledge and right reason already in him? And this is most clearly shown when he is taken to a diagram or to anything of that sort.

But if, said Socrates, you are still incredulous, Simmias, I would ask you whether you may not agree with me when you look at the matter in another way; I mean, if you are still incredulous as to whether knowledge is recollection?

Incredulous, I am not, said Simmias; but I want to have this doctrine of recollection brought to my own recollection, and, from what Cebes has said, I am beginning to recollect and be convinced: but I should still like to hear what more you have to say.

This is what I should say, he replied: We should agree, if I am not mistaken, that what a man recollects he must have known at some previous time.

Very true.

And what is the nature of this recollection? And, in asking this, I mean to ask, whether when a person has already seen or heard or in any way perceived anything, and he knows not only that, but something else of which he has not the same but another knowledge, we may not fairly say that he recollects that which comes into his mind. Are we agreed about that?

What do you mean?

I mean what I may illustrate by the following instance: The knowledge of a lyre is not the same as the knowledge of a man?

True.

And yet what is the feeling of lovers when they recognize a lyre, or a garment, or anything else which the beloved has been in the habit of using? Do not they, from knowing the lyre, form in the mind's eye an image of the youth to whom the lyre belongs? And this is recollection: and in the same way any one who sees Simmias may remember Cebes; and there are endless other things of the same nature.

Yes, indeed, there are — endless, replied Simmias.

And this sort of thing, he said, is recollection, and is most

commonly a process of recovering that which has been forgotten through time and inattention.

Very true, he said.

Well; and may you not also from seeing the picture of a horse or a lyre remember a man? and from the picture of Simmias, you may be led to remember Cebes?

True.

Or you may also be led to the recollection of Simmias himself? 74

True, he said.

And in all these cases, the recollection may be derived from things either like or unlike?

That is true.

And when the recollection is derived from like things, then there is sure to be another question, which is, Whether the likeness of that which is recollected is in any way defective or not?

Very true, he said.

And shall we proceed a step further, and affirm that there is such a thing as equality, not of wood with wood, or of stone with stone, but that, over and above this, there is equality in the abstract? Shall we affirm this?

Affirm, yes, and swear to it, replied Simmias, with all the confidence in life.

And do we know the nature of this abstract essence?

To be sure, he said.

And whence did we obtain this knowledge? Did we not see equalities of material things, such as pieces of wood and stones, and gather from them the idea of an equality which is different from them? — you will admit that? Or look at the matter again in this way: Do not the same pieces of wood or stone appear at one time equal, and at another time unequal?

That is certain.

But are real equals ever unequal? or is the idea of equality ever inequality?

That surely was never yet known, Socrates.

Then these (so-called) equals are not the same with the idea of equality?

I should say, clearly not, Socrates.

And yet from these equals, although differing from the idea of equality, you conceived and attained that idea?

Very true, he said.

Which might be like, or might be unlike them?

Yes.

But that makes no difference: whenever from seeing one thing you conceived another, whether like or unlike, there must surely have been an act of recollection?

Very true.

But what would you say of eqnal portions of wood and stone, or other material equals? and what is the impression produced by them? Are they equals in the same sense as absolute equality? or do they fall short of this in a measure?

Yes, he said, in a very great measure too.

And must we not allow, that when I or any one look at any object, and perceive that the object aims at being some other thing, but falls short of, and cannot attain to it, — he who makes this observation must have had a previous knowledge of that to which, as he says, the other, although similar, was inferior?

Certainly.

And has not this been our own case in the matter of equals and of absolute eqnality?

Precisely.

75 Then we must have known absolute equality previously to the time when we first saw the material equals, and reflected that all these apparent equals aim at this absolute equality, but fall short of it?

That is true.

And we recognize also that this absolute equality has only been known, and can only be known, through the medium of sight or touch, or of some other sense. And this I would affirm of all such conceptions.

Yes, Socrates, as far as the argument is concerned, one of them is the same as the other.

And from the senses then is derived the knowledge that all sensible things aim at an idea of equality of which they fall short — is not that true?

Yes.

Then before we began to see or hear or perceive in any way, we must have had a knowledge of absolute equality, or we could not have referred to that the equals which are derived from the senses? — for to that they all aspire, and of that they fall short?

That, Socrates, is certainly to be inferred from the previous statements.

And did we not see and hear and acquire our other senses as soon as we were born?

Certainly.

Then we must have acquired the knowledge of the ideal equal at some time previous to this?

Yes.

That is to say, before we were born, I suppose?

True.

And if we acquired this knowledge before we were born, and were born having it, then we also knew before we were born and at the instant of birth not only the equal or the greater or the less, but all other ideas; for we are not speaking only of equality absolute, but of beauty, good, justice, holiness, and all which we stamp with the name of essence in the dialectical process, when we ask and answer questions. Of all this we may certainly affirm that we acquired the knowledge before birth?

That is true.

But if, after having acquired, we have not forgotten that which we acquired, then we must always have been born with knowledge, and shall always continue to know as long as life lasts — for knowing is the acquiring and retaining knowledge and not forgetting. Is not forgetting, Simmias, just the losing of knowledge?

Quite true, Socrates.

But if the knowledge which we acquired before birth was lost by us at birth, and if afterwards by the use of the senses we recovered that which we previously knew, will not that which we call learning be a process of recovering our knowledge, and may not this be rightly termed recollection by us?

Very true.

For this is clear, that when we perceived something, either by the help of sight, or hearing, or some other sense, there 76
was no difficulty in receiving from this a conception of some other thing like or unlike which had been forgotten and which was associated with this; and therefore, as I was saying, one of two alternatives follows: either we had this knowledge at birth, and continued to know through life; or, after birth, those who are said to learn only remember, and learning is recollection only.

Yes, that is quite true, Socrates.

And which alternative, Simmias, do you prefer? Had we the knowledge at our birth, or did we remember afterwards the things which we knew previously to our birth?

I cannot decide at the moment.

At any rate you can decide whether he who has knowledge ought or ought not to be able to give a reason for what he knows.

Certainly, he ought.

But do you think that every man is able to give a reason about these very matters of which we are speaking?

I wish that they could, Socrates, but I greatly fear that to-morrow at this time there will be no one able to give a reason worth having.

Then you are not of opinion, Simmias that all men know these things?

Certainly not.

Then they are in process of recollecting that which they learned before?

Certainly.

But when did our souls acquire this knowledge? — not since we were born as men?

Certainly not.

And therefore, previously?

Yes.

Then, Simmias, our souls must have existed before they were in the form of man — without bodies, and must have had intelligence?

Unless indeed you suppose, Socrates, that these notions were given us at the moment of birth; for this is the only time that remains.

Yes, my friend, but when did we lose them? for they are not in us when we are born — that is admitted. Did we lose them at the moment of receiving them, or at some other time?

No, Socrates, I perceive that I was unconsciously talking nonsense.

Then may we not say, Simmias, that if, as we are always repeating, there is an absolute beauty, and goodness, and essence in general, and to this, which is now discovered to be a previous condition of our being, we refer all our sensations, and with this compare them — assuming this to have a prior existence, then our souls must have had a prior existence, but if not, there would be no force in the argument. There can be no doubt that if these absolute ideas existed before we were born, then our souls must have existed before we were born, and if not the ideas, then not the souls.

Yes, Socrates; I am convinced that there is precisely the same necessity for the existence of the soul before birth, and of the essence of which you are speaking: and the argument arrives at a result which happily agrees with my own notion. For there is nothing which to my mind is so evident as that beauty, good, and other notions of which you were just now speaking, have a most real and absolute existence; and I am satisfied with the proof. 77

Well, but is Cebes equally satisfied? for I must convince him too.

I think, said Simmias, that Cebes is satisfied: although he is the most incredulous of mortals, yet I believe that he is convinced of the existence of the soul before birth. But that after death the soul will continue to exist is not yet proven even to my own satisfaction. I cannot get rid of the feeling of the many to which Cebes was referring — the feeling that when the man dies the soul may be scattered, and that this may be the end of her. For admitting that she may be generated and created in some other place, and may have existed before entering the human body, why after having entered in and gone out again may she not herself be destroyed and come to an end?

Very true, Simmias, said Cebes; that our soul existed before we were born was the first half of the argument, and this appears to have been proven; that the soul will exist after death as well as before birth is the other half of which the proof is still wanting, and has to be supplied.

But that proof, Simmias and Cebes, has been already given, said Socrates, if you put the two arguments together — I mean this and the former one, in which we admitted that everything living is born of the dead. For if the soul existed before birth, and in coming to life and being born can be born only from death and dying, must she not after death continue to exist, since she has to be born again? surely the proof which you desire has been already furnished. Still I suspect that you and Simmias would be glad to probe the argument further; like children, you are haunted with a fear that when the soul leaves the body, the wind may really blow her away and scatter her; especially if a man should happen to die in stormy weather and not when the sky is calm.

Cebes answered with a smile: Then, Socrates, you must argue us out of our fears — and yet, strictly speaking, they are not our fears, but there is a child within us to whom death is a sort

of hobgoblin; him too we must persuade not to be afraid when he is alone with him in the dark.

Socrates said: Let the voice of the charmer be applied daily until you have charmed him away.

And where shall we find a good charmer of our fears, Socrates, when you are gone?

78 Hellas, he replied, is a large place, Cebes, and has many good men, and there are barbarous races not a few: seek for him among them all, far and wide, sparing neither pains nor money; for there is no better way of using your money. And you must not forget to seek for him among yourselves too; for he is nowhere more likely to be found.

The search, replied Cebes, shall certainly be made. And now, if you please, let us return to the point of the argument at which we digressed.

By all means, replied Socrates; what else should I please?

Very good, he said.

Must we not, said Socrates, ask ourselves some question of this sort? — What is that which, as we imagine, is liable to be scattered away, and about which we fear? and what again is that about which we have no fear? And then we may proceed to inquire whether that which suffers dispersion is or is not of the nature of soul — our hopes and fears as to our own souls will turn upon that.

That is true, he said.

Now the compound or composite may be supposed to be naturally capable of being dissolved in like manner as of being compounded; but that which is uncompounded, and that only, must be, if anything is, indissoluble.

Yes; that is what I should imagine, said Cebes.

And the uncompounded may be assumed to be the same and unchanging, whereas the compound is always changing and never the same?

That I also think, he said.

Then now let us return to the previous discussion. Is that idea or essence, which in the dialectical process we define as essence or true existence — whether essence of equality, beauty, or anything else: are these essences, I say, liable at times to some degree of change? or are they each of them always what they are, having the same simple self-existent and unchanging forms, and not admitting of variation at all, or in any way, or at any time?

They must be always the same, Socrates, replied Cebes.

And what would you say of the many beautiful — whether men or horses or garments or any other things which may be called equal or beautiful, — are they all unchanging and the same always, or quite the reverse? May they not rather be described as almost always changing and hardly ever the same, either with themselves or with one another?

The latter, replied Cebes; they are always in a state of change.

And these you can touch and see and perceive with the senses, but the unchanging things you can only perceive with the mind — they are invisible and are not seen? 79

That is very true, he said.

Well then, he added, let us suppose that there are two sorts of existences, one seen, the other unseen.

Let us suppose them.

The seen is the changing, and the unseen is the unchanging? That may be also supposed.

And, further, is not one part of us body, and the rest of us soul?

To be sure.

And to which class may we say that the body is more alike and akin?

Clearly to the seen: no one can doubt that.

And is the soul seen or not seen?

Not by man, Socrates.

And by "seen" and "not seen" is meant by us that which is or is not visible to the eye of man?

Yes, to the eye of man.

And what do we say of the soul? is that seen or not seen?

Not seen.

Unseen then?

Yes.

Then the soul is more like to the unseen, and the body to the seen?

That is most certain, Socrates.

And were we not saying long ago that the soul when using the body as an instrument of perception, that is to say, when using the sense of sight or hearing or some other sense (for the meaning of perceiving through the body is perceiving through the senses), — were we not saying that the soul too is then dragged by the body into the region of the changeable, and wanders and is confused; the world spins round her, and she is like a drunkard when under their influence

Very true.

But when returning into herself she reflects; then she passes into the realm of purity, and eternity, and immortality, and unchangeableness, which are her kindred, and with them she ever lives, when she is by herself and is not let or hindered; then she ceases from her erring ways, and being in communion with the unchanging is unchanging. And this state of the soul is called wisdom?

That is well and truly said, Socrates, he replied.

And to which class is the soul more nearly alike and akin, as far as may be inferred from this argument, as well as from the preceding one?

I think, Socrates, that, in the opinion of every one who follows the argument, the soul will be infinitely more like the unchangeable, — even the most stupid person will not deny that.

And the body is more like the changing?

Yes.

Yet once more consider the matter in this light: When the soul and the body are united, then nature orders the soul to rule and govern, and the body to obey and serve. Now
80 which of these two functions is akin to the divine? and which to the mortal? Does not the divine appear to you to be that which naturally orders and rules, and the mortal that which is subject and servant?

True.

And which does the soul resemble?

The soul resembles the divine, and the body the mortal, — there can be no doubt of that, Socrates.

Then reflect, Cebes: is not the conclusion of the whole matter this, — that the soul is in the very likeness of the divine, and immortal, and intelligible, and uniform, and indissoluble, and unchangeable; and the body is in the very likeness of the human, and mortal, and unintelligible, and multiform, and dissoluble, and changeable. Can this, my dear Cebes, be denied?

No indeed.

But if this is true, then is not the body liable to speedy dissolution? and is not the soul almost or altogether indissoluble?

Certainly.

And do you further observe, that after a man is dead, the body, which is the visible part of man, and has a visible framework, which is called a corpse, and which would naturally be dissolved and decomposed and dissipated, is not dissolved or de-

composed at once, but may remain for a good while, if the constitution be sound at the time of death, and the season of the year favorable? For the body when shrunk and embalmed, as is the custom in Egypt, may remain almost entire through infinite ages; and even in decay, still there are some portions, such as the bones and ligaments, which are practically indestructible. You allow that?

Yes.

And are we to suppose that the soul, which is invisible, in passing to the true Hades, which like her is invisible, and pure, and noble, and on her way to the good and wise God, whither, if God will, my soul is also soon to go, — that the soul, I repeat, if this be her nature and origin, is blown away and perishes immediately on quitting the body, as the many say? That can never be, my dear Simmias and Cebes. The truth rather is, that the soul which is pure at departing draws after her no bodily taint, having never voluntarily had connection with the body, which she is ever avoiding, herself gathered into herself (for such abstraction has been the study of her life). And what does this mean but that she has been a true disciple of philosophy, and has practiced how to die easily? And is not philosophy the practice of death?

81

Certainly.

That soul, I say, herself invisible, departs to the invisible world, — to the divine and immortal and rational: thither arriving, she lives in bliss and is released from the error and folly of men, their fears and wild passions and all other human ills, and forever dwells, as they say of the initiated, in company with the gods? Is not this true, Cebes?

Yes, said Cebes, beyond a doubt.

But the soul which has been polluted, and is impure at the time of her departure, and is the companion and servant of the body always, and is in love with and fascinated by the body and by the desires and pleasures of the body, until she is led to believe that the truth only exists in a bodily form, which a man may touch and see and taste and use for the purposes of his lusts, — the soul, I mean, accustomed to hate and fear and avoid the intellectual principle, which to the bodily eye is dark and invisible, and can be attained only by philosophy; do you suppose that such a soul as this will depart pure and unalloyed?

That is impossible, he replied.

She is engrossed by the corporeal, which the continual association and constant care of the body have made natural to her.

Very true.

And this, my friend, may be conceived to be that heavy, weighty, earthy element of sight by which such a soul is depressed and dragged down again into the visible world, because she is afraid of the invisible and of the world below — prowling about tombs and sepulchres, in the neighborhood of which, as they tell us, are seen certain ghostly apparitions of souls which have not departed pure, but are cloyed with sight and therefore visible.[1]

That is very likely, Socrates.

Yes, that is very likely, Cebes; and these must be the souls, not of the good, but of the evil, who are compelled to wander about such places in payment of the penalty of their former evil way of life; and they continue to wander until the desire which haunts them is satisfied and they are imprisoned in another body. And they may be supposed to be fixed in the same natures which they had in their former life.

What natures do you mean, Socrates?

I mean to say that men who have followed after gluttony, and wantonness, and drunkenness, and have had no thought of avoiding them, would pass into asses and animals of that sort. What do you think?

I think that exceedingly probable.

82 And those who have chosen the portion of injustice, and tyranny, and violence, will pass into wolves, or hawks and kites; whither else can we suppose them to go?

Yes, said Cebes; that is doubtless the place of natures such as theirs.

And there is no difficulty, he said, in assigning to all of them places answering to their several natures and propensities?

There is not, he said.

[1] Compare Milton, *Comus*, 463 foll.: —

"But when lust,
By unchaste looks, loose gestures, and foul talk,
But most by lewd and lavish act of sin,
Lets in defilement to the inward parts,
The soul grows clotted by contagion,
~~Imbodies, and imbrutes, till she quite~~ lose
The divine property of her first being.
Such are those thick and gloomy shadows damp
Oft seen in charnel vaults and sepulchres,
Lingering, and sitting by a new made grave,
As loath to leave the body that it loved,
And linked itself by carnal sensuality
To a degenerate and degraded state."

Even among them some are happier than others; and the happiest both in themselves and their place of abode are those who have practiced the civil and social virtues which are called temperance and justice, and are acquired by habit and attention without philosophy and mind.

Why are they the happiest?

Because they may be expected to pass into some gentle social nature which is like their own, such as that of bees or ants, or even back again into the form of man, and just and moderate men spring from them.

That is not impossible.

But he who is a philosopher or lover of learning, and is entirely pure at departing, is alone permitted to reach the gods. And this is the reason, Simmias and Cebes, why the true votaries of philosophy abstain from all fleshly lusts, and endure and refuse to give themselves up to them, — not because they fear poverty or the ruin of their families, like the lovers of money, and the world in general; nor like the lovers of power and honor, because they dread the dishonor or disgrace of evil deeds.

No, Socrates, that would not become them, said Cebes.

No indeed, he replied; and therefore they who have a care of their souls, and do not merely live in the fashions of the body, say farewell to all this; they will not walk in the ways of the blind: and when Philosophy offers them purification and release from evil, they feel that they ought not to resist her influence, and to her they incline, and whither she leads they follow her.

What do you mean, Socrates?

I will tell you, he said. The lovers of knowledge are conscious that their souls, when philosophy receives them, are simply fastened and glued to their bodies: the soul is only able to view existence through the bars of a prison, and not in her own nature; she is wallowing in the mire of all ignorance; and philosophy, seeing the terrible nature of her confinement, and that the captive through desire is led to conspire in her own captivity (for the lovers of knowledge are aware that this was the original state of the soul, and that when she was in this state philosophy received and gently counseled her, and wanted to release her, pointing out to her that the eye is full of deceit, and also the ear and the other senses, and persuading her to retire from them in all but the necessary use of them, and to be gathered up and collected into herself, and to trust

83

only to herself and her own intuitions of absolute existence, and mistrust that which comes to her through others and is subject to vicissitude) — philosophy shows her that this is visible and tangible, but that what she sees in her own nature is intellectual and invisible. And the soul of the true philosopher thinks that she ought not to resist this deliverance, and therefore abstains from pleasures and desires and pains and fears, as far as she is able; reflecting that when a man has great joys or sorrows or fears or desires, he suffers from them, not the sort of evil which might be anticipated — as for example, the loss of his health or property which he has sacrificed to his lusts — but he has suffered an evil greater far, which is the greatest and worst of all evils, and one of which he never thinks.

And what is that, Socrates? said Cebes.

Why this: When the feeling of pleasure or pain in the soul is most intense, all of us naturally suppose that the object of this intense feeling is then plainest and truest: but this is not the case.

Very true.

And this is the state in which the soul is most inthralled by the body.

How is that?

Why, because each pleasure and pain is a sort of nail which nails and rivets the soul to the body, and engrosses her and makes her believe that to be true which the body affirms to be true; and from agreeing with the body and having the same delights she is obliged to have the same habits and ways, and is not likely ever to be pure at her departure to the world below, but is always saturated with the body; so that she soon sinks into another body and there germinates and grows, and has therefore no part in the communion of the divine and pure and simple.

That is most true, Socrates, answered Cebes.

And this, Cebes, is the reason why the true lovers of knowledge are temperate and brave; and not for the reason which the world gives.

Certainly not.

84 Certainly not! For not in that way does the soul of a philosopher reason; she will not ask philosophy to release her in order that when released she may deliver herself up again to the thralldom of pleasures and pains, doing a work only to be undone again, weaving instead of unweaving her Penelope's

web. But she will make herself a calm of passion, and follow Reason, and dwell in her, beholding the true and divine (which is not matter of opinion), and thence derive nourishment. Thus she seeks to live wh le she lives, and after death she hopes to go to her own kindred and to be freed from human ills. Never fear, Simmias and Cebes, that a soul which has been thus nurtured and has had these pursuits, will at her departure from the body be scattered and blown away by the winds and be nowhere and nothing.

When Socrates had done speaking, for a considerable time there was silence; he himself and most of us appeared to be meditating on what had been said; only Cebes and Simmias spoke a few words to one another. And Socrates observing this asked them what they thought of the argument, and whether there was anything wanting? For, said he, much is still open to suspicion and attack, if any one were disposed to sift the matter thoroughly. If you are talking of something else I would rather not interrupt you, but if you are still doubtful about the argument do not hesitate to say exactly what you think, and let us have anything better which you can suggest; and if I am likely to be of any use, allow me to help you.

Simmias said: I must confess, Socrates, that doubts did arise in our minds, and each of us was urging and inciting the other to put the question which we wanted to have answered and which neither of us liked to ask, fearing that our importunity might be troublesome under present circumstances.

Socrates smiled, and said: O Simmias, how strange that is; I am not very likely to persuade other men that I do not regard my present situation as a misfortune, if I am unable to persuade you, and you will keep fancying that I am at all more troubled now than at any other time. Will you not allow that I have as much of the spirit of prophecy in me as the swans? For they, when they perceive that they must die, having sung all their life long, do then sing more than ever, rejoicing in the thought 85
that they are about to go away to the god whose ministers they are. But men, because they are themselves afraid of death, slanderously affirm of the swans that they sing a lament at the last, not considering that no bird sings when cold, or hungry, or in pain, not even the nightingale, nor the swallow, nor yet the hoopoe; which are said indeed to tune a lay of sorrow, although I do not believe this to be true of them any more than of the swans. But because they are sacred to Apollo and have the

gift of prophecy and anticipate the good things of another world, therefore they sing and rejoice in that day more than they ever did before. And I too, believing myself to be the consecrated servant of the same God, and the fellow-servant of the swans, and thinking that I have received from my master gifts of prophecy which are not inferior to theirs, would not go out of life less merrily than the swans. Cease to mind then about this, but speak and ask anything which you like, while the eleven magistrates of Athens allow.

Well, Socrates, said Simmias, then I will tell you my difficulty, and Cebes will tell you his. For I dare say that you, Socrates, feel as I do, how very hard or almost impossible is the attainment of any certainty about questions such as these in the present life. And yet I should deem him a coward who did not prove what is said about them to the uttermost, or whose heart failed him before he had examined them on every side. For he should persevere until he has attained one of two things: either he should discover or learn the truth about them; or, if this is impossible, I would have him take the best and most irrefragable of human notions, and let this be the raft upon which he sails through life — not without risk, as I admit, if he cannot find some word of God which will more surely and safely carry him. And now, as you bid me, I will venture to question you, as I should not like to reproach myself hereafter with not having said at the time what I think. For when I consider the matter either alone or with Cebes, the argument does certainly appear to me, Socrates, to be not sufficient.

Socrates answered: I dare say, my friend, that you may be right, but I should like to know in what respect the argument is not sufficient.

In this respect, replied Simmias: Might not a person use the same argument about harmony and the lyre — might he not say that harmony is a thing invisible, incorporeal, fair, divine, abiding in the lyre which is harmonized, but that the lyre and the strings are matter and material, composite, earthy, and akin to mortality? And when some one breaks the lyre, or cuts and rends the strings, then he who takes this view would argue as you do, and on the same analogy, that the harmony survives and has not perished; for you cannot imagine, as he would say, that the lyre without the strings, and the broken strings themselves remain, and yet that the harmony, which is of heavenly and immortal nature and kindred, has perished — and

86

perished too before the mortal. That harmony, he would say, certainly exists somewhere, and the wood and strings will decay before that decays. For I suspect, Socrates, that the notion of the soul which we are all of us inclined to entertain, would also be yours, and that you too would conceive the body to be strung up, and held together, by the elements of hot and cold, wet and dry, and the like, and that the soul is the harmony or due proportionate admixture of them. And, if this is true, the inference clearly is, that when the strings of the body are unduly loosened or overstrained through disorder or other injury, then the soul, though most divine, like other harmonies of music or of the works of art, of course perishes at once; although the material remains of the body may last for a considerable time, until they are either decayed or burnt. Now if any one maintained that the soul, being the harmony of the elements of the body, first perishes in that which is called death, how shall we answer him?

Socrates looked round at us as his manner was, and said with a smile: Simmias has reason on his side; and why does not some one of you who is abler than myself answer him? for there is force in his attack upon me. But perhaps, before we answer him, we had better also hear what Cebes has to say against the argument — this will give us time for reflection, and when both of them have spoken, we may either assent to them, if their words appear to be in consonance with the truth, or if not, we may take up the other side, and argue with them. Please to tell me then, Cebes, he said, what was the difficulty which troubled you?

Cebes said: I will tell you. My feeling is that the argument is still in the same position, and open to the same objections which were urged before; for I am ready to admit that the existence of the soul before entering into the bodily form 87 has been very ingeniously, and, as I may be allowed to say, quite sufficiently proven; but the existence of the soul after death is still, in my judgment unproven. Now my objection is not the same as that of Simmias; for I am not disposed to deny that the soul is stronger and more lasting than the body, being of opinion that in all such respects the soul very far excels the body. Well then, says the argument to me, why do you remain unconvinced? When you see that the weaker is still in existence after the man is dead, will you not admit that the more lasting must also survive during the same period of time? Now I, like Simmias, must employ a figure; and I shall ask

you to consider whether the figure is to the point. The parallel which I will suppose is that of an old weaver, who dies, and after his death somebody says: He is not dead, he must be alive: and he appeals to the coat which he himself wove and wore, and which is still whole and undecayed. And then he proceeds to ask of some one who is incredulous, whether a man lasts longer, or the coat which is in use and wear; and when he is answered that a man lasts far longer, thinks that he has thus certainly demonstrated the survival of the man, who is the more lasting, because the less lasting remains. But that, Simmias, as I would beg you to observe, is not the truth; every one sees that he who talks thus is talking nonsense. For the truth is, that this weaver, having worn and woven many such coats, though he outlived several of them, was himself outlived by the last; but this is surely very far from proving that a man is slighter and weaker than a coat. Now the relation of the body to the soul may be expressed in a similar figure; for you may say with reason that the soul is lasting, and the body weak and shortlived in comparison. And every soul may be said to wear out many bodies, especially in the course of a long life. For if while the man is alive the body deliquesces and decays, and yet the soul always weaves her garment anew and repairs the waste, then of course, when the soul perishes, she must have on her last garment, and this only will survive her; but then again when the soul is dead, the body will at last show its native weakness, and soon pass into decay. And therefore this is an argument on which I would rather not rely as proving that the
88 soul exists after death. For suppose that we grant even more than you affirm as within the range of possibility, and besides acknowledging that the soul existed before birth, admit also that after death the souls of some are existing still, and will exist, and will be born and die again and again, and that there is a natural strength in the soul which will hold out and be born many times — for all this, we may be still inclined to think that she will weary in the labors of successive births, and may at last succumb in one of her deaths and utterly perish; and this death and dissolution of the body which brings destruction to the soul may be unknown to any of us, for no one of us can have had any experience of it: and if this be true, then I say that he who is confident in death has but a foolish confidence, unless he is able to prove that the soul is altogether immortal and imperishable. But if he is not able

to prove this, he who is about to die will always have reason to fear that when the body is disunited, the soul also may utterly perish.

All of us, as we afterwards remarked to one another, had an unpleasant feeling at hearing them say this. When we had been so firmly convinced before, now to have our faith shaken seemed to introduce a confusion and uncertainty, not only into the previous argument, but into any future one; either we were not good judges, or there were no real grounds of belief.

Ech. There I feel with you — indeed I do, Phaedo, and when you were speaking, I was beginning to ask myself the same question: What argument can I ever trust again? For what could be more convincing than the argument of Socrates, which has now fallen into discredit? That the soul is a harmony is a doctrine which has always had a wonderful attraction for me, and, when mentioned, came back to me at once, as my own original conviction. And now I must begin again and find another argument which will assure me that when the man is dead the soul dies not with him, Tell me, I beg, how did Socrates proceed? Did he appear to share the unpleasant feeling which you mention? or did he receive the interruption calmly and give a sufficient answer? Tell us, as exactly as you can, what passed.

Phaed. Often, Echecrates, as I have admired Socrates, I never admired him more than at that moment. That he 89
should be able to answer was nothing, but what astonished me was, first, the gentle and pleasant and approving manner in which he regarded the words of the young men, and then his quick sense of the wound which had been inflicted by the argument, and his ready application of the healing art. He might be compared to a general rallying his defeated and broken army, urging them to follow him and return to the field of argument.

Ech. How was that?

Phaed. You shall hear, for I was close to him on his right hand, seated on a sort of stool, and he on a couch which was a good deal higher. Now he had a way of playing with my hair, and then he smoothed my head, and pressed the hair upon my neck, and said: To-morrow, Phaedo, I suppose that these fair locks of yours will be severed.

Yes, Socrates, I suppose that they will, I replied.

Not so, if you will take my advice.

What shall I do with them? I said.

To-day, he replied, and not to-morrow, if this argument dies and cannot be brought to life again by us, you and I will both shave our locks: and if I were you, and could not maintain my ground against Simmias and Cebes, I would myself take an oath, like the Argives, not to wear hair any more until I had renewed the conflict and defeated them.

Yes, I said, but Heracles himself is said not to be a match for two.

Summon me then, he said, and I will be your Iolaus until the sun goes down.

I summon you rather, I said, not as Heracles summoning Iolaus, but as Iolaus might summon Heracles.

That will be all the same, he said. But first let us take care that we avoid a danger.

And what is that? I said.

The danger of becoming misologists, he replied, which is one of the very worst things that can happen to us. For as there are misanthropists or haters of men, there are also misologists or haters of ideas, and both spring from the same cause, which is ignorance of the world. Misanthropy arises from the too great confidence of inexperience; you trust a man and think him altogether true and good and faithful, and then in a little while he turns out to be false and knavish; and then another and another, and when this has happened several times to a man, especially within the circle of his own most trusted friends, as he deems them, and he has often quarreled with them, he at last hates all men, and believes that no one has any good in him at all. I dare say that you must have observed this.

Yes, I said.

And is not this discreditable? The reason is, that a man, having to deal with other men, has no knowledge of them; for
90 if he had knowledge, he would have known the true state of the case, that few are the good and few the evil, and that the great majority are in the interval between them.

How do you mean? I said.

I mean, he replied, as you might say of the very large and very small, that nothing is more uncommon than a very large or very small man; and this applies generally to all extremes, whether of great and small, or swift and slow, or fair and foul, or black and white: and whether the instances you select be

men or dogs or anything else, few are the extremes, but many are in the mean between them. Did you never observe this?

Yes, I said, I have.

And do you not imagine, he said, that if there were a competition of evil, the first in evil would be found to be very few?

Yes, that is very likely, I said.

Yes, that is very likely, he replied; not that in this respect arguments are like men — there I was led on by you to say more than I had intended; but the point of comparison was, that when a simple man who has no skill in dialectics believes an argument to be true which he afterward imagines to be false, whether really false or not, and then another and another, he has no longer any faith left, and great disputers, as you know, come to think at last that they have grown to be the wisest of mankind; for they alone perceive the utter unsoundness and instability of all arguments, or indeed, of all things, which, like the currents in the Euripus, are going up and down in never-ceasing ebb and flow.

That is quite true, I said.

Yes, Phaedo, he replied, and very melancholy too, if there be such a thing as truth or certainty or power of knowing at all, that a man should have lighted upon some argument or other which at first seemed true and then turned out to be false, and instead of blaming himself and his own want of wit, because he is annoyed, should at last be too glad to transfer the blame from himself to arguments in general; and forever afterwards should hate and revile them, and lose the truth and knowledge of existence.

Yes, indeed, I said; that is very melancholy.

Let us then, in the first place, he said, be careful of admitting into our souls the notion that there is no truth or health or soundness in any arguments at all; but let us rather say that there is as yet no health in us, and that we must quit ourselves like men and do our best to gain health, — you and all other men with a view to the whole of your future life, and I myself with a view to death. For at this moment I am 91
sensible that I have not the temper of a philosopher; like the vulgar, I am only a partisan. For the partisan, when he is engaged in a dispute, cares nothing about the rights of the question, but is anxious only to convince his hearers of his own assertions. And the difference between him and me at the present moment is only this, — that whereas he seeks to con-

vince his hearers that what he says is true, I am rather seeking to convince myself; to convince my hearers is a secondary matter with me. And do but see how much I gain by this. For if what I say is true, then I do well to be persuaded of the truth; but if there be nothing after death, still, during the short time that remains, I shall save my friends from lamentations, and my ignorance will not last, and therefore no harm will be done. This is the state of mind, Simmias and Cebes, in which I approach the argument. And I would ask you to be thinking of the truth and not of Socrates: agree with me, if I seem to you to be speaking the truth; or if not, withstand me might and main, that I may not deceive you as well as myself in my enthusiasm, and like the bee, leave my sting in you before I die.

And now let us proceed, he said. And first of all let me be sure that I have in my mind what you were saying. Simmias, if I remember rightly, has fears and misgivings whether the soul, being in the form of harmony, although a fairer and diviner thing than the body, may not perish first. On the other hand, Cebes appeared to grant that the soul was more lasting than the body, but he said that no one could know whether the soul, after having worn out many bodies, might not perish herself and leave her last body behind her; and that this is death, which is the destruction not of the body but of the soul, for in the body the work of destruction is ever going on. Are not these, Simmias and Cebes, the points which we have to consider?

They both agreed to this statement of them.

He proceeded: And did you deny the force of the whole preceding argument, or of a part only?

Of a part only, they replied.

And what did you think, he said, of that part of the argument in which we said that knowledge was recollection only, and inferred from this that the soul must have previously existed somewhere else before she was inclosed in the body?

92 Cebes said that he had been wonderfully impressed by that part of the argument, and that his conviction remained unshaken. Simmias agreed, and added that he himself could hardly imagine the possibility of his ever thinking differently about that.

But, rejoined Socrates, you will have to think differently, my Theban friend, if you still maintain that harmony is a compound, and that the soul is a harmony which is made out of

strings set in the frame of the body; for you will surely never allow yourself to say that a harmony is prior to the elements which compose the harmony.

No, Socrates, that is impossible.

But do you not see that you *are* saying this when you say that the soul existed before she took the form and body of man, and was made up of elements which as yet had no existence? For harmony is not a sort of thing like the soul, as you suppose; but first the lyre, and the strings, and the sounds exist in a state of discord, and then harmony is made last of all, and perishes first. And how can such a notion of the soul as this agree with the other?

Not at all, replied Simmias.

And yet he said, there surely ought to be harmony when harmony is the theme of discourse.

There ought, replied Simmias.

But there is no harmony, he said, in the two propositions that knowledge is recollection, and that the soul is a harmony. Which of them then will you retain?

I think, he replied, that I have a much stronger faith, Socrates, in the first of the two, which has been fully demonstrated to me, than in the latter, which has not been demonstrated at all, but rests only on probable and plausible grounds; and I know too well that these arguments from probabilities are impostors, and unless great caution is observed in the use of them they are apt to be deceptive — in geometry, and in other things too. But the doctrine of knowledge and recollection has been proven to me on trustworthy grounds; and the proof was that the soul must have existed before she came into the body, because to her belongs the essence of which the very name implies existence. Having, as I am convinced, rightly accepted this conclusion, and on sufficient grounds, I must, as I suppose, cease to argue or allow others to argue that the soul is a harmony.

Let me put the matter, Simmias, he said, in another point of view: Do you imagine that a harmony or any other composition can be in a state other than that of the elements out 93
of which it is compounded?

Certainly not.

Or do or suffer anything other than they do or suffer?

He agreed.

Then a harmony does not lead the parts or elements which make up the harmony, but only follows them.

He assented.

For harmony cannot possibly have any motion, or sound, or other quality which is opposed to the parts.

That would be impossible, he replied.

And does not every harmony depend upon the manner in which the elements are harmonized?

I do not understand you, he said.

I mean to say that a harmony admits of degrees, and is more of a harmony, and more completely a harmony, when more completely harmonized, if that be possible; and less of a harmony, and less completely a harmony, when less harmonized.

True.

But does the soul admit of degrees? or is one soul in the very least degree more or less, or more or less completely, a soul than another.

Not in the least.

Yet surely one soul is said to have intelligence and virtue, and to be good, and another soul is said to have folly and vice, and to be an evil soul: and this is said truly?

Yes, truly.

But what will those who maintain the soul to be a harmony say of this presence of virtue and vice in the soul? — will they say that here is another harmony, and another discord, and that the virtuous soul is harmonized, and herself being harmony has another harmony within her, and that the vicious soul is inharmonical and has no harmony within her?

I cannot say, replied Simmias; but I suppose that something of that kind would be asserted by those who take this view.

And the admission is already made that no soul is more a soul than another; and this is equivalent to admitting that harmony is not more or less harmony, or more or less completely a harmony?

Quite true.

And that which is not more or less a harmony is not more or less harmonized.

True.

And that which is not more or less harmonized cannot have more or less of harmony, but only an equal harmony?

Yes, an equal harmony.

Then one soul not being more or less absolutely a soul than another, is not more or less harmonized?

Exactly.

And therefore has neither more nor less of harmony or of discord?

She has not.

And having neither more nor less of harmony or of discord, one soul has no more vice or virtue than another, if vice be discord and virtue harmony?

Not at all more.

Or speaking more correctly, Simmias, the soul, if she is a harmony, will never have any vice; because a harmony, being absolutely a harmony, has no part in the inharmonical. 94

No.

And therefore a soul which is absolutely a soul has no vice?

How can she have, consistently with the preceding argument?

Then, according to this, if the souls of all animals are equally and absolutely souls, they will be equally good?

I agree with you, Socrates, he said.

And can all this be true, think you? he said; and are all these consequences admissible — which nevertheless seem to follow from the assumption that the soul is a harmony?

Certainly not, he said.

Once more, he said, what ruling principle is there of human things other than the soul, and especially the wise soul? Do you know of any?

Indeed, I do not.

And is the soul in agreement with the affections of the body? or is she at variance with them? For example, when the body is hot and thirsty, does not the soul incline us against drinking? and when the body is hungry, against eating? And this is only one instance out of ten thousand of the opposition of the soul to the things of the body.

Very true.

But we have already acknowledged that the soul, being a harmony, can never utter a note at variance with the tensions and relaxations and vibrations and other affections of the strings out of which she is composed; she can only follow, she cannot lead them?

Yes, he said, we acknowledged that, certainly.

And yet do we not now discover the soul to be doing the exact opposite — leading the elements of which she is believed to be composed; almost always opposing and coercing them in all sorts of ways throughout life, sometimes more violently with the pains of medicine and gymnastic; then again more gently;

threatening and also reprimanding the desires, passions, fears, as if talking to a thing which is not herself, as Homer in the Odyssee represents Odysseus doing in the words, —

> "He beat his breast, and thus reproached his heart:
> Endure, my heart; far worse hast thou endured!"

Do you think that Homer could have written this under the idea that the soul is a harmony capable of being led by the affections of the body, and not rather of a nature which leads and masters them; and herself a far diviner thing than any harmony?

Yes, Socrates, I quite agree to that.

Then, my friend, we can never be right in saying that the soul is a harmony, for that would clearly contradict the divine
95 Homer as well as ourselves.

True, he said.

Thus much, said Socrates, of Harmonia, your Theban goddess, Cebes, who has not been ungracious to us, I think; but what shall I say to the Theban Cadmus, and how shall I propitiate him?

I think that you will discover a way of propitiating him, said Cebes; I am sure that you have answered the argument about harmony in a manner that I could never have expected. For when Simmias mentioned his objection, I quite imagined that no answer could be given to him, and therefore I was surprised at finding that his argument could not sustain the first onset of yours, and not impossibly the other, whom you call Cadmus, may share a similar fate.

Nay, my good friend, said Socrates, let us not boast, lest some evil eye should put to flight the word which I am about to speak. That, however, may be left in the hands of those above; while I draw near in Homeric fashion, and try the mettle of your words. Briefly, the sum of your objection is as follows: You want to have proven to you that the soul is imperishable and immortal, and you think that the philosopher who is confident in death has but a vain and foolish confidence, if he thinks that he will fare better than one who has led another sort of life, in the world below, unless he can prove this: and you say that the demonstration of the strength and divinity of the soul, and of her existence prior to our becoming men, does not necessarily imply her immortality. Granting that the soul is long-lived, and has known and done much in a former state,

still she is not on that account immortal; and her entrance into the human form may be a sort of disease which is the beginning of dissolution, and may at last, after the toils of life are over, end in that which is called death. And whether the soul enters into the body once only or many times, that, as you would say, makes no difference in the fears of individuals. For any man, who is not devoid of natural feeling, has reason to fear, if he has no knowledge or proof of the soul's immortality. That is what I suppose you to say, Cebes, which I designedly repeat, in order that nothing may escape us, and that you may, if you wish, add or subtract anything.

But, said Cebes, as far as I see at present, I have nothing to add or subtract; you have expressed my meaning.

Socrates paused a while, and seemed to be absorbed in reflection. At length he said: This is a very serious inquiry which you are raising, Cebes, involving the whole question of generation and corruption, about which I will, if you like, give you my own experience; and you can apply this, if you think that anything which I say will avail towards the solution of your difficulty. 96

I should very much like, said Cebes, to hear what you have to say.

Then I will tell you, said Socrates. When I was young, Cebes, I had a prodigious desire to know that department of philosophy which is called Natural Science; this appeared to me to have lofty aims, as being the science which has to do with the causes of things, and which teaches why a thing is, and is created and destroyed; and I was always agitating myself with the consideration of such questions as these: Is the growth of animals the result of some decay which the hot and cold principle contract, as some have said? Is the blood the element with which we think, or the air, or the fire? or perhaps nothing of this sort — but the brain may be the originating power of the perceptions of hearing and sight and smell, and memory and opinion may come from them, and science may be based on memory and opinion when no longer in motion, but at rest. And then I went on to examine the decay of them, and then to the things of heaven and earth, and at last I concluded that I was wholly incapable of these inquiries, as I will satisfactorily prove to you. For I was fascinated by them to such a degree that my eyes grew blind to things that I had seemed to myself, and also to others, to know quite well;

and I forgot what I had before thought to be self-evident, that the growth of man is the result of eating and drinking; for when by the digestion of food flesh is added to flesh and bone to bone, and whenever there is an aggregation of congenial elements, the lesser bulk becomes larger and the small man greater. Was not that a reasonable notion?

Yes, said Cebes, I think so.

Well; but let me tell you something more. There was a time when I thought that I understood the meaning of greater and less pretty well; and when I saw a great man standing by a little one, I fancied that one was taller than the other by a head; or one horse would appear to be greater than another horse: and still more clearly did I seem to perceive that ten is two more than eight, and that two cubits are more than one, because two is twice one.

And what is now your notion of such matters? said Cebes.

I should be far enough from imagining, he replied, that I knew the cause of any of them, indeed I should, for I cannot satisfy myself that when one is added to one, the one to which
97 the addition is made becomes two, or that the two units added together make two by reason of the addition. For I cannot understand how, when separated from the other, each of them was one and not two, and now, when they are brought together, the mere juxtaposition of them can be the cause of their becoming two: nor can I understand how the division of one is the way to make two; for then a different cause would produce the same effect, — as in the former instance the addition and juxtaposition of one to one was the cause of two, in this the separation and subtraction of one from the other would be the cause. Nor am I any longer satisfied that I understand the reason why one or anything else either is generated or destroyed or is at all, but I have in my mind some confused notion of another method, and can never admit this.

Then I heard some one who had a book of Anaxagoras, as he said, out of which he read that mind was the disposer and cause of all, and I was quite delighted at the notion of this, which appeared admirable, and I said to myself: If mind is the disposer, mind will dispose all for the best, and put each particular in the best place; and I argued that if any one desired to find out the cause of the generation or destruction or existence of anything, he must find out what state of being or suffering or doing was best for that thing, and therefore a man

had only to consider the best for himself and others, and then he would also know the worse, for that the same science comprised both. And I rejoiced to think that I had found in Anaxagoras a teacher of the causes of existence such as I desired, and I imagined that he would tell me first whether the earth is flat or round; and then he would further explain the cause and the necessity of this, and would teach me the nature of the best and show that this was best; and if he said that the earth was in the centre, he would explain that this position was the best, and I should be satisfied if this were shown to me, and not want any other sort of cause. And I 98 thought that I would then go on and ask him about the sun and moon and stars, and that he would explain to me their comparative swiftness, and their returnings and various states, and how their several affections, active and passive, were all for the best. For I could not imagine that when he spoke of mind as the disposer of them, he would give any other account of their being as they are, except that this was best; and I thought that when he had explained to me in detail the cause of each and the cause of all, he would go on to explain to me what was best for each and what was best for all. I had hopes which I would not have sold for much, and I seized the books and read them as fast as I could in my eagerness to know the better and the worse.

What hopes I had formed, and how grievously was I disappointed! As I proceeded, I found my philosopher altogether forsaking mind or any other principle of order, but having recourse to air, and ether, and water, and other eccentricities. I might compare him to a person who began by maintaining generally that mind is the cause of the actions of Socrates, but who, when he endeavored to explain the causes of my several actions in detail, went on to show that I sit here because my body is made up of bones and muscles; and the bones, as he would say, are hard and have ligaments which divide them, and the muscles are elastic, and they cover the bones, which have also a covering or environment of flesh and skin which contains them; and as the bones are lifted at their joints by the contraction or relaxation of the muscles, I am able to bend my limbs, and this is why I am sitting here in a curved posture: that is what he would say, and he would have a similar explanation of my talking to you, which he would attribute to sound, and air, and hearing, and he would assign ten thousand other

99 causes of the same sort, forgetting to mention the true cause, which is, that the Athenians have thought fit to condemn me, and accordingly I have thought it better and more right to remain here and undergo my sentence; for I am inclined to think that these muscles and bones of mine would have gone off to Megara or Boeotia, — by the dog of Egypt they would, if they had been guided only by their own idea of what was best, and if I had not chosen as the better and nobler part, instead of playing truant and running away, to undergo any punishment which the state inflicts. There is surely a strange confusion of causes and conditions in all this. It may be said, indeed, that without bones and muscles and the other parts of the body I cannot execute my purposes. But to say that I do as I do because of them, and that this is the way in which mind acts, and not from the choice of the best, is a very careless and idle mode of speaking. I wonder that they cannot distinguish the cause from the condition, which the many, feeling about in the dark, are always mistaking and misnaming. And thus one man makes a vortex all round and steadies the earth by the heaven; another gives the air as a support to the earth, which is a sort of broad trough. Any power which in disposing them as they are disposes them for the best never enters into their minds, nor do they imagine that there is any superhuman strength in that; they rather expect to find another Atlas of the world who is stronger and more everlasting and more containing than the good is, and are clearly of opinion that the obligatory and containing power of the good is as nothing; and yet this is the principle which I would fain learn if any one would teach me. But as I have failed either to discover myself, or to learn of any one else, the nature of the best, I will exhibit to you, if you like, what I have found to be the second best mode of inquiring into the cause.

I should very much like to hear that, he replied.

Socrates proceeded: I thought that as I had failed in the contemplation of true existence, I ought to be careful that I did not lose the eye of my soul; as people may injure their bodily eye by observing and gazing on the sun during an eclipse, unless they take the precaution of only looking at the image reflected in the water, or in some similar medium. That occurred to me, and

100 I was afraid that my soul might be blinded altogether if I looked at things with my eyes or tried by the help of the senses to apprehend them. And I thought that I had better have

recourse to ideas, and seek in them the truth of existence. I dare say that the simile is not perfect — for I am very far from admitting that he who contemplates existences through the medium of ideas, sees them only "through a glass darkly," any more than he who sees them in their working and effects. However, this was the method which I adopted: I first assumed some principle which I judged to be the strongest, and then I affirmed as true whatever seemed to agree with this, whether relating to the cause or to anything else; and that which disagreed I regarded as untrue. But I should like to explain my meaning clearly, as I do not think that you understand me.

No indeed, replied Cebes, not very well.

There is nothing new, he said, in what I am about to tell you; but only what I have been always and everywhere repeating in the previous discussion and on other occasions: I want to show you the nature of that cause which has occupied my thoughts, and I shall have to go back to those familiar words which are in the mouth of every one, and first of all assume that there is an absolute beauty and goodness, and greatness, and the like; grant me this, and I hope to be able to show you the nature of the cause, and to prove the immortality of the soul.

Cebes said: You may proceed at once with the proof, as I readily grant you this.

Well, he said, then I should like to know whether you agree with me in the next step; for I cannot help thinking that if there be anything beautiful other than absolute beauty, that can only be beautiful in as far as it partakes of absolute beauty — and this I should say of everything. Do you agree in this notion of the cause?

Yes, he said, I agree.

He proceeded: I know nothing and can understand nothing of any other of those wise causes which are alleged; and if a person says to me that the bloom of color, or form, or anything else of that sort is a source of beauty, I leave all that, which is only confusing to me, and simply and singly, and perhaps foolishly, hold and am assured in my own mind that nothing makes a thing beautiful but the presence and participation of beauty in whatever way or manner obtained; for as to the manner I am uncertain, but I stoutly contend that by beauty all beautiful things become beautiful. That appears to me to be the only safe answer that I can give, either to myself or to any other, and to that I cling, in the persuasion that I shall never be overthrown, and that I

may safely answer to myself or any other, that by beauty beautiful things become beautiful. Do you not agree to that?

Yes, I agree.

And that by greatness only great things become great and greater greater, and by smallness the less becomes less.

True.

Then if a person remarks that A is taller by a head than B, and B less by a head than A you would refuse to admit this, and would stoutly contend that what you mean is only that the greater is greater by, and by reason of, greatness, and the less is less only by, or by reason of, smallness; and thus you would avoid the danger of saying that the greater is greater and the less less by the measure of the head, which is the same in both, and would also avoid the monstrous absurdity of supposing that the greater man is greater by reason of the head, which is small. Would you not be afraid of that? 101

Indeed, I should, said Cebes, laughing.

In like manner you would be afraid to say that ten exceeded eight by, and by reason of, two; but would say by, and by reason of, number; or that two cubits exceed one cubit by a half, but by magnitude? — that is what you would say, for there is the same danger in both cases.

Very true, he said.

Again, would you not be cautious of affirming that the addition of one to one, or the division of one, is the cause of two? And you would loudly asseverate that you know of no way in which anything comes into existence except by participation in its own proper essence, and consequently, as far as you know, the only cause of two is the participation in duality; that is, the way to make two, and the participation in one is the way to make one. You would say: I will let alone puzzles of division and addition — wiser heads than mine may answer them; inexperienced as I am, and ready to start, as the proverb says, at my own shadow, I cannot afford to give up the sure ground of a principle. And if any one assails you there, you would not mind him, or answer him until you had seen whether the consequences which follow agree with one another or not, and when you are further required to give an explanation of this principle, you would go on to assume a higher principle, and the best of the higher ones until you found a resting-place; but you would not confuse the principle and the consequences in your reasoning, like the Eristics — at least if you wanted to discover real existence. Not that this confusion

signifies to them who never care or think about the matter at all, for they have the wit to be well pleased with themselves, however great may be the turmoil of their ideas. But you, if you are a philosopher, will, I believe, do as I say. 102

What you say is most true, said Simmias and Cebes, both speaking at once.

Ech. Yes, Phaedo; and I don't wonder at their assenting. Any one who has the least sense will acknowledge the wonderful clearness of Socrates' reasoning.

Phaed. Certainly, Echecrates; and that was the feeling of the whole company at the time.

Ech. Yes, and equally of ourselves, who were not of the company, and are now listening to your recital. But what followed?

Phaed. After all this was admitted, and they had agreed about the existence of ideas and the participation in them of the other things which derive their names from them, Socrates, if I remember rightly, said:—

This is your way of speaking; and yet when you say that Simmias is greater than Socrates and less than Phaedo, do you not predicate of Simmias both greatness and smallness?

Yes, I do.

But still you allow that Simmias does not really exceed Socrates, as the words may seem to imply, because he is Simmias, but by reason of the size which he has; just as Simmias does not exceed Socrates because he is Simmias, any more than because Socrates is Socrates, but because he has smallness when compared with the greatness of Simmias?

True.

And if Phaedo exceeds him in size, that is not because Phaedo is Phaedo, but because Phaedo has greatness relatively to Simmias, who is comparatively smaller?

That is true.

And therefore Simmias is said to be great, and is also said to be small, because he is in a mean between them, exceeding the smallness of the one by his greatness, and allowing the greatness of the other to exceed his smallness. He added, laughing, I am speaking like a book, but I believe that what I am saying is true.

Simmias assented to this.

The reason why I say this, is that I want you to agree with me in thinking, not only that absolute greatness will never be

great and also small, but that greatness in us or in the concrete will never admit the small or admit of being exceeded: instead of this one of two things will happen, either the greater will fly or retire before the opposite, which is the less, or at the advance of the less will cease to exist; but will not, if allowing or admitting smallness, be changed by that; even as I, having received and admitted smallness when compared with Simmias, remain just as I was, and am the same small person. And as the idea of greatness cannot condescend ever to be or become small, in like manner the smallness in us cannot be or become great; nor can any other opposite which remains the same ever
103 be or become its own opposite, but either passes away or perishes in the change.

That, replied Cebes, is quite my notion.

One of the company, though I do not exactly remember which of them, on hearing this, said: By Heaven, is not this the direct contrary of what was admitted before — that out of the greater came the less and out of the less the greater, and that opposites were simply generated from opposites; whereas now this seems to be utterly denied.

Socrates inclined his head to the speaker and listened. I like your courage, he said, in reminding us of this. But you do not observe that there is a difference in the two cases. For then we were speaking of opposites in the concrete, and now of the essential opposite which, as is affirmed, neither in us nor in nature can ever be at variance with itself: then, my friend, we were speaking of things in which opposites are inherent and which are called after them, but now about the opposites which are inherent in them and which give their name to them; these essential opposites will never, as we maintain, admit of generation into or out of one another. At the same time, turning to Cebes, he said: Were you at all disconcerted, Cebes, at our friend's objection?

That was not my feeling, said Cebes; and yet I cannot deny that I am apt to be disconcerted.

Then we are agreed after all, said Socrates, that the opposite will never in any case be opposed to itself?

To that we are quite agreed, he replied.

Yet once more let me ask you to consider the question from another point of view, and see whether you agree with me: There is a thing which you term heat, and another thing which you term cold?

Certainly.

But are they the same as fire and snow?

Most assuredly not.

Heat is not the same as fire, nor is cold the same as snow?

No.

And yet you will surely admit, that when snow, as was before said, is under the influence of heat, they will not remain snow and heat; but at the advance of the heat, the snow will either retire or perish?

Very true, he replied.

And the fire too at the advance of the cold will either retire or perish; and when the fire is under the influence of the cold, they will not remain as before, fire and cold.

That is true, he said.

And in some cases the name of the idea is not confined to the idea; but anything else which, not being the idea, exists only in the form of the idea, may also lay claim to it. I will try to make this clearer by an example: The odd number is always called by the name of odd?

Very true.

But is this the only thing which is called odd? Are 104
there not other things which have their own name, and yet are called odd, because, although not the same as oddness, they are never without oddness? — that is what I mean to ask — whether numbers such as the number three are not of the class of odd. And there are many other examples: would you not say, for example, that three may be called by its proper name, and also be called odd, which is not the same with three? and this may be said not only of three but also of five, and every alternate number — each of them without being oddness is odd, and in the same way two and four, and the whole series of alternate numbers, has every number even, without being evenness. Do you admit that?

Yes, he said, how can I deny that?

Then now mark the point at which I am aiming: not only do essential opposites exclude one another, but also concrete things, which, although not in themselves opposed, contain opposites; these, I say, also reject the idea which is opposed to that which is contained in them, and at the advance of that they either perish or withdraw. There is the number three for example; will not that endure annihilation or anything

sooner than be converted into an even number, remaining three?

Very true, said Cebes.

And yet, he said, the number two is certainly not opposed to the number three?

It is not.

Then not only do opposite ideas repel the advance of one another, but also there are other things which repel the approach of opposites.

That is quite true, he said.

Suppose, he said, that we endeavor, if possible, to determine what these are.

By all means.

Are they not, Cebes, such as compel the things of which they have possession, not only to take their own form, but also the form of some opposite?

What do you mean?

I mean, as I was just now saying, and have no need to repeat to you, that those things which are possessed by the number three must not only be three in number, but must also be odd.

Quite true.

And on this oddness, of which the number three has the impress, the opposite idea will never intrude?

No.

And this impress was given by the odd principle?

Yes.

And to the odd is opposed the even?

True.

Then the idea of the even number will never arrive at three?

No.

Then three has no part in the even?

None.

Then the triad or number three is uneven?

Very true.

To return then to my distinction of natures which are not opposites, and yet do not admit opposites: as in this instance, three, although not opposed to the even, does not any the more admit of the even, but always brings the opposite into play on the other side; or as two does not receive the odd, or fire the cold — from these examples (and there are many more of them) perhaps you may be able to arrive at the gen-

eral conclusion, that not only opposites will not receive opposites, but also that nothing which brings the opposite will admit the opposite of that which it brings in that to which it is brought. And here let me recapitulate — for there is no harm in repetition. The number five will not admit the nature of the even, any more than ten, which is the double of five, will admit the nature of the odd — the double, though not strictly opposed to the odd, rejects the odd altogether. Nor again will parts in the ratio of 3 : 2, nor any fraction in which there is a half, nor again in which there is a third, admit the notion of the whole, although they are not opposed to the whole. You will agree to that?

Yes, he said, I entirely agree and go along with you in that.

And now, he said, I think that I may begin again; and to the question which I am about to ask I will beg you to give not the old safe answer, but another, of which I will offer you an example; and I hope that you will find in what has been just said another foundation which is as safe. I mean that if any one asks you "What that is, the inherence of which makes the body hot," you will reply not heat (this is what I call the safe and stupid answer), but fire, a far better answer, which we are now in a condition to give. Or if any one asks you "Why a body is diseased," you will not say from disease, but from fever; and instead of saying that oddness is the cause of odd numbers, you will say that the monad is the cause of them: and so of things in general, as I dare say that you will understand sufficiently without my adducing any further examples.

Yes, he said, I quite understand you.

Tell me, then, what is that the inherence of which will render the body alive?

The soul, he replied.

And is this always the case?

Yes, he said, of course.

Then whatever the soul possesses, to that she comes bearing life?

Yes, certainly.

And is there any opposite to life?

There is, he said.

And what is that?

Death.

Then the soul, as has been acknowledged, will never receive the opposite of what she brings. And now, he said, what did we call that principle which repels the even?

The odd.

And that principle which repels the musical, or the just?

The unmusical, he said, and the unjust.

And what do we call that principle which does not admit of death?

The immortal, he said.

And does the soul admit of death?

No.

Then the soul is immortal?

Yes, he said.

And may we say that this is proven?

Yes, abundantly proven, Socrates, he replied.

106 And supposing that the odd were imperishable, must not three be imperishable?

Of course.

And if that which is cold were imperishable, when the warm principle came attacking the snow, must not the snow have retired whole and unmelted — for it could never have perished, nor could it have remained and admitted the heat?

True, he said.

Again, if the uncooling or warm principle were imperishable, the fire when assailed by cold would not have perished or have been extinguished, but would have gone away unaffected?

Certainly, he said.

And the same may be said of the immortal: if the immortal is also imperishable, the soul when attacked by death cannot perish; for the preceding argument shows that the soul will not admit of death, or ever be dead, any more than three or the odd number will admit of the even, or fire, or the heat in the fire, of the cold. Yet a person may say: "But although the odd will not become even at the approach of the even, why may not the odd perish and the even take the place of the odd?" Now to him who makes this objection, we cannot answer that the odd principle is imperishable; for this has not been acknowledged, but if this had been acknowledged, there would have been no difficulty in contending that at the approach of the even the odd principle and the number three took up their departure; and the same argument would have held good of fire and heat and any other thing.

Very true.

And the same may be said of the immortal: if the immortal is also imperishable, then the soul will be imperishable as well

as immortal; but if not, some other proof of her imperishableness will have to be given.

No other proof is needed, he said; for if the immortal, being eternal, is liable to perish, then nothing is imperishable.

Yes, replied Socrates, all men will agree that God, and the essential form of life, and the immortal in general, will never perish.

Yes, all men, he said, — that is true; and what is more, gods, if I am not mistaken, as well as men.

Seeing then that the immortal is indestructible, must not the soul, if she is immortal, be also imperishable?

Most certainly.

Then when death attacks a man, the mortal portion of him may be supposed to die, but the immortal goes out of the way of death and is preserved safe and sound?

True.

Then, Cebes, beyond question, the soul is immortal and imperishable, and our souls will truly exist in another world!

I am convinced, Socrates, said Cebes, and have nothing more to object; but if my friend Simmias, or any one else, has any further objection, he had better speak out, and not keep silence, since I do not know how there can ever be a more fitting time to which he can defer the discussion, if there is anything which he wants to say or have said.

But I have nothing more to say, replied Simmias; nor do I see any room for uncertainty, except that which arises necessarily out of the greatness of the subject and the feebleness of man, and which I cannot help feeling.

Yes, Simmias, replied Socrates, that is well said: and more than that, first principles, even if they appear certain, should be carefully considered; and when they are satisfactorily ascertained, then, with a sort of hesitating confidence in human reason, you may, I think, follow the course of the argument; and if this is clear, there will be no need for any further inquiry.

That, he said, is true.

But then, O my friends, he said, if the soul is really immortal, what care should be taken of her, not only in respect of the portion of time which is called life, but of eternity! And the danger of neglecting her from this point of view does indeed appear to be awful. If death had only been the end of all, the wicked would have had a good bargain in dying, for they would have been happily quit not only of their body, but of their own

107

evil together with their souls. But now, as the soul plainly appears to be immortal, there is no release or salvation from evil except the attainment of the highest virtue and wisdom. For the soul when on her progress to the world below takes nothing with her but nurture and education; which are indeed said greatly to benefit or greatly to injure the departed, at the very beginning of his pilgrimage in the other world,

For after death, as they say, the genius of each individual, to whom he belonged in life, leads him to a certain place in which the dead are gathered together for judgment, whence they go into the world below, following the guide, who is appointed to conduct them from this world to the other: and when they have there received their due and remained their time, another guide brings them back again after many revolutions of ages. Now this journey to the other world is not, as Aeschylus says in
108 the Telephus, a single and straight path, — no guide would be wanted for that, and no one could miss a single path; but there are many partings of the road, and windings, as I must infer from the rites and sacrifices which are offered to the gods below in places where three ways meet on earth. The wise and orderly soul is conscious of her situation, and follows in the path; but the soul which desires the body, and which, as I was relating before, has long been fluttering about the lifeless frame and the world of sight, is after many struggles and many sufferings hardly and with violence carried away by her attendant genius, and when she arrives at the place where the other souls are gathered, if she be impure and have done impure deeds, or been concerned in foul murders or other crimes which are the brothers of these, and the works of brothers in crime, — from that soul every one flees and turns away; no one will be her companion, no one her guide, but alone she wanders in extremity of evil until certain times are fulfilled, and when they are fulfilled, she is borne irresistibly to her own fitting habitation; as every pure and just soul which has passed through life in the company and under the guidance of the gods has also her own proper home.

Now the earth has divers wonderful regions, and is indeed in nature and extent very unlike the notions of geographers, as I believe on the authority of one who shall be nameless.

What do you mean, Socrates? said Simmias. I have myself heard many descriptions of the earth, but I do not know in what you are putting your faith, and I should like to know.

Well, Simmias, replied Socrates, the recital of a tale does not, I think, require the art of Glaucus; and I know not that the art of Glaucus could prove the truth of my tale, which I myself should never be able to prove, and even if I could, I fear, Simmias, that my life would come to an end before the argument was completed. I may describe to you, however, the form and regions of the earth according to my conception of them.

That, said Simmias, will be enough.

Well then, he said, my conviction is, that the earth is a round body in the centre of the heavens, and therefore has no need of air or any similar force as a support, but is kept there and hindered from falling or inclining any way by the equability of the surrounding heaven and by her own equipoise. 109
For that which, being in equipoise, is in the centre of that which is equably diffused, will not incline any way in any degree, but will always remain in the same state and not deviate. And this is my first notion.

Which is surely a correct one, said Simmias.

Also I believe that the earth is very vast, and that we who dwell in the region extending from the river Phasis to the Pillars of Heracles along the borders of the sea, are just like ants or frogs about a marsh, and inhabit a small portion only, and that many others dwell in many like places. For I should say that in all parts of the earth there are hollows of various forms and sizes, into which the water and the mist and the air collect; and that the true earth is pure and in the pure heaven, in which also are the stars — that is the heaven which is commonly spoken of as the ether, of which this is but the sediment collecting in the hollows of the earth. But we who live in these hollows are deceived into the notion that we are dwelling above on the surface of the earth; which is just as if a creature who was at the bottom of the sea were to fancy that he was on the surface of the water, and that the sea was the heaven through which he saw the sun and the other stars, — he having never come to the surface by reason of his feebleness and sluggishness, and having never lifted up his head and seen, nor ever heard from one who had seen, this other region which is so much purer and fairer than his own. Now this is exactly our case: for we are dwelling in a hollow of the earth, and fancy that we are on the surface; and the air we call the heaven, and in this we imagine that the stars move. But this is also owing

to our feebleness and sluggishness, which prevent our reaching the surface of the air: for if any man could arrive at the exterior limit, or take the wings of a bird and fly upward, like a fish who puts his head out and sees this world, he would see a world beyond; and, if the nature of man could sustain the sight, he would acknowledge that this was the place of the true heaven and the true light and the true stars. For this earth, and the stones, and the entire region which surrounds us, are spoilt and corroded, like the things in the sea which are corroded by the brine; for in the sea too there is hardly any noble or perfect growth, but clefts only, and sand, and an endless slough of mud: and even the shore is not to be compared to the fairer sights of this world. And greater far is the superiority of the other. Now of that upper earth which is under the heaven, I can tell you a charming tale, Simmias, which is well worth hearing.

And we, Socrates, replied Simmias, shall be charmed to listen.

The tale, my friend, he said, is as follows: In the first place, the earth, when looked at from above, is like one of those balls which have leather coverings in twelve pieces, and is of divers colors, of which the colors which painters use on earth are only a sample. But there the whole earth is made up of them, and they are brighter far and clearer than ours; there is a purple of wonderful lustre, also the radiance of gold, and the white which is in the earth is whiter than any chalk or snow. Of these and other colors the earth is made up, and they are more in number and fairer than the eye of man has ever seen; and the very hollows (of which I was speaking) filled with air and water are seen like light flashing amid the other colors, and have a color of their own, which gives a sort of unity to the variety of earth. And in this fair region everything that grows — trees, and flowers, and fruits — are in a like degree fairer than any here; and there are hills, and stones in them in a like degree smoother, and more transparent, and fairer in color than our highly-valued emeralds and sardonyxes and jaspers, and other gems, which are but minute fragments of them: for there all the stones are like our precious stones, and fairer still. The reason of this is, that they are pure, and not, like our precious stones, infected or corroded by the corrupt briny elements which coagulate among us, and which breed foulness and disease both in earth and stones, as well as in animals and

plants. They are the jewels of the upper earth, which also shines with gold and silver and the like, and they are visible to sight and large and abundant and found in every region of the earth, and blessed is he who sees them. And upon the earth are animals and men, some in a middle region, others dwelling about the air as we dwell about the sea; others in islands which the air flows round, near the continent: and in a word, the air is used by them as the water and the sea are by us, and the ether is to them what the air is to us. Moreover, the temperament of their seasons is such that they have no disease, and live much longer than we do, and have sight and hearing and smell, and all the other senses, in far greater perfection, in the same degree that air is purer than water or the ether than air. Also they have temples and sacred places in which the gods really dwell, and they hear their voices and receive their answers, and are conscious of them and hold converse with them, and they see the sun, moon, and stars as they really are, and their other blessedness is of a piece with this. 111

Such is the nature of the whole earth, and of the things which are around the earth; and there are divers regions in the hollows on the face of the globe everywhere, some of them deeper and also wider than that which we inhabit, others deeper and with a narrower opening than ours, and some are shallower and wider; all have numerous perforations, and passages broad and narrow in the interior of the earth, connecting them with one another; and there flows into and out of them, as into basins, a vast tide of water, and huge subterranean streams of perennial rivers, and springs hot and cold, and a great fire, and great rivers of fire, and streams of liquid mud, thin or thick (like the rivers of mud in Sicily, and the lava streams which follow them), and the regions about which they happen to flow are filled up with them. And there is a sort of swing in the interior of the earth which moves all this up and down. Now the swing is on this wise: There is a chasm which is the vastest of them all, and pierces right through the whole earth; this is that which Homer describes in the words:— 112

> "Far off, where is the inmost depth beneath the earth;"

and which he in other places, and many other poets, have called Tartarus. And the swing is caused by the streams flowing into and out of this chasm, and they each have the nature of the soil through which they flow. And the reason why the streams are

always flowing in and out, is that the watery element has no bed or bottom, and is surging and swinging up and down, and the surrounding wind and air do the same; they follow the water up and down, hither and thither, over the earth — just as in respiring the air is always in process of inhalation and exhalation; and the wind swinging with the water in and out produces fearful and irresistible blasts: when the waters retire with a rush into the lower parts of the earth, as they are called, they flow through the earth into those regions, and fill them up as with the alternate motion of a pump, and then when they leave those regions and rush back hither, they again fill the hollows here, and when these are filled, flow through subterranean channels and find their way to their several places, forming seas, and lakes, and rivers, and springs. Thence they again enter the earth, some of them making a long circuit into many lands, others going to few places and those not distant; and again fall into Tartarus, some at a point a good deal lower than that at which they rose, and others not much lower, but all in some degree lower than the point of issue. And some burst forth again on the opposite side, and some on the same side, and some wind round the earth with one or many folds like the coils of a serpent, and descend as far as they can, but always return and fall into the lake. The rivers on either side can descend only to the centre and no further, for to the rivers on both sides the opposite side is a precipice.

Now these rivers are many, and mighty, and diverse, and there are four principal ones, of which the greatest and outermost is that called Oceanus, which flows round the earth in a circle; and in the opposite direction flows Acheron, which passes
113 under the earth through desert places, into the Acherusian lake: this is the lake to the shores of which the souls of the many go when they are dead, and after waiting an appointed time, which is to some a longer and to some a shorter time, they are sent back again to be born as animals. The third river rises between the two, and near the place of rising pours into a vast region of fire, and forms a lake larger than the Mediterranean Sea, boiling with water and mud; and proceeding muddy and turbid, and winding about the earth, comes, among other places, to the extremities of the Acherusian lake, but mingles not with the waters of the lake, and after making many coils about the earth plunges into Tartarus at a deeper level. This is that Pyriphlegethon, as the stream is called, which throws up

jets of fire in all sorts of places. The fourth river goes out on the opposite side, and falls first of all into a wild and savage region, which is all of a dark-blue color, like lapis lazuli; and this is that river which is called the Stygian river, and falls into and forms the Lake Styx, and after falling into the lake and receiving strange powers in the waters, passes under the earth, winding round in the opposite direction to Pyriphlegethon, and meeting in the Acherusian lake from the opposite side. And the water of this river too mingles with no other, but flows round in a circle and falls into Tartarus over against Pyriphlegethon; and the name of this river, as the poets say, is Cocytus.

Such is the nature of the other world; and when the dead arrive at the place to which the genius of each severally conveys them, first of all, they have sentence passed upon them, as they have lived well and piously or not. And those who appear to have lived neither well nor ill, go to the river Acheron, and mount such conveyances as they can get, and are carried in them to the lake, and there they dwell and are purified of their evil deeds, and suffer the penalty of the wrongs which they have done to others, and are absolved, and receive the rewards of their good deeds according to their deserts. But those who appear to be incurable by reason of the greatness of their crimes — who have committed many and terrible deeds of sacrilege, murders foul and violent, or the like — such are hurled into Tartarus which is their suitable destiny, and they never come out. Those again who have committed crimes, which, although great, are not unpardonable — who in a moment of anger, for example, have done violence to a father or a mother, and have repented for the remainder of their lives, or who have taken the life of another under the like extenuating circumstances — these are plunged into Tartarus, the pains of which they are compelled to undergo for a year, but at the end of the year the wave casts them forth — mere homicides by way of Cocytus, parricides and matricides by Pyriphlegethon — and they are borne to the Acherusian lake, and there they lift up their voices and call upon the victims whom they have slain or wronged, to have pity on them, and to receive them, and to let them come out of the river into the lake. And if they prevail, then they come forth and cease from their troubles; but if not, they are carried back again into Tartarus and from thence into the rivers unceasingly, until they obtain mercy from those whom they have wronged: for that is

114

the sentence inflicted upon them by their judges. Those also who are remarkable for having led holy lives are released from this earthly prison, and go to their pure home which is above, and dwell in the purer earth; and those who have duly purified themselves with philosophy, live henceforth altogether without the body, in mansions fairer far than these, which may not be described, and of which the time would fail me to tell.

Wherefore, Simmias, seeing all these things, what ought not we to do in order to obtain virtue and wisdom in this life? Fair is the prize, and the hope great.

I do not mean to affirm that the description which I have given of the soul and her mansions is exactly true — a man of sense ought hardly to say that. But I do say that, inasmuch as the soul is shown to be immortal, he may venture to think, not improperly or unworthily, that something of the kind is true. The venture is a glorious one, and he ought to comfort himself with words like these, which is the reason why I lengthen out the tale. Wherefore, I say, let a man be of good cheer about his soul, who has cast away the pleasures and ornaments of the body as alien to him, and rather hurtful in their effects, and has followed after the pleasures of knowledge in this life; who has
115 adorned the soul in her own proper jewels, which are temperance, and justice, and courage, and nobility, and truth — in these arrayed she is ready to go on her journey to the world below, when her time comes. You, Simmias and Cebes, and all other men, will depart at some time or other. Me already, as the tragic poet would say, the voice of fate calls. Soon I must drink the poison; and I think that I had better repair to the bath first, in order that the women may not have the trouble of washing my body after I am dead.

When he had done speaking, Crito said: And have you any commands for us, Socrates — anything to say about your children, or any other matter in which we can serve you?

Nothing particular, he said: only, as I have always told you, I would have you to look to yourselves; that is a service which you may always be doing to me and mine as well as to yourselves. And you need not make professions; for if you take no thought for yourselves, and walk not according to the precepts which I have given you, not now for the first time, the warmth of your professions will be of no avail.

We will do our best, said Crito. But in what way would you have us bury you?

In any way that you like; only you must get hold of me, and take care that I do not walk away from you. Then he turned to us, and added with a smile: I cannot make Crito believe that I am the same Socrates who have been talking and conducting the argument; he fancies that I am the other Socrates whom he will soon see, a dead body — and he asks, How shall he bury me? And though I have spoken many words in the endeavor to show that when I have drunk the poison I shall leave you and go to the joys of the blessed, — these words of mine, with which I comforted you and myself, have had, as I perceive, no effect upon Crito. And therefore I want you to be surety for me now, as he was surety for me at the trial: but let the promise be of another sort; for he was my surety to the judges that I would remain, but you must be my surety to him that I shall not remain, but go away and depart; and then he will suffer less at my death, and not be grieved when he sees my body being burned or buried. I would not have him sorrow at my hard lot, or say at the burial, Thus we lay out Socrates, or, Thus we follow him to the grave or bury him; for false words are not only evil in themselves, but they infect the soul with evil. Be of good cheer then, my dear Crito, and say that you are burying my body only, and do with that as is usual, and as you think best. 116

When he had spoken these words, he arose and went into the bath-chamber with Crito, who bid us wait; and we waited, talking and thinking of the subject of discourse, and also of the greatness of our sorrow; he was like a father of whom we were being bereaved, and we were about to pass the rest of our lives as orphans. When he had taken the bath his children were brought to him — (he had two young sons and an elder one); and the women of his family also came, and he talked to them and gave them a few directions in the presence of Crito; and he then dismissed them and returned to us.

Now the hour of sunset was near, for a good deal of time had passed while he was within. When he came out, he sat down with us again after his bath, but not much was said. Soon the jailer, who was the servant of the eleven, entered and stood by him, saying: To you, Socrates, whom I know to be the noblest and gentlest and best of all who ever came to this place, I will not impute the angry feelings of other men, who rage and swear at me when, in obedience to the authorities, I bid them drink the poison — indeed I am sure that you will not be angry with me; for others, as you are aware, and not I, are the guilty cause.

And so fare you well, and try to bear lightly what must needs be; you know my errand. Then bursting into tears he turned away and went out.

Socrates looked at him and said: I return your good wishes, and will do as you bid. Then turning to us, he said, How charming the man is: since I have been in prison he has always been coming to see me, and at times he would talk to me, and was as good as could be to me, and now see how generously he sorrows for me. But we must do as he says, Crito; let the cup be brought, if the poison is prepared: if not, let the attendant prepare some.

Yet, said Crito, the sun is still upon the hill-tops, and many a one has taken the draught late, and after the announcement has been made to him, he has eaten and drunk, and indulged in sensual delights; do not hasten then, there is still time.

Socrates said: Yes, Crito, and they of whom you speak are right in doing thus, for they think that they will gain by the delay; but I am right in not doing thus, for I do not think that I should gain anything by drinking the poison a little later; 117 I should be sparing and saving a life which is already gone: I could only laugh at myself for this. Please then to do as I say, and not to refuse me.

Crito, when he heard this, made a sign to the servant; and the servant went in, and remained for some time, and then returned with the jailer carrying the cup of poison. Socrates said: You, my good friend, who are experienced in these matters, shall give me directions how I am to proceed. The man answered: You have only to walk about until your legs are heavy, and then to lie down, and the poison will act. At the same time he handed the cup to Socrates, who in the easiest and gentlest manner, without the least fear or change of color or feature, looking at the man with all his eyes, Echecrates, as his manner was, took the cup and said: What do you say about making a libation out of this cup to any god? May I, or not? The man answered: We only prepare, Socrates, just so much as we deem enough. I understand, he said: yet I may and must pray to the gods to prosper my journey from this to that other world — may this then, which is my prayer, be granted to me. Then holding the cup to his lips, quite readily and cheerfully he drank off the poison. And hitherto most of us had been able to control our sorrow; but now when we saw him drinking, and saw too that he had finished the draught, we

could no longer forbear, and in spite of myself my own tears were flowing fast; so that I covered my face and wept over myself, for certainly I was not weeping over him, but at the thought of my own calamity in having lost such a companion. Nor was I the first, for Crito, when he found himself unable to restrain his tears, had got up and moved away, and I followed; and at that moment, Apollodorus, who had been weeping all the time, broke out into a loud cry which made cowards of us all. Socrates alone retained his calmness: What is this strange outcry? he said. I sent away the women mainly in order that they might not offend in this way, for I have heard that a man should die in peace. Be quiet then, and have patience. When we heard that, we were ashamed, and refrained our tears; and he walked about until, as he said, his legs began to fail, and then he lay on his back, according to the directions, and the man who gave him the poison now and then looked at his feet and legs; and after a while he pressed his foot hard and asked him if he could feel; and he said, No; and then his leg, and so upwards and upwards, and showed us that he was cold and stiff. And he felt them himself, and said: When the poison reaches the heart, that will be the end. 118 He was beginning to grow cold about the groin, when he uncovered his face, for he had covered himself up, and said (they were his last words) — he said: Crito, I owe a cock to Asclepius; will you remember to pay the debt? The debt shall be paid, said Crito; is there anything else? There was no answer to this question; but in a minute or two a movement was heard, and the attendants uncovered him; his eyes were set, and Crito closed his eyes and mouth.

Such was the end, Echecrates, of our friend, whom I may truly call the wisest, and justest, and best of all the men whom I have ever known.

THE SYMPOSIUM.

INTRODUCTION.

Of all the works of Plato the Symposium is the most perfect in form, and may be truly thought to contain more than any commentator has ever dreamed of; or, as Goethe said of one of his own writings, more than the author himself knew. For in philosophy as in prophecy glimpses of the future may often be conveyed in words which could hardly have been understood or interpreted at the time when they were uttered. (Cp. Symp. 210 foll. 223 D.) More than any other Platonic work the Symposium is Greek both in style and subject, having a beauty "as of a statue," while the companion Dialogue of the Phaedrus is marked by a sort of Gothic irregularity. More too than in any other part of his writings, Plato is emancipated from former philosophies. The genius of Greek art seems to triumph over the traditions of Pythagorean, Eleatic, or Megarian systems, and "the old quarrel of poetry and philosophy" has at least a superficial reconcilement. (Rep. x. 607 B.)

An unknown person who had heard of the discourses in praise of love spoken by Socrates and others at the banquet of Agathon, is desirous of having an authentic account of them, which he thinks that he can obtain from Apollodorus, the same excitable, or rather "mad" friend of Socrates, who has already appeared in the Phaedo. He had imagined that the discourses were recent. There he is mistaken: but they are still fresh in the memory of his informant, who had just been repeating them to Glaucon, and is quite prepared to have another rehearsal of them in a walk from the Piraeus to Athens. He had not indeed been present himself, but he had heard them from the best authority. Aristodemus, who is described as having been in past times a sort of humble but inseparable attendant of Socrates, had reported them to him.

The narrative which he had heard was as follows: —

Aristodemus meeting Socrates in holiday attire, is invited by him to a banquet at the house of Agathon, who had been sacrificing in thanksgiving for his tragic victory on the day previous. But no sooner has he entered the house than he finds that Socrates is missing — he has stayed behind in a fit of abstraction, and does not ap-

pear until the banquet is half over. Some raillery passes between him and the host, and then the question is asked, "What shall they do about drinking? as they had been all well drunk on the day before, and drinking on two successive days is a bad thing." This is confirmed by the authority of Eryximachus the physician, who further proposes that instead of listening to the flute-girl and her "noise" they shall hold discourses in honor of love, one after another, going from left to right as they are sitting at the table. All of them agree to this, and Phaedrus, who is the "father" of the idea, which he has previously communicated to Eryximachus, begins as follows: —

He descants first of all upon the antiquity of Love, which is proved by the authority of the poets, and then upon the benefits which he gives to man. The greatest of these is the sense of honour and dishonor. The lover is ashamed to be seen by the beloved doing or suffering any cowardly or mean act. And a state or army which was made up only of lovers and their loves would be invincible, For love will convert the veriest coward into an inspired hero.

And there have been true loves not only of men but of women also. Such was the love of Alcestis, who dared to die for her husband, and as a reward was allowed to come again from the dead. But Orpheus, the cowardly harper, who went down to Hades alive, that he might bring back his wife, was mocked with an apparition only, and the gods afterwards contrived his death as a punishment of his impudence. The hero Achilles affords an instance of similar devotion; for he was willing to avenge his lover Patroclus, although he knew that his own death would immediately follow: and the gods, who honor the love of the beloved above that of the lover, rewarded him, and sent him to the islands of the blest.

Pausanias, who was sitting next, then takes up the tale. He says that Phaedrus should have distinguished the heavenly love from the earthly, before he praised either. For there are two loves, as there are two Aphrodites — one the heavenly, who has no mother and is the elder and wiser goddess, and the other, the daughter of Zeus and Dione, who is popular and common. The first of the two loves has a noble purpose, and delights only in the intelligent nature of man, and is faithful to the end, and has no shadow of wantonness or lust. The second is the coarser kind of love, which is a love of the body rather than of the soul, and is apt to be a love of women and boys as well as of men. Now actions vary according to the manner of their performance; and this applies to love as well as to every other sort of action. Moreover, there is a difference of opinion about the propriety of male loves. Some, like the Boeotians, approve of them; others, like the Ionians, and most of the barbarians, disapprove of them; partly because they are aware of the political

dangers which ensue from them, as may be seen in the instance of Harmodius and Aristogeiton. At Athens and Sparta there is an apparent contradiction about them. For at times they are encouraged, and then the lover is allowed to play all sorts of fantastic tricks; he may swear and forswear himself (and "at lovers' perjuries they say Jove laughs"); he may be a servant, and lie on a mat at the door of his love, without any loss of character; but there are also times when elders look grave and guard their young relations, and personal remarks are made. The truth is that some of these loves are disgraceful and others honorable. The vulgar love of the body which takes wings and flies away when the bloom of youth is over, is disgraceful, as is also the interested love of power or wealth; but the love of the noble mind is lasting. The lover should be tested, and the beloved should not be too ready to yield. The rule in our country is that the beloved may do the same service to the lover in the way of virtue which the lover may do to him.

This voluntary service rendered for the sake of virtue and wisdom is permitted among us; and when these two customs — one the love of youth, the other the practice of virtue and philosophy — meet in one, then the lovers may lawfully unite. Nor is there any disgrace to a disinterested lover in being deceived: but the interested lover is doubly disgraced, for if he loses his love he loses his character; whereas the noble love of the other remains the same, although the object of his love is unworthy: for nothing can be nobler than love for the sake of virtue. This is that love of the heavenly goddess which is of great price to individuals and cities, making them work together for their improvement.

The turn of Aristophanes comes next; but he has the hiccough, and therefore proposes that Eryximachus the physician shall cure him or speak in his turn. Eryximachus is ready to do both, and speaks as follows: —

He agrees with Pausanias in maintaining that there are two kinds of love; but his art has led him to the conclusion that the empire of this double love extends over all things, and is to be found in animals and plants as well as in man. In the human body also there are two loves; and the art of medicine shows which is the good and which is the bad love, and persuades the body to accept the good and reject the bad, and reconciles conflicting elements and makes them friends. Every art, gymnastic and husbandry as well as medicine, is the reconciliation of opposites; and this is what Heracleitus meant, when he spoke of a harmony of opposites: but in strictness he should rather have spoken of a harmony which succeeds opposites, for an agreement of disagreements there cannot be. Music too is concerned with the principles of love in their application to harmony and rhythm. In the abstract, all is simple, and we are not troubled with the twofold love; but when they are applied

in education with their accompaniments of song and metre, then the discord begins. Then the old tale has to be repeated of fair Urania and the coarse Polyhymnia, who must be indulged sparingly, just as in my own art of medicine care must be taken that the taste of the epicure be gratified without inflicting upon him the attendant penalty of disease.

There is a similar harmony or disagreement in the course of the seasons and in the relations of moist and dry, hot and cold, hoar frost and blight; and diseases of all sorts spring from the excesses or disorders of the element of love. The knowledge of this in relation to the heavenly bodies is termed astronomy, and in relation to the gods is called divination. For divination is the peacemaker of gods and men, and works by a knowledge of the tendencies of merely human loves to piety and impiety. Such is the power of love; and that love which is just and temperate has the greatest power, and is the source of all our happiness and friendship with the gods and with one another. I dare say that I have omitted to mention many things which you, Aristophanes, may supply, as I perceive that you are cured of the hiccough.

Aristophanes, who has been cured of the hiccough, now speaks: —

He professes to open a new vein of discourse, in which he begins by treating of the origin of human nature. The sexes were originally three, men, women, and the union of the two; and they were made round, having four hands, four feet, two faces on a round neck, and the rest to correspond. Terrible was their strength and swiftness; and they were essaying to scale heaven and attack the gods. Doubt reigned in the celestial councils; the gods were divided between the desire of quelling the pride of man and the fear of losing the sacrifices. At last Zeus hit upon an expedient. Let us cut them in two, he said; then they will only have half their strength, and we shall have twice as many sacrifices. He spake, and split them as you might split an egg with a hair; and when this was done, he told Apollo to give their faces a twist and rearrange their persons, taking out the wrinkles and tying the skin in a knot about the navel. The two halves went about looking for one another, and were ready to die of hunger in one another's arms. Then Zeus invented an adjustment of the sexes, which enabled them to marry and go their way to the business of life. Now the characters of men differ accordingly as they are derived from the original man or the original woman, or the original man-woman. Those who come from the man-woman are lascivous and adulterous; those who come from the woman form female attachments; those who are a section of the male follow the male and embrace him, and in him all their desires centre. They cannot tell what they want of one another, but they live in pure and manly affection and cannot be separated. If Hephaestus were to come to them and propose that they should be

melted into one and remain one in this world and in the world below, they would acknowledge that this was the very expression of their want. For love is the desire of the whole, and the pursuit of the whole is called love. There was a time when the two sexes were only one, but now God has halved them, — much as the Lacedaemonians have cut up the Arcadians, — and if they don't behave themselves he will quarter them, and they will hop about with half a nose and face in basso relievo. Wherefore let us exhort all men to piety, that we may obtain the goods of which love is the author, and be reconciled to God, and find our own true loves, which rarely happens in this world. And now I must beg you not to suppose that I am alluding to Pausanias and Agathon, for my words refer to all mankind everywhere.

Some raillery ensues first between Aristophanes and Eryximachus and then between Agathon and Socrates, which threatens to grow into an argument. This is speedily repressed by Phaedrus, who reminds the disputants of their tribute to the God. Agathon's speech follows.

He will speak of the God first and then of his gifts. He is the fairest, and blessedest, and best of the gods, and also the youngest, having had no existence in the old days of Iapetus and Cronos when the gods were at war. The things that were done then were done of necessity and not of love. For Love is young and dwells in soft places, — not like Ate in Homer, walking on the skulls of men, but in their hearts and souls, which are soft enough. He is all flexibility and grace, and his habitation is among the flowers, and he cannot do or suffer wrong; for all men serve and obey him of their own free-will, and where there is love there is obedience, and where obedience is, there is justice; for none can be wronged of his own free-will. And he is temperate as well as just, for he is the ruler of the desires, and if he rules them he must be temperate. Also he is courageous, for he is the conqueror of the lord of war. And he is wise too; for he is a poet, and the author of posey in others. He created the animals; he is the inventor of the arts; all the gods are his subjects; he is the fairest and best in himself, and the cause of what is fairest and best in others; he makes men to be of one mind at a banquet, filling them with affection and emptying them of disaffection; the pilot, helper, defender, savior of men, in whose footsteps let every man follow, chanting a strain of love. Such is the discourse, half playful, half serious which I dedicate to the God.

The turn of Socrates comes next. He begins by remarking satirically that he has not understood the terms of the original agreement, for he fancied that they meant to speak the true praises of Love, but now he finds that they only say what is good of him, whether true or false. He begs to be absolved from speaking falsely, but he is willing to speak the truth, and proposes to begin by ques-

tioning Agathon. The result of his questions may be summed up as follows:—

Love is of something, and that which love desires is not that which love is or has; for no man desires that which he is or has. And love is of the beautiful (cp. Agathon, 196 A, B), and therefore love has not the beautiful. And the beautiful is the good, and therefore, in wanting and desiring the beautiful, love also wants and desires the good. Socrates professes to have put the same questions and have obtained the same answers from Diotima, a wise woman of Mantinea, who, like Agathon, had spoken first of Love and then of his works. Socrates, like Agathon, had told her that Love is a mighty god and also fair, and she had shown him in return that Love was neither, but in a mean between fair and foul, good and evil, and not a god at all, but only a great demon or intermediate being (cp. Eryximachus, 186 D), who conveys to the gods the prayers of men, and to men the commands of the gods.

Socrates asks: Who are his father and mother? To this Diotima replies that he is the son of Plenty and Poverty, and partakes of the nature of both, and is full and starved by turns. Like his mother he is poor and squalid, lying on mats at doors (cp. Pausanias, 183 A); like his father he is full of arts and resources, and is in a mean between ignorance and knowledge. And in this he resembles the philosopher who is also in a mean between the wise and the ignorant. Such is the nature of Love, who is not to be confused with the beloved.

But Love desires the beautiful; and then arises the question, What does he desire of the beautiful? He desires, of course, the possession of the beautiful; but what is given by that? For the beautiful let us substitute the good, and we have no difficulty in seeing that the possession of the good is happinesss, and that love is the desire of this. But the meaning of the term has been too often confined to one sort of love, whereas love is really coextensive with the good. And love desires not only the good, but the everlasting possession of the good. Why then is there all this flutter and excitement about love? Because all men and women at a certain age are desirous of bringing to the birth. And love is not of beauty only, but of birth in beauty: this is the principle of immortality in a mortal creature. And when beauty approaches, then the conceiving power is benign and diffuse, but when foulness, she is averted and morose.

But why again does this extend not only to men but also to animals? Because they too have an instinct of immortality. Even in the same individual there is a perpetual succession as well of the parts of the material body as of the thoughts and desires of the mind; nay, even knowledge comes and goes. There is no sameness of existence, but the new mortality is always taking the place of the

old. This is why parents love their children — for the sake of immortality; and this is why men love the immortality of fame. For the creative soul creates not children, but conceptions of wisdom and virtue, such as poets and other creators have invented. And the noblest creations of all are those of legislators, in honor of whom temples have been raised. Who would not sooner have these children of the mind than the ordinary human ones?

I will now initiate you, she said, into the greater mysteries; for he who would proceed in due course should love first one fair form, and then many, and learn the connection of them; and from beautiful bodies he should proceed to beautiful minds, and the beauty of laws and institutions, until he perceives that all beauty is of one kindred; and from institutions he should go on to the sciences, until at last the vision is revealed to him of a single science of universal beauty, and then he will behold the everlasting nature which is the cause of all, and will be near the end. In the contemplation of that supreme being of love he will be purified of earthly leaven, and will behold beauty, not with the bodily eye, but with the eye of the mind, and will bring forth true creations of virtue and wisdom, and be the friend of God and heir of immortality.

Such, Phaedrus, is the tale which I heard from the stranger of Mantinea, and which you may call the encomium of love, or what you please.

The company applaud the speech of Socrates, and Aristophanes is about to say something, when suddenly a band of revelers breaks into the court, and the voice of Alcibiades is heard asking for Agathon. He is led in drunk, and welcomed by Agathon, whom he has come to crown with a garland. He is placed on a couch at his side, but suddenly, on recognizing Socrates, he starts up, and a sort of conflict is carried on between them, which Agathon is requested to appease. Alcibiades insists that they shall drink, and has a large wine-cooler filled, which he first empties himself, and then fills again and passes on to Socrates. He is informed of the nature of the entertainment; he is willing to join, if only in the character of a drunken and disappointed lover he may be allowed to sing the praises of Socrates.

He begins by comparing Socrates first to the masks of Silenus, which have images of the gods inside them; and, secondly, to Marsyas the flute-player. For Socrates produces the same effect with the voice which Marsyas did with the flute. He is the great speaker and enchanter who ravishes the souls of men, the convincer of hearts too, as he has convinced Alcibiades, and made him ashamed of his mean and miserable life. He has suffered agonies from him, and is at his wit's end. He was in hopes that Socrates would fall in love with him; this as he thought would give him a wonderful opportunity of receiving lessons of wisdom. He narrates the failure of his

design. He then proceeds to mention some other particulars of the life of Socrates: how they were at Potidaea together, where Socrates showed his superior powers of enduring cold and fatigue; how on one occasion he had stood for an entire day and night absorbed in reflection amid the wonder of the spectators; how on another occasion he had saved Alcibiades' life; how at the battle of Delium, after the defeat, he might be seen stalking about like a pelican, rolling his eyes. The sum of all is, that he is the most wonderful of human beings, and absolutely unlike any one but a satyr. Like the satyr in his language too, for he uses the commonest words as the outward mask of the divinest truths.

When Alcibiades has done speaking, a dispute begins between him and Agathon and Socrates. Socrates piques Alcibiades by a pretended affection for Agathon. Presently another band of revelers appears, who introduce disorder into the feast; the sober part of the company, Eryximachus, Phaedrus, and others, withdraw; and Aristodemus, the follower of Socrates, sleeps during the whole of a long winter's night. When he wakes at cock-crow the revelers are nearly all asleep. Only Socrates, Aristophanes, and Agathon hold out; they are drinking out of a large goblet, which they pass round; and Socrates is explaining to the two others, who are half asleep, that the genius of tragedy is the same as that of comedy, and that the writer of tragedy ought to be a writer of comedy also. And first Aristophanes drops, and then, as the day is dawning, Agathon. Socrates, having laid them to rest, goes to his daily avocations until the evening.

If it be true that there are more things in the Symposium of Plato than any commentator has dreamed of, it is also true that many things have been imagined which are not really to be found there. Some writings hardly admit of a more distinct interpretation than a musical composition: and every reader may form his own accompaniment of thought or feeling to the strain which he hears. The Symposium of Plato is a work of this character, and hardly admits of being rendered in any other words but the writer's own. There are so many half-lights and cross-lights, so much of the color of mythology, and of the manner of sophistry, adhering — rhetoric and poetry, the playful and the serious, are so subtly intermingled in it, and vestiges of old philosophy so curiously blend with germs of future knowledge, that agreement among interpreters is not to be expected. The expression "Poema magis putandum quam comicorum poetarum," which has been applied to all the writings of Plato, is especially applicable to the Symposium.

The power of love is represented in the Symposium as running through all nature and all being: at one end descending to animals

and plants, and attaining to the highest vision of truth at the other. In an age when man was seeking for an expression of the world around him, the conception of love greatly affected him. One of the first distinctions of language and of mythology was that of gender; and at a later period the ancient physicist, anticipating modern science, saw, or thought that he saw, a sex in plants; there were elective affinities among the elements, marriages of earth and heaven. (Aesch. Frag. Dan. 38.) Love became a mythic personage, whom philosophy, borrowing from poetry, converted into an efficient cause of creation. As of number and figure, the traces of the existence of love were everywhere discerned; and in the Pythagorean list of opposites male and female were ranged side by side with odd and even, finite and infinite.

But Plato seems also to be aware that there is a mystery of love not only in nature, but in man, extending far beyond the mere immediate relation of the sexes. He is conscious that the highest and noblest things in the world are not easily severed from the sensual desires, or may even be regarded as a spiritualized form of them. We may observe that Socrates himself is not represented as originally unimpassioned, but as one who has overcome his passions; the secret of his power over others partly lies in his passionate but self-controlled nature. Love is with Plato not merely the feeling usually so called, but the mystical contemplation of the beautiful and the good. The same passion which may wallow in the mire is capable of rising to the highest summit — of penetrating to the inmost secret of philosophy. The unity of knowledge, the consistency of the warring elements of the world, the enthusiasm of knowledge when first beaming upon mankind, the relativity of ideas to the human mind, and of the human mind to ideas, are all included, consciously or unconsciously, in Plato's doctrine of love.

The successive speeches in praise of love are all of them characteristic of the speakers, and contribute in various degrees to the final result; they are all designed to prepare the way for Socrates, who gathers up the threads anew, and skims the highest points of each of them. But they are not to be regarded as the stages of an idea, rising above one another to a climax. They are fanciful, partly facetious performances, "yet also having a certain degree of seriousness," which the successive speakers dedicate to the God. All of them are rhetorical and poetical rather than dialectical; they do not aim at truth, but only at appearance. When the turn of Socrates comes round, he cannot be allowed to disturb the arrangement, and therefore he throws his argument into the form of a speech. (Cp. Gorg. 505 E; Protag. 353 B.) And on the occasion of a banquet, good manners would not allow him to win a victory either over his host or any of the guests. The advantage which he gains over Agathon is ingeniously represented as having been already gained over

himself by Diotima. At the same time he maintains his own profession of ignorance.

The speeches are attested to us by the very best authority. The madman Apollodorus, who for three years past has made a daily study of the actions of Socrates — to whom the world is summed up in the words "Great is Socrates" — he has heard them from another "madman" who was the shadow of Socrates in days of old, like him going about barefooted, and who had been present at the time. Would you desire better witness? We may observe, by the way, (1) how the very appearance of Aristodemus by himself is a sufficient indication to Agathon that Socrates has been left behind; also, (2) how the courtesy of Agathon anticipates the excuse which Socrates was to have made on Aristodemus' behalf for coming uninvited; (3) how the story of the fit or trance of Socrates is confirmed by the mention which Alcibiades makes of a similar fit of abstraction occurring when he was serving with the army at Potidaea; like (4) the drinking powers of Socrates and his love of the fair, which receive a similar attestation in the concluding scene; or the attachment of Aristodemus, who is not forgotten when Socrates takes his departure. (5) We may notice the manner in which Socrates himself regards the first five speeches, not as true, but as fanciful and exaggerated encomiums of the god Love; (6) the ruling passion of Socrates for dialectics, who will argue with Agathon instead of making a speech, and will only speak at all upon the condition that he is allowed to speak the truth. We may note also (7) the characteristic Platonic remark which occurs in the speech of Eryximachus, that "confusion first begins in the concrete;" and the touch of Socratic irony, (8) which admits of a wide application and reveals a deep insight into the world; that in speaking of holy things and persons there is a general understanding that you should praise them, not that you should speak the truth of them — this is the sort of praise which Socrates is unable to give. Lastly we may remark that the banquet is a real banquet after all, at which love is the theme of discourse, and huge quantities of wine are drunk. (214 A, 223 B.)

The discourse of Phaedrus is half-mythical, half-ethical; and he himself, true to the character which is given him in the Dialogue which bears his name, is half-sophist, half-enthusiast. He is the critic of poetry also, who compares Homer and Aeschylus in the insipid and irrational manner of the schools of the day, characteristically reasoning about the probability of matters which do not admit of reasoning. The age of love, the great blessing of having a lover, the incentive which love is to daring deeds, the examples of Alcestis and Achilles, are the chief themes of his discourse. The love of women is regarded by him as almost on an equality with that of men; and he takes occasion to remark that the lover has a diviner being, and that therefore the gods favor the return of love which is made to him more than the original sentiment of the lover.

There is something of a sophistical ring in the speech of Phaedrus, which recalls the first speech in imitation of Lysias, occurring in the Dialogue called the Phaedrus. This is still more marked in the speech of Pausanias which follows; and which is at once hyperlogical in form and also extremely confused and pedantic. Plato is attacking the logical feebleness of the Sophists and rhetoricians through their pupils; of course, "playing both sides of the game," as in the Phaedrus; but it is not necessary in order to understand him that we should discuss the fairness of his mode of proceeding. The love of Pausanias for Agathon has already been touched upon in the Protagoras (315 D), and is alluded to by Aristophanes (191 B). Hence he is naturally the upholder of male loves, which, like all the other affections or actions of men, he regards as varying according to the manner of their performance; thus the question of morals is converted into one of manners. Like the Sophists and like Plato himself, though in a different sense, he begins his discussion by an appeal to mythology, and distinguishes between the elder and younger love. The value which he attributes to such loves as motives to virtue and philosophy is greatly at variance with modern and Christian notions, but is in accordance with Hellenic sentiment. For it is impossible to deny that some of the best and greatest of the Greeks indulged in attachments, which Plato in the Laws, no less than the universal opinion of Christendom, has stigmatized as unnatural. Pausanias is very earnest in insisting on the innocence of such loves, when pursued in a right spirit; and he speaks of them as generally approved of among the Hellenes and disapproved by the barbarians, the latter for the sophistical reason that they are inimical to tyrants. The speech as a whole is "more words than matter," such as might certainly have been composed by a pupil of Lysias and Prodicus, although there is no hint given that Plato is designing to parody them.

Plato transposes the two next speeches, as in the Republic he would transpose the virtues (iv. 430 D) and the mathematical sciences (vii. 528 A). This is done partly to avoid monotony, partly for the sake of making Aristophanes "the cause of wit in others," and also in order to bring the comic and tragic poet into juxtaposition, as if by accident. A suitable "expectation" of Aristophanes is raised by the ludicrous circumstance of his having the hiccough, which is appropriately cured by his substitute, the physician Eryximachus. To Eryximachus Love is the good physician; he sees everything as an intelligent physicist, and, like many professors of his art in modern times, attempts to reduce the moral to the physical; or recognizes one law of love which pervades them both. There are loves and strifes of the body as well as of the mind. Like Hippocrates the Asclepiad, he is a disciple of Heracleitus, whose conception of the harmony of opposites he explains in a new way

as the harmony after discord; to his common sense, as to that of many moderns as well as ancients, the identity of contradictories is an absurdity. His notion of love may be summed up as the harmony of man with himself in soul as well as body, and of all things in heaven and earth with one another.

Aristophanes is ready to laugh and make laugh before he opens his mouth, just as Socrates, true to his character, is ready to argue before he begins to speak. He expresses the very genius of the old comedy, its coarse and forcible imagery, and the license of its language in speaking about the gods. He has no sophistical notions about love, which is brought back by him to its common-sense meaning of love between intelligent beings. His account of the origin of the sexes has the greatest (comic) probability and verisimilitude. Nothing in Aristophanes is more truly Aristophanic than the description of the human monster whirling round on four arms and four legs, eight in all, with incredible rapidity. Yet there is a mixture of earnestness in this jest; three serious principles seem to be insinuated: first, that man cannot exist in isolation; he must be reunited if he is to be perfected; secondly, that love is the mediator and reconciler of poor, divided human nature; thirdly, that the loves of this world are an indistinct anticipation of an ideal union which is not yet realized.

The speech of Agathon is conceived in a higher strain, and receives the real, if half-ironical, approval of Socrates. It is the speech of the tragic poet, and a sort of poem, like tragedy, moving among the gods of Olympus, and not among the elder or Orphic deities. In the idea of the antiquity of love he cannot agree; love is not of the old time, but present and youthful ever. The speech may be compared with that speech of Socrates in the Phaedrus, in which he describes himself as talking dithyrambs. It is at once a preparation for Socrates and a foil to him. The rhetoric of Agathon elevates the soul to "sunlit heights," but at the same time contrasts with the natural and necessary eloquence of Socrates. Agathon contributes the distinction between love and the works of love, and also hints incidentally that love is always of beauty, which Socrates afterwards elevates into a principle. While the consciousness of discord is stronger in the comic poet Aristophanes, Agathon, the tragic poet, has a deeper sense of harmony and reconciliation, and speaks of Love as the creator and artist.

All the earlier speeches embody common opinions colored with a tinge of philosophy. They furnish the material out of which Socrates proceeds to form his discourse, starting, as in other places, from mythology and the opinions of men. From Phaedrus he takes the thought that love is stronger than death; from Pausanias, that the true love is akin to intellect and political activity; from Eryximachus, that love is a universal phenomenon and the great power

of nature; from Aristophanes, that love is the child of want, and is not merely the love of the congenial or of the whole, but (as he adds) of the good; from Agathon, that love is of beauty — not however of beauty only, but of birth of beauty.

The speech of the day begins with a short argument which overthrows not only Agathon but all of them, by the help of a distinction which has escaped them. Extravagant praises have been ascribed to Love as the author of every good; no sort of encomium was too high for him, whether deserved and true or not. But Socrates has no talent for speaking anything but the truth, and if he is to speak the truth of Love he must honestly confess that he is not a good at all: for love is of the good, and no man can desire that which he has. This piece of dialectics is ascribed to Diotima, the wise woman of Mantineia, who has already urged upon Socrates the argument which he urges against Agathon.

But Diotima, the prophetess of Mantineia, whose sacred and superhuman character raises her above the ordinary proprieties of women, has taught Socrates far more than this about the art and mystery of love. She has taught him that love is another aspect of philosophy. The same want in the human soul which is satisfied in the vulgar by the procreation of children, may become the highest aspiration of intellectual desire. As the Christian might speak of hungering and thirsting after righteousness; or of divine loves under the figure of human (cp. Eph. v. 32: "This is a great mystery, but I speak concerning Christ and the church"); as the mediæval saint might speak of the "fruitio Dei," so the absorption and annihilation of all other loves and desires in the love of knowledge is a feeling that was at least intelligible to the Greek of the fifth century before Christ. To most men reason and passion appear to be antagonistic both in idea and fact. The union of the greatest comprehension of knowledge and the burning intensity of love is a contradiction in nature, which may have existed in a far-off primeval age in the mind of some Hebrew prophet or other Eastern sage, but has now become an imagination only. Yet this "passion of the reason" is the theme of the Symposium of Plato. And as there is no impossibility in supposing that "one king, or son of a king, may be a philosopher," so also there is a probability that there may be some few — perhaps one or two in a whole generation — in whom the light of truth may not lack the warmth of desire. And if there be such natures, no one will be disposed to deny that "from them flow most of the benefits of individuals and states."

Yet there is a higher region in which love is not only felt, but satisfied, in the perfect beauty of eternal knowledge, beginning with the beauty of earthly things, and at last by regular steps reaching a beauty in which all existence is seen harmonious and one. The limited affection is enlarged, and enabled to behold the ideal beauty

of all things. This ideal beauty of the Symposium is the ideal good of the Republic; regarded not with the eye of knowledge, but of faith and desire. The one seems to say to us "The idea is love," the other "The idea is truth." In both the lover of wisdom is the "spectator of all time and all existence." This is a sort of "mystery" in which Plato also obscurely intimates the interpenetration of the moral and intellectual faculties.

The divine image of beauty that resides within Socrates has been revealed; the Silenus mask, or outward man, has now to be exhibited. The description of Socrates is placed side by side with the speech of Socrates; one is the complement of the other. At the height of divine inspiration, when the force of nature can no further go, as if by way of contrast to this extreme idealism or mysticism, Alcibiades, accompanied by a troop of revelers, staggers in, and in his drunken state is able to tell of things which he would have been ashamed to mention if he had been sober. The state of his affections towards Socrates, unintelligible to us and perverted as they appear, is a perfect illustration of the power ascribed to the loves of men in the speech of Pausanias. Indeed, he is confident that the whole company will sympathize with him; several of them have been in love with Socrates, and, like himself, have been deceived by him. The singular part of this confession is the combination of the most degrading passion with the desire of virtue and improvement. The pangs of philosophy and of love work together on this abandoned soul. Such a union is not wholly untrue to human nature, in which there is a mixture of good and evil, far surpassing in subtlety any powers of human imagination to conceive. The Platonic Socrates (for of the real Socrates this may be doubted: cp. Xenophon's Mem. i. 2, 29, 30) does not appear to regard the greatest evil of Greek life as a matter of abhorrence, but as a subject for irony, and is far from resenting the imputation of such attachments. Nor does Plato feel any repugnance, such as would be felt in modern times, in bringing his great master and hero into connection with nameless crimes. He is contented with representing him as a sort of saint, who has won "the Olympian victory" over the temptations of human nature. The fault of taste, which to us appears glaring, and which was recognized by the Greeks of a later age, was not perceived by Plato himself. Still more surprising is the fact itself, that the elevation of sentiment, which is regarded by Plato as the first step in the upward progress of the philosopher, is aroused, not by female beauty, but by the beauty of youth, which alone seems to have been capable of inspiring the modern feeling of romance in the Greek mind. The passion which was unsatisfied by the love of women, took the spurious form of an enthusiasm for the ideal of beauty — a worship as of some godlike image of an Apollo or Antinous. Thus wide is the gulf which separates a portion of Hellenic sentiment

in the age of Plato (for about the opinion of Plato himself, as of Socrates, respecting these male loves we are in the same perplexity which he attributes to his countrymen, 182 A, B; cp. Laws viii. 841 foll.) not only from Christian, but from Homeric feeling.

The character here attributed to Alcibiades is hardly less remarkable than that of Socrates, and agrees with the picture given of him in the first of the two Dialogues which are called by his name, and also with the slight sketch of him in the Protagoras. He is the impersonation of lawlessness — "the lion's whelp, who ought not to be reared in the city," yet not without a certain generosity which gained the hearts of men, — strangely fascinated by Socrates, and possessed of a genius which might have been either the destruction or salvation of Athens. The dramatic interest of the character is heightened by the recollection of his after history. He seems to have been present to the mind of Plato in the description of the democratic man of the Republic (viii. 560).

There is no criterion of the date of the Symposium, except that which is furnished by the allusion to the division of Arcadia after the destruction of Mantineia. This took place in the year B. C. 384, which is the forty-fourth year of Plato's life. The Symposium cannot therefore be regarded as a youthful work. As Mantineia was restored in the year 369, the composition of the Dialogue will probably fall between 384 and 369. Whether the recollection of the event is more likely to have been renewed at the destruction or restoration of the city, rather than at some intermediate period, is a consideration not worth raising.

The Symposium is closely connected with the Phaedrus both in style and matter. They are the only Dialogues of Plato in which the subject of love is considered at length. In both philosophy is regarded as a sort of enthusiasm or madness. Philosophy in the Phaedo might also be described as "dying for love." But while the Phaedo and Phaedrus look backwards and forwards to past and future states of existence, the Symposium is bounded by this world. The intellectual and ethical are held in solution with the physical. Philosophy is not death, or abstraction from life: in and through the sensible world we rise to the ideal. Nor is the eternity of knowledge asserted; but only the eternal succession of knowledge. The immortality is not personal, but an immortality of the race. The Lysis (*sub fin.*) may be compared as containing the first suggestion of the questions finally answered in the speech of Socrates.

The Symposium of Xenophon, in which Socrates describes himself as a pander, and also discourses of the difference between sensual and sentimental love, likewise offers several interesting points of comparison. But the suspicion which hangs over other writings of Xenophon, and the numerous minute references to the Phaedrus and Symposium, throw a doubt on the genuineness of the work. The

Symposium of Xenophon, if written by him at all, would certainly show that he wrote against Plato, and was acquainted with his works. Of this there is no trace in the Memorabilia. Such a rivalry is more characteristic of an imitator than of an original writer. This (so-called) Symposium of Xenophon may therefore have no more title to be regarded as genuine than the confessedly spurious Apology.

There are no means of determining the relative order in time of the Phaedo, Symposium, Phaedrus. The order which has been adopted in this translation rests on no other principle than the desire to bring together in a series the memorials of the life of Socrates.

THE SYMPOSIUM.

PERSONS OF THE DIALOGUE.

APOLLODORUS, *who repeats to his* COMPANION *the dialogue which he had heard from Aristodemus, and had already once narrated to Glaucon.*
PHAEDRUS.
PAUSANIAS.
ERYXIMACHUS.
ARISTOPHANES.
AGATHON.
SOCRATES.
ALCIBIADES.
A TROOP OF REVELERS.

SCENE: — The House of Agathon.

I BELIEVE that I am prepared with an answer. For the day before yesterday I was coming from my own home at Phalerum to the city, and one of my acquaintance, who had caught a sight of the back of me at a distance, in merry mood commanded me to halt: Apollodorus, he cried, O thou man of Phalerum, halt! So I did as I was bid; and then he said, I was looking for you, Apollodorus, only just now, that I might hear about the discourses in praise of love, which were delivered by Socrates, Alcibiades, and others, at Agathon's supper. Phoenix the son of Philip told another person, who told me of them, and he said that you knew; but he was himself very indistinct, and I wish that you would give me an account of them. Who but you should be the reporter of the words of your friend? And first tell me, he said, were you present at this meeting? Steph 172

Your informant, Glaucon, I said, must have been very indistinct indeed, if you imagine that the occasion was recent, or that I could have been present.

Why, yes, he replied, that was my impression.

But how is that possible? I said. For Agathon has not

been in Athens for many years (are you aware of that?), and my acquaintance with Socrates, of whose every action and word I now make a daily study, is not as yet of three years' standing. I used to be running about the world, thinking that I was doing something, and would have done anything rather than be a philosopher: I was almost as miserable as you are now.

173

Well, he said, cease from jesting, and tell me when the meeting occurred.

In our boyhood, I replied, when Agathon won the prize with his first tragedy, on the day after that on which he and his chorus offered the sacrifice of victory.

That is a long while ago, he said; and who told you — did Socrates?

No indeed, I replied, but the same person who told Phoenix; he was a little fellow, who never wore any shoes, Aristodemus, of the deme of Cydathenaeum. He had been at this feast; and I think that there was no one in those days who was a more devoted admirer of Socrates. Moreover, I asked Socrates about the truth of some parts of his narrative, and he confirmed them. Then, said Glaucon, let us have the tale over again; is not the road to Athens made for conversation? And so we walked, and talked of the discourses on love; and therefore, as I said at first, I am prepared with an answer, and will have another rehearsal, if you like. For I love to speak or to hear others speak of philosophy; there is the greatest pleasure in that, to say nothing of the profit. But when I hear any other discourses, especially those of you rich men and traders, they are irksome to me; and I pity you who are my companions, because you always think that you are hard at work when really you are idling. And I dare say that you pity me in return, whom you regard as an unfortunate wight, which I perhaps am. But I certainly know of you what you only think of me — there is the difference.

Companion. I see, Apollodorus, that you are just the same, — always speaking evil of yourself, and of others; and I do believe that you pity all mankind, beginning with yourself and including everybody else with the exception of Socrates, true in this to your old name, which, however deserved, I know not how you acquired, of Apollodorus the madman; for your humor is always to be out of humor with yourself and with everybody except Socrates.

Apollodorus. Yes, friend, and I am proved to be mad, and out of my wits, because I have these notions of myself and you; no other evidence is required.

Com. I have no wish to dispute about that, Apollodorus; but let me renew my request that you would repeat the tale of love.

Apoll. Well, the tale of love was on this wise: But perhaps I had better begin at the beginning, and endeavor to repeat to you the words as Aristodemus gave them. 174

He said that he met Socrates fresh from the bath and sandaled; and as the sight of the sandals was unusual, he asked him whither he was going that he was so fine.

To a banquet at Agathon's, he replied, whom I refused yesterday, fearing the crowd that there would be at his sacrifice, but promising that I would come to-day instead; and I have put on my finery because he is a fine creature. What say you to going with me unbidden?

Yes, I replied, I will go with you, if you like.

Follow then, he said, and let us demolish the proverb that —

"To the feasts of lesser men the good unbidden go:"

instead of which our proverb will run that —

"To the feasts of the good unbidden go the good;"

and this alteration may be supported by the authority of Homer, who not only demolishes but literally outrages this proverb. For after picturing Agamemnon as the most valiant of men, he makes Menelaus, who is but a soft-hearted warrior, come of his own accord [1] to the sacrificial feast of Agamemnon, the worse to the better.

I am afraid, Socrates, said Aristodemus, that I shall rather be the inferior person, who, like Menelaus in Homer, —

"To the feasts of the wise unbidden goes."

But I shall say that I was bidden of you, and then you will have to make the excuse.

"Two going together,"

he replied, in Homeric fashion, may invent an excuse by the way.[2]

This was the style of their conversation as they went along; and a comical thing happened — Socrates stayed behind in a fit of abstraction, and desired Aristodemus, who was waiting, to go on before him. When he reached the house of Agathon

[1] Iliad, xvii. 588. [2] Iliad, x. 224.

he found the doors wide open, and a servant coming out met him, and led him at once into the banqueting-hall in which the guests were reclining, for the banquet was about to begin. Welcome, Aristodemus, said Agathon; you are just in time to sup with us; if you come on any other errand put that off, and make one of us, as I was looking for you yesterday and meant to have asked you, if I could have found you. But what have you done with Socrates?

I turned round and saw that Socrates was missing, and I had to explain that he had been with me with a moment before, and that I came by his invitation.

You were quite right in coming, said Agathon; and where is he himself?

175 He was behind me just now, as I entered, he said, and I cannot think what has become of him.

Go and look for him, boy, said Agathon, and bring him in; do you, Aristodemus, meanwhile take the place by Eryximachus.

Then he said that the attendant assisted him to wash, and that he lay down, and presently another servant came in and said that our friend Socrates had retired into the portico of the neighboring house. "There he is fixed, and when I call to him," said the servant, "he will not stir."

How strange, said Agathon; then you must call him again, and keep calling him.

Let him alone, said my informant; he has just a habit of stopping anywhere and losing himself without any reason; don't disturb him, as I believe he will soon appear.

Well, if you say that, I will not interfere with him, said Agathon. My domestics, who on these occasions become my masters, shall entertain us as their guests. "Put on the table whatever you like," he said to the servants, "as usual when there is no one to give you orders, which I never do. Imagine that you are our hosts, and that I and the company are your guests; and treat us well, and then we shall commend you." After this they supped; and during the meal Agathon several times expressed a wish to send for Socrates, but Aristodemus would not allow him; and when the feast was half over — for the fit, as usual, was not of long duration — Socrates entered. Agathon, who was reclining alone at the end of the table, begged that he would take the place next to him; that I may touch the sage, he said, and get some of that wisdom which came into your mind in the portico. For I am certain that you would not have left until you had found what you were seeking.

How I wish, said Socrates, taking his place as he was desired, that wisdom could be infused through the medium of touch, out of the full into the empty man, like the water which the wool sucks out of the full vessel into an empty one; in that case how much I should prize sitting by you! For you would have filled me full of gifts of wisdom, plenteous and fair, in comparison of which my own is of a very mean and questionable sort, no better than a dream; but yours is bright and only beginning, and was manifested forth in all the splendor of youth the day before yesterday, in the presence of more than thirty thousand Hellenes.

You are insolent, said Agathon; and you and I will have to settle hereafter who bears off the palm of wisdom, and of this Dionysus shall be the judge; but at present you are better occupied with the banquet.

176 Socrates took his place on the couch; and when the meal was ended, and the libations offered, and after a hymn had been sung to the God, and there had been the usual ceremonies, — as they were about to commence drinking, Pausanias reminded them that they had had a bout yesterday, from which he and most of them were still suffering, and they ought to be allowed to recover, and not go on drinking to-day. He would therefore ask, How the drinking could be made easiest?

I entirely agree, said Aristophanes, that we should, by all means, get off the drinking, having been myself one of those who were yesterday drowned in drink.

I think that you are right, said Eryximachus the son of Acumenus; but I should like to hear one other person speak. What are the inclinations of our host?

I am not able to drink, said Agathon.

Then, said Eryximachus, the weak heads like myself, Aristodemus, Phaedrus, and others who never can drink, are fortunate in finding that the stronger ones are not in a drinking mood. (I do not include Socrates, who is an exceptional being, and able either to drink or to abstain.) Well, then, as the company seem indisposed to drink much, I may be forgiven for saying, as a physician, that drinking is a bad practice, which I never, if I can help, follow, and certainly do not recommend to another, least of all to any one who still feels the effects of yesterday's carouse.

I always follow what you advise, and especially what you prescribe as a physician, rejoined Phaedrus the Myrrhinusian,

and the rest of the company, if they are wise, will do the same.

All agreed that drinking was not to be the order of the day. Then, said Eryximachus, as you are all agreed that drinking is to be voluntary, and that there is to be no compulsion, I move, in the next place, that the flute-girl, who has just made her appearance, be told to go away; she may play to herself, or, if she has a mind, to the women who are within. But on this day let us have conversation instead; and, if you will allow me, I will tell you what sort of conversation. This proposal
177 having been accepted, Eryximachus proceeded as follows: —

I will begin, he said, after the manner of Melanippe in Euripides, —

"Not mine the word"

which I am about to speak, but that of Phaedrus. For he is in the habit of complaining that, whereas other gods have poems and hymns made in their honor by the poets, who are so many, the great and glorious god, Love, has not a single panegyrist or encomiast. Many Sophists also, as for example the excellent Prodicus, have descanted in prose on the virtues of Heracles and other heroes; and, what is still more extraordinary, I have met with a philosophical work in which the utility of salt has been made the theme of an eloquent discourse; and many other like things have had a like honor bestowed upon them. And only to think that there should have been an eager interest created about them, and yet that to this day, as Phaedrus well and truly says, no one has ever dared worthily to hymn Love's praises. This mighty deity has been neglected wholly! Now I want to offer Phaedrus a contribution to his feast; nor do I see how the present company can, at this moment, do anything better than honor the god Love. And if you agree to this, there will be no lack of conversation; for I mean to propose that each of us in turn shall make a discourse in honor of Love. Let us have the best which he can make; and Phaedrus, who is sitting first on the left hand, and is the father of the thought, shall begin.

No one will oppose that, Eryximachus, said Socrates; I certainly cannot refuse to speak on the only subject of which I profess to have any knowledge, and Agathon and Pausanias will surely assent; and there can be no doubt of Aristophanes, who is always in the company of Dionysus and Aphrodite; nor

will any one disagree of those whom I see around me. The proposal, as I am aware, may seem hard upon us whose place is last; but that does not matter if we hear some good speeches first. Let Phaedrus begin the praise of Love, and good luck to him. All the company expressed their assent, and desired 178
him to do as Socrates bade him.

Aristodemus did not recollect all that was said, nor do I recollect all that he related to me; but I will tell you what I thought most worthy of remembrance, and what the chief speakers said.

Phaedrus began by affirming that Love is a mighty god, and wonderful among gods and men, but especially wonderful in his birth. For that he is the eldest of the gods is an honor to him; and a proof of this is, that of his parents there is no memorial; neither poet nor prose-writer has ever affirmed that he had any. As Hesiod says: —

> "First Chaos came, and then broad-bosomed Earth,
> The everlasting seat of all that is,
> And Love."

In other words, after Chaos, the Earth and Love, these two came into being. Also Parmenides sings of the generation of the gods: —

> "First in the train of gods, he moulded Love."

And Acusilaus agrees with Hesiod. Thus numerous are the witnesses which acknowledge Love to be the eldest of the gods. And not only is he the eldest, he is also the source of the greatest benefits to us. For I know not any greater blessing to a young man beginning life than a virtuous lover, or to the lover than a beloved youth. For the principle which ought to be the guide of men who would nobly live — that principle, I say, neither kindred, nor honor, nor wealth, nor any other motive is able to implant as surely as love. Of what am I speaking? Of the sense of honor and dishonor, without which neither states nor individuals ever do any good or great work. And I say that a lover who is detected in doing any dishonorable act, or submitting through cowardice when any dishonor is done to him by another, will be more pained at being detected by his beloved than at being seen by his father, or his companions, or any one else. And the beloved has the same feeling about his love, when he again is seen on any disgraceful occasion. And if there were only some way of contriving that a state or an

army should be made up of lovers and their loves, they would be the very best governors of their own city, abstaining from all dishonor, and emulating one another in honor; and when
179 fighting at one another's side, although a mere handful, they would overcome all men. For what lover would not choose rather to be seen by all mankind than by his beloved, either when abandoning his post or throwing away his arms? He would be ready to die a thousand deaths rather than endure this. Or who would desert his beloved or fail him in the hour of danger? The veriest coward would become an inspired hero, equal to the bravest, at such a time; Love would inspire him. That courage which, as Homer says, the God breathes into the soul of heroes, Love of himself infuses into the lover.

Love will make men dare to die for their beloved; and women as well as men. Of this, Alcestis the daughter of Pelias is a monument to all Hellas; for she was willing to lay down her life on behalf of her husband, when no one else would, although he had a father and mother; but the tenderness of her love so far exceeded theirs, that they seemed to be as strangers to their own son, having no concern with him; and so noble did this action of hers appear, not only to men but also to the gods, that among the many who have done virtuously she was one of the very few to whom the gods have granted the privilege of returning to earth, in admiration of her virtue; such exceeding honor is paid by them to the devotion and virtue of love. But Orpheus the son of Oeagrus, because he appeared to them to be a cowardly harper, who did not dare to die for love, like Alcestis, but contrived to go down alive to Hades, was sent back by them without effecting his purpose; to him they showed an apparition only of her whom he sought, but herself they would not give up; moreover, they afterward caused him to suffer death at the hands of women, as the punishment of his intrusiveness. Far other was the reward of the true love of Achilles toward his lover Patroclus — his lover and not his love (the notion that Patroclus was the beloved one is a foolish error into which Aeschylus has fallen, for Achilles was surely the fairer of the two, fairer also than all the other
180 heroes; and he was much younger, as Homer informs us, and he had no beard). And greatly as the gods honor the virtue of love, still the return of love on the part of the beloved to the lover is more admired and valued and rewarded by them, for the lover has a nature more divine and more

worthy of worship. Now Achilles was quite aware, for he had been told by his mother, that he might avoid death and return home, and live to a good old age, if he abstained from slaying Hector. Nevertheless he gave his life to revenge his friend, and dared to die, not only on his behalf, but after his death. Wherefore the gods honored him even above Alcestis, and sent him to the Islands of the Blest. These are my reasons for affirming that Love is the eldest and noblest and mightiest of the gods, and the chiefest author and giver of happiness and virtue, in life and after death.

This, or something like this, was the speech of Phaedrus; and some other speeches followed which Aristodemus did not remember; the next which he repeated was that of Pausanias, who observed that the proposal of Phaedrus was too indiscriminate, and that Love ought not to be praised in this unqualified manner. If there were only one Love, then what he said would be well enough; but since there are more Loves than one, he should have begun by determining which of them was to be the theme of our praises. I will amend this defect, he said; and first of all I will tell you which Love is worthy of praise, and then try to hymn the praiseworthy one in a manner worthy of the God. For we all know that Love is inseparable from Aphrodite, and if there were only one Aphrodite there would be only one Love; but as there are two goddesses there must be two Loves. For am I not right in asserting that there are two goddesses? The elder one, having no mother, who is called the heavenly Aphrodite — she is the daughter of Uranus; the younger, who is the daughter of Zeus and Dione, whom we call common; and the other Love who is her fellow-worker may and must also have the name of common, as the other is called heavenly. All the gods ought to have praise given to them, but still I must discriminate the attributes of the two Loves. For actions vary according to the manner of their performance. Take, for example, that which we are now doing, 181
drinking, singing, and talking; these actions are not in themselves either good or evil, but turn out in this or that way according to the mode of performing them; and when well done they are good, and when wrongly done they are evil; and in like manner not every love, but only that which has a noble purpose, is noble and worthy of praise. But the Love who is the son of the common Aphrodite is essentially common, and has no discrimination, being such as the meaner sort of men

feel, and is apt to be of women as well as of youths, and is of the body rather than of the soul — the most foolish beings are the objects of this love which desires only to gain an end, but never thinks of accomplishing the end nobly, and therefore does good and evil quite indiscriminately. The goddess who is his mother is far younger, and she was born of the union of the male and female, and partakes of both sexes. But the son of the heavenly Aphrodite is sprung from a mother in whose birth the female has no part, but she is from the male only; this is that love which is of youths only, and the goddess being older has nothing of wantonness. Those who are inspired by this love turn to the male, and delight in him who is the more valiant and intelligent nature; any one may recognize the pure enthusiasts in the very character of their attachments. For they love not boys, but intelligent beings whose reason is beginning to be developed, much about the time at which their beards begin to grow. And in choosing them as their companions, they mean to be faithful to them, and to pass their whole life with them, and be with them, and not to take them in their inexperience, and deceive them, and play the fool with them, or run away from one to another of them. But the love of young boys should be forbidden by law, because their future is uncertain; they may turn out good or bad, either in body or soul, and the affection which is devoted to them may be thrown away; in this the good are a law to themselves, and the coarser
182 sort of lovers ought to be restrained by force, as we restrain or attempt to restrain them from fixing their affections on women of free birth. For the abuse of a thing brings discredit on the lawful use, and this has led some to deny the lawfulness of love when they see the impropriety and evil of attachments of this sort; for surely nothing that is decorously and lawfully done can justly be censured. Now in most cities the practice about love is determined by a simple rule, and is easily intelligible. But here and in Lacedaemon there is a perplexity, — in Elis and Boeotia, having no gifts of eloquence, they are very straightforward; the universal sentiment is simply in favor of these connections, and no one, whether young or old, has anything to say to their discredit. The reason is, as I suppose that they are men of few words in those parts, and therefore the lovers do not like the trouble of pleading their suit. But in Ionia and other places, and generally in countries which are subject to the barbarians, loves of youths share the evil repute of philosophy

and gymnastics, because they are inimical to tyranny; for the interests of rulers require that their subjects should be poor in spirit, and that there should be no strong bond of friendship or society among them, and love, above all other motives, is likely to inspire this, as our Athenian tyrants learned by experience; for the love of Aristogeiton and the constancy of Harmodius had a strength which undid their power. And, therefore, the ill-repute into which these attachments have fallen is to be ascribed to the evil condition of those who make them to be ill-reputed; that is to say, to the rapacity of the governors and the cowardice of the governed; on the other hand, the indiscriminate honor which is given to them in some countries is attributable to the laziness of those who hold this opinion of them. There is yet a more excellent way of legislating about them, which is our own way; but this, as I was saying, is rather perplexing. For, observe that open loves are held to be more honorable than secret ones, and that the love of the noblest and highest, even if their persons are less beautiful than others, is especially honorable. Consider, too, how great is the encouragement which all the world gives to the lover; neither is he supposed to be doing anything dishonorable; but if he succeeds he is praised, and if he fail he is blamed. And in the pursuit of his love the custom of mankind allows him to do many strange things, which philosophy would bitterly censure if they 183
were done from any motive of interest, or wish for office or power. He may pray, and entreat, and supplicate, and swear, and be a servant of servants, and lie on a mat at the door; in any other case friends and enemies would be equally ready to prevent him, but now there is no friend who will be ashamed of him and admonish him, and no enemy will charge him with meanness or flattery; the actions of a lover have a grace which ennobles them; and custom has decided that they are highly commendable and that there is no loss of character in them; and, what is yet more strange, he only may swear and forswear himself (this is what the world says), and the gods will forgive his transgression, for there is no such thing as a lover's oath. Such is the entire liberty which gods and men allow the lover, and which in our part of the world the custom confirms. And this is one side of the question, which may make a man fairly think that in this city to love and to be loved is held to be a very honorable thing. But when there is a new regime, and parents forbid their sons to talk with their lovers, and place

them under a tutor's care, and their companions and equals are personal in their remarks when they see anything of this sort going on, and their elders refuse to silence them, and do not reprove their words; any one who reflects on this will, on the contrary, think that we hold these practices to be disgraceful. But the truth, as I imagine, and as I said at first, is, that whether such practices are honorable or whether they are dishonorable is not a simple question; they are honorable to him who follows them honorably, dishonorable to him who follows them dishonorably. There is dishonor in yielding to the evil, or in an evil manner; but there is honor in yielding to the good, or in an honorable manner. Evil is the vulgar lover who loves the body rather than the soul, and who is inconstant because he is a lover of the inconstant; and therefore when the bloom of youth which he was desiring is over, he takes wings and flies away, in spite of all his words and promises; whereas the love of the noble mind, which is in union with the unchangeable, is everlasting. The custom of our country would have them both proven well
184 and truly, and would have us yield to the one sort of love and avoid the other; testing them in contests and trials, which will show to which of the two classes the lover and the beloved respectively belong. And this is the reason why, in the first place, a hasty attachment is held to be dishonorable, because time is the true test of this as of most other things; and then again there is a dishonor in being overcome by the love of money, wealth, or of political power, whether a man suffers and is frightened into surrender at the loss of them, or is unable to rise above the advantages of them. For none of these things are of a permanent or lasting nature; not to mention that no generous friendship ever sprung from them. There remains, then, only one way of honorable attachment which custom allows in the beloved, and this is the way of virtue; any service which the lover did was not to be accounted flattery or dishonor, and the beloved has also one way of voluntary service which is not dishonorable, and this is virtuous service.

For we have a custom, and according to our custom, any one who does service to another under the idea that he will be improved by him either in wisdom, or in some other particular of virtue — such a voluntary service as this, I say, is not regarded as a dishonor, and is not open to the charge of flattery. And these two customs, one the love of youth, and the other the practice of philosophy and virtue in general, ought to meet

in one, and then the beloved may honorably indulge the lover. For when the lover and beloved come together, having each of them a law, and the lover on his part is ready to confer any favor that he rightly can on his gracious loving one, and the other is ready to yield any compliance that he rightly can to him who is to make him wise and good; the one capable of communicating wisdom and virtue, the other seeking after knowledge, and making his object education and wisdom; when the two laws of love are fulfilled and meet in one — then, and then only, may the beloved yield with honor to the lover. Nor when love is of this disinterested sort is there any disgrace in being deceived, but in every other case there is equal disgrace in being or not being deceived. For he who is gracious to his lover under the impression that he is rich, and is disappointed of his gains because he turns out to be poor, 185 is disgraced all the same: for he has done his best to show that he would turn himself to any one's uses base for the sake of money, and this is not honorable. But on the same principle he who lives for the sake of virtue, and in the hope that he will be improved by his lover's company, shows himself to be virtuous, even though the object of his affection be proved to be a villain, and to have no virtue; and if he is deceived he has committed a noble error. For he has proved that for his part he will do anything for anybody for the sake of virtue and improvement, and nothing can be nobler than this. Thus noble in every case is the acceptance of another for the sake of virtue. This is that love which is the love of the heavenly goddess, and is heavenly, and of great price to individuals and cities, making the lover and the beloved alike eager in the work of their own improvement. But all other loves are the offspring of the common or vulgar goddess. To you, Phaedrus, I offer this my encomium of love, which is as good as I could make on the sudden.

When Pāusănĭās cāme tŏ ă pāuse (this is the balanced way in which I have been taught by the wise to speak), Aristodemus said that the turn of Aristophanes was next, but that either he had eaten too much, or from some other cause he had the hiccough, and was obliged to change with Eryximachus the physician, who was reclining on the couch below him. Eryximachus, he said, you ought either to stop my hiccough, or to speak in my turn until I am better.

I will do both, said Eryximachus: I will speak in your turn,

and do you speak in mine; and while I am speaking let me recommend you to hold your breath, and if this fails, then to gargle with a little water; and if the hiccough still continues, tickle your nose with something and sneeze; and if you sneeze once or twice, even the most violent hiccough is sure to go. In the mean time I will take your turn, and you shall take mine. I will do as you prescribe, said Aristophanes, and now get on.

Eryximachus spoke as follows: Seeing that Pausanias made
186 a fair beginning, and but a lame ending, I will endeavor to supply his deficiency. I think that he has rightly distinguished two kinds of love. But my art instructs me that this double love is to be found in all animals and plants, and I may say in all that is; and is not merely an affection of the soul of man towards the fair, or towards anything; that, I say, is a view of the subject which I seem to have gathered from my own art of medicine, which shows me how great and wonderful and universal is this deity, whose empire is over all that is, divine as well as human. And from medicine I will begin that I may do honor to my art. For there are in the human body two loves, which are confessedly different and unlike, and being unlike, have loves and desires which are unlike; and the desire of the healthy is one, and the desire of the diseased is another; and, as Pausanias says, the good are to be accepted, and the bad are not to be accepted; and so too in the body the good and healthy elements are to be indulged, and the bad elements and the elements of desire are not to be indulged, but discouraged. And this is what the physician has to do, and in this the art of medicine consists: for medicine may be regarded generally as the knowledge of the loves and desires of the body, and how to fill or empty them; and the good physician is he who is able to separate fair love from foul, or to convert one into the other; and if he is a skillful practitioner, he knows how to eradicate and how to implant love, whichever is required, and he can reconcile the most hostile elements in the constitution, and make them friends. Now the most hostile are the most opposite, such as hot and cold, moist and dry, bitter and sweet, and the like. And my ancestor, Asclepius, knowing how to implant friendship and accord in these elements, was the creator of our art, as our friends the poets here tell us, and I believe them; and not only medicine in every branch, but the arts of gymnastic and husbandry are under his dominion. Any

one who pays the least attention will also perceive that 187
in music there is the same reconciliation of opposites; and
I suppose that this must have been the meaning of Heracleitus,
although his words are not accurate; for he says that one is
united by disunion, like the harmony of the bow and the lyre.
Now there is an absurdity in saying that harmony is disagree-
ment or is composed of elements which are still in a state of
disagreement. But perhaps what he really meant to say was
that harmony is composed of differing notes of higher or lower
pitch which disagreed once, but are now reconciled by the art
of music; for if the higher and lower notes still disagreed, there
could be no harmony, as is indeed evident. For harmony is a
symphony, and symphony is an agreement; but an agreement
of disagreements while they disagree cannot exist; there is no
harmony of discord and disagreement. This may be illustrated
by rhythm, which is composed of elements short and long, once
differing and now in accord; which accordance, as in the former
instance, medicine, so in this, music implants, making love and
unison to grow up among them: and thus music, too, is con-
cerned with the principles of love in their application to har-
mony and rhythm. Again, in the abstract principles of har-
mony and rhythm there is no difficulty in discerning them, for
as yet love has no double nature. But when you want to use
them in actual life, either in the composition of music or in the
correct performance of airs or metres composed already, which
latter is called education, then the difficulty begins, and the
good artist is needed. Then the old tale has to be repeated of
fair and heavenly love — the love of Urania the fair and heav-
enly muse, and of the duty of accepting the temperate, and the
intemperate only that they may become temperate, and of pre-
serving their love; and again, of the vulgar Polyhymnia, who
must be used with circumspection that the pleasure may not
generate licentiousness; just as in my own art great skill is
shown in gratifying the taste of the epicure without inflicting
upon him the attendant evil of disease. The conclusion is that
in music, in medicine, in all other things human as well as
divine, both loves ought to be noted as far as may be, for 188
they are both present.

The course of the seasons is also full of both principles; and
when, as I was saying, the elements of hot and cold, moist and
dry, attain the harmonious love of one another and blend in tem-
perance and harmony, they bring to men, animals, and vegetables,

health and wealth, and do them no harm: whereas the wantor ness and overbearingness of the other love affecting the seasor is a great injurer and destroyer, and is the source of pestilenc and brings many different sorts of diseases on animals and plants for hoar-frost and hail and blight spring from the excesses an disorders of these elements of love, the knowledge of which i relation to the revolutions of the heavenly bodies and the season of the year is termed astronomy. Furthermore all sacrifices an the whole art of divination, which is the art of communion be tween gods and men, — these, I say, are concerned only with th salvation and healing power of love. For all impiety is likely t ensue if, instead of accepting and honoring and reverencing th harmonious love in all his actions, a man honors the other love whether in his feelings towards gods or parents, towards the liv ing or the dead. Wherefore the business of divination is to se to these loves and to heal them, and divination is the peace maker of gods and men, working by a knowledge of the religiou or irreligious tendencies which exist in merely human love Such is the great and mighty, or rather universal, force of all love And that love, especially, which is concerned with the good, an which is perfected in company with temperance and justice whether among gods or men, has the greatest power, and is th source of all our happiness and harmony and friendship with th gods which are above us, and with one another. I dare say tha I have omitted several things which might be said in praise o Love, but this was not intentional, and you, Aristophanes, ma now supply the omission or take some other line of commenda tion; as I perceive that you are cured of the hiccough.

189 Yes, said Aristophanes, who followed, the hiccough i gone; not, however, until I applied the sneezing; and wonder whether the principle of order in the human frame re quires these sort of noises and ticklings, for I no sooner applie the sneezing than I was cured.

Eryximachus said: Take care, friend Aristophanes, you ar beginning with a joke, and I shall have to watch if you tal nonsense; and the interruption will be occasioned by your ow fault.

You are very right, said Aristophanes, laughing, and I wi retract what I said; and do you please not to watch me, as I fea that in what I am going to say, instead of making others laugl which is to the manner born of our muse and would be all th better, I shall only be laughed at by them.

Do you expect to shoot your bolt and escape, Aristophanes? Well, if you are very careful and have a due sense of responsibility, I may be induced to let you off.

Aristophanes professed to open another vein of discourse; he had a mind to praise Love in another way, not like that either of Pausanias or Eryximachus. Mankind, he said, judging by their neglect of him, have never, as I think, at all understood the power of Love. For if they had understood him they would surely have built noble temples and altars, and offered solemn sacrifices in his honor; but this is not done, and certainly ought to be done: for of all the gods he is the best friend of men, the helper and the healer of the ills which are the great obstruction to the happiness of the race. I shall rehearse to you his power, and you may repeat what I say to the rest of the world. And first let me treat of the nature and state of man; for the original human nature was not like the present, but different. In the first place, the sexes were originally three in number, not two as they are now; there was man, woman, and the union of the two, having a name corresponding to this double nature; this once had a real existence, but is now lost, and the name only is preserved as a term of reproach. In the second place, the primeval man was round and had four hands and four feet, back and sides forming a circle, one head with two faces, looking opposite ways, set on a round neck and precisely alike; also four ears, two privy members, and the remainder to correspond. When he had 190
a mind he could walk as men now do, and he could also roll over and over at a great rate, leaning on his four hands and four feet, eight in all, like tumblers going over and over with their legs in the air; this was when he wanted to run fast. Now there were these three sexes, because the sun, moon, and earth are three; and the man was originally the child of the sun, the woman of the earth, and the man-woman of the moon, which is made up of sun and earth, and they were all round and moved round and round like their parents. Terrible was their might and strength, and the thoughts of their hearts were great, and they made an attack upon the gods; and of them is told the tale of Otus and Ephialtes who, as Homer says, dared to scale heaven, and would have laid hands upon the gods. Doubt reigned in the councils of Zeus and of the gods. Should they kill them and annihilate the race with thunderbolts, as they had done the giants, then there would be an end of the sacrifice and worship which men offered to them; but, on the other hand, the gods could not suffer

their insolence to be unrestrained. At last, after a good deal o reflection, Zeus discovered a way. He said: "I have a notio which will humble their pride and mend their manners; the shall continue to exist, but I will cut them in two, and then the will be diminished in strength and increased in numbers; thi will have the advantage of making them more profitable to u They shall walk upright on two legs, and if they continue insc lent and won't be quiet, I will split them again and they sha hop about on a single leg." He spoke and cut men in two, like sorb-apple which is halved for pickling, or as you might divide a egg with a hair; and as he cut them one after another, he bad Apollo give the face and the half of the neck a turn in order tha the man might contemplate the section of himself: this would teac him a lesson of humility. He was also to heal their wounds an compose their forms. Apollo twisted the face and pulled the ski all round over that which in our language is called the belly like the purses which draw in, and he made one mouth in th centre, which he fastened in a knot (this is called the navel) 191 he also moulded the breast and took out most of the wrink les, much as a shoemaker might smooth out leather upon a last he left a few, however, in the region of the belly and navel, a a memorial of the primeval change. After the division the tw parts of man, each desiring his other half, came together, an threw their arms about one another eager to grow into one and would have perished from hunger without ever making a effort, because they did not like to do anything apart; and whe one of the halves died and the other survived, the survivor sough another mate, whether the section of an entire man or of an en tire woman, which had usurped the name of man and woman, an clung to that. And this was being the destruction of them, whe Zeus in pity invented a new plan: he turned the parts of gene ration round in front, for this was not always their position, an they sowed the seed no longer as hitherto like grasshopper in the ground, but in one another; and after the transpositio the male generated in the female in order that by the mutua embraces of man and woman they might breed, and the rac might continue; or if man came to man they might be satisfie and rest and go their ways to the business of life: so ancient i the desire of one another which is implanted in us, reuniting ou original nature, making one of two, and healing the state of ma Each of us when separated is but the indenture of a man, havin one side only like a flat fish, and he is always looking for hi

other half. Men who are a section of that double nature which was once called Androgynous are lascivious; adulterers are generally of this breed, and also adulterous and lascivious women: the women who are a section of the woman don't care for men, but have female attachments; the female companions are of this sort. But the men who are a section of the male follow the male, and while they are young, being a piece of the man, 192
they hang about him and embrace him, and they are themselves the best of boys and youths because they have the most manly nature. Some indeed assert that they are shameless, but this is not true; for they do not act thus from any want of shame, but because they are valiant and manly, and have a manly countenance, and they embrace that which is like them. And these when they grow up are our statesmen, and these only, which is a great proof of the truth of what I am saying. And when they reach manhood they are lovers of youth, and are not naturally inclined to marry or beget children, which they do, if at all, only in obedience to the law, but they are satisfied if they may be allowed to live unwedded; and such a nature is prone to love and ready to return love, and always embracing that which is akin to him. And when one of them finds his other half, whether he be a lover of youth or a lover of another sort, the pair are lost in an amazement of love and friendship and intimacy, and one will not be out of the other's sight, as I may say, even for a moment: these are they who pass their lives with one another; yet they could not explain what they desire of one another. For the intense yearning which each of them has towards the other does not appear to be the desire of intercourse, but of something else which the soul desires and cannot tell, and of which she has only a dark and doubtful presentiment. Suppose Hephaestus, with his instruments, to come to the pair who are lying side by side and say to them, "What do you people want of one another?" they would be unable to explain. And suppose further, that when he saw their perplexity he said: "Do you desire to be wholly one; always day and night to be in one another's company? for if this is what you desire, I am ready to melt you into one and let you grow together, so that being two you shall become one, and while you live live a common life as if you were a single man, and after your death in the world below still be one departed soul instead of two — I ask whether this is what you lovingly desire, and whether you are satisfied to attain this?" — there is not a man among them when he heard

this who would deny or who would not acknowledge that the meeting and melting in one another's arms, this becoming one instead of two, was the very expression of his ancient need. And the reason is that human nature was originally one and we were
193 a whole, and the desire and pursuit of the whole is called love. There was a time, I say, when the two were one, but now because of this wickedness of men God has dispersed us, as the Arcadians were dispersed into villages by the Lacedaemonians. And if we are not obedient to the gods there is a danger that we shall be split up again and go about in basso-relievo like the figures having only half a nose which are sculptured on columns, and that we shall be like tallies. Wherefore let us exhort all men to piety, that we may avoid the evil and obtain the good, of which Love is the lord and leader; and let no one oppose him — he is the enemy of the gods who opposes him. For if we are friends of God and reconciled to him we shall find our own true loves, which rarely happens in this world. I am serious, and therefore I must beg Eryximachus not to make fun or to find any allusion to Pausanias and Agathon, who, as I believe, are of the manly sort such as I have been describing. But my words have a wider application — they include men and women everywhere; and I believe that if all of us obtained our love, and each one had his particular beloved, thus returning to his original nature, then our race would be happy. And if this would be best of all, that which would be best under present circumstances would be the nearest approach to such a union; and that will be the attainment of a congenial love. Therefore we shall do well to praise the god Love, who is the author of this gift, and who is also our greatest benefactor, leading us in this life back to our own nature, and giving us high hopes for the future, that if we are pious, he will restore us to our original state, and heal us and make us happy and blessed. This, Eryximachus, is my discourse of love, which, although different from yours, I must beg you to leave unassailed by the shafts of your ridicule, in order that each may have his turn; each, or rather either, for Agathon and Socrates are the only ones left.

Indeed, I am not going to attack you, said Eryximachus, for I thought your speech charming, and did I not know that Agathon and Socrates are masters in the art of love, I should be really afraid that they would have nothing to say, after all the
194 world of things which have been said already. But, for all that, I am not without hopes.

Socrates said: You did your part well, Eryximachus; but if you were as I am now, or rather as I shall be when Agathon has spoken, you would, indeed, be in a great strait.

You want to cast a spell over me, Socrates, said Agathon, in the hope that I may be disconcerted, thinking of the anticipation which the theatre has of my fine speech.

I should be strangely forgetful, Agathon, replied Socrates, of the courage and magnanimity which you showed when your own compositions were about to be exhibited, coming upon the stage with the actors and facing the whole theatre altogether undismayed, if I thought that your nerves could be fluttered at a small party of friends.

Do you think, Socrates, said Agathon, that my head is so full of the theatre as not to know how much more formidable to a man of sense a few good judges are than many fools?

Nay, replied Socrates, I should be very wrong in attributing to you, Agathon, that or any other want of refinement. And I am quite aware that if you happened to meet with any one whom you thought wise, you would care for his opinion much more than for that of the many. But then we, having been a part of the foolish many in the theatre, cannot be regarded as the select wise; though I know that if you chanced to light upon a really wise man, you would be ashamed of disgracing yourself before him, — would you not?

Yes, said Agathon.

But you would not be ashamed of disgracing yourself before the many?

Here Phaedrus interrupted them, saying: Don't answer him, my dear Agathon; for if he can only get a partner with whom he can talk, especially a good-looking one, he will no longer care about the completion of our plan. Now I love to hear him talk; but just at present I must not forget the encomium on Love which I ought to receive from him and every one. When you and he have paid the tribute to the God, then you may talk.

Very good, Phaedrus, said Agathon; I see no reason why I should not proceed with my speech, as I shall have other opportunities of conversing with Socrates. Let me say first how I ought to speak, and then speak.

The previous speakers, instead of praising the god Love, or unfolding his nature, appear to have congratulated mankind on the benefits which he confers upon them. But 195

I would rather praise the God first, and then speak of his gifts; this is always the right way of praising everything. May I express unblamed then, that of all the blessed gods he is the blessedest and the best? And also the fairest, which I prove in this way: for, in the first place, Phaedrus, he is the youngest, and of his youth he is himself the witness, fleeing out of the way of age, which is swift enough surely, swifter than most of us like: yet he cannot be overtaken by him; he is not a bird of that feather; youth and love live and move together, — like to like, as the proverb says. There are many things which Phaedrus said about Love in which I agree with him; but I cannot agree that he is older than Iapetus and Kronos — that is not the truth; as I maintain, he is the youngest of the gods, and youthful ever. The ancient things of which Hesiod and Parmenides speak, if they were done at all, were done of necessity and not of love; had love been in those days, there would have been no chaining or mutilation of the gods, or other violence, but peace and sweetness, as there is now in heaven, since the rule of Love began. Love is young and also tender; he ought to have a poet like Homer to describe his tenderness, as Homer says of Ate, that she is a goddess and tender: —

> "Her feet are tender, for she sets her steps,
> Not on the ground but on the heads of men:"

which is an excellent proof of her tenderness, because she walks not upon the hard but upon the soft. Let us adduce a similar proof of the tenderness of Love; for he walks not upon the earth, nor yet upon the skulls of men, which are hard enough, but in the hearts and souls of men: in them he walks and dwells and has his home. Not in every soul without exception, for where there is hardness he departs, where there is softness there he dwells; and clinging always with his feet and in all manner of ways in the softest of soft places, how can he
196 be other than the softest of all things? And he is the youngest as well as the tenderest, and also he is of flexile form; for without flexure he could not enfold all things, or wind his way into and out of every soul of man without being discovered, if he were hard. And a proof of his flexibility and symmetry of form is his grace, which is universally admitted to be in an especial manner the attribute of Love; ungrace and love are always at war with one another. The fairness of his complexion is revealed by his habitation among the flowers; for he dwells not amid unflowering or fading beauties, whether

of body or soul or aught else, but in the place of flowers and scents, there he dwells and abides. Enough of his beauty, — of which, however, there is more to tell. But I must now speak of his virtue: his greatest glory is that he can neither do nor suffer wrong from any god or any man; for he suffers not by force if he suffers, for force comes not near him, neither does he act by force. For all serve him of their own free-will, and where there is love as well as obedience, there, as the laws which are the lords of the city say, is justice. And not only is he just but exceedingly temperate, for Temperance is the acknowledged ruler of the pleasures and desires, and no pleasure ever masters Love; he is their master and they are his servants; and if he conquers them he must be temperate indeed. As to courage, even the God of War is no match for him; he is the captive and Love is the lord, for love, the love of Aphrodite, masters him, as the tale runs; and the master is stronger than the servant. And if he conquers the bravest of all he must be himself the bravest. Of his courage and justice and temperance I have spoken; but I have yet to speak of his wisdom, and I must try to do my best, according to the measure of my ability. For in the first place he is a poet (and here, like Eryximachus, I magnify my art), and he is also the source of poesy in others, which he could not be if he were not himself a poet. And at the touch of him every one becomes a poet, even though he had no music in him before; this also is a proof that Love is a good poet and accomplished in all the musical arts; for no one can give to another that which he has not himself, or teach that of which he has no knowledge. Who will deny that the creation of the animals is his doing? 197
Are they not all the works of his wisdom, born and begotten of him? And as to the artists, do we not know that he only of them whom love inspires has the light of fame? — he whom love touches not walks in darkness. The arts of medicine and archery and divination were discovered by Apollo, under the guidance of love and desire, so that he too is a disciple of Love. Also the melody of the Muses, the metallurgy of Hephaestus, the weaving of Athene, the empire of Zeus over gods and men, are all due to Love, who was the inventor of them. Love set in order the empire of the gods, — the love of beauty, as is evident, for of deformity there is no love. And formerly, as I was saying, dreadful deeds were done among the gods, because of the rule of necessity; but now since the birth of Love, and from

the love of the beautiful, has sprung every good in heaven and earth. Therefore, Phaedrus, I say of Love that he is the fairest and best in himself, and the cause of what is fairest and best in all other things. And I have a mind to say of him in verse that he is the god who —

> "Gives peace on earth and calms the stormy deep,
> Who stills the waves and bids the sufferer sleep."

He makes men to be of one mind at a banquet such as this, fulfilling them with affection and emptying them of disaffection. In sacrifices, banquets, dances, he is our lord, — supplying kindness and banishing unkindness, giving friendship and forgiving enmity, the joy of the good, the wonder of the wise, the amazement of the gods; desired by those who have no part in him, and precious to those who have the better part in him; parent of delicacy, luxury, desire, fondness, softness, grace; careful of the good, uncareful of the evil. In every word, work, wish, fear, — pilot, helper, defender, savior; glory of gods and men, leader best and brightest: in whose footsteps let every man follow, chanting a hymn and joining in that fair strain with which Love charms the souls of gods and men. Such is the discourse, Phaedrus, half playful, yet having a certain measure
198 of seriousness, which, according to my ability, I dedicate to the God.

When Agathon had done speaking, Aristodemus said that there was a general cheer; the fair youth was thought to have spoken in a manner worthy of himself, and of the God. And Socrates, looking at Eryximachus, said: Tell me, son of Acumenus, was I not a prophet? Did I not anticipate that Agathon would make a wonderful oration, and that I should be in a strait?

I think, said Eryximachus, that you were right in the first anticipation, but not in the second.

Why, my dear friend, said Socrates, must not I or any one be in a strait who has to speak after such a rich and varied discourse as that? I am especially struck with the beauty of the concluding words — who could listen to them without amazement? When I reflected on the immeasurable inferiority of my own powers, I was ready to run away for shame, if there had been any escape. For I was reminded of Gorgias, and at the end of his speech I fancied that Agathon was shaking at me the Gorginian or Gorgonian head of the great master of

rhetoric, which was simply to turn me and my speech into stone, as Homer says, and strike me dumb. And then I perceived how foolish I had been in consenting to take my turn with you in praising love, and saying that I too was a master of the art, when I really had no idea of the meaning of the word "praise," which appears to be another name for glorification, whether true or false; in which sense of the term I am unable to praise anything. For I in my simplicity imagined that the topics of praise should be true; this was to be the foundation, and that out of them the speaker was to choose the best and arrange them in the best order. And I felt quite proud, and thought that I could speak as well as another, as I knew the nature of true praise. Whereas I see now that the intention was to attribute to Love every species of greatness and glory, whether really belonging to him or not, without regard to truth or falsehood — that was no matter; for the original proposal seems to have been not that you should praise, but only that you should appear to praise him. And you attribute to Love every imaginable form of praise, and say that "he is all this," "the cause of all this" in order that you may exhibit him as the fairest and best of all; and this of course 199
imposes on the unwary, but not on those who know him: and a noble and solemn hymn of praise have you rehearsed. But as I misunderstood the nature of the praise when I said that I would take my turn, I must beg to be absolved from the promise which (as Euripides would say) was a promise of the lips and not of the mind. Farewell then to such a strain: for that is not my way of praising; no, indeed, I cannot attain to that. But if you like to hear the truth about love, I am ready to speak in my own manner, though I will not make myself ridiculous by entering into any rivalry with you. Say then, Phaedrus, whether you would like to have the truth about love, spoken in any words and in any order which may happen to come into my mind at the time. Will that be agreeable to you?

Aristodemus said that Phaedrus and the company bid him take his own course. Then, he said, let me have your permission first to ask Agathon a few more questions, in order that I may take his admissions as the premises of my discourse.

I grant the permission, said Phaedrus: put your questions. Socrates then proceeded as follows: —

In the magnificent discourse which you have uttered, I think

that you were right, my dear Agathon, in saying that you would begin with the nature of Love and then afterwards speak of his works — that is a way of beginning which I very much approve. And as you have spoken thus eloquently of the nature of Love, will you answer me a further question? — Is love the love of something or of nothing? And here I must explain myself: I do not want you to say that love is the love of a father or the love of a mother — that would be ridiculous; but to answer as you would, if I asked is a father a father of something? to which you would find no difficulty in replying, of a son or daughter: and that would be right.

Very true, said Agathon.

And you would say the same of a mother?

He assented.

Yet let me ask you one more question in order further to illustrate my meaning. Is not a brother to be regarded essentially as a brother of something?

Certainly, he replied.

That is, of a brother or sister?

Yes, he said.

And now, said Socrates, I will ask about love: Is love of something or of nothing?

200 Of something, surely, he replied.

Keep in mind what this is, and tell me what I want to know — whether love desires that of which love is.

Yes, surely.

And does he possess, or does he not possess, that which he loves and desires?

Probably not, I should say.

Nay, replied Socrates, I would have you consider whether necessarily is not rather the word. The inference that he who desires something is in want of something, and that he who desires nothing is in want of nothing, is in my judgment, Agathon, absolutely and necessarily true. What do you think?

I think with you, said Agathon, in that.

Very good. And would he who is great desire to be great, or he who is strong desire to be strong?

That would be inconsistent with our previous admissions.

True. For he who is anything cannot want to be that which he is?

Very true.

But if, added Socrates, a man being strong desired to be

strong, or being swift desired to be swift, or being healthy desired to be healthy (for any one may be imagined to desire any quality which he already has), in these cases there might be an objection raised — they might be said to desire that which they have already. I give the example in order that we may avoid misconception. For as you may see, Agathon, these persons must be supposed to have their respective advantages at the time, whether they choose or not; and surely no man can desire that which he has. And therefore, when a person says, I am well and wish to be well, or, I am rich and wish to be rich, and I desire simply what I have; we shall reply to him: "You, my friend, having wealth and health and strength, want to have the continuance of them; for at this moment, whether you choose or no, you have them. And when you say, I desire that which I have and nothing else, is not your meaning that you want to have what you now have in the future?" He must allow this?

He must, said Agathon.

Then, said Socrates, this is equivalent to desiring not what he has or possesses already, but that what he has may be preserved to him in the future?

Very true, he said.

Then he and every one who desires, desires that which he has not already, and which is future and not present, and which he has not, and is not, and of which he is in want; these are the sort of things which love and desire seek?

Very true, he said.

201 Then now, said Socrates, let us recapitulate the argument. First, is not love of something, and of something too which is wanting to a man?

Yes, he replied.

Remember further what you said in your speech, or if you do not remember I will remind you: you said that the love of the beautiful disposes the empire of the gods, for that of deformed things there is no love — did you not say something like that?

Yes, said Agathon.

Yes, my friend, and the remark is a just one. And if this is true, love is the love of beauty and not of deformity?

He assented.

And the admission has been already made that love is of that which a man wants and has not?

True, he said.

Then love wants and has not beauty?

Certainly, he replied.

And would you call that beautiful which wants and does not possess beauty?

Certainly not.

Then would you still say that love is beautiful?

Agathon replied: I fear that I did not understand what I was saying.

Nay, Agathon, replied Socrates; but I should like to ask you one more question: Is not the good also the beautiful?

Yes.

Then in wanting the beautiful, love wants also the good?

I cannot refute you, Socrates, said Agathon. And let us suppose that what you say is true.

Say rather, dear Agathon, that you cannot refute the truth; for Socrates is easily refuted.

And now I will take my leave of you, and rehearse the tale of love which I heard once upon a time from Diotima of Mantineia, who was a wise woman in this and many other branches of knowledge. She was the same who deferred the plague of Athens ten years by a sacrifice, and was my instructress in the art of love. In the attempt which I am about to make I shall pursue Agathon's method, and begin with his admissions, which are nearly if not quite the same which I made to the wise woman when she questioned me: this will be the easiest way, and I shall take both parts myself as well as I can. For, like Agathon, she spoke first of the being and nature of Love, and then of his works. And I said to her in nearly the same words which he used to me, that Love was a mighty god, and likewise fair; and she proved to me as I proved to him that, in my way of speaking about him, Love was neither fair nor good. "What do you mean, Diotima," I said; "is love then evil and foul?" "Hush," she cried; "is that to be deemed foul which is not
202 fair?" "Certainly," I said. "And is that which is not wise, ignorant? do you not see that there is a mean between wisdom and ignorance?" "And what is this?" I said. 'Right opinion," she replied; "which, as you know, being incapable of giving a reason, is not knowledge (for how could knowledge be devoid of reason? nor again, ignorance, for neither can ignorance attain the truth), but is clearly something which is a mean between ignorance and wisdom." "Quite true," I replied. "Do not then insist," she said, "that what

is not fair is of necessity foul, or what is not good, evil; or infer that because Love is not fair and good he is therefore foul and evil; for he is in a mean betweeu them." "Well," I said, "Love is surely admitted by all to be a great god." "By those who know or by those who don't know?" "By all." "And how, Socrates," she said with a smile, "can Love be acknowledged to be a great god by those who say that he is not a god at all?" "And who are they?" I said. "You and I are two of them," she replied. "How can that be?" I said. "That is very intelligible," she replied; "as you yourself would acknowledge that the gods are happy and fair — of course you would — would you dare to say that any god was not?" "Certainly not," I replied. "And you mean by the happy, those who are the possessors of things good or fair?" "Yes." "And you admitted that Love, because he was in want, desires those good and fair things of which he is in want?" "Yes, I admitted that." "But how can he be a god who has no share in the good or the fair?" "That is not to be supposed." "Then you see that you also deny the deity of Love."

"What then is Love?" I asked; "Is he mortal?" "No." "What then?" "As in the former instance, he is neither mortal nor immortal, but in a mean between them." "What is he then, Diotima?" "He is a great spirit (δαίμων), and like all that is spiritual he is intermediate between the divine and the mortal." "And what is the nature of this spiritual power?" I said. "This is the power," she said, "which interprets and conveys to the gods the prayers and sacrifices of men, and to men the commands and rewards of the gods; and this power spans the chasm which divides them, and in this all is bound together, and through this the arts of the prophet and the priest, their sacrifices and mysteries and charms, and all prophecy and incantation, find their way. For God mingles not with man; and through this power all the intercourse and speech of God with man, whether awake or asleep, is carried on. The wisdom which understands this is spiritual; all other wisdom, such as that of arts or handicrafts, is mean and vulgar. Now these spirits or intermediate powers are many and divine, and one of them is Love." "And who," I said, "was his father, and who his mother?" "The tale," she said, "will take time; nevertheless I will tell you. On the birthday of Aphrodite there was a feast of the gods, at which the god Poros or Plenty, who is the son of Metis or Discretion, was one of the guests. 205

When the feast was over, Penia or Poverty, as the manner was, came about the doors to beg. Now Plenty, who was the worse for nectar (there was no wine in those days), came into the garden of Zeus and fell into a heavy sleep; and Poverty considering her own straitened circumstances, plotted to have him for a husband, and accordingly she lay down at his side and conceived Love, who partly because he is naturally a lover of the beautiful, and because Aphrodite is herself beautiful, and also because he was born on Aphrodite's birthday, is her follower and attendant. And as his parentage is, so also are his fortunes. In the first place he is always poor, and anything but tender and fair, as the many imagine him; and he is hard-featured and squalid, and has no shoes, nor a house to dwell in; on the bare earth exposed he lies under the open heaven, in the streets, or at the doors of houses, taking his rest; and like his mother he is always in distress. Like his father too, whom he also partly resembles, he is always plotting against the fair and good; he is bold, enterprising, strong, a hunter of men, always at some intrigue or other, keen in the pursuit of wisdom, and never wanting resources; a philosopher at all times, terrible as an enchanter, sorcerer, Sophist; for as he is neither mortal nor immortal, he is alive and flourishing at one moment when he is in plenty, and dead at another moment, and again alive by reason of his father's nature. But that which is always flowing in is always flowing out, and so he is never in want and never in wealth, and he is also in a mean between ignorance and knowl-
204 edge. The truth of the matter is just this: No god is a philosopher or secker after wisdom, for he is wise already; nor does any one else who is wise seek after wisdom. Neither do the ignorant seek after wisdom. For herein is the evil of ignorance, that he who is neither good nor wise is nevertheless satisfied: he feels no want, and has therefore no desire." "But who then, Diotima," I said, "are the lovers of wisdom, if they are neither the wise nor the foolish?" "A child may answer that question," she replied; "they are those who, like Love, are in a mean between the two. For wisdom is a most beautiful thing, and love is of the beautiful; and therefore Love is also a philosopher or lover of wisdom, and being a lover of wisdom is in a mean between the wise and the ignorant. And this again is a quality which Love inherits from his parents; for his father is wealthy and wise, and his mother poor and foolish. Such, my dear Socrates, is the nature of the spirit Love. The error

in your conception of him was very natural, and as I imagine from what you say, has arisen out of a confusion of love and the beloved — this made you think that love was all beautiful. For the beloved is the truly beautiful, delicate, and perfect and blessed; but the principle of love is of another nature, and is such as I have described."

I said: "O thou strange woman, thou sayest well, and now, assuming Love to be such as you say, what is the use of him?" "That, Socrates," she replied, "I will proceed to unfold: of his nature and birth I have already spoken; and you acknowledge that love is of the beautiful. But some one will say: Of the beautiful in what, Socrates and Diotima? — or rather let me put the question more clearly, and ask: When a man loves the beautiful, what does he love?" I answered her, "That the beautiful may be his." "Still," she said, "the answer suggests a further question, which is this: What is given by the possession of beauty?" "That," I replied, "is a question to which I have no answer ready." "Then," she said, "let me put the word 'good' in the place of the beautiful, and repeat the question: What does he who loves the good desire?" "The possession of the good," I said. "And what does he gain who possesses the good?" "Happiness," I replied; "there is no difficulty in answering that." "Yes," she said, "the happy are made happy by the acquisition of good things. Nor is there any need to ask why a man desires happiness; the answer is already final." "That is true," I said. "And is this wish and this desire common to all? and do all men always desire their own good, or only some men? — what think you?" "All men," I replied; "the desire is common to all." "But all men, Socrates," she rejoined, "are not said to love, but only some of them; and you say that all men are always loving the same things." "I myself wonder," I said, "why that is." "There is nothing to wonder at," she replied; "the reason is that one part of love is separated off and receives the name of the whole, but the other parts have other names." "Give an example," I said. She answered me as follows: "There is poetry, which, as you know, is complex and manifold. And all creation or passage of non-being into being is poetry or making, and the processes of all art are creative; and the masters of arts are all poets." "Very true." "Still," she said, "you know that they are not called poets, but have other names; the generic term 'poetry' is confined to that specific art which is

205

separated off from the rest of poetry, and is concerned with music and metre; and this is what is called poetry, and they who possess this kind of poetry are called poets." "Very true," I said. "And the same holds of love. For you may say generally that all desire of good and happiness is due to the great and subtle power of Love; but those who, having their affections set upon him, are yet diverted into the paths of money-making or gymnastic philosophy, are not called lovers, — the name of the genus is reserved for those whose devotion takes one form only, — they alone are said to love, or to be lovers." "In that," I said, "I am of opinion that you are right." "Yes," she said, "and you hear people say that lovers are seeking for the half of themselves; but I say that they are seeking neither for the half, nor for the whole, unless the half or the whole be also a good. And they will cut off their own hands and feet and cast them away, if they are evil; for they love them not because they are their own, but because they are good, and dislike them not because they are another's, but because they are evil. There is nothing which men love but the good. Do
206 you think that there is?" "Indeed," I answered, "I should say not." "Then," she said, "the conclusion of the whole matter is, that men love the good." "Yes," I said. "To which may be added that they love the possession of the good?" "Yes, that may be added." "And not only the possession, but the everlasting possession of the good?" "That may be added too." "Then love," she said, "may be described generally as the love of the everlasting possession of the good?" "That is most true," I said.

"Then if this be the nature of love, can you tell me further," she said, "what is the manner of the pursuit? what are they doing who show all this eagerness and heat which is called love? Answer me that." "Nay, Diotima," I said, "if I had known I should not have wondered at your wisdom, or have come to you to learn." "Well," she said, "I will teach you; love is only birth in beauty, whether of body or soul." "The oracle requires an explanation," I said; "I don't understand you." "I will make my meaning clearer," she replied. "I mean to say, that all men are bringing to the birth in their bodies and in their souls. There is a certain age at which human nature is desirous of procreation; and this procreation must be in beauty and not in deformity: and this is the mystery of man and woman, which is a divine thing, for conception and genera-

tion are a principle of immortality in the mortal creature. And in the inharmonical they can never be. But the deformed is always inharmonical with the divine, and the beautiful harmonious. Beauty, then, is the destiny or goddess of parturition who presides at birth, and therefore when approaching beauty the conceiving power is propitious, and diffuse, and benign, and begets and bears fruit: on the appearance of foulness she frowns and contracts in pain, and is averted and morose, and shrinks up, and not without a pang refrains from conception. And this is the reason why, when the hour of conception arrives, and the teeming nature is full, there is such a flutter and ecstasy about beauty whose approach is the alleviation of pain. For love, Socrates, is not, as you imagine, the love of the beautiful only." "What then?" "The love of generation and birth in beauty." "Yes," I said. "Yes, indeed," she replied. "But why of birth?" I said. "Because to the mortal, birth is a sort of eternity and immortality," she replied; "and as has been already admitted, all men will necessarily desire immortality together with good, if love is of the everlasting possession of the good." 207

All this she taught me at various times when she spoke of love. And on another occasion she said to me, "What is the reason, Socrates, of this love, and the attendant desire? See you not how all animals, birds as well as beasts, in their desire of procreation, are in agony when they take the infection of love; this begins with the desire of union, to which is added the care of offspring, on behalf of whom the weakest are ready to battle against the strongest even to the uttermost, and to die for them, and will let themselves be tormented with hunger or suffer anything in order to maintain their offspring. Man may be supposed to do this from reason; but why should animals have these passionate feelings? Can you tell me why?" Again I replied, that I did not know. She said to me: "And do you expect ever to become a master in the art of love, if you do not know this?" "But that," I said, "Diotima, is the reason why I come to you, because, as I have told you already, I am aware that I want a teacher; and I wish that you would explain to me this and the other mysteries of love." "Marvel not at this," she said, "if you believe that love is of the immortal, as we have already admitted; for here again, and on the same principle too, the mortal nature is seeking as far as is possible to be everlasting and immortal: and this is only to be attained by

generation, because the new is always left in the place of the old. For even in the same individual there is succession and not absolute unity: a man is called the same; but yet in the short interval which elapses between youth and age, and in which every animal is said to have life and identity, he is undergoing a perpetual process of loss and reparation — hair, flesh, bones, blood, and the whole body are always changing. And this is true not only of the body, but also of the soul, whose habits, tempers, opinions, desires, pleasures, pains, fears, never remain the same in any one of us, but are always coming and
208 going. And what is yet more surprising is, that this is also true of knowledge; and not only does knowledge in general come and go, so that in this respect we are never the same; but particular knowledge also experiences a like change. For what is implied in the word 'recollection,' but the departure of knowledge, which is ever being forgotten and is renewed and preserved by recollection, appearing to be the same although in reality new, according to that law of succession by which all mortal things are preserved, not by absolute sameness of existence, but by substitution, the old worn-out mortality leaving another new and similar one behind — unlike the immortal in this, which is always the same and not another? And in this way, Socrates, the mortal body, or mortal anything, partakes of immortality; but the immortal in another way. Marvel not then at the love which all men have of their offspring; for that universal love and interest is for the sake of immortality."

When I heard this, I was astonished, and said: "Is this really true, O thou wise Diotima?" And she answered with all the authority of a Sophist: "Of that, Socrates, you may be assured; think only of the ambition of men, and you will marvel at their senselessness, unless you consider how they are stirred by the love of an immortality of fame. They are ready to run risks greater far than they would have run for their children, and to spend money and undergo any amount of toil, and even to die for the sake of leaving behind them a name which shall be eternal. Do you imagine that Alcestis would have died on behalf of Admetus, or Achilles after Patroclus, or your own Codrus in order to preserve the kingdom for his sons, if they had not imagined that the memory of their virtues, which is still retained among us, would be immortal? Nay," she said, "for I am persuaded that all men do all things for the sake of the glorious fame of immortal virtue, and the better

they are the more they desire this; for they are ravished with the desire of the immortal.

"Men whose bodies only are creative, betake themselves to women and beget children — this is the character of their love; their offspring, as they hope, will preserve their memory and give them the blessedness and immortality which they desire in the future. But creative souls — for there are men who
209 are more creative in their souls than in their bodies — conceive that which is proper for the soul to conceive or retain. And what are these conceptions? — wisdom and virtue in general. And such creators are all poets and other artists who may be said to have invention. But the greatest and fairest sort of wisdom by far is that which is concerned with the ordering of states and families, and which is called temperance and justice. And he who in youth has the seed of these implanted in him and is himself inspired, when he comes to maturity desires to beget and generate. And he wanders about seeking beauty that he may beget offspring — for in deformity he will beget nothing — and embraces the beautiful rather than the deformed; and when he finds a fair and noble and well-nurtured soul, and there is union of the two in one person, he gladly embraces him, and to such a one he is full of fair speech about virtue and the nature and pursuits of a good man; and he tries to educate him; and at the touch and presence of the beautiful he brings forth the beautiful which he conceived long before, and the beautiful is ever present with him and in his memory even when absent, and in company they tend that which he brings forth, and they are bound together by a far nearer tie and have a closer friendship than those who beget mortal children, for the children who are their common offspring are fairer and more immortal. Who, when he thinks of Homer and Hesiod and other great poets, would not rather have their children than ordinary human ones? Who would not emulate them in the creation of children such as theirs, which have preserved their memory and given them everlasting glory? Or who would not have such children as Lycurgus left behind to be the saviors, not only of Lacedaemon, but of Hellas, as one may say? There is Solon, too, who is the revered father of Athenian laws; and many others there are in many other places, both among Hellenes and barbarians. All of them have done many noble works, and have been the parents of virtue of every kind, and many temples have been raised in honor of their children, which were never raised in honor of the mortal children of any one.

"These are the lesser mysteries of love, into which even you, Socrates, may enter; to the greater and more hidden ones
210 which are the crown of these, and to which, if you pursue them in a right spirit, they will lead, I know not whether you will be able to attain. But I will do my utmost to inform you, and do you follow if you can. For he who would proceed rightly in this matter should begin in youth to turn to beautiful forms; and first, if his instructor guide him rightly, he should learn to love one such form only — out of that he should create fair thoughts; and soon he will himself perceive that the beauty of one form is truly related to the beauty of another; and then if beauty in general is his pursuit, how foolish would he be not to recognize that the beauty in every form is one and the same! And when he perceives this he will abate his violent love of the one, which he will despise and deem a small thing, and will become a lover of all beautiful forms; this will lead him on to consider that the beauty of the mind is more honorable than the beauty of the outward form. So that if a virtuous soul have but a little comeliness, he will be content to love and tend him, and will search out and bring to the birth thoughts which may improve the young, until his beloved is compelled to contemplate and see the beauty of institutions and laws, and understand that all is of one kindred, and that personal beauty is only a trifle; and after laws and institutions he will lead him on to the sciences, that he may see their beauty, being not like a servant in love with the beauty of one youth or man or institution, himself a slave mean and calculating, but looking at the abundance of beauty and drawing towards the sea of beauty, and creating and beholding many fair and noble thoughts and notions in boundless love of wisdom; until at length he grows and waxes strong, and at last the vision is revealed to him of a single science, which is the science of beauty everywhere. To this I will proceed; please to give me your very best attention.

"For he who has been instructed thus far in the things of love, and who has learned to see the beautiful in due order and succession, when he comes toward the end will suddenly perceive a nature of wondrous beauty — and this, Socrates, is that
211 final cause of all our former toils, which in the first place is everlasting — not growing and decaying, or waxing and waning; in the next place not fair in one point of view and foul in another, or at one time or in one relation or at one place fair, at another time or in another relation or at another

place foul, as if fair to some and foul to others, or in the likeness of a face or hands or any other part of the bodily frame, or in any form of speech or knowledge, nor existing in any other being; as for example, an animal, whether in earth or heaven, but beauty only, absolute, separate, simple, and everlasting, which without diminution and without increase, or any change, is imparted to the ever-growing and perishing beauties of all other things. He who under the influence of true love rising upward from these begins to see that beauty, is not far from the end. And the true order of going or being led by another to the things of love, is to use the beauties of earth as steps along which he mounts upwards for the sake of that other beauty, going from one to two, and from two to all fair forms, and from fair forms to fair actions, and from fair actions to fair notions, until from fair notions he arrives at the notion of absolute beauty, and at last knows what the essence of beauty is. This, my dear Socrates," said the stranger of Mantineia, "is that life above all others which man should live, in the contemplation of beauty absolute; a beauty which if you once beheld, you would see not to be after the measure of gold, and garments, and fair boys and youths, which when you now behold you are in fond amazement, and you and many a one are content to live seeing only and conversing with them without meat or drink, if that were possible — you only want to be with them and to look at them. But what if man had eyes to see the true beauty — the divine beauty, I mean, pure and clear and unalloyed, not clogged with the pollutions of mortality, and all the colors and vanities of human life — thither looking, and holding converse with the true beauty divine and simple, and bring- 212
ing into being and educating true creations of virtue and not idols only? Do you not see that in that communion only, beholding beauty with the eye of the mind, he will be enabled to bring forth, not images of beauty, but realities; for he has hold not of an image but of a reality, and bringing forth and educating true virtue to become the friend of God and be immortal, if mortal man may. Would that be an ignoble life?"

Such, Phaedrus — and I speak not only to you, but to all men — were the words of Diotima; and I am persuaded of their truth. And being persuaded of them, I try to persuade others, that in the attainment of this end human nature will not easily find a better helper than Love. And therefore, also, I say that every man ought to honor him as I myself honor him, and

walk in his ways, and exhort others to do the same, even as I praise the power and spirit of love according to the measure of my ability now and ever.

The words which I have spoken, you, Phaedrus, may call an encomium of love, or anything else which you please.

When Socrates had done speaking, the company applauded, and Aristophanes was beginning to say something in answer to the allusion which Socrates had made[1] to his own speech, when suddenly there was a great knocking at the door of the house, as of revelers, and the sound of a flute-girl was heard. Agathon told the attendants to go and see who were the intruders. "If they are friends of ours," he said, "invite them in, but if not say that the drinking is over." A little while afterwards they heard the voice of Alcibiades resounding in the court; he was in a great state of intoxication, and kept roaring and shouting "Where is Agathon? Lead me to Agathon," and at length, supported by the flute-girl and some of his companions, he found his way to them. "Hail, friends!" he said, appearing at the door crowned with a massive garland of ivy and wall-flowers, and having his head flowing with ribbons. "Will you have a very drunken man as a companion of your revels? Or shall I crown Agathon, as was my intention in coming, and go my way? For I was unable to come yesterday, and therefore I come to day, carrying on my head these ribbons, that taking them from my own head, I may crown the head of this fairest and wisest of men, as I may be allowed to call him. Will you
213 laugh at me because I am drunk? Yet I know very well that I am speaking the truth, although you may laugh. But first tell me whether I shall come in on the understanding that I am drunk. Will you drink with me or not?"

The company were vociferous in begging that he would take his place among them, and Agathon specially invited him. Thereupon he was led in by the people who were with him; and as he was being led he took the crown and ribbons from his head, intending to crown Agathon, and had them before his eyes; this prevented him from seeing Socrates, who made way for him, and Alcibiades took the vacant place between Agathon and Socrates, and in taking the place he embraced Agathon and crowned him. Take off his sandals, said Agathon, and let him make a third on the same couch.

By all means; but who makes the third partner in our rev-

[1] P. 205.

els? said Alcibiades, turning round and starting up as he caught sight of Socrates. By Heracles, he said, what is this? here is Socrates always lying in wait for me, and always, as his way is, coming out at all sorts of unsuspected places: and now, what have you to say for yourself, and why are you lying here, where I perceive that you have contrived to find a place, not by a professor or lover of jokes, like Aristophanes, but by the fairest of the company?

Socrates turned to Agathon and said: I must ask you to protect me, Agathon; for this passion of his has grown quite a serious matter. Since I became his admirer I have never been allowed to speak to any other fair one, or so much as to look at them. If I do he goes wild with envy and jealousy, and not only abuses me but can hardly keep his hands off me, and at this moment he may do me some harm. Please to see to this, and either reconcile me to him, or, if he attempts violence, protect me, as I am in bodily fear of his mad and passionate attempts.

There can never be reconciliation between you and me, said Alcibiades; but for the present I will defer your chastisement. And I must beg you, Agathon, to give me back some of the ribbons that I may crown the marvelous head of this universal despot, — I would not have him complain of me for crowning you, and neglecting him, who in conversation is the conquerer of all mankind; and this not once only, as you were the day before yesterday, but always. Then taking some of the ribbons, he crowned Socrates, and again reclined. When he had lain down again, he said: You seem, my friends, to be sober, which is a thing not to be endured; you must drink, — for that was the agreement which I made with you, — and I elect myself master of the feast until you are well drunk. Let us have a large goblet, Agathon, or rather, he said, addressing the attendant, bring me that wine-cooler. The wine-cooler was a vessel holding more than two quarts which caught his eye, — this he filled and emptied, and bid the attendant fill it again for Socrates. Observe, my friends, said Alcibiades, that my ingenious device will have no effect on Socrates, for he can drink any quantity of wine and not be at all nearer being drunk. Socrates drank the cup which the attendant filled for him. 214

Eryximachus said: What is this, Alcibiades? Are we to have neither conversation nor singing over our cups; but simply to drink as if we were thirsty?

Alcibiades replied: Hail, worthy son of a most wise and worthy sire!

The same to you, said Eryximachus; but what shall we do? That I leave to you, said Alcibiades.

"The wise physician skilled our wounds to heal."

shall prescribe and we will obey. What do you do want?

Well, Eryximachus said: Before you appeared a resolution was agreed to by us that each one in turn should speak a discourse in praise of love, and as good a one as he could: this was passed round from left to right; and as all of us have spoken, and you have not spoken but have well drunken, you ought to speak, and then impose upon Socrates any task which you please, and he on his right hand neighbor, and so on.

That is good, Eryximachus, said Alcibiades; and yet the comparison of a drunken man's speech with those of sober men is hardly fair; and I should like to know, sweet friend, whether you really believe what Socrates was just now saying; for I can assure you that the very reverse is the fact, and that if I praise any one but himself in his presence, whether God or man, he will hardly keep his hands off me.

For shame, said Socrates.

By Poseidon, said Alcibiades, there is no use in your denying this, for no creature will I praise in your presence.

Well then take your own course, said Eryximachus, and if you like praise Socrates.

What do you think, Eryximachus? said Alcibiades; shall I attack him and inflict the punishment in your presence?

What are you about? said Socrates; are you going to raise a laugh at me? Is that the meaning of your praise?

I am going to speak the truth, if you will permit me.

I not only permit you but exhort you to speak the truth.

Then I will begin at once, said Alcibiades, and if I say anything that is not true, you may interrupt me if you will, and say that I speak falsely, though my intention is to speak the truth. But you must not wonder if I speak anyhow as things come into my mind; for the fluent and orderly enumeration of all your wonderful qualities is not a task the accomplishment of which is easy to a man in my condition.

215 I shall praise Socrates in a figure which will appear to him to be a caricature, and yet I do not mean to laugh at him, but only to speak the truth. I say then, that he is exactly like the masks of Silenus, which may be seen sitting in the statuaries' shops, having pipes and flutes in their mouths; and

they are made to open in the middle, and there are images of gods inside them. I say also that he is like Marsyas the satyr. You will not deny, Socrates, that your face is like that of a satyr. Aye, and there is a resemblance in other points too. For example, you are a bully,—that I am in a position to prove by the evidence of witnesses, if you will not confess. And are you not a flute-player? That you are, and a far more wonderful performer than Marsyas. For he indeed with instruments charmed the souls of men by the power of his breath, as the performers of his music do still: for the melodies of Olympus are derived from the teaching of Marsyas, and these, whether they are played by a great master or by a miserable flute-girl, have a power which no others have; they alone possess the soul and reveal the wants of those who have need of gods and mysteries, because they are inspired. But you produce the same effect with the voice only, and do not require the flute: that is the difference between you and him. When we hear any other speaker, even a very good one, his words produce absolutely no effect upon us in comparison, whereas the very fragments of you and your words, even at second-hand, and however imperfectly repeated, amaze and possess the souls of every man, woman, and child who comes within hearing of them. And if I were not afraid that you would think me drunk, I would have sworn as well as spoken to the influence which they have always had and still have over me. For my heart leaps within me more than that of any Corybantian reveler, and my eyes rain tears when I hear them. And I observe that many others are affected in the same way. I have heard Pericles and other great orators, but though I thought that they spoke well, I never had any similar feeling; my soul was not stirred by them, nor was I angry at the thought of my own slavish state. But this Marsyas has often brought 216
me to such a pass, that I have felt as if I could hardly endure the life which I am leading (this, Socrates, you admit); and I am conscious that if I did not shut my ears against him, and fly from the voice of the siren, he would detain me until I grew old sitting at his feet. For he makes me confess that I ought not to live as I do, neglecting the wants of my own soul, and busying myself with the concerns of the Athenians; therefore I hold my ears and tear myself away from him. And he is the only person who ever made me ashamed, which you might think not to be in my nature, and there is no one else who

does the same. For I know that I cannot answer him or s
that I ought not to do as he bids, but when I leave his pr
ence the love of popularity gets the better of me. And the
fore I run away and fly from him, and when I see him I
ashamed of what I have confessed to him. And many a time
wish that he were dead, and yet I know that I should be mu
more sorry than glad, if he were to die: so that I am at
wit's end.

And this is what I and many others have suffered from t
flute-playing of this satyr. Yet hear me once more while
show you how exact the image is, and how marvelous
power. For I am sure that none of you know him; but
know him and will describe him, as I have begun. See y
how fond he is of the fair? He is always with them and
always being smitten by them, and then again he knows not
ing and is ignorant of all things — that is the appearance whi
he puts on. Is he not like a Silenus in this? Yes, surel
that is, his outer mask, which is the carved head of the Silenu
but when he is opened, what temperance there is, as I may s
to you, O my companions in drink, residing within. Kno
you that beauty and wealth and honor, at which the ma
wonder, are of no account with him, and are utterly despis
by him: he regards not at all the persons who are gifted wi
them; mankind are nothing to him; all his life is spent
mocking and flouting at them. But when I opened him, a
looked within at his serious purpose, I saw in him divine a
217 golden images of such fascinating beauty that I was rea
to do in a moment whatever Socrates commanded (th
may have escaped the observation of others, but I saw them
Now I thought that he was seriously enamored of my beaut
and this appeared to be a grand opportunity of hearing hi
tell what he knew, for I had a wonderful opinion of the attra
tions of my youth. In the prosecution of this design, when
next went to him, I sent away the attendant who usually accor
panied me (I will confess the whole truth, and beg you to li
ten; and if I speak falsely, do you, Socrates, expose the fals
hood). Well, he and I were alone together, and I thoug
that when there was nobody with us, I should hear him spea
the language of love as lovers do, and I was delighted. Not
word; he conversed as usual, and spent the day with me a
then went away. Afterwards I challenged him to the palaestra
and he wrestled and closed with me several times alone;

fancied that I might succeed in this way. Not a bit; there was no use in that. Lastly, as I had failed hitherto, I thought that I must use stronger measures and attack him boldly, as I had begun, and not give him up until I saw how the matter stood. So I invited him to supper, just as if he were a fair youth, and I a designing lover. He was not easily persuaded to come; he did, however, after a while accept the invitation, and when he came the first time, he wanted to go away at once as soon as supper was over, and I had not the face to detain him. The second time, still in pursuance of my design, after we had supped, I went on conversing far into the night, and when he wanted to go away, I pretended that the hour was late and that he had better remain. So he lay down on the next couch to me, the same on which he had supped, and there was no one else in the apartment. All this may be told without shame to any one. But what follows I could hardly tell you if I were sober. Yet as the proverb says, "In vino veritas," whether there is in boys or not; and therefore I must speak. Nor, again, should I be justified in concealing the lofty actions of Socrates as I come to praise him. Moreover I have felt the pang; and he who has suffered, as they say, is willing to tell his fellow-sufferers only, as they alone will be likely to understand him, and will not be extreme in judging of the sayings or doings which have been wrung from his agony. 218

For I have been bitten by the viper too; I have known in my soul, or in my heart, or in some other part, that worst of pangs, more violent in ingenuous youth than any serpent's tooth, the pang of philosophy, which will make a man say or do anything. And you whom I see around me, your Phaedrus, your Agathon, your Eryximachus, your Pausanias, your Aristodemus, your Aristophanes, all of you, and I need not say Socrates himself, have all had experience of the same madness and passion of philosophy. Therefore listen and excuse my doings then and my sayings now. But let the attendants and other profane and unmannered persons close the doors of their ears.

When the lamp was put out and the servants had gone away, I thought that I must be plain with him and have no more ambiguity. So I gave him a shake, and I said: "Socrates, are you asleep?" "No," he said. "Do you know what I am meditating?" "What is that?" he said. "I think," I replied, "that of all the lovers whom I have ever had you are the only one who is worthy of me, and you appear to be too modest to speak.

Now I feel that I should be a fool to refuse you this or any other favor, and therefore I come to lay at your feet all that I have and all that my friends have, in the hope that you will assist me in the way of virtue, which I desire above all things, and in which I believe that you can help me better than any one else. And I am certainly of opinion that I should have more reason to be ashamed of what wise men would say if I were to refuse a favor to such as you, than of what fools would say if I granted it." When he heard this, he said in his ironical manner: "Friend Alcibiades, you have indeed an elevated aim if what you say is true, and if there really is in me any power by which you may become better; truly you must see in me some rare beauty of a kind infinitely higher than that which I see in you. And if, seeing this, you mean to share with me and to exchange beauty for beauty, you will have greatly the advantage of me; you will gain real beauty in return for appearance — gold
219 in exchange for brass. But look again, sweet friend, and see whether you are not deceived in me. The mind begins to grow critical when the bodily eye fails, and you have not come to that yet." Hearing this, I said: "I have told you my purpose, which is quite serious, and do you consider what you think best for you and me." "That is good," he said; "at some other time then we will consider and act as seems best about this and about other matters." When I heard this answer, I fancied that he was smitten, and that my arrows had wounded him, and so without waiting to hear more I got up, and throwing my coat about him crept under his threadbare cloak, as the time of year was winter, and there I lay during the whole night having this wonderful monster in my arms. You won't deny this, Socrates. And yet, notwithstanding all this, he was so superior to my solicitations, so contemptuous and derisive and disdainful of my beauty — which really, as I believe, had some attractions — hear, O judges; for judges you shall be of the haughty virtue of Socrates — that in the morning when I awoke (let all the gods and goddesses be my witnesses) I arose as from the couch of a father or an elder brother.

What do you suppose must have been my feelings after this rejection at the thought of my own dishonor? And yet I could not help wondering at his natural temperance and self-restraint and courage. I never could have thought that I should have met with a man like him in wisdom and endurance. Neither could I be angry with him or renounce his company, any more

than I could hope to win him. For I well knew that if Ajax could not be wounded by steel, much less he by money; and I had failed in my only chance of captivating him. So I wandered about and was at my wit's end; no one was ever more hopelessly enslaved by another. All this, as I should explain, happened before he and I went on the expedition to Potidaea; there we messed together, and I had the opportunity of observing his extraordinary power of sustaining fatigue and going without food when our supplies were intercepted at any place, as will happen with an army. In the faculty of endurance he was superior not only to me but to everybody; there was no one to be compared to him. Yet at a festival he was the only person who had any real powers of enjoyment, and though not willing to drink, he could if compelled beat us all at that, and the most wonderful thing of all was that no human being had ever seen Socrates drunk; and that, if I am not mistaken, will soon be tested. His endurance of cold was also surprising. There was a severe frost, for the winter in that region was really tremendous, and everybody else either remained indoors, or if they went out had on no end of clothing, and were well shod, and had their feet swathed in felts and fleeces: in the midst of this, Socrates, with his bare feet on the ice, and in his ordinary dress, marched better than any of the other soldiers who had their shoes on, and they looked daggers at him because he seemed to despise them. 220

I have told you one tale, and now I must tell you another, which is worth hearing, of the doings and sufferings of this enduring man while he was on the expedition. One morning he was thinking about something which he could not resolve; and he would not give up, but continued thinking from early dawn until noon — there he stood fixed in thought; and at noon attention was drawn to him, and the rumor ran through the wondering crowd that Socrates had been standing and thinking about something ever since the break of day. At last, in the evening after supper, some Ionians out of curiosity (I should explain that this was not in winter but in summer), brought out their mats and slept in the open air that they might watch him and see whether he would stand all night. There he stood all night as well as all day and the following morning; and with the return of light he offered up a prayer to the sun, and went his way. I will also tell, if you please — and indeed I am bound to tell — of his courage in battle; for who but he saved my life?

Now this was the engagement in which I received the prize of valor: for I was wounded and he would not leave me, but he rescued me and my arms; and he ought to have received the prize of valor which the generals wanted to confer on me partly on account of my rank, and I told them so (this Socrates will not impeach or deny), but he was more eager than the generals that I and not he should have the prize. There was another occasion on which he was very noticeable; this was in the flight of
221 the army after the battle of Delium, and I had a better opportunity of seeing him than at Potidaea as I was myself on horseback, and therefore comparatively out of danger. He and Laches were retreating as the troops were in flight, and I met them and told them not to be discouraged, and promised to remain with them; and there you might see him, Aristophanes, as you describe, just as he is in the streets of Athens, stalking like a pelican, and rolling his eyes, calmly contemplating enemies as well as friends, and making very intelligible to anybody, even from a distance, that whoever attacks him will be likely to meet with a stout resistance; and in this way he and his companion escaped — for these are the sort of persons who are never touched in war; they only pursue those who are running away headlong. I particularly observed how superior he was to Laches in presence of mind. Many are the wonders of Socrates which I might narrate in his praise; most of his ways might perhaps be paralleled in others, but the most astonishing thing of all is his absolute unlikeness to any human being that is or ever has been. You may imagine Brasidas and others to have been like Achilles; or you may imagine Nestor and Antenor to have been like Pericles; and the same may be said of other famous men; but of this strange being you will never be able to find any likeness however remote, either among men who now are or who ever have been, except that which I have already suggested of Silenus and the satyrs; and this is an allegory not only of himself, but also of his words. For, although I forgot to mention this before, his
222 words are ridiculous when you first hear them; he clothes himself in language that is as the skin of the wanton satyr — for his talk is of pack-asses and smiths and cobblers and curriers, and he is always repeating the same things in the same words, so that an ignorant man who did not know him might feel disposed to laugh at him; but he who pierces the mask and sees what is within will find that they are the only words which have a meaning in them, and also the most divine, abounding in

fair examples of virtue, and of the largest discourse, or rather extending to the whole duty of a good and honorable man.

This, friends, is my praise of Socrates. I have added my blame of him for his ill-treatment of me; and he has ill-treated not only me, but Charmides the son of Glaucon, and Euthydemus the son of Diocles, and many others in the same way — beginning as their lover he has ended by making them pay their addresses to him. Wherefore I say to you, Agathon, "Be not deceived by him; learn from me and take warning, and don't be a fool and learn by experience," as the proverb says.

When Alcibiades had done speaking, there was a laugh at his plainness of speech, as he seemed to be still in love with Socrates. You are sober, Alcibiades, said Socrates, or you would never have gone about to hide the purpose of your satyr's praises, for all this long story is only an ingenious circumlocution, the point of which comes in by the way at the end; you want to get up a quarrel between me and Agathon, and your notion is that I ought to love you and nobody else, and that you and you only ought to love Agathon. But the plot of this Satyric or Silenic drama has been detected, and you must not allow him, Agathon, to set us at variance.

I believe you are right, said Agathon, and I am disposed to think that his intention in placing himself between you and me was only to divide us; but he shall gain nothing by that move, as I will go and lie in the couch next to you.

Yes, yes, replied Socrates, by all means come here and lie on the couch below me.

Alas! said Alcibiades, how am I fooled by this man; he is determined to get the better of me at every turn. I do beseech you, allow Agathon to lie between us.

Impossible, said Socrates, as you praised me, and I ought to praise my neighbor on the right, he will be out of order in praising me again when he ought rather to be praised by me, and I must entreat you to consent to this, and not be jealous, for I have a great desire to praise the youth.

223

Ha, ha! cried Agathon; I will rise instantly, that I may be praised by Socrates.

The usual way, said Alcibiades, where Socrates is, no one else has any chance with the fair, and now how readily has he invented a specious reason for attracting Agathon to himself.

Agathon arose in order that he might take his place on the couch by Socrates, when suddenly a band of revelers entered,

and spoiled the order of the banquet. Some one who was going out having left the door open, they had found their way in, and made themselves at home; great confusion ensued, and every one was compelled to drink large quantities of wine. Aristodemus said that Eryximachus, Phaedrus, and others went away — he himself fell asleep, and as the nights were long took a good rest: he was awakened towards daybreak by a crowing of cocks, and when he awoke, the others were either asleep, or had gone away; there remained awake only Socrates, Aristophanes, and Agathon, who were drinking out of a large goblet which they passed round, and Socrates was discoursing to them. Aristodemus did not hear the beginning of the discourse, and he was only half awake, but the chief thing which he remembered, was Socrates insisting to the other two that the genius of comedy was the same as that of tragedy, and that the writer of tragedy ought to be a writer of comedy also. To this they were compelled to assent, being sleepy, and not quite understanding his meaning. And first of all Aristophanes dropped, and then, when the day was already dawning, Agathon. Socrates, when he had put them to sleep, rose to depart, Aristodemus, as his manner was, following him. At the Lyceum he took a bath and passed the day as usual; and when evening came he retired to rest at his own home.

PHAEDRUS.

INTRODUCTION.

THE Phaedrus is closely connected with the Symposium, and may be regarded either as introducing or following it. The two Dialogues together contain the whole philosophy of Plato on the nature of love, which in the Republic and in the later writings of Plato is only introduced playfully or as a figure of speech. But in the Phaedrus and Symposium love and philosophy join hands, and one is an aspect of the other. The spiritual and emotional part is elevated into the ideal, to which in the Symposium mankind are described as looking forward, and which in the Phaedrus, as well as in the Phaedo, they are seeking to recover from a former state of existence. Whether the subject of the Dialogue is love or rhetoric, or the union of the two, or the relation of philosophy to love and to art in general, will be hereafter considered.

Phaedrus has been passing the day with Lysias, the celebrated rhetorician, and is going to refresh himself by taking a walk outside the wall, when he is met by Socrates, who professes that he will not leave him until he has delivered up the speech with which Lysias has regaled him, and which he is carrying about in his mind, or more probably in a book hidden under his cloak, and is intending to study as he walks. The imputation is not denied, and the two agree to direct their steps out of the public way along the stream of the Ilissus towards a plane-tree which is seen in the distance. There, lying down amidst pleasant sounds and scents, they will read the speech of Lysias. The country is a novelty to Socrates, who never goes out of the town; and hence he is full of admiration for the beauties of nature, of which he seems for the first time to be conscious.

In the course of their walk Phaedrus asks the opinion of Socrates respecting the local tradition of Boreas and Oreithyia. Socrates, after a satirical allusion to the "rationalizers" of his day, replies that he has no time for these "nice" interpretations of mythology; "the proper study of mankind is man," who is a far more complex and wonderful being than the serpent Typhon. When they have reached the plane-tree, Phaedrus pulls out the speech and reads.

The speech consists of a foolish paradox, which is to the effect that the non-lover ought to be accepted rather than the lover — because he is more rational, more agreeable, more enduring, less suspicious, less hurtful, less boastful, less engrossing, and because there are more of them, and for a great many other reasons which are equally unmeaning. Phaedrus is captivated with the beauty of the periods, and wants to make Socrates say that nothing was or ever could be better written. Socrates does not think much of the matter, but then he has only attended to the form, and in the form he thinks that he has detected repetitions and other marks of haste. He cannot agree with Phaedrus in the extreme value which he sets upon this performance, because he is afraid of doing injustice to Anacreon, and Sappho, and other great writers, and is almost inclined to think that he himself, or rather some power residing within him, could make a speech better than that of Lysias on the same theme, and also different from his, if he may be allowed to have a few commonplaces which all speakers must equally employ.

Phaedrus is delighted at the prospect of having another speech, and promises that he will set up a golden statue of Socrates at Delphi, if he keeps his word. Some raillery ensues, and at length Socrates, conquered by the threat that he shall never hear a speech of Lysias again unless he fulfills his promise, veils his face and begins.

The first part of his speech is a somewhat prosaic discussion of the opposition between desire and opinion guided by reason. But he has not proceeded far when he fancies that he detects in himself an unusual flow of eloquence — this he can only attribute to the inspiration of the place, which appears to be dedicated to the Nymphs. Starting from the philosophical basis which has been already laid down, he proceeds to show how many advantages the non-lover has over the lover. The one leads to softness and poverty and exclusiveness, and is full of all sorts of unpleasantness; "crabbed age and youth" have to "live together," and the sight and the ways of the old are mighty disagreeable to the young. Or if they part company, then the spectacle may be seen of the lover running away from the beloved, who pursues him with vain reproaches, and demands his reward which the other refuses to pay. The lover turns virtuous when the hour of payment arrives, and the beloved learns too late, after all his pains and disagreeables, that as wolves love lambs so lovers love their loves. (Cp. Char. 155 D.) Here is the end; the "other" or "non-lover" part of the speech had better be understood, for if in the censure of the lover Socrates has broken out in verse, what will he do in his praise of the non-lover? He has said his say and is preparing to go away.

Phaedrus begs him to remain, at any rate until the heat of noon has passed; he thinks that they may as well have a little more conversation before they go. Socrates, who has risen to go, recognizes

the oracular sign which forbids him to depart until he has done penance. His conscience has been awakened, and like Stesichorus over Helen he will sing a palinode for having blasphemed the majesty of love. His palinode takes the form of a myth.

Socrates begins his tale with a glorification of madness, which he divides into four kinds: first, there is the art of divination or prophecy — this, in a vein similar to that of the Cratylus, he connects with madness by an etymological explanation (*μαντικὴ*, *μανικὴ* — compare *οἰονοιστικὴ*, *οἰωνιστικὴ*, "'tis all one reckoning, save the phrase is a little variations"); secondly, there is the art of purification by mysteries; thirdly, poetry or the inspiration of the Muses (cp. Ion, 533 foll.), without which no man can enter their temple. All this shows that madness is one of Heaven's blessings, and may sometimes be a great deal better than sense. There is also a fourth kind of madness which cannot be explained without inquiring into the nature of the soul.

The soul is immortal, for she is the source of all motion both in herself and in others. Of her true and divine form it would be long to tell, but she may be described in a figure as a composite being made up of a charioteer and a pair of winged steeds. The steeds of the gods are immortal, but ours are one mortal and the other immortal. The immortal soul soars upwards into the heavens, but the mortal drops her plumes and is draggled upon the earth.

Now the nature of the wings is to rise and carry the downward element into the upper world — there to behold beauty, wisdom, goodness, and the other things of God by which the soul is nourished. On a certain day Zeus the lord of heaven goes forth in a winged chariot; and an array of gods and demi-gods and of human souls in their train, follows him. There are glorious and blessed sights in the interior of heaven, and he who will may freely behold them. The great vision of all is seen at the feast of the gods, when they ascend the heights of heaven — all but Hestia, who is left at home to keep house. The horses of the gods glide readily upwards and stand upon the outside, and are carried round in the revolutions of the spheres, and gaze upon the world beyond. But of this world beyond the heavens, who can tell? There is an essence formless, colorless, intangible, perceived by the mind only, circling above in the place of true knowledge. The divine mind in her revolution enjoys this fair prospect, and beholds justice, temperance, and knowledge in their everlasting essence. When fulfilled with the sight of them she returns home, and the charioteer puts up the horses in their stable, and gives them ambrosia to eat and nectar to drink. This is the life of the gods; and the human soul tries to reach the same heights, but hardly succeeds; and sometimes the head of the charioteer rises above, and sometimes sinks below the fair vision, and is at last obliged, after much contention, to turn away and leave the plain of

truth. Yet if she has followed in the train of any god and once beheld truth she is preserved harmless, and is carried round in the next revolution of the spheres; and if always following, and always seeing the truth, then forever harmless. But if she drops her wings and falls to the earth, then she takes the form of man, and the soul which has seen most of the truth passes into a philosopher or lover; that which has seen truth in the second degree, into a king or warrior; the third, into a householder or money-maker; the fourth, into a gymnast; the fifth, into a prophet or mystic; the sixth, into a poet or imitator; the seventh, into a husbandman or craftsman; the eighth, into a Sophist or demagogue; the ninth, into a tyrant. In all these conditions he who lives righteously improves, and he who lives unrighteously deteriorates his lot. Ten thousand years elapse before the souls of men in general can regain their first estate, and have their wings restored to them. And the soul of a man may descend into a beast, and return again into the form of man. But the form of man can only be acquired at all by those who have once beheld truth, for the soul of man alone apprehends the universal; and this is the recollection of that knowledge which she attained when in the company of the gods. At the end of every thousand years the soul has another choice, and may go upwards or downwards. Only the soul of a philosopher or lover who has three times in succession chosen the better life may receive wings and go her way in three thousand years.

For the soul in her own nature having the vision of true being remembers in her condition here those glorious sights of justice and temperance and wisdom and truth which she once gazed upon when in company with the heavenly choir. Then she celebrated holy mysteries and beheld blessed apparitions shining in pure light, herself pure and not as yet entombed in the oyster-shell of the body. And still she is eager to depart, and like a bird is fluttering and looking upwards, and is therefore esteemed mad. Such a light of other days is spread over her when she remembers that beauty which alone of the ideas has any visible representation on earth. For wisdom has no outward form, and is "too dazzling bright for mortal eye." Now the corrupted nature, when blindly excited by the vision of beauty, only rushes on to enjoy, and wallows like a quadruped in sensual pleasures. But the true mystic, who has seen the many sights of bliss, when he beholds a godlike form or face is ravished with delight, and if he were not afraid of being thought mad he would fall down and worship. Then the stiffened wing begins to relax and grow again. At the sight of earthly beauty the memory of the heavenly is recalled; desire which has been imprisoned, pours over the soul of the lover; the germ of the wing unfolds, and stings and pangs at birth, like the cutting of teeth, are everywhere felt. (Cp. Symp. 206 foll.) Father and mother, and goods and laws, and propri-

eties are nothing to him; his beloved is his physician, who can alone cure his pain. An apocryphal sacred writer says that mortals call him Love, but the immortals call him Dove, or the winged one, in order to represent the force of his wings — at any rate this is his nature. Now the characters of lovers depend upon the god whom they followed in the other world, and they choose their loves in this world accordingly. The followers of Ares are fierce and violent; those of Zeus seek out some philosophical and imperial nature; the attendants of Here find a royal love; and in like manner the followers of every god seek a love who is in his likeness, and they communicate to him the nature which they have received from their god. The manner in which they take their love is as follows: —

I told you about the charioteer and two steeds, the one a noble animal who is guided by word and admonition only, the other an ill-looking villain who will hardly yield to blow or spur. Together all three, who are a figure of the soul, approach the vision of love. And now a conflict begins. The ill-conditioned steed rushes on to enjoy, but the charioteer, who beholds the beloved with awe, falls back in adoration, and forces both the steeds on their haunches; again the evil steed rushes forwards and pulls shamelessly. Then a still more fearful conflict ensues; the charioteer dropping at the very start jerks violently the bit from the clinched teeth of the brute, and pulling harder than ever at the reins, covers his tongue and jaws with blood, and forces him to rest his hocks and haunches with pain upon the ground. When this has happened several times, the villain is tamed and humbled, and from that time forward the soul of the lover follows the beloved in modesty and holy fear. And now their bliss is consummated; the same image of love dwells in the breast of either; and if they have self-control, they pass their lives in the greatest happiness which is attainable by man — they live masters of themselves and conquer in one of the three heavenly victories. But if they choose the lower life of ambition they may still have a happy destiny, though inferior, because they have not the approval of the whole soul. At last they leave the body and proceed on their pilgrim's progress, and those who have once begun can never go back. When the time comes they receive their wings and fly away, and the lovers have the same wings.

Socrates concludes: —

These are the blessings of love, and thus I have made my recantation in finer language than before, but this was only in order to please Phaedrus. If I said what was wrong at first, please to attribute my error to Lysias, who ought to study philosophy instead of rhetoric, and then he will not mislead his disciple Phaedrus.

Phaedrus is afraid that he will lose conceit of Lysias, and that Lysias will be out of conceit with himself, and leave off making speeches, as the politicians have been deriding him. Socrates is of

opinion that there is small danger of this, and that the politicians are themselves the great rhetoricians of the age, who desire to attain immortality by the authorship of laws, and therefore there can be no disgrace, nothing with which anybody could reproach Lysias in being a writer, but there may be disgrace in being a bad one.

And what is good or bad writing or speaking? There is time to consider that question. For by the discussion of such questions man lives, and not by the indulgence of bodily pleasures. And the grasshoppers who are chirruping around may carry our words to the Muses, who are their patronesses; for the grasshoppers were human beings themselves in a world before the Muses, and when the Muses came they died of hunger for the love of song. And they carry to them in heaven the report of those who honor them on earth.

The first rule of good speaking is to know and speak truth; true art is truth, says a Spartan proverb, whereas rhetoric is a mode of enchanting the soul, which makes things appear good and evil, like and unlike, according to the fancy of the speaker. Still, mankind are deceived, not all at once, but by degrees, and therefore he who would either impose on others or escape imposition must know the truth.

Socrates then proposes that they shall use the two speeches as illustrations of the art of rhetoric; first distinguishing between the debatable and undisputed class of subjects. In the debatable class there ought to be a definition of all disputed matters. But there was no such definition in the speech of Lysias; nor is there any order or connection in his words any more than in a nursery rhyme. With this he compares the regular divisions of the other speech, which was his own (and yet not his own, for the local deities must have inspired him). This "fancy" of his will be found to embody two principles: first, that of synthesis or the comprehension of parts in a whole; secondly, analysis, or the resolution of the whole into parts. These are the processes of division and generalization which are so dear to the dialectician, that king of men. But this is dialectic and not rhetoric; of which the remains are but scanty after order and arrangement have been subtracted. There is nothing left but a heap of "ologies" and other technical terms invented by Theodorus, Evenus, Tisias, Gorgias, and others who have rules for everything, and who teach how to be short or long at pleasure. Prodicus showed his good sense in saying that there was a better thing than either being short or long, which was to be of a convenient length.

Still, notwithstanding the absurdities of Polus and others, rhetoric has great power in public assemblies. This, however, is not given by these technical rules, but is the gift of genius. The real art is always being confused by rhetoricians with the preliminaries of the

art. The perfection of oratory is the perfection of all things; but for this the art of rhetoric can do little, and the art which does this little is of another kind from that which is taught by the rhetoricians.

Pericles, the most accomplished of all speakers, derived his art not from rhetoric but from the philosophy of nature which he learnt from Anaxagoras. The true rhetoric is like medicine, and the rhetorician has to consider the natures of men's souls as the physician considers the natures of their bodies. Such and such persons are to be affected in this way, such and such others in that; he must know the times and the seasons for saying this or that. This is not an easy task, and this, if there be such an art, is the art of rhetoric.

I know that there are some professors of the art who maintain that probability is stronger than truth. But we maintain that probability is engendered by likeness of the truth, which is best attained by the knowledge of the truth, and that the aim of the good man should not be to please or persuade his fellow-servants, but to please his good masters who are the gods. Rhetoric has a fair beginning in this.

Enough of the art of speaking; let us now proceed to consider the true use of writing. There is an old Egyptian tale of Theuth, the inventor of writing, showing his invention to the god Thamuz, who told him that he would only spoil men's memories and take away their understandings. From this tale, which young Athens will probably scorn, may be gathered the lesson that writing is inferior to speech. For writing is like a picture which can give no answer to a question, and has only a deceitful likeness of a living creature. It has no power of adaptation, but uses the same words for all. It is a sort of bastard and not a legitimate son of knowledge, and when an attack is made upon this illegitimate progeny neither the parent nor any one else is there to defend it. The husbandman will not seriously incline to sow his seed in such a hot-bed or garden of Adonis; he will rather sow in the natural soil of the human soul which has depth of earth; and he will anticipate this natural process by writing, if at all, only as a remedy against old age. The natural growth will be far nobler, and bring forth fruit not only in his own but in other minds.

The conclusion of the whole matter is just this, — that until a man knows the truth, and the manner of adapting the truth to the natures of other men, he cannot be a good orator; also, that the living is better than the written word, and that the principles of justice and truth when delivered by word of mouth are the legitimate offspring of a man's own bosom, and their lawful descendants take up their abode in others. Such an orator as he is who has them, you and I would fain become. And to all composers in the world who are poets, orators, legislators, we hereby announce that

if their compositions are based upon these principles then they are not only poets, orators, statesmen, but philosophers. All the rest are mere flatterers and putters together of words. This is the message which Phaedrus undertakes to carry to Lysias from the local deities, and Socrates will himself carry a similar message to his favorite Isocrates, whose future distinction as a great rhetorician he prophesies. The heat of the day has passed, and after offering up a prayer to Pan and the Nymphs, Socrates and Phaedrus depart.

There are two principal controversies which have been raised about the Phaedrus; the first relates to the subject, the second to the date of the Dialogue.

There seems to be a notion that the work of a great artist like Plato could not fail in unity, and that the unity of a dialogue requires a single subject. But the conception of unity really applies in very different degrees and ways to different kinds of art; to a statue, for example, far more than to any kind of literary composition, and to some species of literature far more than to others. Nor does the dialogue appear to be a style of composition in which the requirement of unity is most stringent; nor should the idea of unity derived from one sort of art be hastily transferred to another. The double titles of several of the Platonic Dialogues seem to indicate that this severer unity was not attempted by Plato. The Republic is divided between the search after justice and the construction of the ideal; the Parmenides between the criticism of the Platonic ideas and of the Eleatic one or being; the Gorgias between the art of speaking and the nature of the good; the Sophist between the detection of the Sophist and the correlation of ideas. The Theaetetus, the Politicus, and the Philebus, have also digressions which are but remotely connected with the main subject.

Thus the comparison of Plato's other writings, as well as the reason of the thing, lead us to the conclusion that we are not to expect to find one idea pervading a whole work, but one, two, or more, as the invention of the writer may suggest or his fancy wander. If each dialogue were confined to the development of a single idea, this would appear on the face of the dialogue, nor could any controversy be raised as to whether the Phaedrus treated of love or rhetoric. But the truth is that Plato subjects himself to no rule of this sort. Like every great artist he gives unity of form to the different and apparently distracting topics which he brings together. He works freely and is not to be supposed to have arranged every part of the dialogue before he begins to write. He fastens or weaves together the frame of his discourse loosely and imperfectly, and which is the warp and which is the woof is not always easy to determine.

The subjects of the Phaedrus (exclusive of the short introductory passage about mythology which is suggested by the local tradition)

are first the false or conventional art of rhetoric; secondly, love or the inspiration of beauty and knowledge which is described as madness; thirdly, dialectic or the art of composition and division; fourthly, the true rhetoric, which is based upon dialectic; fifthly, the superiority of the spoken over the written word. The continuous thread which appears and reappears throughout is rhetoric; this is the ground into which the rest of the Dialogue is inlaid, in parts embroidered with fine words "in order to please Phaedrus." The speech of Lysias, and the first speech of Socrates are examples of the false rhetoric, as the second speech of Socrates is adduced as an instance of the true. But the true rhetoric is based upon dialectic, and dialectic is a sort of inspiration akin to love (cp. Symp. 210 foll.); they are two aspects of philosophy in which the technicalities of rhetoric are absorbed. Thus the example becomes also the deeper theme of discourse. The true knowledge of things in heaven and earth is based upon enthusiasm or love of the ideas; and the true order of speech or writing proceeds according to them. Love, again, has three degrees: first, of interested love corresponding to the conventionalities of rhetoric; secondly, of disinterested or mad love, fixed on objects of sense, and answering, perhaps, to poetry; thirdly, of disinterested love directed towards the unseen, answering to dialectic or the science of the ideas. Lastly, the art of rhetoric in the lower sense is found to rest on a knowledge of the natures and characters of men, which Socrates at the commencement of the Dialogue has described as his own peculiar study.

Thus amid the appearance of discord a very tolerable degree of uniformity begins to arise; there are many threads of connection which are not visible at first sight. At the same time the Phaedrus, although one of the most beautiful of the Platonic Dialogues, may be admitted to have more of the character of a "tour de force," and has certainly more of the "quidlibet audendi potestas" than any other.

The first speech is composed "in that balanced style in which the wise love to talk." (Symp. 185 C.) The characteristics of rhetoric are insipidity, mannerism, and monotonous parallelism of clauses. There is more rhythm than reason; the creative power of imagination is wanting.

"'Tis Greece, but living Greece no more."

Plato has seized by anticipation the spirit which hung over Greek literature for a thousand years afterwards. Yet doubtless there were some who, like Phaedrus, felt a delight in the harmonious cadence and the pedantic reasoning of the rhetoricians newly imported from Sicily, which had ceased to be awakened in them by really great works, such as the poems of Anacreon or Sappho, or the orations of Pericles. That the first speech was really written by Lysias is in-

probable. Like the poem of Solon, or the story of Thamuz and Theuth, or the funeral oration of Aspasia (if genuine), or the pretense of Socrates in the Cratylus that his knowledge of philology is derived from Euthyphro, the invention is really due to the imagination of Plato, and may be compared to the parodies of the Sophists in the Protagoras. Numerous fictions of this sort occur in the Dialogues, and the gravity of Plato has sometimes imposed upon his commentators. The introduction of a considerable writing of another would seem not to be in keeping with a great work of art, and has no parallel elsewhere.

In the second speech Socrates is exhibited as beating the rhetoricians at their own weapons: he "an unpracticed man and they masters of the art." True to his character he must, however, profess that the speech which he makes is not his own, for he knows nothing of himself. (Cp. Symp. 201 D.) The superiority of this speech over the first seems to consist chiefly in a better arrangement of the topics; a lesser merit is the greater liveliness of Socrates, which hurries him into verse and relieves the monotony of the style; and he gives an apparent weight to his words by going back to general maxims.

Both speeches are strongly condemned by Socrates as sinful and blasphemous towards the god Love, and as worthy only of some haunt of sailors to which good manners were unknown. The meaning of this and other wild language to the same effect, which is introduced by way of contrast to the formality of the two speeches (Socrates has a sense of relief when he has escaped from the trammels of rhetoric) seems to be that the two speeches proceed upon the supposition that love is and ought to be interested, and that no such thing as a real or disinterested passion, which would be at the same time lasting, could be conceived.

This is what Socrates proposes to recant in the famous myth, which is a sort of parable, and like other parables ought not to receive too minute an interpretation. In all such allegories there is a great deal which is merely ornamental, and the interpreter has to separate the important from the unimportant. Socrates himself has given the right clew when, in using his own discourse afterwards as the text for his examination of rhetoric, he characterizes it as a "partly true and tolerably credible mythus," in which amid poetical figures, order and arrangement were not forgotten.

The soul is described in magnificent language as the self-moved and the source of motion in all other things. This is the philosophical theme or proem of the whole. But ideas must be given through something, and under the pretext that to realize the true nature of the soul would be not only tedious but impossible, we at once pass on to describe the souls of gods as well as men under the figure of two winged steeds and a charioteer. No connection is traced

between the soul as the great motive power and the triple soul which is thus imaged. There is no difficulty in seeing that the charioteer represents the reason, or that the black horse is the symbol of the sensual or concupiscent element of human nature. The white horse also represents rational impulse, but the description in p. 253, "a lover of honor and modesty and temperance, and a follower of true glory," though kindred, does not at once recall the "spirit" (θυμὸς) of the Republic. The two steeds really correspond in a figure more nearly to the appetitive and moral or semi-rational soul of Aristotle. And thus for the first time, perhaps, in the history of philosophy, we have represented to us the threefold division of psychology. The image of the charioteer and the steeds has been compared with a similar image which occurs in the verses of Parmenides; but it is important to remark that the horses of Parmenides have no allegorical meaning, and that the poet is only describing his own approach in a chariot to the regions of light and the house of the goddess of truth.

The triple soul has had a previous existence, in which following in the train of some god, from whom she derived her character, she beheld partially and imperfectly the vision of absolute truth. All her after existence, passed in many forms of men and animals, is spent in regaining this. In the various stages of this long struggle she is sorely let and hindered by the animal desires of the inferior or concupiscent steed. Again and again she beholds the flashing beauty of the beloved. But before that vision can be finally enjoyed the animal desires must be subjected.

The moral or spiritual element in man is represented by the immortal steed which, like θυμὸς in the Republic, always sides with the reason. Both are dragged out of their course by the furious impulses of desire. In the end something is conceded to the desires, after they have been finally humbled and overpowered. And yet the way of philosophy, or perfect love of the unseen is total abstinence from bodily delights. "But all men cannot receive this saying:" in the lower life of ambition they may be taken off their guard and stoop to folly unawares, and then, although they do not attain to the highest bliss, yet if they have once conquered they may be happy enough.

The language of the Meno and the Phaedo as well as of the Phaedrus, seems to show that at one time of his life Plato was quite serious in maintaining a former state of existence. His mission was to realize the abstract; in that all good and truth, all the hopes of this and another life seemed to centre. It was another kind of knowledge to him — a second world distinct from that of sense, which seemed to exist within him far more truly than the fleeting objects of sense which are without him. When we are once able to imagine the intense power which abstract ideas exercised over the

mind of Plato, we see that there was no more difficulty to him in realizing the eternal existence of them and of the human minds which were associated with them — in the past and future than in the present. The difficulty was not how they could exist, but how they could fail to exist. In the attempt to regain this "saving" knowledge of the ideas, the sense was found to be as great an enemy as the desires; and hence two things which to us seem quite distinct are inextricably blended in the representation of Plato.

Thus far we may believe that Plato was serious in his conception of the soul as a motive power, in his reminiscence of a former state of being, in his elevation of the reason over sense and passion, and perhaps in his doctrine of transmigration. Was he equally serious in the rest? For example, are we to attribute his tripartite division of the soul to the gods? Or is this merely assigned to them by way of parallelism with men? The latter is the more probable; for the horses of the gods are both white, *i. e.* their every impulse is in harmony with reason; their dualism, on the other hand, only carries out the figure of the chariot. Is he serious, again, in regarding love as "a madness?" That seems to arise out of the antithesis to the former conception of love. At the same time he appears to intimate here, as in the Ion, Apology, Meno, and elsewhere, that there is a faculty in man, whether to be termed in modern language genius, or inspiration, or idealism, which cannot be reduced to rule and measure. Perhaps, too, he is ironically repeating the common language of mankind about philosophy, and is turning their jest into a sort of earnest. (Cp. Phaedr. 61 B; Symp. 218 B.) Or is he serious in holding that each soul bears the character of a god? Perhaps he had no other account to give of the differences of human characters to which he afterwards refers. Or, again, in his absurd derivation of μαντικὴ and οἰωνιστικὴ and ἵμερος (cp. Cratylus)? It seems to be characteristic of the irony of Socrates to mix up sense and nonsense in such a way that no exact line can be drawn between them. And allegory helps to increase this sort of confusion.

As is often the case in the parables and prophecies of Scripture, the meaning is allowed to break through the figure, and the details are not always consistent. When the charioteers and their steeds stand upon the dome of heaven they behold the intangible, invisible essences which are not objects of sight. This is because the force of language can no further go. Nor can we dwell much on the circumstance, that at the completion of ten thousand years all are to return to the place from whence they came; because he also represents this as dependent on their own good conduct in the successive stages of existence. Nor again can we attribute anything to the accidental inference which would also follow, that even a tyrant may live righteously in the condition of life to which fate has called him

("he aiblins might, I dinna ken"). But this would be much at variance with Plato himself and with Greek notions generally. He is much more serious in distinguishing men from animals by their recognition of the universal which they have known in a former state, and in denying that this gift of reason can ever be obliterated or lost. In the language of some modern theologians he might be said to maintain the "final perseverance" of those who have entered on their pilgrim's progress. Other intimations of a "metaphysic" or "theology" of the future may also be discerned in him: (1) The moderate predestinarianism which here, as in the Republic, acknowledges the element of chance in human life, and yet asserts the freedom and responsibility of man; (2) The recognition of a moral as well as an intellectual principle in man under the image of an immortal steed; (3) The notion that the divine nature exists by the contemplation of ideas of virtue and justice — or, in other words, the assertion of the essentially moral nature of God; (4) Again, there is the hint that human life is a life of aspiration only, and that the true ideal is not to be found in art; (5) There occurs the first trace of the distinction between certain and contingent matter; (6) The conception of the soul itself as the motive power and reason of the universe.

The conception of the philosopher, or the philosopher and lover in one, as a sort of madman, may be compared with the Republic and Theaetetus, in both of which the philosopher is regarded as a stranger and monster upon the earth. The whole myth, like the other myths of Plato, describes in a figure things which are beyond the range of human faculties, or inaccessible to the knowledge of the age. That philosophy should be represented as the inspiration of love is a conception that has already become familiar to us in the Symposium, and is the expression partly of Plato's enthusiasm for the idea, and is also an indication of the real power exercised by the passion of friendship over the mind of the Greek. The master in the art of love knew that there was a mystery in these feelings and their associations, and especially in the contrast of the sensible and permanent which is afforded by them; and he sought to explain this, as he explained universal ideas, by a reference to a former state of existence. The capriciousness of love is also derived by him from an attachment to some god in a former world. The singular remark that the beloved is more affected than the lover at the final consummation of their love, seems likewise to have a psychological truth.

We may now pass on to the second part of the Dialogue, which is a criticism on the first. Rhetoric is assailed on various grounds: first, as expecting to deceive, without a knowledge of the truth; and secondly, as ignoring the distinction between certain and probable matter. The three speeches are then passed in review: the

first of them has no definition of the nature of love, and no order in the topics (being in these respects far inferior to the second); while the third of them is found (though a fancy of the hour) to be framed upon real dialectical principles. But dialectic is not rhetoric; nothing on that subject is to be found in the endless treatises of rhetoric, however prolific in hard names. When Plato has sufficiently put them to the test of ridicule he touches, as with the point of a needle, the real error of this as well as of much modern literature and writing upon the arts, which is the confusion of preliminary knowledge with creative power. No attainments will provide the speaker with genius; and the sort of attainments which can alone be of any value are the higher philosophy and the power of psychological analysis, which is given by dialectic, not by the rules of the rhetoricians.

Dialectic may be variously defined, either as the power of dividing a whole into parts, and of uniting the parts in a whole, or as the process of the mind talking with herself. The latter view seems to have led Plato to the paradox that speech is superior to writing, in which he may seem also to be doing an injustice to himself. For the truth is, that speech and writing cannot be fairly compared in the manner which Plato suggests. The contrast of the living and dead word, as well as the example of Socrates, which he has represented in the form of the Dialogue, seem to have misled him. For speech and writing have really different functions; the one is more transitory, more diffuse, more elastic and capable of adaptation to moods and times; the other is more permanent, more concentrated, and is uttered not to this or that person or audience, but to all the world. In the Politicus (294 foll.) the paradox is carried further; the mind or will of the king is preferred to the written law.

The chief criteria for determining the date of the Dialogue are (1) the ages of Lysias and Isocrates; (2) the character of the work.

Lysias was born in the year 458; Isocrates in the year 436, about seven years before the birth of Plato. The first of the two great rhetoricians is described as in the zenith of his fame; the second as still young and full of promise. Now it is argued that this must have been written in the youth of Isocrates, when the promise was still unfulfilled. And thus we should have to assign the Dialogue to a year not later than 406, when Isocrates was thirty and Plato twenty-three years of age, and while Socrates himself was still alive.

Those who argue in this way seem not to reflect how easily Plato can "invent Egyptians or anything else," and how careless he is of historical truth or probability. Who would suspect that the wise Critias, the virtuous Charmides, had ended their lives among the thirty tyrants? Who would imagine that Lysias, who is here as-

sailed by Socrates, is the son of his old friend Cephalus? Or that Isocrates himself is the enemy of Plato and his school? No arguments can be drawn from the appropriateness or inappropriateness of the characters of Plato. (Else, perhaps, it might be further argued, that judging from their extant remains, insipid rhetoric is far more characteristic of Isocrates than of Lysias.) But Plato makes use of names which have often hardly any connection with the historical characters to whom they belong. In this instance the comparative favor shown to Isocrates may possibly be accounted for by the circumstance of his belonging to the aristocratical, as Lysias to the democratical party.

Few persons will be inclined to suppose, in the superficial manner of some ancient critics, that a dialogue which treats of love must necessarily have been written in youth. As little weight can be attached to the argument that he had probably visited Egypt before he wrote the story of Theuth and Thamuz. For there is no real proof that he ever was in Egypt; and even if he was, he might have known or invented Egyptian traditions before he went there. The late date of the Phaedrus is really to be proved by other arguments than these: the maturity of the thought, the perfection of the style, the insight, the relation to the other Platonic Dialogues, seem to contradict the notion that it could have been the work of a youth of twenty or twenty-three years of age. The cosmological notion of the mind as the *primum mobile*, and the admission of impulse into the immortal nature, afford grounds for assigning a much later date. (Cp. Tim., Soph., Laws.) Add to this that the picture of Socrates, though in some lesser particulars, *e. g.* his going without sandals, his habit of remaining within the walls, his emphatic declaration that his study is human nature, an exact resemblance, is in the main the Platonic and not the real Socrates. Can we suppose "the young man to have told such lies" about his master while he was still alive? Moreover, when two Dialogues are so closely connected as the Phaedrus and Symposium, there is great improbability in supposing that one of them was written at least twenty years after the other. The conclusion seems to be, that the Dialogue was written at some comparatively late but unknown period of Plato's life, after he had deserted the purely Socratic point of view, but before he had entered on the more abstract speculations of the Sophist or the Philebus. Comparing the divisions of the soul, the doctrine of transmigration, the isolation of the philosophic life, and the general character of the style, we shall not be far wrong in placing the Phaedrus in the neighborhood of the Republic; remarking only that allowance must be made for the poetical element in the Phaedrus, which, while falling short of the Republic in definite philosophic results, seems to have glimpses of a truth beyond.

Two short passages, which are unconnected with the main subject

of the Dialogue, may seem to merit a more particular notice: (the *locus classicus* about mythology; (2) the tale of the grassho pers.

The first passage is remarkable as showing that Plato was entire free from what may be termed the Euhemerism of his age. (F there were Euhemerists in Greece before Euhemerus.) Other pl losophers, like Anaxagoras, had found in Homer and mythology hi den meanings. Plato, with a truer instinct, rejects these attracti interpretations; he regards the invention of them as an "unfort nate" way of employing a man's mind and time. They are endle and they draw a man off from the knowledge of himself. There a latent criticism, and also a poetical sense in Plato, which at on enable him to discard them, and yet in another way to make tl fullest use of poetry and mythology as a vehicle of thought ar feeling. The "sophistical" interest of Phaedrus, the little tou about the two versions of the story, the ironical manner in whi these explanations are set aside, "the common opinion about the is enough for me," may be noted in passing; also the general agre ment between the tone of this speech and the remark of Socrat which follows afterwards, "I am a diviner, but a poor one."

The tale of the grasshoppers is naturally suggested by the su rounding scene. Yet we must not forget, also, that they are tl representatives of the Athenians as children of the soil. Und the image of the lively chirruping grasshoppers who inform tl Muses in heaven who honors them on earth, Plato intends to repr sent an Athenian audience (τεττίγεσσιν ἐοικότες). The story introduced, apparently, to mark a change of subject, and also, lik several other allusions which occur in the course of the Dialogue, i order to preserve the scene in the recollection of the reader.

PHAEDRUS.

PERSONS OF THE DIALOGUE.

SOCRATES. PHAEDRUS.

SCENE: — Under a plane-tree, by the banks of the Ilissus.

Soc. MY dear Phaedrus, whence come you, and whither are you going? Steph. 227

Phaedrus. I am come from Lysias the son of Cephalus, and I am going to take a walk outside the wall, for I have been with him ever since the early dawn, which is a long while, and our common friend Acumenus advises me to walk in the country; he says that this is far more refreshing than walking in the courts.

Soc. There he is right. Lysias then, I suppose, was in the city?

Phaedr. Yes, he was with Epicrates, at the house of Morychus; that house which is near the temple of Olympian Zeus.

Soc. And how did he entertain you? Can I be wrong in supposing that Lysias gave you a feast of discourse?

Phaedr. You shall hear, if you have leisure to stay and listen.

Soc. And would I not regard the conversation of you and Lysias as "a thing of higher import," as I may say in the words of Pindar, "than any business?"

Phaedr. Will you go on?

Soc. And will you go on with the narration?

Phaedr. My tale, Socrates, is one of your sort, for the theme which occupied us was love, — after a fashion: Lysias imagined a fair youth who was being tempted, but not by a lover; and this was the point: he ingeniously proved that the non-lover should be accepted rather than the lover.

Soc. O that is noble of him. And I wish that he would say a poor man rather than a rich, and an old man rather than a young one; he should meet the case of me, and all of us, and then his words would indeed be charming, and of public utility; and I am so eager to hear them that if you walk all the way to Megara, and when you have reached the wall come back, as Herodicus recommends, without going in, I will not leave you.

Phaedr. What do you mean, Socrates? How can you im-
228 agine that I, who am quite unpracticed, can remember or do justice to an elaborate work, which the greatest rhetorician of the day spent a long time in composing. Indeed, I cannot; I would give a great deal if I could.

Soc. I believe that I know Phaedrus about as well as I know myself, and I am very sure that he heard the words of Lysias, not once only, but again and again he made him say them, and Lysias was very willing to gratify him; at last, when nothing else would satisfy him, he got hold of the book, and saw what he wanted, — this was his morning's occupation, — and then when he was tired with sitting, he went out to take a walk, not until, as I believe, he had simply learned by heart the entire discourse, which may not have been very long; and as he was going to take a walk outside the wall in order that he might practice, he saw a certain lover of discourse who had the same complaint as himself: he saw and rejoiced; now, thought he, "I shall have a partner in my revels." And he invited him to come with him. But when the lover of discourse asked to hear the tale, he gave himself airs and said, "No, I can't," as if he didn't like; although, if the hearer had refused, the end would have been that he would have made him listen whether he would or no. Therefore, Phaedrus, as he will soon speak in any case, beg him to speak at once.

Phaedr. As you don't seem very likely to let me off until I speak in some way, the best thing that I can do is to speak as I best may.

Soc. That is a very true observation of yours.

Phaedr. I will do my best, for believe me, Socrates, I did not learn the very words; O no, but I have a general notion of what he said, and will repeat concisely, and in order, the several arguments by which the case of the non-lover was proved to be superior to that of the lover; let me begin at the beginning.

Soc. Yes, my friend; but you must first of all show what

you have got in your left hand under your cloak, for that roll, as I suspect, is the actual discourse. Now, much as I love you, I would not have you suppose that I am going to have your memory exercised upon me, if you have Lysias himself here.

Phaedr. Enough; I see that I have no hope of practicing upon you. But if I am to read, where would you please to sit? 229

Soc. Turn this way; let us go to the Ilissus, and sit down at some quiet spot.

Phaedr. I am fortunate in not having my sandals, and as you never have any, I think that we may go along the brook and cool our feet in the water: this is the easiest way, and at m'dday and in the summer is far from being unpleasant.

Soc. Lead on, and look out for a place in which we can sit down.

Phaedr. Do you see that tallest plane-tree in the distance?

Soc. Yes.

Phaedr. There are shade and gentle breezes, and grass on which we may either sit or lie down.

Soc. Move on.

Phaedr. I should like to know, Socrates, whether the place is not somewhere here at which Boreas is said to have carried off Orithyia from the banks of the Ilissus.

Soc. That is the tradition.

Phaedr. And is this the exact spot? The little stream is delightfully clear and bright; I can fancy that there might be maidens playing near.

Soc. I believe that the spot is not exactly here, but about a quarter of a mile lower down, where you cross to the temple of Agra, and I think that there is some sort of altar of Boreas at the place.

Phaedr. I don't recollect; but I wish that you would tell me whether you believe this tale.

Soc. The wise are doubtful, and if, like them, I also doubted, there would be nothing very strange in that. I might have a rational explanation that Orithyia was playing with Pharmacia, when a northern gust carried her over the neighboring rocks: and this being the manner of her death, she was said to have been carried away by Boreas. There is a discrepancy, however, about the locality, as according to another version of the story she was taken from the Areopagus, and not from this place. Now I quite acknowledge that these explanations are

very nice, but he is not to be envied who has to give them; much labor and ingenuity will be required of him; and when he has once begun, he must go on and rehabilitate centaurs and chimeras dire. Gorgons and winged steeds flow in apace, and numberless other inconceivable and impossible monstrosities and marvels of nature. And if he is skeptical about them, and would fain reduce them all to the rules of probability, this sort of crude philosophy will take up all his time. Now I have certainly not time for this; shall I tell you why? I must first know myself, as the Delphian inscription says; and I should be absurd indeed, if while I am still in ignorance of myself I were to be curious about that which is not my business. And therefore I say farewell to all this; the common opinion is enough for me. For, as I was saying, I want to know not about this, but about myself. Am I indeed a wonder more complicated and swollen with passion than the serpent Typho, or a creature of a gentler and simpler sort, to whom Nature has given a diviner and lowlier destiny? But here let me ask you, friend: Is not this the plane-tree to which you were conducting us?

Phaedr. Yes, this is the tree.

Soc. Yes, indeed, and a fair and shady resting-place, full of summer sounds and scents. There is the lofty and spreading plane-tree, and the agnus castus high and clustering, in the fullest blossom and the greatest fragrance; and the stream which flows beneath the plane-tree is deliciously cold to the feet. Judging from the ornaments and images, this must be a spot sacred to Achelous and the Nymphs; moreover, there is a sweet breeze, and the grasshoppers chirrup; and the greatest charm of all is the grass like a pillow gently sloping to the head. My dear Phaedrus, you have been an admirable guide.

Phaedr. I always wonder at you, Socrates; for when you are in the country, you really are like a stranger who is being led about by a guide. Do you ever cross the border? I rather think that you never venture even outside the gates.

Soc. Very true, my good friend; and I hope that you will excuse me when you hear the reason, which is, that I am a lover of knowledge, and the men who dwell in the city are my teachers, and not the trees, or the country. Though I do, indeed, believe that you have found a spell with which to draw me out of the city into the country, as hungry cows are led by shaking before them a bait of leaves or fruit. For only hold

up the bait of discourse, and you may lead me all round Attica, and over the wide world. And now having arrived, I intend to lie down, and do you choose any posture in which you can read best. Begin.

Phaedr. Listen. "You know my views of our common interest, and I do not think that I ought to fail in the object 231
of my suit, because I am not your lover: for the kindnesses of lovers are afterwards regretted by them when their passion ceases, but non-lovers have no time of repentance, because they are free and not subject to necessity, and they confer their benefits as far as they are able, in the way which is most conducive to their own interest. Then again, lovers remember how they have neglected their interests, for the sake of their loves; they consider the benefits which they have conferred on them; and when to these they add the troubles which they have endured, they think that they have long ago paid all that is due to them. But the non-lover has no such tormenting recollections; he has never neglected his affairs or quarreled with his relations; he has no troubles to reckon up, or excuses to allege; for all has gone smoothly with him. What remains, then, but that he should freely do what will gratify the beloved? But you will say that the lover is more to be esteemed, because his love is thought to be greater; for he is willing to say and do what is hateful to other men, in order to please his beloved: well, that, if true, is only a proof that he will prefer any future love to his present, and will injure his old love at the pleasure of the new. And how can a man reasonably sacrifice himself to one who is possessed with a malady which no experienced person would attempt to cure, for the patient himself admits that he is not in his right mind, and acknowledges that he is wrong in his mind, but is unable, as he says, to control himself. How, if he came to his right mind, could he imagine that the desires were good which he conceived when in his wrong mind? Then again, there are many more non-lovers than lovers; and, therefore, you will have a larger choice, and are far more likely to find among them a compatible friend. And if you fear common opinion, and would avoid publicity and reproach, the lover, who is always 232
thinking that other men are as emulous of him as he is of them, will be sure to boast of his successes, and make a show of them openly in the pride of his heart; he wants others to know that his labor has not been lost; but the non-lover is more his own master, and is desirous of solid good, and not of the vain-

glory of men. Again, the lover may be generally seen and known following the beloved (this is his regular occupation), and when they are observed to exchange two words they are supposed to meet about some affair of love, either past or future; but when non-lovers meet, no one asks the reason why, because people know that talking is natural, whether friendship or mere pleasure is the motive. And, again, if you fear the fickleness of friendship, consider that in any other case a quarrel might be a mutual calamity; but now, when you have given up what is most precious to you, you will be the great loser, and therefore, you will have reason in being more afraid of the lover, for his vexations are many, and he is always fancying that everything is against him. And for this reason he debars his beloved from society; he will not have you intimate with the wealthy, lest they should exceed him in wealth, or with men of education, lest they should be his superiors in knowledge; and he is equally afraid of the power of any other good. He would persuade you to have nothing to do with them, in order that he may have you all to himself, and if, out of regard to your own interest, you have more sense than to comply with his desire, a quarrel will ensue. But those who are non-lovers, and whose success in love is the reward of their superiority, will not be jealous of the companions of their beloved, but will rather hate those who refuse to be his companions, thinking that their refusal is a mark of contempt, and that he would be benefited by having companions; more love than hatred may be expected to come of that. Many lovers also have loved the person of a youth before they knew his character, or were acquainted with his domestic relations; so that when their passion has passed away, there is no knowing
233 whether they will continue to be his friends; whereas, in the case of non-lovers who were always friends, the friendship is not lessened by sensual delights; but the recollection of these remains with them, and is an earnest of good things to come. Further, I say that you are likely to be improved by me, whereas the lover will spoil you. For they praise your words and actions in a bad way; partly, they are afraid of offending you, and partly, their judgment is weakened by their passion: for lovers are singular beings when disappointed in love — they deem that painful which is not painful to others, and when successful they cannot help praising that which ought not to give them pleasure; so that the beloved is a far more appropriate object of pity than of envy. But if you listen to

me, in the first place, I, in my intercourse with you, shall not regard present enjoyment, but future advantage, being not conquered by love, but conquering myself; nor for small causes taking violent offenses, but even when the cause is great, slowly laying up little wrath — unintentional offenses I shall forgive, and intentional ones I shall try to prevent; and these are the marks of a friendship which will last. But if you think that only a lover can be a firm friend, you ought to consider that, if this were true, we should set small value on sons, or fathers, or mothers; nor should we ever have loyal friends, for our love of them arises not from passion, but from other associations. Further, if we ought to confer favors on those who are the most eager suitors, we ought to confer them not on the most virtuous, but on the most needy; for they are the persons who will be most relieved, and will therefore be the most grateful; and, in general, when you make a feast, invite not your friend, but the beggar and the empty soul, for they will love you, and attend you, and come about your doors, and will be the best pleased, and the most grateful, and will invoke blessings on your head. But, perhaps, you will say that you ought not to give to the most importunate, but to those who are best able to reward you; nor to the lover only, but to those who are worthy of love; 234
nor to those who will enjoy the charm of your youth, but to those who will share their goods with you in age; nor to those who, having succeeded, will glory in their success to others, but to those who will be modest and hold their peace; nor to those who care about you for a moment only, but to those who will continue your friends for life; nor to those who, when their passion is over, will pick a quarrel with you, but rather to those who, when the bloom of youth is over, will show their own virtue. Remember what I have said; and consider this also, that friends admonish the lover under the idea that his way of life is bad, but no one of his kindred ever yet censured the non-lover, or thought that he was ill-advised about his own interests.

"Perhaps you will ask me whether I propose that you should indulge every non-lover. To which I reply that not even the lover would advise you to indulge all lovers, for the favor is less in the just estimation of the receiver and more difficult to hide from the world. Now love ought to be for the advantage of both parties and for the injury of neither.

"I believe that I have said enough; but if there is anything

more which you desire or which needs to be supplied, ask and I will answer."

Now, Socrates, what do you think? Is not the discourse excellent, especially the language?

Soc. Yes indeed, admirable; the effect on me was ravishing. And this I owe to you, Phaedrus, for I observed you while reading to be in an ecstasy, and thinking that you are more experienced in these matters than I am, I followed your example, and, like you, became inspired with a divine frenzy.

Phaedr. Indeed, you are pleased to be merry.

Soc. Do you mean that I am not in earnest?

Phaedr. Now, don't talk in that way, Socrates, but let me have your real opinion; I adjure you, by the god of friendship, to tell me whether you think that any Hellene could have said more or spoken better on the same subject.

Soc. Well, but are you and I expected to praise the sentiments of the author, or only the clearness, and roundness, and accuracy, and tournure of the language? As to the first I willingly submit to your better judgment, for I am unworthy to
235 form an opinion, having only attended to the rhetorical manner; and I was doubting whether Lysias himself would be able to defend that; for I thought, though I speak under correction, that he repeated himself two or three times, either from want of words or from want of pains; and also, he appeared to me wantonly ambitious of showing how well he could say the same thing in two or three ways.

Phaedr. Nonsense, Socrates; that was his exhaustive treatment of the subject; for he omitted nothing; this is the special merit of the speech, and I do not think that any one could have made a fuller or better.

Soc. I cannot go so far as that with you. Ancient sages, men and women, who have spoken and written of these things, would rise up in judgment against me, if I lightly assented to you.

Phaedr. Who are they, and where did you hear anything better than this?

Soc. I am sure that I must have heard; I don't remember at this moment from whom; perhaps from Sappho the fair, Anacreon the wise; or, possibly, from a prose writer. What makes me say this? Why, because I perceive that my bosom is full, and that I could make another speech as good as that of Lysias, and different. Now I am certain that this is not an invention

of my own, for I am conscious that I know nothing, and therefore I can only infer that I have been filled through the ears, like a pitcher from the waters of another, though I have actually forgotten in my stupidity who was my informant.

Phaedr. That is grand. But never mind where you heard the discourse or of whom; let that, if you will, be a mystery not to be divulged even at my earnest desire. But do as you say; promise to make another and better oration of equal length on the same subject, with other arguments; and I, like the nine Archons, will promise to set up a golden image at Delphi, not only of myself, but of you, and as large as life.

Soc. You are a dear golden simpleton if you suppose me to mean that Lysias has altogether missed the mark, and that I can make a speech from which all his arguments are to be excluded. The worst of authors will say something that is to the point. Who, for example, could speak on this thesis of yours without praising the discretion of the non-lover and blaming the folly of the lover? These are the commonplaces 236
which must come in (for what else is there to be said?) and must be allowed and excused; the only merit is in the arrangement of them, for there can be none in the invention; but when you leave the commonplaces, then there may be some originality.

Phaedr. I admit that there is reason in that, and I will be reasonable too, and will allow you to start with the premise that the lover is more disordered in his wits than the non-lover; and if you go on after that and make a longer and better speech than Lysias, and use other arguments, then I say again that a statue you shall have of beaten gold, and take your place by the colossal offering of the Cypselids at Olympia.

Soc. Is not the lover serious, because only in fun I lay a finger upon his love? And so, Phaedrus, you really imagine that I am going to improve upon his ingenuity?

Phaedr. There I have you as you had me, and you must speak "as you best can," and no mistake. And don't let us have the vulgar exchange of "tu quoque" as in a comedy, or compel me to say to you as you said to me, "I know Socrates as well as I know myself, and he was wanting to speak, but he gave himself airs." Rather I would have you consider that from this place we stir not until you have unbosomed yourself of the speech; for here are we all alone, and I am stronger, remember, and younger than you; therefore perpend, and do not compel me to use violence.

Soc. But, my sweet Phaedrus, how can I ever compete with Lysias in an extempore speech? He is a master in his art and I am an untaught man.

Phaedr. You see how matters stand; and therefore let there be no more pretenses; for, indeed, I know the word that is irresistible.

Soc. Then don't say it.

Phaedr. Yes, but I will; and my word shall be an oath. "I say, or rather swear" — but what god will be the witness of my oath? — "I swear by this plane-tree, that unless you repeat the discourse here, in the face of the plane-tree, I will never tell you another; never let you have word of another!"

Soc. Villain! I am conquered; the poor lover of discourse has no more to say.

Phaedr. Then why are you still at your tricks?

Soc. I am not going to play tricks now that you have taken the oath, for I cannot allow myself to be starved.

Phaedr. Proceed.

237 *Soc.* Shall I tell you what I will do?

Phaedr. What?

Soc. I will veil my face and gallop through the discourse as fast as I can, for if I see you, I shall feel ashamed and not know what to say.

Phaedr. Only go on and you may do as you please.

Soc. Come, O ye Muses, melodious (λιγεῖαι), as ye are called, whether you have received this name from the character of your strains, or because the Melians[1] are a musical race, help, O help me in the tale which my good friend desires me to rehearse, for the good of his friend whom he always deemed wise and will now deem wiser than ever.

Once upon a time there was a fair boy, or, more properly speaking, a youth; he was very fair and had a great many lovers; and there was one special cunning one, who had persuaded the youth that he did not love him, but he really loved him all the same; and one day as he was paying his addresses to him, he used this very argument, — that he ought to accept the non-lover rather than the lover; and his words were as follow: —

"All good counsel begins in the same way; a man should know what he is advising about, or his counsel will come to nought. But people imagine that they know about the nature

[1] In the original, λιγυραὶ Λίγυες.

of things, when they don't know about them, and, not agreeing at the beginning, they end, as might be expected, in contradicting one another and themselves. Now you and I must not be guilty of the error which we condemn in others; but as our question is whether the lover or non-lover is to be preferred, let us first of all agree in defining the nature and power of love, and then, keeping our eyes upon this and to this appealing, let us further inquire whether love brings advantage or disadvantage.

"Every one sees that love is a desire, and we know also that non-lovers desire the beautiful and good. Now in what way is the lover to be distinguished from the non-lover? Let us note that in every one of us there are two guiding and ruling principles which lead us whither they will; one is the natural desire of pleasure, the other is an acquired opinion which is in search of the best; and these two are sometimes in harmony and then again at war, and sometimes the one, sometimes the other conquers. When opinion conquers, and by the help of reason leads us to the best, the conquering principle is called temperance; but when desire, which is devoid of reason, rules in us and drags us to pleasure, that power of misrule is called excess. Now excess has many names, and many members, and many forms, and any of these forms when marked 238 gives a name to the bearer of the name, neither honorable nor desirable. The desire of eating, which gets the better of the higher reason and the other desires, is called gluttony, and he who is possessed by this is called a glutton; the tyrannical desire of drink, which inclines the possessor of the desire to drink, has a name which is only too obvious; and the same may be said of the whole family of desires and their names, whichever of them happens to be dominant. And now I think that you will perceive the drift of my discourse; but as every spoken word is in a manner plainer than the unspoken, I had better say further that the irrational desire which overcomes the tendency of opinion towards right, and is led away to the enjoyment of beauty, and especially of personal beauty, by the desires which are her kindred, — that desire, I say, the conqueror and leader of the rest, and waxing strong from having this very power, is called the power of love (ἐῤῥωμένως ἔρως)."

And now, dear Phaedrus, I shall pause for an instant to ask whether you do not think me, as I appear to myself, inspired?

Phaedr. Yes, Socrates, you seem to have a very unusual flow of words.

Soc. Listen to me, then, in silence; for surely the place is holy; so that you must not wonder, if, as I proceed, I appear to be in a divine fury, for already I am getting into dithyrambics.

Phaedr. That is quite true.

Soc. And that I attribute to you. But hear what follows, and perhaps the fit may be averted; all is in their hands above. And now I will go on talking to my youth. Listen: —

Thus, my friend, we have declared and determined the nature of love. Keeping this in view, let us now inquire what advantage or disadvantage is likely to ensue from the lover or the non-lover to him who accepts their advances.

He who is the victim of his passions and the slave of pleasure will of course desire to make his beloved as agreeable to himself as possible. Now to him who is not in his right senses that is agreeable which is not opposed to him, but that which is equal or superior is hateful to him, and therefore the lover will not brook any superiority or equality on the part of
239 his beloved; he is always employed in reducing him to inferiority. And the ignorant is the inferior of the wise, the coward of the brave, the slow of speech of the speaker, the dull of the clever. These are the sort of natural and inherent defects in the mind of the beloved which enhance the delight of the lover, and there are acquired defects which he must produce in him, or he will be deprived of his fleeting joy. And therefore he cannot help being jealous, and will debar him from the advantages of society which would make a man of him, and especially from that society which would have given him wisdom. That is to say, he will be compelled to banish from him divine philosophy, in his excessive fear lest he should come to be despised in his eyes; and there is no greater injury which he can inflict on him than this. Moreover, he will contrive that he shall be wholly ignorant, and in everything dependent on himself; he is to be the delight of his lover's heart, and a curse to himself. Verily, a lover is a profitable guardian and associate for him in all that relates to his mind.

Let us next see how his master, whose law of life is pleasure and not good, will keep and train the body of his servant. Will he not choose a beloved who is delicate rather than sturdy and strong? One brought up in shady bowers and not in the bright

sun; not practiced in manly exercises or dried by perspiration, but knowing only a soft and luxurious diet; instead of the hues of health having only the colors of paint and ornament, and the rest of a piece? — such a life as any one can imagine and which I need not detail at length. But I may sum up all that I have to say in a word, and pass on. Such a person in war, or in any of the great exigencies in life, will be the anxiety of his friends and also of his lover, and certainly not the terror of his enemies; which nobody can deny.

And now let us tell what advantage or disadvantage the beloved will receive from the guardianship and society of his lover in the matter of his possessions; that is the next point to consider. All men will see, and the lover above all men, that his own first wish is to deprive his beloved of his dearest and best and most sacred possessions, — father, mother, kindred, friends, all whom he thinks may be hinderers or reprovers of their sweet converse; he will even cast a jealous eye upon his gold and silver or other property, because these make him a less easy and manageable prey, and hence he is of necessity displeased at the possession of them and rejoices at their loss; and he would like him to be wifeless, childless, homeless, as well; and the longer the better, for the longer he is all this, the longer he will enjoy him. 240

There are some sort of animals, such as flatterers, which are dangerous and mischievous enough, and yet nature has mingled a temporary pleasure and grace in their composition. You may say that a courtesan is hurtful, and disapprove of such creatures and their practices, and yet for the time they are very pleasant. But the lover is not only mischievous to his love, he is also extremely unpleasant to live with. Equals, as the proverb says, delight in equals; equality of years inclines them to the same pleasures, and similarity begets friendship, and yet you may have more than enough even of this, and compulsion is always said to be grievous. Now the lover is not only unlike his beloved, but he forces himself upon him. For he is old and his love is young, and neither day nor night will he leave him if he can help; and necessity and the sting of desire drive him on, and allure him with the pleasure which he receives from seeing, hearing, touching, perceiving him. And therefore he is delighted to fasten upon him and to minister to him. But what pleasure or consolation can the beloved be receiving all this time? Must he not feel the extremity of disgust when he looks

at an old withered face and the remainder to match, which even in a description is not agreeable, and quite detestable when you are forced into daily contact with them; moreover he is jealously watched and guarded against everything and everybody, and has to hear misplaced and exaggerated praises of himself, and censures as inappropriate, which are quite intolerable when the man is sober, and, besides being intolerable, are published all over the world in all their shamelessness and wearisomeness when he is drunk.

And not only while his love continues is he mischievous and unpleasant, but when his love ceases he becomes a perfidious
241 enemy of him on whom he showered his oaths and prayers and promises, and yet could hardly prevail upon him to tolerate the tedium of his company even from motives of interest. The time of payment arrives, and now he is the servant of another master; instead of love and infatuation, wisdom and temperance are his bosom's lords; the man has changed, but the beloved is not aware of this; he asks for a return, and recalls to his recollection former acts and words, for he fancies that he is talking to the same person, and the other, being ashamed and not having the courage to tell him that he has changed, and not knowing how to make good his promises, has now grown virtuous and temperate; he does not want to do as he did or to be as he was before. Therefore he runs away and can but end a defaulter; quick as the spinning of a teetotum[1] he changes pursuit into flight, and the other is compelled to follow him with passion and imprecation, not knowing that he ought never from the first to have accepted a demented lover instead of a sensible non-lover; and that in making such a choice he was yielding to a faithless, morose, envious, disagreeable being, hurtful to his estate, hurtful to his bodily constitution, and still more hurtful to the cultivation of his mind, which is and ever will be the most honorable possession both of gods and men. Consider this, fair youth, and know that in the friendship of the lover there is no real kindness: he has an appetite and wants to feed upon you.

"As wolves love lambs so lovers love their loves."

But, as I said before, I am speaking in verse, and therefore I had better make an end; that is enough.

Phaedr. I thought that you were only half-way and were

[1] Lit. an oyster-shell.

going to make a similar speech about all the advantages of accepting the non-lover. Why don't you go on?

Soc. Does not your simplicity observe that I have got out of dithyrambics into epics; and if my censure was in verse, what will my praise be? Don't you see that I am already overtaken by the Nymphs to whom you have mischievously exposed me? And therefore I will only add that the non-lover has all the advantages in which the lover is charged with being deficient. And now I will say no more; there has been enough said of both of them. Leaving the tale to its fate, I will cross the river and make the best of my way home, lest a worse thing be inflicted upon me by you. 242

Phaedr. Not yet, Socrates; not until the heat of the day has passed; don't you see that the hour is noon, and the sun is standing over our heads? Let us rather stay and talk over what has been said, and then return in the cool.

Soc. Your love of discourse, Phaedrus, is superhuman, simply marvelous, and I do not believe that there is any one of your contemporaries who in one way or another has either made or been the cause of others making an equal number of speeches. I would except Simmias the Theban, but all the rest are far behind you. And now I do verily believe that you have been the cause of another.

Phaedr. That is good news. But what do you mean?

Soc. I mean to say that as I was about to cross the stream the usual sign was given to me; that is the sign which never bids but always forbids me to do what I am going to do; and I thought that I heard a voice saying in my ear that I had been guilty of impiety, and that I must not go away until I had made an atonement. Now I am a diviner, though not a very good one, but I have enough religion for my own needs, as you might say of a bad writer — his writing is good enough for him. And, O my friend, how singularly prophetic is the soul! For at the time I had a sort of misgiving, and, like Ibycus, "I was troubled," and I suspected that I might be receiving honor from men at the expense of sinning against the gods. Now I am aware of the error.

Phaedr. What error?

Soc. That was a dreadful speech which you brought with you, and you made me utter one as bad.

Phaedr. How was that?

Soc. Foolish, I say, and in a degree impious; and what can be more dreadful than this?

Phaedr. Nothing, if the speech was really such as you describe.

Soc. Well, and is not Eros the son of Aphrodite a mighty god?

Phaedr. That is the language of mankind about him.

Soc. But that was not the language of Lysias' speech any more than of that other speech uttered through my lips when under the influence of your enchantments, and which I may call yours and not mine. For Love, if he be a god or divine, cannot be evil. Yet this was the error of both our speeches. There was also a solemnity about them which was truly
243 charming; they had no truth or honesty in them, and yet they pretended to be something, hoping to succeed in deceiving the manikins of earth and be famous among them. And therefore I must have a purgation. And now I bethink me of an ancient purgation of mythological error which was devised, not by Homer, for he never had the wit to discover why he was blind, but by Stesichorus, who was a philosopher and knew the reason why; and, therefore, when he lost his eyes, for that was the penalty which was inflicted upon him for reviling the lovely Helen, he purged himself. And the purgation was a recantation, which began with the words: —

"That was a lie of mine when I said that thou never embarkedst on the swift ships, or wentest to the walls of Troy."

And when he had completed his poem, which is called "the recantation," immediately his sight returned to him. Now I will be wiser than either Stesichorus or Homer, in that I am going to make a recantation before I lose mine; and this I will attempt, not as before, veiled and ashamed, but with forehead bold and bare.

Phaedr. There is nothing which I should like better to hear.

Soc. Only think, my good Phaedrus, what an utter want of delicacy was shown in the two discourses; I mean, in my own and in the one which you recited out of the book. Would not any one who was himself of a noble and gentle nature, and who loved or ever had loved a nature like his own, when he heard us speaking of the petty causes of lovers' jealousies, and of their exceeding animosities, and the injuries which they do to their beloved, have imagined that our ideas of love were taken from some haunt of sailors to which good manners were unknown — he would certainly never have admitted the justice of our censure?

Phaedr. Certainly not.

Soc. Therefore, because I blush at the thought of this person, and also because I am afraid of the god Love, I desire to wash down that gall and vinegar with a wholesome draught; and I would counsel Lysias not to delay, but to write another discourse, which shall prove "ceteris paribus" that the lover ought to be accepted rather than the non-lover.

Phaedr. Be assured that he shall. You shall speak the praises of the lover, and Lysias shall be made to write them in another discourse. I will compel him to do this.

Soc. You will be true to your nature in that, and therefore I believe you.

Phaedr. Speak, and fear not.

Soc. But where is the fair youth whom I was addressing, and who ought to listen, in order that he may not be misled by one side before he has heard the other?

Phaedr. He is close at hand, and always at your service.

Soc. Know then, fair youth, that the former discourse was that of a finely-scented gentleman, who is all myrrh and fragrance, named Phaedrus, the son of Vain Man. And 244
this is the recantation of Stesichorus the pious, who comes from the town of Desire, and is to the following effect: That was a lie in which I said that the beloved ought to accept the non-lover and reject the lover, because the one is sane, and the other mad. For that might have been truly said if madness were simply an evil; but there is also a madness which is the special gift of Heaven, and the source of the chiefest blessings among men. For prophecy is a madness, and the prophetess at Delphi and the priestesses of Dodona, when out of their senses have conferred great benefits on Hellas, both in public and private life, but when in their senses few or none. And I might also tell you how the Sibyl and other persons, who have had the gift of prophecy, have told the future of many a one and guided them aright; but that is obvious, and would be tedious.

There will be more reason in appealing to the ancient inventors of names, who, if they had thought madness a disgrace or dishonor, would never have called prophecy, which is the noblest of arts, by the very same name (μαντικὴ, μανικὴ) as madness, thus inseparably connecting them; but they must have thought that there was an inspired madness which was no disgrace; for the two words, μαντικὴ and μανικὴ, are really the same, and the letter τ is only a modern and tasteless insertion.

And this is confirmed by the name which they gave to the rational investigation of futurity, whether made by the help of birds or other signs; this as supplying from the reasoning faculty insight and information to human thought (*νοῦς* and *ἱστορία*), they originally termed *οἰονοιστικὴ*, but the word has been lately altered and made sonorous by the modern introduction of the letter Omega (*οἰονοιστικὴ* and *οἰωνιστικὴ*), and in proportion as (*μαντικὴ* or) prophecy is higher and more perfect than divination both in name and reality, in the same proportion as the ancients testify, is madness superior to a sane mind (*σωφροσύνη*), for the one is only of human, but the other of divine origin. Again, where plagues and mightiest woes have bred in a race, owing to some ancient wrath, there madness, lifting up her voice and flying to prayers and rites, has come to the rescue of those who are in need; and he who has part in this gift, and is truly possessed and duly out of his mind, is by the use of purifications and mysteries made whole and delivered from evil, future as well as present, and has a release from the
245 calamity which afflicts him. There is also a third kind of madness, which is a possession of the Muses; this enters into a delicate and virgin soul, and there inspiring frenzy, awakens lyric and all other numbers; with these adorning the myriad actions of ancient heroes for the instruction of posterity. But he who, not being inspired and having no touch of madness in his soul, comes to the door and thinks that he will get into the temple by the help of art — he, I say, and his poetry are not admitted; the sane man is nowhere at all when he enters into rivalry with the madman.

I might tell of many other noble deeds which have sprung from inspired madness. And therefore, let no one frighten or flutter us by saying that temperate love is preferable to mad love, but let him further show, if he would carry off the palm, that love is not sent by the gods for any good to lover or beloved. And we, on our part, will prove in answer to him that the madness of love is the greatest of Heaven's blessings, and the proof shall be one which the wise will receive, and the witling disbelieve. And, first of all, let us inquire what is the truth about the affections and actions of the soul, divine as well as human. And thus we begin our proof: —

The soul is immortal, for that is immortal which is ever in motion; but that which moves and is moved by another, in ceasing to move ceases also to live. Therefore, only that which

is self-moving, never failing of self, never ceases to move, and is the fountain and beginning of motion to all that moves besides. Now, the beginning is unbegotten, for that which is begotten has a beginning; but the beginning has no beginning, for if a beginning were begotten of something, that would have no beginning. But that, which is unbegotten must also be indestructible; for if beginning were destroyed, there could be no beginning out of anything, or anything out of a beginning; and all things must have a beginning. And therefore the self-moving is the beginning of motion; and this can neither be destroyed nor begotten, for in that case the whole heavens and all generation would collapse and stand still, and never again have motion or birth. But if the self-moving is immortal, he who affirms that self-motion is the very idea and essence of the soul will not be put to confusion. For the body which is moved from without is soulless; but that which is moved from within has a soul, and this is involved in the nature of the soul. But if the soul be truly affirmed to be the self-moving, then must she also be without beginning, and immortal. 246
Enough of the soul's immortality.

Her form is a theme of divine and large discourse; human language may, however, speak of this briefly, and in a figure. Let our figure be of a composite nature, — a pair of winged horses and a charioteer. Now the winged horses and the charioteer of the gods are all of them noble, and of noble breed, while ours are mixed; and we have a charioteer who drives them in a pair, and one of them is noble and of noble origin, and the other is ignoble and of ignoble origin; and, as might be expected, there is a great deal of trouble in managing them. I will endeavor to explain to you in what way the mortal differs from the immortal creature. The soul or animate being has the care of the inanimate, and traverses the whole heaven in divers forms appearing; when perfect and fully winged she soars upward, and is the ruler of the universe; while the imperfect soul loses her feathers, and drooping in her flight at last settles on the solid ground, — there, finding a home, she receives an earthly frame which appears to be self-moved, but is really moved by her power; and this composition of soul and body is called a living and mortal creature. For no such union can be reasonably believed, or at all proved to be other than mortal; although fancy may imagine a god whom, not having seen nor surely known, we invent, — such a one, an immortal

creature having a body, and having also a soul which have been united in all time. Let that, however, be as God wills, and be spoken of acceptaoly to him. But the reason why the soul loses her feathers should be explained, and is as follows:—

The wing is intended to soar aloft and carry that which gravitates downwards into the upper region, which is the dwelling of the gods; and this is that element of the body which is most akin to the divine. Now the divine is beauty, wisdom, goodness, and the like; and by these the wing of the soul is nourished, and grows apace; but when fed upon evil and foulness, and the like, wastes and falls away. Zeus, the mighty lord holding the reins of a winged chariot, leads the way in heaven,
247 ordering all and caring for all; and there follows him the heavenly array of gods and demi-gods, divided into eleven bands; for only Hestia is left at home in the house of heaven; but the rest of the twelve greater deities march in their appointed order. And they see in the interior of heaven many blessed sights; and there are ways to and fro, along which the happy gods are passing, each one fulfilling his own work; and any one may follow who pleases, for jealousy has no place in the heavenly choir. This is within the heaven. But when they go to feast and festival, then they move right up the steep ascent, and mount the top of the dome of heaven. Now the chariots of the gods, self-balanced, upward glide in obedience to the rein; but the others have a difficulty, for the steed who has evil in him, if he has not been properly trained by the charioteer, gravitates and inclines and sinks towards the earth: and this is the hour of agony and extremest conflict of the soul. For the immortal souls, when they are at the end of their course, go out and stand upon the back of heaven, and the revolution of the spheres carries them round, and they behold the world beyond. Now of the heaven which is above the heavens, no earthly poet has sung or ever will sing in a worthy manner. But I must tell, for I am bound to speak truly when speaking of the truth. The colorless and formless and intangible essence is visible to the mind, which is the only lord of the soul. Circling around this in the region above the heavens is the place of true knowledge. And as the divine intelligence, and that of every other soul which is rightly nourished, is fed upon mind and pure knowledge, such an intelligent soul is glad at once more beholding being; and feeding on the sight of truth is replenished, until the revolution of the worlds brings her round

again to the same place. During the revolution she beholds justice, temperance, and knowledge absolute, not in the form of generation or of relation, which men call existence, but knowledge absolute in existence absolute; and beholding other existences in like manner, and feeding upon them, she passes down into the interior of the heavens and returns home, and there the charioteer putting up his horses at the stall, gives them ambrosia to eat and nectar to drink.

This is the life of the gods; but of other souls, that which follows God best and is likest to him lifts the head of the charioteer into the outer world and is carried round in the 248 revolution, troubled indeed by the steeds, and beholding true being, but hardly; another rises and falls, and sees, and again fails to see by reason of the unruliness of the steeds. The rest of the souls are also longing after the upper world and they all follow, but not being strong enough they sink into the gulf as they are carried round, plunging, treading on one another, striving to be first; and there is confusion and the extremity of effort, and many of them are lamed or have their wings broken through the ill driving of the charioteers; and all of them after a fruitless toil go away without being initiated into the mysteries of being, and are nursed with the food of opinion. The reason of their great desire to behold the plain of truth is that the food which is suited to the highest part of the soul comes out of that meadow; and the wing on which the soul soars is nourished with this. And there is a law of the goddess Retribution, that the soul which attains any vision of truth in company with the god is preserved from harm until the next period, and he who always attains is always unharmed. But when she is unable to follow, and fails to behold the vision of truth, and through some ill-hap sinks beneath the double load of forgetfulness and vice, and her feathers fall from her and she drops to earth, then the law ordains that this soul shall in the first generation pass, not into that of any other animal, but only of man; and the soul which has seen most of truth shall come to the birth as a philosopher or artist, or musician or lover; that which has seen truth in the second degree shall be a righteous king or warrior or lord; the soul which is of the third class shall be a politician or economist or trader; the fourth shall be a lover of gymnastic toils or a physician; the fifth a prophet or hierophant; to the sixth a poet or imitator will be appropriate; to the seventh the life of an artisan or husbandman; to the eighth

that of a Sophist or demagogue; to the ninth that of a tyrant: all these are states of probation, in which he who lives righteously improves, and he who lives unrighteously deteriorates his lot.

Ten thousand years must elapse before the soul can return to the place from whence she came, for she cannot grow her
249 wings in less; only the soul of a philosopher, guileless and true, or the soul of a lover, who is not without philosophy, may acquire wings in the third recurring period of a thousand years: and if they choose this life three times in succession, then they have their wings given them, and go away at the end of three thousand years. But the others receive judgment when they have completed their first life, and after the judgment they go, some of them to the houses of correction which are under the earth, and are punished; others to some place in heaven whither they are lightly borne by justice, and there they live in a manner worthy of the life which they led here when in the form of men. And at the end of the first thousand years the good souls and also the evil souls both come to cast lots and choose their second life, and they may take any that they like. And then the soul of the man may pass into the life of a beast, or from the beast again into the man. But the soul of him who has never seen the truth will not pass into the human form, for man ought to have intelligence, as they say, "secundum speciem," proceeding from many particulars of sense to one conception of reason; and this is the recollection of those things which our soul once saw when in company with God — when looking down from above on that which we now call being and upwards towards the true being. And therefore the mind of the philosopher alone has wings; and this is just, for he is always, according to the measure of his abilities, clinging in recollection to those things in which God abides, and in beholding which He is what he is. And he who employs aright these memories is ever being initiated into perfect mysteries and alone becomes truly perfect. But, as he forgets earthly interests and is rapt in the divine, the vulgar deem him mad, and rebuke him; they do not see that he is inspired.

Thus far I have been speaking of the fourth and last kind of madness, which is imputed to him who, when he sees the beauty of earth, is transported with the recollection of the true beauty; he would like to fly away, but he cannot; he is like a bird fluttering and looking upward and careless of the world

below; and he is therefore esteemed mad. And I have shown that this is of all inspirations the noblest and best, and comes of the best, and that he who has part or lot in this madness is called a lover of the beautiful. For, as has been already said, every soul of man has in the way of nature beheld true being; this was the condition of her passing into the form of man. But all men do not easily recall the things of the other world; they may have seen them for a short time only, or they may have been unfortunate when they fell to earth, and may have lost the memory of the holy things which they saw there, through some evil and corrupting association. Few there are who retain the remembrance of them sufficiently; and they, when they behold any image of that other world, are rapt in amazement; but they are ignorant of what this means, because they have no clear perceptions. For there is no light in the earthly copies of justice or temperance or any of the higher qualities which are precious to souls: they are seen but through a glass dimly; and there are few who, going to the images, behold in them the realities, and they only with difficulty. They might have seen beauty shining in brightness, when, with the happy band following in the train of Zeus, as we philosophers did, or with other gods as others did, they saw a vision and were initiated into most blessed mysteries, which we celebrated in our state of innocence; and having no feeling of evils as yet to come; beholding apparitions innocent and simple and calm and happy as in a mystery; shining in pure light, pure ourselves and not yet enshrined in that living tomb which we carry about, now that we are imprisoned in the body, as in an oyster-shell. Let me linger thus long over the memory of scenes which have passed away. 250

But of beauty, I repeat again that we saw her there shining in company with the celestial forms; and coming to earth we find her here too, shining in clearness through the clearest aperture of sense. For sight is the keenest of our bodily senses; though not by that is wisdom seen, for her loveliness would have been transporting if there had been a visible image of her, and this is true of the loveliness of the other ideas as well. But beauty only has this portion, that she is at once the loveliest and also the most apparent. Now he who has not been lately initiated, or who has become corrupted, is not easily carried out of this world to the sight of absolute beauty in the other; he looks only at that which has the name of beauty in

this world, and instead of being awed at the sight of her, like a
251 brutish beast he rushes on to enjoy and beget; he takes wantonness to his bosom, and is not afraid or ashamed of pursuing pleasure in violation of nature. But he whose initiation is recent, and who has been the spectator of many glories in the other world, is amazed when he sees any one having a godlike face or form, which is the expression or imitation of divine beauty; and at first a shudder runs through him, and some "misgiving" of a former world steals over him; then looking upon the face of his beloved as of a god he reverences him, and if he were not afraid of being thought a downright madman, he would sacrifice to his beloved as to the image of a god; then as he gazes on him there is a sort of reaction, and the shudder naturally passes into an unusual heat and perspiration; for, as he receives the effluence of beauty through the eyes, the wing moistens and he warms. And as he warms, the parts out of which the wing grew, and which had been hitherto closed and rigid, and had prevented the wing from shooting forth, are melted, and as nourishment streams upon him, the lower end of the wing begins to swell and grow from the root upwards, extending under the whole soul — for once the whole was winged. Now during this process the whole soul is in a state of effervescence and irritation, like the state of irritation and pain in the gums at the time of cutting teeth; in like manner the soul when beginning to grow wings has inflammation and pains and ticklings, and when looking at the beauty of youth she receives the sensible warm traction of particles which flow towards her, therefore called attraction (ἵμερος), and is refreshed and warmed by them, and then she ceases from her pain with joy. But when she is separated and her moisture fails, then the orifices of the passages out of which the wing shoots dry up and close, and intercept the germ of the wing; which, being shut up within in company with desire, throbbing as with the pulsations of an artery, pricks the aperture which is nearest, until at length the entire soul is pierced and maddened and pained, and at the recollection of beauty is again delighted. And from both of them together the soul is oppressed at the strangeness of her condition, and is in a great strait and excitement, and in her madness can neither sleep by night nor abide in her place by day. And wherever she thinks that she will behold the beautiful one, thither in her desire she runs. And when she has seen him, and drunk rivers of desire,

her constraint is loosened, and she is refreshed, and has no more pangs and pains; and this is the sweetest of all pleasures at the time, and is the reason why the soul of the lover never forsakes his beautiful one, whom he esteems above 252
all; he has forgotten his mother and brethren and companions, and he thinks nothing of the neglect and loss of his property; and as to the rules and proprieties of life, on which he formerly prided himself, he now despises them, and is ready to sleep and serve, wherever he is allowed, as near as he can to his beautiful one, who is not only the object of his worship, but the only physician who can heal him in his extreme agony. And this state, my dear imaginary youth, is by men called love, and among the gods has a name which you, in your simplicity, may be inclined to mock; there are two lines in honor of love in the Homeric Apocrypha in which the name occurs. One of them is rather outrageous, and is not quite metrical; they are as follow: —

> "Mortals call him Eros (love),
> But the immortals call him Pteros (fluttering dove),
> Because fluttering of wings is a necessity to him."

You may believe this or not as you like. At any rate the loves of lovers and their causes are such as I have described.

Now the lover who is the attendant of Zeus is better able to bear the winged god, and can endure a heavier burden; but the attendants and companions of Ares, when under the influence of love, if they fancy that they have been at all wronged, are ready to kill and put an end to themselves and their beloved. And in like manner he who follows in the train of any other god honors him, and imitates him as far as he is able while the impression lasts; and this is his way of life and the manner of his behavior to his beloved and to every other in the first period of his earthly existence. Every one chooses the object of his affections according to his character, and this he makes his god, and fashions and adorns as a sort of image which he is to fall down and worship. The followers of Zeus desire that their beloved should have a soul like him; and, therefore, they seek some philosophical and imperial nature, and when they have found him and loved him, they do all they can to create such a nature in him, and if they have no experience hitherto, they learn of any one who can teach them, and themselves follow in the same way. And they have the less 253
difficulty in finding the nature of their own god in them-

selves, because they have been compelled to gaze intensely on him; their recollection clings to him, and they become possessed by him, and receive his character and ways, as far as man can participate in God. These they attribute to the beloved, and they love him all the more, and if they draw inspiration from Zeus, like the Bacchic Nymphs, they pour this out upon him in order to make him as like their god as possible. But those who are the followers of Hera seek a royal love, and when they have found him they do the same with him; and in like manner the followers of Apollo, and of every other god walking in the ways of their god, seek a love who is to be like their god, and when they have found him, they themselves imitate their god, and persuade their love to do the same, and bring him into harmony with the form and ways of the god as far as they can; for they have no feelings of envy or mean enmity towards their beloved, but they do their utmost to create in him the greatest likeness of themselves and the god whom they honor. And the desire of the lover, if effected, and the initiation of which I speak into the mysteries of true love, is thus fair and blissful to the beloved when he is chosen by the lover who is driven mad by love. Now the beloved or chosen one is taken captive in the following manner:—

As I said at the beginning of this tale, I divided each soul into three parts, two of them having the forms of horses and the third that of a charioteer; and one of the horses was good and the other bad, but I have not yet explained the virtue and vice of either, and to that I will now proceed. The well-conditioned horse is erect and well-formed; he has a lofty neck and an aquiline nose, and his color is white, and he has dark eyes and is a lover of honor and modesty and temperance, and the follower of true glory; he needs not the touch of the whip but is guided by word and admonition only. Whereas the other is a large misshapen animal, put together anyhow; he has a strong short neck; he is flat-faced and of a dark color, gray-eyed and bloodshot, the mate of insolence and pride, shag-eared, deaf, hardly yielding to blow or spur. Now when the charioteer beholds the vision of love, and has his whole soul warmed
254 with sense, and is full of tickling and desire, the obedient steed then as always under the government of shame, refrains himself from leaping on the beloved; but the other, instead of heeding the blows of the whip, prances away and gives all manner of trouble to his companion and to the charioteer,

and urges them on towards the beloved and reminds them of the joys of love. They at first indignantly oppose him and will not be urged on to do terrible and unlawful deeds; but at last, when there is no end of evil, they yield and suffer themselves to be led on to do as he bids them. And now they are at the spot and behold the flashing beauty of the beloved. But when the charioteer sees that, his memory is carried to the true beauty, and he beholds her in company with Modesty set in her holy place. And when he sees her he is afraid and falls back in adoration, and in falling is compelled to pull back the reins, which he does with such force as to bring both the steeds on their haunches, the one willing and unresisting, the unruly one very unwilling; and when they have gone back a little, the one is overflowing with shame and wonder, and pours forth rivers of perspiration over the entire soul; the other, when the pain is over which the bridle and the fall had given him, having with difficulty taken breath, is full of wrath and reproaches, which he heaps upon the charioteer and his fellow-steed, as though from want of courage and manhood they had been false to their agreement and guilty of desertion. And, when they again decline, he forces them on, and will scarce yield to their request that he would wait until another time. Returning at the appointed hour, they make as if they had forgotten, and he reminds them, fighting and neighing and dragging them, until at length he on the same thoughts intent, forces them to draw near. And when they are near he stoops his head and puts up his tail, and takes the bit in his mouth and pulls shamelessly. Then the charioteer is worse off than ever; he drops at the very start, and with still greater violence draws the bit out of the teeth of the wild steed and covers his abusive tongue and jaws with blood, and forces his legs and haunches to the ground and punishes him sorely. And when this has happened several times and the villain has ceased from his wanton way, he is tamed and humbled, and follows the will of the charioteer, and when he sees the beautiful one he is ready to die of fear. And from that time forward the soul of the lover follows the beloved in modesty and holy fear.

And so the beloved who, like a god, has received every true and loyal service from his lover, not in pretense but in 255
reality, being also himself of a nature friendly to his admirer, if in former days he has blushed to own his passion and turned away his lover, because his youthful companions or others slanderously

told him that he would be disgraced, now as years advance, at the appointed age and time is led to receive him into communion. For fate, which has ordained that there shall be no friendship among the evil, has also ordained that there shall ever be friendship among the good. And when he has received him into communion and intimacy, then the beloved is amazed at the good-will of the lover; he recognizes that the inspired friend is worth all other friendship or kinships, which have nothing of friendship in them in comparison. And as he continues to feel this and approaches and embraces him, in gymnastic exercises and at other times of meeting, then does the fountain of that stream, which Zeus when he was in love with Ganymede called desire, overflow upon the lover, and some enters into his soul, and some when he is filled flows out again, and as a breeze or an echo leaps from the smooth rocks and rebounds to them again, so does the stream of beauty, passing the eyes which are the natural doors and windows of the soul, return again to the beautiful one; there arriving and fluttering the passages of the wings, and watering them and inclining them to grow, and filling the soul of the beloved also with love. And thus he loves, but he knows not what; he does not understand and cannot explain his own state; he appears to have caught the infection of another's eye; the lover is his mirror in whom he is beholding himself, but he is not aware of this. When he is with the lover, both cease from their pain, but when he is away then he longs as he is longed for, and has love's image, love for love (Anteros) lodging in his breast, which he calls and deems not love but friendship only, and his desire is as the desire of the other, but weaker; he wants to see him, touch him, kiss, embrace him, and not long afterwards his desire is accomplished. Now, when they meet, the wanton steed of the lover has a word to say to the charioteer; he would like to have a little pleasure as a return for many pains, but the wanton
256 steed of the beloved says not a word, for he is bursting with passion which he understands not, but he throws his arms round the lover and embraces him as his dearest friend; and, when they are side by side, he is not in a state in which he can refuse the lover anything, if he ask him, while his fellow-steed and the charioteer oppose him with shame and reason. After this their happiness depends upon their self-control; if the better elements of the mind which lead to order and philosophy prevail, then they pass their life in this world in happiness and

harmony — masters of themselves and orderly — enslaving the vicious and emancipating the virtuous elements; and when the end comes, being light and ready to fly away, they conquer in one of the three heavenly or truly Olympian victories; nor can human discipline or divine inspiration confer any greater blessing on man than this. If, on the other hand, they leave philosophy and lead the lower life of ambition, then, probably in the dark or in some other careless hour, the two wanton animals take the two souls when off their guard and bring them together, and they accomplish that desire of their hearts which to the many is bliss; and this having once enjoyed they continue to enjoy, yet rarely because they have not the approval of the whole soul. They too are dear, but not so dear to one another as the others, either at the time of their love or afterwards. They consider that they have given and taken from each other the most sacred pledges, and they may not break them and fall into enmity. At last they pass out of the body, unwinged, but eager to soar, and thus obtain no mean reward of love and madness. For those who have once begun the heavenward pilgrimage may not go down again to darkness and the journey beneath the earth, but they live in light always; happy companions in their pilgrimage, and when the time comes at which they receive their wings they have the same plumage because of their love.

Thus great are the heavenly blessings which the friendship of a lover will confer on you, my youth. Whereas the attachment of the non-lover which is just a vulgar compound of temperance and niggardly earthly ways and motives, will breed meanness — praised by the vulgar as virtue in your inmost soul; will send you bowling round the earth during a period of nine thousand years, and leave you a fool in the world below. 257

And thus, dear Eros, I have made and paid my recantation, as well as I could and as fairly as I could; the poetical figures I was compelled to use, because Phaedrus would have them. And now forgive the past and accept the present, and be gracious and merciful to me, and do not deprive me of sight or take from me the art of love, but grant that I may be yet more esteemed in the eyes of the fair. And if Phaedrus or I myself said anything objectionable in our first speeches, blame Lysias, who is the father of the brat, and let us have no more of his progeny; bid him study philosophy, like his brother Polemarchus; and then his lover Phaedrus will no longer halt be-

tween two, but dedicate himself wholly to ove and philosoph ical discourses.

Phaedr. I say with you, Socrates, may this come true if this be for my good. But why did you make this discourse of yours so much finer than the other? I wonder at that. And I begin to be afraid that I shall lose conceit of Lysias, even if he be willing to make another as long as yours, which I doubt. For one of our politicians lately took to abusing him on this very account; he would insist on calling him a speech-writer. So that a feeling of pride may probably induce him to give up writing.

Soc. That is an amusing notion; but I think that you are a little mistaken in your friend if you imagine that he is frightened at every noise; and, possibly, you think that his assailant was in earnest?

Phaedr. I thought, Socrates, that he was. And you are aware that the most powerful and considerable men among our statesmen are ashamed of writing speeches and leaving them in a written form because they are afraid of posterity, and do not like to be called Sophists.

Soc. I don't know whether you are aware, Phaedrus, that the "sweet elbow" [1] of which the proverb speaks is really derived from the long and difficult arm of the Nile. And you appear to be equally unaware of the fact that this sweet elbow of theirs is also a long arm. For there is nothing of which great politicians are so fond as of writing speeches, which they bequeath to posterity. And when they write them, out of gratitude to their admirers, they append their names at the top.

258 *Phaedr.* What do you mean? I don't understand.

Soc. Why don't you know that when a politician writes, he begins with the names of his approvers?

Phaedr. How is that?

Soc. Why, he begins thus: "Be it enacted by the senate, the people, or both, as a certain person who was the author proposed;" and then he rehearses all his titles, and proceeds to display his own wisdom to his admirers with a great flourish in what is often a long and tedious composition. Now what is that sort of thing but a regular piece of authorship?

Phaedr. True.

Soc. And if the law is passed, then, like the poet, he leaves

[1] A proverb, like "The grapes are sour," applied to pleasures which cannot be had, meaning sweet things which are out of the reach of the mouth.

the theatre in high delight; but if the law is rejected and he is done out of his speech-making, and not thought good enough to write, then he and his party are in mourning.

Phaedr. Very true.

Soc. This shows how far they are from despising, or rather how highly they value the practice of writing.

Phaedr. No doubt.

Soc. And when the king or orator has the power, as Lycurgus or Solon or Darius had, of attaining an immortality of authorship in a state, is he not thought by posterity, when they see his writings, and does he not think himself, while he is yet alive, to be like a god?

Phaedr. That is true.

Soc. Then do you think that any one of this class who may be ill-disposed to Lysias would ever make it a reproach against him that he is an author?

Phaedr. Not upon your view; for according to you he would be reproaching him with his own favorite pursuit.

Soc. Any one may see that there is no disgrace in the fact of writing?

Phaedr. Certainly not.

Soc. There may however be a disgrace in writing, not well, but badly?

Phaedr. That is true.

Soc. And what is well and what is badly, — need we ask Lysias, or any other poet or orator, who ever wrote or will write either a political or any other work, in metre or out of metre, poet or prose writer, to teach us this?

Phaedr. Need we? What motive has a man to live if not for the pleasures of discourse? Surely he would not live for the sake of bodily pleasures, which almost always have previous pain as a condition of them, and therefore are rightly called slavish.

Soc. There is time yet. And I can fancy that the 259
grasshoppers who are still chirruping in the sun over our heads are talking to one another and looking at us. What would they say if they saw that we also, like the many, are not talking but slumbering at midday, lulled by their voices, too indolent to think? They would have a right to laugh at us, and might imagine that we are slaves coming to our place of resort, who like sheep lie asleep at noon about the fountain. But if they see us discoursing, and like Odysseus sailing by

their siren voices, they may perhaps, out of respect, give us of the gifts which they receive of the gods and give to men.

Phaedr. What gifts do you mean? I never heard of any.

Soc. A lover of music like yourself ought surely to have heard the story of the grasshoppers, who are said to have been human beings in an age before the Muses. And when the Muses came and song appeared they were ravished with delight; and singing always, never thought of eating and drinking, until at last they forgot and died. And now they live again in the grasshoppers; and this is the return which the Muses make to them, — they hunger no more, neither thirst any more, but are always singing from the moment that they are born, and never eating or drinking; and when they die they go and inform the Muses in heaven who honors them on earth. They win the love of Terpsichore for the dancers by their report of them; of Erato for the lovers, and of the other Muses for those who do them honor, according to the several ways of honoring them: of Calliope the eldest Muse, and of her who is next to her for the votaries of philosophy; for these are the Muses who are chiefly concerned with heaven and the ideas, divine as well as human, and they have the sweetest utterance. For many reasons, then, we ought always to talk and not to sleep at midday.

Phaedr. Let us talk.

Soc. Shall we discuss the rules of writing and speech as we were proposing?

Phaedr. Very good.

Soc. Is not the first rule of good speaking that the mind of the speaker should know the truth of what he is going to say?

260 *Phaedr.* And yet, Socrates, I have heard that he who would be an orator has nothing to do with true justice, but only with that which is likely to be approved by the many who sit in judgment; nor with the truly good or honorable, but only with public opinion about them, and that from this source and not from the truth come the elements of persuasion.

Soc. Any words of the wise ought to be regarded and not trampled under foot, for there is probably something in them, and perhaps there may be something in this which is worthy of attention.

Phaedr. Very true.

Soc. Let us put the matter thus: Suppose that I persuaded you to buy a horse and go to the wars. Neither of us

knew what a horse was like, but I knew that you believed a horse to be the longest-eared of domestic animals.

Phaedr. That would be ridiculous.

Soc. There is something more ridiculous coming. Suppose, now, that I was in earnest and went and composed a speech in honor of an ass, whom I entitled a horse, beginning: "A noble animal and a most useful possession, especially in war, and you may get on his back and fight, and he will carry baggage or anything."

Phaedr. That would be most ridiculous.

Soc. Ridiculous! Yes; but is not even a ridiculous friend better than a dangerous enemy?

Phaedr. Certainly.

Soc. And when the orator instead of putting an ass in the place of a horse, puts good for evil, being himself as ignorant of their true nature as the city on which he imposes is ignorant; and having studied the notions of the multitude, persuades them to do evil instead of good, — what will be the harvest which rhetoric will be likely to gather after the sowing of that fruit?

Phaedr. Anything but good.

Soc. Perhaps, however, Rhetoric has been getting too roughly handled by us, and she might answer: What amazing nonsense is this! As if I forced any man to learn to speak in ignorance of the truth! Whatever my advice may be worth, I should have told him to arrive at the truth first, and then come to me. At the same time I boldly assert that mere knowledge of the truth will not give you the art of persuasion.

Phaedr. There is reason in the lady's defense of herself.

Soc. Yes, I admit that, if the arguments which she has yet in store bear witness that she is an art at all. But I seem to hear them arraying themselves on the opposite side, declaring that she speaks not true, and that Rhetoric is not an art but only a dilettante amusement. Lo! a Spartan appears, and says that there never is nor ever will be a real art of speaking which is unconnected with the truth.

Phaedr. And what are these arguments, Socrates? 261
Bring them out that we may examine them.

Soc. Come out, children of my soul, and convince Phaedrus, who is the father of similar beauties, that he will never be able to speak about anything unless he be trained in philosophy. And let Phaedrus answer you.

Phaedr. Put the question.

Soc. Is not rhetoric, taken generally, a universal art of enchanting the mind by arguments; which is practiced not only in courts and public assemblies, but in private houses also, having to do with all matters, great as well as small, good and bad alike, and is in all equally right, and equally to be esteemed — that is what you have heard?

Phaedr. Nay, not exactly that; but I should rather say that I have heard the art confined to speaking and writing in law-suits, and to speaking in public assemblies — not extended farther.

Soc. Then I suppose that you have only heard of the rhetoric of Nestor and Odysseus, which they composed in their leisure hours when at Troy, and never of Palamedes?

Phaedr. No more than of Nestor and Odysseus, unless Gorgias is your Nestor, and Thrasymachus and Theodorus your Odysseus.

Soc. Perhaps that is my meaning. But let us leave them. And do you tell me, instead, what are plaintiff and defendant doing in a law-court — are they not contending?

Phaedr. Exactly.

Soc. About the just and the unjust — that is the matter in dispute?

Phaedr. Yes.

Soc. And he who is practiced in the art will make the same thing appear to the same persons to be at one time just and at another time unjust, if he has a mind?

Phaedr. Exactly.

Soc. And when he speaks in the assembly, he will make the same things seem good to the city at one time, and at another time the reverse of good?

Phaedr. That is true.

Soc. Have we not heard of the Eleatic Palamedes (Zeno), who has an art of speaking which makes the same things appear to his hearers like and unlike, one and many, at rest and in motion too?

Phaedr. Very true.

Soc. The art of disputation, then, is not confined to the courts and the assembly, but is one and the same in every use of language; this is that art, if such an art there be, which finds a likeness of everything to which a likeness can be found, and draws into the light of day the likenesses and disguises which are used by others?

Phaedr. How do you mean?

Soc. Let me put the matter thus: When will there be more chance of deception — when the difference is large or small?

Phaedr. When the difference is small.

Soc. And you will be less likely to be discovered in passing by degrees into the other extreme than when you go all at once? 262

Phaedr. Of course.

Soc. He, then, who would deceive others, and not be deceived, must exactly know the real likenesses and differences of things?

Phaedr. Yes, he must.

Soc. And if he is ignorant of the true nature of anything, how can he ever distinguish the greater or less degree of likeness to other things of that which he does not know?

Phaedr. He cannot.

Soc. And when men are deceived, and their notions are at variance with realities, it is clear that the error slips in through some resemblances?

Phaedr. Yes, that is the way.

Soc. Then he who would be a master of the art must know the real nature of everything; or he will never know either how to contrive or how to escape the gradual departure from truth into the opposite of truth which is effected by the help of resemblances?

Phaedr. He will not.

Soc. He then, who being ignorant of the truth catches at appearances, will only attain an art of rhetoric which is ridiculous and is not an art at all?

Phaedr. That may be expected.

Soc. Shall I propose that we look for examples of good and bad art, according to our notion of them, in the speech of Lysias which you have in your hand, and in my own speech?

Phaedr. Nothing could be better; and indeed I think that our previous argument has been too barren of illustrations.

Soc. Yes; and the two speeches afford a good illustration of the way in which the speaker who knows the truth may playfully draw away the hearts of his hearers. This piece of good fortune I attribute to the local deities; and, perhaps, the prophets of the Muses who are singing over our heads may have imparted their inspiration to me. For I do not imagine that I have any rhetorical art myself.

Phaedr. I will not dispute that; only please to go forward.

Soc. Suppose that you read me the first words of Lysias speech?

Phaedr. "You know my views of our common interest, and I do not think that I ought to fail in the object of my suit because I am not your lover. For lovers repent when" —

263 *Soc.* Enough. Now, shall I point out the rhetorical error of those words?

Phaedr. Yes.

Soc. Every one is aware that about some things we are agreed, whereas about other things we differ.

Phaedr. I think that I understand you; but will you explain yourself?

Soc. When any one speaks of iron and silver, is not the same thing present in the minds of all?

Phaedr. Certainly.

Soc. But when any one speaks of justice and goodness, there is every sort of disagreement, and we are at odds with one an other and with ourselves?

Phaedr. Precisely.

Soc. Then in some things we agree, but not in others?

Phaedr. That is true.

Soc. In which are we more likely to be deceived, and in which has rhetoric the greater power?

Phaedr. Clearly, in the class which admits of error.

Soc. Then the rhetorician ought to make a regular division, and acquire a distinct notion of both classes, as well of that in which the many err, as of that in which they do not err?

Phaedr. He who made such a distinction would have an excellent principle.

Soc. Yes; and in the next place he must have a keen eye for the observation of particulars in speaking, and not make a mistake about the class to which they are to be referred.

Phaedr. Certainly.

Soc. Now to which class does love belong — to the debatable or to the undisputed class?

Phaedr. To the debatable class surely; for if not, do you think that any one would have allowed you to say as you did, that love is an evil both to the lover and the beloved, and also the greatest possible good?

Soc. Capital. But will you tell me whether I defined love at the beginning of my speech? for, having been in an ecstasy, I cannot well remember.

Phaedr. Yes, indeed; that you did, and no mistake.

Soc. Then I perceive that the Nymphs of Achelous and Pan the son of Hermes, who inspired me, were far better rhetoricians than Lysias the son of Cephalus. Alas! how inferior to them he is! But perhaps I am mistaken; and Lysias at the commencement of his lover's speech did insist on our supposing Love to be something or other which he fancied him to be, and that in relation to this something he fashioned and framed the remainder of his discourse. Suppose we read him over again.

Phaedr. If you please; but you will not find what you want.

Soc. Read, that I may have his exact words.

Phaedr. "You know my views of our common interest; and I do not think that I ought to fail in the object of my suit because I am not your lover, for lovers repent of the kindnesses which they have shown, when their love is over." 264

Soc. Here he appears to have done just the reverse of what he ought; for he has begun at the end, and is swimming on his back through the flood of words to the place of starting. His address to the fair youth commences with reference to the conclusion of his love. Am I not right, sweet Phaedrus?

Phaedr. Yes, indeed, Socrates; he does begin at the end.

Soc. Then as to the other topics, — are they not a mass of confusion? Is there any principle in them? Why should the next topic or any other topic follow in that order? I cannot help fancying in my ignorance that he wrote freely off just what came into his head, but I dare say that you would recognize a rhetorical necessity in the succession of the several parts of the composition?

Phaedr. You have too good an opinion of me if you think that I have any such insight into his principles of composition.

Soc. At any rate, you will allow that every discourse ought to be a living creature, having its own body and head and feet; there ought to be a middle, beginning, and end, which are in a manner agreeable to one another and to the whole?

Phaedr. Certainly.

Soc. Can this be said of the discourse of Lysias? See whether you can find any more connection in his words than in the epitaph, which is said by some to have been inscribed on the grave of Midas the Phrygian.

Phaedr. What is there remarkable in the epitaph?

Soc. The epitaph is as follows: —

"I am a maiden of brass;
I lie on the tomb of Midas,
While waters flow and tall trees grow,
Here am I.
On Midas' tearful tomb I lie;
I am to tell the passers by
That Midas sleeps in earth below."

Now in this rhyme whether a line comes first or comes last, that, as you will perceive, makes no difference.

Phaedr. You are making fun of that oration of ours.

Soc. Well, I will say no more about your friend lest I should give offense to you; although I think that he might furnish many other examples of what a man ought to avoid. But I will proceed to the other speech, which, as I think, is also suggestive to students of rhetoric.

Phaedr. In what way?

Soc. The two speeches, as you may remember, were of an opposite character, the one argued that the lover and the other that the non-lover ought to be accepted.

Phaedr. And right manfully.

Soc. You should rather say "madly;" and that was the argument of them, for, as I said, "love is a madness."

Phaedr. Yes.

Soc. And there were two kinds of madness; one produced by human infirmity, the other by a divine release from the ordinary ways of men.

Phaedr. True.

Soc. The divine madness was subdivided into four kinds, prophetic, initiatory, poetic, erotic, having four gods presiding over them; the first was the inspiration of Apollo, the second that of Dionysus, the third that of the Muses, the fourth that of Aphrodite and Eros. In the description of the last kind of madness, which was also the best, being a sort of figure of love, we mingled a tolerably credible and possibly true, though partly erring myth, which was also a hymn in honor of Eros, who is your lord and also mine, Phaedrus, and the guardian of fair children, and to him we sung the hymn in measured and solemn form.

Phaedr. I know that I had great pleasure in listening to the tale.

Soc. Let us take this instance and examine how the transition was made from blame to praise.

Phaedr. What do you mean?

Soc. I mean to say that the composition was mostly playful. Yet in these chance fancies of the hour were involved two principles which would be charming if they could be fixed by art.

Phaedr. What are they?

Soc. First, the comprehension of scattered particulars in one idea: the speaker defines his several notions in order that he may make his meaning clear, as in our definition of love, which whether true or false certainly gave clearness and consistency to the discourse.

Phaedr. What is the other principle, Socrates?

Soc. Secondly, there is the faculty of division according to the natural ideas or members, not breaking any part as a bad carver might. But, as the body may be divided into a left side and into a right side, having parts right and left, so in the two discourses there was assumed, first of all, the general idea of unreason, and then one of the two proceeded to divide the parts of the left side and did not desist until he found in them an evil or left-handed love which the speaker justly reviled; and the other leading us to the right portion in which madness lay, found another love, having the same name, but yet divine, which he held up before us and applauded as the author of the greatest benefits. 266

Phaedr. That is most true.

Soc. I am a great lover of these processes of division and generalization; they help me to speak and think. And if I find any man who is able to see unity and plurality in nature, him I follow, and walk in his steps as if he were a god. And those who have this art, I have hitherto been in the habit of calling dialecticians; but God knows whether the name is right or not. And I should like to know what name you would give to your or Lysias' disciples, and whether this may not be that famous art of rhetoric which Thrasymachus and others practice? Skillful speakers they are, and impart their skill to any who will consent to worship them as kings and to bring them gifts.

Phaedr. Yes, they are royal men; but their art is not the same with the art of those whom you call, and rightly, in my opinion, dialecticians. Still we are in the dark about rhetoric.

Soc. What do you mean? The remains of the art, when all this has been taken away, must be of rare value; and are not at all to be despised by you and me. But what are the remains? — tell me that.

Phaedr. There is a great deal surely to be found in books of rhetoric?

Soc. Yes, thank you for reminding me of that; there is the prooemium, if I remember rightly — that is what you mean — the niceties of the art?

Phaedr. Yes.

Soc. There follows the statement of facts, and upon that witnesses; thirdly, proofs; fourthly, probabilities are to come; the great Byzantian artist also speaks, if I am not mistaken, of confirmation and superconfirmation.

Phaedr. You mean the excellent Theodorus.

267 *Soc.* Yes; and he tells how refutation or further refutation is to be managed, whether in accusation or defense. I need hardly mention the Parian Evenus, who first invented indirect allusions and incidental praises, and also censures, of which this wise man made a *memoria technica* in verse. But shall

"I to dumb forgetfulness consign"

Tisias and Gorgias, who are not ignorant that probability is superior to truth, and who by force of argument make the little appear great and the great little, and the new old and the old new, and have discovered universal forms, either short or going on to infinity. I remember Prodicus laughing when I told him of this; he said that he had himself discovered the true rule of art, which was to be neither long nor short, but of a convenient length.

Phaedr. Well done, Prodicus.

Soc. Then there is Hippias of Elis, who probably agrees with him.

Phaedr. Yes.

Soc. And there is also Polus, who has schools of diplasiology, and gnomology, and eikonology, and who teaches in them the words of which Licymnius made him a present; they were to give a polish.

Phaedr. Had not Protagoras something of the same sort?

Soc. Yes, rules of correctness and many other fine precepts; for the "sorrows of a poor old man," or any other pathetic case, no one is better than the Chalcedonian giant; he can put a whole company of people into a passion and out of one again by his mighty magic, and is first-rate at inventing or disposing of any sort of calumny on any grounds or none. All of them agree in asserting that a speech should end in a recapitulation, though they do not all agree in the use of this word.

Phaedr. You mean that there should be a summing up of the arguments in order to remind the hearers of them.

Soc. I have now said all that I have to say of the art of rhetoric: have you anything to add?

Phaedr. Not much, nor very important.

Soc. Leave the unimportant and let us bring the really important question into the light of day, which is: What power this art of rhetoric has, and when? 268

Phaedr. A very great power in public meetings.

Soc. Yes, that is true. But I should like to know whether you have the same feeling as I have about the rhetoricians? To me there seem to be a great many holes in their web.

Phaedr. Give an example.

Soc. I will. Suppose a person to come to your friend Eryximachus, or to his father Acumenus, and to say to him: "I know how to apply drugs which shall have either a heating or a cooling effect, and I can give a vomit and also a purge, and all that sort of thing; and knowing all this, as I do, I claim to be a physician and a teacher of physic" — what do you suppose that they would say?

Phaedr. They would be sure to ask him whether he knew "to whom" he would give them, and "when," and "how much."

Soc. And suppose that he were to reply: "No; I know nothing of that; I expect those whom I have taught all this to do that of themselves."

Phaedr. They would reply that he is a madman or a pedant who fancies that he is a physician, because he has read something in a book, or has stumbled on a few drugs, although he has no real understanding of the art of medicine.

Soc. And suppose a person were to come to Sophocles or Euripides and say that he knows how to make a long speech about a small matter, and a short speech about a great matter, and also a sorrowful speech, or a terrible, or threatening speech, or any other kind of speech, and in teaching this fancies that he is teaching the art of tragedy?

Phaedr. They too would surely laugh at him if he fancies that tragedy is anything but the arranging of these elements in a manner suitable to one another and to the whole.

Soc. But I do not suppose that they would be rude to him or revile him. Would they not treat him as a musician would treat a man who thinks that he is a harmonist because he

knows how to pitch the highest and lowest note; happening to meet such a one he would not say to him savagely, "Fool, you are mad!" O, no; he would rather say to him in a gentle and musical tone of voice: "My good friend, he who would be a harmonist must certainly know this, and yet he may understand nothing of harmony if he has not got beyond your stage of knowledge, for you only know the preliminaries of harmony and not harmonies."

Phaedr. Very true.

269 *Soc.* And would not Sophocles say to the display of the would-be tragedian, that this was not tragedy but the preliminaries of tragedy, and would not Acumenus say to the would-be doctor that this was not medicine but the preliminaries of medicine?

Phaedr. Very true.

Soc. And if Adrastus the mellifluous or Pericles heard of these wonderful arts, brachylogies and eikonologies and all the hard names which we have been endeavoring to draw into the light of day, what would they say? Instead of losing temper and applying uncomplimentary epithets, as you and I have been doing to the authors of such an imaginary art, their superior wisdom would rather censure us, as well as them. Have a little patience, Phaedrus and Socrates, they would say, and don't be angry with those who from some want of dialectical skill are unable to define the nature of rhetoric, and consequently suppose that they have found the art in the preliminary conditions of the art, and when they have taught these to others, fancy that they have been teaching the whole art of rhetoric; but as to persuasion in detail and unity of composition, that they regard as an easy thing with which their disciples may supply themselves.

Phaedr. I quite admit, Socrates, that the art of rhetoric which these men teach and of which they write is such as you describe — in that I agree with you. But I still want to know where and how the true art of rhetoric and persuasion is to be acquired.

Soc. The perfection of oratory is, or rather must be, like the perfection of all things, partly given by nature; but this is assisted by art, and if you have the natural power you will be famous as a rhetorician, if you only add knowledge and practice, and in either you may fall short. But the art, as far as there is an art, of rhetoric does not lie in the direction of Tisias or Thrasymachus.

Phaedr. But in what direction then?

Soc. I should conceive that Pericles was the most accomplished of rhetoricians.

Phaedr. What of that?

Soc. All the higher arts require much discussion and lofty contemplation of nature; this is the source of sublimity and perfect comprehensive power. And this, as I conceive, was 270
the quality which, in addition to his natural gifts, Pericles acquired from his happening to know Anaxagoras. He was imbued with the higher philosophy, and attained the knowledge of mind and matter, which was the favorite theme of Anaxagoras, and hence he drew what was applicable to his art.

Phaedr. Explain.

Soc. Rhetoric is like medicine.

Phaedr. How is that?

Soc. Why, because medicine has to define the nature of the body and rhetoric of the soul — if you would proceed, not empirically but scientifically, in the one case to impart health and strength by giving medicine and food, in the other to implant the conviction which you require by the right use of words and principles.

Phaedr. You are probably right in that.

Soc. And do you think that you can know the nature of the soul intelligently without knowing the nature of the whole?

Phaedr. Hippocrates the Asclepiad says that this is the only method of procedure by which the nature even of the body can be understood.

Soc. Yes, friend, and he says truly. Still, we ought not to be content with the name of Hippocrates, but to examine and see whether he has reason on his side.

Phaedr. True.

Soc. Then consider what is this which Hippocrates says, and which right reason says about this or any other nature. Ought we not to consider first whether that which we wish either to learn or to teach is simple or multiform, and if simple, then to inquire what power this has of acting or being acted upon by other, and if multiform, then to number the forms; and see first in the case of one of them, and then in the case of all of them, the several powers which they by nature have of doing or suffering.

Phaedr. That will be the way.

Soc. The method which has not this analysis is like the groping of a blind man. Yet, surely, he who is an artist ought not

to admit of a comparison with the blind, or deaf; but he who imparts rules of speech in an artist-like or scientific manner will particularly set forth the nature of that to which he gives his rules, which I suppose is the soul.

Phaedr. Certainly.

271 *Soc.* His whole effort is directed towards this, for in this he seeks to produce conviction.

Phaedr. Yes.

Soc. Then clearly, Thrasymachus or any one else who elaborates a system of rhetoric will give an exact description of the soul; which he will make to appear either as single and same, or, like the body, multiform. That is what we should call showing the nature of the soul.

Phaedr. Exactly.

Soc. He will next proceed to speak of the instruments by which the soul acts or is affected in any way.

Phaedr. True.

Soc. Thirdly, having arranged men and speeches, and their modes and affections in different classes, and fitted them into one another he will point out the connection between them — he will show why one is naturally persuaded by a particular form of argument, and another not.

Phaedr. That will certainly be a very good way.

Soc. Yes, that is the true and only way in which any subject can be set forth or treated by rules of art, whether in speaking or writing. But the writers of the present day, at whose feet you have sat, improperly conceal all this about the soul which they know quite well. Nor, until they adopt our method of reading and writing, can we admit that they write by rules of art.

Phaedr. What is our method?

Soc. I cannot give you the exact details; but I should like to tell you generally, as far as I can, how a man ought to proceed according to the rules of art.

Phaedr. Let me hear.

Soc. Oratory is the art of enchanting the soul, and therefore he who would be an orator has to learn the differences of human souls — they are so many and of such a nature, and from them come the differences between man and man — he will then proceed to divide speeches into their different classes. Such and such persons, he will say, are affected by this or that kind of speech in this or that way, and he will tell you why; he

must have a theoretical notion of them first, and then he must see them in action, and be able to follow them with all his senses about him, or he will never get beyond the precepts of his masters. But when he is able to say what persons are persuaded by what arguments, and recognize the individual about whom he used to theorize as actually present to him, and say to himself, "This is he and this is the sort of man who ought to have that argument applied to him in order to convince him of this;" when he has attained the knowledge of all this, and knows also when he should speak and when he should abstain from speaking, and when he should make use of pithy sayings, pathetic appeals, aggravated effects, and all the other figures of speech; when, I say, he knows the times and seasons of all these things, then, and not till then, he is perfect and a consummate master of his art; but if he fail in any of these points, whether in speaking or teaching or writing them, and says that he speaks by rules of art, he who denies this has the better of him. Well, the teacher will say, is this, Phaedrus and Socrates, your account of the art of rhetoric, or am I to look for another? 272

Phaedr. He must take this, Socrates, for there is no possibility of another, and yet the creation of such an art is not easy.

Soc. That is true; and therefore let us turn the matter up and down, and see whether there may not be a shorter and easier road; there is no use in taking the longer and more difficult way when there is a shorter and easier one. And I wish that you would try and remember whether there is anything which you have heard from Lysias or any one else which might be of service to us.

Phaedr. If trying would avail, then I might; but I fear that I cannot remember anything at the moment.

Soc. Suppose I tell you something which somebody who knows told me.

Phaedr. Certainly.

Soc. May not the wolf, as the proverb says, claim a hearing?

Phaedr. Do you say what can be said for him.

Soc. Well, they say that there is no use in putting a solemn face on a matter, or in going round and round, until you arrive at the beginning of all things; for that when the question is of justice and good, as I said at first, or a question in which men are concerned who are just and good, either by nature or habit,

he who would be a skillful rhetorician has no need of truth — for that in courts of law men literally care nothing about truth, but only about conviction: and this is based on probability, to which he who would be a skillful orator should therefore give his whole attention. And they say also that there are cases in which the actual facts ought to be withheld, and only the probabilities should be told either in accusation or defense, and that
273 always in speaking the orator should run after probability, and say good-by to the truth. And the observance of this principle throughout a speech furnishes the whole art.

Phaedr. That is what the professors of rhetoric do actually say, Socrates, for I remember that although we have touched[1] upon this matter but slightly, the point is all-important with them.

Soc. I dare say that you are familiar with Tisias. Does he not define probability to be that which the many think?

Phaedr. Certainly he does.

Soc. I believe that he has a clever and ingenious case of this sort: He supposes a feeble and valiant man to have assaulted a strong and cowardly one, and to have robbed him of his coat or of something or other; he is brought into court, and then Tisias says that both parties should tell lies: the coward should say that he was assaulted by more men than one; the other should prove that they were alone, and should use this argument: "How could a man like me have assaulted a man like him?" The other will not like to confess his own cowardice, and will therefore invent some other lie which his adversary will thus gain an opportunity of refuting. These and others like them are the precepts of the doctors of the art. Am I not right, Phaedrus?

Phaedr. Certainly.

Soc. I cannot help feeling that this is a wonderfully mysterious art which Tisias has discovered, or whoever the gentleman was, or whatever his name or country may have been, who was the discoverer. Shall we say a word to him or not?

Phaedr. What shall we say to him?

Soc. Let us tell him that, before he appeared, you and I were saying that probability was engendered in the minds of the many by the likeness of the truth, and were setting forth that he who knew the truth would always know how best to discover the resemblances of the truth. If he has anything fur-

[1] Cp. 259 E.

ther to say about the art of speaking we should like to hear him; but if not, we are satisfied with our own view, that unless a man estimates the various characters of his hearers and is able to divide existences into classes and to sum them up in single ideas, he will never be a skillful rhetorician even within the limits of human power. And this art he will not attain without a great deal of trouble, which a good man ought to undergo, not for the sake of speaking and acting before men, but in order that he may be able to say what is acceptable to God and in all things to act acceptably to him as far as in him lies; for there is a saying of wiser men than ourselves, 274
that a man of sense should not try to please his fellow-servants (at least this should not be his principal object) but his good and noble masters, so that, if the way is long and circuitous, marvel not at this; for, where the end is great, there the way may be permitted to be long, but not for lesser ends such as yours. Truly, the argument may say, Tisias, that if you do not mind going so far, rhetoric has a fair beginning in this.

Phaedr. I think, Socrates, that this is admirable, if only practicable.

Soc. But even to fail in an honorable object is honorable.

Phaedr. True.

Soc. I think that enough has been said of a true and false art of speaking.

Phaedr. Certainly.

Soc. But there is something yet to be said of propriety and impropriety of writing.

Phaedr. Yes.

Soc. Do you know how you can speak or act about rhetoric in a manner which will be acceptable to God?

Phaedr. No, indeed. Do you?

Soc. I have heard a tradition of antiquity, whether true or not antiquity only knows. If we had the truth ourselves, do you think that we should care much about the opinions of men?

Phaedr. That is a question which needs no answer; but I wish that you would tell me what you say that you have heard.

Soc. At the Egyptian city of Naucratis, there was a famous old god, whose name was Theuth; the bird which is called the Ibis was sacred to him, and he was the inventor of many arts, such as arithmetic and calculation and geometry and astronomy and draughts and dice, but his great discovery was the use of letters. Now in those days Thamus was the king of the

whole of Upper Egypt, which is the district surrounding that great city which is called by the Hellenes Egyptian Thebes, and they call the god himself Ammon. To him came Theuth and showed his inventions, desiring that the other Egyptians might be allowed to have the benefit of them; he went through them, and Thamus inquired about their several uses, and praised some of them and censured others, as he approved or disapproved of them. There would be no use in repeating all that Thamus said to Theuth in praise or blame of the various arts. But when they came to letters, This, said Theuth, will make the Egyptians wiser and give them better memories; for this is the cure of forgetfulness and of folly. Thamus replied: O most ingenious Theuth, he who has the gift of invention is not always the best judge of the utility or inutility of his own inventions to the users of them. And in this instance a paternal love
275 of your own child has led you to say what is not the fact; for this invention of yours will create forgetfulness in the learners' souls, because they will not use their memories; they will trust to the external written characters and not remember of themselves. You have found a specific, not for memory but for reminiscence, and you give your disciples only the pretense of wisdom; they will be hearers of many things and will have learned nothing; they will appear to be omniscient and will generally know nothing; they will be tiresome, having the reputation of knowledge without the reality.

Phaedr. Yes, Socrates, you can easily invent tales of Egypt, or of any other country that you like.

Soc. There was a tradition in the temple of Dodona that oaks first gave prophetic utterances. The men of that day, unlike in their simplicity to young philosophy, deemed that if they heard the truth even from "oak or rock," that was enough for them; whereas, you seem to think not of the truth but of the speaker, and of the country from which the truth comes.

Phaedr. I acknowledge the justice of your rebuke; and I think that the Theban is right in his view about letters.

Soc. He would be a simple person, and quite without understanding of the oracles Thamus and Ammon, who should leave in writing or receive in writing any art under the idea that the written word would be intelligible or certain; or who deemed that writing was at all better than knowledge and recollection of the same matters.

Phaedr. That is most true.

Soc. I cannot help feeling, Phaedrus, that writing is unfortunately like painting; for the creations of the painter have the attitude of life, and yet if you ask them a question they preserve a solemn silence. And the same may be said of speeches. You would imagine that they had intelligence, but if you want to know anything and put a question to one of them, the speaker always gives one unvarying answer. And when they have been once written down they are tossed about anywhere among those who do and among those who do not understand them. And they have no reticences or proprieties towards different classes of persons; and, if they are unjustly assailed or abused, their parent is needed to protect his offspring, for they cannot protect or defend themselves.

Phaedr. That again is most true.

Soc. May we not imagine another kind of writing or speaking far better than this is, and having far greater power, — which is one of the same family, but lawfully begotten? Let us 276 see what his origin is.

Phaedr. Who is he, and what do you mean about his origin?

Soc. I am speaking of an intelligent writing which is graven in the soul of him who has learned, and can defend itself, and knows when to speak and when to be silent.

Phaedr. You mean the word of knowledge which has a living soul, and of which the written word is properly no more than an image?

Soc. Yes, of course that is what I mean. And I wish that you would let me ask you a question: Would a husbandman, who is a man of sense, take the seeds, which he values and which he wishes to be fruitful, and in sober earnest plant them during the heat of summer, in some garden of Adonis, that he may rejoice when he sees them in eight days appearing in beauty (at least he does that, if at all, only as the show of a festival); but those about which he is in earnest he sows in fitting soil, and practices husbandry, and is satisfied if in eight months they arrive at perfection?

Phaedr. Yes, Socrates, that will be his way when he is in earnest; he will do the other, as you say, only as an amusement.

Soc. And can we suppose that he who knows the just and good and honorable has less understanding in reference to his own seeds than the husbandman?

Phaedr. Certainly not.

Soc. Then he will not seriously incline to write them in water with pen and ink, or in dumb characters which have not a word to say for themselves and cannot adequately express the truth?

Phaedr. No, that is not likely.

Soc. No, that is not likely, — in the garden of letters he will plant them only as an amusement. or he will write them down as memorials against the forgetfulness of old age, to be treasured by him and his equals when they, like him, have one foot in the grave; and he will rejoice in beholding their tender growth; and they will be his pastime while others are watering the garden of their souls with banqueting and the like.

Phaedr. A pastime, Socrates, as noble as the other is ignoble, when a man is able to pass time merrily in the representation of justice and the like.

Soc. True, Phaedrus. But nobler far is the serious pursuit of the dialectician, who finds a congenial soul, and then with knowledge engrafts and sows words which are able to help themselves and him who planted them, and are not unfruitful, but have in them seeds which may bear fruit in other natures, nurtured in other ways, — making the seed everlasting and the possessors happy to the utmost extent of human happiness. 277

Phaedr. Yes, indeed, that is far nobler.

Soc. And now, Phaedrus, having agreed upon the premises we may decide about the conclusion.

Phaedr. About what conclusion?

Soc. About Lysias, whom we censured, and his art of writing, and his discourses, and the rhetorical skill or want of skill which was shown in them; for he brought us to this point And I think that we are now pretty well informed about the nature of art and its opposite.

Phaedr. Yes, I think with you; but I wish that you would repeat what was said.

Soc. Until a man knows the truth of the several particulars of which he is writing or speaking, and is able to define them as they are, and having defined them again to divide them until they can be no longer divided, and until in like manner he is able to discern the nature of the soul and discover the different modes of discourse which are adapted to different natures, and to arrange and dispose them in such a way that the simple form of speech may be addressed to the simpler nature, and the

complex and composite to the complex nature — until he has accomplished all this, he will be unable to handle arguments according to rules of art, as far as their nature allows them to be subjected to art, either for the purpose of teaching or persuading; that is the view which is implied in the whole preceding argument.

Phaedr. Yes, that was our view, certainly.

Soc. Secondly, as to the justice of the censure which was passed on speaking or writing discourses — did not our previous argument show —

Phaedr. Show what?

Soc. That whether Lysias or any other writer that ever was or will be, whether private man or statesman, writes a political treatise in his capacity of legislator, and fancies that there is a great certainty and clearness in his performance, the fact of his writing as he does is only a disgrace to him, whatever men may say. For entire ignorance about the nature of justice and injustice, and good and evil, and the inability to distinguish the dream from the reality, cannot in truth be otherwise than disgraceful to him, even though he have the applause of the whole world.

Phaedr. Certainly.

Soc. But he who thinks that in the written word there is necessarily much which is not serious, and that neither poetry nor prose, spoken or written, are of any great value — if, like the compositions of the rhapsodes, they are only recited 278
in order to be believed, and not with any view to criticism or instruction; and who thinks that even the best of them are but a reminiscence of what we know, and that only in principles of justice and goodness and nobility taught and communicated orally and written in the soul, which is the true way of writing, is there clearness and perfection and seriousness; and that such principles are like legitimate offspring; being, in the first place, that which the man finds in his own bosom; secondly, the brethren and descendants and relations of this which has been duly implanted in the souls of others; and who cares for them and no others — this is the right sort of man; and you and I, Phaedrus, would pray that we may become like him.

Phaedr. That is most assuredly my desire and prayer.

Soc. And now the play is played out; and of rhetoric enough. Go and tell Lysias that to the fountain and school of the Nymphs we went down, and were bidden by them to convey a message

to him and to other composers of speeches — to Homer and other writers of poems, whether set to music or not. And to Solon and the writers of political documents, which they term laws, we are to say that if their compositions are based on knowledge of the truth, and they can defend or prove them, when they are put to the test, by spoken arguments, which leave their writings poor in comparison of them, then they are not only poets, orators, legislators, but worthy of a higher name.

Phaedr. What name is that?

Soc. Wise, I may not call them; for that is a great name which belongs to God only, — lovers of wisdom or philosophers is their modest and befitting title.

Phaedr. Very good.

Soc. And he who cannot rise above his own compilations and compositions, which he has been long patching and piecing, adding some and taking away some, may be justly called poet or speech-maker or law-maker.

Phaedr. Certainly.

Soc. Now go and tell this to your companion.

Phaedr. But there is also a friend of yours who ought not to be forgotten.

Soc. Who is that?

Phaedr. Isocrates the fair.

Soc. What of him?

279 *Phaedr.* What message shall we send to him?

Soc. Isocrates is still young, Phaedrus; but I am willing to risk a prophecy concerning him.

Phaedr. What would you prophesy?

Soc. I think that he has a genius which soars above the orations of Lysias, and he has a character of a finer mould. My impression of him is that he will marvelously improve as he grows older, and that all former rhetoricians will be as children in comparison of him. And I believe that he will not be satisfied with this, but that some divine impulse will lead him to things higher still. For there is an element of philosophy in his nature. This is the message which comes from the gods dwelling in this place, and which I will myself deliver to Isocrates, who is my delight; and do you give the other to Lysias, who is yours.

Phaedr. I will; and now as the heat is abated let us depart.

Soc. Should we not offer up a prayer first of all to the local deities?

Phaedr. By all means.

Soc. Beloved Pan, and all ye other gods who haunt this place, give me beauty in the inward soul; and may the outward and inward man be at one. May I reckon the wise to be the wealthy, and may I have such a quantity of gold as none but the temperate can carry. Anything more? That prayer, I think, is enough for me.

Phaedr. Ask the same for me, for friends should have all things in common.

Soc. Let us go.

CRATYLUS.

INTRODUCTION.

THE Cratylus has always been a source of perplexity to the student of Plato. While in fancy and humor and perfection of style, and metaphysical originality, this Dialogue may be ranked with the best of the Platonic writings, there has been an uncertainty about the motive of the piece, which interpreters have hitherto not succeeded in dispelling. We need not suppose that Plato used words in order to conceal his thoughts, or that he would have been unintelligible to an educated contemporary. In the Phaedrus and Euthydemus we also found a difficulty in determining the precise aim of the author. Plato wrote satires in the form of dialogues, and his meaning, like that of other satirical writers, has often slept in the ear of posterity. Two causes may be assigned for this: 1st, the subtlety and allusiveness of this species of composition; 2d, the difficulty of reproducing a state of life and literature which has passed away. A satire is unmeaning, unless we can place ourselves back among the persons and thoughts of the age in which it was written. Had the treatise of Antisthenes upon words, or the speculations of Cratylus, or some other Heraclitean of the fourth century B. C., on the nature of language, been preserved to us; or if we had lived at the time, and been rich enough to attend "the fifty-drachma course of Prodicus," we should have understood Plato better, and many points which are now attributed to the extravagance of Socrates' humor, would have been found, like the allusions of Aristophanes in the Clouds, to have gone home to the Sophists and grammarians of the day.

For the age was very busy with philological speculation; and many questions were beginning to be asked about language which were parallel to other questions about justice, virtue, knowledge, and were illustrated in a similar manner by the analogy of the arts. Was there a correctness in words, and were they given by nature or convention? In the pre-Socratic philosophy mankind had been striving to attain an expression of their ideas; and now they were beginning to ask themselves whether the expression might not be distinguished from the idea? These were some of the problems

which were occupying the minds of speculative men in the age of Plato. But of these beginnings of the study of language we know little, and there necessarily arises an obscurity, when the surroundings of such a work as the Cratylus are taken away. Moreover, in this, as in most of the Dialogues of Plato, allowance has to be made for the character of Socrates. For the theory of language can only be propounded by him in a manner which is consistent with his own profession of ignorance. Hence his ridicule of the new school of etymology is interspersed with many declarations, "that he knows nothing," "that he has learned from Euthyphro," and the like. Even the truest things which he says are depreciated by himself. He professes to be guessing, but the guesses of Plato are better than all the other theories of the ancients respecting language put together.

The Dialogue hardly derives any light from Plato's other writings, and still less from Scholiasts and Neoplatonist writers. Socrates must be interpreted from himself, and on first reading we certainly have a difficulty in understanding his drift, or his relation to the two other interlocutors in the Dialogue. Does he agree with Cratylus or with Hermogenes, and is he serious in those fanciful etymologies, extending over more than half the Dialogue, which he seems so greatly to relish? Or is he serious in part only; and can we separate his jest from his earnest? — *Sunt bona, sunt quaedam mediocria, sunt mala plura.* Most of them are ridiculously bad, and yet among them are found, as if by accident, principles of philology which are unsurpassed in any ancient writer, and even in advance of any philologer of the last century. May we suppose that Plato, like Lucian, has been amusing his fancy by writing a comedy in the form of a prose dialogue? And what is the final result of the inquiry? Is Plato an upholder of the conventional theory of language, which he acknowledges to be imperfect? Or does he mean to imply that a perfect language can only be based on his own theory of ideas? Or if this latter explanation is refuted by his silence, then in what relation does his account of language stand to the rest of his philosophy? Or may we be so bold as to deny the connection between them? For the allusion to the ideas at the end of the Dialogue is merely intended to show that we must not put words in the place of things or realities, which is a thesis strongly insisted upon by Plato in many other passages. . . . . These are some of the first thoughts which arise in the mind of the reader of the Cratylus. And the consideration of them may form a convenient introduction to the general subject of the Dialogue.

We have already seen in the case of the Phaedrus, that we must not expect all the parts of a dialogue of Plato to tend equally to some clearly defined end. His idea of literary art is not the absolute proportion of the whole, such as we appear to find in a Greek temple

or statue; nor should his works be tried by any such standard. They have often the beauty of poetry, but they have also the freedom of conversation. "Words are more plastic than wax," and may be moulded into any form. He wanders on from one topic to another, careless of the unity of his work, not fearing any "judge, or spectator, who may recall him to the point" (Theaet.), "whither the argument blows we follow." (Rep. 394 D.) To have determined beforehand, as in a modern didactic treatise, the nature and limits of the subject, would have been fatal to the spirit of inquiry or discovery, which is the soul of the Dialogue.

There is another aspect under which some of the Dialogues of Plato may be more truly viewed: they are dramatic sketches of an argument. We have found that in the Lysis, Charmides, Laches, Protagoras, Meno, we arrived at no conclusion — the different sides of the argument were personified in the different speakers; but the victory was not distinctly attributed to any of them, nor the truth wholly the property of any. And in the Cratylus we have no reason to assume that Socrates is either wholly right or wholly wrong, or that Plato, though he evidently inclines to him, had any other aim than that of personifying the conventional, rational, ideal theories of language, in the characters of Hermogenes, Socrates, and Cratylus.

The two subordinate persons of the Dialogue, Hermogenes and Cratylus, are at the opposite poles of the argument. But extremes meet; and the disciple of the Sophists and the follower of Heraclitus are found to be not so far removed from one another as at first sight appears; and both show an inclination to accept the third view which Socrates interposes between them. First, Hermogenes, the poor brother of the rich Callias, expounds the doctrine that names are conventional; like the names of slaves, they may be given and altered at pleasure. This is one of those principles which, whether applied to society or language, explains everything and nothing. For in all things there is an element of convention; but the admission of this does not explain the rational ground or basis in human nature on which the convention proceeds. Socrates first of all intimates to Hermogenes, that his view of language is only a part of a sophistical whole, and ultimately tends to abolish the distinction between truth and falsehood. Hermogenes is very ready to throw aside the sophistical tenet, and listens with a sort of half-admiration half-belief, to the speculations of Socrates.

Cratylus is of opinion that a name is either a true name or not a name all. He is unable to conceive of degrees of imitation; a word is either the perfect expression of a thing, or a mere inarticulate sound (a fallacy which is still prevalent among theorizers about the origin of language). He is at once a philosopher and Sophist; for while wanting to rest language on an immutable basis, he would deny the possibility of falsehood. He is inclined to derive all truth

from language, and in language he sees reflected the philosophy o Heraclitus. His views are not like those of Hermogenes, hastily taken up, but are said to be the result of mature consideration although he is described as still a young man. With a tenacity characteristic of the Heraclitean philosophers, he clings to the doc trine of the flux. (Cp. Theaet. 180.) Of the real Cratylus we know nothing, except that he is recorded by Aristotle to have beer the friend or teacher of Plato; nor have we any proof that he re sembled the likeness of him in Plato any more than the Critias o Plato is like the real Critias, or the Euthyphro in this Dialogue like the other Euthyphro, the diviner, in the Dialogue which is called after him.

Between these two extremes, which have both of them a sophistical character, the view of Socrates is introduced, which is in a manner the union of the two. Language is conventional and also natural, and the true conventional-natural is the rational. It is a work, not of chance, but of art; the dialectician is the artificer of words, and the legislator gives authority to them. They are the expressions or imitations in sound of things. In a sense, Cratylus is right in saying that things have by nature names (p. 390); for nature is not opposed either to art or to law. But vocal imitation, like any other copy, may be imperfectly executed; and in this way an element of chance or convention enters in. There is much which is accidental or exceptional in language. Some words have had their original meaning so obscured, that they require to be helped out by convention. But still the true name is that which has a natural meaning. Thus nature, art, chance, all combine in the formation of language. And the three views respectively propounded by Hermogenes, Socrates, Cratylus, may be described as the conventional, the artificial or rational, and the natural. And this view of Socrates is the meeting-point of the other two, just as conceptualism is the meeting-point of nominalism and realism.

We can hardly say that Plato was aware of the truth, that "languages are not made, but grow." But still, when he says that "the legislator made language with the dialectician standing on his right hand," we need not infer from this that he supposed words, like coins, to be issued from the mint of the state. The creator of laws and of social life is naturally regarded as the creator of language, according to Hellenic notions, and the philosopher is his natural adviser. We are not to suppose that the legislator is performing any extraordinary function; he is merely the Eponymus of the state, who prescribes rules for the dialectician and for all other artists. According to a truly Platonic mode of approaching the subject, language like virtue in the Republic, is examined by the analogy of the arts. Words are works of art which may be equally made in different materials, and are well made when they have a meaning. Of

the process which he thus describes, Plato had probably no very definite notion. But he means to express generally that language is the product of intelligence, and that languages belong to states and not to individuals.

A better conception of language could not have been formed in Plato's age, than that which he attributes to Socrates. Yet many persons have thought that the mind of Plato is more truly seen in the vague realism of Cratylus. This misconception has probably arisen from two causes: first, the desire to bring Plato's theory of language into accordance with the received doctrine of the Platonic ideas; secondly, the impression created by Socrates himself, that he is not in earnest, and is only indulging the fancy of the hour.

1. We shall have occasion to show more at length, in the Introduction to future Dialogues, that the so-called Platonic ideas are only a semi-mythical form, in which he attempts to realize abstractions, and that they are replaced in his later writings by a rational theory of psychology. (See, especially, Introduction to the Sophist.) And in the Cratylus he gives a rational account of the nature and origin of language, in which Adam Smith, Rousseau, and other writers of the last century, would have generally agreed. At the end of the Dialogue, he speaks, as in the Symposium and Republic, of absolute beauty and good; but he never supposed that they were capable of being embodied in words. Of the names of the ideas, he would have said, as he says of the names of the gods, that we know nothing. Even the realism of Cratylus is not based upon the ideas of Plato, but upon the flux of Heraclitus. Here, as in the Sophist and Politicus, Plato expressly draws attention to the want of correspondence of words and things. Hence we are led to infer, 1st, that the view of Socrates is not the less Plato's own, because not based upon the ideas; 2d, that Plato's theory of language is not inconsistent with the rest of his philosophy.

2. We do not deny that Socrates is partly in jest and partly in earnest. He is discoursing in a high-flown vein, which may be compared to "the dithyrambics" of the Phaedrus. They are mysteries of which he is speaking, and he professes a kind of ludicrous fear of his imaginary wisdom. When he is arguing out of Homer, about the names of Hector's son, or when he describes himself as inspired or maddened by Euthyphro, with whom he has been sitting from the early dawn (compare again Phaedrus and Lysias), and expresses his intention of yielding to the illusion to-day, and to-morrow he will go to a priest and be purified, we easily see that his words are not to be taken seriously. In this part of the Dialogue his dread of committing impiety, the pretended derivation of his wisdom from another, the extravagance of some of his etymologies, and, in general, the manner in which the fun fast and furious, *vires acquirit eundo*, remind us strongly of the Phaedrus. The jest is a long one, extending over

more than half the Dialogue. But then, we remember that the Euthydemus is a still longer jest, in which the irony is preserved to the very end. There he is parodying the ingenious follies of early logic; in the Cratylus he is ridiculing the fancies of a new school of Sophists and grammarians. The fallacies of the Euthydemus are still retained at the end of our logic books; and the etymologies of the Cratylus have also found their way into later writers. Some of these are not much worse than the conjectures of Hemsterhuis, and other critics of the last century; but this does not prove that they are serious. For Plato is in advance of his age in his conception of language, as much as he is in his conception of mythology. (Cp. Phaedrus *sub initio*.) He might have described the etymologies in the Cratylus, as "the occupation of a not very-fortunate individual," who had a good deal of time on his hands; or he might have satirized the current interpretations of mythology in a similar spirit.

When the fervor of his etymological enthusiasm has abated, Socrates ends, as he had begun, with a rational explanation of language. Still he preserves his "know nothing" disguise, and himself declares his first notions about names to be reckless and ridiculous. Having explained compound words, by resolving them into their original elements, he now proceeds to analyze simple words into the letters of which they are composed. The Socrates who "knows nothing" here passes into the teacher, the dialectician, the arranger of species. There is nothing in this part of the Dialogue which is either weak or extravagant. Plato is a supporter of the onomatopoetic theory of language; that is to say, he supposes words to be formed by the imitation of ideas in sounds; he also recognizes the effect of time, the influence of foreign languages, the desire of euphony, to be formative principles; and he admits a certain element of chance. But he gives no intimation in all this, that he is preparing the way for the construction of an ideal language, or that he has any Eleatic speculation to oppose to the Heracliteanism of Cratylus.

The theory of language which is propounded in the Cratylus, is in accordance with the later phase of the philosophy of Plato, and would have been regarded by him as in the main true. The Dialogue is also a satire on the philological fancies of the day. Socrates in pursuit of his vocation, as a detector of false knowledge, lights by accident on the truth. He is guessing, he is dreaming; he has heard, as he says in the Phaedrus, from another: no one is more surprised than himself at his own discoveries. And yet some of his best remarks, as, for example, his view of the derivation of Greek words from other languages, or of the permutations of letters, or again, his observation that in speaking of the gods we are only speaking of our names of them, occur among these flights of humor.

We can imagine a character having a profound insight into the nature of men and things, and yet hardly dwelling upon them seriously; blending inextricably sense and nonsense; sometimes enveloping in a blaze of jests the most serious matters, and then again allowing the truth to peer through; enjoying the flow of his own humor, and puzzling mankind by an ironical exaggeration of their absurdities. Such were Aristophanes and Rabelais; such, in a different style, were Sterne, Jean Paul, Hamann, — writers who sometimes become unintelligible through the extravagance of their fancies. Such is the character which Plato intends to depict in some of his Dialogues as the Silenus Socrates; and through this medium we have to receive our theory of language.

There remains still a question, which seems to demand a more exact answer: In what relation does the satirical or etymological portion of the Dialogue stand to the serious? Granting all that can be said about the provoking irony of Socrates, about the parody of Euthyphro, or Prodicus, or Antisthenes, how does the long catalogue of etymologies furnish any answer to the question of Hermogenes, which is evidently the main thesis of the Dialogue: What is the truth, or correctness, or principle of names?

After illustrating the nature of correctness by the analogy of the arts, and then, as in the Republic, ironically appealing to the authority of the Homeric poems, Socrates shows that the truth or correctness of names can only be ascertained by an appeal to etymology. The truth of names is to be found in the analysis of their elements. But why does he admit etymologies which are absurd, based on Heraclitean fancies, fourfold interpretations of words, impossible unions and separations of syllables and letters?

1. The answer to this difficulty has been already anticipated in part: Socrates is not a dogmatic teacher, and therefore he puts on this wild and fanciful disguise, in order that the truth may be permitted to appear; 2. As Benfey remarks, an erroneous example may illustrate a principle of language as well as a true one; 3. Many of these etymologies, as, for example, that of δίκαιον, are indicated, by the manner in which Socrates speaks of them, to have been current in his own age; 4. The philosophy of language had not made such progress as would have justified Plato in propounding real derivations. Like his master, Socrates, he saw through the hollowness of the incipient sciences of the day, and tries to move in a circle apart from them, laying down the conditions under which they are to be pursued; but as in the Timaeus, cautious and tentative, when he is speaking of actual phenomena. To have made etymologies seriously, would have seemed to him like the interpretation of the myths in the Phaedrus, the task "of a not very fortunate individual, who had a great deal of time on his hands." (See p. 625.) The irony of Socrates places him above and beyond the errors of his contemporaries.

The Cratylus is full of humor and of satirical touches: the inspiration which comes from Euthyphro and his prancing steeds, the light admixture of quotations from Homer, and the spurious dialectic which is applied to them; the jest about the fifty-drachma course of Prodicus, and the double explanation of the name Hermogenes, either as "not being in luck," or "being no speaker;" the dearly-bought wisdom of Callias, the Lacedaemonian whose name was Bolt, and, above all, the pleasure which Socrates expresses in his own dangerous discoveries, which "to-morrow he will purge away," are truly humorous. A deeper vein of satire is found in other passages: first, Protagoras and Euthydemus are assailed; then the interpreters of Homer, οἱ παλαιοὶ Ὁμηρικοί (cp. Arist. Met. xiii. 6, 7); then he discovers a hive of wisdom in the philosophy of Heraclitus; or he ridicules the arbitrary methods of pulling out and putting in letters which were in vogue among the philologers of his time; or slightly scoffs at contemporary religious beliefs. Lastly, he is impatient of hearing from the half-converted Cratylus the doctrine that falsehood can neither be spoken, nor uttered, nor addressed; a piece of sophistry attributed to Gorgias, which reappears in the Sophist. And he proceeds to demolish, with no less delight than he had set up, the Heraclitean theory of language.

The place of the Dialogue in the series cannot be determined with certainty. The style and subject, and the treatment of the character of Socrates, have a close resemblance to the Phaedrus, and, in general, to the earlier Dialogues. The manner in which the ideas are spoken of at the end of the Dialogue, also indicates a comparatively early date. The imaginative element is still in full vigor; the Socrates of the Cratylus is the Socrates of the Apology and Symposium, not yet Platonized; and he describes, as in the Theaetetus, the philosophy of Heraclitus by "unsavory" similes — he cannot believe that the world is like "a leaky vessel," or "a man who has a running at the nose;" he attributes the flux of the world to the swimming in some folks' heads. On the other hand, the relation of thought to language is omitted here, but is treated of in the Sophist. These grounds are not sufficient to enable us to arrive at a precise conclusion. But we shall not be far wrong in placing the Cratylus about the middle, or at any rate in the first half of the series.

Cratylus, the Heraclitean philosopher, and Hermogenes, the brother of Callias, have been arguing about names; the former maintaining that they are natural, the latter that they are only conventional. Cratylus affirms that his own is a true name, but will not allow that the name of Hermogenes is equally true. Hermogenes is mystified by this, and asks Socrates to explain to

him what Cratylus means; and he would like to know what Socrates himself thinks about the truth or correctness of names? Socrates replies, that hard is knowledge, and the nature of names is a considerable part of knowledge: he has never been to hear the fifty-drachma course of Prodicus; and having only attended the single drachma course, he is not competent to give an opinion on matters of this sort. When Cratylus denies that Hermogenes is a true name, he supposes him to mean that, he is not a true son of Hermes, because he is never in luck. But he would like to have an open council and to hear both sides.

Hermogenes has often considered the question, and is of opinion that there is no principle in names; they may be changed, as we change the names of slaves whenever we please, and the altered name is as good as the original one.

You mean to say, rejoins Socrates, who restates the proposition of Hermogenes, that if I agree to call a man a horse, then a man will be rightly called a horse by me, and a man by the rest of the world? But to this he proceeds to object, that there is in words a true and a false, which is contained in propositions; and if a whole proposition be true or false, then the parts of a proposition may be true or false, and the least parts as well as the greatest; and the least parts are names, and therefore names may be true or false. And would Hermogenes maintain that anybody may give a name to anything, and as many names as he pleases; and would all these names be always true at the time of giving them? Hermogenes replies that this is the only consistent account of the correctness of names; and he appeals to the practice of different nations, and of the different Hellenic tribes, in confirmation of his view. Socrates asks, whether the things differ as the words which represent them differ: Are we to maintain with Protagoras, that what appears is? Hermogenes has considered this question and is puzzled at first, but acknowledges, when he is pressed by Socrates, that there are a few very good men in the world, and a great many very bad; and the very good are the wise, and the very bad are the foolish; and this is not mere appearance but reality. Nor is he disposed to say with Euthydemus, that all things equally and always belong to all men; in that case, again, there would be no distinction between bad and good men. But if Protagoras and Euthydemus are both admitted to be wrong, then the only remaining possibility is, that all things have their several distinct natures, and are independent of our notions about them. And not only things, but actions, have distinct natures, and are done by different processes. There is a natural way of cutting or burning, and a natural instrument with which men cut or burn, and any other way will fail; this is true of all actions. And speaking is a kind of action, and naming is a kind of speaking, and we must name according to a natural process,

and with a proper instrument. We cut with a knife, we pierce with an awl, we weave with a shuttle, we name with a name. And as a shuttle divides the warp and the woof, so a name distinguishes the natures of things. And the weaver will use the shuttle well, — that is, like a weaver; and the teacher will use the name well, — that is, like a teacher. The shuttle will be made by the carpenter; the awl by the smith or skilled person. But who makes a name? Does not the law give names, and does not the teacher receive them from the legislator? He is the skilled person who makes them, and of all skilled workmen he is the rarest. But how does the carpenter make or repair the shuttle, and to what will he look? Will he not look at the ideal which he has in his mind? And as the different kinds of work differ, so ought the instruments which make them to differ. The several kinds of shuttles ought to answer in material and form to the several kinds of webs. And the legislator ought to know the different materials and forms of which names are made in Hellas and other countries. But who is to be the judge of the proper form? The judge of shuttles is the weaver who uses them; the judge of lyres is the player of the lyre; the judge of ships is the pilot who sails in them. And will not the judge who is able to direct the legislator in his work of naming, be he who knows how to use the names — he who can ask and answer questions — in short, the dialectician? The pilot directs the carpenter how to make the rudder, and the dialectician directs the legislator how he is to impose names; for to express the ideal forms of things in syllables and letters is no easy task, Hermogenes — of that I can assure you.

"I wish you would explain to me the natural correctness of names."

Indeed I cannot: but I see that you have advanced; for you now admit that there is a correctness of names, and that not every one can give a name. But what is the nature of this correctness or truth, you must learn from the Sophists, of whom your brother, Callias, has bought his reputation for wisdom rather dearly; and since they require to be paid, you having no money, had better learn from him at second-hand. "Well, but I have just given up Protagoras, and I should be inconsistent in going to learn of him." Then if you reject him you may learn of the poets, and in particular of Homer, who distinguishes the names given by gods and men to the same things, as in the verse about the river god who fought with Achilles, "whom the gods call Xanthus, and men call Scamander;" or in the lines in which he mentions the bird which the gods call "Chalcis," and men "Cymindis;" or the hill which men call "Batiea," and the gods call "Myrina's Tomb." Now here is a mysterious lesson which we may take to heart; for the gods must, of course, be right in their use of names. And this is not the only truth about

philology which may be learnt from Homer. For does he not say that the women called Hector's son Scamandrius, and the men called him Astyanax? And which are more likely to be right — the wiser or the less wise, the men or the women? Homer evidently thought that the men were likely to be right; and of the name given by the men he offers an explanation; he was called Astyanax because his father saved the city. Hence you may properly call his son "the king of the city;" and the names of Astyanax and Hector are really the same, for the one means a king, and the other is a holder or possessor; "'tis all one meaning, save the phrase is a little variations." As the lion's whelp may be called a lion, so the son of a king may be called a king. But if the lion had produced a foal, then the offspring of the lion would be called a foal. Whether the syllables of a name are the same or not, makes no difference, provided the meaning is retained. For example; the names of letters, whether vowels or consonants, do not correspond to their sounds, with the exception of ε, υ, ο, ω. The name Beta has three letters added to the sound — and yet this does not alter the sense of the word, or prevent the whole name having the value which the legislator intended. And the same may be said of a king; the words which signify the good son, and the noble sire, may be disguised; and yet amid differences of sound the etymologist may recognize the same notion, just as the physician may recognize the power of the same drugs under different disguises of color and smell. Hector and Astyanax have only one letter alike, but they may have the same meaning; and Agis (leader) is altogether different in sound from Polemarchus (chief in war) or Eupolemus (good warrior); but the two words present the same idea of leader or general; like the words Iatrocles and Acesimbrotus, which equally denote a doctor. The son succeeds the father as the foal succeeds the horse; but when, out of the course of nature, a prodigy occurs, like a lion producing a dog, that is to say, when the offspring no longer resembles the parent, then the names no longer agree. This may be illustrated by the case of Agamemnon and Orestes, of whom the former has a name significant of his patience at the siege of Troy; while the name of the latter indicates his savage man-of-the-mountain nature. Atreus again, for his murder of Chrysippus, and his cruelty to Thyestes, is rightly named Atreus; which, to the eye of the etymologist, is ἀτηρὸς (destructive), ἀτειρὴς (stubborn), ἄτρεστος (fearless); and Πέλοψ is ὁ πέλας ὁρῶν (he who sees what is near only); because in his eagerness to win Hippodamia, he was unconscious of the remoter consequences which the murder of Myrtilus would entail upon his race. The name Tantalus, if slightly changed, offers two etymologies; either ἀπὸ τῆς τοῦ λίθου ταλαντείας, or ἀπὸ τοῦ ταλάντατον εἶναι, signifying at once the misery which he brought upon his country, and the hanging of the stone over his head in the world below. And the name of his

father, Ζεὺς, Διὸς, Ζηνὸς, has an excellent meaning, though hard to be understood, because really a sentence which is divided into two parts (Ζεὺς, Διὸς). For he, being the lord and king of all, is the author of our being, and in him all live: this is implied in the double form, Διὸς Ζηνὸς, which being put together and interpreted is δι' ὃν ζῇ πάντα. There may, at first sight, appear to be a want of reverence in calling him the son of Cronos; but the meaning, I suspect, is that Ζεὺς himself is the son of a mighty intellect; Κρόνος, quasi κόρος, not in the sense of a youth, but quasi τὸ καθαρὸν καὶ ἀκήρατον τοῦ νοῦ — the pure and garnished mind, which in turn is begotten of Uranus, who is so called ἀπὸ τοῦ ὁρᾷν τὰ ἄνω, from looking upwards; which, as philosophers say, is the way to have a pure mind. The earlier portion of Hesiod's genealogy has escaped my memory, or I would try more conclusions of the same sort. "You talk like an oracle." I caught the infection from Euthyphron, who gave me a long lecture which began at dawn, and has not only entered into my ears, but filled my soul, and my intention is to yield to the inspiration to-day; and to-morrow I will be exorcised by a priest or Sophist. "Go on; I am anxious to hear the rest." Now that we have a general notion, how shall we proceed? What names will afford the most crucial test of natural fitness? Those of heroes are often deceptive, because they are patronymics or expressions of a wish; let us try gods and demi-gods. Gods are so called, ἀπὸ τοῦ θεῖν, from the word "to run;" because the sun, moon, and stars, run about the heaven; and they being the original gods of the Hellenes, as they still are of the barbarians, their name is given to all gods. The demons are the golden race of Hesiod, and by golden he means not literally golden, but good; and they are called demons, quasi δαήμονες, which in the old language was δαίμονες — good men are well said by Hesiod to become δαίμονες when they die, because they are knowing. Ἥρως is the same word as ἔρως; "the sons of God saw the daughters of men that they were fair;" perhaps, also, they are a kind of Sophists who are likewise of heroic breed, and called ἥρωες ἀπὸ τοῦ ἐρωτᾷν, or εἰρεῖν, from their habit of spinning questions; for εἴρειν is equivalent to λέγειν. I get all this from Euthyphro; and now I bethink me of a very new and ingenious notion which occurs to me; and, if I do not mind, I shall be wiser than I ought to be by to-morrow's dawn. My notion is, that we may put in and pull out letters at pleasure and alter the accents (as, for example, Διὶ φίλος may be turned into Δίφιλος), and we may make words into sentences and sentences into words. The name ἄνθρωπος is a case in point, for a letter has been omitted and the accent changed; the original meaning being ὁ ἀναθρῶν ἃ ὄπωπεν — he who looks up at what he sees. Ψυχὴ may be thought to be the cooling, or refreshing, or animating principle, ἡ ἀναψύχουσα τὸ σῶμα; but I am afraid that Euthyphro and his disciples will scorn this derivation, and I must

find another: shall we say with Anaxagoras, that *ψυχὴ* is the *κοσμοῦσα διάνοια* quasi *φυσέχη ἢ φύσιν ἔχει* or *ὀχεῖ* — this by a refinement may be called *ψυχή*? "That is a better and more artistic etymology."

After *ψυχὴ* follows *σῶμα*; this, by a change of a letter, is converted into *σῆμα* — the grave in which the soul is buried, or the sign of the soul through which her will is signified; or without changing even a letter may be thought to mean the place of ward in which the soul is safely kept and endures punishment — *ἐν ᾧ σώζεται*. "I should like to hear some more explanations of the names of the gods, like that excellent one of Zeus." The truest names of the gods are those which they give themselves; but these are unknown to us. Less true are those by which we propitiate them, as men say in prayers, "May he graciously receive any name by which I call him." And to avoid offense, I should like to let them know beforehand that we are not inquiring about them — that would be a piece of impertinence on our part; but we are inquiring about the names which men give to them. Let us begin with Hestia. What did he mean who gave the name Hestia? "That is a very difficult question to answer." O, my dear Hermogenes, I believe that there was a power of philosophy and talk among the first inventors of names, both in our own and in other languages; for even in foreign words a principle is discernible. Hestia is the same with *ἐσία*, which is an old form of *οὐσία*, and means the first principle of things: this agrees with the fact, that to Hestia the first sacrifices are offered. There is also another reading of *ὠσία*, which implies that "pushing" is the first principle of all things. And here I seem to discover a delicate allusion to the flux of Heraclitus — that antediluvian philosopher who cannot walk twice in the same stream; and this flux of his may accomplish yet greater marvels. For the names Cronos and Rhea cannot have been accidental; the giver of them must have known something about the doctrine of Heraclitus. Moreover, there is a remarkable coincidence in the words of Hesiod, when he speaks of Oceanus, "the origin of gods;" or in the verse of Orpheus, in which he describes Oceanus espousing his sister Tethys. Tethys is nothing more than the name of a spring — *τὸ ἡθούμενον καὶ διατρώμενον*. Poseidon is *ποσίδεσμος*, the chain of the feet, because you cannot walk on the sea — the *ε* is inserted by way of ornament; or perhaps the name may have been originally *πολλείδων*, meaning that the God knew many things; he may also be the shaker, *ἀπὸ τοῦ σείειν*. Pluto is connected with *Πλοῦτος*, because wealth comes out of the earth; or because there are riches in the world below; or the word may be a euphemism for Hades. And Hades is so called, not *ἀπὸ τοῦ ἀειδοῦς*, but *ἀπὸ τοῦ πάντα τὰ καλὰ εἰδέναι* — from knowing all good and beautiful things. Hades binds men by

the strongest of chains, and the love of the beautiful is the strongest; the men who are bound by this chain never want to come back, and indeed, when they have once been laid under his spell, they cannot. He is the perfect and accomplished Sophist, and the great benefactor of the world below; for he has much more than he wants there, and this is why he is called Pluto, or the rich. He will have nothing to do with the souls of men while in the body, because he cannot bind them with the desire of virtue until they are liberated from their earthly tenement. Demeter is the mother and giver of food — ἡ διδοῦσα μήτηρ τῆς ἐδωδῆς. Herè is ἐρατή τις, or perhaps the legislator may have been thinking of the weather, and has merely transposed the letters of the word ἀήρ. You will see the truth of this when you say the letters over fast. Persephatta, that awful name, is φερεπάφη — and means only ἡ τοῦ φερομένου ἐφαπτομένη — all things in the world are in motion, and she in her wisdom moves with them, and Hades consorts with her — there is nothing very terrible in this. Apollo is another name which is supposed to have some dreadful meaning, but is susceptible, if I am not mistaken, of at least four perfectly innocent explanations, which agree marvelously with his four attributes of musician, diviner, doctor, archer. First, he is the purifier or purger or fumigator (ἀπολούων); secondly, he is the true diviner (ἄπλως), as he is called in the Thessalian dialect; thirdly, he is the archer (ἀεὶ βάλλων), always shooting; or again, supposing α to mean ἅμα or ὅμου, Apollo becomes equivalent to ἅμα πολῶν, which is significant both of his musical and of his heavenly attributes; for he is the god of music, and also of the movement of the sphere. The second λ is inserted in order to avoid the ill-omened sound of destruction. The Muses are so called — ἀπὸ τοῦ μῶσθαι. Leto or Letho means forget and forgive; she is such a gentle deity. Artemis is named from her healthy, happy nature — διὰ τὸ ἀρτεμὲς, or as ἀρετῆς ἵστωρ; or as a lover of virginity, ἄροτον μισήτασα τοῦ ἀνδρός. One, if not all of these explanations, is probably true. Dionysus is ὁ διδοὺς τὸν οἶνον, and οἶνος is quasi οἰόνους, because wine gives a mind to those who have not got one. The established derivation of Ἀφροδίτη διὰ τὴν τοῦ ἄφρου γένεσιν, may be accepted on the authority of Hesiod. Again there is the name of Pallas, or Athene, which you, who are an Athenian, must not forget. Pallas is derived from armed dances — ἀπὸ τοῦ πάλλειν τὰ ὅπλα. For Athene we must have recourse to the allegorical interpreters of Homer, who make the name equivalent to θεονόη or ἠθονόη; this has been beautified into Athene. Hephaestus, again, is the lord of light — ὁ τοῦ φάεος ἵστωρ. This is a good notion; and, to prevent any other getting into our heads, let us go on to Ares. He is the manly one (ἄῤῥην), or the unbroken one (ἄῤῥαρος). Enough of the gods, for, by the gods, I am afraid of them; but if you sug-

rest other words, you will see how the horses of Euthyphro prance. 'Only one more god; tell me about my godfather Hermes." He s ἑρμηνεὺς, the messenger, or cheater, or thief, or bargainer; or ὁ ἴρειν μίμενος, that is, εἰρέμης or ἕρμης — the speaker or contriver f speeches. "Well said Cratylus then, that I am no son of Hermes." Pan, the son of Hermes, is λόγος, and is called Pan because ie indicates everything — ὁ πᾶν μηνύων. He has two forms, a rue and a false; and is in the upper part smooth, and in the lower art shaggy. He is the goat of Tragedy, in which there are plenty f falsehoods.

Enough of the names of the gods. Shall I go on to the elements — sun, moon, stars, earth, aether, air, fire, water, seasons, years? And which shall I take first? Let us begin with ἥλιος, or the sun. The origin of ἥλιος will be clearer in the Doric form ἅλιος, which s so called κατὰ τὸ ἁλίζειν εἰς ταὐτὸ ταὺς ἀνθρώπους ὅταν ἀνατείλῃ, ecause at his rising he gathers men together; or, διὰ τὸ περὶ τὴν ῆν εἰλεῖν, because he goes round the earth; or, διὰ τὸ αἰολεῖν, the neaning of which is ποικίλλειν, because he variegates the earth. Selene is an anticipation of Anaxagoras, being a contraction of σελαενονεναεια, the light which is ever old and new, and which, as Anaxagoras says, is borrowed from the sun; the name was beaten nto shape and called σεληναία — that is a name of the true dithyambic sort. Μεῖς is so called ἀπὸ τοῦ μειοῦσθαι, from suffering liminution; and ἄστρον, is from ἀστραπὴ, which is an improvement of ἀναστρωπὴ, that which turns the eyes inside out. "How do ou explain πῦρ and ὕδωρ?" I suspect πῦρ, like ὕδωρ and κύων, which are found in the Phoenician language, to be a word of which he origin must be sought in some other language; for the Hellenes orrowed many words from the barbarians, and I always have recourse to them when I am at a loss. Ἀὴρ may be explained, ὅτι ιἴρει τὰ ἀπὸ τῆς γῆς; or, ὅτι ἀεὶ ῥεῖ; or, ὅτι πνεῦμα ἐξ αὐτοῦ γίνεται (compare the poetic word ἀῆται). So αἰθὴρ quasi αειθεηρ ὅτι ἀεὶ θεῖ: ῆ γαῖα quasi γεννήτειρα (compare the Homeric form γεγάασι); ὥρα, or, according to the old Attic form, ὅρα, is derived ἀπὸ τοῦ ὁρίζειν, ecause it divides the year; ἐνιαυτὸς and ἔτος are the same thought — ὃ ἐν ἑαυτῷ ἐτάζων, cut into two parts, ἐν ἑαυτῷ and ἐτάζων, like δι' ὃν ζῇ into Διός and Ζηνός.

"You make surprising progress." True; I am run away with, nd am not even yet at my utmost speed. "I should like very much o hear your account of the virtues. What principle of correctness s there in all those charming words, wisdom, understanding, justice, nd the rest of them?" To explain all that, will be a serious usiness; still, as I have put on the lion's skin, appearances must be naintained. My opinion is, that primitive men were like some nodern philosophers, who, by always going round in their search after he nature of things, become dizzy; and this latter phenomena,

which was really in themselves, they imagined to take place in the external world. You have no doubt remarked, that the doctrine of the universal flux, or generation of things, is indicated in names. "No, I never did." Φρόνησις is only φορᾶς καὶ νοῦ νόησις, or perhaps ὄνησις φορᾶς, and in any case is connected with φέρεσθαι; γνώμη is γονῆς σκέψις καὶ νώμησις; νόησις is νέου or γιγνομένου ἔσις; the word νέος implies that creation is always going on — the original form was νεοεσις; σωφροσύνη is σωτηρία φρονήσεως; ἐπιστήμη is ἡ ἑπομένη τοῖς πράγμασιν — the faculty which keeps close, neither anticipating nor lagging behind; σύνεσις is equivalent to συνιέναι, συμπορεύεσθαι τὴν ψυχὴν, and is a kind of conclusion — συλλογισμός τις, akin therefore in idea to ἐπιστήμη; σοφία is very difficult, and has a foreign look — the meaning is, touching the motion or stream of things, and may be illustrated by the poetical ἐσύθη and the Lacedaemonian proper name Σοῦς, or Bolt; ἀγαθὸν is τὸ ἀγαστὸν ἐν τῇ ταχύτητι, — for all things are in motion, and some are swifter than others: δικαιοσύνη is clearly ἡ τοῦ δικαίου σύνεσις. The word δίκαιον is more difficult, and appears to mean the subtle penetrating power which, as the lovers of motion say, preserves all things, and is the cause of all things, quasi διαΐον going through — the letter κ being inserted for the sake of euphony. This is a great mystery which has been confided to me; but when I ask for an explanation of the mystery, I am thought irreverent, and another derivation is proposed to me. Justice is said to be ὁ καίων, or the sun; and when I joyfully repeat this beautiful notion, I am answered, "What! is there no justice when the sun is down?" And when I entreat my questioner to tell me his own opinion, he replies, that justice is fire in the abstract, or heat in the abstract; which is not very intelligible. Others laugh at all this, and say with Anaxagoras, that justice is the ordering mind. "I think that some one must have told you this." And not the rest? Let me proceed then, in the hope of proving to you my originality. Ἀνδρεία is quasi ἀνρεία quasi ἡ ἄνω ῥοὴ, the stream which flows upwards, and is opposed to injustice, which clearly hinders the principle of penetration; γυνὴ is the same as γονή; θῆλυ is derived ἀπὸ τῆς θηλῆς, or ἀπὸ τοῦ θάλλειν, and implies increase of youth, which is swift and sudden ever (θεῖν and ἄλλεσθαι). Observe how I run away when I am on smooth ground! Τέχνη, by an aphaeresis of τ and an epenthesis of ο in two places, may be identified with ἐχονόη.

"That is a very poor etymology." Yes; but you must remember that all language is in a process of disguise or transition; and letters are taken in and put out at pleasure, and twisted and twirled about in the lapse of ages — sometimes for the sake of euphony. For example, what business has the letter ρ in the word κάτοπτρον, or the letter σ in the word σφίγξ? The additions are often such that no human being can by any possibility make out the original word

"True." And yet, if you may put in and pull out, as you like, any name is equally good for any object ("les voyelles ne sont pas grand chose et les consonants rien"). "That is true." The fact is, that great dictators of literature like yourself, should observe the rules of moderation. "I will do my best." But do not be too much of a precisian, or you will paralyze me. If you will let me add *μηχανὴ — ἀπὸ τοῦ μήκους* which means *πολὺ* and *ἄνειν*, I shall be at the summit of my powers, from which elevation I will examine the two words *κακία* and *ἀρετή*. The explanation of the first is obvious, and in accordance with what has preceded; for all things being in a flux, *κακία* is *τὸ κακῶς ἰόν*. This is evident, and is further confirmed by the poor forgotten word *δειλία*, which ought to have come after *ἀνδρεία*, and may be regarded as *ὁ λίαν δεσμὸς*, just as *ἀπορία* is *τὸ ἐμπόδιον τῷ πορεύεσθαι*, and *ἀρετὴ* is *εὐπορία*, which is the opposite of this — the everflowing *ἀεὶ ῥέουσα* or *ἀειρετή*, or the eligible, quasi *αἱρετὴ* — this has been contracted into *ἀρετή*. You will, perhaps, say that I am inventing, but I say that if *κακία* is right, then *ἀρετὴ* is also right. "But what is *κακόν*?" That is a very obscure word, to which I can only apply my old notion: "What is that?" I shall say, that *κακὸν* is a foreign word. Next, let us proceed to *καλὸν*, *αἰσχρόν*. About *αἰσχρὸν* I have no doubt — *τὸ ἴσχον τῆς ῥοῆς τὰ ὄντα* or *ἀεσχοροῦν*; which has been contracted into *αἰσχρόν*. The inventor of words being a patron of the flux, was an enemy to stagnation of all sorts. *Καλὸν* is *τὸ καλοῦν τὰ πράγματα* — that which gives expression to *νοῦς* or *διάνοια*; this is the principle of beauty; and mind, which does the works of beauty, is rightly called the beautiful. The meaning of *συμφέρον* is explained by previous examples: like *ἐπιστήμη*, signifying that the soul moves in harmony with the world. *Κέρδος* is *τὸ πᾶσι κερανννύμενον* — that which mingles with all things: *λυσιτελοῦν* is equivalent to *τὸ τῆς φορᾶς λύον τὸ τέλος*, and is not to be taken in the vulgar sense of gainful, but rather in that of swift, being the principle which makes motion immortal and unceasing; *ὠφέλιμον* is *ἀπὸ τοῦ ὀφέλλειν* — that which gives increase: this word, which is Homeric, is of foreign origin. *Βλαβερὸν* is *τὸ βλάπτον* or *βουλόμενον ἅπτειν τοῦ ῥοῦ* — that which injures or seeks to bind the stream. The proper word would be *βουλαπτεροῦν*, but this is too much of a mouthful — like a prelude on the flute in honor of Athene. The word *ζημιῶδες* is difficult; great changes, as I was saying, have been made in words, and even a small change will alter their meaning very much. The word *δέος* is one of these disguised words. You know that according to the old pronunciation, which was especially affected by the women, who are great conservatives, *ι* and *δ* were used where we should now use *η* and *ζ*: for example, what we now call *ἡμέρα* was formerly called *ἱμέρα*; and this shows the meaning of the word to have been "the desired one after night." *Ζυγὸν* is *δύογον*, meaning

δέσις δυεῖν εἰς ἀγωγήν — the binding of two together, for the purpose of drawing. The word δέον has also the meaning of obligation, but when taken in this sense should be written διόν; for the cessation of motion implies censure and evil. Thus ζημιώδης is really δημιώδης, and means that which binds motion: ἡδονὴ is ῥ πρὸς τὴν ὄνησιν τείνουσα πραξις: λύπη appears to be derived ἀπὸ τῆς διαλύσεως τοῦ σώματος: ἀνία is from α and ἰέναι, to go: ἀλγηδὼν is a foreign word, and is so called ἀπὸ τοῦ ἀλγεινοῦ; ὀδυνὴ ἀπὸ τῆς ἐνδύσεως τῆς λύπης: ἀχθηὼν, a word the very sound of which is a burden; χαρὰ is expressive of the flow of soul; τερπνὸς is ἀπὸ τοῦ τερπνοῦ, and τερπνὸν is properly ἕρπνον: εὐφροσύνη and ἐπιθυμία explain themselves: θυμὸς is ἀπὸ τῆς θύσεως: ἵμερος — ὅτι ἱέμενος ῥεῖ: ἔρως was anciently ἔσρους ὅτι ἐσρεῖ: δόξα is ἡ δίωξις τοῦ εἰδέναι, or ἡ ἀπὸ τοῦ τὸξου βολή. Βουλὴ is the shooting of a bow: ἀβουλία is the missing. "You are quickening your pace now, Socrates." Why, yes, because I wish to make an end. But I must first explain ἑκούσιον and ἀνάγκη. Ἑκούσιον is τὸ εἶκον — the yielding — ἀνάγκη is ἡ κατὰ τὰ ἄγκη πορεία, the passage through ravines which impede motion: ἀληθεία is θεία ἄλη, divine motion. Ψεῦδος is the opposite of this, implying the constraining and reposing principle, which is expressed under the figure of sleep, τὸ εὗδον; this is disguised by the addition of ψ. Ονομο, a name, affirms the real existence of that which is sought after — ὂν οὗ μάσμα ἔστιν. Ὂν is ἰὸν, agreeably to our theory, and οὐκ ὂν is οὐκ ἰόν. "And what are ἰὸν, ῥέον, δέον?" One way of explaining them has been already suggested — they may be of foreign origin; and this is very likely the true answer. Mere antiquity may often prevent our recognizing words, after all their complications; and we must remember that however far we carry back the analysis of nouns or verbs, there must be some ultimate elements or roots which can be no further analyzed. For example; the word ἀγαθὸς was supposed by us to be a compound of ἀγαστὸς and θόος, and probably θόος may be further resolvable. But when we have arrived at the letter θ, then there is no further resolution; and possibly the words about which you are asking are like letters, original elements, and their truth or law will have to be examined according to some new method. In the attempt to find this method, I shall ask for your assistance.

All names, whether primary or secondary, are intended to show the nature of things; and the secondary, as I conceive, derive their significance from the primary. But then, how do the primary names indicate anything? And here I will ask a further question, — If we had no faculty of speech, how should we communicate with one another? Should we not use signs, like the deaf and dumb? The elevation of our hands to heaven would mean lightness — heaviness would be expressed by letting them drop to the ground. The

running of a horse, or any other animal, would be described by a similar movement of our own frames. The only way in which the body can express anything, is by imitation; and the tongue or mouth can imitate as well as the rest of the body. But this imitation of the tongue or voice is not yet a name, because people may imitate sheep or goats without naming them. What, then, is a name? In the first place, a name is not a musical, or, secondly, a pictorial imitation, but an imitation of that kind which expresses the nature of a thing; and is the invention, not of a musician, or of a painter, but of a namer.

And now, I think we may consider the names ῥοὴ, stream — ἰέναι, to go. The way to analyze them will be by going back to the letters, or primary elements of which they are composed. First we separate the alphabet into classes of letters, distinguishing the consonants, vowels, and semi-vowels; and when we have learnt them singly, we shall learn to know them in their various combinations of two or more letters; just as the painter knows how to use either a single color, which may be purple or some other color, or a combination of them. And like the painter, we may apply letters to the expression of objects, and form them into syllables; and these again into words, until the picture or figure, large and fair — that is, language — is completed. Not that I am literally speaking of ourselves, but I meant to say that this was the way in which the ancients framed language. And this leads me to consider whether the primary and secondary elements are rightly given. I may remark, as I was saying about the gods, that we can only attain to conjecture of the truth about them. But still we insist that this which we are pursuing is the true and only method of discovery; and not having this, we must have recourse, like the tragic poets, to a Deus ex machinâ, and say that God gave the first names, and therefore they are right. And this will perhaps be our best device; unless indeed we say that the barbarians are older than we are, and that we learnt of them, or that antiquity has cast a veil over the truth. Yet all these are not reasons; they are only ingenious excuses for having no reasons.

I will freely impart to you my own notions, though they are somewhat crude: The letter ρ appears to me to be the general instrument expressing all motion or κίνησις. I ought to explain that this word κίνησις was just ἴεσις, for the letter η was unknown to the ancients; and the root, κιειν, is a dialectical variety of ἰέναι: of κίνησις or εἴσις, the opposite is στάσις. The letter ρ appeared to the legislator an excellent instrument for expressing motion, as is evident in the words tremble, break, crush, crumble, and the like; he perceived that the tongue is most agitated in the pronunciation of this letter; just as he used α to express the subtle penetrating power which passes through all things. The letters φ, ψ, σ, ζ,

which require a great deal of wind, are employed in the imitation of such notions as shivering, seething, and in general of what is windy. The letters δ and τ have a notion of binding and rest in a place: the limpid movement of λ expresses smoothness, as in the words slip, sleek, sleep, and the like. But when the slipping tongue is detained by the heavier sound of γ, then arises the notion of a glutinous clammy nature: ν is sounded from within, and has a notion of inwardness: α is the expression of size; η of length; ο of roundness, and therefore there is plenty of ο in the word γόγγυλον. That is my view, Hermogenes, of the correctness of names; and now I want to hear what Cratylus would say. "But, Socrates, as I was telling you, Cratylus mystifies me; I should like to ask him, in your presence, what he means by the fitness of names?" (To this appeal, Cratylus replies "that he cannot explain that or any other subject all in a moment.") "No, but you may add little to little, as Hesiod says." Socrates here interposes his own request, that Cratylus will tell him the nature of his theory. Hermogenes and himself are mere sciolists, but Cratylus has reflected on these matters, and has had teachers. Cratylus replies in the words which Achilles uses to Ajax: "Illustrious Ajax son of Telamon, you have spoken in all things very much to my mind, whether Euthyphro, or some Muse inhabiting your own breast, was the inspirer." Socrates replies, that he is afraid of being self-deceived; there is nothing worse than self-deception, and therefore he must "look fore and aft," as the aforesaid Homer remarks; he then proceeds to confirm his own opinion by that of Cratylus. Names teach us the nature of things. "Yes." And naming is an art, and the artists are legislators, and like artists in general, some of them are better and some of them are worse than others, and give better or worse laws, and make better or worse names. Cratylus is not disposed to admit that one name is better than another; they are either true names, or they are not names at all; and when he is asked about the name of Hermogenes, who is acknowledged to have no luck in him, he affirms this to be the name of somebody else. Socrates supposes him to mean that falsehood is impossible, to which he himself is disposed to reply, that there have been liars in all ages. But Cratylus presses him with the old sophistical argument, that falsehood is saying that which is not, and therefore saying nothing; you can neither speak, say, utter, or address the word which is not. Socrates complains that this argument is too subtle for an old man like himself to understand: Suppose a person addressing Cratylus were to say, Hail, Athenian Stranger, Hermogenes! Would these words be true or false? "I should say that they would be a succession of unmeaning sounds, like the hammering of a brass pot." But you would acknowledge that names, as well as pictures, are imitations; and also that pictures may give a right or wrong representation of a

man or woman, and that names may equally give a representation true and right or false and wrong. Cratylus admits that pictures may give a true or false representation, but denies that names can. Socrates argues, that he may go up to a man and say "This is your picture," and again, he may go and say to him "This is your name" — in the one case appealing to his sense of sight, and in the other to his sense of hearing; you admit that? "Yes." Then you must admit that there is a right or a wrong assignment of names, and if of names, then of verbs and nouns; and if of verbs and nouns, then of the sentences, which are made up of them; and comparing nouns to pictures, you may give them all the appropriate sounds, or only some of them. And as he who gives all the colors makes a good picture, and he who gives only some of them, a bad or imperfect one, but still a picture; so he who gives all the sounds makes a good name, and he who gives only some of them, a bad or imperfect one, but a name still. The artist of names, that is, the legislator, may be a good or may be a bad artist. "Yes, Socrates, but the cases are not altogether parallel; for if you subtract or misplace a letter, the name ceases to be a name." Socrates admits that the number 10, if a unit is subtracted, would cease to be 10, but denies that names are of this purely quantitative nature. Let me suppose two objects: there is Cratylus and the image of Cratylus; and we will further imagine that some god makes them perfectly alike, not only in their outward form, but also in their inner nature and qualities: then there will be two Cratyluses, and not merely Cratylus and the image of Cratylus. But do you not see that an image always falls short in some degree of the original, and if images are very far from being exact counterparts, why should names be? If they were, they would be the doubles of their originals, and indistinguishable from them; and how ridiculous would this be! Cratylus admits the truth of Socrates' remark. But then Socrates rejoins, he should have the courage to acknowledge that letters may be wrongly inserted in a noun, or a noun in a sentence; and yet the noun or the sentence may retain a meaning. If we deny this, the argument will say "too late" to us, as in the story of the belated traveller in Aegina. And, errors excepted, we may still affirm that a name to be correct must have proper letters, which bear a resemblance to the thing signified. I must remind you of what Hermogenes and I were saying about the letter ῥ, which was held to be expressive of motion and hardness, as λ is of smoothness; and this you will admit to be their natural meaning. But then, why do the Eretrians call that σκληρότηρ which we call σκληρότης? We can understand one another, although the letter ῥ is not equivalent to the letter ς: Why is this? You reply, because the two letters are sufficiently alike for the purpose of expressing motion. Well, then, there is the letter λ; what business has this in a word mean-

ing hardness? "Why, Socrates, I retort upon you, that we put in and pull out words at pleasure." And the explanation of this is custom or agreement: we have made a convention that the ρ shall mean ς, and a convention may indicate by the unlike as well as by the like. How could there be names for all the numbers unless you allow that convention is used? Imitation is a poor thing, and has to be supplemented by convention, which is another poor thing, although I quite agree, that if we could always have a perfect correspondence of sound and meaning, that would be the most perfect form of language. But let me ask you what is the use and force of names? "The use of names, Socrates, is to inform, and he who knows names knows things." Do you mean that the discovery of names is the same as the discovery of things? "Yes." But do you not see that there is a degree of deception about names? He who first gave names, gave them according to his conception, and that may have been erroneous. "But then, why, Socrates, is language so consistent? all words have the same laws." Mere consistency is no test of truth. In geometrical problems, for example, there may be a flaw at the beginning, and yet the conclusion may be consistently made. And, therefore, a wise man will take especial care of first principles. But I should be surprised to find that words were really consistent; for are there not as many terms of praise which signify rest as which signify motion? There is ἐπιστήμη, which is connected with στάσις, as μνήμη is with μένω. Βέβαιον, again, is the expression of station and position; and ἱστορία is clearly descriptive of the stopping of the stream: and there are many words having a bad sense, which are connected with ideas of motion, as συμφορὰ, ἁμαρτία, etc.: ἀμαθία, again, might be explained, as ἡ ἅμα θεῷ πορεία. Thus the bad names are framed on the same principle as the good, and other examples might be given, which would favor a theory of rest rather than of motion. "Yes; but the greater number of words express motion." Are we to count them, Cratylus; and is correctness of names the voice of a majority?

Here is another point: we were saying that the legislator gives names; and we must suppose that he knows the things which he names: but how can he have learnt things from names before there were names? "I believe, Socrates, that some power more than human first gave things their names, and that these were necessarily true names." Then how came the giver of names to contradict himself, and to make some names expressive of rest, and others of motion? "I do not suppose that he did make them both." Then which did he make — those which are expressive of rest, or those which are expressive of motion? . . . . But if some names are true and others false, we can only decide between them, not by counting words, but by appealing to things. And, if so, we must

allow that things may be known without names; for names, as we have several times admitted, are the images of things; and the higher knowledge is of things, and is not to be derived from names; and though I do not doubt that the inventors of language gave names, under the idea that all things are in a state of motion and flux, I believe that they were mistaken; and that having fallen into a whirlpool themselves, they are trying to drag us after them. For is there not a true beauty and a true good, which is always beautiful and always good? Can the thing beauty be vanishing away from us while the words are yet in our mouths? And they could not be known by any one if they are always passing away — for if they are always passing away, the observer has no opportunity of knowing their state. Whether the doctrine of the flux or of the eternal nature be the truer, is hard to determine. But no man of sense will put himself, or the education of his mind, in the power of names: he will not condemn himself to be an unreal thing, nor will he believe that everything is in a flux like the water in a leaky vessel, or that the world is a man who has a running at the nose. This doctrine may be true, Cratylus, but is also very likely to be untrue; and therefore I would have you reflect while you are young, and find out the truth, and when you know come and tell me. "I have thought, Socrates, and after a good deal of thinking I incline to Heraclitus." Then another day, my friend, you shall give me a lesson. "Very good, Socrates, and I hope that you will continue to study these things yourself."

We may now consider, I. how far Plato in the Cratylus has discovered the true principles of language, and then, II. proceed to compare the anticipations of his genius with the views maintained in modern times by W. Humboldt, Grimm, and other masters of the science of language.

1. Plato is aware that language is not the work of chance; nor does he deny that there is a natural fitness in names. He only insists that this natural fitness shall be intelligibly explained. But he has no idea that language is a natural organism. He would have heard with surprise that languages are the common work of whole nations in a primitive or semi-barbarous age. How, he would probably have argued, could men devoid of art have contrived a structure of such complexity? No answer could have been given to this question, either in ancient or in modern times, until the nature of primitive antiquity had been thoroughly studied, and the instincts of man had been shown to exist in greater force, when his state approaches more nearly to that of children or animals. The philosophers of the last century, after their manner, would have

vainly endeavored to trace the process by which proper names were converted into common, and would have shown how the last effort of abstraction invented prepositions and auxiliaries. The theologian would have proved that language must have had a divine origin, because in childhood, while the organs are pliable, the intelligence is wanting, and when the intelligence is able to frame conceptions, the organs are no longer able to express them. Or, as others have said: Man is man because he has the gift of speech; and he could not have invented that which he is. But this would have been an "argument too subtle" for Socrates (429 D), who rejects the theological account of the origin of language "as an excuse for not giving a reason," which he compares to the introduction of the "*Deus ex machinâ*," by the tragic poets when they have to solve a difficulty; thus anticipating many modern controversies in which the primary agency of the Divine Being is confused with the secondary cause; and God is assumed to have worked a miracle in order to fill up a lacuna in human knowledge. (Cp. Timaeus, p. 46.)

Neither is Plato wrong in supposing that an element of design and art enters into language. The creative power abating is supplemented by a mechanical process. "Languages are not made but grow," but they are made as well as grow; bursting into life like a plant or a flower, they are also capable of being trained and improved and engrafted upon one another. The change in them is effected in earlier ages by musical and euphonic improvements, in later ages by the influence of grammar and logic, and by the poetical and literary use of words. They develop rapidly in childhood, and when they are full grown and set, they may still put forth intellectual powers, like the mind in the body; or rather we may say that the nobler use of language only begins when the frame-work is complete. The savage or primitive man, in whom the natural instinct is strongest, is also the greatest improver of the forms of language. He is the poet or maker of words, as in civilized ages the dialectician is the definer or distinguisher of them. The latter calls the second world of abstract terms into existence, as the former has created the picture sounds which represent natural objects or processes. Poetry and philosophy — these two, are the two great formative principles of language, when they have passed their first stage, of which, as of the first invention of the arts in general, we only entertain conjecture. And mythology is a link between them, connecting the visible and invisible, until at length the sensuous exterior falls away, and the severance of the inner and outer world, of the idea and the object of sense, becomes complete. At a later period, logic and grammar, sister arts, preserve and enlarge the decaying instinct of language, by rule and method, which they gather from analysis and observation.

2. There is no trace in any of Plato's writings that he was acquainted with any language but Greek. Yet he has conceived very truly the relation of Greek to foreign languages, which he is led to consider, because he finds that many Greek words are incapable of explanation. Allowing a good deal for accident, and also for the fancies of the "*conditores linguae Graecae*," there is an element of which he is unable to give an account. These unintelligible words he supposes to be of foreign origin, and to have been derived from a time when the Greeks were either barbarians, or in close relations to the barbarians. Socrates is aware that this principle is liable to great abuse; and, like the "*Deus ex machinâ*," explains nothing. Hence he excuses himself for the employment of such a device, and remarks that in foreign words there is still a principle of correctness, which applies equally both to Greeks and barbarians.

3. But the greater number of primary words do not admit of derivation from foreign languages; they must be resolved into the letters out of which they are composed, and therefore the letters must have a meaning. The framers of language were aware of this; they observed that α was adapted to express size; η length; ο roundness; ν inwardness; ρ rush or roar; λ liquidity; γλ the detention of the liquid or slippery element; δ and τ binding; φ, ψ, σ, ξ, wind and cold, and so on. Plato's analysis of the letters of the alphabet shows a wonderful insight into the nature of language. He does not expressly distinguish between mere imitation, and the symbolical use of sound to express thought; but he recognizes in the examples which he gives both modes of imitation. Gesture is the mode which a deaf and dumb person would take of indicating his meaning. And language is the gesture of the tongue, and in the use of the letter ρ, to express a rushing or roaring, or of ο to express roundness, there is a direct imitation; while in the use of the letter α to express size, or of η to express length, the imitation is symbolical. The use of analogous or similar sounds, in order to express similar or analogous ideas, with or without imitation, has escaped him.

In passing from the gesture of the body to the movement of the tongue, Plato makes a great step in the physiology of language. He was probably the first who said that "Language is imitative sound," which is the greatest and deepest truth of philology; although he is not aware of the laws of euphony and association by which imitation must be regulated. He was probably also the first who made a distinction between simple and compound words, a truth second only in importance to that which has just been mentioned. His great insight in one direction curiously contrasts with his blindness in another; for he appears to be wholly unaware (cp. his derivation of ἀγαθὸς from ἀγαστὸς and θοὸς) of the difference between the root and termination. But we must recollect that he was necessarily

more ignorant than any school-boy of Greek grammar, and had no table of the inflexions of verbs and nouns before his eyes, which might have suggested to him the distinction.

4. Plato distinctly affirms that language is not truth, or "*philosophie une langue bien faite.*" At first, Socrates has delighted himself with discovering the flux of Heraclitus in language. But he is covertly satirizing the pretense of that or any other age to find philosophy in words; and he afterwards corrects any erroneous inference which might be gathered from his experiment. For he finds as many, or almost as many, words expressive of rest, as he had previously found expressive of motion. And even if this had been otherwise, who would learn of words when he might learn of things? There is a great controversy and high argument between Heracliteans and Eleatics, but no man of sense would commit his soul in such inquiries to the imposers of names. . . . . In this and other passages Plato shows that he is as completely emancipated from the influence of "Idols of the tribe" as Bacon himself.

The lesson which may be gathered from words is not metaphysical or moral, but historical. They teach us the affinity of races, they tell us something about the association of ideas, they occasionally preserve the memory of a disused custom; but we cannot safely argue from them about right and wrong, matter and mind, freedom and necessity, or the other problems of moral and metaphysical philosophy. For the use of words on such subjects may be metaphorical, accidental, transferred from other languages, and have no relation to the contemporary state of thought and feeling. Because there is or is not a name for a thing, we cannot argue that the thing has or has not an actual existence; or that the antitheses, parallels, conjugates, correlatives of language have anything corresponding to them in nature. The greatest lesson which the philosophical analysis of language teaches us is, that we should be above language, making words our servants, and not allowing them to be our masters.

Plato does not add the further observation, that the etymological meaning of words is in process of being lost. If at first framed on a principle of intelligibility, they would gradually cease to be intelligible, like those of a foreign language. He is willing to admit that they are subject to many changes, and put on many disguises. He acknowledges that the "poor creature" imitation is always being supplemented by another "poor creature," — convention. But he does not see that "habit and repute," and their relation to other words, are always exercising an influence over them. Words appear to be isolated, but they are really the parts of an organism which is always being reproduced. They are refined by civilization, harmonized by poetry, emphasized by literature, technically applied in philosophy and art; they are used as symbols on the border-ground of human knowledge; they receive a fresh impress from individual

genius, and come with a new force and association to every lively-minded person. They are fixed by the simultaneous utterance of millions, and yet are always imperceptibly changing; not the inventors of language, but writing and speaking, and particularly great writers, or works which pass into the hearts of nations, Homer, Shakespeare, Dante, the German or English Bible, are the makers of them in later ages. They carry with them the faded recollection of their own past history; the use of a word in a striking and familiar passage, gives a complexion to its use everywhere else, and the new use of an old and familiar phrase has also a peculiar power over us. But these and other subtleties of language escaped the observation of Plato. He is not aware that the languages of the world are organic structures, and that every word in them is related to every other; nor does he conceive of language as the joint work or communion of the speaker and the hearer, requiring in man a faculty not only of expressing his thoughts but of understanding those of others.

On the other hand, he cannot be justly charged with a desire to frame language on artificial principles. Philosophers have sometimes dreamed of a technical or scientific language, in which words should have fixed meanings, and stand in the same relation to one another as the substance which they denote. But there is no more trace of this in Plato than there is of a language corresponding to the ideas; nor, indeed, could the want of such a language be felt until the sciences were far more developed. Those who would extend the use of technical language beyond the limits of science or of custom, seem to forget that freedom and suggestiveness and the play of association are essential characteristics of language. The great master has shown how he regarded pedantic distinctions of words, or attempts to confine their meaning, in the satire on Prodicus in the Protagoras.

On the whole the Cratylus seems to contain deeper truths about language than any other ancient writing. But feeling the uncertain ground upon which he is walking, and partly in order to preserve the character of Socrates, Plato envelopes the whole subject in a robe of fancy, and allows his principles to drop out as if by accident.

II. What is the result of recent speculations about the origin and nature of language? Like other modern metaphysical inquiries, they end at last in a statement of facts. But, in order to state or understand the facts, a metaphysical insight seems to be required. There are more things in language than the human mind easily conceives. And many fallacies have to be dispelled, as well as observations made. The true spirit of philosophy or metaphysics can alone charm away metaphysical illusions, which are always reappearing, formerly in the fancies of Neoplatonist writers, now in the disguise of experience and common sense.

But we must end where we began, with historical investigation. Philosophy has deepened and widened the question, but for the answer we come back to facts. Philosophy has enabled us to conceive in language opposite and contrasted elements, of the individual and the nation, of the past and present, of the speaker and the hearer, of the inward and the outward, of the subject and the object, of the notional and relational, of the root or unchanging part of the word and of the changing inflection, of the vowel and the consonant, of the quantity and the accent. Philosophy has taught us to apprehend the identity of speech and thought, and the adaptation of sounds to conceptions. Philosophy has made us observe that words are universal notions which combine into particulars, and that they are the fragments and not the elements of the original speech of man, taken out of the first rude agglomeration of sounds, that they may be replaced in a higher and more logical order. Philosophy has shown us that language is half dead, half alive, half solid, half fluid; the breath of a moment, yet like the air continuous in all ages and countries — the trickling stream which has deposited fossil strata. Philosophy has enabled us to understand that the oldest languages now in existence may be, and probably are, immeasurably removed from the beginnings of human speech. Philosophy has taught us to apprehend the difference between the conscious and unconscious, the individual and collective, action of the human mind. Philosophy has made us aware of the power of natural selection or persistency of the stronger, in the world of language, as in the other realms of nature, and of the mighty effects which may be worked by the action of small causes continued during infinite ages. These wide generalizations suggest many thoughts to us about the powers of the mind, and the forces and influences by which the first efforts of men to utter articulate words were inspired or hindered. Yet, in the metaphysical analysis of language, there are also dangers to which we are exposed. 1. There is the confusion of ideas with facts — of mere possibilities and modes of conception and figures of speech with actual and definite knowledge. 2. There is the fallacy of resolving the language which we know into its parts, and imagining that we have explained the origin of languages by reconstructing them. 3. There is the danger of giving language a purely independent existence, as though in itself an intelligent power, like the reason of God or man, or as the mere expression of some universal nature — the speech of God. 4. There is the danger of identifying language, not with thoughts or representations, but with ideas. 5. There is the error of conceiving that the analysis of grammar and logic has always existed; that the differences, for example, between proper and common nouns, or between declinable and indeclinable parts of speech, or between articulate and inarticulate language, were familiar to Socrates and Plato. 6. There is the fallacy of ex-

aggerating the interval which separates the cries of animals and the speech of man, the instinct of animals and the reason of man. 7. There is the general fallacy which besets all inquiries into the early history of the mind, — that of interpreting the past by the present, and of substituting the definite and intelligible tradition for the true but dim outline which is the real horizon of human knowledge.

The greatest light is thrown upon the nature of language by analogy. We have the analogy of the cries of animals, of the songs of birds ("man, like the nightingale, is a singing bird, but is ever binding up thoughts with musical notes"), of music, of children learning to speak, of barbarous nations in which the linguistic instinct is still undecayed, of ourselves learning to think and speak a new language, of the deaf and dumb who have words without sounds; and we have the aftergrowth of mythology, which, like language, is an unconscious creation of the human mind. We can observe the physiological cause or instrument of language; we can note the probable effects of metre and writing on language, and at a later period of grammar and logic and philosophical abstraction. We can trace the impulse to bind together the world, beginning in the first efforts to speak, and culminating in philosophy. But there remains an element which cannot be explained, or even adequately described. We can understand how man creates or constructs consciously and by design; and see if we do not understand how nature, by a law, calls into being an organized structure. But the intermediate organism which stands between man and nature, which is the work of mind yet unconscious, and in which mind and matter seem to meet, and mind unperceived to herself is really limited by all other minds, is neither understood nor seen by us, and is with reluctance admitted to be a fact. The social and collective instincts of animals offer a certain degree of parallel, but are equally incomprehensible to us.

Language is an aspect of man, of nature, and of nations, the transfiguration of the world in thought, the meeting-point of the physical and mental sciences, and also the mirror in which they are reflected, an effect and partly a cause of our common humanity, present at every moment to the individual, and yet having a sort of eternal or universal existence. When we reflect on our own minds, we find words everywhere in every degree of clearness and consistency, fading away in dreams and more like pictures, rapidly succeeding one another in our waking thoughts, attaining a greater distinctness and consecutiveness in speech, and a greater still in writing, taking the place of one another when we try to become emancipated from their influence. For in all processes of the mind which are conscious we are talking to ourselves; the attempt to think without words is a mere illusion, — they are always reappearing when we fix our thoughts. And speech is not a separate fac-

ulty, but the expression of all our faculties, to which all our other powers of expression, signs, looks, gestures, lend their aid. The art of speaking appears to be one of the simplest of natural operations, unless through the accident of some defect of utterance we are made aware of the endless complexity of the process. And the mental act which corresponds to a single word is too subtle and momentary to admit of any further analysis.

The minds of men are sometimes carried on to think of their lives and of their actions as links in a chain of causes and effects going back to the beginning of time. A few have seemed to lose the sense of their own individuality in the universal cause or nature. In like manner we might think of the words which we daily use, as derived from the first speech of man, and of all the languages in the world, as the expressions or varieties of a single force or life of language of which the thoughts of men are the accident. Such a conception enables us to grasp the power and wonder of languages, and is very natural to the scientific philologist. For he, like the metaphysician, believes in the reality of that which absorbs his own mind. Nor do we deny the enormous influence which language has exercised over thought. Fixed words like fixed ideas have often governed the world. But in such representations we attribute to language too much the nature of a cause, and too little of an effect, — too much of an absolute, too little of a relative character, — too much of an ideal, too little of a matter-of-fact existence.

Or again, we may frame a single abstract notion of language of which all existing languages may be supposed to be the perversion. But we must not conceive that this logical figment had ever a real existence, or is anything more than an effort of the mind to give unity to infinitely various phenomena. There is no abstract language "*in rerum natura*," any more than there is an abstract tree, but only languages in various stages of growth, maturity, and decay. Nor do other logical distinctions or even grammatical, exactly correspond to the facts of language, for they too are attempts to give unity and regularity to a subject which is partly irregular.

We find, however, that there are distinctions of another kind by which this vast field of language admits of being mapped out. There is the distinction between biliteral and triliteral roots, and the various inflections which accompany them; between the mere mechanical cohesion of sounds or words, and the "chemical" combination of them into a new word; there is the distinction between languages which have had a free and full development of their organisms, and languages which have been stunted in their growth, — lamed in their hands or feet, and never able to acquire afterwards the powers in which they are deficient; there is the distinction between synthetical languages like Greek and Latin, which have retained their inflections, and analytical languages like

English or French, which have lost their inflections. Innumerable as are the languages and dialects of mankind, there are comparatively few classes to which they can be referred.

Another road through this chaos is provided by the physiology of speech. The organs of language are the same in all mankind, and are only capable of uttering a certain number of sounds. Every man has tongue, teeth, lips, palate, throat, mouth, which he may close or open, and adapt in various ways; making, first, vowels and consonants; and secondly, other classes of letters. The elements of all speech, like the elements of the musical scale, are few and simple, though admitting of infinite gradations and combinations. Whatever slight differences exist in the use or formation of these organs, owing to climate or the sense of euphony or other causes, they are as nothing compared with their agreement. Here then is a real basis of unity in the study of philology, unlike that imaginary abstract unity of which we were just now speaking.

In the psychological, or historical, or physiological study of language, we may find an inexhaustible mine of inquiry into facts. But we hardly seem to make any nearer approach to the secret of the origin of language, which like some of the other great secrets of nature — the origin of birth and death, or of animal life — remains inviolable. The comparison of children learning to speak, of barbarous nations, of musical notes, of the cries of animals, affords great assistance in the analysis of languages, but throws no light upon their first origin. That problem seems to be indissolubly bound up with the origin of man; and, if we ever know more of the one, we may expect to know more of the other.[1]

[1] Compare W. Humboldt, *Ueber die Verschiedenheit des menschlichen Sprachbaues*, and M. Müller, *Lectures on the Science of Language*.

CRATYLUS.

PERSONS OF THE DIALOGUE.

SOCRATES, HERMOGENES, CRATYLUS.

Her. SUPPOSE that we make Socrates a party to the argument? 383

Cratylus. If you please.

Her. I must inform you, Socrates, that Cratylus has been arguing about names; he says that they are natural and not conventional, not sounds which men, giving articulation to a portion of their voice, agree to utter; but that there is a truth or correctness in them, which is the same for Hellenes as for barbarians. Whereupon I ask him, whether his own name of Cratylus is a true name or not, and he answers "Yes." And Socrates? "Yes." Then every man's name, as I tell him, is that which he is called. To this he replies, — "If all the world were to call you Hermogenes, that would not be your name." And when I am anxious to have a further explanation he is 384 ironical and mysterious, and seems to imply that he has a notion in his own mind, if he would only tell, and could entirely convince me, if he chose to be intelligible. Tell me, Socrates, what this oracle means; or rather tell me, if you will be so good, what is your own view of the truth or correctness of names, which I would far sooner hear.

Socrates. Son of Hipponicus, there is an ancient saying, that "hard is the knowledge of the good." And the knowledge of names is a great part of knowledge. If I had not been poor, I might have heard the fifty drachma reading of the great Prodicus, which is a complete education in grammar and language — these are his own words — and then I should have been at once able to answer your question about the correctness of names.

But, indeed, I have only heard the single drachma course, and, therefore, I do not know the truth about such matters; I will, however, gladly assist you and Cratylus in the investigation of them. When he declares that your name is not really Hermogenes, I suspect that he is only making fun of you; he means to say that you are no true son of Hermes, because you are always looking after a fortune and never in luck. But as I was saying, there is a great deal of difficulty in this sort of knowledge, and therefore we had better have a council and hear both sides.

Her. I have often talked over this matter, both with Cratylus and others, and cannot convince myself that there is any principle of correctness in names other than convention and agreement; any name which you give, in my judgment is the right one, and if you change that and give another, the new name is as correct as the old: we frequently change the names of our slaves, and the newly-imposed name is as good as the old: for there is no name given to anything by nature; all is convention and habit of the users; that is my view. But if I am mistaken I shall be happy to hear and learn of Cratylus, or of any one.

385 *Soc.* I dare say that you may be right, Hermogenes; let us see: Your meaning is, that the name of each thing is only that name which is given to each thing?

Her. That is my view.

Soc. Whether the giver of the name be an individual or a city?

Her. Yes.

Soc. Well, now, let me take an instance: Suppose that I call a man a horse or a horse a man, you mean to say that a man will be rightly called a horse by me individually, and rightly called a man by the rest of the world; and a horse again would be rightly called a man by me and a horse by the world: that is your meaning?

Her. Yes, that is my view.

Soc. But how about truth, then? you would acknowledge that there is in words a true and a false?

Her. Certainly.

Soc. Which is contained in propositions?

Her. To be sure.

Soc. And that is a true proposition which says that which is, and that is a false proposition which says that which is not?

Her. Yes.

Soc. Then in a proposition there is a true and false?

Her. Certainly.

Soc. But is a proposition true as a whole only, and are the parts untrue?

Her. No; the parts are true as well as the whole.

Soc. Would you say the large parts and not the smaller ones, or every part?

Her. I should say that every part is true.

Soc. Is a proposition resolvable into any part smaller than a name?

Her. No; that is the smallest.

Soc. Then the name is a part of the true proposition?

Her. Yes.

Soc. Yes, and a true part, as you say.

Her. Yes.

Soc. And is not the part of a falsehood also a falsehood?

Her. Yes.

Soc. Then, if propositions may be true and false, names may be true and false?

Her. That is the inference.

Soc. And the name of anything is that which any one affirms to be the name?

Her. Yes.

Soc. And will there be as many names as are given by any one? and will they be the true names at the time of giving them?

Her. Yes, Socrates, that is the only correctness of names which I can imagine; I may have one name which I give, and you may have another which you give — that is all; and in different cities and countries there are different names for the same things: Hellenes differ from barbarians in their use of names, and the several Hellenic tribes from one another.

Soc. But would you say, Hermogenes, that the things differ as the names differ? and are they relative to individuals, as Protagoras tells us? For he says that man is the 386
measure of all things, and that things are to me as they appear to me, and that they are to you as they appear to you. Do you agree with him, or would you say that things have a permanent essence of their own?

Her. There have been times, Socrates, when I have been driven in my perplexity to take refuge with Protagoras; not that I agree with him at all.

Soc. What! have you ever been driven to admit that there was no such thing as a bad man?

Her. No, indeed; but I have often had reason to think that there are very bad men, and a goed many of them.

Soc. Well, and have you ever found any very good ones?

Her. Not many.

Soc. Still you have found them?

Her. Yes.

Soc. And would you hold that the very good were the very wise, and the very evil very foolish? Would that be your view?

Her. Yes; that would be my view.

Soc. But if Protagoras is right, and the truth is that things are as they appear to any one, how can some of us be wise and some of us foolish?

Her. Impossible.

Soc. But admitting the existence of wisdom and folly, you will allow, I think, that the assertion of Protagoras can hardly be correct. For if what appears to each man is true to him, one man cannot in reality be wiser than another.

Her. He cannot.

Soc. Nor will you be disposed to say with Euthydemus, that all things equally belong to all men at the same moment and always; for neither on that view can there be some good and others bad, if virtue and vice are always equally to be attributed to all.

Her. That is true.

Soc. But if they are both wrong, — and things are not relative to individuals, and all things do not equally belong to all, at the same moment and always, — they must be supposed to have their own proper and permanent essence: they are not in relation to us, or influenced by us — fluctuating according to our fancy, but they are independent, and maintain to their own essence the relation prescribed by nature.

Her. I think, Socrates, that this is the truth.

Soc. Does this apply only to the things themselves, or to the actions which proceed from them? Are not their actions also a class of being?

Her. Yes, the actions are real as well as the things.

387 *Soc.* Then the actions also are done according to their proper nature, and not according to our opinion of them? In cutting, for example, we do not cut as we please, and with

any chance instrument; but I mean to say that we cut with the proper instrument only, and according to the natural process of cutting; and the natural process is right and will succeed, but any other will fail and be of no use at all.

Her. I should say that the natural way is the right way.

Soc. Again, in burning, not every way is the right way; but the right way is the natural way, and the right instrument the natural instrument.

Her. True.

Soc. And this holds good of all actions?

Her. Yes.

Soc. And speech is a kind of action?

Her. True.

Soc. And will a man speak correctly who speaks as he pleases? Will not the successful speaker rather be he who speaks in the natural way of speaking, and as things ought to be spoken, and with the natural instrument? Any other mode of speaking will result in failure and error.

Her. The second of the two ways will be the right way.

Soc. And is not naming a part of speaking? for in giving names men speak.

Her. That is true.

Soc. And if speaking is a sort of action and concerned with acts, is not naming also a sort of action?

Her. True.

Soc. And we saw that actions were not relative to ourselves, but had a special nature of their own?

Her. Precisely.

Soc. Then names ought to be given according to a natural process, and with a proper instrument, and not at our pleasure; this is the inevitable conclusion from what has preceded; in this and no other way shall we name with success.

Her. That seems to me true.

Soc. But again, that which has to be cut has to be cut with something?

Her. Yes.

Soc. And that which has to be woven or pierced has to be woven or pierced with something?

Her. Certainly.

Soc. And that which has to be named has to be named with something?

Her. That is true.

Soc. What is that with which we pierce?

Her. An awl.

388 *Soc.* And with which we weave?

Her. A shuttle.

Soc. And with which we name?

Her. A name.

Soc. Very good: then a name is an instrument?

Her. Very true.

Soc. But suppose that I ask, "What is a shuttle?" And you answer, "A weaving instrument."

Her. Very good.

Soc. And I ask again, "What do we do when we weave?" The answer is, that we separate or disengage the warp from the woof.

Her. Very true.

Soc. And may not the same be said of an awl, and of instruments in general?

Her. To be sure.

Soc. And now suppose that I ask a similar question about names: will you answer that? Regarding the name as an instrument, what do we do when we name?

Her. I cannot answer.

Soc. Do we not teach one another something, and distinguish things according to their natures?

Her. That is very true.

Soc. Then a name is an instrument of teaching and of distinguishing natures, as the shuttle is of distinguishing the threads of the web?

Her. Yes.

Soc. And the shuttle is the instrument of the weaver?

Her. Assuredly.

Soc. Then the weaver will use the shuttle well — and well means like a weaver; and the teacher will use the name well — and well means like a teacher?

Her. Yes.

Soc. And when the weaver uses the shuttle, whose work will he be using well?

Her. That of the carpenter.

Soc. And is every man a carpenter, or the skilled only?

Her. Only the skilled.

Soc. And when the piercer uses the awl, whose work will he be using well?

Her. That of the smith.

Soc. And is every man a smith, or only the skilled?

Her. The skilled only.

Soc. And when the teacher uses the name, whose work will he be using?

Her. There, again, I am puzzled.

Soc. Cannot you tell me who gives us the names which we use?

Her. Indeed I cannot.

Soc. Does not the law seem to you to give us them?

Her. Yes, that is so, I suppose.

Soc. Then the teacher, when he gives us a name, uses the work of the legislator?

Her. I assent to that.

Soc. And is every man a legislator, or the skilled only?

Her. The skilled only.

Soc. Then, Hermogenes, not every man is able to give a name, but only a maker of names; and this is the legislator, who of all skilled artisans in the world is the rarest. 389

Her. That is true.

Soc. And how does the legislator make names? and to what does he look? Consider this in the light of the previous instances: to what does the carpenter look in making the shuttle? Does he not look to some sort of natural or ideal shuttle?

Her. Certainly.

Soc. And suppose the shuttle to be broken in making, will he make another, looking to the broken one? or will he look to the form which he had in his mind when he made the other?

Her. To the latter, I should imagine.

Soc. Might not that be justly called the true or ideal shuttle?

Her. I should say "Yes" to that.

Soc. And whatever shuttles are wanted, for the manufacture of garments, thin or thick, of woolen, flaxen, or other material, the ideal ought to contain them all; and whatever is the nature best adapted to each kind of work, ought to be the nature which the maker introduces into each sample of his own work.

Her. Yes.

Soc. And the same holds of other instruments: when a man has discovered the instrument which is naturally adapted to each work, he must take care to introduce that into the material of which he makes his work, and in the natural form, not in

some other which he fancies; for example, he ought to know how to put into iron the forms of awls, which are adapted by nature to their several works.

Her. Certainly.

Soc. And how to put into wood the proper or natural form of a shuttle?

Her. True.

Soc. For the several forms of shuttles naturally answer to the several kinds of webs; and this is true of instruments in general.

Her. Yes.

Soc. Then, as to names: ought not our legislator also to know how to put the true natural name into sounds and syllables, and to make and give all names with a view to the ideal name, if he is to be a namer in any true sense? And if different legislators do not use the same syllables, that is quite intelligible. For neither does every smith, although he may be making the same instrument for the same purpose, make them all of the same iron. The form must be the same, but the ma-
390 terial may vary, and still the instrument may be equally good of whatever iron made, whether in Hellas or in a foreign country; that makes no difference.

Her. Very true.

Soc. And the legislator, whether he be Hellene or barbarian, is not to be deemed by you a worse legislator for that, provided he gives the true and proper form of the name in whatever syllables; this place or any other makes no matter.

Her. Quite true.

Soc. But who then is to determine whether the proper form of the shuttle is given in any sort of wood? the carpenter who makes, or the weaver who is to use them?

Her. I should say, that he who is to use them ought to know, Socrates.

Soc. And who uses the work of the lyre-maker? Will not he be the man who knows how to direct what is being done, and who will know also whether the work is being well done or not?

Her. Certainly.

Soc. And who is he?

Her. The player of the lyre.

Soc. And who will direct the shipwright?

Her. The pilot.

Soc. And who will be best able to direct the legislator in his work, and will know whether the work is well done, in this or any other country? Will not the user be the man?

Her. Yes.

Soc. And this is he who knows how to ask questions?

Her. Yes.

Soc. And how to answer them?

Her. Yes.

Soc. And him who knows how to ask and answer you would call a dialectician?

Her. Yes; that would be the name of him.

Soc. Then the work of the carpenter is to make a rudder, and the pilot has to direct him, if the rudder is to be well made?

Her. True.

Soc. And the work of the legislator is to give names, and the dialectician must be his director if the names are to be rightly given?

Her. That is true.

Soc. Then, Hermogenes, I should say that this giving of names can be no such light matter as you fancy, or the work of light or chance persons; and Cratylus is right in saying that things have names by nature, and that not every man is an artificer of names; but he only who looks to the name which each thing by nature has, and is, will be able to express the ideal forms of things in letters and syllables.

Her. I cannot answer you, Socrates; but I find a difficulty in changing my opinion all in a moment; and I think that 391
I should be more readily persuaded, if you would show me what this is which you term the natural fitness of names.

Soc. My good Hermogenes, I have none to show. Was I not telling you just now (but you have forgotten), that I knew nothing, and proposing to share the inquiry with you? But now that you and I have talked over the matter, a step has been gained; for we have discovered that the name has by nature a truth, and that not every man knows how to give a thing a name.

Her. Very good.

Soc. And what is the nature of this truth or correctness of names? That, if you care to know, is the next question.

Her. But I do care to know.

Soc. Then reflect.

Her. How shall I reflect?

Soc. The true way is to have the assistance of those who know, and you must pay them well in money and not merely in thanks; these are the Sophists of whom your brother, Callias, has — rather dearly — bought the reputation of wisdom. But you have not yet come into your inheritance, and therefore you had better go to him, and beg and entreat him to tell you what he has learnt from Protagoras about the fitness of names.

Her. But how inconsistent should I be, if, whilst repudiating Protagoras and his truth, I were to attach any value to what he and his book affirm!

Soc. Then if you despise him, you must learn of Homer and the poets.

Her. And where does Homer say anything about names, and what does he say?

Soc. He often speaks of them; notably and nobly in places in which he distinguishes the different names which gods and men give to the same things. Does he not, in these passages, bear a marvelous testimony to the correctness of names? For the gods must clearly be supposed to call things by their right and natural names; do you not think that?

Her. Why, of course they call them rightly, if they call them at all. But to what are you referring?

Soc. Do you not know what he says about the river in Troy who had a single combat with Hephaestus?

"Whom," as he says, "the gods call Xanthus, and men call Scamander."

Her. I remember.

392 *Soc.* Well, and about this river — to know that he ought to be called Xanthus, — is not that a solemn lesson? Or about the bird which, as he says, —

"The gods call Chalcis, and men Cymindis:"

to be taught how much more correct the name Chalcis is than the name Cymindis, — do you deem that a light matter? There is also the hill, which "men call Batiea, and the immortals Myrina's tomb." And there are many other observations of the same kind in Homer and other poets. Now, I think that this is beyond the understanding of you and me; but the names of Scamandrius and Astyanax, which he affirms to have been the names of Hector's son, are more within the range of human faculties, as I am disposed to think; and what the poet means by correct

ness may be more readily apprehended in that instance; I dare say that you remember the lines to which I refer.

Her. I do.

Soc. Let me ask you, then, which did Homer think the more correct of the names given to Hector's son — Astyanax or Scamandrius?

Her. I do not know.

Soc. Look at the matter thus: Are the wise or the unwise more likely to give correct names?

Her. The wise, of course.

Soc. And suppose you were to be asked whether the men or the women of a city, taken as a class, are the wiser?

Her. I should say, the men.

Soc. And Homer, as you know, says that the Trojans (in the masculine gender) called him Astyanax; but if the men called him Astyanax, the other name of Scamandrius could only have been given to him by the women.

Her. That may be inferred.

Soc. And must not Homer have imagined the Trojans to be wiser than their wives?

Her. To be sure.

Soc. Then he must have thought that Astyanax was a more correct name for the boy than Scamandrius?

Her. That is clear.

Soc. And what is the reason of this? Let us consider: does he not himself suggest a very good reason, when he says, —

"For he alone defended their city and long walls?"

This appears to be a good reason for calling the son of the savior, king of the city which his father was saving, as Homer observes.

Her. I see.

Soc. Why, Hermogenes, I do not as yet see myself; and do you.

Her. No, indeed.

Soc. But, tell me, friend, did not Homer himself also 393
give Hector a name?

Her. What of that?

Soc. That name appears to me to be very nearly the same as the name of Astyanax — both are Hellenic; and a king (ἄναξ) and a holder (ἕκτωρ) have nearly the same meaning, and are both descriptive of a king; for a man is clearly the holder of that of

which he is king; he rules, and owns, and holds that. But, perhaps, you do not understand me; and I think that I am very likely mistaken in supposing myself to have found some indication of the opinion of Homer about the correctness of names.

Her. I assure you that I think otherwise, and that I believe you to be on the right track.

Soc. There is reason, I think, in calling a lion's whelp a lion, and the foal of a horse a horse; I am speaking only of the ordinary course of nature, when an animal produces after his kind,[1] and not of extraordinary births; if, contrary to nature, a horse have a calf, then I should not call that a foal but a calf; nor do I call any inhuman birth a man, but only a natural birth. And the same may be said of trees and other things. Do you agree to that?

Her. Yes, I agree.

Soc. Very good. But you had better watch me and see that I do not play tricks with you. For on the same principle the son of a king is to be called a king. And whether the syllables of the name are the same or not the same, that makes no difference, provided the meaning is retained; nor does the addition or subtraction of a letter make any difference so long as the essence of the thing remains in possession, and appears in the name.

Her. What do you mean?

Soc. A very simple matter. I may illustrate my meaning by the names of letters, which you know are not the same as the letters themselves, with the exception of the four, ε, υ, ο, ω; the names of the other letters, whether vowels or consonants, are made up of letters which we attach to them; but so long as we introduce the meaning of the letter, and there can be no mistake, the name which indicates the letter is quite correct. Take, for example, the letter *beta* — the addition of η, τ, α, gives no offense, and does not prevent the whole name from having the value which the legislator intended — so well did he know how to give the letters names.

Her. There is truth in that.

394 *Soc.* And may not the same be said of a king? a king will often be the son of a king, the good son or the noble son of a good or noble sire, each after his kind; and the offspring of every kind, when in the course of nature, is like the parent, and therefore has the same name. Yet the syllables may be disguised until they appear different to the ignorant

[1] Reading οὗ ἄν.

person, and he may not recognize them, although they are the same, just as any one of us would not recognize the same drugs under different disguises of color and smell, although to the physician, who regards the power of them, they are the same, and he is not put out by the addition; and in like manner the etymologist is not put out by the addition or transposition or subtraction of a letter or two, or indeed of all the letters, for this need not interfere with the meaning. As was just now said, the names of Hector and Astyanax have only one letter alike, which is the ρ, and yet they have the same meaning. And how little in common with their letters has Archepolis (ruler of the city) — and yet the meaning is the same. And there are many other names which just mean "king." Again, there are several names for a general, as, for example, Agis (leader) and Polemarchus (chief in war) and Eupolemus (good warrior); and others which denote a physician, as Iatrocles (famous healer) and Acesimbrotus (curer of mortals); and there are many others which might be cited, differing in their syllables and letters, but having the same meaning. You admit that.

Her. Yes.

Soc. The same names, then, ought to be assigned to those who follow in the course of nature?

Her. Yes.

Soc. And what of those who follow out of the course of nature, and are prodigies? for example, when a good and religious man has an irreligious son, he ought to bear the name not of his father, but of the class to which he belongs, just as in the case which was before supposed of a horse foaling a calf.

Her. Quite true.

Soc. Then the irreligious son of a religious father should be called irreligious?

Her. That is true.

Soc. He should not be called Theophilus (beloved of God) or Mnesitheus (mindful of God), or any of these names: if names are correctly given, his should have an opposite meaning.

Her. Certainly, Socrates.

Soc. Again, Hermogenes, the name of Orestes (the man of the mountains) is quite right; whether chance gave the name, or perhaps some poet who meant to express the brutality and fierceness and mountain wildness of his hero's nature. 395

Her. That is very likely, Socrates.

Soc. And his father's name is also according to nature.

Her. That seems to be true.

Soc. Yes, for as is his name, so also is his nature; Agamemnon (admirable for remaining) is one who is patient and persevering in the accomplishment of his resolves, and by his virtue crowns them; and the proof of this is the continuance of his purpose and of the host at Troy.[1] I have told you the meaning of the name Agamemnon; and I think that Atreus is rightly called, for his murder of Chrysippus and his exceeding cruelty to Thyestes are damaging and destructive to his reputation; the name is a little altered and disguised so as not to be intelligible to every one, but to the etymologist there is no difficulty in seeing the meaning; for whether you think of him as ἀτειρὴς the stubborn, or as ἄτρεστος the fearless, or as ἀτηρὸς the destructive one, the name is perfectly correct in every point of view. And I think that Pelops is also named appropriately; for the name implies that he is rightly called Pelops who sees what is near only.

Her. How is that?

Soc. Because, according to the tradition, he had no forethought or foresight of all the evil which the murder of Myrtilus would entail upon his whole race in remote ages; he saw only what was near and immediate, — or in other words, πέλας (near), in his eagerness to win Hippodamia by all means for his bride. Every one would agree that the name of Tantalus is rightly given and in accordance with nature, if the traditions about him are true.

Her. And what are the traditions?

Soc. Many terrible misfortunes are said to have happened to him in his life, — he ended by being the ruin of his country; and after his death he had the stone suspended over his head in the world below: all this agrees wonderfully well with his name. You might imagine that some person who wanted to call him ταλάντατος (the most weighed down by misfortune), designedly altered the name into Tantalus; and this transformation has been produced in the legend by accident. The
396 name of Zeus, who is his alleged father, has also an excellent meaning, although hard to be understood, because really like a sentence, which is divided into two parts, for some call him Zena (Ζῆνα), and use the one half, and others call him

[1] Or: "His long stay in Troy is a sign of the fullness and endurance of his character."

Dia (Δία), and use the other half; the two together signify the nature of the God, and the business of a name, as we were saying, is to express this. For there is none who is more the author of life to us and to all, than the lord and king of all. Wherefore we ought to call him Zena and Dia, which are one name, although divided, meaning the God in whom all creatures always have life (δι' οὗ ζῆν ὑπάρχει πᾶσιν). There is a want of reverence, at first sight, in calling him the son of Cronos (who is a proverb for stupidity), and we might rather expect Zeus to be the child of a mighty intellect. Which is the fact; for this is the meaning of his paternal name: Κρόνος quasi Κόρος, not in the sense of a youth, but signifying τὸ καθαρὸν καὶ ἀκήρατον τοῦ νοῦ, the pure and garnished mind. He, as we are informed by tradition, was begotten of Uranus, who is called ἀπὸ τοῦ ὁρᾶν τὰ ἄνω, from looking upwards; and this, as philosophers tell us, is the way to have a pure mind, and the name Uranus is therefore correct. If I could remember the genealogy of Hesiod, I would have gone on and tried more conclusions of the same sort on the remoter ancestors of the gods, — then I might have seen whether this philosophy, which has come to me all in an instant, I know not whence, will hold good to the end.

Her. You seem to me, Socrates, to be quite like a prophet newly inspired, and to be uttering oracles.

Soc. Yes, Hermogenes, and I believe that I caught the inspiration from the great Euthyphro of the Prospaltian deme, who gave me a long lecture which commenced at dawn: he talked and I listened, and his wisdom and enchanting ravishment have not only filled my ears but taken possession of my soul, and to-day I shall let his superhuman power work and finish the investigation of names, — that will be the way; but to-morrow we will conjure him away, and make a purgation of him, if we can only find some priest or Sophist who is skilled in the art of purifying.

Her. With all my heart; for I am very curious to hear 397
the rest of the inquiry about names.

Soc. Then let us proceed; and where would you have us begin, now that we have got a sort of outline of the inquiry? Are there any names which witness of themselves that they are not given arbitrarily, but have a natural fitness? The names of heroes and of men in general are apt to be deceptive, because they are often called after ancestors with whose names, as

we were saying, they may have no business, or they are the expression of a wish like Eutychides (the son of good fortune), or Sosias (the Savior), or Theophilus (the beloved of God), and others. But I think that we had better leave these, for there will be more chance of finding correctness in the names of immutable essences and natures; there ought to have been more care taken in naming them, and perhaps there may have been some more than human power at work occasionally in giving them names.

Her. I agree to that, Socrates.

Soc. Ought we not to begin with the consideration of the gods, and show that they are rightly named gods?

Her. Yes, that will be well.

Soc. My notion would be something of this sort: I suspect that the sun, moon, earth, stars, and heaven, which are still the gods of many barbarians, were the only gods known to the aboriginal Hellenes. Seeing that they were always moving and running, from this running nature of them, they called them gods or runners (θεοὺς θέοντας); and afterwards, when they discovered all the other gods, they retained the old name. Do you think that likely?

Her. I think that very likely indeed.

Soc. What shall follow the gods? Must not demons and heroes and men come next?

Her. Let us take demons.

Soc. I wish that you would consider what is the real meaning of this word "demons." I wonder whether you would think my view right?

Her. Let me hear.

Soc. You know how Hesiod uses the word?

Her. Indeed I do not.

Soc. Do you not remember that he speaks of a golden race of men who came first?

Her. Yes, I know that.

Soc. He says of them, —

398 "But now that fate has closed over this race
They are holy demons upon the earth,
Beneficent, averters of ills, guardians of mortal men."

Her. What of that?

Soc. What of that! Why, I suppose that he means by the golden men, not men literally made of gold, but good and no-

ble; and I am convinced of this, because he further says that we are the iron race.

Her. That is true.

Soc. And do you not suppose that good men of our own day would by him be said to be of that golden race?

Her. Very likely.

Soc. And are not the good wise?

Her. Yes, they are wise.

Soc. And therefore I have the most entire conviction that he called them demons, because they were δαήμονες (knowing or wise), and in the ancient Attic dialect this is the very form of the word. Now he and other poets say truly, that when a good man dies he has a mighty portion and honor among the dead, and becomes a demon; which is a name given to him signifying wisdom. And I say too of the wise men, that every man who is a good man is more than human (δαιμόνιον) both in life and death, and is rightly called a demon.

Her. I believe that I quite agree with you in that. But what is the meaning of the word "hero?" (ἥρως, in the old writing ἔρως).

Soc. I think that there is no difficulty in explaining that, for the name is not much altered, and signifies that they were born of love.

Her. What do you mean?

Soc. Do you not know that the heroes are demi-gods?

Her. What then?

Soc. All of them sprang either from the love of a god for a mortal woman, or of a mortal man for a goddess; think of the word in the old Attic, and you will see better that the name "heros" is only a slight alteration of Eros, from whom the heroes sprang: either this is the meaning, or, if not this, then they must have been skillful as rhetoricians and dialecticians, and able to put the question (ἐρωτᾶν), for εἴρειν is equivalent to λέγειν. And therefore, as I was saying, in the Attic dialect the heroes turn out to be rhetoricians and questioners. All this is easy enough; the noble breed of heroes are a tribe of Sophists and Rhetors. But can you tell me why men are called ἄνθρωποι? — that is more difficult.

Her. No, I cannot; and I would not try even if I could, because I think that you are more likely to succeed.

Soc. That is to say, you trust to the inspiration of Euthyphro. 399

Her. Of course.

Soc. Your faith is not vain; for at this very moment a new and ingenious thought strikes me, and, if I am not careful, before to-morrow's dawn I shall be wiser than I ought to be. Now, attend to me; and first, remember that we often put in and pull out letters in words, and give names as we please and change the accents. Take, for example, the word Διὶ φίλος; in order to convert this from a sentence into a noun, we omit one of the iotas and sound the middle syllable grave instead of acute; as in other words also, letters are inserted, and the grave is changed into an acute.

Her. That is true.

Soc. The name ἄνθρωπος, which was once a sentence and is now a noun, appears to be a case just of this sort, for one letter, which is the α, has been omitted, and the acute on the last syllable has been changed to a grave.

Her. What do you mean?

Soc. I mean to say that the word "man" implies that other animals never examine, or consider, or look up at what they see, but that man not only sees (ὄπωπε) but considers and looks up at that which he sees, and hence he alone of all animals is rightly called ἄνθρωπος, meaning ὁ ἀναθρῶν ἃ ὄπωπεν.

Her. May I ask you to examine another word about which I am curious?

Soc. Certainly.

Her. I will take that which appears to me to follow next in order. You know the distinction of soul and body?

Soc. Of course.

Her. Let us endeavor to analyze them like the previous words.

Soc. You want me first of all to examine the natural fitness of the word ψυχὴ (soul), and then of the word σῶμα (body)?

Her. Yes.

Soc. If I am to say what occurs to me at the moment, I should imagine that those who gave the name ψυχὴ meant to express that the soul when in the body is the source of life, and gives the power of breath and revival, and when this reviving power fails then the body perishes and dies, and this, if I am not mistaken, they called ψυχή. But please stay a moment; I fancy that I can discover something which will be more acceptable to the disciples of Euthyphro, for I am afraid that they will scorn this explanation. What do you say to another?

Her. Let me hear.

Soc. What is that which holds and carries and gives life and motion to the entire nature of the body? What is that but the soul?

Her. Just that.

Soc. And do you not believe with Anaxagoras, that mind or soul is the ordering and containing principle of all things?

Her. Yes; I do.

Soc. Then you may well call that power φυσέχη which carries and holds nature, and this may be refined away into ψυχή.

Her. Certainly; and I think that this is a better and more scientific derivation.

Soc. True; and yet I cannot help laughing if I am to suppose that this was the way in which the name was really used.

Her. But what shall we say of the next word?

Soc. You mean σῶμα (the body): which may be variously interpreted, if a very little permutation is allowed — I am sure of that. For some say that the body is the grave (σῆμα) of the soul, which may be thought to be buried in our present life; or again the sign of the soul, because the soul signifies through the body; probably the Orphic poets were the inventors of the name, and they were under the impression that the soul is suffering the punishment of sin, and that the body is an inclosure which may be compared to a prison in which the soul is incarcerated, or incorporated (σῶμα ἵνα σώζηται), as the name σῶμα or body implies, until the penalty is paid; according to this view, not even a letter of the word need be changed.

Her. I think, Socrates, that we have said enough of this class of words. But have we any more explanations of the names of the gods, like that which you were giving of Zeus? I should like to know whether any similar principle of correctness is to be applied to them.

Soc. Yes, indeed, Hermogenes; and there is one excellent principle which, as men of sense, we must acknowledge, that of the gods we know nothing, either of their natures or of the names which they give themselves; but we are sure that the names by which they call themselves, whatever they may be, are true. And this is the best of all principles, and the next best is to say, as in prayers, that we will call them by any sort or kind of names or patronymics which they like, because we do

401 not know of any other. That, I think, is a very good custom, which I should much wish to follow. Let us, then, if you please, in the first place announce to them that we are not inquiring about them; we do not presume that we are able to do that; but we are inquiring about the meaning of men in giving them these names, — in this there can be small blame.

Her. I think, Socrates, that you are quite right, and I would like to do as you say.

Soc. Shall we begin, then, with Hestia, according to custom?

Her. Yes, that will be very proper.

Soc. What may we suppose him to have meant who gave the name Hestia?

Her. That is a very difficult question to answer.

Soc. My dear Hermogenes, the first imposers of names must surely have been considerable persons; they were philosophers, and wanted to hear themselves talk.

Her. Well, and what of that?

Soc. They are the men to whom I should attribute the imposition of names. Even in foreign names, if you analyze them, a meaning is still discernible. For example, that which we term οὐσία is by some called ἐσία, and by others again ὠσία. Now that the essence of things should be called ἑστία, as the former name implies (οὐσία = ἑστία), is rational enough. And there is reason in the Athenians calling that ἑστία which participates in οὐσία. For in ancient times we too seem to have said ἐσία for οὐσία, and this you may note to have been the idea of those who appointed that sacrifices should be first offered to ἑστία, which was natural enough if they meant that ἑστία was the essence of things. Those again who read ὠσία seem to have inclined to the opinion of Heraclitus, that all things flow and nothing stands; the pushing principle is the cause and ruling power of all things, and is therefore rightly called ὠσία. Enough of this, which is all that we who know nothing, can affirm. Next in order after Hestia we ought to consider Rhea and Cronos, although the name of Cronos has been already discussed. But I dare say that I am talking great nonsense.

Her. Why, Socrates?

Soc. My good friend, I have discovered a hive of wisdom.

Her. Of what nature?

402 *Soc.* Well, rather ridiculous, and yet plausible.

Her. How plausible?

Soc. I fancy to myself Heraclitus repeating wise traditions

of antiquity which existed in the old-fashioned days of Cronos and Rhea, and of which Homer also spoke.

Her. How do you mean?

Soc. Heraclitus is supposed to say that all things are in motion and nothing at rest; he compares them to the stream of a river, and says that you cannot go into the same water twice.

Her. That is true.

Soc. Well, then, how can we avoid inferring that he who gave the names of Cronos and Rhea to the ancestors of the gods, agreed in the doctrine of Heraclitus? Is the giving of the names of streams to both of them purely accidental? Compare the line in which Homer, and, as I believe, Hesiod also, tells of —

"Ocean, the origin of gods, and mother Tethys."

And again, Orpheus says, that —

"The fair river of Ocean was the first to marry, and he espoused his sister Tethys, who was his mother's daughter."

You see that this is a remarkable coincidence, and all in the direction of Heraclitus.

Her. I think that there is something in what you say, Socrates; but I do not understand the meaning of the name Tethys.

Soc. Well, that is almost self-explained, being only the name of a spring, a little disguised; for that which is strained and filtered (διαττώμενον ἠθούμενον) may be likened to a spring, and the name Tethys is made up of these two words.

Her. That is ingenious, Socrates.

Soc. To be sure. But what comes next? — of Zeus we have spoken.

Her. Yes.

Soc. Then let us next take his two brothers, Poseidon and Pluto, whether the latter is called by that or by his other name.

Her. By all means.

Soc. Poseidon is ποσίδεσμος, the chain of the feet; the original inventor of this name had been stopped by the watery element in his walks and not allowed to go on, and therefore he called the ruler of this element Poseidon; the ε was probably inserted as an ornament. Yet, perhaps, not so; but the name may have been originally written with a double λ and not 403
with a σ, meaning that the God knew many things (πολλὰ εἰδώς). And perhaps also he may be regarded as the shaker

ἀπὸ τοῦ σείειν, and then π and δ are added. Pluto is concerned with πλοῦτος, and means the giver of wealth, because wealth comes out of the earth beneath. People in general use the term as a euphemism for Hades, which their fears lead them erroneously to derive from the invisible (ἀπὸ τοῦ ἀειδοῦς).

Her. And what is the true derivation?

Soc. In spite of the mistakes which are made about the power of this deity, and the foolish fears which people have of him, such as the fear of always being with him after death, and of the soul denuded of the body going to him, my belief is that all is quite consistent, and that the office and name of the God really correspond.

Her. Why, how is that?

Soc. I will tell you my own view; but first, I should like to ask you which chain does any animal feel to be the stronger? and which confines him more to the same spot, — desire or necessity?

Her. Desire, Socrates, is stronger far.

Soc. And do you not think that many a one would escape from Hades, if he did not bind those who depart to him by the strongest of chains?

Her. There can be no doubt of that.

Soc. And if by the greatest of chains, then by some desire, as I should certainly infer, and not by necessity?

Her. That is clear.

Soc. And there are many desires?

Her. Yes.

Soc. And therefore the desire must be the greatest, if the chain is to be the greatest?

Her. Yes.

Soc. And is any desire stronger than the thought that you will be made better by associating with another?

Her. Certainly not.

Soc. And is not that the reason, Hermogenes, why no one, who has been to him, is willing to come back to us? Even the Sirens, like all the rest of the world, have been laid under his spells. Such a charm, as I imagine, is the God able to infuse into his words. And, according to this view, he is the perfect and accomplished Sophist, and the great benefactor of the inhabitants of the world below; and even to us who are on earth he vouchsafes exceeding blessing. For he has much more than he wants there, and that is why he is called Pluto (or the rich).

Note also, that he will have nothing to do with men while they are in the body, but only when the soul is liberated from the desires and evils of the body. Now there is a great deal of philosophy and reflection in that: for in their liberated state he can bind them with the desire of virtue, but while they are flustered and maddened by the body, not even father Cronos himself would suffice to keep them with him in his own far-famed chains. 404

Her. I think that there is reason in that.

Soc. Yes, Hermogenes; and the legislator called him Hades, not from the unseen (ἀπὸ τοῦ ἀειδοῦς) — far otherwise, but from his knowledge of all noble things (ἀπὸ τοῦ πάντα τὰ καλὰ εἰδέναι).

Her. Very good; and what do we say of Demeter, and Herè, and Apollo, and Athene, and Hephaestus, and Ares, and the other deities?

Soc. Demeter is ἡ διδοῦσα μήτηρ τῆς ἐδωδῆς, the mother and giver of food; ἥρη is the lovely one (ἐρατή τις), for Zeus, according to tradition, loved and married her, possibly also the name may have been given when the legislator was thinking of the weather, and may be only a disguise of ἀήρ, putting the end in the place of the beginning. You will recognize the truth of this if you repeat the letters of Herè several times over. People dread the name of Pherephatta as they dread the name of Apollo, — and with as little reason; the fear, if I am not mistaken, only arises from ignorance of the nature of names. But they go changing the name into Phersephone, and they are terrified at this; whereas the new name means only that the Goddess is wise; for seeing that all things in the world are in motion, that principle which embraces and touches and is able to follow them is wisdom. And therefore the Goddess is rightly called Pherepaphe (Φερεπάφα), or something of that sort, quasi οτῦ φερομένου ἐφαπτομένη, because she touches that which is in motion; herein showing her wisdom. And Hades, who is wise, consorts with her, because she is wise. They alter her name into Pherephatta nowadays, because the present generation care for euphony more than truth. There is the other name, Apollo, which, as I was saying, is generally supposed to have some terrible signification. Have you remarked that?

Her. To be sure I have, and what you say is true.

Soc. But the name, in my opinion, is really most expressive of the power of the God.

Her. How is that?

405 *Soc.* I will endeavor to explain, for I do not believe that any single name could have been better adapted to express the attributes of the God, touching on and in a manner signifying all four of them, — music, and prophecy, and medicine, and archery.

Her. That must be a strange name, and I should like to hear the explanation.

Soc. Nay, all is harmonical as beseems the God of Harmony. In the first place, doctors and diviners use purgations, and purifications, and fumigations, with drugs, magical or medicinal, as well as the ablutions and lustral sprinklings which ordinarily accompany them, and all these have one and the same object, which is to make a man pure both in body and soul.

Her. Very true.

Soc. And is not Apollo the purifier, and the washer and absolver of these sorts of evils?

Her. Very true.

Soc. Viewed in reference to his ablutions and absolutions, as being the physician who orders them, he may be rightly called ἀπολούων (purifier); or regarded with a view to his powers of divination, and his truth and sincerity, which is the same as truth, he may be most fitly called Ἀπλῶς, as in the Thessalian dialect, for all the Thessalians call him Ἁπλῶς; also he is ἀεὶ βάλλων (always shooting), because he is a master archer who never misses; or again, the name may refer to his musical attributes; and then, as in ἀκόλουθος, and ἄκοιτις, and in many other words the α is supposed to mean ὁμοῦ, or together; so the meaning of α in the name Apollo is, moving together, whether in the so-called poles of heaven, or in the harmony of song, which is termed concord, because he moves all together by a harmonious power, as astronomers and musicians ingeniously declare. And he is the God who presides over harmony, and makes all things move round together, both among gods and men. And as in the words ἀκόλουθος and ἄκοιτις, the α is substituted for an ο, so the name Ἀπόλλων is equivalent to ὁμοπολῶν; only the second λ is added in order to avoid the ill-omened sound of destruction. Now the suspicion of this still haunts the minds of

406 some who do not consider the true value of the name, which, as I was saying just now,[1] touches upon all the powers of the God, who is (ἁπλοῦς, ἀεὶ βάλλων, ἀπολούων, ὁμοπολῶν) the single one, the ever-darting, the purifier, the

[1] Omitting πολύ.

mover together. The name of the Muses and of music would seem to be derived (ἀπὸ τοῦ μῶσθαι) from their making philosophical inquiries; and Leto is called by this name, because she is such a gentle goddess, and willing to grant our requests; or her name may be Letho, as strangers often call her; they seem to imply in this her slowness to anger, and her readiness to forgive and forget. Artemis is named from her healthy, happy nature, and because of her love of virginity; perhaps because she is a proficient in virtue, and perhaps also as hating the intercourse of the sexes (τὸν ἄρσενον μισήσασα τοῦ ἀνδρὸς). He who gave the Goddess her name may have had any or all of these reasons.

Her. What is the meaning of Dionysus and Aphrodite?

Soc. Son of Hipponicus, that is a solemn question; there is a serious and also a facetious explanation of both these names; the serious explanation is not to be had from me, but there is no objection to your hearing the facetious one; for the gods too love a joke. Dionysus is simply ὁ διδοὺς τὸν οἶνον (the giver of the wine), Διδοίνυσος, as he might be called in fun, — and οἶνος is properly οἰόνους, because wine makes those who drink, think that they have a mind when they have none (οἴεσθαι νοῦν ἔχειν ποιεῖ). The derivation of Aphrodite, διὰ τὴν τοῦ ἀφροῦ γένεσιν (foam), may be fairly accepted on the authority of Hesiod.

Her. Still there remains Athene, whom you, Socrates, as an Athenian, will not surely forget; there are also Hephaestus and Ares.

Soc. I am not likely to forget them.

Her. No.

Soc. There is no difficulty in explaining the other appellation of Athene.

Her. What other appellation?

Soc. We call her Pallas.

Her. To be sure.

Soc. And we cannot be wrong in supposing that this is derived from armed dances. For the elevation of one's self or anything else above the earth or in the hands we call shaking 407
πάλλειν, or being shaken, dancing or being danced.

Her. That is quite true.

Soc. Then that is the explanation of the name Pallas?

Her. Yes; but what do you say of the other name?

Soc. That of Athene?

Her. Yes.

Soc. That is a graver matter, and there, my friend. I think that the modern interpreters of Homer may assist in explaining the view of the ancients. For most of these, in their explanations of the poet, assert that he meant by Athene νοῦς and διάνοια, and the maker of names appears to have had a similar notion about her: and indeed calls her by a still higher title, θεοῦ νόησιν, seeming to mean that this is she who has the mind of God (θεονόα); using α as a dialectical variety for η, and taking away ι and σ. Perhaps, however, there may be yet a further explanation; the name θεονόη may imply the special knowledge of divine things (ἡ τὰ θεῖα νοοῦσα). Nor shall we be far wrong in supposing that he wished to identify this goddess with moral perception, and therefore gave her the name ἠθονόη; which, however, either he or his successors have altered into what they thought a nicer form, and called her Athene

Her. But what do you say of Hephaestus?

Soc. Speak you of the princely lord of light (γενναῖον τὸν τοῦ φάεος ἵστορα)?

Her. Surely.

Soc. Ἥφαιστος is Φαΐστος, and has added the η by attraction; as is obvious to anybody.

Her. That is very probable, until some more probable notion gets into your head.

Soc. To prevent that, you had better ask what is the derivation of Ares.

Her. What is Ares?

Soc. Ares may be called, if you will, from his manhood and manliness, or, if you please, from his hard and unchangeable nature, quasi ἄῤῥαρος; this latter is a derivation quite appropriate to the god of war.

Her. Very true.

Soc. And now, by the gods, let us have no more of the gods, for I am afraid of them; ask about anything but them, and thou shalt see how the steeds of Euthyphro can prance.

Her. Only one more god! I should like to know about Hermes, of whom I am said not to be a true son. Let us make him out, and then I shall know whether there is anything in what Cratylus says.

Soc. I should imagine that the name Hermes has to do with
408 speech, and signifies that he is the interpreter, or messenger, or thief, or liar, or bargainer; language has a great deal to say to all that sort of thing; and, as I was telling you,

the word εἴρειν is expressive of the use of speech, and there is an old Homeric word ἐμήσατο, which means "he contrived:" and out of these two words, εἴρειν and μήσασθαι, the legislator formed the name of the god who invented language and speech ("speaking" is another word for "telling"); and he imposes this name upon us, saying, "O my friends," says he to us, "seeing that he is the contriver of tales or speeches, you may rightly call him εἰρέμης." And this has been improved by us, as we think, into Hermes. Iris also appears to have been called from the verb "to tell" (ἀπὸ τοῦ εἴρειν), because she was a messenger.

Her. Then I am very sure that Cratylus was quite right in saying that I was no true son of Hermes, for I am not a good hand at speeches.

Soc. There is also reason, my friend, in Pan being the double-natured son of Hermes.

Her. How do you make that out?

Soc. You are aware that speech signifies all things (πᾶν), and is always turning them round and round, and has two forms, true and false?

Her. Certainly.

Soc. Is not the truth that is in him the smooth or pious nature which dwells above among the gods, whereas falsehood dwells in the lower world, and is rough like the goat of tragedy; for tales and falsehoods have generally to do with the tragic or goatish life, and tragedy is the place of them?

Her. Very true.

Soc. Then surely Pan, who is the declarer of all things and the perpetual revolver of all things (ὁ πᾶν μηνύων καὶ ἀεὶ πολῶν), is rightly called αἰπόλος, he being the two-formed son of Hermes, smooth in his upper part, and rough and goatlike in his lower regions. And, as the son of Hermes, he is speech or the brother of speech, and that brother should be like brother is no marvel. But, as I was saying, my dear Hermogenes, let us get away from the gods.

Her. From this sort of gods, by all means, Socrates. But why should we not discuss another kind of gods — the sun, moon, stars, earth, aether, air, fire, and water, the seasons, and the year?

Soc. You impose a great many tasks upon me. Still, if you wish, I will not refuse.

Her. You will oblige me.

Soc. How would you have me begin? Shall I take the sun first, which you mentioned first?

Her. Very good.

409 *Soc.* The origin of the sun will probably be clearer in the Doric form; for the Dorians call him ἅλιος, and this name is given to him, κατὰ τὸ ἁλίζειν τοὺς ἀνθρώπους ἐπειδὰν ἀνατείλῃ, because at his rising he gathers men together, or διὰ τὸ περὶ τὴν γῆν εἰλεῖν ἰὼν, because he is always rolling about the earth in his course; or διὰ τὸ αἰολεῖν, the meaning of which is the same as ποικίλλειν, because he variegates the productions of the earth.

Her. But what is σελήνη (the moon)?

Soc. That name is rather unfortunate for Anaxagoras.

Her. How is that?

Soc. The word seems to anticipate his recent discovery, that the moon receives her light from the sun, which is rather out of date.

Her. Very true.

Soc. The two words σέλας (brightness) and φῶς (light) have the same meaning?

Her. Yes.

Soc. This light about the moon is always new and always old, if the disciples of Anaxagoras say truly. For the sun in his revolution always adds new light, and there is the old light of the previous month.

Her. Very true.

Soc. Many call the moon σελαναία.

Her. True.

Soc. And as she has a light which is always old and also always new, νέον καὶ ἔνον, she may very properly have the name σελαενονεοάεια, and this is hammered into shape and called σελαναία.

Her. A real dithyrambic sort of name that, Socrates. But what do you say of the month and the stars?

Soc. Μὴς is called (quasi μείης) ἀπὸ τοῦ μειοῦσθαι, because suffering diminution; the name of ἄστρα (stars) seems to be derived from ἀστραπὴ, which is an improvement on ἀναστρωπὴ, signifying the upsetting of the eyes (ὅτι τὰ ὤπα ἀναστρέφει).

Her. What do you say of πῦρ and ὕδωρ?

Soc. I am at a loss how to explain πῦρ; either the muse of Euthyphro has deserted me, or there is some very great difficulty in the word. Please, however, to note the contrivance which I adopt whenever I am in a difficulty of this sort.

Her. What is that?

Soc. I will tell you; but I should like to know first whether you can tell me what is the meaning of the word πῦρ?

Her. Indeed I cannot.

Soc. Shall I tell you what I suspect to be the true explanation of this and several other words? I believe that they are of foreign origin. For the Hellenes, especially those who were under the dominion of the barbarians, often took words from them.

Her. Well, and what follows from that?

Soc. Why, you know that any one who seeks to demonstrate the fitness of these names according to the Hellenic language, and not according to the language from which the words are derived, is rather likely to be at fault.

Her. Yes, certainly.

Soc. Well, then, consider whether this word πῦρ is not foreign; for the word is not easily brought into relation 410
with the Hellenic tongue, and the Phrygians may be observed to have the same word slightly inflected, just as they have ὕδωρ and κύνες, and many other words.

Her. That is true.

Soc. Any violent interpretations should be avoided, for there is no difficulty in finding something to say about them. And thus I get rid of πῦρ and ὕδωρ. Ἀήρ, Hermogenes, may be explained ὅτι αἴρει ἀπὸ τῆς γῆς, as the element which raises things from the earth, or as ever flowing (ὅτι ἀεὶ ῥεῖ), or because the flux of the air is wind, and the poet calls the winds "air-blasts," and I suppose him to mean "wind-flux," "air-flux," as you might say, because they are air. Αἰθὴρ I should interpret as ἀειθεήρ; this may be correctly said, because this element is always running in a flux about the air (ὅτι ἀεὶ θεῖ περὶ τὸν ἀέρα ῥέων). The meaning of the word γῆ comes out better when in the form of γαῖα, for the earth may be truly called "mother," γαῖα γεννήτειρα (parent), as Homer implies when he uses the term γεγάασαι for γεγεννῆσθαι.

Her. Good.

Soc. What shall we take next?

Her. There are ὧραι, the seasons, and the two names of the year, ἐνιαυτὸς and ἔτος.

Soc. The ὧραι, or seasons, should be spelt in the old Attic way, if you desire to know the probable truth of them; they are rightly called the ὅραι, because they divide (ὁρίζουσιν) the

summers and winters and winds and the fruits of the earth. The words ἐνιαυτὸς and ἔτος appear to be the same, — "that which brings to light the plants and growths of the earth in their turn, and reviews them within itself;" this is broken up into two words, ἐνιαυτὸς ὅτι ἐν ἑαυτῷ, and ἔτος ὅτι ἑτάζει, just as before the word Ζεὺς Διὸς was similarly broken up into Ζῆνα Λία and the whole proposition means that this power of self-analyzing is one, but has two names, two words being thus formed out of a single proposition, ἔτος and ἐνιαυτός.

Her. Indeed, Socrates, you make surprising progress.

Soc. I am run away with.

Her. Very true.

Soc. But not yet at my utmost speed.

411 *Her.* I should like very much to know, in the next place, how you would explain the virtues. What principle of correctness is there in those charming words — wisdom, understanding, justice, and the rest of them?

Soc. That is a very important class of names which you are disinterring; still, as I have put on the lion's skin, I must not be faint of heart; and I suppose that I must consider the meaning of wisdom and understanding, and judgment and knowledge, and all those other charming words, as you call them?

Her. Surely, we must not leave off until we find out their meaning.

Soc. By the dog, I have not a bad notion which came into my head only this moment: I believe that the primeval men who gave names were undoubtedly like too many of our modern philosophers, who, in their search after the nature of things, are always going round and round and get dizzy, and then they imagine that the world is going round and round and all manner of ways; and the latter phenomenon, which is really within them and an opinion of their own, they suppose to have a real existence in the external world; they think that there is nothing stable or permanent, but only flux and motion, and that all is full of every sort of motion and generation. The consideration of the names which I mentioned has led me into making this reflection.

Her. How is that, Socrates?

Soc. Perhaps you did not observe that in the names which have been just cited, the motion or flux or generation of things is most surely indicated.

Her. No, indeed, I did not.

Soc. Take the first of those which you mentioned; clearly that is a name indicative of motion.

Her. What was the name?

Soc. Φρόνησις (wisdom), which may signify *νόησις φορᾶς καὶ ῥοῦ* (perception of motion and flux), or perhaps *ὄνησις φορᾶς* (the blessing of motion), but is at any rate connected with *φέρεσθαι* (motion). Γνώμη, again, certainly implies the consideration and ponderation (*νώμησιν*) of generation, for to ponder is the same as to consider, or, if you would rather, there is *νόησις*, which is *νέου ἔσις* (the desire of the new); the word *νέος* implies that the world is always in process of creation. The giver of the name wanted to express this longing of the soul, for the original name was *νεόεσις* and not *νόεσις*, but a double ε took the place of *η*. The word *σωφροσύνη* is *σωτηρία φρονήσεως*, the salvation of that wisdom which we were just now considering. Ἐπιστήμη is akin to this, and indicates that the soul which is good for anything follows the motion of things, neither 412
anticipating them nor falling behind them; wherefore the word should rather be read as *ἐπεϊστήμη* or *ἐπιστὴμενη*,[1] adding an ε. Σύνεσις is a kind of syllogism or conclusion, and is derived from *συνιέναι*, which, like *ἐπίστασθαι*, implies the progression of the soul in company with the nature of things. Σοφία (wisdom) is very dark, and appears not to be of native growth; the meaning is, touching the motion or stream of things. You must remember that the poets, when they speak of the commencement of any rapid motion, often use the word *ἐσύθη*; and there was a famous Lacedaemonian who was named Σοῦς (Bolt), for by this word the Lacedaemonians signify rapid motion; and the touching of motion is expressed by *σοφία*, for all things are supposed to be in motion. Good (*ἀγαθὸν* is the name which is given to the admirable (*τῷ ἀγαστῷ*) in nature; for, whereas all things move, still there are degrees of motion; some are swifter, some slower; but there are some things which are admirable for their swiftness, and this admirable part of nature is called *ἀγαθόν*. Δικαιοσύνη is clearly *ἡ τοῦ δικαίου σύνεσις*; but the actual word *δίκαιον* is more difficult: men are only agreed to a certain extent about justice, and then they begin to disagree. For those who suppose all things to be in motion conceive the greater part to be a containing vessel, but they say that there is a penetrating power which passes through them all, and is the instrument of creation in all, and that this is the subtlest and swiftest element;

[1] The reading is here uncertain. Cp. 437 E.

for if not the subtlest, and a power which none can keep out and also the swiftest, and if other things were not comparatively at rest, it could not penetrate through the moving universe And this element, which superintends all things and pierces al (διαϊδν), is rightly called δίκαιον; the letter κ being only addec for the sake of euphony. Thus far, as I was saying, there is a general agreement about the nature of justice; but I 413 Hermogenes, being an enthusiastic disciple, have been tol all these things in a mystery; and this they declare to me to b justice and the cause, for a cause is that because of which any thing is created, and some one comes and whispers in my ea that justice is so called because partaking of the nature of th cause, and I begin, in spite of all that he has said, to interrogat him quite gently: "Well, my excellent friend," say I, "but i all this be true, I still want to know, what is justice." There upon they think that I ask tiresome questions, and am leapin over the barriers, and have been already sufficiently answered and they try to satisfy me with one derivation after another, an at length they quarrel. For one of them says that justice is th sun, and that he only is the piercing or burning element whic is the guardian of nature, And when I joyfully repeat thi beautiful notion, I am answered by the satirical remark, "What is there no justice in the world when the sun is down?" An when I earnestly beg my questioner to tell me his own hones opinion, he says, "Fire in the abstract;" but this is not ver intelligible. Another says, 'No, not fire in the abstract, but th abstraction of heat in the fire." Another man professes to laug at all this, and says, as Anaxagoras says, that justice is mind for mind, as they say, has absolute power, and mixes wit nothing, and orders all things, and passes through all things At last, my friend, I find myself in far greater perplexity abou the nature of justice than I was before I began to learn. Bu still I am of opinion that the name, which has led me into thi digression, was given for the reasons which I have mentioned

Her. I think, Socrates, that you are not improvising now you must have heard this from some one else.

Soc. And not the rest?

Her. Hardly.

Soc. Well, then, let me go on in the hope of making you be lieve in the originality of the rest. What comes after justice I do not think that we have as yet discussed ἀνδρεία, courage (for injustice need not be considered, as there is no difficulty i

seeing that this is really nothing more than a hinderance to the penetrating principle, τοῦ διαϊόντος.) Well, then, the name of ἀνδρεία seems to imply a battle, which battle is in the world of existence, and if there be a flux there must be the counterflux; and if you extract the δ from ἀνδρεία, the name at once signifies the thing, and you may clearly understand that not the stream opposed to every stream is ἀνδρεία, but only to that which is contrary to justice, for otherwise courage would not have been praised. The words ἄῤῥην and ἀνὴρ also contain a similar allusion to the same principle of the upward flux (τῇ ἄνω ῥοῇ). Γυνὴ I suspect to be the same word as γονή; θῆλυ appears to be derived ἀπὸ τῆς θηλῆς, from the teat, because the teat is like rain, and makes things have a flourishing look, ὅτι τεθηλέναι ποιεῖ. 414

Her. That is surely probable.

Soc. Yes; and the very word θάλλειν (to flourish) seems to figure the growth of youth, which is swift and sudden ever. And this is expressed by the legislator in the name, which is a compound of θεῖν (running), and ἅλλεσθαι (leaping). Pray observe how I prance away when I am on smooth ground. There are a good many names generally thought to be of importance, which have still to be explained.

Her. That is true.

Soc. There is the meaning of the word τέχνη (art), for example.

Her. Very true.

Soc. That may be identified with ἐχονόη, and expresses the possession of mind, — you have only to take away the τ and insert an ο between the χ and ν, and another ο between the ν and η.

Her. That is a very shabby etymology.

Soc. Yes, my dear friend; but then you know that the original names are always being overlaid and bedizened by people sticking on and stripping off letters for the sake of euphony, and twisting and turning them in all sorts of ways: this may be done for the sake of ornamentation, or may be the effect of time. Take, for example, the word κάτοπτρον; why is the letter ρ inserted? This must surely be the addition of some one who cares nothing about the truth, but thinks only of putting the mouth into shape. And the additions are often such that at last no human being can possibly make out the original meaning of the word. Another example is the word σφίγξ,

σφιγγὸς, which ought properly to be φὶγξ, φιγγὸς, and there are other examples.

Her. That is quite true, Socrates.

Soc. And yet, if you are permitted to put in and pull out any letters which you please, names will be too easily made, and any name may be adapted to any object.

Her. That is true.

Soc. Yes, that is true. And therefore a wise dictator, like yourself, should observe the laws of moderation and probability.

Her. That is my desire.

415 *Soc.* And mine, too, Hermogenes. But do not be too much of a precisian, or "you will unnerve me of my strength."[1] When you have allowed me to add μηχανὴ (contrivance) to τέχνη (art) I shall be at the top of my bent, for I conceive μηχανὴ to be a sign of great accomplishment — ἄνειν ἐπὶ πολύ; for μῆκος points to the meaning of πολὺ, and these two, μῆκος and ἄνειν, make up the word μηχανή. But as I was saying, being at the top of my bent, I should like to consider the meaning of the two words ἀρετὴ and κακία; ἀρετὴ I do not as yet understand, but κακία is transparent, and agrees with the principles which preceded, for all things being in a flux, κακία is τὸ κακῶς ἰόν; and this evil motion when existing in the soul has preëminently the general name of κακία, or vice. The meaning of κακῶς ἰέναι may be further illustrated by the use of δειλία (cowardice), which ought to have come after ἀνδρεία, but was forgotten, and, as I fear, is not the only word which has been passed over. Δειλία (cowardice) signifies that the soul is bound with a strong chain, for λίαν means strength, and therefore δειλία expresses the greatest and strongest bond of the soul; and ἀπορία is an evil of the same nature (ἀ and πορεύεσθαι), like anything else which is an impediment to motion and movement. Then the word κακία appears to mean κακῶς ἰέναι, or going badly, or limping and halting; of which the consequence is, that the soul becomes filled with vice. And if κακία is the name of this sort of thing, ἀρετὴ will be the opposite of this, signifying in the first place ease of motion, then that the stream of the good soul is unimpeded, and has therefore the attribute of ever flowing, without let or hinderance, and is therefore called ἀρετὴ, or, more correctly, ἀειρειτὴ, and may perhaps have had another form, αἰρετὴ, indicating that nothing is

[1] Iliad, vi. 265.

more eligible than virtue, and this has been hammered into ἀρετή. I dare say that you will deem this to be an invention, but I think that if the previous word κακία was right, then ἀρετὴ is also right.

Her. But what is the meaning of κακὸν, which has indeed played a great part in your etymologies? 416

Soc. That is a very singular word, about which I can hardly form an opinion, and therefore I must have recourse to that ingenious device of mine.

Her. What device?

Soc. The device of a foreign origin, which I shall give to this word also.

Her. I dare say that you are right; but suppose that we leave these words, and endeavor to see the rationale of καλὸν and αἰσχρόν.

Soc. The meaning of αἰσχρὸν is evident, being only τὸ ἐμποδίζον καὶ ἴσχον τῆς ῥοῆς τὰ ὄντα (which prevents and impedes existence from flowing), and this is in accordance with our former derivations. For the name-giver was a great enemy to stagnation of all sorts, and hence he gave the name ἀεἰσχοροῦν to that which hindered the flux, and this is now beaten together into αἰσχρόν.

Her. But what do you say of καλόν?

Soc. That is more obscure; yet the form is only due to the prosody, and has been changed by altering the quantity of the ου.

Her. What do you mean?

Soc. This name appears to denote mind.

Her. How is that?

Soc. Let me ask you what is the cause why anything has a name; is not the principle which imposes the name the cause?

Her. Certainly.

Soc. And must not this be the mind of gods, or of men, or of both?

Her. Yes.

Soc. Is not mind that which calls (καλέσαν) things, and is not mind the (καλὸν) beautiful?

Her. That is evident.

Soc. And are not the works of intelligence and mind worthy of praise, and are not any other works worthy of blame?

Her. Certainly.

Soc. Physic does the works of a physician, and carpentering does the works of a carpenter?

Her. Exactly.

Soc. And the principle of beauty does works of beauty?

Her. Or ought to do them.

Soc. And that principle we affirm to be mind?

Her. Very true.

Soc. Then mind is rightly called beauty because she does the works which we recognize and speak of as the beautiful?

Her. That is evident.

Soc. What more names remain to us?

Her. There are the words which are connected with ἀγαθὸν and καλὸν, and are such as συμφέροντα and λυσιτελοῦντα, ὠφέλιμα, κερδαλέα, and their opposites.

417 *Soc.* The meaning of συμφέρον I think that you may discover for yourself by the light of the previous examples, — for it is a sister word to ἐπιστήμη, meaning just the motion of the soul accompanying the world, and things which are done upon this principle are called σύμφορα or συμφέροντα, because they are carried round with the world.

Her. That is probable.

Soc. Again, κερδαλέον is called from κέρδος, but you must alter the δ into ν if you want to get at the meaning; for this word also signifies good, but in another way; he who gave the name intended to express the power of admixture and universal penetration in the good (κεραννύμενον); in forming the word, however, he inserted a δ instead of a ν, and so made κέρδος.

Her. Well, but what is λυσιτελοῦν (the profitable)?

Soc. I suppose, Hermogenes, that people do not mean by the profitable the gainful, or that which pays the retailer, but they use the word in the sense of swift. You regard the profitable (τὸ λυσιτελοῦν), as that which being the swiftest thing in existence, allows of no stay of things and no pause or end of motion, but always, if there begins to be any end, lets things go again, and makes motion immortal and unceasing: this, as appears to me, is the point of view in which the good is happily denominated λυσιτελοῦν — that which looses or frees the end of motion is called τὸ λυσιτελοῦν. Ὠφέλιμον (the advantageous) is ἀπὸ τοῦ ὀφέλλειν, meaning that which creates and increases; this is a common Homeric word, and has a foreign character.

Her. And what do you say of the opposites of these?

Soc. Of such as are mere negatives I hardly think that I need speak.

Her. Which are they?

Soc. The words inexpedient, unprofitable, unadvantageous, ungainful.

Her. True.

Soc. But I would rather take the words βλαβερὸν (harmful), ζημιῶδες (hurtful).

Her. Good.

Soc. The word βλαβερον is that which is said to hinder or harm the stream; βλάπτον is βουλόμενον ἅπτειν, which seeks to hold or bind; for ἅπτειν is the same as δεῖν, and δεῖν is always a term of censure; τὸ βουλόμενον ἅπτειν τὸν ῥοῦν (wanting to bind the stream), would properly be βουλαπτεροῦν, and this, as I imagine, is improved into βλαβερόν.

Her. You bring out curious results, Socrates, in the use of names; and when I hear the word βουλαπτεροῦν I cannot help imagining that you are making your mouth into a flute, and puffing away at a prelude to Athene.

Soc. That is the fault of the name, Hermogenes; not mine.

Her. That is true; but what is the derivation of ζημιῶδες?

418 *Soc.* What is the meaning of ζημιῶδες? — let me remark, Hermogenes, how right I was in saying that great changes are made in the meaning of words by putting in and pulling out letters; even a very slight permutation will sometimes give an entirely opposite sense; I may instance the word δέον, which occurs to me at the moment, and reminds me of what I was going to say to you, that the fine fashionable language of modern times has twisted and disguised and entirely altered the original meaning both of δέον, and also of ζημιῶδες, which in the old language is clearly indicated.

Her. What do you mean?

Soc. I will try to explain. You are aware that our forefathers affected the sounds ι and δ, especially the women, who are most conservative of the ancient language, but now they change ι into η or ε, and δ into ζ; this is supposed to increase the grandeur of the sound.

Her. How do you mean?

Soc. For example, in very ancient times they called the day either ἰμέρα or ἐμέρα, which is called by us ἡμέρα.

Her. That is true.

Soc. Do you observe that only the ancient form shows the intention of the giver of the name; the reason of the name is, that men long for and love the light coming after the darkness, which is thence called ἰμέρα. But now the name is so traves-

tied that you cannot tell what is the meaning of the day, although some are of opinion that the day is called ἡμέρα, because making things gentle.

Her. That is my view.

Soc. And do you know that the ancients said δυογὸν and not ζυγόν?

Her. Very true.

Soc. And ζυγὸν has no meaning, but the word δυογὸν is very expressive of the binding of two together, for the purpose of drawing; this has been changed into ζυγὸν, and there are many other examples of similar changes.

Her. There are.

Soc. Proceeding in the same train of thought, I may remark that the word obligation (τὸ δέον) has a meaning which is the opposite of all the other appellations of good; for δέον is here a species of good, and is, nevertheless, the chain or hinderer of motion, and therefore own brother of βλαβερόν.

Her. Yes, Socrates, and that is true.

419 *Soc.* Not if you restore the ancient form, which is more likely to be the correct one, and read διὸν instead of δέον; if you convert the ε into an ι after the old fashion, this will then agree with other words meaning good; for διὸν, not δέον, signifies the good, and is a term of praise; and the author of names has not fallen into any contradiction, but in all these various appellations, δέον (obligatory), ὠφέλιμον (advantageous), λυσιτελοῦν (profitable), κερδαλέον (gainful), ἀγαθὸν (good), συμφέρον (expedient), εὔπορον (plenteous), the same conception is implied of the ordering or all-pervading principle which is praised, and the restraining and binding principle which is censured. And this is further illustrated by the word ζημιώδης, which if the ζ is only changed into δ, as in the ancient language, becomes δημιώδης; and this name, as you will perceive, is given ἐπὶ τῷ δοῦντι τὸ ἰὸν, to that which binds motion.

Her. What do you say of ἡδονὴ (pleasure), λύπη (pain), ἐπιθυμια (desire), and the like, Socrates?

Soc. I do not think, Hermogenes, that there is any great difficulty about them: ἡδονὴ is ἡ πρὸς τὴν ὄνησιν τείνουσα πρᾶξις, the action which tends to advantage; and the original form may be supposed to have been ἡονὴ, but this has been altered by the insertion of the δ. Λύπη appears to be derived ἀπὸ τῆς διαλύσεως τοῦ σώματος, from the relaxation which the body feels when in sorrow; ἀνία (trouble) is the hinderance of motion (α

and ἰένοι); ἀλγηδὼν (distress), if I am not mistaken, is a foreign word, which is derived from ἀλγεινός; ὀδυνὴ (grief) is called ἀπὸ τῆς ἐνδύσεως τῆς λύπης, from the putting on sorrow; in ἀχθηδὼν (vexation), the word too labors, as any one may see; χαρὰ (joy) is the very expression of the fluency and diffusion of the soul (χέω); τερπνὸν (delightful) is so called from the breath creeping through the soul, which may be likened to a breath, and is properly ἑρπνοῦν, but has been altered by time into τερπνόν; εὐφροσύνη (cheerfulness) and ἐπιθυμία explain themselves; the former, which ought to be εὐφερωσύνη, and has been changed into εὐφροσύνη, is named, as every one may see, from the soul moving in harmony with nature; ἐπιθυμία is really ἡ ἐπὶ τὸν θυμὸν ἴουσα δύναμις, the power which invades the soul; θυμὸς (passion) is called from the rushing (θύσεως) and boiling of the soul; ἵμερος (desire) denotes the stream which most draws the soul, ὅτι ἱέμενος ῥεῖ, and διὰ τὴν ἕσιν τῆς ῥοῆς — because with desire flowing, and because of the desire to flow, and expresses a longing after things and violent attraction of the soul, and is termed ἵμερος from possessing this power; πόθος (longing) is expressive of the desire of that which is not present but absent, and in another place ἀλλοθί που; this is the reason why the name πόθος is applied to things absent, as ἵμερος is to things present; ἔρως (love) is so called because flowing in from without; the stream is not inherent, but is an influence introduced through the eyes, and from flowing in was called ἔσρος (influx) in the old time when they used ο for ω; and is called ἔρως, now that ω is substituted for ο. But why do you not give me another word? 420

Her. What do you think of δόξα and that class of words?

Soc. Δόξα is either derived from δίωξις (pursuit), and expresses the march of the soul in the pursuit of knowledge, or from ἡ ἀπὸ τοῦ τόξου βολή (the shooting of a bow); the latter is more likely and is confirmed by οἴησις, which is only οἴσις τῆς ψυχῆς, and implies the movement of the soul to the essential nature of each thing — οἴσις ἐπὶ τὸ πρᾶγμα οἷόν ἐστιν; just as βουλὴ has to do with shooting; and βούλεσθαι (to wish) combines the notion of aiming and deliberating: all these words seem to follow δόξα, and are so many expressions of shooting, just as ἀβουλία, on the other hand, is a mishap, or missing, or mistaking of the mark, or aim, or proposal, or object.

Her. You are quickening your pace now, Socrates.

Soc. Why, yes, the end I now commit to[1] God, not, however, until I have explained ἀνάγκη (necessity), which ought to come next, and ἑκούσιον (the voluntary). Ἑκούσιον is certainly the yielding and unresisting — the notion implied is yielding and not opposing, yielding as I was just now saying, to that motion which is in accordance with our will; but the necessary and resistant (ἀντιτυποῦν) being contrary to our will, has to do with error and ignorance; the idea is taken from walking through a ravine which is impassable, and rugged, and overgrown, and impedes motion — and this is the derivation of the word ἀναγκαῖον (necessary), ἀν' ἄγκη ἰὸν, which may be compared to walking through a ravine. But while my strength lasts let us persevere, and I hope that you will persevere with your questions.

421 *Her.* Well, then, let me ask about the greatest and noblest, such as ἀλήθεια and ψεῦδος and ὄν, not forgetting to inquire why the word ὄνομα (name), which is the theme of our discussion, has an ὄνομα or name.

Soc. You know the word μαίεσθαι (to seek)?

Her. Yes; meaning the same as ζητεῖν (to inquire).

Soc. The word ὄνομα seems to be a compressed sentence, signifying ὅτι τοῦτ' ἐστιν ὃι οὗ τυγχάνει ζήτημα (that this is in reality that which is being sought); this is more obvious in ὀνομαστὸν, which states in so many words that real existence is that for which there is a search (ὂν οὗ μάσμα ἐστίν); ἀλήθεια is also an agglomeration of θεία ἄλη, implying the divine motion of existence; ψεῦδος is the opposite of motion; here is another ill name given by the legislator to stagnation and forced inaction, which are compared by him to sleep (εὕδειν); but the original meaning of the word is disguised by the addition of ψ; ὄν and οὐσία are ἰὸν with an ι broken off; this agrees with the true principle, for being is also moving, and the same may be said of not being, which is likewise called not going, οὐκ ὄν, οὐκ ἰὸν or οὐκίον.

Her. You have knocked them to pieces manfully; but suppose that some one were to say to you, what is the word ἰὸν, and what are ῥέον and δοῦν? — show me their fitness.

Soc. You mean to say, how should I answer him?

Her. Yes.

Soc. One way of giving the appearance of an answer has been already suggested.

Her. What is that?

[1] Reading θεῷ.

Soc. To say that names which we do not understand are of foreign origin — this is very likely the true answer, and some of them may be foreign words; but also the original forms may have been lost in the lapse of ages; names have been so twisted in all manner of ways, that I should not be surprised if the old language were to appear to us now to be quite like a barbarous tongue.

Her. That is very likely.

Soc. Yes, very likely. But the business is serious, and must be seriously considered. At the same time, we should remember, that if a person go on analyzing names into words, and inquiring also into the elements out of which the words are formed, and is continually doing this, he who has to answer him must at last give up the inquiry in despair.

Her. Very true.

Soc. And at what point ought he to lose heart and give up the inquiry? Must he not stop when he comes to the 422
names which are the elements of all other names and sentences; for these cannot be supposed to be made up of other names? The word ἀγαθὸν, for example, as we were saying, is a compound of ἀγαστὸς and θοός. And probably θοὸς is made up of other elements, and these again of others. But if we take a word which is incapable of further resolution, then we shall be right in saying that we have at last reached a primary element, which need not be resolved any further.

Her. I believe that to be true.

Soc. And suppose the names about which you are now asking should turn out to be primary elements, then their truth or law must be examined according to some new method.

Her. That is very likely.

Soc. Yes, Hermogenes, that is very likely. All that has preceded certainly leads up to this conclusion. And if, as I think, the conclusion is true, then I shall again say to you, come and help me, that I may not fall into some absurdity in stating the principle of primary names.

Her. Let me hear, and I will do my best to assist you.

Soc. I think that you will acknowledge with me, that one principle is applicable to all names, primary as well as secondary, when regarded simply as names.

Her. Certainly.

Soc. All the names that we have been explaining were intended to indicate the nature of things.

Her. Of course.

Soc. And this is true of the primary quite as much as of the secondary names, as is implied in their being names?

Her. Surely.

Soc. But the secondary, as I conceive, derive their significance from the primary.

Her. That is evident.

Soc. Very good; but then how do the primary names which precede analysis show the natures of things, as far as they can be shown; which they must do, if they are to be real names? And here I will ask you a question: Suppose that we had no voice or tongue, and wanted to communicate with one another, should we not, like the deaf and dumb, make signs with the hands and head and the rest of the body?

Her. There would be no choice, Socrates.

423 *Soc.* We should imitate the nature of the thing; the elevation of our hands to heaven would mean lightness and upwardness; heaviness and downwardness would be expressed by letting them drop to the ground; the running of a horse, or any other animal, would be expressed by the most nearly similar gestures of our own frame.

Her. I do not see that we could do anything else.

Soc. Yes; by bodily imitation only can the body ever be supposed to express anything.

Her. Very true.

Soc. And when we want to indicate our meaning, either with the voice, or tongue, or mouth, is not the indication of anything by means of them identical with their imitation of that thing?

Her. That, I think, must be acknowledged.

Soc. Then a name is a vocal imitation of that which the vocal imitator names or imitates?

Her. That, I think, is true.

Soc. Nay, my friend, I am disposed to think that we have not reached the truth as yet.

Her. Why not?

Soc. Because then we should be obliged to admit that the people who imitate sheep, or cocks, or other animals, name that which they imitate.

Her. That is true.

Soc. Then could I have been right in saying what I did?

Her. In my opinion, no. But I wish that you would tell me, Socrates, what sort of an imitation is a name?

Soc. In the first place, I should reply, not a musical imitation, although that is also vocal; nor, again, an imitation of that which music imitates; that, in my judgment, would not be naming. Let me put the matter thus: all objects have sound and figure, and many have color?

Her. Certainly.

Soc. But the art of naming is not to be supposed to have anything to do with those forms of imitation; the arts which have to do with them are music and drawing.

Her. True.

Soc. Again, is there not a notion or essence of each thing just as there is in color, or figure, or sound? And is there not an essence of color and sound as well as of anything else which may be said to have an essence?

Her. That is true.

Soc. Well, and if any one could express the essence of each thing in letters and syllables, would he not express the nature of each thing?

Her. Certainly he would.

Soc. The musician and the painter were the two names which you gave to the two other imitators. What will 424
this imitator be called?

Her. I imagine, Socrates, that he must be the namer, or name-giver, of whom we are in search.

Soc. If this is true, then I think that we are in a condition to consider the names ῥοὴ (stream), ἰέναι (to go), σχέσις (retention), about which you were asking; and we may see whether the namer has grasped the nature of them in letters and syllables in such a manner as to imitate the essence or not.

Her. Very good.

Soc. But are these the only primary names, or are there others?

Her. There must be others.

Soc. Yes, that I should expect. But how shall we analyze them, and where does the imitator begin? Imitation of the essence is made by syllables and letters; ought we not, therefore, first to separate the letters, just as those who are beginning rhythm first distinguish the powers of single elements, and then of compounds, and then, and not until then, proceed to the consideration of rhythms?

Her. Yes.

Soc. Must we not begin in the same way with letters; first

separating the vowels into classes, and then the consonants and mutes, according to the received distinctions of the learned; also the semi-vowels, which are not vowels, neither are they mutes; and the differences of the vowels themselves? and when we have perfected the classification of things, then we shall give them names, and see whether, as in the case of letters, there are any classes to which they may be all referred;[1] and hence we shall see their natures, and see, too, whether they have in them classes as there are in the letters; and when we have well considered all this, we shall know how to apply them — whether one letter is used to denote one thing, or whether there is to be an admixture of several of them; just as in painting the painter, who wants to depict anything, sometimes uses purple only, or any other color, and sometimes mixes up several colors, as his method is when he has to paint flesh color or anything of that kind — he uses his colors as his figures appear to require them; and so, too, we shall apply letters to the expression of objects, either single letters when required, or several
425 letters; and then we shall form syllables, as they are called, and from syllables make nouns and verbs; and thus, at last, from the combinations of nouns and verbs, arrive at language, large and fair and whole; and as the painter made a figure, even so shall we make speech by the art of the namer or the rhetorician, or by some art or other. Not that I am literally speaking of ourselves, but I was carried away — meaning to say that this was the way in which the ancients formed language, and what they put together we must take to pieces in like manner, if we are to attain a scientific view of the whole subject; and we must see whether the primary, and also whether the secondary elements are rightly given or not, for if they are not, the composition of them, my dear Hermogenes, will be a sorry piece of work, and in the wrong direction.

Her. That, Socrates, I can quite believe.

Soc. Well, but do you suppose that you are able to analyze them in this way? for I am certain that I am not.

Her. Much less am I likely to be able.

Soc. Shall we leave them, then? or shall we seek to discover, if we can, something about them, according to the measure of our ability, saying by way of preface, as I said before of the gods, that we know nothing of the truth about them, and

[1] The text is here uncertain; the most probable meaning has been followed. Cp. Phaedrus, 271.

do but attain conjecture of human notions of them. And in this present inquiry, let us keep saying to ourselves, as we proceed, that this is the true method which we or others who would analyze language to any purpose must follow; but under the circumstances, as men say, we must do as well as we can with them. What do you think of this?

Her. I very much approve.

Soc. That objects should be limited and find an expression in letters and syllables may appear ridiculous, Hermogenes, but this cannot be helped — there is no better principle to which we can look for the truth of first names. Deprived of this, we must have recourse to a "Deus ex machinâ," like the tragic poets, who have their gods suspended in the air; and we must get out of the difficulty in their fashion, by saying that "the gods gave the first names, and therefore they are right." This will be the best contrivance, or perhaps that other notion may be even better still, of deriving them from some barbarous people, for the barbarians are older than we are; or we may say that antiquity has cast a veil over them, which is the same sort of excuse as the last; for all these are not reasons but only ingenious excuses for having no reasons. And yet any sort of ignorance of first or primitive names involves an ignorance of secondary words; for they can only be explained by the primary. Clearly then the professor of languages should be able to give a very lucid explanation of first names, or let him be assured he will only talk nonsense about the rest. Do you not suppose that this is true? 426

Her. Certainly, Socrates.

Soc. My first notions of original names are truly wild and ridiculous, though I have no objection to impart them to you if you desire, and I hope that you will communicate to me in return anything better that you may have.

Her. Fear not; I will do my best.

Soc. In the first place, the letter ῥ appears to me to be the general instrument expressing all motion (κίνησις). But I have not yet explained the meaning of this latter word, which is just ἴεσις; for the letter η was not in use among the ancients, who only employed ε; and the root is κίειν, which is a dialectical form, the same as ἰέναι. And the old word κίνησις will be correctly given as ἴεσις in corresponding modern letters. Assuming this foreign root κίειν, and allowing for the change of the η and the insertion of the ν, we have κίνησις, which should have

been κιείνησις or εἶσις; and στᾶσις is the negative of ἴεναι (or εἶσις), and has been improved into στάσις. Now the letter ῥ, as I was saying, appeared to the imposer of names an excellent instrument for the expression of motion; and he frequently uses the letter for this purpose: for example, in the actual word ῥεῖν and ῥοὴ he represents motion by ῥ; also in the words τρόμος (trembling), τραχὺς (rugged); and again, in words such as θραύειν (crush), κρούειν (strike), ἐρείκειν (bruise), θρύπτειν (break), κερματίζειν (crumble), ῥυμβεῖν (whirl): of all these sorts of movements he generally finds an expression in the letter R, because, as I imagine, he had observed that the tongue was most agitated and least at rest in the pronunciation of this letter, which he therefore used in order to express motion, just as he used ι to express the subtle elements which pass through
427 all things. This is why he uses the letter ι as imitative of motion, ἰέναι, ἰέσθαι. And there is another class of letters, φ, ψ, σ and ζ, of which the pronunciation is accompanied by great expenditure of wind; these are used in the imitation of such notions as ψυχρὸν (shivering), ζέον (seething), σείσεθαι (to be shaken), σεισμὸς (shock), and are generally introduced by the imposer of names when he wants to imitate what is windy. He seems also to have thought that the closing and pressure of the tongue in the utterance of δ and τ had a notion of binding and rest in a place: he further observed the limpid movement of λ, in the pronunciation of which the tongue slips, and in this he found the expression of smoothness, as in λεῖος (level), and in the word ὀλισθάνειν (to slip) itself, λιπαρὸν (sleek), κολλῶδες (gluey), and the like; the heavier sound of γ detained the slipping tongue, and in the union of the two found the expression of a glutinous, clammy nature, as in γλισχρὸς, γλυκὺς, γλοιώδης. The ν he observed to be sounded from within, and therefore to have a notion of inwardness; this he gave to ἔνδον and ἐντός: α he assigned to the expression of size, and η of length, because they are great letters: ο was the sign of roundness, and therefore there is plenty of ο mixed up in the word γόγγυλον (round) Thus did the legislator, impressing signs and names on things in letters and syllables, and out of these compounding others also by imitation. That is my view, Hermogenes, of the correctness of names; but I should like to hear what Cratylus has more to say.

Her. But, Socrates, as I was telling you before, Cratylus mystifies me; he says that there is a fitness of names, but he

never explains what this fitness is, so that I cannot tell whether his obscurity is intended or not. Tell me now, Cratylus, here in the presence of Socrates, do you agree in what Socrates has been saying about names, or have you something better of your own? and if you have, tell me what your view is, and then you will either learn of Socrates, or Socrates and I will learn of you.

Crat. Well, but surely, Hermogenes, you do not suppose that you can learn, or I explain, any subject of importance all in a moment; at any rate, not such a subject as language, which is, perhaps, the very greatest of all.

Her. No, indeed; but, as Hesiod says, and I agree with 428
him, "to add little to little" is worth while. And, therefore, if you think that you can do any good at all, however small, take a little trouble and oblige Socrates, and me too, who certainly have a claim upon you.

Soc. I am by no means positive, Cratylus, in the view which Hermogenes and myself have worked out, and therefore I should like to hear yours, which I dare say is far better, and which, if better, I shall gladly receive. For you have evidently reflected on these matters, and had teachers, and if you have really a better theory of the truth of names, you may add me to the number of your disciples.

Crat. You are right, Socrates, in saying that I have attended to these matters, and not impossibly I might turn you into a disciple. But I fear that the reverse is the more probable, for, as I remember, Achilles in the "Prayers" says to Ajax, —

> "Illustrious Ajax, son of Telamon, king of men,
> You appear to have spoken in all things much to my mind."

And you, Socrates, appear to me to be an oracle, and to give answers much to my mind, whether you are inspired by Euthyphro, or whether some Muse may have long been an inhabitant of your breast, unconsciously to yourself.

Soc. Excellent Cratylus, I marvel at my own wisdom, and am incredulous. And I think that I ought to reconsider what I am saying, for there is nothing worse than self-deception — when the deceiver is always at home and always with you — that is, indeed, terrible, and therefore I ought often to retrace my steps and endeavor to "look fore and aft," as the aforesaid Homer says. Have we not been saying that the true name indicates the nature of the thing: Is that acknowledged?

Crat. Yes, Socrates, that is quite true, as I am disposed to think.

Soc. Names, then, are given in order to instruct?

Crat. Certainly.

Soc. And naming is an art, and has artificers?

Crat. Yes.

Soc. And who are they?

Crat. The legislators, of whom you spoke at first.

429 *Soc.* And does this art grow up among men like other arts? Let me explain what I mean: Of painters, some are better and some worse?

Crat. Yes.

Soc. The better painters execute their works, I mean their figures, better, and the worse execute them worse; and of builders also, the better sort build fairer houses, and the worse build them worse.

Crat. True.

Soc. And among legislators, there are some who do their work better and some worse?

Crat. No, I do not agree with you in thinking that.

Soc. Then you do not think that some laws are better and others worse?

Crat. No, indeed.

Soc. Or that one name is better than another?

Crat. Certainly not.

Soc. Then all names are rightly imposed?

Crat. Yes, if they are names at all.

Soc. Well, what do you say to the name of our friend Hermogenes, which was mentioned before: Assuming that he has nothing of the nature of Hermes in him, shall we say that this is not his name or a wrong name?

Crat. I should reply that this name is not his, but only appears to be his, and is really that of somebody else, who has the nature which the name indicates.

Soc. And if a man were to call him Hermogenes, would he not be even speaking falsely? For there may be a doubt whether you can call him Hermogenes, if he is not.

Crat. What do you mean?

Soc. Are you maintaining that falsehood is impossible? For to that I should answer, that there have been plenty of liars in all ages.

Crat. Why, Socrates, how can a man say that which is not?

— say something and yet nothing? For is not falsehood saying the thing which is not?

Soc. That my friend, is an argument which is too subtle for me at my age. But I should like to know whether you are one of those philosophers who think that falsehood may be spoken but not said?

Crat. Neither spoken nor said.

Soc. Nor uttered nor addressed. For example: If a person, saluting you as a stranger, were to take your hand and say: "Hail, Athenian stranger, Hermogenes son of Smicrion," — these words, whether spoken, said, uttered, or addressed, would have no application to you but only to our friend Hermogenes, or perhaps to nobody at all?

Crat. In my opinion, Socrates, the speaker would only be talking nonsense.

Soc. Well, but that will be quite enough for me, if you will tell me whether the nonsense would be true or false, or partly true and partly false: that is all which I want to know. 430

Crat. I should say that the motion of his lips would be an unmeaning sound like the noise of hammering at a brazen pot.

Soc. But let us see, Cratylus, whether there may not be a middle term between us, for you would admit that the name is not the same as the thing named?

Crat. I should.

Soc. And would you further acknowledge that the name is an imitation of the thing?

Crat. Certainly.

Soc. And you would say that pictures are also imitations of things, but in another way?

Crat. Yes.

Soc. I dare say that you may be right, and that I do not rightly understand you. Please to say, then, whether both sorts of imitation (I mean both pictures or words) are not equally attributable and applicable to the things imitated.

Crat. They are.

Soc. First look at the matter thus: you may attribute the likeness of the man to the man, and of the woman to the woman; and so of anything?

Crat. Certainly.

Soc. And conversely you may attribute the likeness of the man to the woman, and of the woman to the man?

Crat. That is true.

Soc. And are both modes of assigning them right, or only the first?

Crat. Only the first.

Soc. That is to say, the mode of assignment which attributes to each that which belongs to them and is like them?

Crat. That is my view.

Soc. Now then, as I am desirous that we, being friends, should have a good understanding about the argument, let me state my view to you: the first mode of assignment, whether applied to figures or to names, I call right, and when applied to names only, true as well as right; and the other mode of giving and assigning the name which is unlike, I call wrong, and in the case of names, false as well as wrong.

Crat. That may be true, Socrates, in the case of pictures; they may be wrongly assigned; but not in the case of names — they must be always right.

Soc. Why, what is the difference? May I not go to a man and say to him, "This is your picture," showing him his own likeness, or perhaps the likeness of a woman; and when I say "show," I mean bring before the sense of sight?

Crat. Certainly.

Soc. And may I not go to him again, and say, "This is your name?" Now the name, like the picture, is an imitation; and
431 what I mean is, that I may say to him, "This is your name;" and then I may bring to his sense of hearing the imitation, and say, "This is a man;" or of a female of the human species, and say, "This is a woman," as the case may be. Is not all that quite possible?

Crat. I do not wish to say anything against that.

Soc. That is very good of you, if I am right, which need hardly be disputed at present. But if I can assign names as well as pictures to objects, the right assignment of them may be said to be truth, and the wrong assignment of them falsehood. Now if there be such a wrong assignment of names, there may also be a wrong or inappropriate assignment of verbs; and if of names and verbs, then of sentences, for I suppose that they must be made up of them. What do you say to that, Cratylus?

Crat. I agree; and think that what you say is very good.

Soc. And further admitting that primitive nouns may be compared to pictures, then as in pictures you may give all the

appropriate colors and figures, or you may not give them all — some may be wanting; or too many or too much may be added? Is not that true?

Crat. Yes; that is true.

Soc. And he who gives all gives a perfect picture or figure; and he who takes away or adds also gives a picture or figure, but not a good one?

Crat. Yes.

Soc. And upon the same principle, he who by syllables and letters imitates the nature of things, if he gives all that is appropriate will produce a good image, or in other words a name; but if he subtracts or perhaps adds a little, the image which he makes will not be a good one; whence I infer that some names are well and others ill made?

Crat. That is true.

Soc. Then the artist of names may be sometimes good, or he may be bad; that is also true?

Crat. Yes.

Soc. And this artist of names is called the legislator?

Crat. Yes.

Soc. Then like other artists the legislator may be good or he may be bad: there can be no mistake about that, assuming our previous admission?

Crat. That is true, Socrates; but you see that the case of language is different; when by the help of grammar we assign the letters α or β, or any other letters to a certain name, 432 then, if we add, or subtract, or misplace a letter, the name which is written is not only written wrongly, but not written at all; and in case of any of these accidents happening, becomes other than a name.

Soc. But that view may not be entirely correct, Cratylus.

Crat. How do you mean?

Soc. I believe that what you say may be true about multiplications of number, which must be just what they are, or not be at all; for example, the number ten at once becomes other than ten if a unit be added or subtracted, and this is true of any other number: but I hardly think that the truth of qualitative existence, or of images at all, is of this nature; I should say rather that the image, if expressing in every point the entire reality, would no longer be an image. Let us suppose the existence of two objects: one of them shall be Cratylus, and the other the image of Cratylus; and we will suppose, further, that

some god makes not only a representation such as a painter would make of your outward form and color, but also creates an inward nature like yours, having the same warmth and flexure; and infuses into this a motion, and soul, and mind, such as that with which you are endued, and in a word copies all your qualities, and places them by you in another form; would you say that this was Cratylus, and the image of Cratylus, or that there were two Cratyluses?

Crat. I should say that there were two Cratyluses.

Soc. Then you see, my friend, that we must find some other principle of correctness in images, and also in names; and not insist that an image is no longer an image in which something is added or subtracted. Do you not perceive that images are very far from having qualities which are the exact counterpart of the realities which they represent?

Crat. Yes, I see that.

Soc. But, then, how ridiculous would be the effect of names on things, if they were exactly the same with them! For they would be the doubles of them, and no one would be able to determine which are the names and which are the realities.

Crat. That is true.

Soc. Then fear not, but have the courage to admit that one name may be correctly and another incorrectly given; and do not insist that the name shall be exactly the same as the *res ipsa*, but allow the occasional assignation of a wrong letter; and if of a letter also of a noun in a sentence, and if of a noun also of a sentence in a sentence which is not appropriate to the matter, and acknowledge that the thing may be named, and described, so long as the general character of the thing spoken of is retained; and this, as you will remember, was remarked by
433 Hermogenes and myself in the particular instance of the names of the letters.

Crat. Yes, I remember.

Soc. Good; and when this character is preserved, even if some of the proper letters are wanting, still the thing is signified; well, if all the letters are given; not well, when only a few of them are given. I think that we had better admit this, or truth will say, "Too late" to us as to the belated traveller in Aegina, and at things we shall never arrive; or if not, you must find out some new notion of correctness of names, and no longer maintain that a name is the expression of a thing in letters or syllables; for if you say both, you will be inconsistent with yourself.

Crat. I quite acknowledge, Socrates, the truth of what you say, which is very reasonable.

Soc. Then as we are agreed thus far, let us ask ourselves whether the name to be good ought not to have the proper letters?

Crat. Yes.

Soc. And the proper letters are those which are like the things?

Crat. Yes.

Soc. Enough then of names which are rightly given. And in names which are incorrectly given, the greater part may be supposed to be made up of proper and similar letters, or there would be no likeness; but there is likewise a part which is improper, and spoils the formation of the word: you would admit that?

Crat. There would be no use, Socrates, in my fighting about that, as I cannot be satisfied that a name which is incorrectly given is a name at all.

Soc. Do you admit that a name is the representation of a thing?

Crat. Certainly.

Soc. And do you not allow that some nouns are primitive, and some derived?

Crat. Yes, I do.

Soc. Then if you admit that primitive or first nouns are representations of things, is there any better way of framing representations than by assimilating them to the objects as much as you can; or do you prefer the notion of Hermogenes and of many others who say that names are conventional, and have a meaning to those who have agreed about them, and who have previous knowledge of the things intended by them, and that convention is the only principle; and whether you abide by our present convention, or make a new and opposite one, according to which you call small great and great small — that, as they say, makes no difference, if you are only agreed: Which of these two notions do you prefer?

Crat. There is the most utter and entire difference, Socrates, between representation by likeness, and representation by any chance sign. 434

Soc. Very good: but if the name is to be like the thing, the letters out of which the first names are composed must also be like things. Returning to the image of the picture, I would ask,

How could any one ever compose a picture which would be like anything at all, if there were not pigments in nature which resembled the things imitated, and out of which the picture is composed?

Crat. Impossible.

Soc. No more could names ever resemble any actually existing thing, unless the original elements of which they are compounded bore a resemblance to the objects of which the names are the imitation: And the original elements are letters?

Crat. Yes.

Soc. Let me now invite you to consider what Hermogenes and I were saying about sounds. Do you agree with me that the letter ῥ is expressive of motion and hardness? Were we right or wrong in saying that?

Crat. I should say that you were right.

Soc. And that λ was expressive of smoothness, and softness, and the like?

Crat. Right in that, too.

Soc. And yet, as you are aware, that which is called by us σκληρότης, is by the Eretrians called σκληρότηρ.

Crat. Very true.

Soc. But are the letters ῥ and σ equivalents; and is there the same significance to them in the termination ῥ, which there is to us in σ, or is there no significance to one of us?

Crat. I should say that there is a significance to both of us.

Soc. In as far as they are like, or in as far as they are unlike?

Crat. In as far as they are like.

Soc. Are they altogether alike?

Crat. Yes; for the purpose of expressing motion.

Soc. And what do you say of the insertion of the λ? for that is expressive not of hardness but of softness.

Crat. Why, perhaps that is wrongly inserted, Socrates, and should be altered into ῥ, as you were saying to Hermogenes, and in my opinion rightly, when you spoke of adding and subtracting letters upon occasion.

Soc. Good. But still the word is intelligible to both of us; when I say σκληρὸς, you know what I mean.

Crat. Yes, my dear friend, and the explanation of that is custom.

Soc. And what is custom but convention? I utter a sound
435 which has a meaning to me, and you know the meaning which this sound has to me; that is what you are maintaining?

Crat. Yes.

Soc. But if when I speak you know my meaning, that is an indication given by me to you?

Crat. Yes.

Soc. And yet this indication of my meaning may proceed not only from like, but from unlike, as in the instance of the λ in σκληρότης. But if this is true, then you have made a convention with yourself, and the correctness of a name turns out to be convention, since letters which are unlike are indicative equally with those which are like, if they are sanctioned by custom and convention. And even supposing that you distinguish custom from convention ever so much, still you must say that custom and not likeness is the mode of indication, for custom may indicate by the unlike as well as by the like. But as we are agreed about this, Cratylus (for I shall assume that your silence gives consent), then custom and convention must be supposed to contribute to the indication of our thoughts; for suppose we take the instance of number, how can you ever imagine, my good friend, that you will find names for all the numbers, unless you allow that which you term convention and agreement to be in some way concerned with the correctness of names? I quite agree with you that words should as far as possible imitate things, but this influence of imitation, as Hermogenes says, is but a mean thing; and convention, which is a commonplace appliance, has to be superadded with a view to the attainment of correctness in names; for I believe that if we could always, or almost always, use likenesses, which are the appropriate expressions, that would be the most perfect state of language; as the opposite of this is the most imperfect. But let me ask you, what is the force of names, and what is the use of them?

Crat. The use of names, Socrates, as I should imagine, is to inform: the simple truth is, that he who knows names knows also the things which are expressed by them.

Soc. I suppose you mean to say, Cratylus, that as the name is, so is also the thing; and that he who knows the one will also know the other, because they are similars, and there is one and the same art or science of similars; and therefore you would say, that he who knows names will also know things.

Crat. That is exactly what I mean.

Soc. But let us consider what is the nature of this information about things which, according to you, is given us by names?

436 Is this the best sort of information? or is there any other? What do you say?

Crat. I believe that this is the only and the best sort of information about them, and that there can be no other.

Soc. But do you believe that this is the mode of discovering them? — that he who discovers the names discovers also the things: or is there one mode of inquiry and discovery, and of instruction another?

Crat. I certainly believe that there is one method of inquiry and discovery, and also of instruction.

Soc. Well, but do you not see, Cratylus, that he who follows names in the search after things, and analyzes their meaning, is in great danger of being deceived?

Crat. How is that?

Soc. Why clearly he who first gave names gave them according to his conception of the things which they signified — you would allow that?

Crat. Yes.

Soc. And if his conception was erroneous, and he gave names according to his conception, what will be the situation of us who follow him? Shall we not be deceived by him?

Crat. But, Socrates, am I not right in thinking that he must surely have known; or else, as I was saying, his names would not be names at all? And you have a clear proof that he has not missed the truth, which is this — that he is perfectly consistent: did you ever observe in speaking that all words have the same laws, and all point the same way?

Soc. But that, friend Cratylus, is no defense of him. For if he did begin in error, he may have forced the remainder into agreement with the original error and with himself; there would be nothing strange in this, any more than in geometrical diagrams, which often have a slight and invisible flaw in the first part of the process, and are consistently mistaken in the long deductions which follow. And this is the reason why every man should expend his chief thought and attention on the consideration of his first principles: Are they or are they not rightly laid down? and when he has sifted them all the rest will follow. But I should be astonished to find that names are really consistent. And here let us revert to our former discussion: Were we not saying that all things are in motion, and progress, and flux, and that this idea of motion is expressed by names? Do you not conceive that to be the meaning of them?

Crat. Yes; that is their meaning, and the true meaning.

Soc. Let us revert to ἐπιστήμη, and observe how ambiguous this word is, seeming rather to signify the stopping of the soul at things than the going round with them; and therefore we should rather leave the beginning as at present, and not reject the ε (cp. p. 412), but make an insertion of an ι instead of an ε (not πιστήμη, but ἐπιιστήμη). Take another example: βέβαιον is clearly the expression of station and position, and not of motion. Again, the word ἱστορία bears upon the face of it the stopping of the stream; and the word πιστὸν certainly indicates cessation of motion; then, again, μνήμη (memory), as any one may see, expresses rest in the soul, and not motion. Moreover, words such as ἁμαρτία and συμφορὰ, which have a bad sense viewed in the light of their etymologies, will be the same as σύνεσις and ἐπιστήμη and other words which have a good sense (comp. ὁμαρτεῖν, συνιέναι, ἕπεσθαι, συμφέρεσθαι); and much the same may be said of ἀμαθία and ἀκολασία, for ἀμαθία may be explained as ἡ ἅμα θεῷ ἰόντος πορεία, and ἀκολασία as ἡ ἀκολουθία τοῖς πράγμασιν. Thus, the names which, as we imagine, have the worst sense, will turn out to be like those which have the best. And I have no doubt that, if you were to take the trouble, you might find many other examples which would lead to the inference that the giver of names meant to imply, not that things were in motion or progress, but that they were at rest, which is the opposite of motion. 437

Crat. Yes, Socrates; but observe that the greater number of words express motion.

Soc. What of that, Cratylus? Are we to count them like votes, and is correctness of names the voice of the majority? Are we to say that of whichever sort there are most, those are to be the true ones?

Crat. No; that is not reasonable.

Soc. Certainly not. Let us, then, have done with this, and proceed to another question about which I should like to know whether you agree with me. Were we not lately acknowledging that the first givers of names in states, both Hellenic and barbarous, were the legislators, and that the art which gave names was the art of the legislator?

Crat. Quite true.

Soc. Tell me, then, did the first legislators, who were the givers of the first names, know or not know the things which they named?

Crat. I imagine, Socrates, that they must have known.

438 *Soc.* Why, yes, friend Cratylus, they could hardly have been ignorant.

Crat. I should say not.

Soc. Let us return to the point from which we digressed. You were saying, if you remember, that he who gave names must have known the things which he named; are you still of that opinion?

Crat. That I am.

Soc. And would you say that the giver of the first names had also a knowledge of the things which he named?

Crat. I should.

Soc. But how could he have learned or discovered things from names if the primitive names were not yet given? And yet we maintain that the only way of learning or discovering things, is either by learning their names of others or discovering them ourselves.

Crat. I think that there is a good deal in that, Socrates.

Soc. But if things are only to be known through names, how can we suppose that the givers of names had knowledge, or were legislators before there were names at all, and therefore before they could have known them?

Crat. I believe, Socrates, the true account of the matter to be, that a power more than human gave things their first names, and that the names which were thus given are necessarily their true names.

Soc. Then how came the giver of the names, if he was an inspired being or God, to contradict himself, as he would have done if, as we were saying, he made some names expressive of rest and others of motion? Or do you think that we were mistaken in saying this?

Crat. But I do not suppose that he did make both of them.

Soc. And which, then, did he make, my good friend; those which are expressive of rest, or those which are expressive of motion? That is a point which, as I said before, cannot be determined by counting them.

Crat. No; that ought not to be the way, Socrates.

Soc. But if this is a battle of names, and some of them are asserting that *they* are like the truth, and others that *they* are, how or by what criterion are we to decide between them? For there are no other names to which appeal can be made, but obviously recourse must be had to another standard which,

without employing names, will make clear which of the two are right; and this, as is obvious, is a standard which shows the truth of things.

Crat. I agree.

Soc. But if that is true, Cratylus, then I suppose that things may be known without names?

Crat. That is manifest.

Soc. But how would you expect to know them? What other way can there be of knowing them, except the true and natural way, through their affinities, when they are akin to each other, and through themselves? For that which is other and different from them must signify something other and different from them.

Crat. That, as I think, is true.

Soc. Well, but reflect; have we not several times acknowledged that names rightly given are the likenesses and images of the things which they name? 439

Crat. Yes.

Soc. Then, if you can learn things in either of two ways — either through the medium of names, and that ever so well, or through the things themselves — which is likely to be the nobler and clearer way; to learn of the image of truth whether the image is fairly imitated and to know the truth which is expressed in the image, or of the truth to learn the very truth, and to know whether the image is rightly executed?

Crat. Of the truth, I should say that we certainly ought to learn.

Soc. How true being is to be studied or discovered is, I suspect, beyond you and me to determine; and we may be content to admit that the knowledge of things is not to be derived from names. No; they must be studied and investigated in themselves, and not from names.

Crat. That is evident, Socrates.

Soc. Still there is another point. I should not like us to be imposed upon by the appearance of a number of names, all tending in the same direction. I do not deny that the givers of names did really give them under the idea that all things were in motion and flux; which was their sincere but, as I think, mistaken opinion. And having fallen into a kind of whirlpool themselves, they are carried round, and want to drag us in after them. There is a matter, Master Cratylus, about which I often dream, and should like to ask your opinion:

Tell me, whether there is or is not any absolute beauty or good, or any other absolute existence?

Crat. Certainly, Socrates, I think that there is.

Soc. Then let us seek the true beauty: not asking whether a face is fair, or anything of that sort, or whether all this is in a flux; but let us ask whether the true beauty is not always beautiful.

Crat. Certainly.

Soc. And can we rightly speak of a beauty which is always passing away, and is first this and then that; must not the same thing be born and retire and vanish while the word is in our mouths?

Crat. Undoubtedly.

Soc. Then how can that be a real thing which is never in the same state? for obviously things which are the same cannot change while they remain the same; and if they are always in the same state and the same, then, without losing their original form, they can never change or be moved.

Crat. Certainly they cannot.

440 *Soc.* Nor yet can they be known by any one; for at the moment that the observer approaches, then they become other and of another nature, so that you cannot get any further in knowing their nature or state, for you cannot know that which has no state.

Crat. That is true.

Soc. Nor can we reasonably say, Cratylus, that there is knowledge at all, if everything is in a state of transition and there is nothing abiding; for if knowledge did not change or cease to be knowledge, then knowledge would ever abide and exist. But if the very nature of knowledge changes, at the time when the change occurs, there will be no knowledge; and if the transition is always going on, there will always be no knowledge, and, according to this view, there will be no one to know and nothing to be known: but if that which knows and that which is known exists ever, and the beautiful and the good and every other thing also exist, then I do not think that they can be like a flux or progress, as we were just now supposing. Whether there is this eternal nature in things, or whether the truth is what Heraclitus and his followers and many others say, is a question hard to determine; and no man of sense will like to put himself or the education of his mind in the power of names; neither will he so far trust names or

the givers of names as to be confident in any knowledge which condemns himself and other existences to an unhealthy state of unreality; he will not believe that everything is in a flux like leaky vessels, or that the world is a sick man who has a running at the nose. This doctrine, Cratylus, may indeed, perhaps, be true, but is also very likely to be untrue; and therefore I would have you reflect well and manfully, and not allow yourself to be too easily persuaded now in the days of your youth, which is the time of learning; but search, and when you have found the truth, come and tell me.

Crat. I will do as you say, though I can assure you, Socrates, that I have been considering the matter already, and the result of a great deal of trouble and consideration is that I incline to Heraclitus.

Soc. Then, another day, my friend, when you come back, you shall give me a lesson; but at present, go into the country, as you are intending, and Hermogenes shall set you on your way.

Crat. Very good, Socrates; and I hope that you will not cease to think about these things yourself.

MENO.

INTRODUCTION.

Steph. 70 THIS Dialogue begins abruptly with a question of Meno, who asks 'whether virtue can be taught.' Socrates replies that he 71 does not as yet know what virtue is, and has never known any one who did. 'Then he cannot have met Gorgias when he was at Athens.' Yes, Socrates had met him, but he has a bad memory, and has forgotten what Gorgias said. Will Meno tell him his own notion, which is probably not very different from 72 that of Gorgias? 'O yes — nothing easier: there is the virtue of a man, of a woman, of an old man, and of a child; there is a virtue of every age and state of life, all of which may be easily described.'

73 Socrates reminds Meno that this is only an enumeration of the virtues and not a definition of the notion which is common to them all. In a second attempt Meno defines virtue to be 'the power of command.' But to this, again, exceptions are taken. For there must be a virtue of those who obey, as well as of those who command; and the power of command must be justly or not unjustly exercised. Meno is very ready to admit that justice is virtue: 'Would you say virtue or a virtue, for there are other 74 virtues, such as courage, temperance, and the like; just as round is a figure, and black and white are colours, and yet there are other figures and other colours. Let Meno take the examples of figure and colour, and try to define them.' Meno confesses his inability, and after a process of interrogation, in which So- 75 crates explains to him the nature of a 'simile in multis,' Socrates himself defines figure as 'the accompaniment of colour.' But some one may object that he does not know the meaning of the word 'colour;' and if he is a candid friend, and not a mere disputant, Socrates is willing to furnish him with a simpler and

Meno.
ANALYSIS.

more philosophical definition, into which no disputed word is allowed to intrude: 'Figure is the limit of form.' Meno imperiously insists that he must still have a definition of colour. Some raillery follows; and at length Socrates is induced to reply, 'that colour is the effluence of form, sensible, and in due proportion to the sight. This definition is exactly suited to the taste of Meno, who welcomes the familiar language of Gorgias and Empedocles. Socrates is of opinion that the more abstract or dialectical definition of figure is far better. 76

Now that Meno has been made to understand the nature of a general definition, he answers in the spirit of a Greek gentleman, and in the words of a poet, 'that virtue is to delight in things honourable, and to have the power of getting them.' This is a nearer approximation than he has yet made to a complete definition, and, regarded as a piece of proverbial or popular morality, is not far from the truth. But the objection is urged, 'that the honourable is the good,' and as every one equally desires the good, the point of the definition is contained in the words, 'the power of getting them.' 'And they must be got justly or with justice.' The definition will then stand thus: 'Virtue is the power of getting good with justice.' But justice is a part of virtue, and therefore virtue is the getting of good with a part of virtue. The definition repeats the word defined. 77 78 79

Meno complains that the conversation of Socrates has the effect of a torpedo's shock upon him. When he talks with other persons he has plenty to say about virtue; in the presence of Socrates, his thoughts desert him. Socrates replies that he is only the cause of perplexity in others, because he is himself perplexed. He proposes to continue the enquiry. But how, asks Meno, can he enquire either into what he knows or into what he does not know? This is a sophistical puzzle, which, as Socrates remarks, saves a great deal of trouble to him who accepts it. But the puzzle has a real difficulty latent under it, to which Socrates will endeavour to find a reply. The difficulty is the origin of knowledge: — 80 81

He has heard from priests and priestesses, and from the poet Pindar, of an immortal soul which is born again and again in successive periods of existence, returning into this world when she has paid the penalty of ancient crime, and, having wandered

over all places of the upper and under world, and seen and known all things at one time or other, is by association out of one thing capable of recovering all. For nature is of one kindred; and
82 every soul has a seed or germ which may be developed into all knowledge. The existence of this latent knowledge is further proved by the interrogation of one of Meno's slaves, who, in the skilful hands of Socrates, is made to acknowledge some elementary relations of geometrical figures. The theorem that
83– the square of the diagonal is double the square of the side — that
85 famous discovery of primitive mathematics, in honour of which the legendary Pythagoras is said to have sacrificed a hecatomb — is elicited from him. The first step in the process of teaching has made him conscious of his own ignorance. He has had the 'torpedo's shock' given him, and is the better for the operation.
86 But whence had the uneducated man this knowledge? He had never learnt geometry in this world; nor was it born with him; he must therefore have had it when he was not a man. And as he always either was or was not a man, he must have always had it. (Cp. Phaedo, 73 B.)

After Socrates has given this specimen of the true nature of teaching, the original question of the teachableness of virtue is renewed. Again he professes a desire to know 'what virtue is'
87 first. But he is willing to argue the question, as mathematicians say, under an hypothesis. He will assume that if virtue is know-
88 ledge, then virtue can be taught. (This was the stage of the argument at which the Protagoras concluded.)

Socrates has no difficulty in showing that virtue is a good, and that goods, whether of body or mind, must be under the direction of knowledge. Upon the assumption just made, then,
89 virtue is teachable. But where are the teachers? There are none to be found. This is extremely discouraging. Virtue is no sooner discovered to be teachable, than the discovery follows that it is not taught. Virtue, therefore, is and is not teachable.

90 In this dilemma an appeal is made to Anytus, a respectable and well-to-do citizen of the old school, and a family friend of Meno,
91 who happens to be present. He is asked 'whether Meno shall
92 go to the Sophists and be taught.' The suggestion throws him into
93 a rage. 'To whom, then, shall Meno go?' asks Socrates. To any Athenian gentleman — to the great Athenian statesmen of past

Meno. ANALYSIS.

times. Socrates replies here, as elsewhere (Laches 179 C foll.; Prot. 319 foll.), that Themistocles, Pericles, and other great men, 94 had sons to whom they would surely, if they could have done so, have imparted their own political wisdom; but no one ever heard that these sons of theirs were remarkable for anything except riding and wrestling and similar accomplishments. Anytus is angry at the imputation which is cast on his favourite statesmen, and on a class to which he supposes himself to belong (cp. 95 A); he breaks off with a significant hint. The mention of 95 another opportunity of talking with him (99 E), and the suggestion that Meno may do the Athenian people a service by pacifying him (100), are evident allusions to the trial of Socrates.

Socrates returns to the consideration of the question 'whether virtue is teachable,' which was denied on the ground that there are no teachers of it: (for the Sophists are bad teachers, and the 96 rest of the world do not profess to teach). But there is another point which we failed to observe, and in which Gorgias has never instructed Meno, nor Prodicus Socrates. This is the nature of right opinion. For virtue may be under the guidance of right 97 opinion as well as of knowledge; and right opinion is for practical purposes as good as knowledge, but is incapable of being taught, and is also liable, like the images of Daedalus, to 'walk off,' 98 because not bound by the tie of the cause. This is the sort of instinct which is possessed by statesmen, who are not wise or knowing persons, but only inspired or divine. The higher virtue, 99 which is identical with knowledge, is an ideal only. If the statesman had this knowledge, and could teach what he knew, he would be like Tiresias in the world below,—'he alone has wisdom, 100 but the rest flit like shadows.'

INTRODUCTION.

This Dialogue is an attempt to answer the question, Can virtue be taught? No one would either ask or answer such a question in modern times. But in the age of Socrates it was only by an effort that the mind could rise to a general notion of virtue as distinct from the particular virtues of courage, liberality, and the like. And when a hazy conception of this ideal was attained, it was only by a further effort that the question of the teachableness of virtue could be resolved.

The answer which is given by Plato is paradoxical enough,

and seems rather intended to stimulate than to satisfy enquiry. Virtue is knowledge, and therefore virtue can be taught. But virtue is not taught, and therefore in this higher and ideal sense there is no virtue and no knowledge. The teaching of the Sophists is confessedly inadequate, and Meno, who is their pupil, is ignorant of the very nature of general terms. He can only produce out of their armoury the sophism, 'that you can neither enquire into what you know nor into what you do not know;' to which Socrates replies by his theory of reminiscence.

To the doctrine that virtue is knowledge, Plato has been constantly tending in the previous Dialogues. But the new truth is no sooner found than it vanishes away. 'If there is knowledge, there must be teachers; and where are the teachers?' There is no knowledge in the higher sense of systematic, connected, reasoned knowledge, such as may one day be attained, and such as Plato himself seems to see in some far off vision of a single science. And there are no teachers in the higher sense of the word; that is to say, no real teachers who will arouse the spirit of enquiry in their pupils, and not merely instruct them in rhetoric or impart to them ready-made information for a fee of 'one' or of 'fifty drachms.' Plato is desirous of deepening the notion of education, and therefore he asserts the paradox that there are no educators. This paradox, though different in form, is not really different from the remark which is often made in modern times by those who would depreciate either the methods of education commonly employed, or the standard attained — that 'there is no true education among us.'

There remains still a possibility which must not be overlooked. Even if there be no true knowledge, as is proved by 'the wretched state of education,' there may be right opinion, which is a sort of guessing or divination resting on no knowledge of causes, and incommunicable to others. This is the gift which our statesmen have, as is proved by the circumstance that they are unable to impart their knowledge to their sons. Those who are possessed of it cannot be said to be men of science or philosophers, but they are inspired and divine.

There may be some trace of irony in this curious passage, which forms the concluding portion of the Dialogue. But Plato certainly does not mean to intimate that the supernatural or divine is the

Meno.
INTRODUCTION.

true basis of human life. To him knowledge, if only attainable in this world, is of all things the most divine. Yet, like other philosophers, he is willing to admit that 'probability is the guide of life[1];' and he is at the same time desirous of contrasting the wisdom which governs the world with a higher wisdom. There are many instincts, judgments, and anticipations of the human mind which cannot be reduced to rule, and of which the grounds cannot always be given in words. A person may have some skill or latent experience which he is able to use himself and is yet unable to teach others, because he has no principles, and is incapable of collecting or arranging his ideas. He has practice, but not theory; art, but not science. This is a true fact of psychology, which is recognized by Plato in this passage. But he is far from saying, as some have imagined, that inspiration or divine grace is to be regarded as higher than knowledge. He would not have preferred the poet or man of action to the philosopher, or the virtue of custom to the virtue based upon ideas.

Also here, as in the Ion and Phaedrus, Plato appears to acknowledge an unreasoning element in the higher nature of man. The philosopher only has knowledge, and yet the statesman and the poet are inspired. There may be a sort of irony in regarding in this way the gifts of genius. But there is no reason to suppose that he is deriding them, any more than he is deriding the phenomena of love or of enthusiasm in the Symposium, or of oracles in the Apology, or of divine intimations when he is speaking of the daemonium of Socrates. He recognizes the lower form of right opinion, as well as the higher one of science, in the spirit of one who desires to include in his philosophy every aspect of human life; just as he recognizes the existence of popular opinion as a fact, and the Sophists as the expression of it.

This Dialogue probably contains the first intimation of the doctrine of reminiscence and of the immortality of the soul.[2] The proof is very slight even slighter than in the Phaedo and Republic. Because men had abstract ideas in a previous state, they must have always had them, and their souls therefore must have always existed (86 A). For they must always have been either

[1] Butler's Analogy.

[2] Cp. *infra* p. 12, *ad fin.*

men or not men. The fallacy of the latter words is transparent. And Socrates himself appears to be conscious of their weakness; for he adds immediately afterwards, 'I have said some things of which I am not altogether confident.' (Cp. Phaedo 114 D, 115 D.) It may be observed, however, that the fanciful notion of pre-existence is combined with a true but partial view of the origin and unity of knowledge, and of the association of ideas. Knowledge is prior to any particular knowledge, and exists not in the previous state of the individual, but of the race. It is potential, not actual, and can only be appropriated by strenuous exertion.

The idealism of Plato is here presented in a less developed form than in the Phaedo and Phaedrus. Nothing is said of the pre-existence of ideas of justice, temperance, and the like. Nor is Socrates positive of anything but the duty of enquiry (86 B). The doctrine of reminiscence too is explained more in accordance with fact and experience as arising out of the affinities of nature (*ἅτε τῆς φύσεως ὅλης συγγενοῦς οὔσης*). Modern philosophy says that all things in nature are dependent on one another; the ancient philosopher had the same truth latent in his mind when he affirmed that out of one thing all the rest may be recovered. The subjective was converted by him into an objective; the mental phenomenon of the association of ideas (cp. Phaedo 73 foll.) became a real chain of existences. The germs of two valuable principles of education may also be gathered from the 'words of priests and priestesses:' (1) that true knowledge is a knowledge of causes (cp. Aristotle's theory of *ἐπιστήμη*); and (2) that the process of learning consists not in what is brought to the learner, but in what is drawn out of him.

Some lesser points of the dialogue may be noted, such as (1) the acute observation that Meno prefers the familiar definition, which is embellished with poetical language, to the better and truer one (76 D); or (2) the shrewd reflection, which may admit of an application to modern as well as to ancient teachers, that the Sophists having made large fortunes, this must surely be a criterion of their powers of teaching, for that no man could get a living by shoemaking who was not a good shoemaker (91 C); or (3) the remark, conveyed almost in a word, that the verbal sceptic is saved the labour of thought and enquiry *οὐδὲν δεῖ τῷ τοιούτῳ ζητήσεως*, 80 E). Characteristic also of the temper of the Socratic

Meno. INTRODUCTION.

enquiry is, (4) the proposal to discuss the teachableness of virtue under an hypothesis, after the manner of the mathematicians (87 A); and (5) the repetition of the favourite doctrine which occurs so frequently in the earlier and more Socratic Dialogues, and gives a colour to all of them — that mankind only desire evil through ignorance (77, 78 foll.); (6) the experiment of eliciting from the slave-boy the mathematical truth which is latent in him, and (7) the remark (84 B) that he is all the better for knowing his ignorance.

The character of Meno, like that of Critias, has no relation to the actual circumstances of his life. Plato is silent about his treachery to the Ten Thousand Greeks, which Xenophon has recorded, as he is also silent about the crimes of Critias. He is a Thessalian Alcibiades, rich and luxurious — a spoilt child of fortune, and is described as the hereditary friend of the great king. Like Alcibiades he is inspired with an ardent desire of knowledge, and is equally willing to learn of Socrates and of the Sophists. He may be regarded as standing in the same relation to Gorgias as Hippocrates in the Protagoras to the other great Sophist. He is the sophisticated youth on whom Socrates tries his cross-examining powers just as in the Charmides, the Lysis, and the Euthydemus, ingenuous boyhood is made the subject of a similar experiment. He is treated by Socrates in a half-playful manner suited to his character; at the same time he appears not quite to understand the process to which he is being subjected. For he is exhibited as ignorant of the very elements of dialectics, in which the Sophists have failed to instruct their disciple. His definition of virtue as 'the power and desire of attaining things honourable,' like the first definition of justice in the Republic, is taken from a poet. His answers have a sophistical ring, and at the same time show the sophistical incapacity to grasp a general notion.

Anytus is the type of the narrow-minded man of the world, who is indignant at innovation, and equally detests the popular teacher and the true philosopher. He seems, like Aristophanes, to regard the new opinions, whether of Socrates or the Sophists, as fatal to Athenian greatness. He is of the same class as Callicles in the Gorgias, but of a different variety; the immoral and sophistical doctrines of Callicles are not attributed to him. The moderation with which he is described is remarkable, if he be the accuser of

Socrates, as is apparently indicated by his parting words. Perhaps Plato may have been desirous of showing that the accusation of Socrates was not to be attributed to badness or malevolence, but rather to a tendency in men's minds. Or he may have been regardless of the historical truth of the characters of his dialogue, as in the case of Meno and Critias. Like Chaerephon (Apol. 21) the real Anytus was a democrat, and had joined Thrasybulus in the conflict with the Thirty.

The Protagoras arrived at a sort of hypothetical conclusion, that if 'virtue is knowledge, it can be taught.' In the Euthydemus, Socrates himself offered an example of the manner in which the true teacher may draw out the mind of youth; this was in contrast to the quibbling follies of the Sophists. In the Meno the subject is more developed; the foundations of the enquiry are laid deeper, and the nature of knowledge is more distinctly explained. There is a progression by antagonism of two opposite aspects of philosophy. But at the moment when we approach nearest, the truth doubles upon us and passes out of our reach. We seem to find that the ideal of knowledge is irreconcilable with experience. In human life there is indeed the profession of knowledge, but right opinion is our actual guide. There is another sort of progress from the general notions of Socrates, who asked simply, 'what is friendship?' 'what is temperance?' 'what is courage?' as in the Lysis, Charmides, Laches, to the transcendentalism of Plato, who, in the second stage of his philosophy, sought to find the nature of knowledge in a prior and future state of existence.

The difficulty in framing general notions which has appeared in this and in all the previous Dialogues recurs in the Gorgias and Theaetetus as well as in the Republic. In the Gorgias too the statesmen reappear, but in stronger opposition to the philosopher. They are no longer allowed to have a divine insight, but, though acknowledged to have been clever men and good speakers, are denounced as 'blind leaders of the blind.' The doctrine of the immortality of the soul is also carried further, being made the foundation not only of a theory of knowledge, but of a doctrine of rewards and punishments. In the Republic the relation of knowledge to virtue is described in a manner more consistent with modern distinctions. The existence of the virtues without the possession of knowledge in the higher or philosophical sense is

Meno. INTRODUCTION.

admitted to be possible. Right opinion is again introduced in the Theaetetus as an account of knowledge, but is rejected on the ground that it is irrational (as here, because it is not bound by the tie of the cause), and also because the conception of false opinion is given up as hopeless. The doctrines of Plato are necessarily different at different times of his life, as new distinctions are realized, or new stages of thought attained by him. We are not therefore justified, in order to take away the appearance of inconsistency, in attributing to him hidden meanings or remote allusions.

There are no external criteria by which we can determine the date of the Meno. There is no reason to suppose that any of the Dialogues of Plato were written before the death of Socrates; the Meno, which appears to be one of the earliest of them, is proved to have been of a later date by the allusion of Anytus (94 E, 95 A. Cp. also 80 B, 100 B).

We cannot argue that Plato was more likely to have written, as he has done, of Meno before than after his miserable death; for we have already seen, in the examples of Charmides and Critias, that the characters in Plato are very far from resembling the same characters in history. The repulsive picture which is given of him in the Anabasis of Xenophon (ii. 6), where he also appears as the friend of Aristippus 'and a fair youth having lovers,' has no other trait of likeness to the Meno of Plato.

The place of the Meno in the series is doubtfully indicated by internal evidence. The main character of the Dialogue is Socrates; but to the 'general definitions' of Socrates is added the Platonic doctrine of reminiscence. The problems of virtue and knowledge have been discussed in the Lysis, Laches, Charmides, and Protagoras; the puzzle about knowing and learning has already appeared in the Euthydemus. The doctrines of immortality and pre-existence are carried further in the Phaedrus and Phaedo; the distinction between opinion and knowledge is more fully developed in the Theaetetus. The lessons of Prodicus, whom he facetiously calls his master, are still running in the mind of Socrates. Unlike the later Platonic Dialogues, the Meno arrives at no conclusion. Hence we are led to place the Dialogue at some point of time later than the Protagoras, and earlier than the Phaedrus and Gorgias. The place which is assigned to it in

this work is due mainly to the desire to bring together in a single volume all the Dialogues which contain allusions to the trial and death of Socrates.

On the Ideas of Plato.

Plato's doctrine of ideas has attained an imaginary clearness and definiteness which is not to be found in his own writings. The popular account of them is partly derived from one or two passages in his Dialogues interpreted without regard to their poetical environment. It is due also to the misunderstanding of him by the Aristotelian school; and the erroneous notion has been further narrowed and has become fixed by the realism of the schoolmen. This popular view of the Platonic ideas may be summed up in some such formula as the following: 'Truth consists not in particulars, but in universals, which have a place in the mind of God, or in some far-off heaven. These were revealed to men in a former state of existence, and are recovered by reminiscence (*ἀνάμνησις*) or association from sensible things. The sensible things are not realities, but shadows only, in relation to the truth.' These unmeaning propositions are hardly suspected to be a caricature of a great theory of knowledge, which Plato in various ways and under many figures of speech is seeking to unfold. Poetry has been converted into dogma; and it is not remarked that the Platonic ideas are to be found only in about a third of Plato's writings and are not confined to him. The forms which they assume are numerous, and if taken literally, inconsistent with one another. At one time we are in the clouds of mythology, at another among the abstractions of mathematics or metaphysics; we pass imperceptibly from one to the other. Reason and fancy are mingled in the same passage. The ideas are sometimes described as many, coextensive with the universals of sense and also with the first principles of ethics; or again they are absorbed into the single idea of good, and subordinated to it. They are not more certain than facts, but they are equally certain (Phaedo 100 A). They are both personal and impersonal. They are abstract terms: they are also the causes of things; and they are even transformed into the demons or spirits by whose help God made the world. And the idea of good (Rep. vi. 505 ff.) may without violence be converted

Meno.

INTRODUCTION.

into the Supreme Being, who 'because He was good' created all things (Tim. 29 E).

It would be a mistake to try and reconcile these differing modes of thought. They are not to be regarded seriously as having a distinct meaning. They are parables, prophecies, myths, symbols, revelations, aspirations after an unknown world. They derive their origin from a deep religious and contemplative feeling, and also from an observation of curious mental phenomena. They gather up the elements of the previous philosophies, which they put together in a new form. Their great diversity shows the tentative character of early endeavours to think. They have not yet settled down into a single system. Plato uses them, though he also criticises them; he acknowledges that both he and others are always talking about them, especially about the Idea of Good; and that they are not peculiar to himself (Phaedo 100 B; Rep. vi. 505; Soph. 248 ff.). But in his later writings he seems to have laid aside the old forms of them. As he proceeds he makes for himself new modes of expression more akin to the Aristotelian logic.

Yet amid all these varieties and incongruities, there is a common meaning or spirit which pervades his writings, both those in which he treats of the ideas and those in which he is silent about them. This is the spirit of idealism, which in the history of philosophy has had many names and taken many forms, and has in a measure influenced those who seemed to be most averse to it. It has often been charged with inconsistency and fancifulness, and yet has had an elevating effect on human nature, and has exercised a wonderful charm and interest over a few spirits who have been lost in the thought of it. It has been banished again and again, but has always returned. It has attempted to leave the earth and soar heavenwards, but soon has found that only in experience could any solid foundation of knowledge be laid. It has degenerated into pantheism, but has again emerged. No other knowledge has given an equal stimulus to the mind. It is the science of sciences, which are also ideas, and under either aspect require to be defined. They can only be thought of in due proportion when conceived in relation to one another. They are the glasses through which the kingdoms of science are seen, but at a distance. All the greatest minds, except when living in an age of reaction against them, have unconsciously fallen under their power.

The account of the Platonic ideas in the Meno is the simplest and clearest, and we shall best illustrate their nature by giving this first and then comparing the manner in which they are described elsewhere, e. g. in the Phaedrus, Phaedo, Republic; to which may be added the criticism of them in the Parmenides, the personal form which is attributed to them in the Timaeus, the logical character which they assume in the Sophist and Philebus, and the allusion to them in the Laws (xii. 964). In the Cratylus they dawn upon him with the freshness of a newly-discovered thought (439).

The Meno (81 ff.) goes back to a former state of existence, in which men did and suffered good and evil, and received the reward or punishment of them until their sin was purged away and they were allowed to return to earth. This is a tradition of the olden time, to which priests and poets bear witness. The souls of men returning to earth bring back a latent memory of ideas, which were known to them in a former state. The recollection is awakened into life and consciousness by the sight of the things which resemble them on earth. The soul evidently possesses such innate ideas before she has had time to acquire them. This is proved by an experiment tried on one of Meno's slaves, from whom Socrates elicits truths of arithmetic and geometry, which he had never learned in this world. He must therefore have brought them with him from another.

The notion of a previous state of existence is found in the verses of Empedocles and in the fragments of Heracleitus. It was the natural answer to two questions, 'Whence came the soul? What is the origin of evil?' and prevailed far and wide in the East. It found its way into Hellas probably though the medium of Orphic and Pythagorean rites and mysteries. It was easier to think of a former than of a future life, because such a life has really existed for the race though not for the individual, and all men come into the world, if not 'trailing clouds of glory,' at any rate able to enter into the inheritance of the past. In the Phaedrus (245 ff.), as well as in the Meno, it is this former rather than a future life on which Plato is disposed to dwell. There the Gods, and men following in their train, go forth to contemplate the heavens, and are borne round in the revolutions of them. There they see the divine forms of justice, temperance, and the like, in their unchangeable beauty, but not without an effort more

Meno. INTRODUCTION.

than human. The soul of man is likened to a charioteer and two steeds, one mortal, the other immortal. The charioteer and the mortal steed are in fierce conflict; at length the animal principle is finally overpowered, though not extinguished, by the combined energies of the passionate and rational elements. This is one of those passages in Plato which, partaking both of a philosophical and poetical character, is necessarily indistinct and inconsistent. The magnificent figure under which the nature of the soul is described has not much to do with the popular doctrine of the ideas. Yet there is one little trait in the description which shows that they are present to Plato's mind, namely, the remark that the soul, which had seen truths in the form of the universal (248 C, 249 C), cannot again return to the nature of an animal.

In the Phaedo, as in the Meno, the origin of ideas is sought for in a previous state of existence. There was no time when they could have been acquired in this life, and therefore they must have been recovered from another. The process of recovery is no other than the ordinary law of association, by which in daily life the sight of one thing or person recalls another to our minds, and by which in scientific enquiry from any part of knowledge we may be led on to infer the whole. It is also argued that ideas, or rather ideals, must be derived from a previous state of existence because they are more perfect than the sensible forms of them which are given by experience (74 ff.). But in the Phaedo the doctrine of ideas is subordinate to the proof of the immortality of the soul. 'If the soul existed in a previous state, then it will exist in a future state, for a law of alternation pervades all things.' And, 'If the ideas exist, then the soul exists; if not, not.' It is to be observed, both in the Meno and the Phaedo, that Socrates expresses himself with diffidence. He speaks in the Phaedo (114 D, 115 D) of the words with which he has comforted himself and his friends, and will not be too confident that the description which he has given of the soul and her mansions is exactly true, but he 'ventures to think that something of the kind is true.' And in the Meno, after dwelling upon the immortality of the soul, he adds, 'Of some things which I have said I am not altogether confident' (cp. 86 C, and Apology, pp. 40 ff.; Gorgias 527 B). From this class of uncertainties he exempts the difference between truth and appearance, of which he is absolutely convinced (98 B).

Meno.

INTRODUCTION.

In the Republic the ideas are spoken of in two ways, which though not contradictory are different. In the tenth book (596 ff.) they are represented as the genera or general ideas under which individuals having a common name are contained. For example, there is the bed which the carpenter makes, the picture of the bed which is drawn by the painter, the bed existing in nature of which God is the author. Of the latter all visible beds are only the shadows or reflections. This and similar illustrations or explanations are put forth, not for their own sake, or as an exposition of Plato's theory of ideas, but with a view of showing that poetry and the mimetic arts are concerned with an inferior part of the soul and a lower kind of knowledge. On the other hand, in the 6th and 7th books of the Republic we reach the highest and most perfect conception, which Plato is able to attain, of the nature of knowledge. The ideas are now finally seen to be one as well as many, causes as well as ideas, and to have a unity which is the idea of good and the cause of all the rest. They seem, however, to have lost their first aspect of universals under which individuals are contained, and to have been converted into forms of another kind, which are inconsistently regarded from the one side as images or ideals of justice, temperance, holiness and the like; from the other as hypotheses, or mathematical truths or principles.

In the Timaeus, which in the series of Plato's works immediately follows the Republic, though probably written some time afterwards, no mention occurs of the doctrine of ideas. Geometrical forms and arithmetical ratios furnish the laws according to which the world is created. But though the conception of the ideas as genera or species is forgotten or laid aside, the distinction of the visible and intellectual is as firmly maintained as ever (30, 37). The *idea* of good likewise disappears and is superseded by the conception of a personal God, who works according to a final cause or principle of goodness which he himself is. No doubt is expressed by Plato, either in the Timaeus or in any other dialogue, of the truths which he conceives to be the first and highest. It is not the existence of God or the idea of good which he approaches in a tentative or hesitating manner, but the investigations of physiology. These he regards, not seriously, as a part of philosophy, but as an innocent recreation (Tim. 59 D).

Meno.

INTRODUCTION.

Passing on to the Parmenides (128–136), we find in that dialogue not an exposition or defence of the doctrine of ideas, but an assault upon them, which is put into the mouth of the veteran Parmenides, and might be ascribed to Aristotle himself, or to one of his disciples. The doctrine which is assailed takes two or three forms, but fails in any of them to escape the dialectical difficulties which are urged against it. It is admitted that there are ideas of all things, but the manner in which individuals partake of them, whether of the whole or of the part, and in which they become like them, or how ideas can be either within or without the sphere of human knowledge, or how the human and divine can have any relation to each other, is held to be incapable of explanation. And yet, if there are no universal ideas, what becomes of philosophy? (Parmenides 130–135). In the Sophist the theory of ideas is spoken of as a doctrine held not by Plato, but by another sect of philosophers, called 'the Friends of Ideas,' probably the Megarians, who were very distinct from him, if not opposed to him (Sophist 242 ff.). Nor in what may be termed Plato's abridgement of the history of philosophy (Soph. 241 ff.), is any mention made such as we find in the first book of Aristotle's Metaphysics, of the derivation of such a theory or of any part of it from the Pythagoreans, the Eleatics, the Heracleiteans, or even from Socrates. In the Philebus, probably one of the latest of the Platonic Dialogues, the conception of a personal or semi-personal deity expressed under the figure of mind, the king of all, who is also the cause, is retained. The one and many of the Phaedrus and Theaetetus is still working in the mind of Plato, and the correlation of ideas, not of 'all with all,' but of 'some with some,' is asserted and explained. But they are spoken of in a different manner, and are not supposed to be recovered from a former state of existence. The metaphysical conception of truth passes into a psychological one, which is continued in the Laws, and is the final form of the Platonic philosophy, so far as can be gathered from his own writings (see especially Laws v. 727 ff.). In the Laws he harps once more on the old string, and returns to general notions: — these he acknowledges to be many, and yet he insists that they are also one. The guardian must be made to recognize the truth, for which he has contended long ago in the Protagoras, that the virtues are four,

but they are also in some sense one (Laws xii. pp. 965–966; cp. Protagoras 329).

So various, and if regarded on the surface only, inconsistent, are the statements of Plato respecting the doctrine of ideas. If we attempted to harmonize or to combine them, we should make out of them, not a system, but the caricature of a system. They are the ever-varying expression of Plato's Idealism. The terms used in them are in their substance and general meaning the same, although they seem to be different. They pass from the subject to the object, from earth (diesseits) to heaven (jenseits), without regard to the gulf which later theology and philosophy have made between them. They are also intended to supplement or explain each other. They relate to a subject of which Plato himself would have said that 'he was not confident of the precise form of his own statements, but was strong in the belief that something of the kind was true.' It is the spirit, not the letter, in which they agree — the spirit which places the divine above the human, the spiritual above the material, the one above the many, the mind before the body.

The stream of ancient philosophy in the Alexandrian and Roman times widens into a lake or sea, and then disappears underground to reappear after many ages in a distant land. It begins to flow again under new conditions, at first confined between high and narrow banks, but finally spreading over the continent of Europe. It is and is not the same with ancient philosophy. There is a great deal in modern philosophy which is inspired by ancient. There is much in ancient philosophy which was 'born out of due time' and before men were capable of understanding it. To the fathers of modern philosophy, their own thoughts appeared to be new and original, but they carried with them an echo or shadow of the past, coming back by recollection from an elder world. Of this the enquirers of the seventeenth century, who to themselves appeared to be working out independently the enquiry into all truth, were unconscious. They stood in a new relation to theology and natural philosophy, and for a time maintained towards both an attitude of reserve and separation. Yet the similarities between modern and ancient thought are greater far than the differences. All philosophy, even that part of it which is

Meno.
INTRODUCTION.

said to be based upon experience, is really ideal; and ideas are not only derived from facts, but they are also prior to them and extend far beyond them, just as the mind is prior to the senses.

Early Greek speculation culminates in the ideas of Plato, or rather in the single idea of good. His followers, and perhaps he himself, having arrived at this elevation, instead of going forwards went backwards from philosophy to psychology, from ideas to numbers. But what we perceive to be the real meaning of them, an explanation of the nature and origin of knowledge, will always continue to be one of the first problems of philosophy.

Plato also left behind him a most potent instrument, the forms of logic — arms ready for use, but not yet taken out of their armoury. They were the late birth of the early Greek philosophy, and were the only part of it which has had an uninterrupted hold on the mind of Europe. Philosophies come and go; but the detection of fallacies, the framing of definitions, the invention of methods still continue to be the main elements of the reasoning process.

Modern philosophy, like ancient, begins with very simple conceptions. It is almost wholly a reflection on self. It might be described as a quickening into life of old words and notions latent in the semi-barbarous Latin, and putting a new meaning into them. Unlike ancient philosophy, it has been unaffected by impressions derived from outward nature: it arose within the limits of the mind itself. From the time of Descartes to Hume and Kant it has had little or nothing to do with facts of science. On the other hand, the ancient and mediaeval logic retained a continuous influence over it, and a form like that of mathematics was easily impressed upon it; the principle of ancient philosophy which is most apparent in it is scepticism; we must doubt nearly every traditional or received notion, that we may hold fast one or two. The being of God in a personal or impersonal form was a mental necessity to the first thinkers of modern times: from this alone all other ideas could be deduced. There had been an obscure presentiment of 'cogito, ergo sum' more than 2000 years previously. The Eleatic notion that being and thought were the same was revived in a new form by Descartes. But now it gave birth to consciousness and self-reflection: it awakened the 'ego' in human nature. The mind naked and abstract has no

other certainty but the conviction of its own existence. 'I think, therefore I am;' and this thought is God thinking in me, who has also communicated to the reason of man his own attributes of thought and extension — these are truly imparted to him because God is true (cp. Rep. ii. 382 ff.). It has been often remarked that Descartes, having begun by dismissing all presuppositions, introduces several: he passes almost at once from scepticism to dogmatism. It is more important for the illustration of Plato to observe that he, like Plato, insists that God is true and incapable of deception (Rep. ii. 382) — that he proceeds from general ideas, that many elements of mathematics may be found in him. A certain influence of mathematics both on the form and substance of their philosophy is discernible in both of them. After making the greatest opposition between thought and extension, Descartes, like Plato, supposes them to be reunited for a time, not in their own nature but by a special divine act (cp. Phaedrus 246 C), and he also supposes all the parts of the human body to meet in the pineal gland, that alone affording a principle of unity in the material frame of man. It is characteristic of the first period of modern philosophy, that having begun (like the Presocratics) with a few general notions, Descartes first falls absolutely under their influence, and then quickly discards them. At the same time he is less able to observe facts, because they are too much magnified by the glasses through which they are seen. The common logic says 'the greater the extension, the less the comprehension,' and we may put the same thought in another way and say of abstract or general ideas, that the greater the abstraction of them, the less are they capable of being applied to particular and concrete natures.

Not very different from Descartes in his relation to ancient philosophy is his successor Spinoza, who lived in the following generation. The system of Spinoza is less personal and also less dualistic that than of Descartes. In this respect the difference between them is like that between Xenophanes and Parmenides. The teaching of Spinoza might be described generally as the Jewish religion reduced to an abstraction and taking the form of the Eleatic philosophy. Like Parmenides, he is overpowered and intoxicated with the idea of Being or God. The greatness of both philosophies consists in the immensity of a thought which

Meno. INTRODUCTION.

excludes all other thoughts; their weakness is the necessary separation of this thought from actual existence and from practical life. In neither of them is there any clear opposition between the inward and outward world. The substance of Spinoza has two attributes, which alone are cognizable by man, thought and extension; these are in extreme opposition to one another, and also in inseparable identity. They may be regarded as the two aspects or expressions under which God or substance is unfolded to man. Here a step is made beyond the limits of the Eleatic philosophy. The famous theorem of Spinoza, 'Omnis determinatio est negatio,' is already contained in the 'negation is relation' of Plato's Sophist. The grand description of the philosopher in Republic vi, as the spectator of all time and all existence, may be paralleled with another famous expression of Spinoza, 'Contemplatio rerum sub specie eternitatis.' According to Spinoza finite objects are unreal, for they are conditioned by what is alien to them, and by one another. Human beings are included in the number of them. Hence there is no reality in human action and no place for right and wrong. Individuality is accident. The boasted freedom of the will is only a consciousness of necessity. Truth, he says, is the direction of the reason towards the infinite, in which all things repose; and herein lies the secret of man's well-being. In the exaltation of the reason or intellect, in the denial of the voluntariness of evil (Timaeus 86 C, D; Laws, ix. 860), Spinoza approaches nearer to Plato than in his conception of an infinite substance. As Plato, following Socrates, said that virtue is knowledge, so Spinoza would have maintained that knowledge alone is good, and what contributes to knowledge, useful. Both are equally far from any real experience or observation of nature. And the same difficulty is found in both when we seek to apply their ideas to life and practice. There is a gulf fixed between the infinite substance and finite objects or individuals of Spinoza, just as there is between the ideas of Plato and the world of sense.

Removed from Spinoza by less than a generation is the philosopher Leibnitz, who after deepening and intensifying the opposition between mind and matter, reunites them by his preconcerted harmony (cp. again Phaedrus 246 C). To him all the particles of matter are living beings which reflect on one another, and in the least of them the whole is contained. Here we

catch a reminiscence both of the ὁμοιομερῆ or similar particles of Anaxagoras, and of the world-animal of the Timaeus.

In Bacon and Locke we have another development in which the mind of man is supposed to receive knowledge by a new method and to work by observation and experience. But we may remark that it is the idea of experience, rather than experience itself, with which the mind is filled. It is a symbol of knowledge rather than the reality which is vouchsafed to us. The Organon of Bacon is not much nearer to actual facts than the Organon of Aristotle or the Platonic idea of good. Many of the old rags and ribbons which defaced the garment of philosophy have been stripped off, but some of them still adhere. A crude conception of the ideas of Plato survives in the 'forms' of Bacon. And on the other hand, there are many passages of Plato in which the importance of the investigation of facts is as much insisted upon as by Bacon. Both are almost equally superior to the illusions of language, and are constantly crying out against them, as against other idols.

Locke cannot be truly regarded as the author of sensationalism any more than of idealism. His system is based upon experience, but with him experience includes reflection as well as sense. His analysis and construction of ideas has no foundation in fact; it is only the dialectic of the mind 'talking to herself.' The philosophy of Berkeley is but the use of one word instead of two, which have the same meaning with it. For objects of sense he would substitute sensations. He imagines himself to have changed the relation of the human mind towards God and nature; they remain the same as before, though he has drawn the imaginary line by which they are divided at a different point. He has annihilated the outward world, but it instantly reappears governed by the same laws and described under the same names.

A like remark applies to David Hume, of whose philosophy the central principle is the denial of the relation of cause and effect. He would deprive men of a familiar term which they can ill afford to lose; but he seems not to have observed that this alteration is merely verbal and does not in any degree affect the nature of things. Still less did he remark that he was arguing from the necessary imperfection of language against the most certain facts. And here, again, we may find a parallel with the

Meno. INTRODUCTION.

ancients. He goes beyond facts in his scepticism, as they did in their idealism. Like the ancient Sophists, he relegates the more important principles of ethics to custom and probability. But crude and unmeaning as this philosophy is, it exercised a great influence on his successors, not unlike that which Locke exercised upon Berkeley and Berkeley upon Hume himself. All three were both sceptical and ideal in almost equal degrees. Neither they nor their predecessors had any true conception of language or of the history of philosophy. Hume's paradox has been forgotten by the world, and did not any more than the scepticism of the ancients require to be seriously refuted. Like some other philosophical paradoxes, it would have been better left to die out. It certainly could not be refuted by a philosophy such as Kant's, in which, no less than in the previously mentioned systems, the history of the human mind and the nature of language are almost wholly ignored, and the certainty of objective knowledge is transferred to the subject; while absolute truth is reduced to a figment, more abstract and narrow than Plato's ideas, of 'thing in itself,' to which, if we reason strictly, no predicate can be applied.

The question which Plato has raised respecting the origin and nature of ideas belongs to the infancy of philosophy; in modern times it would no longer be asked. Their origin is only their history, so far as we know it; there can be no other. We may trace them in language, in philosophy, in mythology, in poetry, but we cannot argue *à priori* about them. We may attempt to shake them off, but they are always returning, and in every sphere of science and human action are tending to go beyond facts. They are thought to be innate, because they have been familiar to us all our lives, and we can no longer dismiss them from our mind. Many of them express relations of terms to which nothing exactly or nothing at all *in rerum naturâ* corresponds. We are not such free agents in the use of them as we sometimes imagine. Fixed ideas have taken the most complete possession of some thinkers who have been most determined to renounce them, and have been vehemently affirmed when they could be least explained and were incapable of proof. The world has often been led away by a word to which no distinct meaning could be attached. Abstractions such as 'authority,' 'equality,' 'utility,' 'liberty,' 'pleasure,' 'experience,' 'consciousness,' 'chance,' 'sub-

stance,' 'matter,' 'atom,' and a heap of other metaphysical and theological terms, are the source of quite as much error and illusion and have as little relation to actual facts as the 'ideas' of Plato. Few students of theology or philosophy have sufficiently reflected how quickly the bloom of a philosophy passes away; or how hard it is for one age to understand the writings of another; or how nice a judgment is required of those who are seeking to express the philosophy of one age in the terms of another. The 'eternal truths' of which metaphysicians speak have hardly ever lasted more than a generation. In our own day schools or systems of philosophy which have once been famous have died before the founders of them. We are still, as in Plato's age, groping about for a new method more comprehensive than any of those which now prevail; and also more permanent. And we seem to see at a distance the promise of such a method, which can hardly be any other than the method of idealized experience, having roots which strike far down into the history of philosophy. It is a method which does not divorce the present from the past, or the part from the whole, or the abstract from the concrete, or theory from fact, or the divine from the human, or one science from another, but labours to connect them. Along such a road we have proceeded a few steps, sufficient, perhaps, to make us reflect on the want of method which prevails in our own day. In another age, all the branches of knowledge, whether relating to God or man or nature, will become the knowledge of 'the revelation of a single science' (Symp. 210, 211), and all things, like the stars in heaven, will shed their light upon one another.

MENO.

PERSONS OF THE DIALOGUE.

MENO.	A SLAVE OF MENO.
SOCRATES.	ANYTUS.

Meno. CAN you tell me, Socrates, whether virtue is acquired by teaching or by practice; or if neither by teaching nor by practice, then whether it comes to man by nature, or in what other way?

Meno. SOCRATES, MENO.

Socrates. O Meno, there was a time when the Thessalians were famous among the other Hellenes only for their riches and their riding; but now, if I am not mistaken, they are equally famous for their wisdom, especially at Larisa, which is the native city of your friend Aristippus. And this is Gorgias' doing; for when he came there, the flower of the Aleuadae, among them your admirer Aristippus, and the other chiefs of the Thessalians, fell in love with his wisdom. And he has taught you the habit of answering questions in a grand and bold style, which becomes those who know, and is the style in which he himself answers all comers; and any Hellene who likes may ask him anything. How different is our lot! my dear Meno. Here at Athens there is a dearth of the commodity, and all wisdom seems to have emigrated from us to you. I am certain that if you were to ask any Athenian whether virtue was natural or acquired, he would laugh in your face, and say: 'Stranger, you have far too good an opinion of me, if you think that I can answer your question. For I literally do not know what virtue is, and much less whether it is acquired by teaching or not.' And I myself, Meno, living as I do in this region of poverty, am as poor as the rest of the world; and I confess with

Meno asks Socrates 'How virtue can be acquired?' Before giving an answer Socrates must enquire 'What is virtue?'

Steph. 71

Meno.

SOCRATES, MENO.

shame that I know literally nothing about virtue; and when I do not know the 'quid' of anything how can I know the 'quale'? How, if I knew nothing at all of Meno, could I tell if he was fair, or the opposite of fair; rich and noble, or the reverse of rich and noble? Do you think that I could?

Men. No, indeed. But are you in earnest, Socrates, in saying that you do not know what virtue is? And am I to carry back this report of you to Thessaly?

He does not know, and never met with any one who did.

Soc. Not only that, my dear boy, but you may say further that I have never known of any one else who did, in my judgment.

Men. Then you have never met Gorgias when he was at Athens?

Soc. Yes, I have.

Men. And did you not think that he knew?

Soc. I have not a good memory, Meno, and therefore I cannot now tell what I thought of him at the time. And I dare say that he did know, and that you know what he said: please, therefore, to remind me of what he said; or, if you would rather, tell me your own view; for I suspect that you and he think much alike.

Men. Very true.

Soc. Then as he is not here, never mind him, and do you tell me: By the gods, Meno, be generous, and tell me what you say that virtue is; for I shall be truly delighted to find that I have been mistaken, and that you and Gorgias do really have this knowledge; although I have been just saying that I have never found anybody who had.

Meno describes the different kinds of virtue, but is unable to give a common notion of them.

Men. There will be no difficulty, Socrates, in answering your question. Let us take first the virtue of a man — he should know how to administer the state, and in the administration of it to benefit his friends and harm his enemies; and he must also be careful not to suffer harm himself. A woman's virtue, if you wish to know about that, may also be easily described: her duty is to order her house, and keep what is indoors, and obey her husband. Every age, every condition of life, young or old, male or female, bond or free, has a different virtue: there are virtues numberless, 72 and no lack of definitions of them; for virtue is relative

to the actions and ages of each of us in all that we do. And the same may be said of vice, Socrates[1].

Meno.

SOCRATES, MENO.

Soc. How fortunate I am, Meno! When I ask you for one virtue, you present me with a swarm of them[2], which are in your keeping. Suppose that I carry on the figure of the swarm, and ask of you, What is the nature of the bee? and you answer that there are many kinds of bees, and I reply: But do bees differ as bees, because there are many and different kinds of them; or are they not rather to be distinguished by some other quality, as for example beauty, size, or shape? How would you answer me?

Meno, not without difficulty and by help of many illustrations, is made to understand the nature of common notions.

Men. I should answer that bees do not differ from one another, as bees.

Soc. And if I went on to say: That is what I desire to know, Meno; tell me what is the quality in which they do not differ, but are all alike;—would you be able to answer?

Men. I should.

Soc. And so of the virtues, however many and different they may be, they have all a common nature which makes them virtues; and on this he who would answer the question, 'What is virtue?' would do well to have his eye fixed: Do you understand?

Men. I am beginning to understand; but I do not as yet take hold of the question as I could wish.

Soc. When you say, Meno, that there is one virtue of a man, another of a woman, another of a child, and so on, does this apply only to virtue, or would you say the same of health, and size, and strength? Or is the nature of health always the same, whether in man or woman?

Men. I should say that health is the same, both in man and woman.

Soc. And is not this true of size and strength? If a woman is strong, she will be strong by reason of the same form and of the same strength subsisting in her which there is in the man. I mean to say that strength, as strength, whether of man or woman, is the same. Is there any difference?

Health and strength,

[1] Cp. Arist. Pol. i. 13, § 10.

[2] Cp. Theaet. 146 D.

Meno.

SOCRATES, MENO.

and virtue and temperance and justice are the same both in men and women.

Men. I think not.

Soc. And will not virtue, as virtue, be the same, whether 73
in a child or in a grown-up person, in a woman or in a man?

Men. I cannot help feeling, Socrates, that this case is different from the others.

Soc. But why? Were you not saying that the virtue of a man was to order a state, and the virtue of a woman was to order a house?

Men. I did say so.

Soc. And can either house or state or anything be well ordered without temperance and without justice?

Men. Certainly not.

Soc. Then they who order a state or a house temperately or justly order them with temperance and justice?

Men. Certainly.

Soc. Then both men and women, if they are to be good men and women, must have the same virtues of temperance and justice?

Men. True.

Soc. And can either a young man or an elder one be good, if they are intemperate and unjust?

Men. They cannot.

Soc. They must be temperate and just?

Men. Yes.

Soc. Then all men are good in the same way, and by participation in the same virtues?

Men. Such is the inference.

Soc. And they surely would not have been good in the same way, unless their virtue had been the same?

Men. They would not.

Then what is virtue? Gorgias and Meno reply, 'The power of governing mankind.'

Soc. Then now that the sameness of all virtue has been proven, try and remember what you and Gorgias say that virtue is.

Men. Will you have one definition of them all?

Soc. That is what I am seeking.

Men. If you want to have one definition of them all, I know not what to say, but that virtue is the power of governing mankind.

Soc. And does this definition of virtue include all virtue?

Meno.

SOCRATES, MENO.

Is virtue the same in a child and in a slave, Meno? Can the child govern his father, or the slave his master; and would he who governed be any longer a slave?

Men. I think not, Socrates.

But this cannot apply to all persons.

Soc. No, indeed; there would be small reason in that. Yet once more, fair friend; according to you, virtue is 'the power of governing;' but do you not add 'justly and not unjustly'?

Men. Yes, Socrates; I agree there; for justice is virtue.

Soc. Would you say 'virtue,' Meno, or 'a virtue'?

Men. What do you mean?

Soc. I mean as I might say about anything; that a round, for example, is 'a figure' and not simply 'figure,' and I should adopt this mode of speaking, because there are other figures.

Men. Quite right; and that is just what I am saying about virtue — that there are other virtues as well as justice.

74 *Soc.* What are they? tell me the names of them, as I would tell you the names of the other figures if you asked me.

Meno names the virtues, but is unable to get at the common notion of them.

Men. Courage and temperance and wisdom and magnanimity are virtues; and there are many others.

Soc. Yes, Meno; and again we are in the same case: in searching after one virtue we have found many, though not in the same way as before; but we have been unable to find the common virtue which runs through them all.

Men. Why, Socrates, even now I am not able to follow you in the attempt to get at one common notion of virtue as of other things.

Soc. No wonder; but I will try to get nearer if I can, for you know that all things have a common notion. Suppose now that some one asked you the question which I asked before: Meno, he would say, what is figure? And if you answered 'roundness,' he would reply to you, in my way of speaking, by asking whether you would say that roundness is 'figure' or 'a figure;' and you would answer 'a figure.'

Men. Certainly.

Soc. And for this reason — that there are other figures?

Men. Yes.

Soc. And if he proceeded to ask, What other figures are there? you would have told him.

Meno.

Men. I should.

SOCRATES, MENO.

Soc. And if he similarly asked what colour is, and you answered whiteness, and the questioner rejoined, Would you say that whiteness is colour or a colour? you would reply, A colour, because there are other colours as well.

Men. I should.

Soc. And if he had said, Tell me what they are?—you would have told him of other colours which are colours just as much as whiteness.

Men. Yes.

He has a similar difficulty about the nature of Figure.

Soc. And suppose that he were to pursue the matter in my way, he would say: Ever and anon we are landed in particulars, but this is not what I want; tell me then, since you call them by a common name, and say that they are all figures, even when opposed to one another, what is that common nature which you designate as figure — which contains straight as well as round, and is no more one than the other — that would be your mode of speaking?

Men. Yes.

Soc. And in speaking thus, you do not mean to say that the round is round any more than straight, or the straight any more straight than round?

Men. Certainly not.

Soc. You only assert that the round figure is not more a figure than the straight, or the straight than the round?

Men. Very true.

Soc. To what then do we give the name of figure? Try and answer. Suppose that when a person asked you this question either about figure or colour, you were to reply, Man, I do not understand what you want, or know what you 75
are saying; he would look rather astonished and say: Do you not understand that I am looking for the 'simile in multis'? And then he might put the question in another form: Meno, he might say, what is that 'simile in multis' which you call figure, and which includes not only round and straight figures, but all? Could you not answer that question, Meno? I wish that you would try; the attempt will be good practice with a view to the answer about virtue.

Men. I would rather that you should answer, Socrates.

Soc. Shall I indulge you?

Men. By all means.

Meno.

Soc. And then you will tell me about virtue?

SOCRATES, MENO.

Men. I will.

Soc. Then I must do my best, for there is a prize to be won.

Men. Certainly.

Soc. Well, I will try and explain to you what figure is. What do you say to this answer?— Figure is the only thing which always follows colour. Will you be satisfied with it, as I am sure that I should be, if you would let me have a similar definition of virtue?

Figure is defined by Socrates to be that which always follows colour.

Men. But, Socrates, it is such a simple answer.

Soc. Why simple?

Men. Because, according to you, figure is that which always follows colour.

(*Soc.* Granted).

Men. But if a person were to say that he does not know what colour is, any more than what figure is — what sort of answer would you have given him?

Soc. I should have told him the truth. And if he were a philosopher of the eristic and antagonistic sort, I should say to him: You have my answer, and if I am wrong, your business is to take up the argument and refute me. But if we were friends, and were talking as you and I are now, I should reply in a milder strain and more in the dialectician's vein; that is to say, I should not only speak the truth, but I should make use of premisses which the person interrogated would be willing to admit. And this is the way in which I shall endeavour to approach you. You will acknowledge, will you not, that there is such a thing as an end, or termination, or extremity?— all which words I use in the same sense, although I am aware that Prodicus might draw distinctions about them: but still you, I am sure, would speak of a thing as ended or terminated — that is all which I am saying — not anything very difficult.

Men. Yes, I should; and I believe that I understand your meaning.

76 *Soc.* And you would speak of a surface and also of a solid, as for example in geometry.

Men. Yes.

Soc. Well then, you are now in a condition to understand

Meno.

SOCRATES, MENO.

And now, what is colour?

my definition of figure. I define figure to be that in which the solid ends; or, more concisely, the limit of solid.

Men. And now, Socrates, what is colour?

Soc. You are outrageous, Meno, in thus plaguing a poor old man to give you an answer, when you will not take the trouble of remembering what is Gorgias' definition of virtue.

Men. When you have told me what I ask, I will tell you, Socrates.

Soc. A man who was blindfolded has only to hear you talking, and he would know that you are a fair creature and have still many lovers.

Men. Why do you think so?

Soc. Why, because you always speak in imperatives: like all beauties when they are in their prime, you are tyrannical; and also, as I suspect, you have found out that I have a weakness for the fair, and therefore to humour you I must answer.

Men. Please do.

Soc. Would you like me to answer you after the manner of Gorgias, which is familiar to you?

Men. I should like nothing better.

Meno, Gorgias, and Empedocles are all agreed that colour is an effluence of existence, proportioned to certain passages.

Soc. Do not he and you and Empedocles say that there are certain effluences of existence?

Men. Certainly.

Soc. And passages into which and through which the effluences pass?

Men. Exactly.

Soc. And some of the effluences fit into the passages, and some of them are too small or too large?

Men. True.

Soc. And there is such a thing as sight?

Men. Yes.

Soc. And now, as Pindar says, 'read my meaning:'—colour is an effluence of form, commensurate with sight, and palpable to sense.

Men. That, Socrates, appears to me to be an admirable answer.

Soc. Why, yes, because it happens to be one which you have been in the habit of hearing: and your wit will have

discovered, I suspect, that you may explain in the same way the nature of sound and smell, and of many other similar phenomena. *Meno.* SOCRATES, MENO.

Men. Quite true.

Soc. The answer, Meno, was in the orthodox solemn vein, and therefore was more acceptable to you than the other answer about figure.

Men. Yes.

Soc. And yet, O son of Alexidemus, I cannot help thinking that the other was the better; and I am sure that you would be of the same opinion, if you would only stay and be initiated, and were not compelled, as you said yesterday, to go away before the mysteries.

Men. But I will stay, Socrates, if you will give me many
77 such answers.

Soc. Well then, for my own sake as well as for yours, I will do my very best; but I am afraid that I shall not be able to give you very many as good: and now, in your turn, you are to fulfil your promise, and tell me what virtue is in the universal; and do not make a singular into a plural, as the facetious say of those who break a thing, but deliver virtue to me whole and sound, and not broken into a number of pieces: I have given you the pattern.

Virtue, according to Meno, is the desire of the honourable and the good. His definition is analysed by Socrates.

Men. Well then, Socrates, virtue, as I take it, is when he, who desires the honourable, is able to provide it for himself; so the poet says, and I say too —

'Virtue is the desire of things honourable and the power of attaining them.'

Soc. And does he who desires the honourable also desire the good?

Men. Certainly.

Soc. Then are there some who desire the evil and others who desire the good? Do not all men, my dear sir, desire good?

Men. I think not.

Soc. There are some who desire evil?

Men. Yes.

Soc. Do you mean that they think the evils which they desire, to be good; or do they know that they are evil and yet desire them?

Meno. *Men.* Both, I think.

SOCRATES, MENO. *Soc.* And do you really imagine, Meno, that a man knows evils to be evils and desires them notwithstanding?

Men. Certainly I do.

Soc. And desire is of possession?

Men. Yes, of possession.

Men desire evil, but not what they think to be evil. *Soc.* And does he think that the evils will do good to him who possesses them, or does he know that they will do him harm?

Men. There are some who think that the evils will do them good, and others who know that they will do them harm.

Soc. And, in your opinion, do those who think that they will do them good know that they are evils?

Men. Certainly not.

Soc. Is it not obvious that those who are ignorant of their nature do not desire them; but they desire what they suppose to be goods although they are really evils; and if they are mistaken and suppose the evils to be goods they really desire goods?

Men. Yes, in that case.

Soc. Well, and do those who, as you say, desire evils, and think that evils are hurtful to the possessor of them, know that they will be hurt by them?

Men. They must know it.

Soc. And must they not suppose that those who are hurt 78
are miserable in proportion to the hurt which is inflicted upon them?

Men. How can it be otherwise?

Soc. But are not the miserable ill-fated?

Men. Yes, indeed.

Soc. And does any one desire to be miserable and ill-fated?

Men. I should say not, Socrates.

Soc. But if there is no one who desires to be miserable, there is no one, Meno, who desires evil; for what is misery but the desire and possession of evil?

Men. That appears to be the truth, Socrates, and I admit that nobody desires evil.

Soc. And yet, were you not saying just now that virtue is the desire and power of attaining good?

Men. Yes, I did say so.

Meno.

SOCRATES, MENO.

Soc. But if this be affirmed, then the desire of good is common to all, and one man is no better than another in that respect?

The desire of good is really common to all of them.

Men. True.

Soc. And if one man is not better than another in desiring good, he must be better in the power of attaining it?

Men. Exactly.

Virtue is the power of attaining good with justice.

Soc. Then, according to your definition, virtue would appear to be the power of attaining good?

Men. I entirely approve, Socrates, of the manner in which you now view this matter.

Soc. Then let us see whether what you say is true from another point of view; for very likely you may be right:— You affirm virtue to be the power of attaining goods?

Men. Yes.

Soc. And the goods which you mean are such as health and wealth and the possession of gold and silver, and having office and honour in the state — those are what you would call goods?

Men. Yes, I should include all those.

Soc. Then, according to Meno, who is the hereditary friend of the great king, virtue is the power of getting silver and gold; and would you add that they must be gained piously, justly, or do you deem this to be of no consequence? And is any mode of acquisition, even if unjust or dishonest, equally to be deemed virtue?

Men. Not virtue, Socrates, but vice.

Soc. Then justice or temperance or holiness, or some other part of virtue, as would appear, must accompany the acquisition, and without them the mere acquisition of good will not be virtue.

Men. Why, how can there be virtue without these?

Soc. And the non-acquisition of gold and silver in a dishonest manner for oneself or another, or in other words the want of them, may be equally virtue?

Men. True.

Soc. Then the acquisition of such goods is no more virtue than the non-acquisition and want of them, but whatever is accompanied by justice or honesty is virtue, and whatever
79 is devoid of justice is vice.

Meno.

SOCRATES, MENO.

Men. It cannot be otherwise, in my judgment.

Soc. And were we not saying just now that justice, temperance, and the like, were each of them a part of virtue?

Men. Yes.

Soc. And so, Meno, this is the way in which you mock me.

Men. Why do you say that, Socrates?

But this definition repeats the thing defined:—virtue=the power of attaining good with a part of virtue.

Soc. Why, because I asked you to deliver virtue into my hands whole and unbroken, and I gave you a pattern according to which you were to frame your answer; and you have forgotten already, and tell me that virtue is the power of attaining good justly, or with justice; and justice you acknowledge to be a part of virtue.

Men. Yes.

Soc. Then it follows from your own admissions, that virtue is doing what you do with a part of virtue; for justice and the like are said by you to be parts of virtue.

Men. What of that?

But if we do not know the nature of virtue as a whole, how can we know what a part of virtue is?

Soc. What of that! Why, did not I ask you to tell me the nature of virtue as a whole? And you are very far from telling me this; but declare every action to be virtue which is done with a part of virtue; as though you had told me and I must already know the whole of virtue, and this too when frittered away into little pieces. And, therefore, my dear Meno, I fear that I must begin again and repeat the same question: What is virtue? for otherwise, I can only say, that every action done with a part of virtue is virtue; what else is the meaning of saying that every action done with justice is virtue? Ought I not to ask the question over again; for can any one who does not know virtue know a part of virtue?

Men. No; I do not say that he can.

Soc. Do you remember how, in the example of figure, we rejected any answer given in terms which were as yet unexplained or unadmitted?

Men. Yes, Socrates; and we were quite right in doing so.

Soc. But then, my friend, do not suppose that we can explain to any one the nature of virtue as a whole through some unexplained portion of virtue, or anything at all in that fashion; we should only have to ask over again the old question, What is virtue? Am I not right?

Men. I believe that you are. *Meno.*

Soc. Then begin again, and answer me, What, according to you and your friend Gorgias, is the definition of virtue? SOCRATES, MENO.

Men. O Socrates, I used to be told, before I knew you, that you were always doubting yourself and making others doubt; and now you are casting your spells over me, and I am simply getting bewitched and enchanted, and am at my wits' end. And if I may venture to make a jest upon you, you seem to me both in your appearance and in your power over others to be very like the flat torpedo fish, who torpifies those who come near him and touch him, as you have now torpified me, I think. For my soul and my tongue are really torpid, and I do not know how to answer you; and though I have been delivered of an infinite variety of speeches about virtue before now, and to many persons — and very good ones they were, as I thought — at this moment I cannot even say what virtue is. And I think that you are very wise in not voyaging and going away from home, for if you did in other places as you do in Athens, you would be cast into prison as a magician. Meno compares Socrates to a torpedo whose touch has taken away his sense and speech.

Soc. You are a rogue, Meno, and had all but caught me.

Men. What do you mean, Socrates?

Soc. I can tell why you made a simile about me.

Men. Why?

Soc. In order that I might make another simile about you. For I know that all pretty young gentlemen like to have pretty similes made about them — as well they may — but I shall not return the compliment. As to my being a torpedo, if the torpedo is torpid as well as the cause of torpidity in others, then indeed I am a torpedo, but not otherwise; for I perplex others, not because I am clear, but because I am utterly perplexed myself. And now I know not what virtue is, and you seem to be in the same case, although you did once perhaps know before you touched me. However, I have no objection to join with you in the enquiry. Socrates is the cause of dulness in others because he is himself dull.

Men. And how will you enquire, Socrates, into that which you do not know? What will you put forth as the subject of enquiry? And if you find what you want, how will you ever know that this is the thing which you did not know?

Soc. I know, Meno, what you mean; but just see what a tiresome dispute you are introducing. You argue that How can you enquire about what

Meno.

SOCRATES, MENO.

you do not know, and if you know why should you enquire?

a man cannot enquire either about that which he knows, or about that which he does not know; for if he knows, he has no need to enquire; and if not, he cannot; for he does not know the very subject about which he is to enquire [1].

Men. Well, Socrates, and is not the argument sound? 81

Soc. I think not.

Men. Why not?

Soc. I will tell you why: I have heard from certain wise men and women who spoke of things divine that —

Men. What did they say?

Soc. They spoke of a glorious truth, as I conceive.

Men. What was it? and who were they?

Soc. Some of them were priests and priestesses, who had studied how they might be able to give a reason of their profession: there have been poets also, who spoke of these things by inspiration, like Pindar, and many others who were inspired. And they say — mark, now, and see whether their words are true — they say that the soul of man is immortal, and at one time has an end, which is termed dying, and at another time is born again, but is never destroyed. And the moral is, that a man ought to live always in perfect holiness. '*For in the ninth year Persephone sends the souls of those from whom she has received the penalty of ancient crime back again from beneath into the light of the sun above, and these are they who become noble kings and mighty men and great in wisdom and are called saintly heroes in after ages* [2].' The soul, then, as being immortal, and having been born again many times, and having seen all things that exist, whether in this world or in the world below, has knowledge of them all; and it is no wonder that she should be able to call to remembrance all that she ever knew about virtue, and about everything; for as all nature is akin, and the soul has learned all things, there is no difficulty in her eliciting or as men say learning, out of a single recollection all the rest, if a man is strenuous and does not faint; for all enquiry and all learning is but recollection. And therefore we ought not to listen to this sophistical argument about the impossibility of enquiry: for it will make us idle, and is sweet only to the

The ancient poets tell us that the soul of man is immortal and has a recollection of all that she has ever known in former states of being.

[1] Cp. Aristot. Post. Anal. I. i. 6. [2] Pindar, Frag. 98 (Boeckh).

sluggard; but the other saying will make us active and inquisitive. In that confiding, I will gladly enquire with you into the nature of virtue. *Meno.*

SOCRATES, MENO, MENO'S SLAVE.

Men. Yes, Socrates; but what do you mean by saying that we do not learn, and that what we call learning is only a process of recollection? Can you teach me how this is?

Soc. I told you, Meno, just now that you were a rogue, and now you ask whether I can teach you, when I am saying that
82 there is no teaching, but only recollection; and thus you imagine that you will involve me in a contradiction.

Men. Indeed, Socrates, I protest that I had no such intention. I only asked the question from habit; but if you can prove to me that what you say is true, I wish that you would.

A Greek slave is introduced, from whom certain mathematical conclusions which he has never learned are elicited by Socrates.

Soc. It will be no easy matter, but I will try to please you to the utmost of my power. Suppose that you call one of your numerous attendants, that I may demonstrate on him.

Men. Certainly. Come hither, boy.

Soc. He is Greek, and speaks Greek, does he not?

Men. Yes, indeed; he was born in the house.

Soc. Attend now to the questions which I ask him, and observe whether he learns of me or only remembers.

Men. I will.

Soc. Tell me, boy, do you know that a figure like this is a square?

Boy. I do.

Soc. And you know that a square figure has these four lines equal?

Boy. Certainly.

Soc. And these lines which I have drawn through the middle of the square are also equal?

Boy. Yes.

Soc. A square may be of any size?

Boy. Certainly.

Soc. And if one side of the figure be of two feet, and the other side be of two feet, how much will the whole be? Let me explain: if in one direction the space was of two feet, and in the other direction of one foot, the whole would be of two feet taken once?

Boy. Yes.

Meno.

SOCRATES, MENO, MENO'S SLAVE.

Soc. But since this side is also of two feet, there are twice two feet?

Boy. There are.

Soc. Then the square is of twice two feet?

Boy. Yes.

Soc. And how many are twice two feet? count and tell me.

Boy. Four, Socrates.

Soc. And might there not be another square twice as large as this, and having like this the lines equal?

Boy. Yes.

Soc. And of how many feet will that be?

Boy. Of eight feet.

Soc. And now try and tell me the length of the line which forms the side of that double square: this is two feet — what will that be?

Boy. Clearly, Socrates, it will be double.

He is partly guessing.

Soc. Do you observe, Meno, that I am not teaching the boy anything, but only asking him questions; and now he fancies that he knows how long a line is necessary in order to produce a figure of eight square feet; does he not?

Men. Yes.

Soc. And does he really know?

Men. Certainly not.

Soc. He only guesses that because the square is double, the line is double.

Men. True.

Soc. Observe him while he recalls the steps in regular order. (*To the Boy.*) Tell me, boy, do you assert that a double space comes from a double line? Remember that I am not speaking of an oblong, but of a figure equal every way, and twice the size of this — that is to say of eight feet; and I want to know whether you still say that a double square comes from a double line?

Boy. Yes.

Soc. But does not this line become doubled if we add another such line here?

Boy. Certainly.

Soc. And four such lines will make a space containing eight feet?

Boy. Yes.

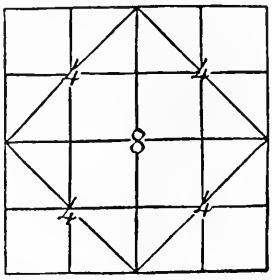
Meno.

SOCRATES, MENO'S SLAVE.

Soc. Let us describe such a figure: Would you not say that this is the figure of eight feet?

Boy. Yes.

Soc. And are there not these four divisions in the figure, each of which is equal to the figure of four feet?



Boy. True.

Soc. And is not that four times four?

Boy. Certainly.

Soc. And four times is not double?

Boy. No, indeed.

Soc. But how much?

Boy. Four times as much.

Soc. Therefore the double line, boy, has given a space, not twice, but four times as much.

Boy. True.

Soc. Four times four are sixteen — are they not?

Boy. Yes.

Soc. What line would give you a space of eight feet, as this gives one of sixteen feet; — do you see?

Boy. Yes.

Soc. And the space of four feet is made from this half line?

Boy. Yes.

Soc. Good; and is not a space of eight feet twice the size of this, and half the size of the other?

Boy. Certainly.

Soc. Such a space, then, will be made out of a line greater than this one, and less than that one?

Boy. Yes; I think so.

Soc. Very good; I like to hear you say what you think. And now tell me, is not this a line of two feet and that of four?

Boy. Yes.

Soc. Then the line which forms the side of eight feet ought to be more than this line of two feet, and less than the other of four feet?

He has now learned to realize his own ignorance, and therefore will endeavour to remedy it.

Boy. It ought.

Soc. Try and see if you can tell me how much it will be.

Boy. Three feet.

Soc. Then if we add a half to this line of two, that will be

Meno.

SOCRATES, MENO, MENO'S SLAVE.

the line of three. Here are two and there is one; and on the other side, here are two also and there is one: and that makes the figure of which you speak?

Boy. Yes.

Soc. But if there are three feet this way and three feet that way, the whole space will be three times three feet?

Boy. That is evident.

Soc. And how much are three times three feet?

Boy. Nine.

Soc. And how much is the double of four?

Boy. Eight.

Soc. Then the figure of eight is not made out of a line of three?

Boy. No.

Soc. But from what line? — tell me exactly; and if you 84
would rather not reckon, try and show me the line.

Boy. Indeed, Socrates, I do not know.

Soc. Do you see, Meno, what advances he has made in his power of recollection? He did not know at first, and he does not know now, what is the side of a figure of eight feet: but then he thought that he knew, and answered confidently as if he knew, and had no difficulty; now he has a difficulty, and neither knows nor fancies that he knows.

Men. True.

Soc. Is he not better off in knowing his ignorance?

Men. I think that he is.

Soc. If we have made him doubt, and given him the 'torpedo's shock,' have we done him any harm?

Men. I think not.

Soc. We have certainly, as would seem, assisted him in some degree to the discovery of the truth; and now he will wish to remedy his ignorance, but then he would have been ready to tell all the world again and again that the double space should have a double side.

Men. True.

Soc. But do you suppose that he would ever have enquired into or learned what he fancied that he knew, though he was really ignorant of it, until he had fallen into perplexity under the idea that he did not know, and had desired to know?

Men. I think not, Socrates.

Soc. Then he was the better for the torpedo's touch?

Men. I think so.

Soc. Mark now the farther development. I shall only ask him, and not teach him, and he shall share the enquiry with me: and do you watch and see if you find me telling or explaining anything to him, instead of eliciting his opinion. Tell me, boy, is not this a square of four feet which I have drawn?

Boy. Yes.

Soc. And now I add another square equal to the former one?

Boy. Yes.

Soc. And a third, which is equal to either of them?

Boy. Yes.

Soc. Suppose that we fill up the vacant corner?

Boy. Very good.

Soc. Here, then, there are four equal spaces?

Boy. Yes.

Soc. And how many times larger is this space than this other?

Boy. Four times.

Soc. But it ought to have been twice only, as you will remember.

Boy. True.

Soc. And does not this line, reaching from corner to corner, bisect each of these spaces?

Boy. Yes.

Soc. And are there not here four equal lines which contain this space?

Boy. There are.

Soc. Look and see how much this space is.

Boy. I do not understand.

Soc. Has not each interior line cut off half of the four spaces?

Boy. Yes.

Soc. And how many such spaces are there in this section?

Boy. Four.

Soc. And how many in this?

Boy. Two.

Meno.

SOCRATES, MENO, MENO'S SLAVE.

The boy arrives at another true conclusion:

which is, that the square of the diagonal is double the square of the side.

Meno.

SOCRATES, MENO, MENO'S SLAVE.

Soc. And four is how many times two?

Boy. Twice.

Soc. And this space is of how many feet?

Boy. Of eight feet.

Soc. And from what line do you get this figure?

Boy. From this.

Soc. That is, from the line which extends from corner to corner of the figure of four feet?

Boy. Yes.

Soc. And that is the line which the learned call the diagonal. And if this is the proper name, then you, Meno's slave, are prepared to affirm that the double space is the square of the diagonal?

Boy. Certainly, Socrates.

Soc. What do you say of him, Meno? Were not all these answers given out of his own head?

Men. Yes, they were all his own.

Soc. And yet, as we were just now saying, he did not know?

Men. True.

Soc. But still he had in him those notions of his — had he not?

Men. Yes.

Soc. Then he who does not know may still have true notions of that which he does not know?

Men. He has.

At present he is in a dream; he will soon grow clearer.

Soc. And at present these notions have just been stirred up in him, as in a dream; but if he were frequently asked the same questions, in different forms, he would know as well as any one at last?

Men. I dare say.

Soc. Without any one teaching him he will recover his knowledge for himself, if he is only asked questions?

Men. Yes.

Soc. And this spontaneous recovery of knowledge in him is recollection?

Men. True.

Soc. And this knowledge which he now has must he not either have acquired or always possessed?

Men. Yes.

Meno.

SOCRATES, MENO.

Soc. But if he always possessed this knowledge he would always have known; or if he has acquired the knowledge he could not have acquired it in this life, unless he has been taught geometry; for he may be made to do the same with all geometry and every other branch of knowledge. Now, has any one ever taught him all this? You must know about him, if, as you say, he was born and bred in your house.

Either this knowledge was acquired by him in a former state of existence, or was always known to him.

Men. And I am certain that no one ever did teach him.

Soc. And yet he has the knowledge?

Men. The fact, Socrates, is undeniable.

Soc. But if he did not acquire the knowledge in this life,
86 then he must have had and learned it at some other time?

Men. Clearly he must.

Soc. Which must have been the time when he was not a man?

Men. Yes.

Soc. And if there have been always true thoughts in him, both at the time when he was and was not a man, which only need to be awakened into knowledge by putting questions to him, his soul must have always possessed this knowledge, for he always either was or was not a man?

Men. Obviously.

Soc. And if the truth of all things always existed in the soul, then the soul is immortal. Wherefore be of good cheer, and try to recollect what you do not know, or rather what you do not remember.

Men. I feel, somehow, that I like what you are saying.

Better to enquire than to fancy that there is no such thing as enquiry and no use in it.

Soc. And I, Meno, like what I am saying. Some things I have said of which I am not altogether confident. But that we shall be better and braver and less helpless if we think that we ought to enquire, than we should have been if we indulged in the idle fancy that there was no knowing and no use in seeking to know what we do not know;—that is a theme upon which I am ready to fight, in word and deed, to the utmost of my power.

Men. There again, Socrates, your words seem to me excellent.

Soc. Then, as we are agreed that a man should enquire about that which he does not know, shall you and I make an effort to enquire together into the nature of virtue?

Meno.

SOCRATES, MENO.

Men. By all means, Socrates. And yet I would much rather return to my original question, Whether in seeking to acquire virtue we should regard it as a thing to be taught, or as a gift of nature, or as coming to men in some other way?

Socrates cannot enquire whether virtue can be taught until he knows what virtue is, except upon an hypothesis, such as geometricians sometimes employ; e. g. can a triangle of given area be inscribed in a given circle, if when the side of it is produced this or that consequence follows? [The hypothesis appears to be rather trivial and to have no mathematical value.]

Soc. Had I the command of you as well as of myself, Meno, I would not have enquired whether virtue is given by instruction or not, until we had first ascertained 'what it is.' But as you think only of controlling me who am your slave, and never of controlling yourself,— such being your notion of freedom, I must yield to you, for you are irresistible. And therefore I have now to enquire into the qualities of a thing of which I do not as yet know the nature. At any rate, will you condescend a little, and allow the question 'Whether virtue is given by instruction, or in any other way,' to be argued upon hypothesis? As the geometrician, when he is asked [1] whether 87
a certain triangle is capable of being inscribed in a certain circle [1], will reply: 'I cannot tell you as yet; but I will offer a hypothesis which may assist us in forming a conclusion: If the figure be such that [2] when you have produced a given side of it [2], the given area of the triangle falls short by an area [3] corresponding to the part produced [3], then one consequence follows, and if this is impossible then some other; and therefore I wish to assume a hypothesis before I tell you whether this triangle is capable of being inscribed in the circle:'— that is a geometrical hypothesis. And we too, as we know not the nature and qualities of virtue, must ask, whether virtue is or is not taught, under a hypothesis: as thus, if virtue is of such a class of mental goods, will it be taught or not? Let the first hypothesis be that virtue is or is not knowledge,— in that case will it be taught or not? or, as we were just now saying, 'remembered'? For there is no use in disputing about the name. But is virtue taught or not? or rather, does not every one see that knowledge alone is taught?

Upon the hypothesis 'that virtue is knowledge,' can it be taught?

Men. I agree.

Soc. Then if virtue is knowledge, virtue will be taught?

Men Certainly.

[1] Or, whether a certain area is capable of being inscribed as a triangle in a certain circle.

[2] Or, when you apply it to the given line, i. e. the diameter of the circle (*αὐτοῦ*).

[3] Or, similar to the area so applied.

Meno.

Soc. Then now we have made a quick end of this question: if virtue is of such a nature, it will be taught; and if not, not?

SOCRATES, MENO.

Men. Certainly.

Soc. The next question is, whether virtue is knowledge or of another species?

'Of course.'

Men. Yes, that appears to be the question which comes next in order.

Soc. Do we not say that virtue is a good?—This is a hypothesis which is not set aside.

But is virtue knowledge?

Men. Certainly.

Soc. Now, if there be any sort of good which is distinct from knowledge, virtue may be that good; but if knowledge embraces all good, then we shall be right in thinking that virtue is knowledge?

Virtue is a good, and profitable: and all profitable things are either profitable or the reverse according as they are or are not under the guidance of knowledge.

Men. True.

Soc. And virtue makes us good?

Men. Yes.

Soc. And if we are good, then we are profitable; for all good things are profitable?

Men. Yes.

Soc. Then virtue is profitable?

Men. That is the only inference.

Soc. Then now let us see what are the things which severally profit us. Health and strength, and beauty and wealth — these, and the like of these, we call profitable?

Men. True.

88 *Soc.* And yet these things may also sometimes do us harm: would you not think so?

Men. Yes.

Soc. And what is the guiding principle which makes them profitable or the reverse? Are they not profitable when they are rightly used, and hurtful when they are not rightly used?

Men. Certainly.

Soc. Next, let us consider the goods of the soul: they are temperance, justice, courage, quickness of apprehension, memory, magnanimity, and the like?

Men. Surely.

Soc. And such of these as are not knowledge, but of another sort, are sometimes profitable and sometimes hurtful; as, for example, courage wanting prudence, which is only

Meno.

SOCRATES, MENO.

a sort of confidence? When a man has no sense he is harmed by courage, but when he has sense he is profited?

Men. True.

Soc. And the same may be said of temperance and quickness of apprehension; whatever things are learned or done with sense are profitable, but when done without sense they are hurtful?

Men. Very true.

Soc. And in general, all that the soul attempts or endures, when under the guidance of wisdom, ends in happiness; but when she is under the guidance of folly, in the opposite?

Men. That appears to be true.

And so all virtue must be a sort of wisdom or knowledge.

Soc. If then virtue is a quality of the soul, and is admitted to be profitable, it must be wisdom or prudence, since none of the things of the soul are either profitable or hurtful in themselves, but they are all made profitable or hurtful by the addition of wisdom or of folly; and therefore if virtue is profitable, virtue must be a sort of wisdom or prudence?

Men. I quite agree.

Soc. And the other goods, such as wealth and the like, of which we were just now saying that they are sometimes good and sometimes evil, do not they also become profitable or hurtful, accordingly as the soul guides and uses them rightly or wrongly; just as the things of the soul herself are benefited when under the guidance of wisdom and harmed by folly?

Men. True.

Soc. And the wise soul guides them rightly, and the foolish soul wrongly?

Men. Yes.

Soc. And is not this universally true of human nature? All other things hang upon the soul, and the things of the soul herself hang upon wisdom, if they are to be good; and 89
so wisdom is inferred to be that which profits — and virtue, as we say, is profitable?

Men. Certainly.

Virtue is either wholly or partly wisdom.

Soc. And thus we arrive at the conclusion that virtue is either wholly or partly wisdom?

Men. I think that what you are saying, Socrates, is very true.

Meno.

SOCRATES, MENO.

Soc. But if this is true, then the good are not by nature good?

Men. I think not.

If this is true, virtue must be taught; but then where are the teachers?

Soc. If they had been, there would assuredly have been discerners of characters among us who would have known our future great men; and on their showing we should have adopted them, and when we had got them, we should have kept them in the citadel out of the way of harm, and set a stamp upon them far rather than upon a piece of gold, in order that no one might tamper with them; and when they grew up they would have been useful to the state?

Men. Yes, Socrates, that would have been the right way.

Soc. But if the good are not by nature good, are they made good by instruction?

Men. There appears to be no other alternative, Socrates. On the supposition that virtue is knowledge, there can be no doubt that virtue is taught.

Soc. Yes, indeed; but what if the supposition is erroneous?

Men. I certainly thought just now that we were right.

Soc. Yes, Meno; but a principle which has any soundness should stand firm not only just now, but always.

Men. Well; and why are you so slow of heart to believe that knowledge is virtue?

Soc. I will try and tell you why, Meno. I do not retract the assertion that if virtue is knowledge it may be taught; but I fear that I have some reason in doubting whether virtue is knowledge: for consider now and say whether virtue, and not only virtue but anything that is taught, must not have teachers and disciples?

Men. Surely.

Soc. And conversely, may not the art of which neither teachers nor disciples exist be assumed to be incapable of being taught?

Men. True; but do you think that there are no teachers of virtue?

Can Anytus tell us who they are?

Soc. I have certainly often enquired whether there were any, and taken great pains to find them, and have never succeeded; and many have assisted me in the search, and they were the persons whom I thought the most likely to know.

90 Here at the moment when he is wanted we fortunately

Meno.

SOCRATES, ANYTUS.

have sitting by us Anytus, the very person of whom we should make enquiry; to him then let us repair. In the first place, he is the son of a wealthy and wise father, Anthemion, who acquired his wealth, not by accident or gift, like Ismenias the Theban (who has recently made himself as rich as Polycrates), but by his own skill and industry, and who is a well-conditioned, modest man, not insolent, or overbearing, or annoying; moreover, this son of his has received a good education, as the Athenian people certainly appear to think, for they choose him to fill the highest offices. And these are the sort of men from whom you are likely to learn whether there are any teachers of virtue, and who they are. Please, Anytus, to help me and your friend Meno in answering our question, Who are the teachers? Consider the matter thus: If we wanted Meno to be a good physician, to whom should we send him? Should we not send him to the physicians?

Any. Certainly.

Soc. Or if we wanted him to be a good cobbler, should we not send him to the cobblers?

Any. Yes.

Soc. And so forth?

Any. Yes.

The arts are taught by the professors of them. And have we not heard of those who profess to teach virtue at a fixed price?

Soc. Let me trouble you with one more question. When we say that we should be right in sending him to the physicians if we wanted him to be a physician, do we mean that we should be right in sending him to those who profess the art, rather than to those who do not, and to those who demand payment for teaching the art, and profess to teach it to any one who will come and learn? And if these were our reasons, should we not be right in sending him?

Any. Yes.

Soc. And might not the same be said of flute-playing, and of the other arts? Would a man who wanted to make another a flute-player refuse to send him to those who profess to teach the art for money, and be plaguing other persons to give him instruction, who are not professed teachers and who never had a single disciple in that branch of knowledge which he wishes him to acquire — would not such conduct be the height of folly?

Meno.

Any. Yes, by Zeus, and of ignorance too.

SOCRATES, ANYTUS.

91 *Soc.* Very good. And now you are in a position to advise with me about my friend Meno. He has been telling me, Anytus, that he desires to attain that kind of wisdom and virtue by which men order the state or the house, and honour their parents, and know when to receive and when to send away citizens and strangers, as a good man should. Now, to whom should he go in order that he may learn this virtue? Does not the previous argument imply clearly that we should send him to those who profess and avouch that they are the common teachers of all Hellas, and are ready to impart instruction to any one who likes, at a fixed price?

Any. Whom do you mean, Socrates?

Soc. You surely know, do you not, Anytus, that these are the people whom mankind call Sophists?

Anytus inveighs against the corrupting influence of the Sophists.

Any. By Heracles, Socrates, forbear! I only hope that no friend or kinsman or acquaintance of mine, whether citizen or stranger, will ever be so mad as to allow himself to be corrupted by them; for they are a manifest pest and corrupting influence to those who have to do with them.

Why surely they cannot really be corrupters? See what fortunes they make, and what an excellent reputation many of them bear!

Soc. What, Anytus? Of all the people who profess that they know how to do men good, do you mean to say that these are the only ones who not only do them no good, but positively corrupt those who are entrusted to them, and in return for this disservice have the face to demand money? Indeed, I cannot believe you; for I know of a single man, Protagoras, who made more out of his craft than the illustrious Pheidias, who created such noble works, or any ten other statuaries. How could that be? A mender of old shoes, or patcher up of clothes, who made the shoes or clothes worse than he received them, could not have remained thirty days undetected, and would very soon have starved; whereas during more than forty years, Protagoras was corrupting all Hellas, and sending his disciples from him worse than he received them, and he was never found out. For, if I am not mistaken, he was about seventy years old at his death, forty of which were spent in the practice of his profession; and during all that time he had a good reputation, which to this day he retains: and not only Protagoras, but many others are well spoken of; some who lived before him, and others who

Meno.

SOCRATES, ANYTUS.

are still living. Now, when you say that they deceived and 92
corrupted the youth, are they to be supposed to have corrupted them consciously or unconsciously? Can those who were deemed by many to be the wisest men of Hellas have been out of their minds?

The wisest men in Hellas could not have been out of their minds? No:—the people who gave their money to them were out of their minds.

Any. Out of their minds! No, Socrates; the young men who gave their money to them were out of their minds, and their relations and guardians who entrusted their youth to the care of these men were still more out of their minds, and most of all, the cities who allowed them to come in, and did not drive them out, citizen and stranger alike.

Soc. Has any of the Sophists wronged you, Anytus? What makes you so angry with them?

Any. No, indeed, neither I nor any of my belongings has ever had, nor would I suffer them to have, anything to do with them.

Soc. Then you are entirely unacquainted with them?

Any. And I have no wish to be acquainted.

How can Anytus know that they are bad, if he does not know them at all?

Soc. Then, my dear friend, how can you know whether a thing is good or bad of which you are wholly ignorant?

Any. Quite well; I am sure that I know what manner of men these are, whether I am acquainted with them or not.

Soc. You must be a diviner, Anytus, for I really cannot make out, judging from your own words, how, if you are not acquainted with them, you know about them. But I am not enquiring of you who are the teachers who will corrupt Meno (let them be, if you please, the Sophists); I only ask you to tell him who there is in this great city who will teach him how to become eminent in the virtues which I was just now describing. He is the friend of your family, and you will oblige him.

Then who will teach Meno virtue?

Any. Why do you not tell him yourself?

Soc. I have told him whom I supposed to be the teachers of these things; but I learn from you that I am utterly at fault, and I dare say that you are right. And now I wish that you, on your part, would tell me to whom among the Athenians he should go. Whom would you name?

Any Athenian gentleman who has learned

Any. Why single out individuals? Any Athenian gentleman, taken at random, if he will mind him, will do far more good to him than the Sophists.

Meno.

SOCRATES, ANYTUS.

Soc. And did those gentlemen grow of themselves; and without having been taught by any one, were they never-
93 theless able to teach others that which they had never learned themselves?

of a previous generation of gentlemen.

Any. I imagine that they learned of the previous generation of gentlemen. Have there not been many good men in this city?

Soc. Yes, certainly, Anytus; and many good statesmen also there always have been and there are still, in the city of Athens. But the question is whether they were also good teachers of their own virtue;—not whether there are, or have been, good men in this part of the world, but whether virtue can be taught, is the question which we have been discussing. Now, do we mean to say that the good men of our own and of other times knew how to impart to others that virtue which they had themselves; or is virtue a thing incapable of being communicated or imparted by one man to another? That is the question which I and Meno have been arguing. Look at the matter in your own way: Would you not admit that Themistocles was a good man?

Any. Certainly; no man better.

Good men may not have been good teachers. There never was a better man than Themistocles; but he did not make much of his own son.

Soc. And must not he then have been a good teacher, if any man ever was a good teacher, of his own virtue?

Any. Yes, certainly,—if he wanted to be so.

Soc. But would he not have wanted? He would, at any rate, have desired to make his own son a good man and a gentleman; he could not have been jealous of him, or have intentionally abstained from imparting to him his own virtue. Did you never hear that he made his son Cleophantus a famous horseman; and had him taught to stand upright on horseback and hurl a javelin, and to do many other marvellous things; and in anything which could be learned from a master he was well trained? Have you not heard from our elders of him?

Any. I have.

Soc. Then no one could say that his son showed any want of capacity?

Any. Very likely not.

Soc. But did any one, old or young, ever say in your hearing that Cleophantus, son of Themistocles, was a wise or good man, as his father was?

Meno.

SOCRATES, ANYTUS.

He had him taught accomplishments because there was no one to teach virtue.

Any. I have certainly never heard any one say so.

Soc. And if virtue could have been taught, would his father Themistocles have sought to train him in these minor accomplishments, and allowed him who, as you must remember, was his own son, to be no better than his neighbours in those qualities in which he himself excelled?

Any. Indeed, indeed, I think not.

Soc. Here was a teacher of virtue whom you admit to be among the best men of the past. Let us take another,— Aristides, the son of Lysimachus: would you not acknowledge that he was a good man? 94

Any. To be sure I should.

Aristides was also a good man, and Pericles and Thucydides: —they made their sons good horsemen, and wrestlers, and the like, but they did not have them taught to be good, because virtue cannot be taught.

Soc. And did not he train his son Lysimachus better than any other Athenian in all that could be done for him by the help of masters? But what has been the result? Is he a bit better than any other mortal? He is an acquaintance of yours, and you see what he is like. There is Pericles, again, magnificent in his wisdom; and he, as you are aware, had two sons, Paralus and Xanthippus.

Any. I know.

Soc. And you know, also, that he taught them to be unrivalled horsemen, and had them trained in music and gymnastics and all sorts of arts — in these respects they were on a level with the best — and had he no wish to make good men of them? Nay, he must have wished it. But virtue, as I suspect, could not be taught. And that you may not suppose the incompetent teachers to be only the meaner sort of Athenians and few in number, remember again that Thucydides had two sons, Melesias and Stephanus, whom, besides giving them a good education in other things, he trained in wrestling, and they were the best wrestlers in Athens: one of them he committed to the care of Xanthias, and the other of Eudorus, who had the reputation of being the most celebrated wrestlers of that day. Do you remember them?

Any. I have heard of them.

Soc. Now, can there be a doubt that Thucydides, whose children were taught things for which he had to spend money, would have taught them to be good men, which would have cost him nothing, if virtue could have been taught? Will you reply that he was a mean man, and had not many friends

among the Athenians and allies? Nay, but he was of a great family, and a man of influence at Athens and in all Hellas, and, if virtue could have been taught, he would have found out some Athenian or foreigner who would have made good men of his sons, if he could not himself spare the time from cares of state. Once more, I suspect, friend Anytus, that virtue is not a thing which can be taught? *Meno.* SOCRATES, ANYTUS, MENO.

Any. Socrates, I think that you are too ready to speak evil of men: and, if you will take my advice, I would recommend you to be careful. Perhaps there is no city in which it is not easier to do men harm than to do them good, and this is certainly the case at Athens, as I believe that you know. Anytus gives an angry warning to Socrates.

95

Soc. O Meno, I think that Anytus is in a rage. And he may well be in a rage, for he thinks, in the first place, that I am defaming these gentlemen; and in the second place, he is of opinion that he is one of them himself. But some day he will know what is the meaning of defamation, and if he ever does, he will forgive me. Meanwhile I will return to you, Meno; for I suppose that there are gentlemen in your region too?

Men. Certainly there are.

Soc. And are they willing to teach the young? and do they profess to be teachers? and do they agree that virtue is taught?

Men. No indeed, Socrates, they are anything but agreed; you may hear them saying at one time that virtue can be taught, and then again the reverse. The Thessalian gentry are not agreed about the possibility of teaching virtue.

Soc. Can we call those teachers who do not acknowledge the possibility of their own vocation?

Men. I think not, Socrates.

Soc. And what do you think of these Sophists, who are the only professors? Do they seem to you to be teachers of virtue?

Men. I often wonder, Socrates, that Gorgias is never heard promising to teach virtue: and when he hears others promising he only laughs at them; but he thinks that men should be taught to speak. Gorgias professes to teach rhetoric, but laughs at those who pretend to teach virtue.

Soc. Then do you not think that the Sophists are teachers?

Men. I cannot tell you, Socrates; like the rest of the world,

Meno.

SOCRATES, MENO.

I am in doubt, and sometimes I think that they are teachers and sometimes not.

Soc. And are you aware that not you only and other politicians have doubts whether virtue can be taught or not, but that Theognis the poet says the very same thing?

Men. Where does he say so?

Soc. In these elegiac verses[1]:—

Theognis implies in one passage that virtue can, and in another that it cannot, be taught.

'Eat and drink and sit with the mighty, and make yourself agreeable to them; for from the good you will learn what is good, but if you mix with the bad you will lose the intelligence which you already have.'

Do you observe that here he seems to imply that virtue can be taught?

Men. Clearly.

Soc. But in some other verses he shifts about and says[2]:—

'If understanding could be created and put into a man, then they' [who were able to perform this feat] 'would have obtained great rewards.'

And again:—

'Never would a bad son have sprung from a good sire, for he would 96
have heard the voice of instruction; but not by teaching will you ever make a bad man into a good one.'

And this, as you may remark, is a contradiction of the other.

Men. Clearly.

How can they be teachers who are so inconsistent with themselves?

Soc. And is there anything else of which the professors are affirmed not only not to be teachers of others, but to be ignorant themselves, and bad at the knowledge of that which they are professing to teach? or is there anything about which even the acknowledged 'gentlemen' are sometimes saying that 'this thing can be taught,' and sometimes the opposite? Can you say that they are teachers in any true sense whose ideas are in such confusion?

Men. I should say, certainly not.

Soc. But if neither the Sophists nor the gentlemen are teachers, clearly there can be no other teachers?

Men. No.

Soc. And if there are no teachers, neither are there disciples?

Men. Agreed.

[1] Theog. 33 ff. [2] Theog. 435 ff.

Soc. And we have admitted that a thing cannot be taught of which there are neither teachers nor disciples?

Men. We have.

If there are no teachers and no scholars, virtue cannot be taught.

Soc. And there are no teachers of virtue to be found anywhere?

Men. There are not.

Soc. And if there are no teachers, neither are there scholars?

Men. That, I think, is true.

Soc. Then virtue cannot be taught?

Men. Not if we are right in our view. But I cannot believe, Socrates, that there are no good men: And if there are, how did they come into existence?

But were we not mistaken in our view? There may be another guide to good action as well as knowledge,

Soc. I am afraid, Meno, that you and I are not good for much, and that Gorgias has been as poor an educator of you as Prodicus has been of me. Certainly we shall have to look to ourselves, and try to find some one who will help in some way or other to improve us. This I say, because I observe that in the previous discussion none of us remarked that right and good action is possible to man under other guidance than that of knowledge (ἐπιστήμη);—and indeed if this be denied, there is no seeing how there can be any good men at all.

Men. How do you mean, Socrates?

Soc. I mean that good men are necessarily useful or
97 profitable. Were we not right in admitting this? It must be so.

Men. Yes.

Soc. And in supposing that they will be useful only if they are true guides to us of action—there we were also right?

Men. Yes.

Soc. But when we said that a man cannot be a good guide unless he have knowledge (φρόνησις), in this we were wrong.

Men. What do you mean by the word 'right'?

Soc. I will explain. If a man knew the way to Larisa, or anywhere else, and went to the place and led others thither, would he not be a right and good guide?

Men. Certainly.

Soc. And a person who had a right opinion about the way, but had never been and did not know, might be a good guide also, might he not?

Meno.

Men. Certainly.

SOCRATES, MENO.

Soc. And while he has true opinion about that which the other knows, he will be just as good a guide if he thinks the truth, as he who knows the truth?

Men. Exactly.

Right opinion is as good a guide to action as knowledge.

Soc. Then true opinion is as good a guide to correct action as knowledge; and that was the point which we omitted in our speculation about the nature of virtue, when we said that knowledge only is the guide of right action; whereas there is also right opinion.

Men. True.

Soc. Then right opinion is not less useful than knowledge?

Men. The difference, Socrates, is only that he who has knowledge will always be right; but he who has right opinion will sometimes be right, and sometimes not.

Soc. What do you mean? Can he be wrong who has right opinion, so long as he has right opinion?

Men. I admit the cogency of your argument, and therefore, Socrates, I wonder that knowledge should be preferred to right opinion — or why they should ever differ.

Soc. And shall I explain this wonder to you?

Men. Do tell me.

Soc. You would not wonder if you had ever observed the images of Daedalus[1]; but perhaps you have not got them in your country?

Men. What have they to do with the question?

Soc. Because they require to be fastened in order to keep them, and if they are not fastened they will play truant and run away.

Men. Well, what of that?

But right opinions are apt to walk away, like the images of Daedalus.

Soc. I mean to say that they are not very valuable possessions if they are at liberty, for they will walk off like runaway slaves; but when fastened, they are of great value, for they are really beautiful works of art. Now this is an illustration of the nature of true opinions: while they abide 98
with us they are beautiful and fruitful, but they run away out of the human soul, and do not remain long, and therefore they are not of much value until they are fastened by the tie of the cause; and this fastening of them, friend Meno,

[1] Cp. Euthyphro 11 B.

is recollection, as you and I have agreed to call it. But when they are bound, in the first place, they have the nature of knowledge; and, in the second place, they are abiding. And this is why knowledge is more honourable and excellent than true opinion, because fastened by a chain.

Men. What you are saying, Socrates, seems to be very like the truth.

Soc. I too speak rather in ignorance; I only conjecture. And yet that knowledge differs from true opinion is no matter of conjecture with me. There are not many things which I profess to know, but this is most certainly one of them.

Men. Yes, Socrates; and you are quite right in saying so.

Soc. And am I not also right in saying that true opinion leading the way perfects action quite as well as knowledge?

Men. There again, Socrates, I think that you are right.

Soc. Then right opinion is not a whit inferior to knowledge, or less useful in action; nor is the man who has right opinion inferior to him who has knowledge?

Men. True.

Soc. And surely the good man has been acknowledged by us to be useful?

Men. Yes.

Soc. Seeing then that men become good and useful to states, not only because they have knowledge, but because they have right opinion, and that neither knowledge nor right opinion is given to man by nature or acquired by him — (do you imagine either of them to be given by nature?

Men. Not I.)

Soc. Then if they are not given by nature, neither are the good by nature good?

Men. Certainly not.

Soc. And nature being excluded, then came the question whether virtue is acquired by teaching?

Men. Yes.

Soc. If virtue was wisdom [or knowledge], then, as we thought, it was taught?

Men. Yes.

Soc. And if it was taught it was wisdom?

Men. Certainly.

Meno.

SOCRATES, MENO.

Soc. And if there were teachers, it might be taught; and if there were no teachers, not?

Men. True.

Soc. But surely we acknowledged that there were no teachers of virtue?

Men. Yes.

Soc. Then we acknowledged that it was not taught, and was not wisdom?

Men. Certainly.

Soc. And yet we admitted that it was a good?

Men. Yes.

Soc. And the right guide is useful and good? 99

Men. Certainly.

If virtue and knowledge cannot be taught, the only right guides of men are true opinions.

Soc. And the only right guides are knowledge and true opinion — these are the guides of man; for things which happen by chance are not under the guidance of man: but the guides of man are true opinion and knowledge.

Men. I think so too.

Soc. But if virtue is not taught, neither is virtue knowledge.

Men. Clearly not.

Soc. Then of two good and useful things, one, which is knowledge, has been set aside, and cannot be supposed to be our guide in political life.

Men. I think not.

Soc. And therefore not by any wisdom, and not because they were wise, did Themistocles and those others of whom Anytus spoke govern states. This was the reason why they were unable to make others like themselves — because their virtue was not grounded on knowledge.

Men. That is probably true, Socrates.

Right opinion is in politics what divination is in religion; diviners, prophets, poets, statesmen, may all be truly called 'divine men.'

Soc. But if not by knowledge, the only alternative which remains is that statesmen must have guided states by right opinion, which is in politics what divination is in religion; for diviners and also prophets say many things truly, but they know not what they say.

Men. So I believe.

Soc. And may we not, Meno, truly call those men 'divine' who, having no understanding, yet succeed in many a grand deed and word?

Men. Certainly.

Meno.

SOCRATES, MENO.

Soc. Then we shall also be right in calling divine those whom we were just now speaking of as diviners and prophets, including the whole tribe of poets. Yes, and statesmen above all may be said to be divine and illumined, being inspired and possessed of God, in which condition they say many grand things, not knowing what they say.

Men. Yes.

Soc. And the women too, Meno, call good men divine — do they not? and the Spartans, when they praise a good man, say 'that he is a divine man.'

Men. And I think, Socrates, that they are right; although very likely our friend Anytus may take offence at the word.

Soc. I do not care; as for Anytus, there will be another opportunity of talking with him. To sum up our enquiry — the result seems to be, if we are at all right in our view, that virtue is neither natural nor acquired, but an instinct given
100 by God to the virtuous. Nor is the instinct accompanied by reason, unless there may be supposed to be among statesmen some one who is capable of educating statesmen. And if there be such an one, he may be said to be among the living what Homer says that Tiresias was among the dead, 'he alone has understanding; but the rest are flitting shades;' and he and his virtue in like manner will be a reality among shadows.

Men. That is excellent, Socrates.

Virtue comes by the gift of God.

Soc. Then, Meno, the conclusion is that virtue comes to the virtuous by the gift of God. But we shall never know the certain truth until, before asking how virtue is given, we enquire into the actual nature of virtue. I fear that I must go away, but do you, now that you are persuaded yourself, persuade our friend Anytus. And do not let him be so exasperated; if you can conciliate him, you will have done good service to the Athenian people.

EUTHYPHRO.

INTRODUCTION.

IN the Meno, Anytus had parted from Socrates with the significant words: 'That in any city, and particularly in the city of Athens, it is easier to do men harm than to do them good' (94 E); and Socrates was anticipating another opportunity of talking with him (99 E). In the Euthyphro, Socrates is awaiting his trial for impiety. But before the trial begins, Plato would like to put the world on their trial, and convince them of ignorance in that very matter touching which Socrates is accused. An incident which may perhaps really have occurred in the family of Euthyphro, a learned Athenian diviner and soothsayer, furnishes the occasion of the discussion.

ANALYSIS.

Steph. 2 This Euthyphro and Socrates are represented as meeting in the porch of the King Archon. (Cp. Theaet. sub fin.) Both have legal business in hand. Socrates is defendant in a suit for impiety 3 which Meletus has brought against him (it is remarked by the way that he is not a likely man himself to have brought a suit against another); and Euthyphro too is plaintiff in an action for 4 murder, which he has brought against his own father. The latter has originated in the following manner: — A poor dependant of the family had slain one of their domestic slaves in Naxos. The guilty person was bound and thrown into a ditch by the command of Euthyphro's father, who sent to the interpreters of religion at Athens to ask what should be done with him. Before the messenger came back the criminal had died from hunger and exposure.

This is the origin of the charge of murder which Euthyphro brings against his father. Socrates is confident that before he could have undertaken the responsibility of such a prosecution,

he must have been perfectly informed of the nature of piety and 5
impiety; and as he is going to be tried for impiety himself, he thinks that he cannot do better than learn of Euthyphro (who will be admitted by everybody, including the judges, to be an unimpeachable authority) what piety is, and what is impiety. What then is piety?

Euthyphro, who, in the abundance of his knowledge, is very willing to undertake all the responsibility, replies: That piety is doing as I do, prosecuting your father (if he is guilty) on a charge of murder; doing as the gods do — as Zeus did to Cronos, and Cronos to Uranus.

Socrates has a dislike to these tales of mythology, and he fancies 6
that this dislike of his may be the reason why he is charged with impiety. 'Are they really true?' 'Yes, they are;' and Euthyphro will gladly tell Socrates some more of them. But Socrates would like first of all to have a more satisfactory answer to the question, 'What is piety?' 'Doing as I do, charging a father with murder,' may be a single instance of piety, but can hardly be regarded as a general definition.

Euthyphro replies, that 'Piety is what is dear to the gods, 7
and impiety is what is not dear to them.' But may there not be differences of opinion, as among men, so also among the gods? Especially, about good and evil, which have no fixed rule; and these are precisely the sort of differences which give rise to quarrels. And therefore what may be dear to one 8
god may not be dear to another, and the same action may be both pious and impious; e. g. your chastisement of your father, Euthyphro, may be dear or pleasing to Zeus (who inflicted a similar chastisement on his own father), but not equally pleasing to Cronos or Uranus (who suffered at the hands of their sons).

Euthyphro answers that there is no difference of opinion, either among gods or men, as to the propriety of punishing a murderer. Yes, rejoins Socrates, when they know him to be a murderer; but you are assuming the point at issue. If all the circumstances of the case are considered, are you able to show that your father 9
was guilty of murder, or that all the gods are agreed in approving of our prosecution of him? And must you not allow that what is hated by one god may be liked by another? Waiving this last,

however, Socrates proposes to amend the definition, and say that 'what all the gods love is pious, and what they all hate is impious.' To this Euthyphro agrees.

10 Socrates proceeds to analyze the new form of the definition. He shows that in other cases the act precedes the state; e. g. the act of being carried, loved, &c. precedes the state of being carried, loved, &c., and therefore that which is dear to the gods is dear to the gods because it is first loved of them, not loved of them because it is dear to them. But the pious or holy is loved by the gods because it is pious or holy, which is equivalent to saying, that it is loved by them because it is dear to them. Here

11 then appears to be a contradiction,— Euthyphro has been giving an attribute or accident of piety only, and not the essence. Euthyphro acknowledges himself that his explanations seem to walk away or go round in a circle, like the moving figures of Daedalus, the ancestor of Socrates, who has communicated his art to his descendants.

12 Socrates, who is desirous of stimulating the indolent intelligence of Euthyphro, raises the question in another manner: 'Is all the pious just?' 'Yes.' 'Is all the just pious?' 'No.' 'Then what part of justice is piety?' Euthyphro replies that piety is that part of justice which 'attends' to the gods, as there is another

13 part of justice which 'attends' to men. But what is the meaning of 'attending' to the gods? The word 'attending,' when applied to dogs, horses, and men, implies that in some way they are made better. But how do pious or holy acts make the gods any better? Euthyphro explains that he means by pious acts, acts of service or ministration. Yes; but the ministrations of the husbandman, the physician, and the builder have an end. To what end do

14 we serve the gods, and what do we help them to accomplish? Euthyphro replies, that all these difficult questions cannot be resolved in a short time; and he would rather say simply that piety is knowing how to please the gods in word and deed, by prayers and sacrifices. In other words, says Socrates, piety is 'a

15 science of asking and giving'— asking what we want and giving what they want; in short, a mode of doing business between gods and men. But although they are the givers of all good, how can we give them any good in return? 'Nay, but we give them honour.' Then we give them not what is beneficial, but what is

Euthyphro. Analysis.

pleasing or dear to them; and this is the point which has been already disproved.

Socrates, although weary of the subterfuges and evasions of Euthyphro, remains unshaken in his conviction that he must know the nature of piety, or he would never have prosecuted his old father. He is still hoping that he will condescend to instruct him. But Euthyphro is in a hurry and cannot stay. And Socrates' last 16
hope of knowing the nature of piety before he is prosecuted for impiety has disappeared. As in the Euthydemus the irony is carried on to the end.

Introduction.

The Euthyphro is manifestly designed to contrast the real nature of piety and impiety with the popular conceptions of them. But when the popular conceptions of them have been overthrown, Socrates does not offer any definition of his own: as in the Laches and Lysis, he prepares the way for an answer to the question which he has raised; but true to his own character, refuses to answer himself.

Euthyphro is a religionist, and is elsewhere spoken of, if he be the same person, as the author of a philosophy of names, by whose 'prancing steeds' Socrates in the Cratylus is carried away (p. 396). He has the conceit and self-confidence of a Sophist; no doubt that he is right in prosecuting his father has ever entered into his mind. Like a Sophist too, he is incapable either of framing a general definition or of following the course of an argument. His wrong-headedness, one-sidedness, narrowness, positiveness, are characteristic of his priestly office. His failure to apprehend an argument may be compared to a similar defect which is observable in the rhapsode Ion. But he is not a bad man, and he is friendly to Socrates, whose familiar sign he recognizes with interest. Though unable to follow him he is very willing to be led by him, and eagerly catches at any suggestion which saves him from the trouble of thinking. Moreover he is the enemy of Meletus, who, as he says, is availing himself of the popular dislike to innovations in religion in order to injure Socrates; at the same time he is amusingly confident that he has weapons in his own armoury which would be more than a match for him. He is quite sincere in his prosecution of his father, who has accidentally been guilty of homicide, and is not wholly free from blame. To purge

away the crime appears to him in the light of a duty, whoever may be the criminal.

Thus begins the contrast between the religion of the letter, or of the narrow and unenlightened conscience, and the higher notion of religion which Socrates vainly endeavours to elicit from him. 'Piety is doing as I do' is the idea of religion which first occurs to him, and to many others who do not say what they think with equal frankness. For men are not easily persuaded that any other religion is better than their own; or that other nations, e. g. the Greeks in the time of Socrates, were equally serious in their religious beliefs and difficulties. The chief difference between us and them is, that they were slowly learning what we are in process of forgetting. Greek mythology hardly admitted of the distinction between accidental homicide and murder: that the pollution of blood was the same in both cases is also the feeling of the Athenian diviner. He had not as yet learned the lesson, which philosophy was teaching, that Homer and Hesiod, if not banished from the state, or whipped out of the assembly, as Heracleitus more rudely proposed, at any rate were not to be appealed to as authorities in religion; and he is ready to defend his conduct by the examples of the gods. These are the very tales which Socrates cannot abide; and his dislike of them, as he suspects, has branded him with the reputation of impiety. Here is one answer to the question, 'Why Socrates was put to death,' suggested by the way. Another is conveyed in the words, 'The Athenians do not care about any man being thought wise until he begins to make other men wise; and then for some reason or other they are angry:' which may be said to be the rule of popular toleration in most other countries, and not at Athens only. In the course of the argument (7 A, B) Socrates remarks that the controversial nature of morals and religion arises out of the difficulty of verifying them. There is no measure or standard to which they can be referred.

The next definition, 'Piety is that which is loved of the gods,' is shipwrecked on a refined distinction between the state and the act, corresponding respectively to the adjective (*φίλον*) and the participle (*φιλούμενον*), or rather perhaps to the participle and the verb (*φιλούμενον* and *φιλεῖται*). The act is prior to the state (as in Aristotle the *ἐνέργεια* precedes the *δύναμις*); and the state of

Euthyphro. INTRODUCTION.

being loved is preceded by the act of being loved. But piety or holiness is preceded by the act of being pious, not by the act of being loved; and therefore piety and the state of being loved are different. Through such subtleties of dialectic Socrates is working his way into a deeper region of thought and feeling. He means to say that the words 'loved of the gods' express an attribute only, and not the essence of piety.

Then follows the third and last definition, 'Piety is a part of justice.' Thus far Socrates has proceeded in placing religion on a moral foundation. He is seeking to realize the harmony of religion and morality, which the great poets Æschylus, Sophocles, and Pindar had unconsciously anticipated, and which is the universal want of all men. To this the soothsayer adds the ceremonial element, 'attending upon the gods.' When further interrogated by Socrates as to the nature of this 'attention to the gods,' he replies, that piety is an affair of business, a science of giving and asking, and the like. Socrates points out the anthropomorphism of these notions. (Cp. Symp. 202 E; Rep. ii. 365 E; Statesman 290 C, D.) But when we expect him to go on and show that the true service of the gods is the service of the spirit and the co-operation with them in all things true and good, he stops short; this was a lesson which the soothsayer could not have been made to understand, and which every one must learn for himself.

There seem to be altogether three aims or interests in this little Dialogue: (1) the dialectical development of the idea of piety; (2) the antithesis of true and false religion, which is carried to a certain extent only; (3) the defence of Socrates.

The subtle connection with the Apology and the Crito; the holding back of the conclusion, as in the Charmides, Lysis, Laches, Protagoras, and other Dialogues; and deep insight into the religious world; the dramatic power and play of the two characters; the inimitable irony, are reasons for believing that the Euthyphro is a genuine Platonic writing. The spirit in which the popular representations of mythology are denounced recalls Republic II (378 ff.) The virtue of piety has been already mentioned as one of five in the Protagoras, but is not reckoned among the four cardinal virtues of Republic IV (428 ff.). The figure of Daedalus (15 C) has occurred in the Meno (97 D); that

of Proteus (15 D) in the Euthydemus (288 B) and Io (541 E). The kingly science has already appeared in the Euthydemus, and will reappear in the Republic and Statesman. But neither from these nor any other indications of similarity or difference, and still less from arguments respecting the suitableness of this little work to aid Socrates at the time of his trial or the reverse, can any evidence of the date be obtained.

EUTHYPHRO.

PERSONS OF THE DIALOGUE.

SOCRATES. EUTHYPHRO.

SCENE:—The Porch of the King Archon.

Euthyphro. SOCRATES, EUTHYPHRO.

Euthyphro and Socrates meet at the Porch of the King Archon. Both have legal business on hand.

Steph. 2 *Euthyphro.* WHY have you left the Lyceum, Socrates? and what are you doing in the Porch of the King Archon? Surely you cannot be concerned in a suit before the King, like myself?

Socrates. Not in a suit, Euthyphro; impeachment is the word which the Athenians use.

Euth. What! I suppose that some one has been prosecuting you, for I cannot believe that you are the prosecutor of another.

Soc. Certainly not.

Euth. Then some one else has been prosecuting you?

Soc. Yes.

Euth. And who is he?

Soc. A young man who is little known, Euthyphro; and I hardly know him: his name is Meletus, and he is of the deme of Pitthis. Perhaps you may remember his appearance; he has a beak, and long straight hair, and a beard which is ill grown.

Euth. No, I do not remember him, Socrates. But what is the charge which he brings against you?

Meletus has brought a charge against Socrates.

Soc. What is the charge? Well, a very serious charge, which shows a good deal of character in the young man, and for which he is certainly not to be despised. He says he knows how the youth are corrupted and who are their corruptors. I fancy that he must be a wise man, and seeing that I am the reverse of a wise man, he has found me out,

Euthyphro. and is going to accuse me of corrupting his young friends.

SOCRATES, EUTHYPHRO. And of this our mother the state is to be the judge. Of all our political men he is the only one who seems to me to begin in the right way, with the cultivation of virtue in youth; like a good husbandman, he makes the young shoots his first 3
care, and clears away us who are the destroyers of them. This is only the first step; he will afterwards attend to the elder branches; and if he goes on as he has begun, he will be a very great public benefactor.

Euth. I hope that he may; but I rather fear, Socrates, that the opposite will turn out to be the truth. My opinion is that in attacking you he is simply aiming a blow at the foundation of the state. But in what way does he say that you corrupt the young?

The nature of the charge against Socrates.

Soc. He brings a wonderful accusation against me, which at first hearing excites surprise: he says that I am a poet or maker of gods, and that I invent new gods and deny the existence of old ones; this is the ground of his indictment.

Euth. I understand, Socrates; he means to attack you about the familiar sign which occasionally, as you say, comes to you. He thinks that you are a neologian, and he is going to have you up before the court for this. He knows that such a charge is readily received by the world, as I myself know too well; for when I speak in the assembly about divine things, and foretell the future to them, they laugh at me and think me a madman. Yet every word that I say is true. But they are jealous of us all; and we must be brave and go at them.

Soc. Their laughter, friend Euthyphro, is not a matter of much consequence. For a man may be thought wise; but the Athenians, I suspect, do not much trouble themselves about him until he begins to impart his wisdom to others; and then for some reason or other, perhaps, as you say, from jealousy, they are angry.

Euth. I am never likely to try their temper in this way.

Soc. I dare say not, for you are reserved in your behaviour, and seldom impart your wisdom. But I have a benevolent habit of pouring out myself to everybody, and would even pay for a listener, and I am afraid that the Athenians may think me too talkative. Now if, as I was saying, they would

Euthyphro. SOCRATES, EUTHYPHRO.

only laugh at me, as you say that they laugh at you, the time might pass gaily enough in the court; but perhaps they may be in earnest, and then what the end will be you soothsayers only can predict.

Euth. I dare say that the affair will end in nothing, Socrates, and that you will win your cause; and I think that I shall win my own.

Soc. And what is your suit, Euthyphro? are you the pursuer or the defendant?

Euth. I am the pursuer.

Soc. Of whom?

4 *Euth.* You will think me mad when I tell you.

Soc. Why, has the fugitive wings?

Euth. Nay, he is not very volatile at his time of life.

Soc. Who is he?

Euth. My father.

Soc. Your father! my good man?

Euth. Yes.

Soc. And of what is he accused?

Euth. Of murder, Socrates.

The irony of Socrates.

Soc. By the powers, Euthyphro! how little does the common herd know of the nature of right and truth. A man must be an extraordinary man, and have made great strides in wisdom, before he could have seen his way to bring such an action.

Euth. Indeed, Socrates, he must.

Euthyphro is under a sacred obligation to prosecute a homicide, even if he be his own father.

Soc. I suppose that the man whom your father murdered was one of your relatives — clearly he was; for if he had been a stranger you would never have thought of prosecuting him.

Euth. I am amused, Socrates, at your making a distinction between one who is a relation and one who is not a relation; for surely the pollution is the same in either case, if you knowingly associate with the murderer when you ought to clear yourself and him by proceeding against him. The real question is whether the murdered man has been justly slain. If justly, then your duty is to let the matter alone; but if unjustly, then even if the murderer lives under the same roof with you and eats at the same table, proceed against him. Now the man who is dead was a poor dependant of mine who worked for us as a field labourer on our farm in Naxos, and

Euthyphro. SOCRATES, EUTHYPHRO.

one day in a fit of drunken passion he got into a quarrel with one of our domestic servants and slew him. My father bound him hand and foot and threw him into a ditch, and then sent to Athens to ask of a diviner what he should do with him. Meanwhile he never attended to him and took no care about him, for he regarded him as a murderer; and thought that no great harm would be done even if he did die. Now this was just what happened. For such was the effect of cold and hunger and chains upon him, that before the messenger returned from the diviner, he was dead. And my father and family are angry with me for taking the part of the murderer and prosecuting my father. They say that he did not kill him, and that if he did, the dead man was but a murderer, and I ought not to take any notice, for that a son is impious who prosecutes a father. Which shows, Socrates, how little they know what the gods think about piety and impiety.

Soc. Good heavens, Euthyphro! and is your knowledge of religion and of things pious and impious so very exact, that, supposing the circumstances to be as you state them, you are not afraid lest you too may be doing an impious thing in bringing an action against your father?

Euth. The best of Euthyphro, and that which distinguishes him, Socrates, from other men, is his exact knowledge of all such matters. What should I be good for without it? 5

Socrates, who is accused of false theology, thinks that he cannot do better than become the disciple of so great a theologian as Euthyphro.

Soc. Rare friend! I think that I cannot do better than be your disciple. Then before the trial with Meletus comes on I shall challenge him, and say that I have always had a great interest in religious questions, and now, as he charges me with rash imaginations and innovations in religion, I have become your disciple. You, Meletus, as I shall say to him, acknowledge Euthyphro to be a great theologian, and sound in his opinions; and if you approve of him you ought to approve of me, and not have me into court; but if you disapprove, you should begin by indicting him who is my teacher, and who will be the ruin, not of the young, but of the old; that is to say, of myself whom he instructs, and of his old father whom he admonishes and chastises. And if Meletus refuses to listen to me, but will go on, and will not shift the indictment from me to you, I cannot do better than repeat this challenge in the court.

Euthyphro.

SOCRATES, EUTHYPHRO.

Euth. Yes, indeed, Socrates; and if he attempts to indict me I am mistaken if I do not find a flaw in him; the court shall have a great deal more to say to him than to me.

He asks, 'What is piety?'

Soc. And I, my dear friend, knowing this, am desirous of becoming your disciple. For I observe that no one appears to notice you — not even this Meletus; but his sharp eyes have found me out at once, and he has indicted me for impiety. And therefore, I adjure you to tell me the nature of piety and impiety, which you said that you knew so well, and of murder, and of other offences against the gods. What are they? Is not piety in every action always the same? and impiety, again — is it not always the opposite of piety, and also the same with itself, having, as impiety, one notion which includes whatever is impious?

Euth. To be sure, Socrates.

Soc. And what is piety, and what is impiety?

Piety is doing as I am doing; — like Zeus, I am proceeding against my father.

Euth. Piety is doing as I am doing; that is to say, prosecuting any one who is guilty of murder, sacrilege, or of any similar crime — whether he be your father or mother, or whoever he may be — that makes no difference; and not to prosecute them is impiety. And please to consider, Socrates, what a notable proof I will give you of the truth of my words, a proof which I have already given to others: — of the principle, I mean, that the impious, whoever he may be, ought not to go unpunished. For do not men regard
6 Zeus as the best and most righteous of the gods? — and yet they admit that he bound his father (Cronos) because he wickedly devoured his sons, and that he too had punished his own father (Uranus) for a similar reason, in a nameless manner. And yet when I proceed against my father, they are angry with me. So inconsistent are they in their way of talking when the gods are concerned, and when I am concerned.

Does Euthyphro believe these amazing stories about the gods?

Soc. May not this be the reason, Euthyphro, why I am charged with impiety — that I cannot away with these stories about the gods? and therefore I suppose that people think me wrong. But, as you who are well informed about them approve of them, I cannot do better than assent to your superior wisdom. What else can I say, confessing as I do, that I know nothing about them? Tell me, for

Euthyphro. the love of Zeus, whether you really believe that they are true.

SOCRATES, EUTHYPHRO.

Euth. Yes, Socrates; and things more wonderful still, of which the world is in ignorance.

Soc. And do you really believe that the gods fought with one another, and had dire quarrels, battles, and the like, as the poets say, and as you may see represented in the works of great artists? The temples are full of them; and notably the robe of Athene, which is carried up to the Acropolis at the great Panathenaea, is embroidered with them. Are all these tales of the gods true, Euthyphro?

Yes, and things more amazing still.

Euth. Yes, Socrates; and, as I was saying, I can tell you, if you would like to hear them, many other things about the gods which would quite amaze you.

Soc. I dare say; and you shall tell me them at some other time when I have leisure. But just at present I would rather hear from you a more precise answer, which you have not as yet given, my friend, to the question, What is 'piety'? When asked, you only replied, Doing as you do, charging your father with murder.

Euth. And what I said was true, Socrates.

Soc. No doubt, Euthyphro; but you would admit that there are many other pious acts?

Euth. There are.

Soc. Remember that I did not ask you to give me two or three examples of piety, but to explain the general idea which makes all pious things to be pious. Do you not recollect that there was one idea which made the impious impious, and the pious pious?

Euth. I remember.

Soc. Tell me what is the nature of this idea, and then I shall have a standard to which I may look, and by which I may measure actions, whether yours or those of any one else, and then I shall be able to say that such and such an action is pious, such another impious.

A more correct definition:—Piety is that which is dear to the gods.

Euth. I will tell you, if you like.

Soc. I should very much like.

Euth. Piety, then, is that which is dear to the gods, and impiety is that which is not dear to them.

Soc. Very good, Euthyphro; you have now given me the 7

sort of answer which I wanted. But whether what you say is true or not I cannot as yet tell, although I make no doubt that you will prove the truth of your words.

Euthyphro. SOCRATES, EUTHYPHRO.

Euth. Of course.

Soc. Come, then, and let us examine what we are saying. That thing or person which is dear to the gods is pious, and that thing or person which is hateful to the gods is impious, these two being the extreme opposites of one another. Was not that said?

Euth. It was.

Soc. And well said?

Euth. Yes, Socrates, I thought so; it was certainly said.

Soc. And further, Euthyphro, the gods were admitted to have enmities and hatreds and differences?

Euth. Yes, that was also said.

Soc. And what sort of difference creates enmity and anger? Suppose, for example, that you and I, my good friend, differ about a number; do differences of this sort make us enemies and set us at variance with one another? Do we not go at once to arithmetic, and put an end to them by a sum?

Differences about numbers and figures create no ill-will because they can be settled by a sum or by a weighing machine, but enmities about the just and unjust are the occasions of quarrels, both among gods and men.

Euth. True.

Soc. Or suppose that we differ about magnitudes, do we not quickly end the difference by measuring?

Euth. Very true.

Soc. And we end a controversy about heavy and light by resorting to a weighing machine?

Euth. To be sure.

Soc. But what differences are there which cannot be thus decided, and which therefore make us angry and set us at enmity with one another? I dare say the answer does not occur to you at the moment, and therefore I will suggest that these enmities arise when the matters of difference are the just and unjust, good and evil, honourable and dishonourable. Are not these the points about which men differ, and about which when we are unable satisfactorily to decide our differences, you and I and all of us quarrel, when we do quarrel[1]?

Euth. Yes, Socrates, the nature of the differences about which we quarrel is such as you describe.

[1] Cp. 1 Alcib. 111 foll.

Euthyphro. SOCRATES, EUTHYPHRO.

Soc. And the quarrels of the gods, noble Euthyphro, when they occur, are of a like nature?

Euth. Certainly they are.

Soc. They have differences of opinion, as you say, about good and evil, just and unjust, honourable and dishonourable: there would have been no quarrels among them, if there had been no such differences — would there now?

Euth. You are quite right.

Men and gods alike love the things which they deem noble and just, but they are not agreed what these are.

Soc. Does not every man love that which he deems noble and just and good, and hate the opposite of them?

Euth. Very true.

Soc. But, as you say, people regard the same things, some as just and others as unjust,— about these they dispute; and so there arise wars and fightings among them. 8

Euth. Very true.

Soc. Then the same things are hated by the gods and loved by the gods, and are both hateful and dear to them?

Euth. True.

Soc. And upon this view the same things, Euthyphro, will be pious and also impious?

Euth. So I should suppose.

Soc. Then, my friend, I remark with surprise that you have not answered the question which I asked. For I certainly did not ask you to tell me what action is both pious and impious: but now it would seem that what is loved by the gods is also hated by them. And therefore, Euthyphro, in thus chastising your father you may very likely be doing what is agreeable to Zeus but disagreeable to Cronos or Uranus, and what is acceptable to Hephaestus but unacceptable to Herè, and there may be other gods who have similar differences of opinion.

Euth. But I believe, Socrates, that all the gods would be agreed as to the propriety of punishing a murderer: there would be no difference of opinion about that.

Soc. Well, but speaking of men, Euthyphro, did you ever hear any one arguing that a murderer or any sort of evil-doer ought to be let off?

Euth. I should rather say that these are the questions which they are always arguing, especially in courts of law:

they commit all sorts of crimes, and there is nothing which they will not do or say in their own defence.

Soc. But do they admit their guilt, Euthyphro, and yet say that they ought not to be punished?

Euth. No; they do not.

Soc. Then there are some things which they do not venture to say and do: for they do not venture to argue that the guilty are to be unpunished, but they deny their guilt, do they not?

Euth. Yes.

Soc. Then they do not argue that the evil-doer should not be punished, but they argue about the fact of who the evil-doer is, and what he did and when?

Euth. True.

Neither God nor man will say that the doer of evil is not to be punished, but they are doubtful about particular acts. What proof is there that all the gods approve of the prosecution of your father?

Soc. And the gods are in the same case, if as you assert they quarrel about just and unjust, and some of them say while others deny that injustice is done among them. For surely neither God nor man will ever venture to say that the doer of injustice is not to be punished?

Euth. That is true, Socrates, in the main.

Soc. But they join issue about the particulars — gods and men alike; and, if they dispute at all, they dispute about some act which is called in question, and which by some is affirmed to be just, by others to be unjust. Is not that true?

Euth. Quite true.

9 *Soc.* Well then, my dear friend Euthyphro, do tell me, for my better instruction and information, what proof have you that in the opinion of all the gods a servant who is guilty of murder, and is put in chains by the master of the dead man, and dies because he is put in chains before he who bound him can learn from the interpreters of the gods what he ought to do with him, dies unjustly; and that on behalf of such an one a son ought to proceed against his father and accuse him of murder. How would you show that all the gods absolutely agree in approving of his act? Prove to me that they do, and I will applaud your wisdom as long as I live.

Euth. It will be a difficult task; but I could make the matter very clear indeed to you.

Soc. I understand; you mean to say that I am not so quick of apprehension as the judges: for to them you will be sure to prove that the act is unjust, and hateful to the gods.

Euthyphro. *Euth.* Yes indeed, Socrates; at least if they will listen to me.

SOCRATES, EUTHYPHRO. *Soc.* But they will be sure to listen if they find that you are a good speaker. There was a notion that came into my mind while you were speaking; I said to myself: 'Well, and what if Euthyphro does prove to me that all the gods regarded the death of the serf as unjust, how do I know anything more of the nature of piety and impiety? for granting that this action may be hateful to the gods, still piety and impiety are not adequately defined by these distinctions, for that which is hateful to the gods has been shown to be also pleasing and dear to them.' And therefore, Euthyphro, I do not ask you to prove this; I will suppose, if you like, that all the gods condemn and abominate such an action. But I will amend the definition so far as to say that what all the gods hate is impious, and what they love pious or holy; and what some of them love and others hate is both or neither. Shall this be our definition of piety and impiety?

Let us say then that what all the gods approve is pious and holy.

Euth. Why not, Socrates?

Soc. Why not! certainly, as far as I am concerned, Euthyphro, there is no reason why not. But whether this admission will greatly assist you in the task of instructing me as you promised, is a matter for you to consider.

Euth. Yes, I should say that what all the gods love is pious and holy, and the opposite which they all hate, impious.

Soc. Ought we to enquire into the truth of this, Euthyphro, or simply to accept the mere statement on our own authority and that of others? What do you say?

Euth. We should enquire; and I believe that the statement will stand the test of enquiry.

But does the state follow the act, or the act the state?

Soc. We shall know better, my good friend, in a little while. The point which I should first wish to understand is whether the pious or holy is beloved by the gods because it is holy, or holy because it is beloved of the gods.

Euth. I do not understand your meaning, Socrates.

Soc. I will endeavour to explain: we speak of carrying and we speak of being carried, of leading and being led, seeing and being seen. You know that in all such cases there is a difference, and you know also in what the difference lies?

Euth. I think that I understand.

Soc. And is not that which is beloved distinct from that which loves?

Euth. Certainly.

Soc. Well; and now tell me, is that which is carried in this state of carrying because it is carried, or for some other reason?

Euth. No; that is the reason.

Soc. And the same is true of what is led and of what is seen?

Euth. True.

Soc. And a thing is not seen because it is visible, but conversely, visible because it is seen; nor is a thing led because it is in the state of being led, or carried because it is in the state of being carried, but the converse of this. And now I think, Euthyphro, that my meaning will be intelligible; and my meaning is, that any state of action or passion implies previous action or passion. It does not become because it is becoming, but it is in a state of becoming because it becomes; neither does it suffer because it is in a state of suffering, but it is in a state of suffering because it suffers. Do you not agree?

Euth. Yes.

Soc. Is not that which is loved in some state either of becoming or suffering?

Euth. Yes.

Soc. And the same holds as in the previous instances; the state of being loved follows the act of being loved, and not the act the state.

The latter is the truer account, and therefore we can only say that what is loved by all the gods is in a state to be loved by them; but holiness has a wider meaning than this.

Euth. Certainly.

Soc. And what do you say of piety, Euthyphro: is not piety, according to your definition, loved by all the gods?

Euth. Yes.

Soc. Because it is pious or holy, or for some other reason?

Euth. No, that is the reason.

Soc. It is loved because it is holy, not holy because it is loved?

Euth. Yes.

Soc. And that which is dear to the gods is loved by them, and is in a state to be loved of them because it is loved of them?

Euthyphro. *Euth.* Certainly.

SOCRATES, EUTHYPHRO. *Soc.* Then that which is dear to the gods, Euthyphro, is not holy, nor is that which is holy loved of God, as you affirm; but they are two different things.

Euth. How do you mean, Socrates?

Soc. I mean to say that the holy has been acknowledged by us to be loved of God because it is holy, not to be holy because it is loved.

Euth. Yes.

Soc. But that which is dear to the gods is dear to them because it is loved by them, not loved by them because it is dear to them.

Euth. True.

Soc. But, friend Euthyphro, if that which is holy is the same with that which is dear to God, and is loved because it is holy, then that which is dear to God would have been 11
loved as being dear to God; but if that which is dear to God is dear to him because loved by him, then that which is holy would have been holy because loved by him. But now you see that the reverse is the case, and that they are quite different from one another. For one (*θεοφιλὲς*) is of a kind to be loved because it is loved, and the other (*ὅσιον*) is loved because it is of a kind to be loved. Thus you appear to me, Euthyphro, when I ask you what is the essence of holiness, to offer an attribute only, and not the essence — the attribute of being loved by all the gods. But you still refuse to explain to me the nature of holiness. And therefore, if you please, I will ask you not to hide your treasure, but to tell me once more what holiness or piety really is, whether dear to the gods or not (for that is a matter about which we will not quarrel); and what is impiety?

What is the essential meaning of holiness or piety?

Euth. I really do not know, Socrates, how to express what I mean. For somehow or other our arguments, on whatever ground we rest them, seem to turn round and walk away from us.

Soc. Your words, Euthyphro, are like the handiwork of my ancestor Daedalus; and if I were the sayer or propounder of them, you might say that my arguments walk away and will not remain fixed where they are placed because I am a descendant of his. But now, since these notions are your

own, you must find some other gibe, for they certainly, as you yourself allow, show an inclination to be on the move.

Euth. Nay, Socrates, I shall still say that you are the Daedalus who sets arguments in motion; not I, certainly, but you make them move or go round, for they would never have stirred, as far as I am concerned.

Soc. Then I must be a greater than Daedalus: for whereas he only made his own inventions to move, I move those of other people as well. And the beauty of it is, that I would rather not. For I would give the wisdom of Daedalus, and the wealth of Tantalus, to be able to detain them and keep them fixed. But enough of this. As I perceive that you are lazy, I will myself endeavour to show you how you might instruct me in the nature of piety; and I hope that you will not grudge your labour. Tell me, then,— Is not that which is pious necessarily just?

Euth. Yes.

Soc. And is, then, all which is just pious? or, is that which
12 is pious all just, but that which is just, only in part and not all, pious?

All which is pious is just: —is therefore all which is just pious?

Euth. I do not understand you, Socrates.

Soc. And yet I know that you are as much wiser than I am, as you are younger. But, as I was saying, revered friend, the abundance of your wisdom makes you lazy. Please to exert yourself, for there is no real difficulty in understanding me. What I mean I may explain by an illustration of what I do not mean. The poet (Stasinus) sings —

> 'Of Zeus, the author and creator of all these things,
> You will not tell: for where there is fear there is also reverence.'

Now I disagree with this poet. Shall I tell you in what respect?

Euth. By all means.

Soc. I should not say that where there is fear there is also reverence; for I am sure that many persons fear poverty and disease, and the like evils, but I do not perceive that they reverence the objects of their fear.

We may say, e. g., that wherever there is reverence there will be fear, but not that wherever there is fear there will be reverence.

Euth. Very true.

Soc. But where reverence is, there is fear; for he who has a feeling of reverence and shame about the commission of any action, fears and is afraid of an ill reputation.

Euthyphro. *Euth.* No doubt.

SOCRATES, EUTHYPHRO. *Soc.* Then we are wrong in saying that where there is fear there is also reverence; and we should say, where there is reverence there is also fear. But there is not always reverence where there is fear; for fear is a more extended notion, and reverence is a part of fear, just as the odd is a part of number, and number is a more extended notion than the odd. I suppose that you follow me now?

Euth. Quite well.

Soc. That was the sort of question which I meant to raise when I asked whether the just is always the pious, or the pious always the just; and whether there may not be justice where there is not piety; for justice is the more extended notion of which piety is only a part. Do you dissent?

Euth. No, I think that you are quite right.

Soc. Then, if piety is a part of justice, I suppose that we should enquire what part? If you had pursued the enquiry in the previous cases; for instance, if you had asked me what is an even number, and what part of number the even is, I should have had no difficulty in replying, a number which represents a figure having two equal sides. Do you not agree?

Euth. Yes, I quite agree.

Piety or holiness is that part of justice which attends upon the gods.

Soc. In like manner, I want you to tell me what part of justice is piety or holiness, that I may be able to tell Meletus not to do me injustice, or indict me for impiety, as I am now adequately instructed by you in the nature of piety or holiness, and their opposites.

Euth. Piety or holiness, Socrates, appears to me to be that part of justice which attends to the gods, as there is the other part of justice which attends to men.

Soc. That is good, Euthyphro; yet still there is a little 13
point about which I should like to have further information, What is the meaning of 'attention'? For attention can hardly be used in the same sense when applied to the gods as when applied to other things. For instance, horses are said to require attention, and not every person is able to attend to them, but only a person skilled in horsemanship. Is it not so?

Euth. Certainly.

Euthyphro.

SOCRATES, EUTHYPHRO.

Soc. I should suppose that the art of horsemanship is the art of attending to horses?

Euth. Yes.

Soc. Nor is every one qualified to attend to dogs, but only the huntsman?

Euth. True.

Soc. And I should also conceive that the art of the huntsman is the art of attending to dogs?

Euth. Yes.

Soc. As the art of the oxherd is the art of attending to oxen?

Euth. Very true.

Soc. In like manner holiness or piety is the art of attending to the gods?— that would be your meaning, Euthyphro?

Euth. Yes.

Attention to others is designed to benefit and improve them. But how are the gods benefited or improved by the holy acts of men?

Soc. And is not attention always designed for the good or benefit of that to which the attention is given? As in the case of horses, you may observe that when attended to by the horseman's art they are benefited and improved, are they not?

Euth. True.

Soc. As the dogs are benefited by the huntsman's art, and the oxen by the art of the oxherd, and all other things are tended or attended for their good and not for their hurt?

Euth. Certainly, not for their hurt.

Soc. But for their good?

Euth. Of course.

Soc. And does piety or holiness, which has been defined to be the art of attending to the gods, benefit or improve them? Would you say that when you do a holy act you make any of the gods better?

Euth. No, no; that was certainly not what I meant.

Soc. And I, Euthyphro, never supposed that you did. I asked you the question about the nature of the attention, because I thought that you did not.

Euth. You do me justice, Socrates; that is not the sort of attention which I mean.

The attention to the gods called piety is

Soc. Good: but I must still ask what is this attention to the gods which is called piety?

Euth. It is such, Socrates, as servants show to their masters.

Euthyphro. SOCRATES, EUTHYPHRO.

Soc. I understand — a sort of ministration to the gods.

Euth. Exactly.

such as servants show their masters.

Soc. Medicine is also a sort of ministration or service, having in view the attainment of some object — would you not say of health?

Euth. I should.

Soc. Again, there is an art which ministers to the ship-builder with a view to the attainment of some result?

Euth. Yes, Socrates, with a view to the building of a ship.

Soc. As there is an art which ministers to the house-builder with a view to the building of a house?

Euth. Yes.

But in what way do men help the work of God?

Soc. And now tell me, my good friend, about the art which ministers to the gods: what work does that help to accomplish? For you must surely know if, as you say, you are of all men living the one who is best instructed in religion.

Euth. And I speak the truth, Socrates.

Soc. Tell me then, oh tell me — what is that fair work which the gods do by the help of our ministrations?

Euth. Many and fair, Socrates, are the works which they do.

Soc. Why, my friend, and so are those of a general. But 14
the chief of them is easily told. Would you not say that victory in war is the chief of them?

Euth. Certainly.

Soc. Many and fair, too, are the works of the husbandman, if I am not mistaken; but his chief work is the production of food from the earth?

Euth. Exactly.

Soc. And of the many and fair things done by the gods, which is the chief or principal one?

Euth. I have told you already, Socrates, that to learn all these things accurately will be very tiresome. Let me simply say that piety or holiness is learning how to please the gods in word and deed, by prayers and sacrifices. Such piety is the salvation of families and states, just as the impious, which is unpleasing to the gods, is their ruin and destruction.

Soc. I think that you could have answered in much fewer words the chief question which I asked, Euthyphro, if you had chosen. But I see plainly that you are not disposed to

instruct me — clearly not: else why, when we reached the point, did you turn aside? Had you only answered me I should have truly learned of you by this time the nature of piety. Now, as the asker of a question is necessarily dependent on the answerer, whither he leads I must follow; and can only ask again, what is the pious, and what is piety? Do you mean that they are a sort of science of praying and sacrificing?

Euth. Yes, I do.

Soc. And sacrificing is giving to the gods, and prayer is asking of the gods?

Euth. Yes, Socrates.

Soc. Upon this view, then, piety is a science of asking and giving?

Euth. You understand me capitally, Socrates.

Soc. Yes, my friend; the reason is that I am a votary of your science, and give my mind to it, and therefore nothing which you say will be thrown away upon me. Please then to tell me, what is the nature of this service to the gods? Do you mean that we prefer requests and give gifts to them?

Euth. Yes, I do.

Soc. Is not the right way of asking to ask of them what we want?

Euth. Certainly.

Soc. And the right way of giving is to give to them in return what they want of us. There would be no meaning in an art which gives to any one that which he does not want.

Men give to the gods, and the gods give to men; they do business with one another.

Euth. Very true, Socrates.

Soc. Then piety, Euthyphro, is an art which gods and men have of doing business with one another?

Euth. That is an expression which you may use, if you like.

Soc. But I have no particular liking for anything but the truth. I wish, however, that you would tell me what benefit accrues to the gods from our gifts. There is no doubt about
15 what they give to us; for there is no good thing which they do not give; but how we can give any good thing to them in return is far from being equally clear. If they give every-

Euthyphro. thing and we give nothing, that must be an affair of business in which we have very greatly the advantage of them.

SOCRATES, EUTHYPHRO.

Euth. And do you imagine, Socrates, that any benefit accrues to the gods from our gifts?

Soc. But if not, Euthyphro, what is the meaning of gifts which are conferred by us upon the gods?

Euth. What else, but tributes of honour; and, as I was just now saying, what pleases them?

Soc. Piety, then, is pleasing to the gods, but not beneficial or dear to them?

Euth. I should say that nothing could be dearer.

Soc. Then once more the assertion is repeated that piety is dear to the gods?

Euth. Certainly.

Again, the argument walks away.

Soc. And when you say this, can you wonder at your words not standing firm, but walking away? Will you accuse me of being the Daedalus who makes them walk away, not perceiving that there is another and far greater artist than Daedalus who makes them go round in a circle, and he is yourself; for the argument, as you will perceive, comes round to the same point. Were we not saying that the holy or pious was not the same with that which is loved of the gods? Have you forgotten?

Euth. I quite remember.

Soc. And are you not saying that what is loved of the gods is holy; and is not this the same as what is dear to them — do you see?

Euth. True.

Soc. Then either we were wrong in our former assertion; or, if we were right then, we are wrong now.

Euth. One of the two must be true.

Nevertheless, Socrates is confident that Euthyphro knows the truth, but will not tell him.

Soc. Then we must begin again and ask, What is piety? That is an enquiry which I shall never be weary of pursuing as far as in me lies; and I entreat you not to scorn me, but to apply your mind to the utmost, and tell me the truth. For, if any man knows, you are he; and therefore I must detain you, like Proteus, until you tell. If you had not certainly known the nature of piety and impiety, I am confident that you would never, on behalf of a serf, have charged your aged father with murder. You would not have run

such a risk of doing wrong in the sight of the gods, and you would have had too much respect for the opinions of men. I am sure, therefore, that you know the nature of piety and impiety. Speak out then, my dear Euthyphro, and do not hide your knowledge.

Euthyphro. SOCRATES, EUTHYPHRO.

Euth. Another time, Socrates; for I am in a hurry, and must go now.

Euthyphro is in a hurry to depart, and finally leaves Socrates to his fate.

Soc. Alas! my companion, and will you leave me in despair? I was hoping that you would instruct me in the nature of piety and impiety; and then I might have cleared myself of Meletus and his indictment. I would have told
16 him that I had been enlightened by Euthyphro, and had given up rash innovations and speculations, in which I indulged only through ignorance, and that now I am about to lead a better life.

APOLOGY.

INTRODUCTION.

IN what relation the Apology of Plato stands to the real defence of Socrates, there are no means of determining. It certainly agrees in tone and character with the description of Xenophon, who says in the Memorabilia (iv. 4, 4) that Socrates might have been acquitted 'if in any moderate degree he would have conciliated the favour of the dicasts;' and who informs us in another passage (iv. 8, 4), on the testimony of Hermogenes, the friend of Socrates, that he had no wish to live; and that the divine sign refused to allow him to prepare a defence, and also that Socrates himself declared this to be unnecessary, on the ground that all his life long he had been preparing against that hour. For the speech breathes throughout a spirit of defiance, 'ut non supplex aut reus sed magister aut dominus videretur esse judicum' (Cic. de Orat. i. 54); and the loose and desultory style is an imitation of the 'accustomed manner' in which Socrates spoke in 'the agora and among the tables of the money-changers.' The allusion in the Crito (45 B) may, perhaps, be adduced as a further evidence of the literal accuracy of some parts (37 C, D). But in the main it must be regarded as the ideal of Socrates, according to Plato's conception of him, appearing in the greatest and most public scene of his life, and in the height of his triumph, when he is weakest, and yet his mastery over mankind is greatest, and his habitual irony acquires a new meaning and a sort of tragic pathos in the face of death. The facts of his life are summed up, and the features of his character are brought out as if by accident in the course of the defence. The conversational manner, the seeming want of arrangement, the ironical simplicity, are found to result in a perfect work of art, which is the portrait of Socrates.

Yet some of the topics may have been actually used by Socrates; and the recollection of his very words may have rung

Apology. INTRODUCTION.

in the ears of his disciple. The Apology of Plato may be compared generally with those speeches of Thucydides in which he has embodied his conception of the lofty character and policy of the great Pericles, and which at the same time furnish a commentary on the situation of affairs from the point of view of the historian. So in the Apology there is an ideal rather than a literal truth; much is said which was not said, and is only Plato's view of the situation. Plato was not, like Xenophon, a chronicler of facts; he does not appear in any of his writings to have aimed at literal accuracy. He is not therefore to be supplemented from the Memorabilia and Symposium of Xenophon, who belongs to an entirely different class of writers. The Apology of Plato is not the report of what Socrates said, but an elaborate composition, quite as much so in fact as one of the Dialogues. And we may perhaps even indulge in the fancy that the actual defence of Socrates was as much greater than the Platonic defence as the master was greater than the disciple. But in any case, some of the words used by him must have been remembered, and some of the facts recorded must have actually occurred. It is significant that Plato is said to have been present at the defence (Apol. 38 B), as he is also said to have been absent at the last scene in the Phaedo (59 B). Is it fanciful to suppose that he meant to give the stamp of authenticity to the one and not to the other? — especially when we consider that these two passages are the only ones in which Plato makes mention of himself. The circumstance that Plato was to be one of his sureties for the payment of the fine which he proposed has the appearance of truth. More suspicious is the statement that Socrates received the first impulse to his favourite calling of cross-examining the world from the Oracle of Delphi; for he must already have been famous before Chaerephon went to consult the Oracle (Riddell, i. p. xvi), and the story is of a kind which is very likely to have been invented. On the whole we arrive at the conclusion that the Apology is true to the character of Socrates, but we cannot show that any single sentence in it was actually spoken by him. It breathes the spirit of Socrates, but has been cast anew in the mould of Plato.

There is not much in the other Dialogues which can be compared with the Apology. The same recollection of his master may have been present to the mind of Plato when depicting the

sufferings of the Just in the Republic (ii. 361 foll., vi. 500 A). The Crito may also be regarded as a sort of appendage to the Apology, in which Socrates, who has defied the judges, is nevertheless represented as scrupulously obedient to the laws. The idealization of the sufferer is carried still further in the Gorgias (476 foll.), in which the thesis is maintained, that 'to suffer is better than to do evil;' and the art of rhetoric is described as only useful for the purpose of self-accusation. The parallelisms which occur in the so-called Apology of Xenophon are not worth noticing, because the writing in which they are contained is manifestly spurious. The statements of the Memorabilia (i. 2; iv. 8) respecting the trial and death of Socrates agree generally with Plato; but they have lost the flavour of Socratic irony in the narrative of Xenophon.

Apology. INTRODUCTION.

The Apology or Platonic defence of Socrates is divided into three parts: 1st. The defence properly so called; 2nd. The shorter address in mitigation of the penalty; 3rd. The last words of prophetic rebuke and exhortation.

Steph. 17 The first part commences with an apology for his colloquial style; he is, as he has always been, the enemy of rhetoric, and knows of no rhetoric but truth; he will not falsify his character by 18 making a speech. Then he proceeds to divide his accusers into two classes; first, there is the nameless accuser—public opinion. All the world from their earliest years had heard that he was a corrupter of youth, and had seen him caricatured in the Clouds of Aristophanes. Secondly, there are the professed accusers, who are but the mouth-piece of the others. The accusations of both might be summed up in a formula. The first say, 'Socrates is an evil-doer and a curious person, searching into things under the earth and above the heaven; and making the worse appear the better cause, and teaching all this to others.' The second, 'Socrates is an evil-doer and corrupter of the youth, who does not receive the gods whom the state receives, but introduces other new divinities.' These last words appear to have been the actual indictment (cp. Xen. Mem. i. 1); and the previous formula, which is a summary of public opinion, assumes the same legal style.

ANALYSIS.

19 The answer begins by clearing up a confusion. In the representations of the Comic poets, and in the opinion of the multitude,

Apology. he had been identified with the teachers of physical science and
Analysis. with the Sophists. But this was an error. For both of them he professes a respect in the open court, which contrasts with his manner of speaking about them in other places. (Cp. for Anaxagoras, Phaedo 98 B, Laws xii. 967; for the Sophists, Meno 95 D, Rep. vi. 492, Tim. 19 E, Theaet. 154 E, Soph. 265 foll., etc.) But at the same time he shows that he is not one of them. Of natural philosophy he knows nothing; not that he despises such pursuits, but the fact is that he is ignorant of them, and never says a word about them. Nor is he paid for giving instruction — that is another mistaken notion: — he has nothing to teach. But he commends 20
Evenus for teaching virtue at such a 'moderate' rate as five minae. Something of the 'accustomed irony,' which may perhaps be expected to sleep in the ear of the multitude, is lurking here.

He then goes on to explain the reason why he is in such an evil name. That had arisen out of a peculiar mission which he had taken upon himself. The enthusiastic Chaerephon (probably in 21
anticipation of the answer which he received) had gone to Delphi and asked the oracle if there was any man wiser than Socrates; and the answer was, that there was no man wiser. What could be the meaning of this — that he who knew nothing, and knew that he knew nothing, should be declared by the oracle to be the wisest of men? Reflecting upon the answer, he determined to refute it by finding 'a wiser;' and first he went to the politicians, and then to the poets, and then to the craftsmen, but 22
always with the same result — he found that they knew nothing, or hardly anything more than himself; and that the little advantage which in some cases they possessed was more than counterbalanced by their conceit of knowledge. He knew nothing, and knew that he knew nothing: they knew little or nothing, and imagined that they knew all things. Thus he had passed his 23
life as a sort of missionary in detecting the pretended wisdom of mankind; and this occupation had quite absorbed him and taken him away both from public and private affairs. Young men of the richer sort had made a pastime of the same pursuit, 'which was not unamusing.' And hence bitter enmities had arisen; the professors of knowledge had revenged themselves by calling him a villainous corrupter of youth, and by repeating

the commonplaces about atheism and materialism and sophistry,
24 which are the stock-accusations against all philosophers when there is nothing else to be said of them.

The second accusation he meets by interrogating Meletus, who is present and can be interrogated. 'If he is the corrupter, who is the improver of the citizens?' (Cp. Meno 91 C.) 'All men
25 everywhere.' But how absurd, how contrary to analogy is this! How inconceivable too, that he should make the citizens worse when he has to live with them. This surely cannot be intentional;
26 and if unintentional, he ought to have been instructed by Meletus, and not accused in the court.

But there is another part of the indictment which says that he teaches men not to receive the gods whom the city receives, and has other new gods. 'Is that the way in which he is supposed to corrupt the youth?' 'Yes, it is.' 'Has he only new gods, or none at all?' 'None at all.' 'What, not even the sun and moon?' 'No; why, he says that the sun is a stone, and the moon earth.' That, replies Socrates, is the old confusion about Anaxagoras; the Athenian people are not so ignorant as to attribute to the influence of Socrates notions which have found their way into the drama, and may be learned at the theatre. Socrates undertakes
27 to show that Meletus (rather unjustifiably) has been compounding a riddle in this part of the indictment: 'There are no gods, but Socrates believes in the existence of the sons of gods, which is absurd.'

28 Leaving Meletus, who has had enough words spent upon him, he returns to the original accusation. The question may be asked, Why will he persist in following a profession which leads him to death? Why?—because he must remain at his post where the god has placed him, as he remained at Potidaea, and Amphi-
29 polis, and Delium, where the generals placed him. Besides, he is not so overwise as to imagine that he knows whether death is a good or an evil; and he is certain that desertion of his duty
30 is an evil. Anytus is quite right in saying that they should never have indicted him if they meant to let him go. For he will certainly obey God rather than man; and will continue to preach to all men of all ages the necessity of virtue and improvement; and if they refuse to listen to him he will still persevere and reprove them. This is his way of corrupting the youth, which he will not

Apology. cease to follow in obedience to the god, even if a thousand deaths
Analysis. await him.

He is desirous that they should let him live — not for his own sake, but for theirs; because he is their heaven-sent friend (and 31
they will never have such another), or, as he may be ludicrously described, he is the gadfly who stirs the generous steed into motion. Why then has he never taken part in public affairs? Because the familiar divine voice has hindered him; if he had been a public man, and had fought for the right, as he would certainly have fought against the many, he would not have lived, and could therefore have done no good. Twice in public matters 32
he has risked his life for the sake of justice — once at the trial of the generals; and again in resistance to the tyrannical commands of the Thirty.

But, though not a public man, he has passed his days in instructing the citizens without fee or reward — this was his mission. Whether his disciples have turned out well or ill, he cannot justly be charged with the result, for he never promised to teach them 33
anything. They might come if they liked, and they might stay away if they liked: and they did come, because they found an amusement in hearing the pretenders to wisdom detected. If they have been corrupted, their elder relatives (if not themselves) might surely come into court and witness against him, and there is an opportunity still for them to appear. But their fathers 34
and brothers all appear in court (including 'this' Plato), to witness on his behalf; and if their relatives are corrupted, at least they are uncorrupted; 'and they are my witnesses. For they know that I am speaking the truth, and that Meletus is lying.'

This is about all that he has to say. He will not entreat the judges to spare his life; neither will he present a spectacle of weeping children, although he, too, is not made of 'rock or oak.' 35
Some of the judges themselves may have complied with this practice on similar occasions, and he trusts that they will not be angry with him for not following their example. But he feels that such conduct brings discredit on the name of Athens: he feels, too, that the judge has sworn not to give away justice; and he cannot be guilty of the impiety of asking the judge to break his oath, when he is himself being tried for impiety.

As he expected, and probably intended, he is convicted. And now the tone of the speech, instead of being more conciliatory, becomes more lofty and commanding. Anytus proposes death as the penalty: and what counter-proposition shall he make? He, the benefactor of the Athenian people, whose whole life has been spent in doing them good, should at least have the Olympic
37 victor's reward of maintenance in the Prytaneum. Or why should he propose any counter-penalty when he does not know whether death, which Anytus proposes, is a good or an evil? and he is certain that imprisonment is an evil, exile is an evil. Loss of money might be no evil, but then he has none to give;
38 perhaps he can make up a mina. Let that be the penalty, or, if his friends wish, thirty minae; for which they will be excellent securities.

[*He is condemned to death.*]

He is an old man already, and the Athenians will gain nothing but disgrace by depriving him of a few years of life. Perhaps he could have escaped, if he had chosen to throw down his arms and entreat for his life. But he does not at all repent of the manner of his defence; he would rather die in his own fashion than live
39 in theirs. For the penalty of unrighteousness is swifter than death; that penalty has already overtaken his accusers as death will soon overtake him.

And now, as one who is about to die, he will prophesy to them. They have put him to death in order to escape the necessity of giving an account of their lives. But his death 'will be the seed' of many disciples who will convince them of their evil ways, and will come forth to reprove them in harsher terms, because they are younger and more inconsiderate.

40 He would like to say a few words, while there is time, to those who would have acquitted him. He wishes them to know that the divine sign never interrupted him in the course of his defence; the reason of which, as he conjectures, is that the death to which he is going is a good and not an evil. For either death is a long sleep, the best of sleeps, or a journey to another world in which the souls of the dead are gathered together, and in which
41 there may be a hope of seeing the heroes of old — in which, too,

Apology. ANALYSIS.

there are just judges; and as all are immortal, there can be no fear of any one suffering death for his opinions.

Nothing evil can happen to the good man either in life or death, and his own death has been permitted by the gods, because it was better for him to depart; and therefore he forgives his judges because they have done him no harm, although they never meant to do him any good.

He has a last request to make to them — that they will trouble 42
his sons as he has troubled them, if they appear to prefer riches to virtue, or to think themselves something when they are nothing.

INTRODUCTION.

'Few persons will be found to wish that Socrates should have defended himself otherwise,' — if, as we must add, his defence was that with which Plato has provided him. But leaving this question, which does not admit of a precise solution, we may go on to ask what was the impression which Plato in the Apology intended to give of the character and conduct of his master in the last great scene? Did he intend to represent him (1) as employing sophistries; (2) as designedly irritating the judges? Or are these sophistries to be regarded as belonging to the age in which he lived and to his personal character, and this apparent haughtiness as flowing from the natural elevation of his position?

For example, when he says that it is absurd to suppose that one man is the corrupter and all the rest of the world the improvers of the youth; or, when he argues that he never could have corrupted the men with whom he had to live; or, when he proves his belief in the gods because he believes in the sons of gods, is he serious or jesting? It may be observed that these sophisms all occur in his cross-examination of Meletus, who is easily foiled and mastered in the hands of the great dialectician. Perhaps he regarded these answers as good enough for his accuser, of whom he makes very light. Also there is a touch of irony in them, which takes them out of the category of sophistry. (Cp. Euthyph. 2.)

That the manner in which he defends himself about the lives of his disciples is not satisfactory, can hardly be denied. Fresh in

the memory of the Athenians, and detestable as they deserved to be to the newly restored democracy, were the names of Alcibiades, Critias, Charmides. It is obviously not a sufficient answer that Socrates had never professed to teach them anything, and is therefore not justly chargeable with their crimes. Yet the defence, when taken out of this ironical form, is doubtless sound: that his teaching had nothing to do with their evil lives. Here, then, the sophistry is rather in form than in substance, though we might desire that to such a serious charge Socrates had given a more serious answer.

Truly characteristic of Socrates is another point in his answer, which may also be regarded as sophistical. He says that 'if he has corrupted the youth, he must have corrupted them involuntarily.' But if, as Socrates argues, all evil is involuntary, then all criminals ought to be admonished and not punished. In these words the Socratic doctrine of the involuntariness of evil is clearly intended to be conveyed. Here again, as in the former instance, the defence of Socrates is untrue practically, but may be true in some ideal or transcendental sense. The commonplace reply, that if he had been guilty of corrupting the youth their relations would surely have witnessed against him, with which he concludes this part of his defence, is more satisfactory.

Again, when Socrates argues that he must believe in the gods because he believes in the sons of gods, we must remember that this is a refutation not of the original indictment, which is consistent enough — 'Socrates does not receive the gods whom the city receives, and has other new divinities' — but of the interpretation put upon the words by Meletus, who has affirmed that he is a downright atheist. To this Socrates fairly answers, in accordance with the ideas of the time, that a downright atheist cannot believe in the sons of gods or in divine things. The notion that demons or lesser divinities are the sons of gods is not to be regarded as ironical or sceptical. He is arguing '*ad hominem*' according to the notions of mythology current in his age. Yet he abstains from saying that he believed in the gods whom the State approved. He does not defend himself, as Xenophon has defended him, by appealing to his practice of religion. Probably he neither wholly believed, nor disbelieved, in the existence of the popular gods; he had no means of knowing

Apology. INTRODUCTION.

about them. According to Plato (cp. Phaedo 118 B; Symp. 220 D), as well as Xenophon (Mem. i. 1, 30), he was punctual in the performance of the least religious duties; and he must have believed in his own oracular sign, of which he seemed to have an internal witness. But the existence of Apollo or Zeus, or the other gods whom the State approves, would have appeared to him both uncertain and unimportant in comparison of the duty of self-examination, and of those principles of truth and right which he deemed to be the foundation of religion. (Cp. Phaedr. 230; Euthyph. 6, 7; Rep. ii. 373 ff.)

The second question, whether Plato meant to represent Socrates as braving or irritating his judges, must also be answered in the negative. His irony, his superiority, his audacity, 'regarding not the person of man,' necessarily flow out of the loftiness of his situation. He is not acting a part upon a great occasion, but he is what he has been all his life long, 'a king of men.' He would rather not appear insolent, if he could avoid it (*οὐχ ὡς αὐθαδιζόμενος τοῦτο λέγω*). Neither is he desirous of hastening his own end, for life and death are simply indifferent to him. But such a defence as would be acceptable to his judges and might procure an acquittal, it is not in his nature to make. He will not say or do anything that might pervert the course of justice; he cannot have his tongue bound even 'in the throat of death.' With his accusers he will only fence and play, as he had fenced with other 'improvers of youth,' answering the Sophist according to his sophistry all his life long. He is serious when he is speaking of his own mission, which seems to distinguish him from all other reformers of mankind, and originates in an accident. The dedication of himself to the improvement of his fellow-citizens is not so remarkable as the ironical spirit in which he goes about doing good only in vindication of the credit of the oracle, and in the vain hope of finding a wiser man than himself. Yet this singular and almost accidental character of his mission agrees with the divine sign which, according to our notions, is equally accidental and irrational, and is nevertheless accepted by him as the guiding principle of his life. Socrates is nowhere represented to us as a freethinker or sceptic. There is no reason to doubt his sincerity when he speculates on the possibility of seeing and knowing the heroes of the Trojan war in another world. On

the other hand, his hope of immortality is uncertain; — he also conceives of death as a long sleep (in this respect differing from the Phaedo), and at last falls back on resignation to the divine will, and the certainty that no evil can happen to the good man either in life or death. His absolute truthfulness seems to hinder him from asserting positively more than this; and he makes no attempt to veil his ignorance in mythology and figures of speech. The gentleness of the first part of the speech contrasts with the aggravated, almost threatening, tone of the conclusion. He characteristically remarks that he will not speak as a rhetorician, that is to say, he will not make a regular defence such as Lysias or one of the orators might have composed for him, or, according to some accounts, did compose for him. But he first procures himself a hearing by conciliatory words. He does not attack the Sophists; for they were open to the same charges as himself; they were equally ridiculed by the Comic poets, and almost equally hateful to Anytus and Meletus. Yet incidentally the antagonism between Socrates and the Sophists is allowed to appear. He is poor and they are rich; his profession that he teaches nothing is opposed to their readiness to teach all things; his talking in the market-place to their private instructions; his tarry-at-home life to their wandering from city to city. The tone which he assumes towards them is one of real friendliness, but also of concealed irony. Towards Anaxagoras, who had disappointed him in his hopes of learning about mind and nature, he shows a less kindly feeling, which is also the feeling of Plato in other passages (Laws xii. 967 B). But Anaxagoras had been dead thirty years, and was beyond the reach of persecution.

It has been remarked that the prophecy of a new generation of teachers who would rebuke and exhort the Athenian people in harsher and more violent terms was, as far as we know, never fulfilled. No inference can be drawn from this circumstance as to the probability of the words attributed to him having been actually uttered. They express the aspiration of the first martyr of philosophy, that he would leave behind him many followers, accompanied by the not unnatural feeling that they would be fiercer and more inconsiderate in their words when emancipated from his control.

The above remarks must be understood as applying with any

Apology. INTRODUCTION.

degree of certainty to the Platonic Socrates only. For, although these or similar words may have been spoken by Socrates himself, we cannot exclude the possibility, that like so much else, *e. g.* the wisdom of Critias, the poem of Solon, the virtues of Charmides, they may have been due only to the imagination of Plato. The arguments of those who maintain that the Apology was composed during the process, resting on no evidence, do not require a serious refutation. Nor are the reasonings of Schleiermacher, who argues that the Platonic defence is an exact or nearly exact reproduction of the words of Socrates, partly because Plato would not have been guilty of the impiety of altering them, and also because many points of the defence might have been improved and strengthened, at all more conclusive. (See English Translation, p. 137.) What effect the death of Socrates produced on the mind of Plato, we cannot certainly determine; nor can we say how he would or must have written under the circumstances. We observe that the enmity of Aristophanes to Socrates does not prevent Plato from introducing them together in the Symposium engaged in friendly intercourse. Nor is there any trace in the Dialogues of an attempt to make Anytus or Meletus personally odious in the eyes of the Athenian public.

APOLOGY.

Socrates begs to be allowed to speak in his accustomed manner.

Steph. How you, O Athenians, have been affected by my accusers,
17 I cannot tell; but I know that they almost made me forget who I was — so persuasively did they speak; and yet they have hardly uttered a word of truth. But of the many falsehoods told by them, there was one which quite amazed me; — I mean when they said that you should be upon your guard and not allow yourselves to be deceived by the force of my eloquence. To say this, when they were certain to be detected as soon as I opened my lips and proved myself to be anything but a great speaker, did indeed appear to me most shameless — unless by the force of eloquence they mean the force of truth; for if such is their meaning, I admit that I am eloquent. But in how different a way from theirs! Well, as I was saying, they have scarcely spoken the truth at all; but from me you shall hear the whole truth: not, however, delivered after their manner in a set oration duly ornamented with words and phrases. No, by heaven! but I shall use the words and arguments which occur to me at the moment; for I am confident in the justice of my cause[1]: at my time of life I ought not to be appearing before you, O men of Athens, in the character of a juvenile orator — let no one expect it of me. And I must beg of you to grant me a favour: — If I defend myself in my accustomed manner, and you hear me using the words which I have been in the habit of using in the agora, at the tables of the money-changers, or anywhere else, I would ask you not to be surprised, and not to interrupt me on this account. For I am more than seventy years of age, and appearing now for the first time in a court of law, I am quite a stranger to the

[1] Or, I am certain that I am right in taking this course.

Apology.

SOCRATES.

The judges must excuse Socrates if he defends himself in his own fashion.

language of the place; and therefore I would have you regard me as if I were really a stranger, whom you would excuse if 18
he spoke in his native tongue, and after the fashion of his country:—Am I making an unfair request of you? Never mind the manner, which may or may not be good; but think only of the truth of my words, and give heed to that: let the speaker speak truly and the judge decide justly.

And first, I have to reply to the older charges and to my first accusers, and then I will go on to the later ones. For of old I have had many accusers, who have accused me falsely to you during many years; and I am more afraid of them than of Anytus and his associates, who are dangerous, too, in their own way. But far more dangerous are the others, who began when you were children, and took possession of your minds with their falsehoods, telling of one Socrates, a wise man, who speculated about the heaven above, and searched into the earth beneath, and made the worse appear the better cause. The disseminators of this tale are the accusers whom I dread; for their hearers are apt to fancy that such enquirers do not believe in the existence of the gods. And they are many, and their charges against me are of ancient date, and they were made by them in the days when you were more impressible than you are now—in childhood, or it may have been in youth—and the cause when heard went by default, for there was none to answer. And hardest of all, I do not know and cannot tell the names of my accusers; unless in the chance case of a Comic poet. All who from envy and malice have persuaded you—some of them having first convinced themselves—all this class of men are most difficult to deal with; for I cannot have them up here, and cross-examine them, and therefore I must simply fight with shadows in my own defence, and argue when there is no one who answers. I will ask you then to assume with me, as I was saying, that my opponents are of two kinds; one recent, the other ancient: and I hope that you will see the propriety of my answering the latter first, for these accusations you heard long before the others, and much oftener.

He has to meet two sorts of accusers.

Well, then, I must make my defence, and endeavour to clear 19
away in a short time, a slander which has lasted a long time. May I succeed, if to succeed be for my good and yours, or

Apology.
SOCRATES.

likely to avail me in my cause! The task is not an easy one; I quite understand the nature of it. And so leaving the event with God, in obedience to the law I will now make my defence.

There is the accusation of the theatres; which declares that he is a student of natural philosophy.

I will begin at the beginning, and ask what is the accusation which has given rise to the slander of me, and in fact has encouraged Meletus to prefer this charge against me. Well, what do the slanderers say? They shall be my prosecutors, and I will sum up their words in an affidavit: 'Socrates is an evil-doer, and a curious person, who searches into things under the earth and in heaven, and he makes the worse appear the better cause; and he teaches the aforesaid doctrines to others.' Such is the nature of the accusation: it is just what you have yourselves seen in the comedy of Aristophanes[1], who has introduced a man whom he calls Socrates, going about and saying that he walks in air, and talking a deal of nonsense concerning matters of which I do not pretend to know either much or little — not that I mean to speak disparagingly of any one who is a student of natural philosophy. I should be very sorry if Meletus could bring so grave a charge against me. But the simple truth is, O Athenians, that I have nothing to do with physical speculations. Very many of those here present are witnesses to the truth of this, and to them I appeal. Speak, then, you who have heard me, and tell your neighbours whether any of you have ever known me hold forth in few words or in many upon such matters. . . . You hear their answer. And from what they say of this part of the charge you will be able to judge of the truth of the rest.

There is the report that he is a Sophist who receives money.

As little foundation is there for the report that I am a teacher, and take money; this accusation has no more truth in it than the other. Although, if a man were really able to instruct mankind, to receive money for giving instruction would, in my opinion, be an honour to him. There is Gorgias of Leontium, and Prodicus of Ceos, and Hippias of Elis, who go the round of the cities, and are able to persuade the young men to leave their own citizens by whom they might be taught for nothing, and come to them whom they not only pay, but are thankful if they may be allowed to

[1] Aristoph., Clouds, 225 ff.

Apology.

SOCRATES.

The ironical question which Socrates put to Callias.

pay them. There is at this time a Parian philosopher residing in Athens, of whom I have heard; and I came to hear of him in this way:—I came across a man who has spent a world of money on the Sophists, Callias, the son of Hipponicus, and knowing that he had sons, I asked him: 'Callias,' I said, 'if your two sons were foals or calves, there would be no difficulty in finding some one to put over them; we should hire a trainer of horses, or a farmer probably, who would improve and perfect them in their own proper virtue and excellence; but as they are human beings, whom are you thinking of placing over them? Is there any one who understands human and political virtue? You must have thought about the matter, for you have sons; is there any one?' 'There is,' he said. 'Who is he?' said I; 'and of what country? and what does he charge?' 'Evenus the Parian,' he replied; 'he is the man, and his charge is five minae.' Happy is Evenus, I said to myself, if he really has this wisdom, and teaches at such a moderate charge. Had I the same, I should have been very proud and conceited; but the truth is that I have no knowledge of the kind.

I dare say, Athenians, that some one among you will reply, 'Yes, Socrates, but what is the origin of these accusations which are brought against you; there must have been something strange which you have been doing? All these rumours and this talk about you would never have arisen if you had been like other men: tell us, then, what is the cause of them, for we should be sorry to judge hastily of you.' Now I regard this as a fair challenge, and I will endeavour to explain to you the reason why I am called wise and have such an evil fame. Please to attend then. And although some of you may think that I am joking, I declare that I will tell you the entire truth. Men of Athens, this reputation of mine has come of a certain sort of wisdom which I possess. If you ask me what kind of wisdom, I reply, wisdom such as may perhaps be attained by man, for to that extent I am inclined to believe that I am wise; whereas the persons of whom I was speaking have a superhuman wisdom, which I may fail to describe, because I have it not myself; and he who says that I have, speaks falsely, and is taking away my character. And here, O men of Athens, I must beg you not to interrupt me, even if I seem

The accusations against me have arisen out of a sort of wisdom which I practise.

SOCRATES.

My practice of it arose out of a declaration of the Delphian Oracle that I was the wisest of men.

to say something extravagant. For the word which I will speak is not mine. I will refer you to a witness who is worthy of credit; that witness shall be the God of Delphi — he will tell you about my wisdom, if I have any, and of what sort it is. You must have known Chaerephon; he was early
21 a friend of mine, and also a friend of yours, for he shared in the recent exile of the people, and returned with you. Well, Chaerephon, as you know, was very impetuous in all his doings, and he went to Delphi and boldly asked the oracle to tell him whether — as I was saying, I must beg you not to interrupt — he asked the oracle to tell him whether any one was wiser than I was, and the Pythian prophetess answered, that there was no man wiser. Chaerephon is dead himself; but his brother, who is in court, will confirm the truth of what I am saying.

Why do I mention this? Because I am going to explain to you why I have such an evil name. When I heard the answer, I said to myself, What can the god mean? and what is the interpretation of his riddle? for I know that I have no wisdom, small or great. What then can he mean when he says that I am the wisest of men? And yet he is a god, and cannot lie; that would be against his nature. After long consideration, I thought of a method of trying the question. I reflected that if I could only find a man wiser than myself, then I might go to the god with a refutation in my hand. I should say to him, 'Here is a man who is wiser than I am; but you said that I was the wisest.' Accordingly I went to one who had the reputation of wisdom, and observed him — his name I need not mention; he was a politician whom I selected for examination — and the result was as follows: When I began to talk with him, I could not help thinking that he was not really wise, although he was thought wise by many, and still wiser by himself; and thereupon I tried to explain to him that he thought himself wise, but was not really wise; and the consequence was that he hated me, and his enmity was shared by several who were present and heard me. So I left him, saying to myself, as I went away: Well, although I do not suppose that either of us knows anything really beautiful and good, I am better off than he is, — for he knows nothing, and thinks that he knows; I neither

I went about searching after a man who was wiser than myself: at first among the politicians; then among the philosophers; and found that I had an advantage over them, because I had no conceit of knowledge.

Apology.
SOCRATES.

know nor think that I know. In this latter particular, then, I seem to have slightly the advantage of him. Then I went to another who had still higher pretensions to wisdom, and my conclusion was exactly the same. Whereupon I made another enemy of him, and of many others besides him.

Then I went to one man after another, being not unconscious of the enmity which I provoked, and I lamented and feared this: but necessity was laid upon me,— the word of God, I thought, ought to be considered first. And I said to myself, Go I must to all who appear to know, and find out the meaning of the oracle. And I swear to you, Athenians, 22
by the dog I swear! — for I must tell you the truth — the result of my mission was just this: I found that the men most in repute were all but the most foolish; and that others less esteemed were really wiser and better. I will tell you the tale of my wanderings and of the 'Herculean' labours, as I may call them, which I endured only to find at last the oracle irrefutable. After the politicians, I went to the poets; tragic, dithyrambic, and all sorts. And there, I said to myself, you will be instantly detected; now you will find out that you are more ignorant than they are. Accordingly, I took them some of the most elaborate passages in their own writings, and asked what was the meaning of them — thinking that they would teach me something. Will you believe me? I am almost ashamed to confess the truth, but I must say that there is hardly a person present who would not have talked better about their poetry than they did themselves. Then I knew that not by wisdom do poets write poetry, but by a sort of genius and inspiration; they are like diviners or soothsayers who also say many fine things, but do not understand the meaning of them. The poets appeared to me to be much in the same case; and I further observed that upon the strength of their poetry they believed themselves to be the wisest of men in other things in which they were not wise. So I departed, conceiving myself to be superior to them for the same reason that I was superior to the politicians.

I found that the poets were the worst possible interpreters of their own writings.

At last I went to the artisans, for I was conscious that I knew nothing at all, as I may say, and I was sure that they knew many fine things; and here I was not mistaken, for they did know many things of which I was ignorant, and in

The artisans had some real knowledge, but they had also a con-

this they certainly were wiser than I was. But I observed that even the good artisans fell into the same error as the poets;—because they were good workmen they thought that they also knew all sorts of high matters, and this defect in them overshadowed their wisdom; and therefore I asked myself on behalf of the oracle, whether I would like to be as I was, neither having their knowledge nor their ignorance, or like them in both; and I made answer to myself and to the oracle that I was better off as I was.

Conceit that they knew things which were beyond them.

This inquisition has led to my having many enemies of
23 the worst and most dangerous kind, and has given occasion also to many calumnies. And I am called wise, for my hearers always imagine that I myself possess the wisdom which I find wanting in others: but the truth is, O men of Athens, that God only is wise; and by his answer he intends to show that the wisdom of men is worth little or nothing; he is not speaking of Socrates, he is only using my name by way of illustration, as if he said, He, O men, is the wisest, who, like Socrates, knows that his wisdom is in truth worth nothing. And so I go about the world, obedient to the god, and search and make enquiry into the wisdom of any one, whether citizen or stranger, who appears to be wise; and if he is not wise, then in vindication of the oracle I show him that he is not wise; and my occupation quite absorbs me, and I have no time to give either to any public matter of interest or to any concern of my own, but I am in utter poverty by reason of my devotion to the god.

The oracle was intended to apply, not to Socrates, but to all men who know that their wisdom is worth nothing.

There is another thing:—young men of the richer classes, who have not much to do, come about me of their own accord; they like to hear the pretenders examined, and they often imitate me, and proceed to examine others; there are plenty of persons, as they quickly discover, who think that they know something, but really know little or nothing; and then those who are examined by them instead of being angry with themselves are angry with me: This confounded Socrates, they say; this villainous misleader of youth!—and then if somebody asks them, Why, what evil does he practise or teach? they do not know, and cannot tell; but in order that they may not appear to be at a loss, they

There are my imitators who go about detecting pretenders, and the enmity which they arouse falls upon me.

Apology.
SOCRATES, MELETUS.

repeat the ready-made charges which are used against all philosophers about teaching things up in the clouds and under the earth, and having no gods, and making the worse appear the better cause; for they do not like to confess that their pretence of knowledge has been detected — which is the truth; and as they are numerous and ambitious and energetic, and are drawn up in battle array and have persuasive tongues, they have filled your ears with their loud and inveterate calumnies. And this is the reason why my three accusers, Meletus and Anytus and Lycon, have set upon me; Meletus, who has a quarrel with me on behalf of the poets; Anytus, on behalf of the craftsmen and politicians; Lycon, on behalf of the rhetoricians: and as I said 24
at the beginning, I cannot expect to get rid of such a mass of calumny all in a moment. And this, O men of Athens, is the truth and the whole truth; I have concealed nothing, I have dissembled nothing. And yet, I know that my plainness of speech makes them hate me, and what is their hatred but a proof that I am speaking the truth?— Hence has arisen the prejudice against me; and this is the reason of it, as you will find out either in this or in any future enquiry.

The second class of accusers.

I have said enough in my defence against the first class of my accusers; I turn to the second class. They are headed by Meletus, that good man and true lover of his country, as he calls himself. Against these, too, I must try to make a defence:— Let their affidavit be read: it contains something of this kind: It says that Socrates is a doer of evil, who corrupts the youth; and who does not believe in the gods of the state, but has other new divinities of his own. Such is the charge; and now let us examine the particular counts. He says that I am a doer of evil, and corrupt the youth; but I say, O men of Athens, that Meletus is a doer of evil, in that he pretends to be in earnest when he is only in jest, and is so eager to bring men to trial from a pretended zeal and interest about matters in which he really never had the smallest interest. And the truth of this I will endeavour to prove to you.

Come hither, Meletus, and let me ask a question of you. You think a great deal about the improvement of youth?

Yes, I do.

SOCRATES, MELETUS.

Tell the judges, then, who is their improver; for you must know, as you have taken the pains to discover their corrupter, and are citing and accusing me before them. Speak, then, and tell the judges who their improver is.— Observe, Meletus, that you are silent, and have nothing to say. But is not this rather disgraceful, and a very considerable proof of what I was saying, that you have no interest in the matter? Speak up, friend, and tell us who their improver is.

All men are discovered to be improvers of youth with the single exception of Socrates.

The laws.

But that, my good sir, is not my meaning. I want to know who the person is, who, in the first place, knows the laws.

The judges, Socrates, who are present in court.

What, do you mean to say, Meletus, that they are able to instruct and improve youth?

Certainly they are.

What, all of them, or some only and not others?

All of them.

By the goddess Herè, that is good news! There are plenty of improvers, then. And what do you say of the
25 audience,— do they improve them?

Yes, they do.

And the senators?

Yes, the senators improve them.

But perhaps the members of the assembly corrupt them?— or do they too improve them?

They improve them.

Then every Athenian improves and elevates them; all with the exception of myself; and I alone am their corrupter? Is that what you affirm?

That is what I stoutly affirm.

I am very unfortunate if you are right. But suppose I ask you a question: How about horses? Does one man do them harm and all the world good? Is not the exact opposite the truth? One man is able to do them good, or at least not many;— the trainer of horses, that is to say, does them good, and others who have to do with them rather injure them? Is not that true, Meletus, of horses, or of any other animals? Most assuredly it is; whether you and Anytus

But this rather unfortunate fact does not accord with the analogy of the animals.

Apology.

SOCRATES, MELETUS.

say yes or no. Happy indeed would be the condition of youth if they had one corrupter only, and all the rest of the world were their improvers. But you, Meletus, have sufficiently shown that you never had a thought about the young: your carelessness is seen in your not caring about the very things which you bring against me.

And now, Meletus, I will ask you another question — by Zeus I will: Which is better, to live among bad citizens, or among good ones? Answer, friend, I say; the question is one which may be easily answered. Do not the good do their neighbours good, and the bad do them evil?

Certainly.

And is there any one who would rather be injured than benefited by those who live with him? Answer, my good friend, the law requires you to answer — does any one like to be injured?

Certainly not.

When I do harm to my neighbour I must do harm to myself: and therefore I cannot be supposed to injure them intentionally.

And when you accuse me of corrupting and deteriorating the youth, do you allege that I corrupt them intentionally or unintentionally?

Intentionally, I say.

But you have just admitted that the good do their neighbours good, and the evil do them evil. Now, is that a truth which your superior wisdom has recognized thus early in life, and am I, at my age, in such darkness and ignorance as not to know that if a man with whom I have to live is corrupted by me, I am very likely to be harmed by him; and yet I corrupt him, and intentionally, too — so you say, although neither I nor any other human being is ever likely to be convinced by you. But either I do not corrupt them, or 26
I corrupt them unintentionally; and on either view of the case you lie. If my offence is unintentional, the law has no cognizance of unintentional offences: you ought to have taken me privately, and warned and admonished me; for if I had been better advised, I should have left off doing what I only did unintentionally — no doubt I should; but you would have nothing to say to me and refused to teach me. And now you bring me up in this court, which is a place not of instruction, but of punishment.

It will be very clear to you, Athenians, as I was saying,

that Meletus has no care at all, great or small, about the matter. But still I should like to know, Meletus, in what I am affirmed to corrupt the young. I suppose you mean, as I infer from your indictment, that I teach them not to acknowledge the gods which the state acknowledges, but some other new divinities or spiritual agencies in their stead. These are the lessons by which I corrupt the youth, as you say.

SOCRATES, MELETUS.

Yes, that I say emphatically.

Then, by the gods, Meletus, of whom we are speaking, tell me and the court, in somewhat plainer terms, what you mean! for I do not as yet understand whether you affirm that I teach other men to acknowledge some gods, and therefore that I do believe in gods, and am not an entire atheist — this you do not lay to my charge,— but only you say that they are not the same gods which the city recognizes — the charge is that they are different gods. Or, do you mean that I am an atheist simply, and a teacher of atheism?

Socrates is declared by Meletus to be an atheist and to corrupt the religion of the young.

I mean the latter — that you are a complete atheist.

What an extraordinary statement! Why do you think so, Meletus? Do you mean that I do not believe in the godhead of the sun or moon, like other men?

I assure you, judges, that he does not: for he says that the sun is stone, and the moon earth.

Friend Meletus, you think that you are accusing Anaxagoras: and you have but a bad opinion of the judges, if you fancy them illiterate to such a degree as not to know that these doctrines are found in the books of Anaxagoras the Clazomenian, which are full of them. And so, forsooth, the youth are said to be taught them by Socrates, when there are not unfrequently exhibitions of them at the theatre[1] (price of admission one drachma at the most); and they might pay their money, and laugh at Socrates if he pretends to father these extraordinary views. And so, Meletus, you really think that I do not believe in any god?

Meletus has confounded Socrates with Anaxagoras;

I swear by Zeus that you believe absolutely in none at all.

Nobody will believe you, Meletus, and I am pretty sure that you do not believe yourself. I cannot help thinking,

and he has contradicted himself in the indictment.

[1] Probably in allusion to Aristophanes who caricatured, and to Euripides who borrowed the notions of Anaxagoras, as well as to other dramatic poets.

Apology.

SOCRATES, MELETUS.

men of Athens, that Meletus is reckless and impudent, and that he has written this indictment in a spirit of mere wantonness and youthful bravado. Has he not compounded a 27
riddle, thinking to try me? He said to himself:—I shall see whether the wise Socrates will discover my facetious contradiction, or whether I shall be able to deceive him and the rest of them. For he certainly does appear to me to contradict himself in the indictment as much as if he said that Socrates is guilty of not believing in the gods, and yet of believing in them—but this is not like a person who is in earnest.

I should like you, O men of Athens, to join me in examining what I conceive to be his inconsistency; and do you, Meletus, answer. And I must remind the audience of my request that they would not make a disturbance if I speak in my accustomed manner:

How can Socrates believe in divine agencies and not believe in gods?

Did ever man, Meletus, believe in the existence of human things, and not of human beings? . . . I wish, men of Athens, that he would answer, and not be always trying to get up an interruption. Did ever any man believe in horsemanship, and not in horses? or in flute-playing, and not in flute-players? No, my friend; I will answer to you and to the court, as you refuse to answer for yourself. There is no man who ever did. But now please to answer the next question: Can a man believe in spiritual and divine agencies, and not in spirits or demigods?

He cannot.

How lucky I am to have extracted that answer, by the assistance of the court! But then you swear in the indictment that I teach and believe in divine or spiritual agencies (new or old, no matter for that); at any rate, I believe in spiritual agencies,—so you say and swear in the affidavit; and yet if I believe in divine beings, how can I help believing in spirits or demigods;—must I not? To be sure I must; and therefore I may assume that your silence gives consent. Now what are spirits or demigods? are they not either gods or the sons of gods?

Certainly they are.

But this is what I call the facetious riddle invented by you: the demigods or spirits are gods, and you say first that

I do not believe in gods, and then again that I do believe in gods; that is, if I believe in demigods. For if the demigods are the illegitimate sons of gods, whether by the nymphs or by any other mothers, of whom they are said to be the sons — what human being will ever believe that there are no gods if they are the sons of gods? You might as well affirm the existence of mules, and deny that of horses and asses. Such nonsense, Meletus, could only have been intended by you to make trial of me. You have put this into the indictment because you had nothing real of which to accuse me. But no one who has a particle of understanding will ever be convinced by you that the same men can believe in divine and superhuman things, and yet not believe that
28 there are gods and demigods and heroes.

I have said enough in answer to the charge of Meletus: any elaborate defence is unnecessary; but I know only too well how many are the enmities which I have incurred, and this is what will be my destruction if I am destroyed; — not Meletus, nor yet Anytus, but the envy and detraction of the world, which has been the death of many good men, and will probably be the death of many more; there is no danger of my being the last of them.

Let no man fear death or fear anything but disgrace.

Some one will say: And are you not ashamed, Socrates, of a course of life which is likely to bring you to an untimely end? To him I may fairly answer: There you are mistaken: a man who is good for anything ought not to calculate the chance of living or dying; he ought only to consider whether in doing anything he is doing right or wrong — acting the part of a good man or of a bad. Whereas, upon your view, the heroes who fell at Troy were not good for much, and the son of Thetis above all, who altogether despised danger in comparison with disgrace; and when he was so eager to slay Hector, his goddess mother said to him, that if he avenged his companion Patroclus, and slew Hector, he would die himself — 'Fate,' she said, in these or the like words, 'waits for you next after Hector;' he, receiving this warning, utterly despised danger and death, and instead of fearing them, feared rather to live in dishonour, and not to avenge his friend. 'Let me die forthwith,' he replies, 'and be avenged of my enemy, rather than abide here by the beaked

Apology.
SOCRATES.

ships, a laughing-stock and a burden of the earth.' Had Achilles any thought of death and danger? For wherever a man's place is, whether the place which he has chosen or that in which he has been placed by a commander, there he ought to remain in the hour of danger; he should not think of death or of anything but of disgrace. And this, O men of Athens, is a true saying.

Socrates, who has often faced death in battle, will not make any condition in order to save his own life; for he does not know whether death is a good or an evil.

Strange, indeed, would be my conduct, O men of Athens, if I who, when I was ordered by the generals whom you chose to command me at Potidaea and Amphipolis and Delium, remained where they placed me, like any other man, facing death — if now, when, as I conceive and imagine, God orders me to fulfil the philosopher's mission of searching into myself and other men, I were to desert my post through fear 29
of death, or any other fear; that would indeed be strange, and I might justly be arraigned in court for denying the existence of the gods, if I disobeyed the oracle because I was afraid of death, fancying that I was wise when I was not wise. For the fear of death is indeed the pretence of wisdom, and not real wisdom, being a pretence of knowing the unknown; and no one knows whether death, which men in their fear apprehend to be the greatest evil, may not be the greatest good. Is not this ignorance of a disgraceful sort, the ignorance which is the conceit that a man knows what he does not know? And in this respect only I believe myself to differ from men in general, and may perhaps claim to be wiser than they are: — that whereas I know but little of the world below, I do not suppose that I know: but I do know that injustice and disobedience to a better, whether God or man, is evil and dishonourable, and I will never fear or avoid a possible good rather than a certain evil. And therefore if you let me go now, and are not convinced by Anytus, who said that since I had been prosecuted I must be put to death; (or if not that I ought never to have been prosecuted at all); and that if I escape now, your sons will all be utterly ruined by listening to my words — if you say to me, Socrates, this time we will not mind Anytus, and you shall be let off, but upon one condition, that you are not to enquire and speculate in this way any more, and that if you are caught doing so again you shall die; — if this was the

condition on which you let me go, I should reply: Men of Athens, I honour and love you; but I shall obey God rather than you, and while I have life and strength I shall never cease from the practice and teaching of philosophy, exhorting any one whom I meet and saying to him after my manner: You, my friend,—a citizen of the great and mighty and wise city of Athens,—are you not ashamed of heaping up the greatest amount of money and honour and reputation, and caring so little about wisdom and truth and the greatest improvement of the soul, which you never regard or heed at all? And if the person with whom I am arguing, says: Yes, but I do care; then I do not leave him or let him go at once; but I proceed to interrogate and examine and cross-examine him, and if I think that he has no virtue in him, but only says that he has, I reproach him with undervaluing the greater, and overvaluing the less. And I shall repeat the same words to every one whom I meet, young and old, citizen and alien, but especially to the citizens, inasmuch as they are my brethren. For know that this is the command of God; and I believe that no greater good has ever happened in the state than my service to the God. For I do nothing but go about persuading you all, old and young alike, not to take thought for your persons or your properties, but first and chiefly to care about the greatest improvement of the soul. I tell you that virtue is not given by money, but that from virtue comes money and every other good of man, public as well as private. This is my teaching, and if this is the doctrine which corrupts the youth, I am a mischievous person. But if any one says that this is not my teaching, he is speaking an untruth. Wherefore, O men of Athens, I say to you, do as Anytus bids or not as Anytus bids, and either acquit me or not; but whichever you do, understand that I shall never alter my ways, not even if I have to die many times.

Apology.

SOCRATES.

He must always be a preacher of philosophy.

'Necessity is laid upon me:' 'I must obey God rather than man.'

Men of Athens, do not interrupt, but hear me; there was an understanding between us that you should hear me to the end: I have something more to say, at which you may be inclined to cry out; but I believe that to hear me will be good for you, and therefore I beg that you will not cry out. I would have you know, that if you kill such an one as I am,

Apology.

SOCRATES.

Neither you nor Meletus can ever injure me.

you will injure yourselves more than you will injure me. Nothing will injure me, not Meletus nor yet Anytus — they cannot, for a bad man is not permitted to injure a better than himself. I do not deny that Anytus may, perhaps, kill him, or drive him into exile, or deprive him of civil rights; and he may imagine, and others may imagine, that he is inflicting a great injury upon him: but there I do not agree. For the evil of doing as he is doing — the evil of unjustly taking away the life of another — is greater far.

I am the gadfly of the Athenian people, given to them by God, and they will never have another, if they kill me.

And now, Athenians, I am not going to argue for my own sake, as you may think, but for yours, that you may not sin against the God by condemning me, who am his gift to you. For if you kill me you will not easily find a successor to me, who, if I may use such a ludicrous figure of speech, am a sort of gadfly, given to the state by God; and the state is a great and noble steed who is tardy in his motions owing to his very size, and requires to be stirred into life. I am that gadfly which God has attached to the state, and all day long 31
and in all places am always fastening upon you, arousing and persuading and reproaching you. You will not easily find another like me, and therefore I would advise you to spare me. I dare say that you may feel out of temper (like a person who is suddenly awakened from sleep), and you think that you might easily strike me dead as Anytus advises, and then you would sleep on for the remainder of your lives, unless God in his care of you sent you another gadfly. When I say that I am given to you by God, the proof of my mission is this:— if I had been like other men, I should not have neglected all my own concerns or patiently seen the neglect of them during all these years, and have been doing yours, coming to you individually like a father or elder brother, exhorting you to regard virtue; such conduct, I say, would be unlike human nature. If I had gained anything, or if my exhortations had been paid, there would have been some sense in my doing so; but now, as you will perceive, not even the impudence of my accusers dares to say that I have ever exacted or sought pay of any one; of that they have no witness. And I have a sufficient witness to the truth of what I say — my poverty.

Some one may wonder why I go about in private giving

advice and busying myself with the concerns of others, but do not venture to come forward in public and advise the state. I will tell you why. You have heard me speak at sundry times and in divers places of an oracle or sign which comes to me, and is the divinity which Meletus ridicules in the indictment. This sign, which is a kind of voice, first began to come to me when I was a child; it always forbids but never commands me to do anything which I am going to do. This is what deters me from being a politician. And rightly, as I think. For I am certain, O men of Athens, that if I had engaged in politics, I should have perished long ago, and done no good either to you or to myself. And do not be offended at my telling you the truth: for the truth is, that no man who goes to war with you or any other multitude, honestly striving against the many lawless and unrighteous
32 deeds which are done in a state, will save his life; he who will fight for the right, if he would live even for a brief space, must have a private station and not a public one.

The internal sign always forbade him to engage in politics; and if he had done so, he would have perished long ago.

I can give you convincing evidence of what I say, not words only, but what you value far more — actions. Let me relate to you a passage of my own life which will prove to you that I should never have yielded to injustice from any fear of death, and that 'as I should have refused to yield' I must have died at once. I will tell you a tale of the courts, not very interesting perhaps, but nevertheless true. The only office of state which I ever held, O men of Athens, was that of senator: the tribe Antiochis, which is my tribe, had the presidency at the trial of the generals who had not taken up the bodies of the slain after the battle of Arginusae; and you proposed to try them in a body, contrary to law, as you all thought afterwards; but at the time I was the only one of the Prytanes who was opposed to the illegality, and I gave my vote against you; and when the orators threatened to impeach and arrest me, and you called and shouted, I made up my mind that I would run the risk, having law and justice with me, rather than take part in your injustice because I feared imprisonment and death. This happened in the days of the democracy. But when the oligarchy of the Thirty was in power, they sent for me and four others into the rotunda, and bade us bring Leon the Salaminian from Salamis, as they

He had shown that he would sooner die than commit injustice at the trial of the generals and under the tyranny of the Thirty.

Apology. SOCRATES.

wanted to put him to death. This was a specimen of the sort of commands which they were always giving with the view of implicating as many as possible in their crimes; and then I showed, not in word only but in deed, that, if I may be allowed to use such an expression, I cared not a straw for death, and that my great and only care was lest I should do an unrighteous or unholy thing. For the strong arm of that oppressive power did not frighten me into doing wrong; and when we came out of the rotunda the other four went to Salamis and fetched Leon, but I went quietly home. For which I might have lost my life, had not the power of the Thirty shortly afterwards come to an end. And many will witness to my words.

Now do you really imagine that I could have survived all these years, if I had led a public life, supposing that like a good man I had always maintained the right and had made justice, as I ought, the first thing? No indeed, men of Athens, neither I nor any other man. But I have been 33 always the same in all my actions, public as well as private, and never have I yielded any base compliance to those who are slanderously termed my disciples, or to any other. Not that I have any regular disciples. But if any one likes to come and hear me while I am pursuing my mission, whether he be young or old, he is not excluded. Nor do I converse only with those who pay; but any one, whether he be rich or poor, may ask and answer me and listen to my words; and whether he turns out to be a bad man or a good one, neither result can be justly imputed to me; for I never taught or professed to teach him anything. And if any one says that he has ever learned or heard anything from me in private which all the world has not heard, let me tell you that he is lying.

He is always talking to the citizens, but he teaches nothing; he takes no pay and has no secrets.

But I shall be asked, Why do people delight in continually conversing with you? I have told you already, Athenians, the whole truth about this matter: they like to hear the cross-examination of the pretenders to wisdom; there is amusement in it. Now this duty of cross-examining other men has been imposed upon me by God; and has been signified to me by oracles, visions, and in every way in which the will of divine power was ever intimated to any one. This is true, O Athenians; or, if not true, would be soon refuted. If I am or

have been corrupting the youth, those of them who are now grown up and have become sensible that I gave them bad advice in the days of their youth should come forward as accusers, and take their revenge; or if they do not like to come themselves, some of their relatives, fathers, brothers, or other kinsmen, should say what evil their families have suffered at my hands. Now is their time. Many of them I see in the court. There is Crito, who is of the same age and of the same deme with myself, and there is Critobulus his son, whom I also see. Then again there is Lysanias of Sphettus, who is the father of Aeschines — he is present; and also there is Antiphon of Cephisus, who is the father of Epigenes; and there are the brothers of several who have associated with me. There is Nicostratus the son of Theosdotides, and the brother of Theodotus (now Theodotus himself is dead, and therefore he, at any rate, will not seek to stop him); and there is Paralus the son of Demodocus, who had a brother Theages;
34 and Adeimantus the son of Ariston, whose brother Plato is present; and Aeantodorus, who is the brother of Apollodorus, whom I also see. I might mention a great many others, some of whom Meletus should have produced as witnesses in the course of his speech; and let him still produce them, if he has forgotten — I will make way for him. And let him say, if he has any testimony of the sort which he can produce. Nay, Athenians, the very opposite is the truth. For all these are ready to witness on behalf of the corrupter, of the injurer of their kindred, as Meletus and Anytus call me; not the corrupted youth only — there might have been a motive for that — but their uncorrupted elder relatives. Why should they too support me with their testimony? Why, indeed, except for the sake of truth and justice, and because they know that I am speaking the truth, and that Meletus is a liar.

The parents and kinsmen of those whom he is supposed to have corrupted do not come forward and testify against him.

Well, Athenians, this and the like of this is all the defence which I have to offer. Yet a word more. Perhaps there may be some one who is offended at me, when he calls to mind how he himself on a similar, or even a less serious occasion, prayed and entreated the judges with many tears, and how he produced his children in court, which was a moving spectacle, together with a host of relations and friends; whereas I, who am probably in danger of my life,

Apology.

SOCRATES.

He is flesh and blood, but he will not appeal to the pity of his judges: or make a scene in the court such as he has often witnessed.

will do none of these things. The contrast may occur to his mind, and he may be set against me, and vote in anger because he is displeased at me on this account. Now if there be such a person among you,— mind, I do not say that there is,— to him I may fairly reply: My friend, I am a man, and like other men, a creature of flesh and blood, and not 'of wood or stone,' as Homer says; and I have a family, yes, and sons, O Athenians, three in number, one almost a man, and two others who are still young; and yet I will not bring any of them hither in order to petition you for an acquittal. And why not? Not from any self-assertion or want of respect for you. Whether I am or am not afraid of death is another question, of which I will not now speak. But, having regard to public opinion, I feel that such conduct would be discreditable to myself, and to you, and to the whole state. One who has reached my years, and who has a name for wisdom, ought not to demean himself. Whether this opinion of me be deserved or not, at any rate the world has decided that Socrates is in some way superior to other men. And if those 35
among you who are said to be superior in wisdom and courage, and any other virtue, demean themselves in this way, how shameful is their conduct! I have seen men of reputation, when they have been condemned, behaving in the strangest manner: they seemed to fancy that they were going to suffer something dreadful if they died, and that they could be immortal if you only allowed them to live; and I think that such are a dishonour to the state, and that any stranger coming in would have said of them that the most eminent men of Athens, to whom the Athenians themselves give honour and command, are no better than women. And I say that these things ought not to be done by those of us who have a reputation; and if they are done, you ought not to permit them; you ought rather to show that you are far more disposed to condemn the man who gets up a doleful scene and makes the city ridiculous, than him who holds his peace.

The judge should not be influenced by his feelings, but convinced by reason.

But, setting aside the question of public opinion, there seems to be something wrong in asking a favour of a judge, and thus procuring an acquittal, instead of informing and convincing him. For his duty is, not to make a present of justice, but to give judgment; and he has sworn that he will judge

according to the laws, and not according to his own good pleasure; and we ought not to encourage you, nor should you allow yourselves to be encouraged, in this habit of perjury — there can be no piety in that. Do not then require me to do what I consider dishonourable and impious and wrong, especially now, when I am being tried for impiety on the indictment of Meletus. For if, O men of Athens, by force of persuasion and entreaty I could overpower your oaths, then I should be teaching you to believe that there are no gods, and in defending should simply convict myself of the charge of not believing in them. But that is not so — far otherwise. For I do believe that there are gods, and in a sense higher than that in which any of my accusers believe in them. And to you and to God I commit my cause, to be determined by you as is best for you and me.

Apology. SOCRATES.

There are many reasons why I am not grieved, O men of
36 Athens, at the vote of condemnation. I expected it, and am only surprised that the votes are so nearly equal; for I had thought that the majority against me would have been far larger; but now, had thirty votes gone over to the other side, I should have been acquitted. And I may say, I think, that I have escaped Meletus. I may say more; for without the assistance of Anytus and Lycon, any one may see that he would not have had a fifth part of the votes, as the law requires, in which case he would have incurred a fine of a thousand drachmae.

And so he proposes death as the penalty. And what shall I propose on my part, O men of Athens? Clearly that which is my due. And what is my due? What return shall be made to the man who has never had the wit to be idle during his whole life; but has been careless of what the many care for — wealth, and family interests, and military offices, and speaking in the assembly, and magistracies, and plots, and parties. Reflecting that I was really too honest a man to be a politician and live, I did not go where I could do no good to you or to myself; but where I could do the greatest good privately to every one of you, thither I went, and sought to persuade every man among you that he must look to him-

Socrates all his life long has been seeking to do the greatest good to the Athenians.

Apology.

SOCRATES.

Should he not be rewarded with maintenance in the Prytaneum?

self, and seek virtue and wisdom before he looks to his private interests, and look to the state before he looks to the interests of the state; and that this should be the order which he observes in all his actions. What shall be done to such an one? Doubtless some good thing, O men of Athens, if he has his reward; and the good should be of a kind suitable to him. What would be a reward suitable to a poor man who is your benefactor, and who desires leisure that he may instruct you? There can be no reward so fitting as maintenance in the Prytaneum, O men of Athens, a reward which he deserves far more than the citizen who has won the prize at Olympia in the horse or chariot race, whether the chariots were drawn by two horses or by many. For I am in want, and he has enough; and he only gives you the appearance of happiness, and I give you the reality. And if I am to estimate the penalty fairly, I should say that maintenance in the Pry- 37
taneum is the just return.

The consciousness of innocence gives him confidence.

Perhaps you think that I am braving you in what I am saying now, as in what I said before about the tears and prayers. But this is not so. I speak rather because I am convinced that I never intentionally wronged any one, although I cannot convince you — the time has been too short; if there were a law at Athens, as there is in other cities, that a capital cause should not be decided in one day, then I believe that I should have convinced you. But I cannot in a moment refute great slanders; and, as I am convinced that I never wronged another, I will assuredly not wrong myself. I will not say of myself that I deserve any evil, or propose any penalty. Why should I? Because I am afraid of the penalty of death which Meletus proposes? When I do not know whether death is a good or an evil, why should I propose a penalty which would certainly be an evil?

He has not deserved imprisonment.

Shall I say imprisonment? And why should I live in prison, and be the slave of the magistrates of the year — of the Eleven? Or shall the penalty be a fine, and imprisonment until the fine is paid? There is the same objection. I should have to lie in prison, for money I have none, and cannot pay.

And if he is exiled, how wretched will be his fate!

And if I say exile (and this may possibly be the penalty which you will affix), I must indeed be blinded by the love of life, if I am so irrational as to expect that when you, who are my own

Apology.

SOCRATES.

citizens, cannot endure my discourses and words, and have found them so grievous and odious that you will have no more of them, others are likely to endure me. No indeed, men of Athens, that is not very likely. And what a life should I lead, at my age, wandering from city to city, ever changing my place of exile, and always being driven out! For I am quite sure that wherever I go, there, as here, the young men will flock to me; and if I drive them away, their elders will drive me out at their request; and if I let them come, their fathers and friends will drive me out for their sakes.

He cannot be silent, and he will be driven from city to city.

Some one will say: Yes, Socrates, but cannot you hold your tongue, and then you may go into a foreign city, and no one will interfere with you? Now I have great difficulty in making you understand my answer to this. For if I tell you that to do as you say would be a disobedience to the God, and therefore that I cannot hold my tongue, you will not
38 believe that I am serious; and if I say again that daily to discourse about virtue, and of those other things about which you hear me examining myself and others, is the greatest good of man, and that the unexamined life is not worth living, you are still less likely to believe me. Yet I say what is true, although a thing of which it is hard for me to persuade you. Also, I have never been accustomed to think that I deserve to suffer any harm. Had I money I might have estimated the offence at what I was able to pay, and not have been much the worse. But I have none, and therefore I must ask you to proportion the fine to my means. Well, perhaps I could afford a mina, and therefore I propose that penalty: Plato, Crito, Critobulus, and Apollodorus, my friends here, bid me say thirty minae, and they will be the sureties. Let thirty minae be the penalty; for which sum they will be ample security to you.

Money he has none, or he would propose a fine. His friends bid him offer 30 minae on their security.

Not much time will be gained, O Athenians, in return for the evil name which you will get from the detractors of the city, who will say that you killed Socrates, a wise man; for they will call me wise, even although I am not wise, when

They will be accused of killing a wise man.

Apology.

SOCRATES.

Why could they not wait a few years?

they want to reproach you. If you had waited a little while, your desire would have been fulfilled in the course of nature. For I am far advanced in years, as you may perceive, and not far from death. I am speaking now not to all of you, but only to those who have condemned me to death. And I have another thing to say to them: You think that I was convicted because I had no words of the sort which would have procured my acquittal — I mean, if I had thought fit to leave nothing undone or unsaid. Not so; the deficiency which led to my conviction was not of words — certainly not. But I had not the boldness or impudence or inclination to address you as you would have liked me to do, weeping and wailing and lamenting, and saying and doing many things which you have been accustomed to hear from others, and which, as I maintain, are unworthy of me. I thought at the time that I ought not to do anything common or mean when in danger: nor do I now repent of the style of my defence; I would rather die having spoken after my manner, than speak in your manner and live. For neither in war nor yet at law ought I or any man to use every way of escaping death. 39
Often in battle there can be no doubt that if a man will throw away his arms, and fall on his knees before his pursuers, he may escape death; and in other dangers there are other ways of escaping death, if a man is willing to say and do anything. The difficulty, my friends, is not to avoid death, but to avoid unrighteousness; for that runs faster than death. I am old and move slowly, and the slower runner has overtaken me, and my accusers are keen and quick, and the faster runner, who is unrighteousness, has overtaken them. And now I depart hence condemned by you to suffer the penalty of death,— they too go their ways condemned by the truth to suffer the penalty of villainy and wrong; and I must abide by my award — let them abide by theirs. I suppose that these things may be regarded as fated,— and I think that they are well.

And now, O men who have condemned me, I would fain prophesy to you; for I am about to die, and in the hour of death men are gifted with prophetic power. And I prophesy to you who are my murderers, that immediately after my departure punishment far heavier than you have inflicted on

SOCRATES.

me will surely await you. Me you have killed because you wanted to escape the accuser, and not to give an account of your lives. But that will not be as you suppose: far otherwise. For I say that there will be more accusers of you than there are now; accusers whom hitherto I have restrained: and as they are younger they will be more inconsiderate with you, and you will be more offended at them. If you think that by killing men you can prevent some one from censuring your evil lives, you are mistaken; that is not a way of escape which is either possible or honourable; the easiest and the noblest way is not to be disabling others, but to be improving yourselves. This is the prophecy which I utter before my departure to the judges who have condemned me.

They are about to slay Socrates because he has been their accuser: other accusers will rise up and denounce them more vehemently.

Friends, who would have acquitted me, I would like also to talk with you about the thing which has come to pass, while the magistrates are busy, and before I go to the place at which I must die. Stay then a little, for we may as well talk
40 with one another while there is time. You are my friends, and I should like to show you the meaning of this event which has happened to me. O my judges — for you I may truly call judges — I should like to tell you of a wonderful circumstance. Hitherto the divine faculty of which the internal oracle is the source has constantly been in the habit of opposing me even about trifles, if I was going to make a slip or error in any matter; and now as you see there has come upon me that which may be thought, and is generally believed to be, the last and worst evil. But the oracle made no sign of opposition, either when I was leaving my house in the morning, or when I was on my way to the court, or while I was speaking, at anything which I was going to say; and yet I have often been stopped in the middle of a speech, but now in nothing I either said or did touching the matter in hand has the oracle opposed me. What do I take to be the explanation of this silence? I will tell you. It is an intimation that what has happened to me is a good, and that those of us who think that death is an evil are in error. For the customary sign would surely have opposed me had I been going to evil and not to good.

He believes that what is happening to him will be good, because the internal oracle gives no sign of opposition.

Let us reflect in another way, and we shall see that there is great reason to hope that death is a good; for one of two things — either death is a state of nothingness and utter

Death either a good or nothing:

Apology.
SOCRATES.
= a profound sleep.

unconsciousness, or, as men say, there is a change and migration of the soul from this world to another. Now if you suppose that there is no consciousness, but a sleep like the sleep of him who is undisturbed even by dreams, death will be an unspeakable gain. For if a person were to select the night in which his sleep was undisturbed even by dreams, and were to compare with this the other days and nights of his life, and then were to tell us how many days and nights he had passed in the course of his life better and more pleasantly than this one, I think that any man, I will not say a private man, but even the great king will not find many such days or nights, when compared with the others. Now if death be of such a nature, I say that to die is gain; for eternity is then only a single night. But if death is the journey to another place, and there, as men say, all the dead abide, what good, O my friends and judges, can be greater than this? If indeed when the pilgrim arrives in the world below, he is delivered from the pro- 41
fessors of justice in this world, and finds the true judges who are said to give judgment there, Minos and Rhadamanthus and Aeacus and Triptolemus, and other sons of God who were righteous in their own life, that pilgrimage will be worth making. What would not a man give if he might converse with Orpheus and Musaeus and Hesiod and Homer? Nay, if this be true, let me die again and again. I myself, too, shall have a wonderful interest in there meeting and conversing with Palamedes, and Ajax the son of Telamon, and any other ancient hero who has suffered death through an unjust judgment; and there will be no small pleasure, as I think, in comparing my own sufferings with theirs. Above all, I shall then be able to continue my search into true and false knowledge; as in this world, so also in the next; and I shall find out who is wise, and who pretends to be wise, and is not. What would not a man give, O judges, to be able to examine the leader of the great Trojan expedition; or Odysseus or Sisyphus, or numberless others, men and women too! What infinite delight would there be in conversing with them and asking them questions! In another world they do not put a man to death for asking questions: assuredly not. For besides

How blessed to have a just judgment passed on us; to converse with Homer and Hesiod; to see the heroes of Troy, and to continue the search after knowledge in another world!

being happier than we are, they will be immortal, if what is said is true.

Wherefore, O judges, be of good cheer about death, and know of a certainty, that no evil can happen to a good man, either in life or after death. He and his are not neglected by the gods; nor has my own approaching end happened by mere chance. But I see clearly that the time had arrived when it was better for me to die and be released from trouble; wherefore the oracle gave no sign. For which reason, also, I am not angry with my condemners, or with my accusers; they have done me no harm, although they did not mean to do me any good; and for this I may gently blame them.

Do to my sons as I have done to you.

Still I have a favour to ask of them. When my sons are grown up, I would ask you, O my friends, to punish them; and I would have you trouble them, as I have troubled you, if they seem to care about riches, or anything, more than about virtue; or if they pretend to be something when they are really nothing,— then reprove them, as I have reproved you, for not caring about that for which they ought to care, and thinking that they are something when they are really
42 nothing. And if you do this, both I and my sons will have received justice at your hands.

The hour of departure has arrived, and we go our ways — I to die, and you to live. Which is better God only knows.

CRITO.

INTRODUCTION.

THE Crito seems intended to exhibit the character of Socrates in one light only, not as the philosopher, fulfilling a divine mission and trusting in the will of heaven, but simply as the good citizen, who having been unjustly condemned is willing to give up his life in obedience to the laws of the state. . . . .

ANALYSIS.

Steph. The days of Socrates are drawing to a close; the fatal ship
43 has been seen off Sunium, as he is informed by his aged friend and contemporary Crito, who visits him before the dawn has broken; he himself has been warned in a dream that on the
44 third day he must depart. Time is precious, and Crito has come early in order to gain his consent to a plan of escape. This can be easily accomplished by his friends, who will incur no
45 danger in making the attempt to save him, but will be disgraced for ever if they allow him to perish. He should think of his duty to his children, and not play into the hands of his enemies. Money is already provided by Crito as well as by Simmias and
46 others, and he will have no difficulty in finding friends in Thessaly and other places.

Socrates is afraid that Crito is but pressing upon him the opinions of the many: whereas, all his life long he has followed the dictates of reason only and the opinion of the one wise or skilled man. There was a time when Crito himself had allowed the propriety of this. And although some one will say 'the many can kill us,' that makes no difference; but a good life, in other words, a just and honourable life, is alone to be valued. All considerations of loss of reputation or injury to his children should be dismissed: the only question is whether he would be

right in attempting to escape. Crito, who is a disinterested 47
person not having the fear of death before his eyes, shall answer this for him. Before he was condemned they had often held discussions, in which they agreed that no man should either do evil, 48
or return evil for evil, or betray the right. Are these principles to be altered because the circumstances of Socrates are altered? Crito admits that they remain the same. Then is his escape con- 49
sistent with the maintenance of them? To this Crito is unable or unwilling to reply.

Socrates proceeds: — Suppose the Laws of Athens to come 50
and remonstrate with him: they will ask 'Why does he seek to overturn them?' and if he replies, 'they have injured him,' will not the Laws answer, 'Yes, but was that the agreement? Has he any objection to make to them which would justify him in 51
overturning them? Was he not brought into the world and educated by their help, and are they not his parents? He might 52
have left Athens and gone where he pleased, but he has lived there for seventy years more constantly than any other citizen.' Thus he has clearly shown that he acknowledged the agreement, which he cannot now break without dishonour to himself and danger to his friends. Even in the course of the trial he might have proposed exile as the penalty, but then he declared that he preferred death to exile. And whither will he direct his footsteps? In any well-ordered state the Laws will consider him as 53
an enemy. Possibly in a land of misrule like Thessaly he may be welcomed at first, and the unseemly narrative of his escape will be regarded by the inhabitants as an amusing tale. But if he offends them he will have to learn another sort of lesson. Will he continue to give lectures in virtue? That would hardly be decent. And how will his children be the gainers if he takes them into Thessaly, and deprives them of Athenian citizenship? 54
Or if he leaves them behind, does he expect that they will be better taken care of by his friends because he is in Thessaly? Will not true friends care for them equally whether he is alive or dead?

Finally, they exhort him to think of justice first, and of life and children afterwards. He may now depart in peace and innocence, a sufferer and not a doer of evil. But if he breaks agreements, and returns evil for evil, they will be angry with him

while he lives; and their brethren the Laws of the world below will receive him as an enemy. Such is the mystic voice which is always murmuring in his ears. *Crito.* ANALYSIS.

That Socrates was not a good citizen was a charge made against him during his lifetime, which has been often repeated in later ages. The crimes of Alcibiades, Critias, and Charmides, who had been his pupils, were still recent in the memory of the now restored democracy. The fact that he had been neutral in the death-struggle of Athens was not likely to conciliate popular good-will. Plato, writing probably in the next generation, undertakes the defence of his friend and master in this particular, not to the Athenians of his day, but to posterity and the world at large. INTRODUCTION.

Whether such an incident ever really occurred as the visit of Crito and the proposal of escape is uncertain: Plato could easily have invented far more than that (Phaedr. 275 B); and in the selection of Crito, the aged friend, as the fittest person to make the proposal to Socrates, we seem to recognize the hand of the artist. Whether any one who has been subjected by the laws of his country to an unjust judgment is right in attempting to escape, is a thesis about which casuists might disagree. Shelley (Prose Works, p. 78) is of opinion that Socrates 'did well to die,' but not for the 'sophistical' reasons which Plato has put into his mouth. And there would be no difficulty in arguing that Socrates should have lived and preferred to a glorious death the good which he might still be able to perform. 'A rhetorician would have had much to say upon that point' (50 B). It may be observed however that Plato never intended to answer the question of casuistry, but only to exhibit the ideal of patient virtue which refuses to do the least evil in order to avoid the greatest, and to show his master maintaining in death the opinions which he had professed in his life. Not 'the world,' but the 'one wise man,' is still the paradox of Socrates in his last hours. He must be guided by reason, although her conclusions may be fatal to him. The remarkable sentiment that the many can do neither good nor evil is true, if taken in the sense, which he means, of moral evil; in his own words, 'they cannot make a man wise or foolish.'

Crito.

INTRODUCTION.

This little dialogue is a perfect piece of dialectic, in which granting the 'common principle' (49 D), there is no escaping from the conclusion. It is anticipated at the beginning by the dream of Socrates and the parody of Homer. The personification of the Laws, and of their brethren the Laws in the world below, is one of the noblest and boldest figures of speech which occur in Plato.

CRITO.

PERSONS OF THE DIALOGUE.

SOCRATES. CRITO.

SCENE:— The Prison of Socrates.

Crito.

SOCRATES, CRITO.

Crito appears at break of dawn in the prison of Socrates, whom he finds asleep.

Steph. 43 *Socrates.* WHY have you come at this hour, Crito? it must be quite early?

Crito. Yes, certainly.

Soc. What is the exact time?

Cr. The dawn is breaking.

Soc. I wonder that the keeper of the prison would let you in.

Cr. He knows me, because I often come, Socrates; moreover, I have done him a kindness.

Soc. And are you only just arrived?

Cr. No, I came some time ago.

Soc. Then why did you sit and say nothing, instead of at once awakening me?

Cr. I should not have liked myself, Socrates, to be in such great trouble and unrest as you are — indeed I should not: I have been watching with amazement your peaceful slumbers; and for that reason I did not awake you, because I wished to minimize the pain. I have always thought you to be of a happy disposition; but never did I see anything like the easy, tranquil manner in which you bear this calamity.

Soc. Why, Crito, when a man has reached my age he ought not to be repining at the approach of death.

Cr. And yet other old men find themselves in similar misfortunes, and age does not prevent them from repining.

Crito.

SOCRATES, CRITO.

The ship from Delos is expected.

Soc. That is true. But you have not told me why you come at this early hour.

Cr. I come to bring you a message which is sad and painful; not, as I believe, to yourself, but to all of us who are your friends, and saddest of all to me.

Soc. What? Has the ship come from Delos, on the arrival of which I am to die?

Cr. No, the ship has not actually arrived, but she will probably be here to-day, as persons who have come from Sunium tell me that they left her there; and therefore to-morrow, Socrates, will be the last day of your life.

Soc. Very well, Crito; if such is the will of God, I am willing; but my belief is that there will be a delay of a day.

Cr. Why do you think so? 44

Soc. I will tell you. I am to die on the day after the arrival of the ship.

Cr. Yes; that is what the authorities say.

A vision of a fair woman who prophesies in the language of Homer that Socrates will die on the third day.

Soc. But I do not think that the ship will be here until to-morrow; this I infer from a vision which I had last night, or rather only just now, when you fortunately allowed me to sleep.

Cr. And what was the nature of the vision?

Soc. There appeared to me the likeness of a woman, fair and comely, clothed in bright raiment, who called to me and said: O Socrates,

> 'The third day hence to fertile Phthia shalt thou go[1].'

Cr. What a singular dream, Socrates!

Soc. There can be no doubt about the meaning, Crito, I think.

Cr. Yes; the meaning is only too clear. But, oh! my beloved Socrates, let me entreat you once more to take my advice and escape. For if you die I shall not only lose a friend who can never be replaced, but there is another evil: people who do not know you and me will believe that I might have saved you if I had been willing to give money, but that I did not care. Now, can there be a worse disgrace than this — that I should be thought to value money more than the

[1] Homer, Il. ix. 363.

life of a friend? For the many will not be persuaded that I wanted you to escape, and that you refused.

Crito.

SOCRATES, CRITO.

Soc. But why, my dear Crito, should we care about the opinion of the many? Good men, and they are the only persons who are worth considering, will think of these things truly as they occurred.

Cr. But you see, Socrates, that the opinion of the many must be regarded, for what is now happening shows that they can do the greatest evil to any one who has lost their good opinion.

Crito by a variety of arguments tries to induce Socrates to make his escape. The means will be easily provided and without danger to any one.

Soc. I only wish it were so, Crito; and that the many could do the greatest evil; for then they would also be able to do the greatest good — and what a fine thing this would be! But in reality they can do neither; for they cannot make a man either wise or foolish; and whatever they do is the result of chance.

Cr. Well, I will not dispute with you; but please to tell me, Socrates, whether you are not acting out of regard to me and your other friends: are you not afraid that if you escape from prison we may get into trouble with the informers for having stolen you away, and lose either the whole or a great part of
45 our property; or that even a worse evil may happen to us? Now, if you fear on our account, be at ease; for in order to save you, we ought surely to run this, or even a greater risk; be persuaded, then, and do as I say.

Soc. Yes, Crito, that is one fear which you mention, but by no means the only one.

Cr. Fear not — there are persons who are willing to get you out of prison at no great cost; and as for the informers, they are far from being exorbitant in their demands — a little money will satisfy them. My means, which are certainly ample, are at your service, and if you have a scruple about spending all mine, here are strangers who will give you the use of theirs; and one of them, Simmias the Theban, has brought a large sum of money for this very purpose; and Cebes and many others are prepared to spend their money in helping you to escape. I say, therefore, do not hesitate on our account, and do not say, as you did in the court [1], that you

[1] Cp. Apol. 37 C, D.

Crito.

SOCRATES, CRITO.

will have a difficulty in knowing what to do with yourself anywhere else. For men will love you in other places to which you may go, and not in Athens only; there are friends of mine in Thessaly, if you like to go to them, who will value and protect you, and no Thessalian will give you any trouble. Nor can I think that you are at all justified, Socrates, in betraying your own life when you might be saved; in acting thus you are playing into the hands of your enemies, who are hurrying on your destruction. And further I should say that you are deserting your own children; for you might bring them up and educate them; instead of which you go away and leave them, and they will have to take their chance; and if they do not meet with the usual fate of orphans, there will be small thanks to you. No man should bring children into the world who is unwilling to persevere to the end in their nurture and education. But you appear to be choosing the easier part, not the better and manlier, which would have been more becoming in one who professes to care for virtue in all his actions, like yourself. And indeed, I am ashamed not only of you, but of us who are your friends, when I reflect that the whole business will be attributed entirely to our want of courage. The trial need never have come on, or might have been managed differently; and this last act, or crowning folly, will seem to have occurred through our negligence and cowardice, who might have saved you, if we had been good for 46 anything; and you might have saved yourself, for there was no difficulty at all. See now, Socrates, how sad and discreditable are the consequences, both to us and you. Make up your mind then, or rather have your mind already made up, for the time of deliberation is over, and there is only one thing to be done, which must be done this very night, and if we delay at all will be no longer practicable or possible; I beseech you therefore, Socrates, be persuaded by me, and do as I say.

He is not justified in throwing away his life; he will be deserting his children, and will bring the reproach of cowardice on his friends.

Soc. Dear Crito, your zeal is invaluable, if a right one; but if wrong, the greater the zeal the greater the danger; and therefore we ought to consider whether I shall or shall not do as you say. For I am and always have been one of those natures who must be guided by reason, whatever the reason may be which upon reflection appears to me to be the best;

Socrates is one of those who must be guided by reason.

and now that this chance has befallen me, I cannot repudiate my own words: the principles which I have hitherto honoured and revered I still honour, and unless we can at once find other and better principles, I am certain not to agree with you; no, not even if the power of the multitude could inflict many more imprisonments, confiscations, deaths, frightening us like children with hobgoblin terrors[1]. What will be the fairest way of considering the question? Shall I return to your old argument about the opinons of men?— we were saying that some of them are to be regarded, and others not. Now were we right in maintaining this before I was condemned? And has the argument which was once good now proved to be talk for the sake of talking — mere childish nonsense? That is what I want to consider with your help, Crito:— whether, under my present circumstances, the argument appears to be in any way different or not; and is to be allowed by me or disallowed. That argument, which, as I believe, is maintained by many persons of authority, was to the effect, as I was saying, that the opinions of some men are to be regarded, and of other men not to be regarded. Now
47 you, Crito, are not going to die to-morrow — at least, there is no human probability of this — and therefore you are disinterested and not liable to be deceived by the circumstances in which you are placed. Tell me then, whether I am right in saying that some opinions, and the opinions of some men only, are to be valued, and that other opinions, and the opinions of other men, are not to be valued. I ask you whether I was right in maintaining this?

Crito. SOCRATES, CRITO.

Ought he to follow the opinion of the many or of the few, of the wise or of the unwise?

Cr. Certainly.

Soc. The good are to be regarded, and not the bad?

Cr. Yes.

Soc. And the opinions of the wise are good, and the opinions of the unwise are evil?

Cr. Certainly.

Soc. And what was said about another matter? Is the pupil who devotes himself to the practice of gymnastics supposed to attend to the praise and blame and opinion of every man, or of one man only — his physician or trainer, whoever he may be?

[1] Cp. Apol. 30 C.

Crito. *Cr.* Of one man only.

SOCRATES, CRITO. *Soc.* And he ought to fear the censure and welcome the praise of that one only, and not of the many?

Cr. Clearly so.

Soc. And he ought to act and train, and eat and drink in the way which seems good to his single master who has understanding, rather than according to the opinion of all other men put together?

Cr. True.

Soc. And if he disobeys and disregards the opinion and approval of the one, and regards the opinion of the many who have no understanding, will he not suffer evil?

Cr. Certainly he will.

Soc. And what will the evil be, whither tending and what affecting, in the disobedient person?

Cr. Clearly, affecting the body; that is what is destroyed by the evil.

The opinion of the one wise man is to be followed.

Soc. Very good; and is not this true, Crito, of other things which we need not separately enumerate? In questions of just and unjust, fair and foul, good and evil, which are the subjects of our present consultation, ought we to follow the opinion of the many and to fear them; or the opinion of the one man who has understanding? ought we not to fear and reverence him more than all the rest of the world: and if we desert him shall we not destroy and injure that principle in us which may be assumed to be improved by justice and deteriorated by injustice;—there is such a principle?

Cr. Certainly there is, Socrates.

Soc. Take a parallel instance:—if, acting under the advice of those who have no understanding, we destroy that which is improved by health and is deteriorated by disease, would life be worth having? And that which has been destroyed is—the body?

Cr. Yes.

Soc. Could we live, having an evil and corrupted body?

Cr. Certainly not.

Soc. And will life be worth having, if that higher part of man be destroyed, which is improved by justice and depraved by injustice? Do we suppose that principle, whatever it

48 may be in man, which has to do with justice and injustice, to be inferior to the body?

Crito.

SOCRATES, CRITO.

Cr. Certainly not.

Soc. More honourable than the body?

Cr. Far more.

No matter what the many say of us.

Soc. Then, my friend, we must not regard what the many say of us: but what he, the one man who has understanding of just and unjust, will say, and what the truth will say. And therefore you begin in error when you advise that we should regard the opinion of the many about just and unjust, good and evil, honourable and dishonourable.—'Well,' some one will say, 'but the many can kill us.'

Cr. Yes, Socrates; that will clearly be the answer.

Not life, but a good life, to be chiefly valued.

Soc. And it is true: but still I find with surprise that the old argument is unshaken as ever. And I should like to know whether I may say the same of another proposition — that not life, but a good life, is to be chiefly valued?

Cr. Yes, that also remains unshaken.

Soc. And a good life is equivalent to a just and honourable one — that holds also?

Cr. Yes, it does.

Soc. From these premisses I proceed to argue the question whether I ought or ought not to try and escape without the consent of the Athenians: and if I am clearly right in escaping, then I will make the attempt; but if not, I will abstain. The other considerations which you mention, of money and loss of character and the duty of educating one's children, are, I fear, only the doctrines of the multitude, who would be as ready to restore people to life, if they were able, as they are to put them to death — and with as little reason. But now, since the argument has thus far prevailed, the only question which remains to be considered is, whether we shall do rightly either in escaping or in suffering others to aid in our escape and paying them in money and thanks, or whether in reality we shall not do rightly; and if the latter, then death or any other calamity which may ensue on my remaining here must not be allowed to enter into the calculation.

Admitting these principles, ought I to try and escape or not?

Cr. I think that you are right, Socrates; how then shall we proceed?

Crito. SOCRATES, CRITO.

Soc. Let us consider the matter together, and do you either refute me if you can, and I will be convinced; or else cease, my dear friend, from repeating to me that I ought to escape against the wishes of the Athenians: for I highly value your attempts to persuade me to do so, but I may not be persuaded against my own better judgment. And now please to consider my first position, and try how you can 49
best answer me.

Cr. I will.

May we sometimes do evil that good may come?

Soc. Are we to say that we are never intentionally to do wrong, or that in one way we ought and in another way we ought not to do wrong, or is doing wrong always evil and dishonourable, as I was just now saying, and as has been already acknowledged by us? Are all our former admissions which were made within a few days to be thrown away? And have we, at our age, been earnestly discoursing with one another all our life long only to discover that we are no better than children? Or, in spite of the opinion of the many, and in spite of consequences whether better or worse, shall we insist on the truth of what was then said, that injustice is always an evil and dishonour to him who acts unjustly? Shall we say so or not?

Cr. Yes.

Soc. Then we must do no wrong?

Cr. Certainly not.

Soc. Nor when injured injure in return, as the many imagine; for we must injure no one at all[1]?

Cr. Clearly not.

Soc. Again, Crito, may we do evil?

Cr. Surely not, Socrates.

May we render evil for evil?

Soc. And what of doing evil in return for evil, which is the morality of the many — is that just or not?

Cr. Not just.

Soc. For doing evil to another is the same as injuring him?

Cr. Very true.

Soc. Then we ought not to retaliate or render evil for evil to any one, whatever evil we may have suffered from him.

[1] e. g. cp. Rep. i. 335 E.

Crito.

SOCRATES, CRITO.

But I would have you consider, Crito, whether you really mean what you are saying. For this opinion has never been held, and never will be held, by any considerable number of persons; and those who are agreed and those who are not agreed upon this point have no common ground, and can only despise one another when they see how widely they differ. Tell me, then, whether you agree with and assent to my first principle, that neither injury nor retaliation nor warding off evil by evil is ever right. And shall that be the premiss of our argument? Or do you decline and dissent from this? For so I have ever thought, and continue to think; but, if you are of another opinion, let me hear what you have to say. If, however, you remain of the same mind as formerly, I will proceed to the next step.

Or is evil always to be deemed evil? Are you of the same mind as formerly about all this?

Cr. You may proceed, for I have not changed my mind.

Crito assents.

Soc. Then I will go on to the next point, which may be put in the form of a question:— Ought a man to do what he admits to be right, or ought he to betray the right?

Then ought Socrates to desert or not?

Cr. He ought to do what he thinks right.

Soc. But if this is true, what is the application? In
50 leaving the prison against the will of the Athenians, do I wrong any? or rather do I not wrong those whom I ought least to wrong? Do I not desert the principles which were acknowledged by us to be just — what do you say?

Cr. I cannot tell, Socrates; for I do not know.

Soc. Then consider the matter in this way:— Imagine that I am about to play truant (you may call the proceeding by any name which you like), and the laws and the government come and interrogate me: 'Tell us, Socrates,' they say; 'what are you about? are you not going by an act of yours to overturn us — the laws, and the whole state, as far as in you lies? Do you imagine that a state can subsist and not be overthrown, in which the decisions of law have no power, but are set aside and trampled upon by individuals?' What will be our answer, Crito, to these and the like words? Any one, and especially a rhetorician, will have a good deal to say on behalf of the law which requires a sentence to be carried out. He will argue that this law should not be set aside; and shall we reply, 'Yes; but the state has injured us and given an unjust sentence.'. Suppose I say that?

The Laws come and argue with him.—Can a State exist in which law is set aside?

Crito. *Cr.* Very good, Socrates.

SOCRATES, CRITO. *Soc.* 'And was that our agreement with you?' the law would answer; 'or were you to abide by the sentence of the state?' And if I were to express my astonishment at their words, the law would probably add: 'Answer, Socrates, instead of opening your eyes — you are in the habit of asking and answering questions. Tell us,— What complaint have you to make against us which justifies you in attempting to destroy us and the state? In the first place did we not bring you into existence? Your father married your mother by our aid and begat you. Say whether you have any objection to urge against those of us who regulate marriage?' None, I should reply. 'Or against those of us who after birth regulate the nurture and education of children, in which you also were trained? Were not the laws, which have the charge of education, right in commanding your father to train you in music and gymnastic?' Right, I should reply. 'Well then, since you were brought into the world and nurtured and educated by us, can you deny in the first place that you are our child and slave, as your fathers were before you? And if this is true you are not on equal terms with us; nor can you think that you have a right to do to us what we are doing to you. Would you have any right to strike or revile or do any other evil to your father or your master, if you had one, because you have been struck or reviled by him, or received some other evil at his hands?— you would not say this? And because we think right to 51 destroy you, do you think that you have any right to destroy us in return, and your country as far as in you lies? Will you, O professor of true virtue, pretend that you are justified in this? Has a philosopher like you failed to discover that our country is more to be valued and higher and holier far than mother or father or any ancestor, and more to be regarded in the eyes of the gods and of men of understanding? also to be soothed, and gently and reverently entreated when angry, even more than a father, and either to be persuaded, or if not persuaded, to be obeyed? And when we are punished by her, whether with imprisonment or stripes, the punishment is to be endured in silence; and if she lead us to wounds or death in battle, thither we follow as is right;

Has he any fault to find with them?

No man has any right to strike a blow at his country any more than at his father or mother.

neither may any one yield or retreat or leave his rank, but whether in battle or in a court of law, or in any other place, he must do what his city and his country order him; or he must change their view of what is just: and if he may do no violence to his father or mother, much less may he do violence to his country.' What answer shall we make to this, Crito? Do the laws speak truly, or do they not?

Cr. I think that they do.

Soc. Then the laws will say: 'Consider, Socrates, if we are speaking truly that in your present attempt you are going to do us an injury. For, having brought you into the world, and nurtured and educated you, and given you and every other citizen a share in every good which we had to give, we further proclaim to any Athenian by the liberty which we allow him, that if he does not like us when he has become of age and has seen the ways of the city, and made our acquaintance, he may go where he pleases and take his goods with him. None of us laws will forbid him or interfere with him. Any one who does not like us and the city, and who wants to emigrate to a colony or to any other city, may go where he likes, retaining his property. But he who has experience of the manner in which we order justice and administer the state, and still remains, has entered into an implied contract that he will do as we command him. And he who disobeys us is, as we maintain, thrice wrong; first, because in disobeying us he is disobeying his parents; secondly, because we are the authors of his education; thirdly, because he has made an agreement with us that he
52 will duly obey our commands; and he neither obeys them nor convinces us that our commands are unjust; and we do not rudely impose them, but give him the alternative of obeying or convincing us;—that is what we offer, and he does neither.

The Laws argue that he has made an implied agreement with them which he is not at liberty to break at his pleasure.

'These are the sort of accusations to which, as we were saying, you, Socrates, will be exposed if you accomplish your intentions; you, above all other Athenians.' Suppose now I ask, why I rather than anybody else? they will justly retort upon me that I above all other men have acknowledged the agreement. 'There is clear proof,' they will say, 'Socrates, that we and the city were not dis-

Crito. pleasing to you. Of all Athenians you have been the most
SOCRATES, CRITO. constant resident in the city, which, as you never leave, you may be supposed to love[1]. For you never went out of the city either to see the games, except once when you went to the Isthmus, or to any other place unless when you were on military service; nor did you travel as other men do. Nor had you any curiosity to know other states or their laws: your affections did not go beyond us and our state; we were your special favourites, and you acquiesced in our government of you; and here in this city you begat your children, which is a proof of your satisfaction. Moreover, you might in the course of the trial, if you had liked, have fixed the penalty at banishment; the state which refuses to let you go now would have let you go then. But you pretended that you preferred death to exile[2], and that you were not unwilling to die. And now you have forgotten these fine sentiments, and pay no respect to us the laws, of whom you are the destroyer; and are doing what only a miserable slave would do, running away and turning your back upon the compacts and agreements which you made as a citizen. And first of all answer this very question: Are we right in saying that you agreed to be governed according to us in deed, and not in word only? Is that true or not?' How shall we answer, Crito? Must we not assent?

Cr. We cannot help it, Socrates.

This agreement he is now going to break.

Soc. Then will they not say: 'You, Socrates, are breaking the covenants and agreements which you made with us at your leisure, not in any haste or under any compulsion or deception, but after you have had seventy years to think of them, during which time you were at liberty to leave the city, if we were not to your mind, or if our covenants appeared to you to be unfair. You had your choice, and might have gone either to Lacedaemon or Crete, both which states are often praised by you for their good government, or to some other Hellenic or foreign state. Whereas you, 53
above all other Athenians, seemed to be so fond of the state, or, in other words, of us her laws (and who would care about a state which has no laws?), that you never stirred out of her;

[1] Cp. Phaedr. 230 C.

[2] Cp. Apol. 37 D.

Crito. SOCRATES.

the halt, the blind, the maimed were not more stationary in her than you were. And now you run away and forsake your agreements. Not so, Socrates, if you will take our advice; do not make yourself ridiculous by escaping out of the city.

If he does he will injure his friends and will disgrace himself.

'For just consider, if you transgress and err in this sort of way, what good will you do either to yourself or to your friends? That your friends will be driven into exile and deprived of citizenship, or will lose their property, is tolerably certain; and you yourself, if you fly to one of the neighbouring cities, as, for example, Thebes or Megara, both of which are well governed, will come to them as an enemy, Socrates, and their government will be against you, and all patriotic citizens will cast an evil eye upon you as a subverter of the laws, and you will confirm in the minds of the judges the justice of their own condemnation of you. For he who is a corrupter of the laws is more than likely to be a corrupter of the young and foolish portion of mankind. Will you then flee from well-ordered cities and virtuous men? and is existence worth having on these terms? Or will you go to them without shame, and talk to them, Socrates? And what will you say to them? What you say here about virtue and justice and institutions and laws being the best things among men? Would that be decent of you? Surely not. But if you go away from well-governed states to Crito's friends in Thessaly, where there is great disorder and licence, they will be charmed to hear the tale of your escape from prison, set off with ludicrous particulars of the manner in which you were wrapped in a goatskin or some other disguise, and metamorphosed as the manner is of runaways; but will there be no one to remind you that in your old age you were not ashamed to violate the most sacred laws from a miserable desire of a little more life? Perhaps not, if you keep them in a good temper; but if they are out of temper you will hear many degrading things; you will live, but how?—as the flatterer of all men, and the servant of all men; and doing what?—eating and drinking in Thessaly, having gone abroad in order that you may get a dinner. And where will be your fine sentiments
54 about justice and virtue? Say that you wish to live for the

Crito. SOCRATES, CRITO.

sake of your children — you want to bring them up and educate them — will you take them into Thessaly and deprive them of Athenian citizenship? Is this the benefit which you will confer upon them? Or are you under the impression that they will be better cared for and educated here if you are still alive, although absent from them; for your friends will take care of them? Do you fancy that if you are an inhabitant of Thessaly they will take care of them, and if you are an inhabitant of the other world that they will not take care of them? Nay; but if they who call themselves friends are good for anything, they will — to be sure they will.

Let him think of justice first, and of life and children afterwards.

'Listen, then, Socrates, to us who have brought you up. Think not of life and children first, and of justice afterwards, but of justice first, that you may be justified before the princes of the world below. For neither will you nor any that belong to you be happier or holier or juster in this life, or happier in another, if you do as Crito bids. Now you depart in innocence, a sufferer and not a doer of evil; a victim, not of the laws but of men. But if you go forth, returning evil for evil, and injury for injury, breaking the covenants and agreements which you have made with us, and wronging those whom you ought least of all to wrong, that is to say, yourself, your friends, your country, and us, we shall be angry with you while you live, and our brethren, the laws in the world below, will receive you as an enemy; for they will know that you have done your best to destroy us. Listen, then, to us and not to Crito.'

The mystic voice.

This, dear Crito, is the voice which I seem to hear murmuring in my ears, like the sound of the flute in the ears of the mystic; that voice, I say, is humming in my ears, and prevents me from hearing any other. And I know that anything more which you may say will be vain. Yet speak, if you have anything to say.

Cr. I have nothing to say, Socrates.

Soc. Leave me then, Crito, to fulfil the will of God, and to follow whither he leads.

PHAEDO.

INTRODUCTION.

Steph. AFTER an interval of some months or years, and at Phlius, a
57 town of Peloponnesus, the tale of the last hours of Socrates is narrated to Echecrates and other Phliasians by Phaedo the 'beloved disciple.' The Dialogue necessarily takes the form of a
58 narrative, because Socrates has to be described acting as well as speaking. The minutest particulars of the event are interesting to distant friends, and the narrator has an equal interest in them.

During the voyage of the sacred ship to and from Delos, which has occupied thirty days, the execution of Socrates has been deferred. (Cp. Xen. Mem. iv. 8. 2.) The time has been passed by
59 him in conversation with a select company of disciples. But now the holy season is over, and the disciples meet earlier than usual in order that they may converse with Socrates for the last time. Those who were present, and those who might have been expected to be present, are mentioned by name. There are Simmias and Cebes (Crito 45 B), two disciples of Philolaus whom Socrates 'by his enchantments has attracted from Thebes' (Mem. iii. 11. 17), Crito the aged friend, the attendant of the prison, who is as good as a friend — these take part in the conversation. There are present also, Hermogenes, from whom Xenophon derived his information about the trial of Socrates (Mem. iv. 8. 4), the 'madman' Apollodorus (Symp. 173 D), Euclid and Terpsion from Megara (cp. Theaet. sub init.), Ctesippus, Antisthenes, Menexenus, and some other less-known members of the Socratic circle, all of whom are silent auditors. Aristippus, Cleombrotus,
60 and Plato are noted as absent. Almost as soon as the friends of Socrates enter the prison Xanthippè and her children are sent home in the care of one of Crito's servants. Socrates himself has just been released from chains, and is led by this circumstance to

make the natural remark that 'pleasure follows pain.' (Observe that Plato is preparing the way for his doctrine of the alternation of opposites.) 'Aesop would have represented them in a fable as a creature with two bodies and a single head.' The mention of Aesop reminds Cebes of a question which had been asked by Evenus the poet (cp. Apol. 20 A): 'Why Socrates, who was not a poet, while in prison had been putting Aesop into verse?'—'Because several times in his life he had been warned in dreams that 61
he should practise music; and as he was about to die and was not certain of what was meant, he wished to fulfil the admonition in the letter as well as in the spirit, by writing verses as well as by cultivating philosophy. Tell this to Evenus; and say that I would have him follow me in death.' 'He is not at all the sort of man to comply with your request, Socrates.' 'Why, is he not a philosopher?' 'Yes.' 'Then he will be willing to die, although he will not take his own life, for that is held to be unlawful.'

Cebes asks why suicide is thought not to be right, if death is to 62
be accounted a good? Well, (1) according to one explanation, because man is a prisoner, who must not open the door of his prison and run away — this is the truth in a 'mystery.' Or (2) rather, because he is not his own property, but a possession of the gods, and has no right to make away with that which does not belong to him. But why, asks Cebes, if he is a possession of the gods, should he wish to die and leave them? for he is under their protection; and surely he cannot take better care of himself than they take of him. Simmias explains that Cebes is really 63
referring to Socrates, whom they think too unmoved at the prospect of leaving the gods and his friends. Socrates answers that he is going to other gods who are wise and good, and perhaps to better friends; and he professes that he is ready to defend himself against the charge of Cebes. The company shall be his judges, and he hopes that he will be more successful in convincing them than he had been in convincing the court.

The philosopher desires death — which the wicked world will 64
insinuate that he also deserves: and perhaps he does, but not in any sense which they are capable of understanding. Enough of them: the real question is, What is the nature of that death which he desires? Death is the separation of soul and body — and the philosopher desires such a separation. He would like to

be freed from the dominion of bodily pleasures and of the senses,
65 which are always perturbing his mental vision. He wants to get rid of eyes and ears, and with the light of the mind only to behold the light of truth. All the evils and impurities and neces-
66 sities of men come from the body. And death separates him from these corruptions, which in life he cannot wholly lay aside. Why
67 then should he repine when the hour of separation arrives? Why, if he is dead while he lives, should he fear that other death,
68 through which alone he can behold wisdom in her purity?

Besides, the philosopher has notions of good and evil unlike those of other men. For they are courageous because they are
69 afraid of greater dangers, and temperate because they desire greater pleasures. But he disdains this balancing of pleasures and pains, which is the exchange of commerce and not of virtue. All the virtues, including wisdom, are regarded by him only as purifications of the soul. And this was the meaning of the founders of the mysteries when they said, 'Many are the wand-bearers but few are the mystics.' (Cp. Matt. xxii. 14: 'Many are called, but few are chosen.') And in the hope that he is one of these mystics, Socrates is now departing. This is his answer to any one who charges him with indifference at the prospect of leaving the gods and his friends.

70 Still, a fear is expressed that the soul upon leaving the body may vanish away like smoke or air. Socrates in answer appeals first of all to the old Orphic tradition that the souls of the dead are in the world below, and that the living come from them. This he attempts to found on a philosophical assumption that
71 all opposites — e. g. less, greater; weaker, stronger; sleeping, waking; life, death — are generated out of each other. Nor can the process of generation be only a passage from living to dying,
72 for then all would end in death. The perpetual sleeper (Endymion) would be no longer distinguished from the rest of mankind. The circle of nature is not complete unless the living come from the dead as well as pass to them.

The Platonic doctrine of reminiscence is then adduced as a confirmation of the pre-existence of the soul. Some proofs of
73 this doctrine are demanded. One proof given is the same as that of the Meno (82 foll.), and is derived from the latent knowledge of mathematics, which may be elicited from an unlearned person

when a diagram is presented to him. Again, there is a power of association, which from seeing Simmias may remember Cebes, or from seeing a picture of Simmias may remember Simmias. The 74
lyre may recall the player of the lyre, and equal pieces of wood or stone may be associated with the higher notion of absolute equality. But here observe that material equalities fall short of the conception of absolute equality with which they are compared, and which is the measure of them. And the measure or standard must be prior to that which is measured, the idea of 75
equality prior to the visible equals. And if prior to them, then prior also to the perceptions of the senses which recall them, and therefore either given before birth or at birth. But all men have 76
not this knowledge, nor have any without a process of reminiscence; which is a proof that it is not innate or given at birth, unless indeed it was given and taken away at the same instant. But if not given to men in birth, it must have been given before birth — this is the only alternative which remains. And if we had ideas in a former state, then our souls must have existed and must have had intelligence in a former state. The pre-existence 77
of the soul stands or falls with the doctrine of ideas.

It is objected by Simmias and Cebes that these arguments only prove a former and not a future existence. Socrates answers this objection by recalling the previous argument, in which he had shown that the living come from the dead. But the fear that the soul at departing may vanish into air (especially if there is a wind blowing at the time) has not yet been charmed away. He pro- 78
ceeds: When we fear that the soul will vanish away, let us ask ourselves what is that which we suppose to be liable to dissolution? Is it the simple or the compound, the unchanging or the changing, the invisible idea or the visible object of sense? Clearly the latter and not the former; and therefore not the soul, 79
which in her own pure thought is unchangeable, and only when using the senses descends into the region of change. Again, the soul commands, the body serves: in this respect too the soul is 80
akin to the divine, and the body to the mortal. And in every point of view the soul is the image of divinity and immortality, and the body of the human and mortal. And whereas the body is liable to speedy dissolution, the soul is almost if not quite indissoluble. (Cp. Tim. 41 A.) Yet even the body may be preserved

for ages by the embalmer's art: how unlikely, then, that the soul will perish and be dissipated into air while on her way to the good and wise God! She has been gathered into herself, holding
81 aloof from the body, and practising death all her life long, and she is now finally released from the errors and follies and passions of men, and for ever dwells in the company of the gods.

But the soul which is polluted and engrossed by the corporeal, and has no eye except that of the senses, and is weighed down by the bodily appetites, cannot attain to this abstraction. In her fear of the world below she lingers about the sepulchre, loath to leave the body which she loved, a ghostly apparition, saturated with sense, and therefore visible. At length entering into some
82 animal of a nature congenial to her former life of sensuality or violence, she takes the form of an ass, a wolf or a kite. And of these earthly souls the happiest are those who have practised virtue without philosophy; they are allowed to pass into gentle and social natures, such as bees and ants. (Cp. Rep. x. 619 C, Meno 100 A.) But only the philosopher who departs pure is permitted to enter the company of the gods. (Cp. Phaedrus 249.) This is the reason why he abstains from fleshly lusts, and not because he fears loss or disgrace, which is the motive of other
83 men. He too has been a captive, and the willing agent of his own captivity. But philosophy has spoken to him, and he has heard her voice; she has gently entreated him, and brought him out of the 'miry clay,' and purged away the mists of passion and the illusions of sense which envelope him; his soul has escaped from the influence of pleasures and pains, which are like nails
84 fastening her to the body. To that prison-house she will not return; and therefore she abstains from bodily pleasures — not from a desire of having more or greater ones, but because she knows that only when calm and free from the dominion of the body can she behold the light of truth.

Simmias and Cebes remain in doubt; but they are unwilling to raise objections at such a time. Socrates wonders at their reluctance. Let them regard him rather as the swan, who,
85 having sung the praises of Apollo all his life long, sings at his death more lustily than ever. (Cp. 60 D.) Simmias acknowledges that there is cowardice in not probing truth to the bottom. 'And if truth divine and inspired is not to be had, then let a man

take the best of human notions, and upon this frail bark let him sail through life.' He proceeds to state his difficulty: It has been argued that the soul is invisible and incorporeal, and therefore immortal, and prior to the body. But is not the soul acknowledged to be a harmony, and has she not the same relation to the body, as the harmony — which like her is invisible — has to the lyre? And yet the harmony does not survive the lyre. Cebes has also an objection, which like Simmias he expresses in a figure. He is willing to admit that the soul is more lasting than the body. But the more lasting nature of the soul does not prove her immortality; for after having worn out many bodies in a single life, and many more in successive births and deaths, she may at last perish, or, as Socrates afterwards restates the objection, the very act of birth may be the beginning of her death, and her last body may survive her, just as the coat of an old weaver is left behind him after he is dead, although a man is more lasting than his coat. And he who would prove the immortality of the soul, must prove not only that the soul outlives one or many bodies, but that she outlives them all. 86 87 88

The audience, like the chorus in a play, for a moment interpret the feelings of the actors; there is a temporary depression, and then the enquiry is resumed. It is a melancholy reflection that arguments, like men, are apt to be deceivers; and those who have been often deceived become distrustful both of arguments and of friends. But this unfortunate experience should not make us either haters of men or haters of arguments. The want of health and truth is not in the argument, but in ourselves. Socrates, who is about to die, is sensible of his own weakness; he desires to be impartial, but he cannot help feeling that he has too great an interest in the truth of the argument. And therefore he would have his friends examine and refute him, if they think that he is in error. 89 90 91

At his request Simmias and Cebes repeat their objections. They do not go to the length of denying the pre-existence of ideas. Simmias is of opinion that the soul is a harmony of the body. But the admission of the pre-existence of ideas, and therefore of the soul, is at variance with this. (Cp. a parallel difficulty in Theaet. 203, 204.) For a harmony is an effect, whereas the soul is not an effect, but a cause; a harmony follows, 92 93

but the soul leads; a harmony admits of degrees, and the soul has no degrees. Again, upon the supposition that the soul is a harmony, why is one soul better than another? Are they more or less harmonized, or is there one harmony within another?

94 But the soul does not admit of degrees, and cannot therefore be more or less harmonized. Further, the soul is often engaged in resisting the affections of the body, as Homer describes Odysseus

95 'rebuking his heart.' Could he have written this under the idea that the soul is a harmony of the body? Nay rather, are we not contradicting Homer and ourselves in affirming anything of the sort?

The goddess Harmonia, as Socrates playfully terms the argument of Simmias, has been happily disposed of; and now an answer has to be given to the Theban Cadmus. Socrates re-

96 capitulates the argument of Cebes, which, as he remarks, involves the whole question of natural growth or causation; about this he proposes to narrate his own mental experience. When he was young he had puzzled himself with physics: he had enquired into the growth and decay of animals, and the origin of thought, until at last he began to doubt the self-evident fact that growth is the result of eating and drinking; and so he arrived at the conclusion that he was not meant for such enquiries. Nor was he less perplexed with notions of comparison and number. At first he had imagined himself to understand differences of greater and less, and to know that ten is two more than eight, and the like. But now those very notions appeared to him to contain a

97 contradiction. For how can one be divided into two? or two be compounded into one? These are difficulties which Socrates cannot answer. Of generation and destruction he knows nothing. But he has a confused notion of another method in which matters of this sort are to be investigated. (Cp. Rep. iv. 435 D; vii. 533 A; Charm. 170 foll.)

Then he heard some one reading out of a book of Anaxagoras, that mind is the cause of all things. And he said to himself: If mind is the cause of all things, surely mind must dispose them all

98 for the best. The new teacher will show me this 'order of the best' in man and nature. How great had been his hopes and how great his disappointment! For he found that his new friend was anything but consistent in his use of mind as a cause, and that he

Phaedo. ANALYSIS.

soon introduced winds, waters, and other eccentric notions. (Cp. Arist. Metaph. i. 4, 5.) It was as if a person had said that Socrates is sitting here because he is made up of bones and muscles, 99
instead of telling the true reason — that he is here because the Athenians have thought good to sentence him to death, and he has thought good to await his sentence. Had his bones and muscles been left by him to their own ideas of right, they would long ago have taken themselves off. But surely there is a great confusion of the cause and condition in all this. And this confusion also leads people into all sorts of erroneous theories about the position and motions of the earth. None of them know how much stronger than any Atlas is the power of the best. But this 'best' is still undiscovered; and in enquiring after the cause, we can only hope to attain the second best.

Now there is a danger in the contemplation of the nature of things, as there is a danger in looking at the sun during an eclipse, 100
unless the precaution is taken of looking only at the image reflected in the water, or in a glass. (Cp. Laws x. 897 D; Rep. vii. 516 foll.) 'I was afraid,' says Socrates, 'that I might injure the eye of the soul. I thought that I had better return to the old and safe method of ideas. Though I do not mean to say that he who contemplates existence through the medium of ideas sees only through a glass darkly, any more than he who contemplates actual effects.'

If the existence of ideas is granted to him, Socrates is of opinion that he will then have no difficulty in proving the immortality of the soul. He will only ask for a further admission: — that beauty is the cause of the beautiful, greatness the cause of the great, smallness of the small, and so on of other things. This is a safe 101
and simple answer, which escapes the contradictions of greater and less (greater by reason of that which is smaller!), of addition and subtraction, and the other difficulties of relation. These subtleties he is for leaving to wiser heads than his own; he prefers to test ideas by the consistency of their consequences, and, if asked to give an account of them, goes back to some higher idea or hypothesis which appears to him to be the best, until at last he arrives at a resting-place. (Rep. vi. 510 foll.; Phil. 16 foll.)

The doctrine of ideas, which has long ago received the assent of 102
the Socratic circle, is now affirmed by the Phliasian auditor to command the assent of any man of sense. The narrative is con-

tinued; Socrates is desirous of explaining how opposite ideas may appear to co-exist but do not really co-exist in the same thing or person. For example, Simmias may be said to have greatness and also smallness, because he is greater than Socrates and less than Phaedo. And yet Simmias is not really great and also small, but only when compared to Phaedo and Socrates. I use the illustration, says Socrates, because I want to show you not only that ideal opposites exclude one another, but also the opposites in us. I, for example, having the attribute of smallness remain small, and cannot become great: the smallness which is in me drives out
103 greatness.

One of the company here remarked that this was inconsistent with the old assertion that opposites generated opposites. But that, replies Socrates, was affirmed, not of opposite ideas either in us or in nature, but of opposition in the concrete — not of life and death, but of individuals living and dying. When this objection has been removed, Socrates proceeds: This doctrine of the mutual exclusion of opposites is not only true of the opposites themselves, but of things which are inseparable from them. For example, cold and heat are opposed; and fire, which is inseparable from heat, cannot co-exist with cold, or snow, which is inseparable from cold, with heat. Again, the number three excludes the number four, because three is an odd number and four is an even
104 number, and the odd is opposed to the even. Thus we are able to proceed a step beyond 'the safe and simple answer.' We may say, not only that the odd excludes the even, but that the number
105 three, which participates in oddness, excludes the even. And in like manner, not only does life exclude death, but the soul, of which life is the inseparable attribute, also excludes death. And that of which life is the inseparable attribute is by the force of the
106 terms imperishable. If the odd principle were imperishable, then the number three would not perish but remove, on the approach of the even principle. But the immortal is imperishable; and therefore the soul on the approach of death does not perish but removes.

107 Thus all objections appear to be finally silenced. And now the application has to be made: If the soul is immortal, 'what manner of persons ought we to be?' having regard not only to time but to eternity. For death is not the end of all, and the wicked is not

released from his evil by death; but every one carries with him into the world below that which he is or has become, and that only.

For after death the soul is carried away to judgment, and when she has received her punishment returns to earth in the course of ages. The wise soul is conscious of her situation, and follows the 108
attendant angel who guides her through the windings of the world below; but the impure soul wanders hither and thither without companion or guide, and is carried at last to her own place, as the pure soul is also carried away to hers. 'In order that you may understand this, I must first describe to you the nature and conformation of the earth.'

Now the whole earth is a globe placed in the centre of the heavens, and is maintained there by the perfection of balance. 109
That which we call the earth is only one of many small hollows, wherein collect the mists and waters and the thick lower air; but the true earth is above, and is in a finer and subtler element. And if, like birds, we could fly to the surface of the air, in the same manner that fishes come to the top of the sea, then we should behold the true earth and the true heaven and the true stars. Our 110
earth is everywhere corrupted and corroded; and even the land, which is fairer than the sea, for that is a mere chaos or waste of water and mud and sand, has nothing to show in comparison of the other world. But the heavenly earth is of divers colours, sparkling with jewels brighter than gold and whiter than any snow, having flowers and fruits innumerable. And the inhabitants 111
dwell some on the shore of the sea of air, others in 'islets of the blest,' and they hold converse with the gods, and behold the sun, moon and stars as they truly are, and their other blessedness is of a piece with this.

The hollows on the surface of the globe vary in size and shape from that which we inhabit: but all are connected by passages and perforations in the interior of the earth. And there is one huge chasm or opening called Tartarus, into which streams of fire and water and liquid mud are ever flowing; of these small portions find their way to the surface and form seas and rivers and 112
volcanoes. There is a perpetual inhalation and exhalation of the air rising and falling as the waters pass into the depths of the earth and return again, in their course forming lakes and rivers,

but never descending below the centre of the earth; for on either side the rivers flowing either way are stopped by a precipice. These rivers are many and mighty, and there are four principal ones, Oceanus, Acheron, Pyriphlegethon, and Cocytus. Oceanus is the river which encircles the earth; Acheron takes an opposite direction, and after flowing under the earth through desert places,
113 at last reaches the Acherusian lake,— this is the river at which the souls of the dead await their return to earth. Pyriphlegethon is a stream of fire, which coils round the earth and flows into the depths of Tartarus. The fourth river, Cocytus, is that which is called by the poets the Stygian river, and passes into and forms the lake Styx, from the waters of which it gains new and strange powers. This river, too, falls into Tartarus.

The dead are first of all judged according to their deeds, and those who are incurable are thrust into Tartarus, from which they never come out. Those who have only committed venial sins are first purified of them, and then rewarded for the good which they
114 have done. Those who have committed crimes, great indeed, but not unpardonable, are thrust into Tartarus, but are cast forth at the end of a year by way of Pyriphlegethon or Cocytus, and these carry them as far as the Acherusian lake, where they call upon their victims to let them come out of the rivers into the lake. And if they prevail, then they are let out and their sufferings cease: if not, they are borne unceasingly into Tartarus and back again, until they at last obtain mercy. The pure souls also receive their reward, and have their abode in the upper earth, and a select few in still fairer 'mansions.'

Socrates is not prepared to insist on the literal accuracy of this description, but he is confident that something of the kind is true. He who has sought after the pleasures of knowledge and rejected the pleasures of the body, has reason to be of good hope at the approach of death; whose voice is already speaking to him, and who will one day be heard calling all men.

115 The hour has come at which he must drink the poison, and not much remains to be done. How shall they bury him? That is a question which he refuses to entertain, for they are burying, not
116 him, but his dead body. His friends had once been sureties that he would remain, and they shall now be sureties that he has run away. Yet he would not die without the customary ceremonies of

ANALYSIS.

washing and burial. Shall he make a libation of the poison? In 117
the spirit he will, but not in the letter. One request he utters in the very act of death, which has been a puzzle to after ages. With a sort of irony he remembers that a trifling religious duty is still 118
unfulfilled, just as above (60 E) he desires before he departs to compose a few verses in order to satisfy a scruple about a dream — unless, indeed, we suppose him to mean, that he was now restored to health, and made the customary offering to Asclepius in token of his recovery.

INTRODUCTION.

1. The doctrine of the immortality of the soul has sunk deep into the heart of the human race; and men are apt to rebel against any examination of the nature or grounds of their belief. They do not like to acknowledge that this, as well as the other 'eternal ideas' of man, has a history in time, which may be traced in Greek poetry or philosophy, and also in the Hebrew Scriptures. They convert feeling into reasoning, and throw a network of dialectics over that which is really a deeply-rooted instinct. In the same temper which Socrates reproves in himself (91 B) they are disposed to think that even fallacies will do no harm, for they will die with them, and while they live they will gain by the delusion. And when they consider the numberless bad arguments which have been pressed into the service of theology, they say, like the companions of Socrates, 'What argument can we ever trust again?' But there is a better and higher spirit to be gathered from the Phaedo, as well as from the other writings of Plato, which says that first principles should be most constantly reviewed (Phaedo 107 B, and Crat. 436), and that the highest subjects demand of us the greatest accuracy (Rep. vi. 504 E); also that we must not become misologists because arguments are apt to be deceivers.

2. In former ages there was a customary rather than a reasoned belief in the immortality of the soul. It was based on the authority of the Church, on the necessity of such a belief to morality and the order of society, on the evidence of an historical fact, and also on analogies and figures of speech which filled up the void or gave an expression in words to a cherished instinct. The mass of mankind went on their way busy with the affairs of this life, hardly stopping to think about another. But in our own

day the question has been reopened, and it is doubtful whether the belief which in the first ages of Christianity was the strongest motive of action can survive the conflict with a scientific age in which the rules of evidence are stricter and the mind has become more sensitive to criticism. It has faded into the distance by a natural process as it was removed further and further from the historical fact on which it has been supposed to rest. Arguments derived from material things such as the seed and the ear of corn or transitions in the life of animals from one state of being to another (the chrysalis and the butterfly) are not 'in pari materia' with arguments from the visible to the invisible, and are therefore felt to be no longer applicable. The evidence to the historical fact seems to be weaker than was once supposed: it is not consistent with itself, and is based upon documents which are of unknown origin. The immortality of man must be proved by other arguments than these if it is again to become a living belief. We must ask ourselves afresh why we still maintain it, and seek to discover a foundation for it in the nature of God and in the first principles of morality.

3. At the outset of the discussion we may clear away a confusion. We certainly do not mean by the immortality of the soul the immortality of fame, which whether worth having or not can only be ascribed to a very select class of the whole race of mankind, and even the interest in these few is comparatively short-lived. To have been a benefactor to the world, whether in a higher or a lower sphere of life and thought, is a great thing: to have the reputation of being one, when men have passed out of the sphere of earthly praise or blame, is hardly worthy of consideration. The memory of a great man, so far from being immortal, is really limited to his own generation: — so long as his friends or his disciples are alive, so long as his books continue to be read, so long as his political or military successes fill a page in the history of his country. The praises which are bestowed upon him at his death hardly last longer than the flowers which are strewed upon his coffin or the 'immortelles' which are laid upon his tomb. Literature makes the most of its heroes, but the true man is well aware that far from enjoying an immortality of fame, in a generation or two, or even in a much shorter time, he will be forgotten and the world will get on without him.

Phaedo. INTRODUCTION.

4. Modern philosophy is perplexed at this whole question, which is sometimes fairly given up and handed over to the realm of faith. The perplexity should not be forgotten by us when we attempt to submit the Phaedo of Plato to the requirements of logic. For what idea can we form of the soul when separated from the body? Or how can the soul be united with the body and still be independent? Is the soul related to the body as the ideal to the real, or as the whole to the parts, or as the subject to the object, or as the cause to the effect, or as the end to the means? Shall we say with Aristotle, that the soul is the entelechy or form of an organized living body? or with Plato, that she has a life of her own? Is the Pythagorean image of the harmony, or that of the monad, the truer expression? Is the soul related to the body as sight to the eye, or as the boatman to his boat? (Arist. de Anim. ii. 1, 11, 12.) And in another state of being is the soul to be conceived of as vanishing into infinity, hardly possessing an existence which she can call her own, as in the pantheistic system of Spinoza? or as an individual informing another body and entering into new relations, but retaining her own character? (Cp. Gorgias, 524 B, C.) Or is the opposition of soul and body a mere illusion, and the true self neither soul nor body, but the union of the two in the 'I' which is above them? And is death the assertion of this individuality in the higher nature, and the falling away into nothingness of the lower? Or are we vainly attempting to pass the boundaries of human thought? The body and the soul seem to be inseparable, not only in fact, but in our conceptions of them; and any philosophy which too closely unites them, or too widely separates them, either in this life or in another, disturbs the balance of human nature. No thinker has perfectly adjusted them, or been entirely consistent with himself in describing their relation to one another. Nor can we wonder that Plato in the infancy of human thought should have confused mythology and philosophy, or have mistaken verbal arguments for real ones.

5. Again, believing in the immortality of the soul, we must still ask the question of Socrates, 'What is that which we suppose to be immortal?' Is it the personal and individual element in us, or the spiritual and universal? Is it the principle of knowledge or of goodness, or the union of the two? Is it the mere force of life which is determined to be, or the consciousness of self which

cannot be got rid of, or the fire of genius which refuses to be extinguished? Or is there a hidden being which is allied to the Author of all existence, who is because he is perfect, and to whom our ideas of perfection give us a title to belong? Whatever answer is given by us to these questions, there still remains the necessity of allowing the permanence of evil, if not for ever, at any rate for a time, in order that the wicked 'may not have too good a bargain.' For the annihilation of evil at death, or the eternal duration of it, seem to involve equal difficulties in the moral government of the universe. Sometimes we are led by our feelings, rather than by our reason, to think of the good and wise only as existing in another life. Why should the mean, the weak, the idiot, the infant, the herd of men who have never in any proper sense the use of reason, reappear with blinking eyes in the light of another world? But our second thought is that the hope of humanity is a common one, and that all or none will be partakers of immortality. Reason does not allow us to suppose that we have any greater claims than others, and experience may often reveal to us unexpected flashes of the higher nature in those whom we had despised. Why should the wicked suffer any more than ourselves? had we been placed in their circumstances should we have been any better than they? The worst of men are objects of pity rather than of anger to the philanthropist; must they not be equally such to divine benevolence? Even more than the good they have need of another life; not that they may be punished, but that they may be educated. These are a few of the reflections which arise in our minds when we attempt to assign any form to our conceptions of a future state.

There are some other questions which are disturbing to us because we have no answer to them. What is to become of the animals in a future state? Have we not seen dogs more faithful and intelligent than men, and men who are more stupid and brutal than any animals? Does their life cease at death, or is there some 'better thing reserved' also for them? They may be said to have a shadow or imitation of morality, and imperfect moral claims upon the benevolence of man and upon the justice of God. We cannot think of the least or lowest of them, the insect, the bird, the inhabitants of the sea or the desert, as having any place in a future world, and if not all, why should those who are specially

Phaedo. INTRODUCTION.

attached to man be deemed worthy of any exceptional privilege? When we reason about such a subject, almost at once we degenerate into nonsense. It is a passing thought which has no real hold on the mind. We may argue for the existence of animals in a future state from the attributes of God, or from texts of Scripture ('Are not two sparrows sold for one farthing?' &c.), but the truth is that we are only filling up the void of another world with our own fancies. Again, we often talk about the origin of evil, that great bugbear of theologians, by which they frighten us into believing any superstition. What answer can be made to the old commonplace, 'Is not God the author of evil, if he knowingly permitted, but could have prevented it?' Even if we assume that the inequalities of this life are rectified by some transposition of human beings in another, still the existence of the very least evil if it could have been avoided, seems to be at variance with the love and justice of God. And so we arrive at the conclusion that we are carrying logic too far, and that the attempt to frame the world according to a rule of divine perfection is opposed to experience and had better be given up. The case of the animals is our own. We must admit that the Divine Being, although perfect himself, has placed us in a state of life in which we may work together with him for good, but we are very far from having attained to it.

6. Again, ideas must be given through something; and we are always prone to argue about the soul from analogies of outward things which may serve to embody our thoughts, but are also partly delusive. For we cannot reason from the natural to the spiritual, or from the outward to the inward. The progress of physiological science, without bringing us nearer to the great secret, has tended to remove some erroneous notions respecting the relations of body and mind, and in this we have the advantage of the ancients. But no one imagines that any seed of immortality is to be discerned in our mortal frames. Most people have been content to rest their belief in another life on the agreement of the more enlightened part of mankind, and on the inseparable connection of such a doctrine with the existence of a God — also in a less degree on the impossibility of doubting about the continued existence of those whom we love and reverence in this world. And after all has been said, the figure, the analogy, the argument, are felt to be only approximations in different forms to an

expression of the common sentiment of the human heart. That we shall live again is far more certain than that we shall take any particular form of life.

7. When we speak of the immortality of the soul, we must ask further what we mean by the word immortality. For of the duration of a living being in countless ages we can form no conception; far less than a three years' old child of the whole of life. The naked eye might as well try to see the furthest star in the infinity of heaven. Whether time and space really exist when we take away the limits of them may be doubted; at any rate the thought of them when unlimited is so overwhelming to us as to lose all distinctness. Philosophers have spoken of them as forms of the human mind, but what is the mind without them? As then infinite time, or an existence out of time, which are the only possible explanations of eternal duration, are equally inconceivable to us, let us substitute for them a hundred or a thousand years after death, and ask not what will be our employment in eternity, but what will happen to us in that definite portion of time; or what is now happening to those who passed out of life a hundred or a thousand years ago. Do we imagine that the wicked are suffering torments, or that the good are singing the praises of God, during a period longer than that of a whole life, or of ten lives of men? Is the suffering physical or mental? And does the worship of God consist only of praise, or of many forms of service? Who are the wicked, and who are the good, whom we venture to divide by a hard and fast line; and in which of the two classes should we place ourselves and our friends? May we not suspect that we are making differences of kind, because we are unable to imagine differences of degree? — putting the whole human race into heaven or hell for the greater convenience of logical division? Are we not at the same time describing them both in superlatives, only that we may satisfy the demands of rhetoric? What is that pain which does not become deadened after a thousand years? or what is the nature of that pleasure or happiness which never wearies by monotony? Earthly pleasures and pains are short in proportion as they are keen; of any others which are both intense and lasting we have no experience, and can form no idea. The words or figures of speech which we use are not consistent with themselves. For are we not imagining

Phaedo. INTRODUCTION.

Heaven under the similitude of a church, and Hell as a prison, or perhaps a madhouse or chamber of horrors? And yet to beings constituted as we are, the monotony of singing psalms would be as great an infliction as the pains of hell, and might be even pleasantly interrupted by them. Where are the actions worthy of rewards greater than those which are conferred on the greatest benefactors of mankind? And where are the crimes which according to Plato's merciful reckoning,— more merciful, at any rate, than the eternal damnation of so-called Christian teachers,— for every ten years in this life deserve a hundred of punishment in the life to come? We should be ready to die of pity if we could see the least of the sufferings which the writers of Infernos and Purgatorios have attributed to the damned. Yet these joys and terrors seem hardly to exercise an appreciable influence over the lives of men. The wicked man when old, is not, as Plato supposes (Rep. i. 330 D, E), more agitated by the terrors of another world when he is nearer to them, nor the good in an ecstasy at the joys of which he is soon to be the partaker. Age numbs the sense of both worlds; and the habit of life is strongest in death. Even the dying mother is dreaming of her lost children as they were forty or fifty years before, 'pattering over the boards,' not of reunion with them in another state of being. Most persons when the last hour comes are resigned to the order of nature and the will of God. They are not thinking of Dante's Inferno or Paradiso, or of the Pilgrim's Progress. Heaven and hell are not realities to them, but words or ideas; the outward symbols of some great mystery, they hardly know what. Many noble poems and pictures have been suggested by the traditional representations of them, which have been fixed in forms of art and can no longer be altered. Many sermons have been filled with descriptions of celestial or infernal mansions. But hardly even in childhood did the thought of heaven and hell supply the motives of our actions, or at any time seriously affect the substance of our belief.

8. Another life must be described, if at all, in forms of thought and not of sense. To draw pictures of heaven and hell, whether in the language of Scripture or any other, adds nothing to our real knowledge, but may perhaps disguise our ignorance. The truest conception which we can form of a future life is a state of progress or education — a progress from evil to good, from ignorance to

knowledge. To this we are led by the analogy of the present life, in which we see different races and nations of men, and different men and women of the same nation, in various states or stages of cultivation; some more and some less developed, and all of them capable of improvement under favourable circumstances. There are punishments too of children when they are growing up inflicted by their parents, of elder offenders which are imposed by the law of the land, of all men at all times of life, which are attached by the laws of nature to the performance of certain actions. All these punishments are really educational; that is to say, they are not intended to retaliate on the offender, but to teach him a lesson. Also there is an element of chance in them, which is another name for our ignorance of the laws of nature. There is evil too inseparable from good (cp. Lysis 220 E); not always punished here, as good is not always rewarded. It is capable of being indefinitely diminished; and as knowledge increases, the element of chance may more and more disappear.

For we do not argue merely from the analogy of the present state of this world to another, but from the analogy of a probable future to which we are tending. The greatest changes of which we have had experience as yet are due to our increasing knowledge of history and of nature. They have been produced by a few minds appearing in three or four favoured nations, in a comparatively short period of time. May we be allowed to imagine the minds of men everywhere working together during many ages for the completion of our knowledge? May not the science of physiology transform the world? Again, the majority of mankind have really experienced some moral improvement; almost every one feels that he has tendencies to good, and is capable of becoming better. And these germs of good are often found to be developed by new circumstances, like stunted trees when transplanted to a better soil. The differences between the savage and the civilized man, or between the civilized man in old and new countries, may be indefinitely increased. The first difference is the effect of a few thousand, the second of a few hundred years. We congratulate ourselves that slavery has become industry; that law and constitutional government have superseded despotism and violence; that an ethical religion has taken the place of Fetichism. There may yet come a time when the many may be

Phaedo.

INTRODUCTION.

as well off as the few; when no one will be weighed down by excessive toil; when the necessity of providing for the body will not interfere with mental improvement; when the physical frame may be strengthened and developed; and the religion of all men may become a reasonable service.

Nothing therefore, either in the present state of man or in the tendencies of the future, as far as we can entertain conjecture of them, would lead us to suppose that God governs us vindictively in this world, and therefore we have no reason to infer that he will govern us vindictively in another. The true argument from analogy is not, 'This life is a mixed state of justice and injustice, of great waste, of sudden casualties, of disproportionate punishments, and therefore the like inconsistencies, irregularities, injustices are to be expected in another;' but 'This life is subject to law, and is in a state of progress, and therefore law and progress may be believed to be the governing principles of another.' All the analogies of this world would be against unmeaning punishments inflicted a hundred or a thousand years after an offence had been committed. Suffering there might be as a part of education, but not hopeless or protracted; as there might be a retrogression of individuals or of bodies of men, yet not such as to interfere with a plan for the improvement of the whole (cp. Laws, x. 903).

9. But some one will say: That we cannot reason from the seen to the unseen, and that we are creating another world after the image of this, just as men in former ages have created gods in their own likeness. And we, like the companions of Socrates, may feel discouraged at hearing our favourite 'argument from analogy' thus summarily disposed of. Like himself, too, we may adduce other arguments in which he seems to have anticipated us, though he expresses them in different language. For we feel that the soul partakes of the ideal and invisible; and can never fall into the error of confusing the external circumstances of man with his higher self; or his origin with his nature. It is as repugnant to us as it was to him to imagine that our moral ideas are to be attributed only to cerebral forces. The value of a human soul, like the value of a man's life to himself, is inestimable, and cannot be reckoned in earthly or material things. The human being alone has the consciousness of truth and justice and love, which is the

consciousness of God. And the soul becoming more conscious of these, becomes more conscious of her own immortality.

10. The last ground of our belief in immortality, and the strongest, is the perfection of the divine nature. The mere fact of the existence of God does not tend to show the continued existence of man. An evil God or an indifferent God might have had the power, but not the will, to preserve us. He might have regarded us as fitted to minister to his service by a succession of existences, —like the animals, without attributing to each soul an incomparable value. But if he is perfect, he must will that all rational beings should partake of that perfection which he himself is. In the words of the Timaeus, he is good, and therefore he desires that all other things should be as like himself as possible. And the manner in which he accomplishes this is by permitting evil, or rather degrees of good, which are otherwise called evil. For all progress is good relatively to the past, and yet may be comparatively evil when regarded in the light of the future. Good and evil are relative terms, and degrees of evil are merely the negative aspect of degrees of good. Of the absolute goodness of any finite nature we can form no conception; we are all of us in process of transition from one degree of good or evil to another. The difficulties which are urged about the origin or existence of evil are mere dialectical puzzles, standing in the same relation to Christian philosophy as the puzzles of the Cynics and Megarians to the philosophy of Plato. They arise out of the tendency of the human mind to regard good and evil both as relative and absolute; just as the riddles about motion are to be explained by the double conception of space or matter, which the human mind has the power of regarding either as continuous or discrete.

In speaking of divine perfection, we mean to say that God is just and true and loving, the author of order and not of disorder, of good and not of evil. Or rather, that he is justice, that he is truth, that he is love, that he is order, that he is the very progress of which we were speaking; and that wherever these qualities are present, whether in the human soul or in the order of nature, there is God. We might still see him everywhere, if we had not been mistakenly seeking for him apart from us, instead of in us; away from the laws of nature, instead of in them. And we become united to him not by mystical absorption, but by

Phaedo. INTRODUCTION.

partaking, whether consciously or unconsciously, of that truth and justice and love which he himself is.

Thus the belief in the immortality of the soul rests at last on the belief in God. If there is a good and wise God, then there is a progress of mankind towards perfection; and if there is no progress of men towards perfection, then there is no good and wise God. We cannot suppose that the moral government of God of which we see the beginnings in the world and in ourselves will cease when we pass out of life.

11. Considering the 'feebleness of the human faculties and the uncertainty of the subject,' we are inclined to believe that the fewer our words the better. At the approach of death there is not much said; good men are too honest to go out of the world professing more than they know. There is perhaps no important subject about which, at any time, even religious people speak so little to one another. In the fulness of life the thought of death is mostly awakened by the sight or recollection of the death of others rather than by the prospect of our own. We must also acknowledge that there are degrees of the belief in immortality, and many forms in which it presents itself to the mind. Some persons will say no more than that they trust in God, and that they leave all to Him. It is a great part of true religion not to pretend to know more than we do. Others when they quit this world are comforted with the hope 'That they will see and know their friends in heaven.' But it is better to leave them in the hands of God and to be assured that 'no evil shall touch them.' There are others again to whom the belief in a divine personality has ceased to have any longer a meaning; yet they are satisfied that the end of all is not here, but that something still remains to us, 'and some better thing for the good than for the evil.' They are persuaded, in spite of their theological nihilism, that the ideas of justice and truth and holiness and love are realities. They cherish an enthusiastic devotion to the first principles of morality. Through these they see, or seem to see, darkly, and in a figure, that the soul is immortal.

But besides differences of theological opinion which must ever prevail about things unseen, the hope of immortality is weaker or stronger in men at one time of life than at another; it even

varies from day to day. It comes and goes; the mind, like the sky, is apt to be overclouded. Other generations of men may have sometimes lived under an 'eclipse of faith,' to us the total disappearance of it might be compared to the 'sun falling from heaven.' And we may sometimes have to begin again and acquire the belief for ourselves; or to win it back again when it is lost. It is really weakest in the hour of death. For Nature, like a kind mother or nurse, lays us to sleep without frightening us; physicians, who are the witnesses of such scenes, say that under ordinary circumstances there is no fear of the future. Often, as Plato tells us, death is accompanied 'with pleasure.' (Tim. 81 D.) When the end is still uncertain, the cry of many a one has been, 'Pray, that I may be taken.' The last thoughts even of the best men depend chiefly on the accidents of their bodily state. Pain soon overpowers the desire of life; old age, like the child, is laid to sleep almost in a moment. The long experience of life will often destroy the interest which mankind have in it. So various are the feelings with which different persons draw near to death; and still more various the forms in which imagination clothes it. For this alternation of feeling cp. the Old Testament,—Psalm vi. 5, xvi. 10, xc.; Isaiah xxxviii. 18; Eccles. viii. 8 ff., iii. 19, iv. 2.

12. When we think of God and of man in his relation to God; of the imperfection of our present state and yet of the progress which is observable in the history of the world and of the human mind; of the depth and power of our moral ideas which seem to partake of the very nature of God Himself; when we consider the contrast between the physical laws to which we are subject and the higher law which raises us above them and is yet a part of them; when we reflect on our capacity of becoming the 'spectators of all time and all existence,' and of framing in our own minds the ideal of a perfect Being; when we see how the human mind in all the higher religions of the world, including Buddhism, notwithstanding some aberrations, has tended towards such a belief—we have reason to think that our destiny is different from that of animals; and though we cannot altogether shut out the childish fear that the soul upon leaving the body may 'vanish into thin air,' we have still, so far as the nature of the subject admits, a hope of immortality with which we comfort ourselves on sufficient grounds. The denial of the belief takes the heart out of human

Phaedo. INTRODUCTION.

life; it lowers men to the level of the material. As Goethe also says, 'He is dead even in this world who has no belief in another.'

13. It is well also that we should sometimes think of the forms of thought under which the idea of immortality is most naturally presented to us. It is clear that to our minds the risen soul can no longer be described, as in a picture, by the symbol of a creature half-bird, half-human, nor in any other form of sense. The multitude of angels, as in Milton, singing the Almighty's praises, are a noble image, and may furnish a theme for the poet or the painter, but they are no longer an adequate expression of the kingdom of God which is within us. Neither is there any mansion, in this world or another, in which the departed can be imagined to dwell and carry on their occupations. When this earthly tabernacle is dissolved, no other habitation or building can take them in: it is in the language of ideas only that we speak of them.

First of all there is the thought of rest and freedom from pain; they have gone home, as the common saying is, and the cares of this world touch them no more. Secondly, we may imagine them as they were at their best and brightest, humbly fulfilling their daily round of duties — selfless, childlike, unaffected by the world; when the eye was single and the whole body seemed to be full of light; when the mind was clear and saw into the purposes of God. Thirdly, we may think of them as possessed by a great love of God and man, working out His will at a further stage in the heavenly pilgrimage. And yet we acknowledge that these are the things which eye hath not seen nor ear heard and therefore it hath not entered into the heart of man in any sensible manner to conceive them. Fourthly, there may have been some moments in our own lives when we have risen above ourselves, or been conscious of our truer selves, in which the will of God has superseded our wills, and we have entered into communion with Him, and been partakers for a brief season of the Divine truth and love, in which like Christ we have been inspired to utter the prayer, 'I in them, and thou in me, that we may be all made perfect in one.' These precious moments, if we have ever known them, are the nearest approach which we can make to the idea of immortality.

14. Returning now to the earlier stage of human thought which

is represented by the writings of Plato, we find that many of the same questions have already arisen: there is the same tendency to materialism; the same inconsistency in the application of the idea of mind; the same doubt whether the soul is to be regarded as a cause or as an effect; the same falling back on moral convictions. In the Phaedo the soul is conscious of her divine nature, and the separation from the body which has been commenced in this life is perfected in another. Beginning in mystery, Socrates, in the intermediate part of the Dialogue, attempts to bring the doctrine of a future life into connection with his theory of knowledge. In proportion as he succeeds in this, the individual seems to disappear in a more general notion of the soul; the contemplation of ideas 'under the form of eternity' takes the place of past and future states of existence. His language may be compared to that of some modern philosophers, who speak of eternity, not in the sense of perpetual duration of time, but as an ever-present quality of the soul. Yet at the conclusion of the Dialogue, having 'arrived at the end of the intellectual world' (Rep. vii. 532 B), he replaces the veil of mythology, and describes the soul and her attendant genius in the language of the mysteries or of a disciple of Zoroaster. Nor can we fairly demand of Plato a consistency which is wanting among ourselves, who acknowledge that another world is beyond the range of human thought, and yet are always seeking to represent the mansions of heaven or hell in the colours of the painter, or in the descriptions of the poet or rhetorician.

15. The doctrine of the immortality of the soul was not new to the Greeks in the age of Socrates, but, like the unity of God, had a foundation in the popular belief. The old Homeric notion of a gibbering ghost flitting away to Hades; or of a few illustrious heroes enjoying the isles of the blest; or of an existence divided between the two; or the Hesiodic, of righteous spirits, who become guardian angels,—had given place in the mysteries and the Orphic poets to representations, partly fanciful, of a future state of rewards and punishments. (Laws ix. 870.) The reticence of the Greeks on public occasions and in some part of their literature respecting this 'underground' religion, is not to be taken as a measure of the diffusion of such beliefs. If Pericles in the funeral oration is silent on the consolations of immortality, the poet Pindar and the tragedians on the other hand constantly

Phaedo. INTRODUCTION.

assume the continued existence of the dead in an upper or under world. Darius and Laius are still alive; Antigone will be dear to her brethren after death; the way to the palace of Cronos is found by those who 'have thrice departed from evil.' The tragedy of the Greeks is not 'rounded' by this life, but is deeply set in decrees of fate and mysterious workings of powers beneath the earth. In the caricature of Aristophanes there is also a witness to the common sentiment. The Ionian and Pythagorean philosophies arose, and some new elements were added to the popular belief. The individual must find an expression as well as the world. Either the soul was supposed to exist in the form of a magnet, or of a particle of fire, or of light, or air, or water; or of a number or of a harmony of number; or to be or have, like the stars, a principle of motion (Arist. de Anim. i. 1, 2, 3). At length Anaxagoras, hardly distinguishing between life and mind, or between mind human and divine, attained the pure abstraction; and this, like the other abstractions of Greek philosophy, sank deep into the human intelligence. The opposition of the intelligible and the sensible, and of God to the world, supplied an analogy which assisted in the separation of soul and body. If ideas were separable from phenomena, mind was also separable from matter; if the ideas were eternal, the mind that conceived them was eternal too. As the unity of God was more distinctly acknowledged, the conception of the human soul became more developed. The succession, or alternation of life and death, had occurred to Heracleitus. The Eleatic Parmenides had stumbled upon the modern thesis, that 'thought and being are the same.' The Eastern belief in transmigration defined the sense of individuality; and some, like Empedocles, fancied that the blood which they had shed in another state of being was crying against them, and that for thirty thousand years they were to be 'fugitives and vagabonds upon the earth.' The desire of recognizing a lost mother or love or friend in the world below (Phaedo 68) was a natural feeling which, in that age as well as in every other, has given distinctness to the hope of immortality. Nor were ethical considerations wanting, partly derived from the necessity of punishing the greater sort of criminals, whom no avenging power of this world could reach. The voice of conscience, too, was heard reminding the good man that he was not altogether innocent.

(Rep. i. 330.) To these indistinct longings and fears an expression was given in the mysteries and Orphic poets: a 'heap of books' (Rep. ii. 364 E), passing under the names of Musaeus and Orpheus in Plato's time, were filled with notions of an under-world.

16. Yet after all the belief in the individuality of the soul after death had but a feeble hold on the Greek mind. Like the personality of God, the personality of man in a future state was not inseparably bound up with the reality of his existence. For the distinction between the personal and impersonal, and also between the divine and human, was far less marked to the Greek than to ourselves. And as Plato readily passes from the notion of the good to that of God, he also passes almost imperceptibly to himself and his reader from the future life of the individual soul to the eternal being of the absolute soul. There has been a clearer statement and a clearer denial of the belief in modern times than is found in early Greek philosophy, and hence the comparative silence on the whole subject which is often remarked in ancient writers, and particularly in Aristotle. For Plato and Aristotle are not further removed in their teaching about the immortality of the soul than they are in their theory of knowledge.

17. Living in an age when logic was beginning to mould human thought, Plato naturally cast his belief in immortality into a logical form. And when we consider how much the doctrine of ideas was also one of words, it is not surprising that he should have fallen into verbal fallacies: early logic is always mistaking the truth of the form for the truth of the matter. It is easy to see that the alternation of opposites is not the same as the generation of them out of each other; and that the generation of them out of each other, which is the first argument in the Phaedo, is at variance with their mutual exclusion of each other, whether in themselves or in us, which is the last. For even if we admit the distinction which he draws at p. 103, between the opposites and the things which have the opposites, still individuals fall under the latter class; and we have to pass out of the region of human hopes and fears to a conception of an abstract soul which is the impersonation of the ideas. Such a conception, which in Plato himself is but half expressed, is unmeaning to us, and relative only to a particular stage in the history of thought. The doctrine of reminiscence is also a

Phaedo. INTRODUCTION.

fragment of a former world, which has no place in the philosophy of modern times. But Plato had the wonders of psychology just opening to him, and he had not the explanation of them which is supplied by the analysis of language and the history of the human mind. The question, 'Whence come our abstract ideas?' he could only answer by an imaginary hypothesis. Nor is it difficult to see that his crowning argument is purely verbal, and is but the expression of an instinctive confidence put into a logical form: — 'The soul is immortal because it contains a principle of imperishableness.' Nor does he himself seem at all to be aware that nothing is added to human knowledge by his 'safe and simple answer,' that beauty is the cause of the beautiful; and that he is merely reasserting the Eleatic being 'divided by the Pythagorean numbers,' against the Heracleitean doctrine of perpetual generation. The answer to the 'very serious question' of generation and destruction is really the denial of them. For this he would substitute, as in the Republic, a system of ideas, tested, not by experience, but by their consequences, and not explained by actual causes, but by a higher, that is, a more general notion. Consistency with themselves is the only test which is to be applied to them. (Rep. vi. 510 foll., and Phaedo 101 foll.)

18. To deal fairly with such arguments, they should be translated as far as possible into their modern equivalents. 'If the ideas of men are eternal, their souls are eternal, and if not the ideas, then not the souls.' Such an argument stands nearly in the same relation to Plato and his age, as the argument from the existence of God to immortality among ourselves. 'If God exists, then the soul exists after death; and if there is no God, there is no existence of the soul after death.' For the ideas are to his mind the reality, the truth, the principle of permanence, as well as of intelligence and order in the world. When Simmias and Cebes say that they are more strongly persuaded of the existence of ideas than they are of the immortality of the soul, they represent fairly enough the order of thought in Greek philosophy. And we might say in the same way that we are more certain of the existence of God than we are of the immortality of the soul, and are led by the belief in the one to a belief in the other. The parallel, as Socrates would say, is not perfect, but agrees in as far as the mind in either case is regarded as dependent on some-

thing above and beyond herself. The analogy may even be pressed a step further: 'We are more certain of our ideas of truth and right than we are of the existence of God, and are led on in the order of thought from one to the other.' Or more correctly: 'The existence of right and truth is the existence of God, and can never for a moment be separated from Him.'

19. The main argument of the Phaedo is derived from the existence of eternal ideas of which the soul is a partaker; the other argument of the alternation of opposites is replaced by this. And there have not been wanting philosophers of the idealist school who have imagined that the doctrine of the immortality of the soul is a theory of knowledge, and that in what has preceded Plato is accommodating himself to the popular belief. Such a view can only be elicited from the Phaedo by what may be termed the transcendental method of interpretation, and is obviously inconsistent with the Gorgias and the Republic. Those who maintain it are immediately compelled to renounce the shadow which they have grasped, as a play of words only. But the truth is, that Plato in his argument for the immortality of the soul has collected many elements of proof or persuasion, ethical and mythological as well as dialectical, which are not easily to be reconciled with one another; and he is as much in earnest about his doctrine of retribution, which is repeated in all his more ethical writings, as about his theory of knowledge. And while we may fairly translate the dialectical into the language of Hegel, and the religious and mythological into the language of Dante or Bunyan, the ethical speaks to us still in the same voice, and appeals to a common feeling.

20. Two arguments of this ethical character occur in the Phaedo. The first may be described as the aspiration of the soul after another state of being. Like the Oriental or Christian mystic, the philosopher is seeking to withdraw from impurities of sense, to leave the world and the things of the world, and to find his higher self. Plato recognizes in these aspirations the foretaste of immortality; as Butler and Addison in modern times have argued, the one from the moral tendencies of mankind, the other from the progress of the soul towards perfection. In using this argument Plato has certainly confused the soul which has left the body, with the soul of the good and wise. (Cp. Rep. x.

Phaedo. INTRODUCTION.

611 C.) Such a confusion was natural, and arose partly out of the antithesis of soul and body. The soul in her own essence, and the soul 'clothed upon' with virtues and graces, were easily interchanged with one another, because on a subject which passes expression the distinctions of language can hardly be maintained.

21. The other ethical proof of the immortality of the soul is derived from the necessity of retribution. The wicked would be too well off if their evil deeds came to an end. It is not to be supposed that an Ardiaeus, an Archelaus, an Ismenias could ever have suffered the penalty of their crimes in this world. The manner in which this retribution is accomplished Plato represents under the figures of mythology. Doubtless he felt that it was easier to improve than to invent, and that in religion especially the traditional form was required in order to give verisimilitude to the myth. The myth too is far more probable to that age than to ours, and may fairly be regarded as 'one guess among many' about the nature of the earth, which he cleverly supports by the indications of geology. Not that he insists on the absolute truth of his own particular notions: 'no man of sense will be confident in such matters; but he will be confident that something of the kind is true' (114 D). As in other passages (Gorg. 527 A, Tim. 29 D; cp. Crito, 107 B), he wins belief for his fictions by the moderation of his statements; he does not, like Dante or Swedenborg, allow himself to be deceived by his own creations.

The Dialogue must be read in the light of the situation. And first of all we are struck by the calmness of the scene. Like the spectators at the time, we cannot pity Socrates; his mien and his language are so noble and fearless. He is the same that he ever was, but milder and gentler, and he has in no degree lost his interest in dialectics; he will not forego the delight of an argument in compliance with the jailer's intimation that he should not heat himself with talking. At such a time he naturally expresses the hope of his life, that he has been a true mystic and not a mere routineer or wand-bearer: and he refers to passages of his personal history. To his old enemies the Comic poets, and to the proceedings on the trial, he alludes playfully; but he

vividly remembers the disappointment which he felt in reading the books of Anaxagoras. The return of Xanthippè and his children indicates that the philosopher is not 'made of oak or rock.' Some other traits of his character may be noted; for example, the courteous manner in which he inclines his head to the last objector, or the ironical touch, 'Me already, as the tragic poet would say, the voice of fate calls;' or the depreciation of the arguments with which 'he comforted himself and them;' or his fear of 'misology;' or his references to Homer; or the playful smile with which he 'talks like a book' about greater and less; or the allusion to the possibility of finding another teacher among barbarous races (cp. Polit. 262 D); or the mysterious reference to another science (mathematics?) of generation and destruction for which he is vainly feeling. There is no change in him; only now he is invested with a sort of sacred character, as the prophet or priest of Apollo the God of the festival, in whose honour he first of all composes a hymn, and then like the swan pours forth his dying lay. Perhaps the extreme elevation of Socrates above his own situation, and the ordinary interests of life (compare his *jeu d'esprit* about his burial, in which for a moment he puts on the 'Silenus mask'), create in the mind of the reader an impression stronger than could be derived from arguments that such a one has in him 'a principle which does not admit of death.'

The other persons of the Dialogue may be considered under two heads: (1) private friends; (2) the respondents in the argument.

First there is Crito, who has been already introduced to us in the Euthydemus and the Crito; he is the equal in years of Socrates, and stands in quite a different relation to him from his younger disciples. He is a man of the world who is rich and prosperous (cp. the jest in the Euthydemus, 304 C), the best friend of Socrates, who wants to know his commands, in whose presence he talks to his family, and who performs the last duty of closing his eyes. It is observable too that, as in the Euthydemus, Crito shows no aptitude for philosophical discussions. Nor among the friends of Socrates must the jailer be forgotten, who seems to have been introduced by Plato in order to show the impression made by the extraordinary man on the common.

Phaedo. INTRODUCTION.

The gentle nature of the man is indicated by his weeping at the announcement of his errand and then turning away, and also by the words of Socrates to his disciples: 'How charming the man is! since I have been in prison he has been always coming to me, and is as good as could be to me.' We are reminded too that he has retained this gentle nature amid scenes of death and violence by the contrasts which he draws between the behaviour of Socrates and of others when about to die.

Another person who takes no part in the philosophical discussion is the excitable Apollodorus, the same who, in the Symposium, of which he is the narrator, is called 'the madman,' and who testifies his grief by the most violent emotions. Phaedo is also present, the 'beloved disciple' as he may be termed, who is described, if not 'leaning on his bosom,' as seated next to Socrates, who is playing with his hair. He too, like Apollodorus, takes no part in the discussion, but he loves above all things to hear and speak of Socrates after his death. The calmness of his behaviour, veiling his face when he can no longer restrain his tears, contrasts with the passionate outcries of the other. At a particular point the argument is described as falling before the attack of Simmias. A sort of despair is introduced in the minds of the company. The effect of this is heightened by the description of Phaedo, who has been the eye-witness of the scene, and by the sympathy of his Phliasian auditors who are beginning to think 'that they too can never trust an argument again.' And the intense interest of the company is communicated not only to the first auditors, but to us who in a distant country read the narrative of their emotions after more than two thousand years have passed away.

The two principal interlocutors are Simmias and Cebes, the disciples of Philolaus the Pythagorean philosopher of Thebes. Simmias is described in the Phaedrus (242 B) as fonder of an argument than any man living; and Cebes, although finally persuaded by Socrates, is said to be the most incredulous of human beings. It is Cebes who at the commencement of the Dialogue asks why 'suicide is held to be unlawful,' and who first supplies the doctrine of recollection in confirmation of the pre-existence of the soul. It is Cebes who urges that the pre-existence does not necessarily involve the future existence of

the soul, as is shown by the illustration of the weaver and his coat. Simmias, on the other hand, raises the question about harmony and the lyre, which is naturally put into the mouth of a Pythagorean disciple. It is Simmias, too, who first remarks on the uncertainty of human knowledge, and only at last concedes to the argument such a qualified approval as is consistent with the feebleness of the human faculties. Cebes is the deeper and more consecutive thinker, Simmias more superficial and rhetorical; they are distinguished in much the same manner as Adeimantus and Glaucon in the Republic.

Other persons, Menexenus, Ctesippus, Lysis, are old friends; Evenus has been already satirized in the Apology; Aeschines and Epigenes were present at the trial; Euclid and Terpsion will reappear in the Introduction to the Theaetetus, Hermogenes has already appeared in the Cratylus. No inference can fairly be drawn from the absence of Aristippus, nor from the omission of Xenophon, who at the time of Socrates' death was in Asia. The mention of Plato's own absence seems like an expression of sorrow, and may, perhaps, be an indication that the report of the conversation is not to be taken literally.

The place of the Dialogue in the series is doubtful. The doctrine of ideas is certainly carried beyond the Socratic point of view; in no other of the writings of Plato is the theory of them so completely developed. Whether the belief in immortality can be attributed to Socrates or not is uncertain; the silence of the Memorabilia, and of the earlier Dialogues of Plato, is an argument to the contrary. Yet in the Cyropaedia Xenophon (viii. 7, 19 foll.) has put language into the mouth of the dying Cyrus which recalls the Phaedo, and may have been derived from the teaching of Socrates. It may be fairly urged that the greatest religious interest of mankind could not have been wholly ignored by one who passed his life in fulfilling the commands of an oracle, and who recognized a Divine plan in man and nature. (Xen. Mem. 1, 4.) And the language of the Apology and of the Crito confirms this view.

The Phaedo is not one of the Socratic Dialogues of Plato; nor, on the other hand, can it be assigned to that later stage of the Platonic writings at which the doctrine of ideas appears to be forgotten. It belongs rather to the intermediate period of the Platonic

philosophy, which roughly corresponds to the Phaedrus, Gorgias, Republic, Theaetetus. Without pretending to determine the real time of their composition, the Symposium, Meno, Euthyphro, Apology, Phaedo may be conveniently read by us in this order as illustrative of the life of Socrates. Another chain may be formed of the Meno, Phaedrus, Phaedo, in which the immortality of the soul is connected with the doctrine of ideas. In the Meno the theory of ideas is based on the ancient belief in transmigration, which reappears again in the Phaedrus as well as in the Republic and Timaeus, and in all of them is connected with a doctrine of retribution. In the Phaedrus the immortality of the soul is supposed to rest on the conception of the soul as a principle of motion, whereas in the Republic the argument turns on the natural continuance of the soul, which, if not destroyed by her own proper evil, can hardly be destroyed by any other. The soul of man in the Timaeus (42 foll.) is derived from the Supreme Creator, and either returns after death to her kindred star, or descends into the lower life of an animal. The Apology expresses the same view as the Phaedo, but with less confidence; there the probability of death being a long sleep is not excluded. The Theaetetus also describes, in a digression, the desire of the soul to fly away and be with God — 'and to fly to him is to be like him' (176 B). The Symposium may be observed to resemble as well as to differ from the Phaedo. While the first notion of immortality is only in the way of natural procreation or of posthumous fame and glory, the higher revelation of beauty, like the good in the Republic, is the vision of the eternal idea. So deeply rooted in Plato's mind is the belief in immortality; so various are the forms of expression which he employs.

As in several other Dialogues, there is more of system in the Phaedo than appears at first sight. The succession of arguments is based on previous philosophies; beginning with the mysteries and the Heracleitean alternation of opposites, and proceeding to the Pythagorean harmony and transmigration; making a step by the aid of Platonic reminiscence, and a further step by the help of the *νοῦς* of Anaxagoras; until at last we rest in the conviction that the soul is inseparable from the ideas, and belongs to the world of the invisible and unknown. Then, as in the Gorgias or Republic, the curtain falls, and the veil of mythology descends upon the

argument. After the confession of Socrates that he is an interested party, and the acknowledgment that no man of sense will think the details of his narrative true, but that something of the kind is true, we return from speculation to practice. He is himself more confident of immortality than he is of his own arguments; and the confidence which he expresses is less strong than that which his cheerfulness and composure in death inspire in us.

Difficulties of two kinds occur in the Phaedo — one kind to be explained out of contemporary philosophy, the other not admitting of an entire solution. (1) The difficulty which Socrates says that he experienced in explaining generation and corruption; the assumption of hypotheses which proceed from the less general to the more general, and are tested by their consequences; the puzzle about greater and less; the resort to the method of ideas, which to us appear only abstract terms, — these are to be explained out of the position of Socrates and Plato in the history of philosophy. They were living in a twilight between the sensible and the intellectual world, and saw no way of connecting them. They could neither explain the relation of ideas to phenomena, nor their correlation to one another. The very idea of relation or comparison was embarrassing to them. Yet in this intellectual uncertainty they had a conception of a proof from results, and of a moral truth, which remained unshaken amid the questionings of philosophy. (2) The other is a difficulty which is touched upon in the Republic as well as in the Phaedo, and is common to modern and ancient philosophy. Plato is not altogether satisfied with his safe and simple method of ideas. He wants to have proved to him by facts that all things are for the best, and that there is one mind or design which pervades them all. But this 'power of the best' he is unable to explain; and therefore takes refuge in universal ideas. And are not we at this day seeking to discover that which Socrates in a glass darkly foresaw?

Some resemblances to the Greek drama may be noted in all the Dialogues of Plato. The Phaedo is the tragedy of which Socrates is the protagonist and Simmias and Cebes the secondary performers, standing to them in the same relation as to Glaucon and Adeimantus in the Republic. No Dialogue has a greater unity of subject and feeling. Plato has certainly fulfilled the condition of Greek, or rather of all art, which requires that scenes of death and

suffering should be clothed in beauty. The gathering of the friends at the commencement of the Dialogue, the dismissal of Xanthippè, whose presence would have been out of place at a philosophical discussion, but who returns again with her children to take a final farewell, the dejection of the audience at the temporary overthrow of the argument, the picture of Socrates playing with the hair of Phaedo, the final scene in which Socrates alone retains his composure — are masterpieces of art. And the chorus at the end might have interpreted the feeling of the play: 'There can no evil happen to a good man in life or death.'

'The art of concealing art' is nowhere more perfect than in those writings of Plato which describe the trial and death of Socrates. Their charm is their simplicity, which gives them verisimilitude; and yet they touch, as if incidentally, and because they were suitable to the occasion, on some of the deepest truths of philosophy. There is nothing in any tragedy, ancient or modern, nothing in poetry or history (with one exception), like the last hours of Socrates in Plato. The master could not be more fitly occupied at such a time than in discoursing of immortality; nor the disciples more divinely consoled. The arguments, taken in the spirit and not in the letter, are our arguments; and Socrates by anticipation may be even thought to refute some 'eccentric notions' current in our own age. For there are philosophers among ourselves who do not seem to understand how much stronger is the power of intelligence, or of the best, than of Atlas, or mechanical force. How far the words attributed to Socrates were actually uttered by him we forbear to ask; for no answer can be given to this question. And it is better to resign ourselves to the feeling of a great work, than to linger among critical uncertainties.

PHAEDO.

PERSONS OF THE DIALOGUE.

PHAEDO, *who is the narrator of the Dialogue to Echecrates of Phlius.*
SOCRATES.
ATTENDANT OF THE PRISON.
APOLLODORUS.
SIMMIAS.
CEBES.
CRITO.

SCENE:— The Prison of Socrates.
PLACE OF THE NARRATION:— Phlius.

Phaedo.

ECHECRATES, PHAEDO.

Steph. *Echecrates.* WERE you yourself, Phaedo, in the prison with
57 Socrates on the day when he drank the poison?

Phaedo. Yes, Echecrates, I was.

Ech. I should so like to hear about his death. What did he say in his last hours? We were informed that he died by taking poison, but no one knew anything more; for no Phliasian ever goes to Athens now, and it is a long time since any stranger from Athens has found his way hither; so that we had no clear account.

58 *Phaed.* Did you not hear of the proceedings at the trial?

Ech. Yes; some one told us about the trial, and we could not understand why, having been condemned, he should have been put to death, not at the time, but long afterwards. What was the reason of this?

The death of Socrates was deferred by the holy season of the mission to Delos.

Phaed. An accident, Echecrates: the stern of the ship which the Athenians send to Delos happened to have been crowned on the day before he was tried.

Ech. What is this ship?

Phaed. It is the ship in which, according to Athenian tradition, Theseus went to Crete when he took with him the

Phaedo.

ECHECRATES, PHAEDO.

fourteen youths, and was the saviour of them and of himself. And they are said to have vowed to Apollo at the time, that if they were saved they would send a yearly mission to Delos. Now this custom still continues, and the whole period of the voyage to and from Delos, beginning when the priest of Apollo crowns the stern of the ship, is a holy season, during which the city is not allowed to be polluted by public executions; and when the vessel is detained by contrary winds, the time spent in going and returning is very considerable. As I was saying, the ship was crowned on the day before the trial, and this was the reason why Socrates lay in prison and was not put to death until long after he was condemned.

Ech. What was the manner of his death, Phaedo? What was said or done? And which of his friends were with him? Or did the authorities forbid them to be present — so that he had no friends near him when he died?

Phaed. No; there were several of them with him.

Phaedo is requested by Echecrates to give an account of the death of Socrates.

Ech. If you have nothing to do, I wish that you would tell me what passed, as exactly as you can.

Phaed. I have nothing at all to do, and will try to gratify your wish. To be reminded of Socrates is always the greatest delight to me, whether I speak myself or hear another speak of him.

Ech. You will have listeners who are of the same mind with you, and I hope that you will be as exact as you can.

He describes his noble and fearless demeanour.

Phaed. I had a singular feeling at being in his company. For I could hardly believe that I was present at the death of a friend, and therefore I did not pity him, Echecrates; he died so fearlessly, and his words and bearing were so noble and gracious, that to me he appeared blessed. I thought that in going to the other world he could not be without a divine call, and that he would be happy, if any man ever 59
was, when he arrived there; and therefore I did not pity him as might have seemed natural at such an hour. But I had not the pleasure which I usually feel in philosophical discourse (for philosophy was the theme of which we spoke). I was pleased, but in the pleasure there was also a strange admixture of pain; for I reflected that he was soon to die, and

this double feeling was shared by us all; we were laughing and weeping by turns, especially the excitable Apollodorus — you know the sort of man? *Phaedo.* ECHECRATES, PHAEDO.

Ech. Yes.

Phaed. He was quite beside himself; and I and all of us were greatly moved.

Ech. Who were present?

Phaed. Of native Athenians there were, besides Apollodorus, Critobulus and his father Crito, Hermogenes, Epigenes, Aeschines, Antisthenes; likewise Ctesippus of the deme of Paeania, Menexenus, and some others; Plato, if I am not mistaken, was ill. The Socratic circle: — the absence of Plato is noted.

Ech. Were there any strangers?

Phaed. Yes, there were; Simmias the Theban, and Cebes, and Phaedondes; Euclid and Terpsion, who came from Megara.

Ech. And was Aristippus there, and Cleombrotus?

Phaed. No, they were said to be in Aegina.

Ech. Any one else?

Phaed. I think that these were nearly all.

Ech. Well, and what did you talk about?

Phaed. I will begin at the beginning, and endeavour to repeat the entire conversation. On the previous days we had been in the habit of assembling early in the morning at the court in which the trial took place, and which is not far from the prison. There we used to wait talking with one another until the opening of the doors (for they were not opened very early); then we went in and generally passed the day with Socrates. On the last morning we assembled sooner than usual, having heard on the day before when we quitted the prison in the evening that the sacred ship had come from Delos; and so we arranged to meet very early at the accustomed place. On our arrival the jailer who answered the door, instead of admitting us, came out and told us to stay until he called us. 'For the Eleven,' he said, 'are now with Socrates; they are taking off his chains, and giving orders that he is to die to-day.' He soon returned
60 and said that we might come in. On entering we found Socrates just released from chains, and Xanthippè, whom you know, sitting by him, and holding his child in her arms.

The meeting at the prison.

The friends are denied admission while the Eleven are with Socrates.

Phaedo.

SOCRATES, CEBES.

When she saw us she uttered a cry and said, as women will: 'O Socrates, this is the last time that either you will converse with your friends, or they with you.' Socrates turned to Crito and said: 'Crito, let some one take her home.' Some of Crito's people accordingly led her away, crying out and beating herself. And when she was gone, Socrates, sitting up on the couch, bent and rubbed his leg, saying, as he was rubbing: How singular is the thing called pleasure, and how curiously related to pain, which might be thought to be the opposite of it; for they are never present to a man at the same instant, and yet he who pursues either is generally compelled to take the other; their bodies are two, but they are joined by a single head. And I cannot help thinking that if Aesop had remembered them, he would have made a fable about God trying to reconcile their strife, and how, when he could not, he fastened their heads together; and this is the reason why when one comes the other follows: as I know by my own experience now, when after the pain in my leg which was caused by the chain pleasure appears to succeed.

Socrates, whose chains have now been taken off, is led by the feeling of relief to remark on the curious manner in which pleasure and pain are always conjoined.

Upon this Cebes said: I am glad, Socrates, that you have mentioned the name of Aesop. For it reminds me of a question which has been asked by many, and was asked of me only the day before yesterday by Evenus the poet — he will be sure to ask it again, and therefore if you would like me to have an answer ready for him, you may as well tell me what I should say to him: — he wanted to know why you, who never before wrote a line of poetry, now that you are in prison are turning Aesop's fables into verse, and also composing that hymn in honour of Apollo.

Tell him, Cebes, he replied, what is the truth — that I had no idea of rivalling him or his poems; to do so, as I knew, would be no easy task. But I wanted to see whether I could purge away a scruple which I felt about the meaning of certain dreams. In the course of my life I have often had intimations in dreams 'that I should compose music.' The same dream came to me sometimes in one form, and sometimes in another, but always saying the same or nearly the same words: 'Cultivate and make music,' said the dream. And hitherto I had imagined that this was only intended to

Having been told in a dream that he should compose music, in order to satisfy a scruple about the meaning of the dream he has been

Phaedo.

SOCRATES, SIMMIAS, CEBES.

exhort and encourage me in the study of philosophy, which
61 has been the pursuit of my life, and is the noblest and best of music. The dream was bidding me do what I was already doing, in the same way that the competitor in a race is bidden by the spectators to run when he is already running. But I was not certain of this; for the dream might have meant music in the popular sense of the word, and being under sentence of death, and the festival giving me a respite, I thought that it would be safer for me to satisfy the scruple, and, in obedience to the dream, to compose a few verses before I departed. And first I made a hymn in honour of the god of the festival, and then considering that a poet, if he is really to be a poet, should not only put together words, but should invent stories, and that I have no invention, I took some fables of Aesop, which I had ready at hand and which I knew — they were the first I came upon — and turned them into verse. Tell this to Evenus, Cebes, and bid him be of good cheer; say that I would have him come after me if he be a wise man, and not tarry; and that to-day I am likely to be going, for the Athenians say that I must.

writing verses while he was in prison.

Evenus the poet had been curious to know why he had done so, and Socrates gives him the explanation, bidding him be of good cheer, and come after him. 'But he will not come.'

Simmias said: What a message for such a man! having been a frequent companion of his I should say that, as far as I know him, he will never take your advice unless he is obliged.

Why, said Socrates,— is not Evenus a philosopher?

I think that he is, said Simmias.

Then he, or any man who has the spirit of philosophy, will be willing to die; but he will not take his own life, for that is held to be unlawful.

Here he changed his position, and put his legs off the couch on to the ground, and during the rest of the conversation he remained sitting.

Why do you say, enquired Cebes, that a man ought not to take his own life, but that the philosopher will be ready to follow the dying?

Socrates replies that a philosopher like Evenus should be ready to

Socrates replied: And have you, Cebes and Simmias, who are the disciples of Philolaus, never heard him speak of this?

Yes, but his language was obscure, Socrates.

My words, too, are only an echo; but there is no reason why I should not repeat what I have heard: and indeed, as

Phaedo.

SOCRATES, SIMMIAS, CEBES.

I am going to another place, it is very meet for me to be thinking and talking of the nature of the pilgrimage which I am about to make. What can I do better in the interval between this and the setting of the sun?

die, though he must not take his own life.

Then tell me, Socrates, why is suicide held to be unlawful? as I have certainly heard Philolaus, about whom you were just now asking, affirm when he was staying with us at Thebes; and there are others who say the same, although I have never understood what was meant by any of them.

This incidental remark leads to a discussion on suicide.

Do not lose heart, replied Socrates, and the day may come 62
when you will understand. I suppose that you wonder why, when other things which are evil may be good at certain times and to certain persons, death is to be the only exception, and why, when a man is better dead, he is not permitted to be his own benefactor, but must wait for the hand of another.

Fery true, said Cebes, laughing gently and speaking in his native Boeotian.

Man is a prisoner who has no right to run away; and he is also a possession of the gods and must not rob his masters.

I admit the appearance of inconsistency in what I am saying; but there may not be any real inconsistency after all. There is a doctrine whispered in secret that man is a prisoner who has no right to open the door and run away; this is a great mystery which I do not quite understand. Yet I too believe that the gods are our guardians, and that we men are a possession of theirs. Do you not agree?

Yes, I quite agree, said Cebes.

And if one of your own possessions, an ox or an ass, for example, took the liberty of putting himself out of the way when you had given no intimation of your wish that he should die, would you not be angry with him, and would you not punish him if you could?

Certainly, replied Cebes.

Then, if we look at the matter thus, there may be reason in saying that a man should wait, and not take his own life until God summons him, as he is now summoning me.

And why should he wish to leave the best of services?

Yes, Socrates, said Cebes, there seems to be truth in what you say. And yet how can you reconcile this seemingly true belief that God is our guardian and we his possessions, with the willingness to die which you were just now attributing to the philosopher? That the wisest of men should be willing

to leave a service in which they are ruled by the gods who are the best of rulers, is not reasonable; for surely no wise man thinks that when set at liberty he can take better care of himself than the gods take of him. A fool may perhaps think so — he may argue that he had better run away from his master, not considering that his duty is to remain to the end, and not to run away from the good, and that there would be no sense in his running away. The wise man will want to be ever with him who is better than himself. Now this, Socrates, is the reverse of what was just now said; for upon this view the wise man should sorrow and the fool rejoice at passing out of life.

63 The earnestness of Cebes seemed to please Socrates. Here, said he, turning to us, is a man who is always enquiring, and is not so easily convinced by the first thing which he hears.

You yourself, Socrates, are too ready to run away.

And certainly, added Simmias, the objection which he is now making does appear to me to have some force. For what can be the meaning of a truly wise man wanting to fly away and lightly leave a master who is better than himself? And I rather imagine that Cebes is referring to you; he thinks that you are too ready to leave us, and too ready to leave the gods whom you acknowledge to be our good masters.

Yes, replied Socrates; there is reason in what you say. And so you think that I ought to answer your indictment as if I were in a court?

We should like you to do so, said Simmias.

Socrates replies that he is going to other gods who are wise and good.

Then I must try to make a more successful defence before you than I did before the judges. For I am quite ready to admit, Simmias and Cebes, that I ought to be grieved at death, if I were not persuaded in the first place that I am going to other gods who are wise and good (of which I am as certain as I can be of any such matters), and secondly (though I am not so sure of this last) to men departed, better than those whom I leave behind; and therefore I do not grieve as I might have done, for I have good hope that there is yet something remaining for the dead, and as has been said of old, some far better thing for the good than for the evil.

Phaedo.

SOCRATES, SIMMIAS, CRITO.

But do you mean to take away your thoughts with you, Socrates? said Simmias. Will you not impart them to us? — for they are a benefit in which we too are entitled to share. Moreover, if you succeed in convincing us, that will be an answer to the charge against yourself.

I will do my best, replied Socrates. But you must first let me hear what Crito wants; he has long been wishing to say something to me.

Only this, Socrates, replied Crito: — the attendant who is to give you the poison has been telling me, and he wants me to tell you, that you are not to talk much; talking, he says, increases heat, and this is apt to interfere with the action of the poison; persons who excite themselves are sometimes obliged to take a second or even a third dose.

Then, said Socrates, let him mind his business and be prepared to give the poison twice or even thrice if necessary; that is all.

I knew quite well what you would say, replied Crito; but I was obliged to satisfy him.

Never mind him, he said.

The true philosopher is always dying: — why then should he avoid the death which he desires?

And now, O my judges, I desire to prove to you that the real philosopher has reason to be of good cheer when he is about to die, and that after death he may hope to obtain the greatest good in the other world. And how this may be, Simmias and Cebes, I will endeavour to explain. For I deem that the true votary of philosophy is likely to be misunderstood by other men; they do not perceive that he is always pursuing death and dying; and if this be so, and he has had the desire of death all his life long, why when his time comes should he repine at that which he has been always pursuing and desiring? 64

'How the world will laugh when they hear this!'

Simmias said laughingly: Though not in a laughing humour, you have made me laugh, Socrates; for I cannot help thinking that the many when they hear your words will say how truly you have described philosophers, and our people at home will likewise say that the life which philosophers desire is in reality death, and that they have found them out to be deserving of the death which they desire.

Yes, they do not understand

And they are right, Simmias, in thinking so, with the exception of the words 'they have found them out;' for they

have not found out either what is the nature of that death which the true philosopher deserves, or how he deserves or desires death. But enough of them:—let us discuss the matter among ourselves. Do we believe that there is such a thing as death?

the nature of death, or why the philosopher desires or deserves it.

To be sure, replied Simmias.

Is it not the separation of soul and body? And to be dead is the completion of this; when the soul exists in herself, and is released from the body and the body is released from the soul, what is this but death?

Just so, he replied.

There is another question, which will probably throw light on our present enquiry if you and I can agree about it:—Ought the philosopher to care about the pleasures—if they are to be called pleasures—of eating and drinking?

Life is best when the soul is most freed from the concerns of the body, and is alone and by herself.

Certainly not, answered Simmias.

And what about the pleasures of love—should he care for them?

By no means.

And will he think much of the other ways of indulging the body, for example, the acquisition of costly raiment, or sandals, or other adornments of the body? Instead of caring about them, does he not rather despise anything more than nature needs? What do you say?

I should say that the true philosopher would despise them.

Would you not say that he is entirely concerned with the soul and not with the body? He would like, as far as he can, to get away from the body and to turn to the soul.

Quite true.

In matters of this sort philosophers, above all other men,
65 may be observed in every sort of way to dissever the soul from the communion of the body.

Very true.

Whereas, Simmias, the rest of the world are of opinion that to him who has no sense of pleasure and no part in bodily pleasure, life is not worth having; and that he who is indifferent about them is as good as dead.

That is also true.

What again shall we say of the actual acquirement of knowledge?—is the body, if invited to share in the enquiry,

Phaedo.

SOCRATES, SIMMIAS.

a hinderer or a helper? I mean to say, have sight and hearing any truth in them? Are they not, as the poets are always telling us, inaccurate witnesses? and yet, if even they are inaccurate and indistinct, what is to be said of the other senses?—for you will allow that they are the best of them?

The senses are untrustworthy guides: they mislead the soul in the search for truth.

Certainly, he replied.

Then when does the soul attain truth?—for in attempting to consider anything in company with the body she is obviously deceived.

True.

Then must not true existence be revealed to her in thought, if at all?

Yes.

And thought is best when the mind is gathered into herself and none of these things trouble her—neither sounds nor sights nor pain nor any pleasure,—when she takes leave of the body, and has as little as possible to do with it, when she has no bodily sense or desire, but is aspiring after true being?

Certainly.

And therefore the philosopher runs away from the body.

And in this the philosopher dishonours the body; his soul runs away from his body and desires to be alone and by herself?

That is true.

Another argument. The absolute truth of justice, beauty, and other ideas is not perceived by the senses, which only introduce a disturbing element.

Well, but there is another thing, Simmias: Is there or is there not an absolute justice?

Assuredly there is.

And an absolute beauty and absolute good?

Of course.

But did you ever behold any of them with your eyes?

Certainly not.

Or did you ever reach them with any other bodily sense?—and I speak not of these alone, but of absolute greatness, and health, and strength, and of the essence or true nature of everything. Has the reality of them ever been perceived by you through the bodily organs? or rather, is not the nearest approach to the knowledge of their several natures made by him who so orders his intellectual vision as to have the most exact conception of the essence of each thing which he considers?

Certainly.

And he attains to the purest knowledge of them who goes to each with the mind alone, not introducing or intruding in the act of thought sight or any other sense together with
66 reason, but with the very light of the mind in her own clearness searches into the very truth of each; he who has got rid, as far as he can, of eyes and ears and, so to speak, of the whole body, these being in his opinion distracting elements which when they infect the soul hinder her from acquiring truth and knowledge — who, if not he, is likely to attain to the knowledge of true being?

What you say has a wonderful truth in it, Socrates, replied Simmias.

The soul in herself must perceive things in themselves.

And when real philosophers consider all these things, will they not be led to make a reflection which they will express in words something like the following? 'Have we not found,' they will say, 'a path of thought which seems to bring us and our argument to the conclusion, that while we are in the body, and while the soul is infected with the evils of the body, our desire will not be satisfied? and our desire is of the truth. For the body is a source of endless trouble to us by reason of the mere requirement of food; and is liable also to diseases which overtake and impede us in the search after true being: it fills us full of loves, and lusts, and fears, and fancies of all kinds, and endless foolery, and in fact, as men say, takes away from us the power of thinking at all. Whence come wars, and fightings, and factions? whence but from the body and the lusts of the body? Wars are occasioned by the love of money, and money has to be acquired for the sake and in the service of the body; and by reason of all these impediments we have no time to give to philosophy; and, last and worst of all, even if we are at leisure and betake ourselves to some speculation, the body is always breaking in upon us, causing turmoil and confusion in our enquiries, and so amazing us that we are prevented from seeing the truth. It has been proved to us by experience that if we would have pure knowledge of anything we must be quit of the body — the soul in herself must behold things in themselves: and then we shall attain the wisdom which we desire, and of which we say that we are lovers; not while we live, but after

Phaedo.

SOCRATES, SIMMIAS.

death; for if while in company with the body, the soul cannot have pure knowledge, one of two things follows — either knowledge is not to be attained at all, or, if at all, after death. For then, and not till then, the soul will be parted 67
from the body and exist in herself alone. In this present life, I reckon that we make the nearest approach to knowledge when we have the least possible intercourse or communion with the body, and are not surfeited with the bodily nature, but keep ourselves pure until the hour when God himself is pleased to release us. And thus having got rid of the foolishness of the body we shall be pure and hold converse with the pure, and know of ourselves the clear light everywhere, which is no other than the light of truth.' For the impure are not permitted to approach the pure. These are the sort of words, Simmias, which the true lovers of knowledge cannot help saying to one another, and thinking. You would agree; would you not?

Undoubtedly, Socrates.

But, O my friend, if this be true, there is great reason to hope that, going whither I go, when I have come to the end of my journey, I shall attain that which has been the pursuit of my life. And therefore I go on my way rejoicing, and not I only, but every other man who believes that his mind has been made ready and that he is in a manner purified.

Certainly, replied Simmias.

Purification is the separation of the soul from the body.

And what is purification but the separation of the soul from the body, as I was saying before; the habit of the soul gathering and collecting herself into herself from all sides out of the body; the dwelling in her own place alone, as in another life, so also in this, as far as she can;— the release of the soul from the chains of the body?

Very true, he said.

And this separation and release of the soul from the body is termed death?

To be sure, he said.

And the true philosophers, and they only, are ever seeking to release the soul. Is not the separation and release of the soul from the body their especial study?

That is true.

And, as I was saying at first, there would be a ridiculous

contradiction in men studying to live as nearly as they can in a state of death, and yet repining when it comes upon them.

SOCRATES, SIMMIAS.

Clearly.

And the true philosophers, Simmias, are always occupied in the practice of dying, wherefore also to them least of all men is death terrible. Look at the matter thus:—if they have been in every way the enemies of the body, and are wanting to be alone with the soul, when this desire of theirs is granted, how inconsistent would they be if they trembled and repined, instead of rejoicing at their departure to that place where, when they arrive, they hope to gain that which
68 in life they desired—and this was wisdom—and at the same time to be rid of the company of their enemy. Many a man has been willing to go to the world below animated by the hope of seeing there an earthly love, or wife, or son, and conversing with them. And will he who is a true lover of wisdom, and is strongly persuaded in like manner that only in the world below he can worthily enjoy her, still repine at death? Will he not depart with joy? Surely he will, O my friend, if he be a true philosopher. For he will have a firm conviction that there, and there only, he can find wisdom in her purity. And if this be true, he would be very absurd, as I was saying, if he were afraid of death.

And therefore the true philosopher who has been always trying to disengage himself from the body will rejoice in death.

He would indeed, replied Simmias.

And when you see a man who is repining at the approach of death, is not his reluctance a sufficient proof that he is not a lover of wisdom, but a lover of the body, and probably at the same time a lover of either money or power, or both?

Quite so, he replied.

And is not courage, Simmias, a quality which is specially characteristic of the philosopher?

Certainly.

There is temperance again, which even by the vulgar is supposed to consist in the control and regulation of the passions, and in the sense of superiority to them—is not temperance a virtue belonging to those only who despise the body, and who pass their lives in philosophy?

He alone possesses the true secret of virtue, which in ordinary men is merely based on a calculation of lesser and greater evils.

Most assuredly.

For the courage and temperance of other men, if you will consider them, are really a contradiction.

Phaedo.

SOCRATES, SIMMIAS.

How so?

Well, he said, you are aware that death is regarded by men in general as a great evil.

Very true, he said.

And do not courageous men face death because they are afraid of yet greater evils?

That is quite true.

Ordinary men are courageous only from cowardice; temperate from intemperance.

Then all but the philosophers are courageous only from fear, and because they are afraid; and yet that a man should be courageous from fear, and because he is a coward, is surely a strange thing.

Very true.

And are not the temperate exactly in the same case? They are temperate because they are intemperate — which might seem to be a contradiction, but is nevertheless the sort of thing which happens with this foolish temperance. For there are pleasures which they are afraid of losing; and in their desire to keep them, they abstain from some pleasures, because they are overcome by others; and although to be conquered by pleasure is called by men intemperance, to 69
them the conquest of pleasure consists in being conquered by pleasure. And that is what I mean by saying that, in a sense, they are made temperate through intemperance.

Such appears to be the case.

True virtue is inseparable from wisdom.

Yet the exchange of one fear or pleasure or pain for another fear or pleasure or pain, and of the greater for the less, as if they were coins, is not the exchange of virtue. O my blessed Simmias, is there not one true coin for which all things ought to be exchanged?— and that is wisdom; and only in exchange for this, and in company with this, is anything truly bought or sold, whether courage or temperance or justice. And is not all true virtue the companion of wisdom, no matter what fears or pleasures or other similar goods or evils may or may not attend her? But the virtue which is made up of these goods, when they are severed from wisdom and exchanged with one another, is a shadow of virtue only, nor is there any freedom or health or truth in her; but in the true exchange there is a purging away of all these things, and temperance, and justice, and courage, and wisdom herself are the purgation of them. The founders of

the mysteries would appear to have had a real meaning, and were not talking nonsense when they intimated in a figure long ago that he who passes unsanctified and uninitiated into the world below will lie in a slough, but that he who arrives there after initiation and purification will dwell with the gods. For 'many,' as they say in the mysteries, 'are the thyrsus-bearers, but few are the mystics,'— meaning, as I interpret the words, 'the true philosophers.' In the number of whom, during my whole life, I have been seeking, according to my ability, to find a place;— whether I have sought in a right way or not, and whether I have succeeded or not, I shall truly know in a little while, if God will, when I myself arrive in the other world — such is my belief. And therefore I maintain that I am right, Simmias and Cebes, in not grieving or repining at parting from you and my masters in this world, for I believe that I shall equally find good masters and friends in another world. But most men do not believe this saying; if then I succeed in convincing you by my defence better than I did the Athenian judges, it will be well.

The thyrsus-bearers and the mystics.

Cebes answered: I agree, Socrates, in the greater part of
70 what you say. But in what concerns the soul, men are apt to be incredulous; they fear that when she has left the body her place may be nowhere, and that on the very day of death she may perish and come to an end — immediately on her release from the body, issuing forth dispersed like smoke or air and in her flight vanishing away into nothingness. If she could only be collected into herself after she has obtained release from the evils of which you were speaking, there would be good reason to hope, Socrates, that what you say is true. But surely it requires a great deal of argument and many proofs to show that when the man is dead his soul yet exists, and has any force or intelligence.

Fears are entertained lest the soul when she dies should be scattered to the winds.

True, Cebes, said Socrates; and shall I suggest that we converse a little of the probabilities of these things?

I am sure, said Cebes, that I should greatly like to know your opinion about them.

I reckon, said Socrates, that no one who heard me now, not even if he were one of my old enemies, the Comic poets, could accuse me of idle talking about matters in which I

The discussion suited to the occasion.

Phaedo.

SOCRATES, CEBES.

have no concern:— If you please, then, we will proceed with the enquiry.

Suppose we consider the question whether the souls of men after death are or are not in the world below. There comes into my mind an ancient doctrine which affirms that they go from hence into the other world, and returning hither, are born again from the dead. Now if it be true that the living come from the dead, then our souls must exist in the other world, for if not, how could they have been born again? And this would be conclusive, if there were any real evidence that the living are only born from the dead; but if this is not so, then other arguments will have to be adduced.

Very true, replied Cebes.

Then let us consider the whole question, not in relation to man only, but in relation to animals generally, and to plants, and to everything of which there is generation, and the proof will be easier. Are not all things which have opposites generated out of their opposites? I mean such things as good and evil, just and unjust — and there are innumerable other opposites which are generated out of opposites. And I want to show that in all opposites there is of necessity a similar alternation; I mean to say, for example, that anything which becomes greater must become greater after being less.

All things which have opposites are generated out of opposites.

True.

And that which becomes less must have been once greater and then have become less. 71

Yes.

And the weaker is generated from the stronger, and the swifter from the slower.

Very true.

And the worse is from the better, and the more just is from the more unjust.

Of course.

And is this true of all opposites? and are we convinced that all of them are generated out of opposites?

Yes.

And there are intermediate processes

And in this universal opposition of all things, are there not also two intermediate processes which are ever going on, from one to the other opposite, and back again; where there is a

greater and a less there is also an intermediate process of increase and diminution, and that which grows is said to wax, and that which decays to wane?

Yes, he said.

or passages into and out of one another, such as increase and diminution, division and composition, and the like.

And there are many other processes, such as division and composition, cooling and heating, which equally involve a passage into and out of one another. And this necessarily holds of all opposites, even though not always expressed in words — they are really generated out of one another, and there is a passing or process from one to the other of them?

Very true, he replied.

Well, and is there not an opposite of life, as sleep is the opposite of waking?

True, he said.

And what is it?

Death, he answered.

And these, if they are opposites, are generated the one from the other, and have their two intermediate processes also?

Of course.

Now, said Socrates, I will analyze one of the two pairs of opposites which I have mentioned to you, and also its intermediate processes, and you shall analyze the other to me. One of them I term sleep, the other waking. The state of sleep is opposed to the state of waking, and out of sleeping waking is generated, and out of waking, sleeping; and the process of generation is in the one case falling asleep, and in the other waking up. Do you agree?

I entirely agree.

Life is opposed to death, as waking is to sleeping, and in like manner they are generated from one another.

Then, suppose that you analyze life and death to me in the same manner. Is not death opposed to life?

Yes.

And they are generated one from the other?

Yes.

What is generated from the living?

The dead.

And what from the dead?

I can only say in answer — the living.

Then the living, whether things or persons, Cebes, are generated from the dead?

Phaedo.

SOCRATES, CEBES.

That is clear, he replied.

Then the inference is that our souls exist in the world below?

That is true.

And one of the two processes or generations is visible — for surely the act of dying is visible?

Surely, he said.

What then is to be the result? Shall we exclude the opposite process? and shall we suppose nature to walk on one leg only? Must we not rather assign to death some corresponding process of generation?

Certainly, he replied.

And what is that process?

Return to life.

And return to life, if there be such a thing, is the birth of the dead into the world of the living? 72

Quite true.

Then here is a new way by which we arrive at the conclusion that the living come from the dead, just as the dead come from the living; and this, if true, affords a most certain proof that the souls of the dead exist in some place out of which they come again.

Yes, Socrates, he said; the conclusion seems to flow necessarily out of our previous admissions.

If there were no compensation or return in nature, all things would pass into the state of death.

And that these admissions were not unfair, Cebes, he said, may be shown, I think, as follows: If generation were in a straight line only, and there were no compensation or circle in nature, no turn or return of elements into their opposites, then you know that all things would at last have the same form and pass into the same state, and there would be no more generation of them.

What do you mean? he said.

The sleeping Endymion would be unmeaning in a world of sleepers.

A simple thing enough, which I will illustrate by the case of sleep, he replied. You know that if there were no alternation of sleeping and waking, the tale of the sleeping Endymion would in the end have no meaning, because all other things would be asleep too, and he would not be distinguishable from the rest. Or if there were composition only, and no division of substances, then the chaos of Anaxagoras would come again. And in like manner, my

dear Cebes, if all things which partook of life were to die, and after they were dead remained in the form of death, and did not come to life again, all would at last die, and nothing would be alive — what other result could there be? For if the living spring from any other things, and they too die, must not all things at last be swallowed up in death?[1]

There is no escape, Socrates, said Cebes; and to me your argument seems to be absolutely true.

Yes, he said, Cebes, it is and must be so, in my opinion; and we have not been deluded in making these admissions; but I am confident that there truly is such a thing as living again, and that the living spring from the dead, and that the souls of the dead are in existence, and that the good souls have a better portion than the evil.

The doctrine of recollection implies a previous existence.

Cebes added: Your favourite doctrine, Socrates, that knowledge is simply recollection, if true, also necessarily implies a previous time in which we have learned that which we now recollect. But this would be impossible unless our
73 soul had been in some place before existing in the form of man; here then is another proof of the soul's immortality.

But tell me, Cebes, said Simmias, interposing, what arguments are urged in favour of this doctrine of recollection. I am not very sure at the moment that I remember them.

You put a question to a person, and he answers out of his own mind.

One excellent proof, said Cebes, is afforded by questions. If you put a question to a person in a right way, he will give a true answer of himself, but how could he do this unless there were knowledge and right reason already in him? And this is most clearly shown when he is taken to a diagram or to anything of that sort[2].

But if, said Socrates, you are still incredulous, Simmias, I would ask you whether you may not agree with me when you look at the matter in another way;— I mean, if you are still incredulous as to whether knowledge is recollection?

Incredulous I am not, said Simmias; but I want to have this doctrine of recollection brought to my own recollection, and, from what Cebes has said, I am beginning to recollect and be convinced: but I should still like to hear what you were going to say.

This is what I would say, he replied:— We should agree,

[1] But cp. Rep. x. 611 A. [2] Cp. Meno 83 ff.

Phaedo.

SOCRATES, SIMMIAS.

if I am not mistaken, that what a man recollects he must have known at some previous time.

Very true.

A person may recollect what he has never seen together with what he has seen. How is this?

And what is the nature of this knowledge or recollection? I mean to ask, Whether a person who, having seen or heard or in any way perceived anything, knows not only that, but has a conception of something else which is the subject, not of the same but of some other kind of knowledge, may not be fairly said to recollect that of which he has the conception?

What do you mean?

I mean what I may illustrate by the following instance:—The knowledge of a lyre is not the same as the knowledge of a man?

True.

Recollection is the knowledge of some person or thing derived from some other person or thing which may be either like or unlike them.

And yet what is the feeling of lovers when they recognize a lyre, or a garment, or anything else which the beloved has been in the habit of using? Do not they, from knowing the lyre, form in the mind's eye an image of the youth to whom the lyre belongs? And this is recollection. In like manner any one who sees Simmias may remember Cebes; and there are endless examples of the same thing.

Endless, indeed, replied Simmias.

And recollection is most commonly a process of recovering that which has been already forgotten through time and inattention.

Very true, he said.

Well; and may you not also from seeing the picture of a horse or a lyre remember a man? and from the picture of Simmias, you may be led to remember Cebes;

True.

Or you may also be led to the recollection of Simmias himself?

Quite so. 74

And in all these cases, the recollection may be derived from things either like or unlike?

It may be.

And when the recollection is derived from like things, then another consideration is sure to arise, which is — whether the likeness in any degree falls short or not of that which is recollected?

Very true, he said.

SOCRATES, SIMMIAS.

And shall we proceed a step further, and affirm that there is such a thing as equality, not of one piece of wood or stone with another, but that, over and above this, there is absolute equality? Shall we say so?

The imperfect equality of pieces of wood or stone suggests the perfect idea of equality.

Say so, yes, replied Simmias, and swear to it, with all the confidence in life.

And do we know the nature of this absolute essence?

To be sure, he said.

And whence did we obtain our knowledge? Did we not see equalities of material things, such as pieces of wood and stones, and gather from them the idea of an equality which is different from them? For you will acknowledge that there is a difference. Or look at the matter in another way:— Do not the same pieces of wood or stone appear at one time equal, and at another time unequal?

That is certain.

But are real equals ever unequal? or is the idea of equality the same as of inequality?

Impossible, Socrates.

Then these (so-called) equals are not the same with the idea of equality?

I should say, clearly not, Socrates.

And yet from these equals, although differing from the idea of equality, you conceived and attained that idea?

Very true, he said.

Which might be like, or might be unlike them?

Yes.

But that makes no difference: whenever from seeing one thing you conceived another, whether like or unlike, there must surely have been an act of recollection?

Very true.

But what would you say of equal portions of wood and stone, or other material equals? and what is the impression produced by them? Are they equals in the same sense in which absolute equality is equal? or do they fall short of this perfect equality in a measure?

Yes, he said, in a very great measure too.

But if the material equals when

And must we not allow, that when I or any one, looking at any object, observes that the thing which he sees aims at

Phaedo.

SOCRATES, SIMMIAS.

being some other thing, but falls short of, and cannot be, that other thing, but is inferior, he who makes this observation must have had a previous knowledge of that to which the other, although similar, was inferior?

Certainly.

And has not this been our own case in the matter of equals and of absolute equality?

Precisely.

compared to the ideal equality fall short of it, the ideal equality with which they are compared must be prior to them, though only known through the medium of them.

Then we must have known equality previously to the time when we first saw the material equals, and reflected that all these apparent equals strive to attain absolute equality, but fall short of it? 75

Very true.

And we recognize also that this absolute equality has only been known, and can only be known, through the medium of sight or touch, or of some other of the senses, which are all alike in this respect?

Yes, Socrates, as far as the argument is concerned, one of them is the same as the other.

From the senses then is derived the knowledge that all sensible things aim at an absolute equality of which they fall short?

Yes.

Then before we began to see or hear or perceive in any way, we must have had a knowledge of absolute equality, or we could not have referred to that standard the equals which are derived from the senses?— for to that they all aspire, and of that they fall short.

No other inference can be drawn from the previous statements.

And did we not see and hear and have the use of our other senses as soon as we were born?

Certainly.

That higher sense of equality must have been known to us before we were born, was forgotten at birth, and

Then we must have acquired the knowledge of equality at some previous time?

Yes.

That is to say, before we were born, I suppose?

True.

And if we acquired this knowledge before we were born, and were born having the use of it, then we also knew before

we were born and at the instant of birth not only the equal or the greater or the less, but all other ideas; for we are not speaking only of equality, but of beauty, goodness, justice, holiness, and of all which we stamp with the name of essence in the dialectical process, both when we ask and when we answer questions. Of all this we may certainly affirm that we acquired the knowledge before birth?

was recovered by the use of the senses.

We may.

But if, after having acquired, we have not forgotten what in each case we acquired, then we must always have come into life having knowledge, and shall always continue to know as long as life lasts — for knowing is the acquiring and retaining knowledge and not forgetting. Is not forgetting, Simmias, just the losing of knowledge?

Quite true, Socrates.

But if the knowledge which we acquired before birth was lost by us at birth, and if afterwards by the use of the senses we recovered what we previously knew, will not the process which we call learning be a recovering of the knowledge which is natural to us, and may not this be rightly termed recollection?

What is called learning therefore is only a recollection of ideas which we possessed in a previous state.

Very true.

76 So much is clear — that when we perceive something, either by the help of sight, or hearing, or some other sense, from that perception we are able to obtain a notion of some other thing like or unlike which is associated with it but has been forgotten. Whence, as I was saying, one of two alternatives follows: — either we had this knowledge at birth, and continued to know through life; or, after birth, those who are said to learn only remember, and learning is simply recollection.

Yes, that is quite true, Socrates.

And which alternative, Simmias, do you prefer? Had we the knowledge at our birth, or did we recollect the things which we knew previously to our birth?

I cannot decide at the moment.

At any rate you can decide whether he who has knowledge will or will not be able to render an account of his knowledge? What do you say?

Certainly, he will.

Phaedo.

SOCRATES, SIMMIAS.

But do you think that every man is able to give an account of these very matters about which we are speaking?

Would that they could, Socrates, but I rather fear that to-morrow, at this time, there will no longer be any one alive who is able to give an account of them such as ought to be given.

Then you are not of opinion, Simmias, that all men know these things?

Certainly not.

They are in process of recollecting that which they learned before?

Certainly.

But when did our souls acquire this knowledge?— not since we were born as men?

Certainly not.

And therefore, previously?

Yes.

But if so, our souls must have existed before they were in the form of man; or if not the souls, then not the ideas.

Then, Simmias, our souls must also have existed without bodies before they were in the form of man, and must have had intelligence.

Unless indeed you suppose, Socrates, that these notions are given us at the very moment of birth; for this is the only time which remains.

Yes, my friend, but if so, when do we lose them? for they are not in us when we are born — that is admitted. Do we lose them at the moment of receiving them, or if not at what other time?

No, Socrates, I perceive that I was unconsciously talking nonsense.

Then may we not say, Simmias, that if, as we are always repeating, there is an absolute beauty, and goodness, and an absolute essence of all things; and if to this, which is now discovered to have existed in our former state, we refer all our sensations, and with this compare them, finding these ideas to be pre-existent and our inborn possession — then our souls must have had a prior existence, but if not, there would be no force in the argument? There is the same proof that these ideas must have existed before we were born, as that our souls existed before we were born; and if not the ideas, then not the souls.

Yes, Socrates; I am convinced that there is precisely the same necessity for the one as for the other; and the argu-
77 ment retreats successfully to the position that the existence of the soul before birth cannot be separated from the existence of the essence of which you speak. For there is nothing which to my mind is so patent as that beauty, goodness, and the other notions of which you were just now speaking, have a most real and absolute existence; and I am satisfied with the proof.

Well, but is Cebes equally satisfied? for I must convince him too.

Simmias and Cebes are agreed in thinking that the previous existence of the soul is sufficiently proved, but not the future existence.

I think, said Simmias, that Cebes is satisfied: although he is the most incredulous of mortals, yet I believe that he is sufficiently convinced of the existence of the soul before birth. But that after death the soul will continue to exist is not yet proven even to my own satisfaction. I cannot get rid of the feeling of the many to which Cebes was referring — the feeling that when the man dies the soul will be dispersed, and that this may be the extinction of her. For admitting that she may have been born elsewhere, and framed out of other elements, and was in existence before entering the human body, why after having entered in and gone out again may she not herself be destroyed and come to an end?

Very true, Simmias, said Cebes; about half of what was required has been proven; to wit, that our souls existed before we were born: — that the soul will exist after death as well as before birth is the other half of which the proof is still wanting, and has to be supplied; when that is given the demonstration will be complete.

But if the soul passes from death to birth, she must exist after death as well as before birth.

But that proof, Simmias and Cebes, has been already given, said Socrates, if you put the two arguments together — I mean this and the former one, in which we admitted that everything living is born of the dead. For if the soul exists before birth, and in coming to life and being born can be born only from death and dying, must she not after death continue to exist, since she has to be born again? — Surely the proof which you desire has been already furnished. Still I suspect that you and Simmias would be glad to probe the argument further. Like children, you are haunted with

Phaedo.

SOCRATES, CEBES.

a fear that when the soul leaves the body, the wind may really blow her away and scatter her; especially if a man should happen to die in a great storm and not when the sky is calm.

Cebes answered with a smile: Then, Socrates, you must argue us out of our fears — and yet, strictly speaking, they are not our fears, but there is a child within us to whom death is a sort of hobgoblin: him too we must persuade not to be afraid when he is alone in the dark.

The fear that the soul will vanish into air must be charmed away.

Socrates said: Let the voice of the charmer be applied daily until you have charmed away the fear.

And where shall we find a good charmer of our fears, 78
Socrates, when you are gone?

Hellas, he replied, is a large place, Cebes, and has many good men, and there are barbarous races not a few: seek for him among them all, far and wide, sparing neither pains nor money; for there is no better way of spending your money. And you must seek among yourselves too; for you will not find others better able to make the search.

The search, replied Cebes, shall certainly be made. And now, if you please, let us return to the point of the argument at which we digressed.

By all means, replied Socrates; what else should I please?

Very good.

What is the element which is liable to be scattered?— Not the simple and unchangeable, but the composite and changing.

Must we not, said Socrates, ask ourselves what that is which, as we imagine, is liable to be scattered, and about which we fear? and what again is that about which we have no fear? And then we may proceed further to enquire whether that which suffers dispersion is or is not of the nature of soul — our hopes and fears as to our own souls will turn upon the answers to these questions.

Very true, he said.

Now the compound or composite may be supposed to be naturally capable, as of being compounded, so also of being dissolved; but that which is uncompounded, and that only, must be, if anything is, indissoluble.

Yes; I should imagine so, said Cebes.

And the uncompounded may be assumed to be the same

Phaedo.

SOCRATES, CEBES.

and unchanging, whereas the compound is always changing and never the same.

I agree, he said.

The soul and the ideas belong to the class of the unchanging, which is also the unseen.

Then now let us return to the previous discussion. Is that idea or essence, which in the dialectical process we define as essence or true existence — whether essence of equality, beauty, or anything else — are these essences, I say, liable at times to some degree of change? or are they each of them always what they are, having the same simple self-existent and unchanging forms, not admitting of variation at all, or in any way, or at any time?

They must be always the same, Socrates, replied Cebes.

And what would you say of the many beautiful — whether men or horses or garments or any other things which are named by the same names and may be called equal or beautiful,— are they all unchanging and the same always, or quite the reverse? May they not rather be described as almost always changing and hardly ever the same, either with themselves or with one another?

The latter, replied Cebes; they are always in a state of change.

79 And these you can touch and see and perceive with the senses, but the unchanging things you can only perceive with the mind — they are invisible and are not seen?

That is very true, he said.

Well then, added Socrates, let us suppose that there are two sorts of existences — one seen, the other unseen.

Let us suppose them.

The seen is the changing, and the unseen is the unchanging?

That may be also supposed.

And, further, is not one part of us body, another part soul?

To be sure.

And to which class is the body more alike and akin?

Clearly to the seen — no one can doubt that.

And is the soul seen or not seen?

Not by man, Socrates.

And what we mean by 'seen' and 'not seen' is that which is or is not visible to the eye of man?

Phaedo.

SOCRATES, CEBES.

Yes, to the eye of man.

And is the soul seen or not seen?

Not seen.

Unseen then?

Yes.

Then the soul is more like to the unseen, and the body to the seen?

That follows necessarily, Socrates.

The soul which is unseen, when she makes use of the bodily senses, is dragged down into the region of the changeable, and must return into herself before she can attain to true wisdom.

And were we not saying long ago that the soul when using the body as an instrument of perception, that is to say, when using the sense of sight or hearing or some other sense (for the meaning of perceiving through the body is perceiving through the senses) — were we not saying that the soul too is then dragged by the body into the region of the changeable, and wanders and is confused; the world spins round her, and she is like a drunkard, when she touches change?

Very true.

But when returning into herself she reflects, then she passes into the other world, the region of purity, and eternity, and immortality, and unchangeableness, which are her kindred, and with them she ever lives, when she is by herself and is not let or hindered; then she ceases from her erring ways, and being in communion with the unchanging is unchanging. And this state of the soul is called wisdom?

That is well and truly said, Socrates, he replied.

And to which class is the soul more nearly alike and akin, as far as may be inferred from this argument, as well as from the preceding one?

The soul is of the nature of the unchangeable, the body of the changing; the soul rules, the body serves; the soul is in the likeness of the divine, the body of the mortal.

I think, Socrates, that, in the opinion of every one who follows the argument, the soul will be infinitely more like the unchangeable — even the most stupid person will not deny that.

And the body is more like the changing?

Yes.

Yet once more consider the matter in another light: When the soul and the body are united, then nature orders 80
the soul to rule and govern, and the body to obey and serve. Now which of these two functions is akin to the divine? and which to the mortal? Does not the divine appear to

you to be that which naturally orders and rules, and the mortal to be that which is subject and servant?

True.

And which does the soul resemble?

The soul resembles the divine, and the body the mortal — there can be no doubt of that, Socrates.

Then reflect, Cebes: of all which has been said is not this the conclusion? — that the soul is in the very likeness of the divine, and immortal, and intellectual, and uniform, and indissoluble, and unchangeable; and that the body is in the very likeness of the human, and mortal, and unintellectual, and multiform, and dissoluble, and changeable. Can this, my dear Cebes, be denied?

It cannot.

But if it be true, then is not the body liable to speedy dissolution? and is not the soul almost or altogether indissoluble?

Certainly.

Even from the body something may be learned about the soul; for the corpse of a man lasts for some time, and when embalmed, in a manner for ever.

And do you further observe, that after a man is dead, the body, or visible part of him, which is lying in the visible world, and is called a corpse, and would naturally be dissolved and decomposed and dissipated, is not dissolved or decomposed at once, but may remain for some time, nay even for a long time, if the constitution be sound at the time of death, and the season of the year favourable? For the body when shrunk and embalmed, as the manner is in Egypt, may remain almost entire through infinite ages; and even in decay, there are still some portions, such as the bones and ligaments, which are practically indestructible: — Do you agree?

Yes.

How unlikely then that the soul should at once pass away!

And is it likely that the soul, which is invisible, in passing to the place of the true Hades, which like her is invisible, and pure, and noble, and on her way to the good and wise God, whither, if God will, my soul is also soon to go, — that the soul, I repeat, if this be her nature and origin, will be blown away and destroyed immediately on quitting the body, as the many say? That can never be, my dear Simmias and Cebes. The truth rather is, that the soul which is pure at departing and draws after her no bodily

Phaedo.

SOCRATES, CEBES.

taint, having never voluntarily during life had connection with the body, which she is ever avoiding, herself gathered into herself;—and making such abstraction her perpetual study—which means that she has been a true disciple of philo- 81
sophy; and therefore has in fact been always engaged in the practice of dying? For is not philosophy the study of death?—

Certainly—

Rather when free from bodily impurity she departs to the seats of the blessed.

That soul, I say, herself invisible, departs to the invisible world—to the divine and immortal and rational: thither arriving, she is secure of bliss and is released from the error and folly of men, their fears and wild passions and all other human ills, and for ever dwells, as they say of the initiated, in company with the gods[1]. Is not this true, Cebes?

Yes, said Cebes, beyond a doubt.

But the soul which has been polluted, and is impure at the time of her departure, and is the companion and servant of the body always, and is in love with and fascinated by the body and by the desires and pleasures of the body, until she is led to believe that the truth only exists in a bodily form, which a man may touch and see and taste, and use for the purposes of his lusts,—the soul, I mean, accustomed to hate and fear and avoid the intellectual principle, which to the bodily eye is dark and invisible, and can be attained only by philosophy;—do you suppose that such a soul will depart pure and unalloyed?

Impossible, he replied.

She is held fast by the corporeal, which the continual association and constant care of the body have wrought into her nature.

Very true.

But the souls of the wicked are dragged down by the corporeal element.

And this corporeal element, my friend, is heavy and weighty and earthy, and is that element of sight by which a soul is depressed and dragged down again into the visible world, because she is afraid of the invisible and of the world below—prowling about tombs and sepulchres, near which, as they tell us, are seen certain ghostly apparitions of souls

[1] Cp. Apol. 40 E.

which have not departed pure, but are cloyed with sight and therefore visible [1]. *Phaedo.*

SOCRATES, CEBES.

That is very likely, Socrates.

Yes, that is very likely, Cebes; and these must be the souls, not of the good, but of the evil, which are compelled to wander about such places in payment of the penalty of their former evil way of life; and they continue to wander until through the craving after the corporeal which never leaves them, they are imprisoned finally in another body. And they may be supposed to find their prisons in the same natures which they have had in their former lives.

What natures do you mean, Socrates?

What I mean is that men who have followed after gluttony, and wantonness, and drunkenness, and have had no thought of avoiding them, would pass into asses and animals of that
82 sort. What do you think?

They wander into the bodies of the animals or of birds which are of a like nature with themselves.

I think such an opinion to be exceedingly probable.

And those who have chosen the portion of injustice, and tyranny, and violence, will pass into wolves, or into hawks and kites;—whither else can we suppose them to go?

Yes, said Cebes; with such natures, beyond question.

And there is no difficulty, he said, in assigning to all of them places answering to their several natures and propensities?

There is not, he said.

Some are happier than others; and the happiest both in themselves and in the place to which they go are those who have practised the civil and social virtues which are called

[1] Compare Milton, Comus, 463 foll.: —

'But when lust,
By unchaste looks, loose gestures, and foul talk,
But most by lewd and lavish act of sin,
Lets in defilement to the inward parts,
The soul grows clotted by contagion,
Imbodies, and imbrutes, till she quite lose,
The divine property of her first being.
Such are those thick and gloomy shadows damp
Oft seen in charnel vaults and sepulchres,
Lingering, and sitting by a new made grave,
As loath to leave the body that it lov'd,
And linked itself by carnal sensuality
To a degenerate and degraded state.'

Phaedo.

SOCRATES, CEBES.

temperance and justice, and are acquired by habit and attention without philosophy and mind [1].

Why are they the happiest?

Because they may be expected to pass into some gentle and social kind which is like their own, such as bees or wasps or ants, or back again into the form of man, and just and moderate men may be supposed to spring from them.

Very likely.

No one who has not studied philosophy and who is not entirely pure at the time of his departure is allowed to enter the company of the Gods, but the lover of knowledge only. And this is the reason, Simmias and Cebes, why the true votaries of philosophy abstain from all fleshly lusts, and hold out against them and refuse to give themselves up to them,—not because they fear poverty or the ruin of their families, like the lovers of money, and the world in general; nor like the lovers of power and honour, because they dread the dishonour or disgrace of evil deeds.

No, Socrates, that would not become them, said Cebes.

No indeed, he replied; and therefore they who have any care of their own souls, and do not merely live moulding and fashioning the body, say farewell to all this; they will not walk in the ways of the blind: and when philosophy offers them purification and release from evil, they feel that they ought not to resist her influence, and whither she leads they turn and follow.

What do you mean, Socrates?

The new consciousness which is awakened by philosophy.

I will tell you, he said. The lovers of knowledge are conscious that the soul was simply fastened and glued to the body — until philosophy received her, she could only view real existence through the bars of a prison, not in and through herself; she was wallowing in the mire of every sort of ignorance, and by reason of lust had become the principal accomplice in her own captivity. This was her original 83
state; and then, as I was saying, and as the lovers of knowledge are well aware, philosophy, seeing how terrible was her confinement, of which she was to herself the cause, received and gently comforted her and sought to release her, pointing out that the eye and the ear and the other senses

[1] Cp. Rep. x. 619 C.

are full of deception, and persuading her to retire from them, and abstain from all but the necessary use of them, and be gathered up and collected into herself, bidding her trust in herself and her own pure apprehension of pure existence, and to mistrust whatever comes to her through other channels and is subject to variation; for such things are visible and tangible, but what she sees in her own nature is intelligible and invisible. And the soul of the true philosopher thinks that she ought not to resist this deliverance, and therefore abstains from pleasures and desires and pains and fears, as far as she is able; reflecting that when a man has great joys or sorrows or fears or desires, he suffers from them, not merely the sort of evil which might be anticipated — as for example, the loss of his health or property which he has sacrificed to his lusts — but an evil greater far, which is the greatest and worst of all evils, and one of which he never thinks.

The philosopher considers not only the consequences of pleasures and pains, but, what is far worse, the false lights in which they show objects.

What is it, Socrates? said Cebes.

The evil is that when the feeling of pleasure or pain is most intense, every soul of man imagines the objects of this intense feeling to be then plainest and truest: but this is not so, they are really the things of sight.

Very true.

And is not this the state in which the soul is most enthralled by the body?

How so?

Why, because each pleasure and pain is a sort of nail which nails and rivets the soul to the body, until she becomes like the body, and believes that to be true which the body affirms to be true; and from agreeing with the body and having the same delights she is obliged to have the same habits and haunts, and is not likely ever to be pure at her departure to the world below, but is always infected by the body; and so she sinks into another body and there germinates and grows, and has therefore no part in the communion of the divine and pure and simple.

Most true, Socrates, answered Cebes.

And this, Cebes, is the reason why the true lovers of knowledge are temperate and brave; and not for the reason which the world gives.

84 Certainly not.

Phaedo.

SOCRATES, CEBES, SIMMIAS.

The soul which has been emancipated from pleasures and pains will not be blown away at death.

Certainly not! The soul of a philosopher will reason in quite another way; she will not ask philosophy to release her in order that when released she may deliver herself up again to the thraldom of pleasures and pains, doing a work only to be undone again, weaving instead of unweaving her Penelope's web. But she will calm passion, and follow reason, and dwell in the contemplation of her, beholding the true and divine (which is not matter of opinion), and thence deriving nourishment. Thus she seeks to live while she lives, and after death she hopes to go to her own kindred and to that which is like her, and to be freed from human ills. Never fear, Simmias and Cebes, that a soul which has been thus nurtured and has had these pursuits, will at her departure from the body be scattered and blown away by the winds and be nowhere and nothing.

Simmias and Cebes have their doubts, but think that this is not the time to express them.

When Socrates had done speaking, for a considerable time there was silence; he himself appeared to be meditating, as most of us were, on what had been said; only Cebes and Simmias spoke a few words to one another. And Socrates observing them asked what they thought of the argument, and whether there was anything wanting? For, said he, there are many points still open to suspicion and attack, if any one were disposed to sift the matter thoroughly. Should you be considering some other matter I say no more, but if you are still in doubt do not hesitate to say exactly what you think, and let us have anything better which you can suggest; and if you think that I can be of any use, allow me to help you.

Simmias said: I must confess, Socrates, that doubts did arise in our minds, and each of us was urging and inciting the other to put the question which we wanted to have answered but which neither of us liked to ask, fearing that our importunity might be troublesome at such a time.

Socrates rebukes their want of confidence in him.

Socrates replied with a smile: O Simmias, what are you saying? I am not very likely to persuade other men that I do not regard my present situation as a misfortune, if I cannot even persuade you that I am no worse off now than at any other time in my life. Will you not allow that I have as much of the spirit of prophecy in me as the swans? For they, when they perceive that they must die, having sung all

What is the meaning of the swans' singing?

their life long, do then sing more lustily than ever, rejoicing
85 in the thought that they are about to go away to the god whose ministers they are. But men, because they are themselves afraid of death, slanderously affirm of the swans that they sing a lament at the last, not considering that no bird sings when cold, or hungry, or in pain, not even the nightingale, nor the swallow, nor yet the hoopoe; which are said indeed to tune a lay of sorrow, although I do not believe this to be true of them any more than of the swans. But because they are sacred to Apollo, they have the gift of prophecy, and anticipate the good things of another world; wherefore they sing and rejoice in that day more than ever they did before. And I too, believing myself to be the consecrated servant of the same God, and the fellow-servant of the swans, and thinking that I have received from my master gifts of prophecy which are not inferior to theirs, would not go out of life less merrily than the swans. Never mind then, if this be your only objection, but speak and ask anything which you like, while the eleven magistrates of Athens allow.

They do not lament, as men suppose, at their approaching death; but they rejoice because they are going to the God, whose servants they are.

Socrates, who is their fellow-servant, will not leave the world less cheerily.

Very good, Socrates, said Simmias; then I will tell you my difficulty, and Cebes will tell you his. I feel myself (and I daresay that you have the same feeling), how hard or rather impossible is the attainment of any certainty about questions such as these in the present life. And yet I should deem him a coward who did not prove what is said about them to the uttermost, or whose heart failed him before he had examined them on every side. For he should persevere until he has achieved one of two things: either he should discover, or be taught the truth about them; or, if this be impossible, I would have him take the best and most irrefragable of human theories, and let this be the raft upon which he sails through life — not without risk, as I admit, if he cannot find some word of God which will more surely and safely carry him. And now, as you bid me, I will venture to question you, and then I shall not have to reproach myself hereafter with not having said at the time what I think. For when I consider the matter, either alone or with Cebes, the argument does certainly appear to me, Socrates, to be not sufficient.

Simmias insists that they must probe truth to the bottom.

Phaedo.

SOCRATES, SIMMIAS.

The harmony does not survive the lyre; how then can the soul, which is also a harmony, survive the body?

Socrates answered: I dare say, my friend, that you may be right, but I should like to know in what respect the argument is insufficient.

In this respect, replied Simmias:—Suppose a person to use the same argument about harmony and the lyre—might he not say that harmony is a thing invisible, incorporeal, perfect, divine, existing in the lyre which is harmonized, but 86
that the lyre and the strings are matter and material, composite, earthy, and akin to mortality? And when some one breaks the lyre, or cuts and rends the strings, then he who takes this view would argue as you do, and on the same analogy, that the harmony survives and has not perished—you cannot imagine, he would say, that the lyre without the strings, and the broken strings themselves which are mortal remain, and yet that the harmony, which is of heavenly and immortal nature and kindred, has perished—perished before the mortal. The harmony must still be somewhere, and the wood and strings will decay before anything can happen to that. The thought, Socrates, must have occurred to your own mind that such is our conception of the soul; and that when the body is in a manner strung and held together by the elements of hot and cold, wet and dry, then the soul is the harmony or due proportionate admixture of them. But if so, whenever the strings of the body are unduly loosened or overstrained through disease or other injury, then the soul, though most divine, like other harmonies of music or works of art, of course perishes at once; although the material remains of the body may last for a considerable time, until they are either decayed or burnt. And if any one maintains that the soul, being the harmony of the elements of the body, is first to perish in that which is called death, how shall we answer him?

Socrates looked fixedly at us as his manner was, and said with a smile: Simmias has reason on his side; and why does not some one of you who is better able than myself answer him? for there is force in his attack upon me. But perhaps, before we answer him, we had better also hear what Cebes has to say that we may gain time for reflection, and when they have both spoken, we may either assent to them, if there is truth in what they say, or if not, we will maintain

SOCRATES, CEBES.

our position. Please to tell me then, Cebes, he said, what was the difficulty which troubled you?

Cebes said: I will tell you. My feeling is that the argument is where it was, and open to the same objections which
87 were urged before; for I am ready to admit that the existence of the soul before entering into the bodily form has been very ingeniously, and, if I may say so, quite sufficiently proven; but the existence of the soul after death is still, in my judgment, unproven. Now my objection is not the same as that of Simmias; for I am not disposed to deny that the soul is stronger and more lasting than the body, being of opinion that in all such respects the soul very far excels the body. Well then, says the argument to me, why do you remain unconvinced?—When you see that the weaker continues in existence after the man is dead, will you not admit that the more lasting must also survive during the same period of time? Now I will ask you to consider whether the objection, which, like Simmias, I will express in a figure, is of any weight. The analogy which I will adduce is that of an old weaver, who dies, and after his death somebody says:—He is not dead, he must be alive;—see, there is the coat which he himself wove and wore, and which remains whole and undecayed. And then he proceeds to ask of some one who is incredulous, whether a man lasts longer, or the coat which is in use and wear; and when he is answered that a man lasts far longer, thinks that he has thus certainly demonstrated the survival of the man, who is the more lasting, because the less lasting remains. But that, Simmias, as I would beg you to remark, is a mistake; any one can see that he who talks thus is talking nonsense. For the truth is, that the weaver aforesaid, having woven and worn many such coats, outlived several of them; and was outlived by the last; but a man is not therefore proved to be slighter and weaker than a coat. Now the relation of the body to the soul may be expressed in a similar figure; and any one may very fairly say in like manner that the soul is lasting, and the body weak and shortlived in comparison. He may argue in like manner that every soul wears out many bodies, especially if a man live many years. While he is alive the body deliquesces and decays, and the soul always weaves another

A weaver may outlive many coats and himself be outlived by the last:

so the soul which has passed through many bodies may in the end be worn out.

Phaedo.

SOCRATES, CEBES, ECHECRATES.

garment and repairs the waste. But of course, whenever the soul perishes, she must have on her last garment, and this will survive her; and then at length, when the soul is dead, the body will show its native weakness, and quickly decompose and pass away. I would therefore rather not rely on the argument from superior strength to prove the continued existence of the soul after death. For granting 88
even more than you affirm to be possible, and acknowledging not only that the soul existed before birth, but also that the souls of some exist, and will continue to exist after death, and will be born and die again and again, and that there is a natural strength in the soul which will hold out and be born many times — nevertheless, we may be still inclined to think that she will weary in the labours of successive births, and may at last succumb in one of her deaths and utterly perish; and this death and dissolution of the body which brings destruction to the soul may be unknown to any of us, for no one of us can have had any experience of it: and if so, then I maintain that he who is confident about death has but a foolish confidence, unless he is able to prove that the soul is altogether immortal and imperishable. But if he cannot prove the soul's immortality, he who is about to die will always have reason to fear that when the body is disunited, the soul also may utterly perish.

The despair of the audience at hearing the overthrow of the argument.

All of us, as we afterwards remarked to one another, had an unpleasant feeling at hearing what they said. When we had been so firmly convinced before, now to have our faith shaken seemed to introduce a confusion and uncertainty, not only into the previous argument, but into any future one; either we were incapable of forming a judgment, or there were no grounds of belief.

Ech. There I feel with you — by heaven I do, Phaedo, and when you were speaking, I was beginning to ask myself the same question: What argument can I ever trust again? For what could be more convincing than the argument of Socrates, which has now fallen into discredit? That the soul is a harmony is a doctrine which has always had a wonderful attraction for me, and, when mentioned, came back to me at once, as my own original conviction. And now I must begin again and find another argument which will assure me that when

Phaedo.

SOCRATES, PHAEDO, ECHECRATES.

the man is dead the soul survives. Tell me, I implore you, how did Socrates proceed? Did he appear to share the unpleasant feeling which you mention? or did he calmly meet the attack? And did he answer forcibly or feebly? Narrate what passed as exactly as you can.

The wonderful manner in which Socrates soothes his disappointed hearers and rehabilitates the argument.

Phaed. Often, Echecrates, I have wondered at Socrates, 89 but never more than on that occasion. That he should be able to answer was nothing, but what astonished me was, first, the gentle and pleasant and approving manner in which he received the words of the young men, and then his quick sense of the wound which had been inflicted by the argument, and the readiness with which he healed it. He might be compared to a general rallying his defeated and broken army, urging them to accompany him and return to the field of argument.

Ech. What followed?

Phaed. You shall hear, for I was close to him on his right hand, seated on a sort of stool, and he on a couch which was a good deal higher. He stroked my head, and pressed the hair upon my neck — he had a way of playing with my hair; and then he said: To-morrow, Phaedo, I suppose that these fair locks of yours will be severed.

Yes, Socrates, I suppose that they will, I replied.

Not so, if you will take my advice.

What shall I do with them? I said.

To-day, he replied, and not to-morrow, if this argument dies and we cannot bring it to life again, you and I will both shave our locks: and if I were you, and the argument got away from me, and I could not hold my ground against Simmias and Cebes, I would myself take an oath, like the Argives, not to wear hair any more until I had renewed the conflict and defeated them.

Yes, I said; but Heracles himself is said not to be a match for two.

Summon me then, he said, and I will be your Iolaus until the sun goes down.

I summon you rather, I rejoined, not as Heracles summoning Iolaus, but as Iolaus might summon Heracles.

That will do as well, he said. But first let us take care that we avoid a danger.

Phaedo.

SOCRATES, PHAEDO.

Of what nature? I said.

Lest we become misologists, he replied: no worse thing can happen to a man than this. For as there are misanthropists or haters of men, there are also misologists or haters of ideas, and both spring from the same cause, which is ignorance of the world. Misanthropy arises out of the too great confidence of inexperience;—you trust a man and think him altogether true and sound and faithful, and then in a little while he turns out to be false and knavish; and then another and another, and when this has happened several times to a man, especially when it happens among those whom he deems to be his own most trusted and familiar friends, and he has often quarrelled with them, he at last hates all men, and believes that no one has any good in him at all. You must have observed this trait of character?

The danger of becoming haters of ideas greater than of becoming haters of men.

I have.

And is not the feeling discreditable? Is it not obvious that such an one having to deal with other men, was clearly without any experience of human nature; for experience would have taught him the true state of the case, that few are the good and few the evil, and that the great majority are in 90 the interval between them.

There are few very bad or very good men; (although bad arguments may be more numerous than bad men): the main point is that he who has been often deceived by either is apt to lose faith in them.

What do you mean? I said.

I mean, he replied, as you might say of the very large and very small—that nothing is more uncommon than a very large or very small man; and this applies generally to all extremes, whether of great and small, or swift and slow, or fair and foul, or black and white: and whether the instances you select be men or dogs or anything else, few are the extremes, but many are in the mean between them. Did you never observe this?

Yes, I said, I have.

And do you not imagine, he said, that if there were a competition in evil, the worst would be found to be very few?

Yes, that is very likely, I said.

Yes, that is very likely, he replied; although in this respect arguments are unlike men—there I was led on by you to say more than I had intended; but the point of comparison was, that when a simple man who has no skill in dialectics believes an argument to be true which he afterwards

imagines to be false, whether really false or not, and then another and another, he has no longer any faith left, and great disputers, as you know, come to think at last that they have grown to be the wisest of mankind; for they alone perceive the utter unsoundness and instability of all arguments, or indeed, of all things, which, like the currents in the Euripus, are going up and down in never-ceasing ebb and flow. *Phaedo.* SOCRATES, PHAEDO.

That is quite true, I said.

Yes, Phaedo, he replied, and how melancholy, if there be such a thing as truth or certainty or possibility of knowledge — that a man should have lighted upon some argument or other which at first seemed true and then turned out to be false, and instead of blaming himself and his own want of wit, because he is annoyed, should at last be too glad to transfer the blame from himself to arguments in general: and for ever afterwards should hate and revile them, and lose truth and the knowledge of realities.

Yes, indeed, I said; that is very melancholy.

Let us then, in the first place, he said, be careful of allowing or of admitting into our souls the notion that there is no health or soundness in any arguments at all. Rather say that we have not yet attained to soundness in ourselves, and that we must struggle manfully and do our best to gain health of mind — you and all other men having regard to the whole of your future life, and I myself in the prospect of death. For
91 at this moment I am sensible that I have not the temper of a philosopher; like the vulgar, I am only a partisan. Now the partisan, when he is engaged in a dispute, cares nothing about the rights of the question, but is anxious only to convince his hearers of his own assertions. And the difference between him and me at the present moment is merely this — that whereas he seeks to convince his hearers that what he says is true, I am rather seeking to convince myself; to convince my hearers is a secondary matter with me. And do but see how much I gain by the argument. For if what I say is true, then I do well to be persuaded of the truth; but if there be nothing after death, still, during the short time that remains, I shall not distress my friends with lamentations, and my ignorance will not last, but will die with me,

Socrates, who is soon to die, has too much at stake on the argument to be a fair judge. Simmias and Cebes must help him to consider the matter impartially.

Phaedo.

SOCRATES, CEBES, SIMMIAS.

and therefore no harm will be done. This is the state of mind, Simmias and Cebes, in which I approach the argument. And I would ask you to be thinking of the truth and not of Socrates: agree with me, if I seem to you to be speaking the truth; or if not, withstand me might and main, that I may not deceive you as well as myself in my enthusiasm, and like the bee, leave my sting in you before I die.

Simmias and Cebes are inclined to fear that the soul may perish before the body, but they still hold to the doctrine of reminiscence.

And now let us proceed, he said. And first of all let me be sure that I have in my mind what you were saying. Simmias, if I remember rightly, has fears and misgivings whether the soul, although a fairer and diviner thing than the body, being as she is in the form of harmony, may not perish first. On the other hand, Cebes appeared to grant that the soul was more lasting than the body, but he said that no one could know whether the soul, after having worn out many bodies, might not perish herself and leave her last body behind her; and that this is death, which is the destruction not of the body but of the soul, for in the body the work of destruction is ever going on. Are not these, Simmias and Cebes, the points which we have to consider?

They both agreed to this statement of them.

He proceeded: And did you deny the force of the whole preceding argument, or of a part only?

Of a part only, they replied.

And what did you think, he said, of that part of the argument in which we said that knowledge was recollection, and hence inferred that the soul must have previously existed somewhere else before she was enclosed in the 92
body?

Cebes said that he had been wonderfully impressed by that part of the argument, and that his conviction remained absolutely unshaken. Simmias agreed, and added that he himself could hardly imagine the possibility of his ever thinking differently.

The elements of harmony are prior to harmony, but the body is not prior to the soul.

But, rejoined Socrates, you will have to think differently, my Theban friend, if you still maintain that harmony is a compound, and that the soul is a harmony which is made out of strings set in the frame of the body; for you will surely never allow yourself to say that a harmony is prior to the elements which compose it.

Never, Socrates.

But do you not see that this is what you imply when you say that the soul existed before she took the form and body of man, and was made up of elements which as yet had no existence? For harmony is not like the soul, as you suppose; but first the lyre, and the strings, and the sounds exist in a state of discord, and then harmony is made last of all, and perishes first. And how can such a notion of the soul as this agree with the other?

Not at all, replied Simmias.

And yet, he said, there surely ought to be harmony in a discourse of which harmony is the theme?

There ought, replied Simmias.

But there is no harmony, he said, in the two propositions that knowledge is recollection, and that the soul is a harmony. Which of them will you retain?

Simmias acknowledges that his argument does not harmonize with the proposition that knowledge is recollection.

I think, he replied, that I have a much stronger faith, Socrates, in the first of the two, which has been fully demonstrated to me, than in the latter, which has not been demonstrated at all, but rests only on probable and plausible grounds; and is therefore believed by the many. I know too well that these arguments from probabilities are impostors, and unless great caution is observed in the use of them, they are apt to be deceptive — in geometry, and in other things too. But the doctrine of knowledge and recollection has been proven to me on trustworthy grounds: and the proof was that the soul must have existed before she came into the body, because to her belongs the essence of which the very name implies existence. Having, as I am convinced, rightly accepted this conclusion, and on sufficient grounds, I must, as I suppose, cease to argue or allow others to argue that the soul is a harmony.

Let me put the matter, Simmias, he said, in another point
93 of view: Do you imagine that a harmony or any other composition can be in a state other than that of the elements, out of which it is compounded?

Certainly not.

Or do or suffer anything other than they do or suffer?

He agreed.

Then a harmony does not, properly speaking, lead the

Phaedo.

SOCRATES, SIMMIAS.

parts or elements which make up the harmony, but only follows them.

He assented.

For harmony cannot possibly have any motion, or sound, or other quality which is opposed to its parts.

That would be impossible, he replied.

And does not the nature of every harmony depend upon the manner in which the elements are harmonized?

I do not understand you, he said.

Harmony admits of degrees, but in the soul there are no degrees;

I mean to say that a harmony admits of degrees, and is more of a harmony, and more completely a harmony, when more truly and fully harmonized, to any extent which is possible; and less of a harmony, and less completely a harmony, when less truly and fully harmonized.

True.

But does the soul admit of degrees? or is one soul in the very least degree more or less, or more or less completely, a soul than another?

Not in the least.

Yet surely of two souls, one is said to have intelligence and virtue, and to be good, and the other to have folly and vice, and to be an evil soul: and this is said truly?

Yes, truly.

and therefore there cannot be a soul or harmony within a soul.

But what will those who maintain the soul to be a harmony say of this presence of virtue and vice in the soul?—will they say that here is another harmony, and another discord, and that the virtuous soul is harmonized, and herself being a harmony has another harmony within her, and that the vicious soul is inharmonical and has no harmony within her?

I cannot tell, replied Simmias; but I suppose that something of the sort would be asserted by those who say that the soul is a harmony.

And we have already admitted that no soul is more a soul than another; which is equivalent to admitting that harmony is not more or less harmony, or more or less completely a harmony?

Quite true.

And that which is not more or less a harmony is not more or less harmonized?

True.

And that which is not more or less harmonized cannot have more or less of harmony, but only an equal harmony?

Yes, an equal harmony.

Then one soul not being more or less absolutely a soul than another, is not more or less harmonized?

Exactly.

And therefore has neither more nor less of discord, nor yet of harmony?

She has not.

And having neither more nor less of harmony or of discord, one soul has no more vice or virtue than another, if vice be discord and virtue harmony?

Not at all more.

94 Or speaking more correctly, Simmias, the soul, if she is a harmony, will never have any vice; because a harmony, being absolutely a harmony, has no part in the inharmonical.

No.

If the soul is a harmony, all souls must be equally good.

And therefore a soul which is absolutely a soul has no vice?

How can she have, if the previous argument holds?

Then, if all souls are equally by their nature souls, all souls of all living creatures will be equally good?

I agree with you, Socrates, he said.

And can all this be true, think you? he said; for these are the consequences which seem to follow from the assumption that the soul is a harmony?

It cannot be true.

Once more, he said, what ruler is there of the elements of human nature other than the soul, and especially the wise soul? Do you know of any?

Indeed, I do not.

And is the soul in agreement with the affections of the body? or is she at variance with them? For example, when the body is hot and thirsty, does not the soul incline us against drinking? and when the body is hungry, against eating? And this is only one instance out of ten thousand of the opposition of the soul to the things of the body.

Very true.

But we have already acknowledged that the soul, being a harmony, can never utter a note at variance with the tensions

Phaedo.

SOCRATES, SIMMIAS, CEBES.

and relaxations and vibrations and other affections of the strings out of which she is composed; she can only follow, she cannot lead them?

It must be so, he replied.

The soul leads and does not follow. She constrains and reprimands the passions.

And yet do we not now discover the soul to be doing the exact opposite — leading the elements of which she is believed to be composed; almost always opposing and coercing them in all sorts of ways throughout life, sometimes more violently with the pains of medicine and gymnastic; then again more gently; now threatening, now admonishing the desires, passions, fears, as if talking to a thing which is not herself, as Homer in the Odyssee represents Odysseus doing in the words —

> 'He beat his breast, and thus reproached his heart:
> Endure, my heart; far worse hast thou endured!'

Do you think that Homer wrote this under the idea that the soul is a harmony capable of being led by the affections of the body, and not rather of a nature which should lead and master them — herself a far diviner thing than any harmony?

Yes, Socrates, I quite think so.

Then, my friend, we can never be right in saying that the soul is a harmony, for we should contradict the divine 95
Homer, and contradict ourselves.

True, he said.

Thus much, said Socrates, of Harmonia, your Theban goddess, who has graciously yielded to us; but what shall I say, Cebes, to her husband Cadmus, and how shall I make peace with him?

I think that you will discover a way of propitiating him, said Cebes; I am sure that you have put the argument with Harmonia in a manner that I could never have expected. For when Simmias was mentioning his difficulty, I quite imagined that no answer could be given to him, and therefore I was surprised at finding that his argument could not sustain the first onset of yours, and not impossibly the other, whom you call Cadmus, may share a similar fate.

Nay, my good friend, said Socrates, let us not boast, lest some evil eye should put to flight the word which I am about to speak. That, however, may be left in the hands of those

above; while I draw near in Homeric fashion, and try the mettle of your words. Here lies the point:— You want to have it proven to you that the soul is imperishable and immortal, and the philosopher who is confident in death appears to you to have but a vain and foolish confidence, if he believes that he will fare better in the world below than one who has led another sort of life, unless he can prove this: and you say that the demonstration of the strength and divinity of the soul, and of her existence prior to our becoming men, does not necessarily imply her immortality. Admitting the soul to be longlived, and to have known and done much in a former state, still she is not on that account immortal; and her entrance into the human form may be a sort of disease which is the beginning of dissolution, and may at last, after the toils of life are over, end in that which is called death. And whether the soul enters into the body once only or many times, does not, as you say, make any difference in the fears of individuals. For any man, who is not devoid of sense, must fear, if he has no knowledge and can give no account of the soul's immortality. This, or something like this, I suspect to be your notion, Cebes; and I designedly recur to it in order that nothing may escape us, and that you may, if you wish, add or subtract anything.

Phaedo.

SOCRATES, CEBES.

Recapitulation of the argument of Cebes.

But, said Cebes, as far as I see at present, I have nothing to add or subtract: I mean what you say that I mean.

Socrates paused awhile, and seemed to be absorbed in reflection. At length he said: You are raising a tremendous question, Cebes, involving the whole nature of
96 generation and corruption, about which, if you like, I will give you my own experience; and if anything which I say is likely to avail towards the solution of your difficulty you may make use of it.

I should very much like, said Cebes, to hear what you have to say.

Then I will tell you, said Socrates. When I was young, Cebes, I had a prodigious desire to know that department of philosophy which is called the investigation of nature; to know the causes of things, and why a thing is and is created or destroyed appeared to me to be a lofty profession; and I was always agitating myself with the con-

The speculations of Socrates about physics made him forget the commonest things.

Phaedo.
SOCRATES, CEBES.

sideration of questions such as these:—Is the growth of animals the result of some decay which the hot and cold principle contracts, as some have said? Is the blood the element with which we think, or the air, or the fire? or perhaps nothing of the kind—but the brain may be the originating power of the perceptions of hearing and sight and smell, and memory and opinion may come from them, and science may be based on memory and opinion when they have attained fixity. And then I went on to examine the corruption of them, and then to the things of heaven and earth, and at last I concluded myself to be utterly and absolutely incapable of these enquiries, as I will satisfactorily prove to you. For I was fascinated by them to such a degree that my eyes grew blind to things which I had seemed to myself, and also to others, to know quite well; I forgot what I had before thought self-evident truths; e. g. such a fact as that the growth of man is the result of eating and drinking; for when by the digestion of food flesh is added to flesh and bone to bone, and whenever there is an aggregation of congenial elements, the lesser bulk becomes larger and the small man great. Was not that a reasonable notion?

Yes, said Cebes, I think so.

Difficulty of explaining relative notions.

Well; but let me tell you something more. There was a time when I thought that I understood the meaning of greater and less pretty well; and when I saw a great man standing by a little one, I fancied that one was taller than the other by a head; or one horse would appear to be greater than another horse: and still more clearly did I seem to perceive that ten is two more than eight, and that two cubits are more than one, because two is the double of one.

And what is now your notion of such matters? said Cebes.

I should be far enough from imagining, he replied, that I knew the cause of any of them, by heaven I should; for I cannot satisfy myself that, when one is added to one, the one to which the addition is made becomes two, or that the two 97
units added together make two by reason of the addition. I cannot understand how, when separated from the other, each of them was one and not two, and now, when they are brought together, the mere juxtaposition or meeting of them should be the cause of their becoming two: neither can I

understand how the division of one is the way to make two; for then a different cause would produce the same effect,— as in the former instance the addition and juxtaposition of one to one was the cause of two, in this the separation and subtraction of one from the other would be the cause. Nor am I any longer satisfied that I understand the reason why one or anything else is either generated or destroyed or is at all, but I have in my mind some confused notion of a new method, and can never admit the other. *Phaedo.* SOCRATES.

Then I heard some one reading, as he said, from a book of Anaxagoras, that mind was the disposer and cause of all, and I was delighted at this notion, which appeared quite admirable, and I said to myself: If mind is the disposer, mind will dispose all for the best, and put each particular in the best place; and I argued that if any one desired to find out the cause of the generation or destruction or existence of anything, he must find out what state of being or doing or suffering was best for that thing, and therefore a man had only to consider the best for himself and others, and then he would also know the worse, since the same science comprehended both. And I rejoiced to think that I had found in Anaxagoras a teacher of the causes of existence such as I desired, and I imagined that he would tell me first whether the earth is flat or round; and whichever was true, he would proceed to explain the cause and the necessity of this being so, and then he would teach me the nature of the best and show that this was best; and if he said that the earth was in the centre, he would further explain that this position was the best, and I should be satisfied with the explanation 98 given, and not want any other sort of cause. And I thought that I would then go on and ask him about the sun and moon and stars, and that he would explain to me their comparative swiftness, and their returnings and various states, active and passive, and how all of them were for the best. For I could not imagine that when he spoke of mind as the disposer of them, he would give any other account of their being as they are, except that this was best; and I thought that when he had explained to me in detail the cause of each and the cause of all, he would go on to explain to me what was best for each and what was good for all. These hopes I would

The great expectations which Socrates had from the doctrine of Anaxagoras, that all was Mind.

Phaedo. SOCRATES. not have sold for a large sum of money, and I seized the books and read them as fast as I could in my eagerness to know the better and the worse.

The greatness of his disappointment.

What expectations I had formed, and how grievously was I disappointed! As I proceeded, I found my philosopher altogether forsaking mind or any other principle of order, but having recourse to air, and ether, and water, and other eccentricities. I might compare him to a person who began by maintaining generally that mind is the cause of the actions of Socrates, but who, when he endeavoured to explain the causes of my several actions in detail, went on to show that I sit here because my body is made up of bones and muscles; and the bones, as he would say, are hard and have joints which divide them, and the muscles are elastic, and they cover the bones, which have also a covering or environment of flesh and skin which contains them; and as the bones are lifted at their joints by the contraction or relaxation of the muscles, I am able to bend my limbs, and this is why I am sitting here in a curved posture — that is what he would say; and he would have a similar explanation of my talking to you, which he would attribute to sound, and air, and hearing, and he would assign ten thousand other causes of the same sort, forgetting to mention the true cause, which is, that the Athenians have thought fit to condemn me, and accordingly I have thought it better and more right to remain here and undergo my sentence; for I am inclined to think that these muscles and bones of mine would have gone 99
off long ago to Megara or Boeotia — by the dog they would, if they had been moved only by their own idea of what was best, and if I had not chosen the better and nobler part, instead of playing truant and running away, of enduring any punishment which the state inflicts. There is surely a strange confusion of causes and conditions in all this. It may be said, indeed, that without bones and muscles and the other parts of the body I cannot execute my purposes. But to say that I do as I do because of them, and that this is the way in which mind acts, and not from the choice of the best, is a very careless and idle mode of speaking. I wonder that they cannot distinguish the cause from the condition, which the many, feeling about in the dark, are always mistaking

and misnaming. And thus one man makes a vortex all round, and steadies the earth by the heaven; another gives the air as a support to the earth, which is a sort of broad trough. Any power which in arranging them as they are arranges them for the best never enters into their minds; and instead of finding any superior strength in it, they rather expect to discover another Atlas of the world who is stronger and more everlasting and more containing than the good;— of the obligatory and containing power of the good they think nothing; and yet this is the principle which I would fain learn if any one would teach me. But as I have failed either to discover myself, or to learn of any one else, the nature of the best, I will exhibit to you, if you like, what I have found to be the second best mode of enquiring into the cause.

I should very much like to hear, he replied.

The eye of the soul.

Socrates proceeded:— I thought that as I had failed in the contemplation of true existence, I ought to be careful that I did not lose the eye of my soul; as people may injure their bodily eye by observing and gazing on the sun during an eclipse, unless they take the precaution of only looking at the image reflected in the water, or in some similar medium. So in my own case, I was afraid that my soul might be blinded altogether if I looked at things with my eyes or tried to apprehend them by the help of the senses. And I thought that I had better have recourse to the world of mind and seek there the truth of existence. I dare say that the simile is not perfect — for I am very far from admitting that he who contemplates existences through the medium of thought, sees them only 'through a glass darkly,' any more than he who considers them in action and operation. However, this was the method which I adopted: I first assumed some principle which I judged to be the strongest, and then I affirmed as true whatever seemed to agree with this, whether relating to the cause or to anything else; and that which disagreed I regarded as untrue. But I should like to explain my meaning more clearly, as I do not think that you as yet understand me.

The abstract as plain or plainer than the concrete.

No indeed, replied Cebes, not very well.

There is nothing new, he said, in what I am about to tell you; but only what I have been always and everywhere

Phaedo.

SOCRATES, CEBES.

repeating in the previous discussion and on other occasions: I want to show you the nature of that cause which has occupied my thoughts. I shall have to go back to those familiar words which are in the mouth of every one, and first of all assume that there is an absolute beauty and goodness and greatness, and the like; grant me this, and I hope to be able to show you the nature of the cause, and to prove the immortality of the soul.

If the ideas have an absolute existence the soul is immortal.

Cebes said: You may proceed at once with the proof, for I grant you this.

Well, he said, then I should like to know whether you agree with me in the next step; for I cannot help thinking, if there be anything beautiful other than absolute beauty should there be such, that it can be beautiful only in so far as it partakes of absolute beauty — and I should say the same of everything. Do you agree in this notion of the cause?

Yes, he said, I agree.

All things exist by participation in general ideas.

He proceeded: I know nothing and can understand nothing of any other of those wise causes which are alleged; and if a person says to me that the bloom of colour, or form, or any such thing is a source of beauty, I leave all that, which is only confusing to me, and simply and singly, and perhaps foolishly, hold and am assured in my own mind that nothing makes a thing beautiful but the presence and participation of beauty in whatever way or manner obtained; for as to the manner I am uncertain, but I stoutly contend that by beauty all beautiful things become beautiful. This appears to me to be the safest answer which I can give, either to myself or to another, and to this I cling, in the persuasion that this principle will never be overthrown, and that to myself or to any one who asks the question, I may safely reply, That by beauty beautiful things become beautiful. Do you not agree with me?

I do.

And that by greatness only great things become great and greater greater, and by smallness the less become less?

True.

We thus escape certain contradictions of relation.

Then if a person were to remark that A is taller by a head than B, and B less by a head than A, you would refuse to admit his statement, and would stoutly contend that what

101

you mean is only that the greater is greater by, and by reason of, greatness, and the less is less only by, and by reason of, smallness; and thus you would avoid the danger of saying that the greater is greater and the less less by the measure of the head, which is the same in both, and would also avoid the monstrous absurdity of supposing that the greater man is greater by reason of the head, which is small. You would be afraid to draw such an inference, would you not?

Indeed, I should, said Cebes, laughing.

In like manner you would be afraid to say that ten exceeded eight by, and by reason of, two; but would say by, and by reason of, number; or you would say that two cubits exceed one cubit not by a half, but by magnitude?—for there is the same liability to error in all these cases.

Very true, he said.

Again, would you not be cautious of affirming that the addition of one to one, or the division of one, is the cause of two? And you would loudly asseverate that you know of no way in which anything comes into existence except by participation in its own proper essence, and consequently, as far as you know, the only cause of two is the participation in duality — this is the way to make two, and the participation in one is the way to make one. You would say: I will let alone puzzles of division and addition — wiser heads than mine may answer them; inexperienced as I am, and ready to start, as the proverb says, at my own shadow, I cannot afford to give up the sure ground of a principle. And if any one assails you there, you would not mind him, or answer him, until you had seen whether the consequences which follow agree with one another or not, and when you are further required to give an explanation of this principle, you would go on to assume a higher principle, and a higher, until you found a resting-place in the best of the higher; but you would not confuse the principle and the consequences in your reasoning, like the Eristics — at least if you wanted to discover real existence. Not that this confusion signifies to them, who never care or think about the matter at all, for they have the wit to be well pleased with themselves however

Phaedo.

SOCRATES, SIMMIAS, CEBES, ECHECRATES, PHAEDO.

great may be the turmoil of their ideas. But you, if you are 102
a philosopher, will certainly do as I say.

What you say is most true, said Simmias and Cebes, both speaking at once.

Ech. Yes, Phaedo; and I do not wonder at their assenting. Any one who has the least sense will acknowledge the wonderful clearness of Socrates' reasoning.

Phaed. Certainly, Echecrates; and such was the feeling of the whole company at the time.

Ech. Yes, and equally of ourselves, who were not of the company, and are now listening to your recital. But what followed?

Phaed. After all this had been admitted, and they had agreed that ideas exist, and that other things participate in them and derive their names from them, Socrates, if I remember rightly, said:—

There may still remain the contradiction of the same person being both greater and less, but this is only because he has greatness or smallness relatively to another person.

This is your way of speaking; and yet when you say that Simmias is greater than Socrates and less than Phaedo, do you not predicate of Simmias both greatness and smallness?

Yes, I do.

But still you allow that Simmias does not really exceed Socrates, as the words may seem to imply, because he is Simmias, but by reason of the size which he has; just as Simmias does not exceed Socrates because he is Simmias, any more than because Socrates is Socrates, but because he has smallness when compared with the greatness of Simmias?

True.

And if Phaedo exceeds him in size, this is not because Phaedo is Phaedo, but because Phaedo has greatness relatively to Simmias, who is comparatively smaller?

That is true.

And therefore Simmias is said to be great, and is also said to be small, because he is in a mean between them, exceeding the smallness of the one by his greatness, and allowing the greatness of the other to exceed his smallness. He added, laughing, I am speaking like a book, but I believe that what I am saying is true.

Simmias assented.

I speak as I do because I want you to agree with me in

thinking, not only that absolute greatness will never be great and also small, but that greatness in us or in the concrete will never admit the small or admit of being exceeded: instead of this, one of two things will happen, either the greater will fly or retire before the opposite, which is the less, or at the approach of the less has already ceased to exist; but will not, if allowing or admitting of smallness, be changed by that; even as I, having received and admitted smallness when compared with Simmias, remain just as I was, and am the same small person. And as the idea of greatness cannot condescend ever to be or become small, in like manner the smallness in us cannot be or become great; nor can any other opposite which remains the same ever
103 be or become its own opposite, but either passes away or perishes in the change.

The idea of greatness can never be small; and the greatness in us drives out smallness.

That, replied Cebes, is quite my notion.

Hereupon one of the company, though I do not exactly remember which of them, said: In heaven's name, is not this the direct contrary of what was admitted before — that out of the greater came the less and out of the less the greater, and that opposites were simply generated from opposites; but now this principle seems to be utterly denied.

Yet the greater comes from the less, and the less from the greater.

Socrates inclined his head to the speaker and listened. I like your courage, he said, in reminding us of this. But you do not observe that there is a difference in the two cases. For then we were speaking of opposites in the concrete, and now of the essential opposite which, as is affirmed, neither in us nor in nature can ever be at variance with itself: then, my friend, we were speaking of things in which opposites are inherent and which are called after them, but now about the opposites which are inherent in them and which give their name to them; and these essential opposites will never, as we maintain, admit of generation into or out of one another. At the same time, turning to Cebes, he said: Are you at all disconcerted, Cebes, at our friend's objection?

Distinguish: —The things in which the opposites inhere generate into and out of one another: never the opposites themselves.

No, I do not feel so, said Cebes; and yet I cannot deny that I am often disturbed by objections.

Then we are agreed after all, said Socrates, that the opposite will never in any case be opposed to itself?

Phaedo.

SOCRATES, CEBES.

Snow may be converted into water at the approach of heat, but not cold into heat.

To that we are quite agreed, he replied.

Yet once more let me ask you to consider the question from another point of view, and see whether you agree with me:—There is a thing which you term heat, and another thing which you term cold?

Certainly.

But are they the same as fire and snow?

Most assuredly not.

Heat is a thing different from fire, and cold is not the same with snow?

Yes.

And yet you will surely admit, that when snow, as was before said, is under the influence of heat, they will not remain snow and heat; but at the advance of the heat, the snow will either retire or perish?

Very true, he replied.

And the fire too at the advance of the cold will either retire or perish; and when the fire is under the influence of the cold, they will not remain as before, fire and cold.

That is true, he said.

And in some cases the name of the idea is not only attached to the idea in an eternal connection, but anything else which, not being the idea, exists only in the form of the idea, may also lay claim to it. I will try to make this clearer by an example:—The odd number is always called by the name of odd?

Very true.

But is this the only thing which is called odd? Are there not other things which have their own name, and yet are 104
called odd, because, although not the same as oddness, they are never without oddness?—that is what I mean to ask—whether numbers such as the number three are not of the class of odd. And there are many other examples: would you not say, for example, that three may be called by its proper name, and also be called odd, which is not the same with three? and this may be said not only of three but also of five, and of every alternate number—each of them without being oddness is odd; and in the same way two and four, and the other series of alternate numbers, has every number even, without being evenness. Do you agree?

Of course.

SOCRATES, CEBES.

Then now mark the point at which I am aiming:—not only do essential opposites exclude one another, but also concrete things, which, although not in themselves opposed, contain opposites; these, I say, likewise reject the idea which is opposed to that which is contained in them, and when it approaches them they either perish or withdraw. For example; Will not the number three endure annihilation or anything sooner than be converted into an even number, while remaining three?

Not only essential opposites, but some concrete things which contain opposites, exclude each other.

Very true, said Cebes.

And yet, he said, the number two is certainly not opposed to the number three?

It is not.

Then not only do opposite ideas repel the advance of one another, but also there are other natures which repel the approach of opposites.

Very true, he said.

Suppose, he said, that we endeavour, if possible, to determine what these are.

By all means.

Are they not, Cebes, such as compel the things of which they have possession, not only to take their own form, but also the form of some opposite?

That is to say the opposites which give an impress to other things.

What do you mean?

I mean, as I was just now saying, and as I am sure that you know, that those things which are possessed by the number three must not only be three in number, but must also be odd.

Quite true.

And on this oddness, of which the number three has the impress, the opposite idea will never intrude?

No.

And this impress was given by the odd principle?

Yes.

And to the odd is opposed the even?

True.

Then the idea of the even number will never arrive at three?

No.

Phaedo.

SOCRATES, CEBES.

Then three has no part in the even?

None.

Then the triad or number three is uneven?

Very true.

Natures may not be opposed, and yet may not admit of opposites; e. g. three is not opposed to two, and yet does not admit the even any more than two admits of the odd.

To return then to my distinction of natures which are not opposed, and yet do not admit opposites — as, in the instance given, three, although not opposed to the even, does not any the more admit of the even, but always brings the opposite into play on the other side; or as two does not receive the odd, or fire the cold — from these examples (and 105 there are many more of them) perhaps you may be able to arrive at the general conclusion, that not only opposites will not receive opposites, but also that nothing which brings the opposite will admit the opposite of that which it brings, in that to which it is brought. And here let me recapitulate — for there is no harm in repetition. The number five will not admit the nature of the even, any more than ten, which is the double of five, will admit the nature of the odd. The double has another opposite, and is not strictly opposed to the odd, but nevertheless rejects the odd altogether. Nor again will parts in the ratio 3 : 2, nor any fraction in which there is a half, nor again in which there is a third, admit the notion of the whole, although they are not opposed to the whole: You will agree?

Yes, he said, I entirely agree and go along with you in that.

The merely verbal truth may be replaced by a higher one.

And now, he said, let us begin again; and do not you answer my question in the words in which I ask it: let me have not the old safe answer of which I spoke at first, but another equally safe, of which the truth will be inferred by you from what has been just said. I mean that if any one asks you 'what that is, of which the inherence makes the body hot,' you will reply not heat (this is what I call the safe and stupid answer), but fire, a far superior answer, which we are now in a condition to give. Or if any one asks you 'why a body is diseased,' you will not say from disease, but from fever; and instead of saying that oddness is the cause of odd numbers, you will say that the monad is the cause of them: and so of things in general, as I dare say that you will understand sufficiently without my adducing any further examples.

Yes, he said, I quite understand you.

SOCRATES, CEBES.

Tell me, then, what is that of which the inheresence will render the body alive?

The soul, he replied.

We may now say, not life makes alive, but the soul makes alive; and the soul has a life-giving power which does not admit of death and is therefore immortal.

And is this always the case?

Yes, he said, of course.

Then whatever the soul possesses, to that she comes bearing life?

Yes, certainly.

And is there any opposite to life?

There is, he said.

And what is that?

Death.

Then the soul, as has been acknowledged, will never receive the opposite of what she brings.

Impossible, replied Cebes.

And now, he said, what did we just now call that principle which repels the even?

The odd.

And that principle which repels the musical or the just?

The unmusical, he said, and the unjust.

And what do we call that principle which does not admit of death?

The immortal, he said.

And does the soul admit of death?

No.

Then the soul is immortal?

Yes, he said.

And may we say that this has been proven?

Yes, abundantly proven, Socrates, he replied.

106 Supposing that the odd were imperishable, must not three be imperishable?
